

# **THE GRAMMAR OF ENGLISH GRAMMARS,**

WITH AN INTRODUCTION HISTORICAL AND CRITICAL;

THE WHOLE

METHODICALLY ARRANGED AND AMPLY ILLUSTRATED;

WITH

FORMS OF CORRECTING AND OF PARSING, IMPROPRIETIES FOR CORRECTION, EXAMPLES FOR  
PARSING, QUESTIONS FOR EXAMINATION, EXERCISES FOR WRITING, OBSERVATIONS  
FOR THE ADVANCED STUDENT, DECISIONS AND PROOFS FOR THE SETTLEMENT  
OF DISPUTED POINTS, OCCASIONAL STRICTURES AND DEFENCES, AN  
EXHIBITION OF THE SEVERAL METHODS OF ANALYSIS,

AND

A KEY TO THE ORAL EXERCISES:

TO WHICH ARE ADDED  
FOUR APPENDIXES,  
PERTAINING SEPARATELY TO THE FOUR PARTS OF GRAMMAR.  
BY GOOLD BROWN,

AUTHOR OF THE INSTITUTES OF ENGLISH GRAMMAR, THE FIRST LINES OF ENGLISH GRAMMAR, ETC.

“So let great authors have their due, that Time, who is the author of authors, be not  
deprived of his due, which is, farther and farther to discover truth.”—LORD BACON.

TENTH EDITION—REVISED AND IMPROVED.

ENLARGED BY THE ADDITION OF A  
COPIOUS INDEX OF MATTERS.  
BY SAMUEL U. BERRIAN, A. M.

1882

### **Editorial Note:**

This work is part of my language project. I constructed it for personal usage.

The human mind is responsible for human will, human behavior. It functions through two distinct branches of language; Logics and Analogics. I have, since early childhood, reasoned that the word *psychology* is constructed of two words, psyche and logos; i.e., the mind's use of words in order to do its biologically defined job.

There are fundamentally two, and only two, distinct branches of language; the difference between them is determined biologically. As any environmental acquisition system of a life form can only abstract from a thing either that things material differences, or that things form, we have two distinct starting points for crafting any thing, including language. If one starts with form, then one must add material to that form to make some thing; if one starts with material then one must add form to that material in order to construct some thing. Logics are based on the paradigm of the abstraction of form; i.e., there is no material difference in the abstraction; words, in of themselves, have no meaning; Logics from common grammars to mathematics are simply indexing systems for the analog content of the mind. What makes a word is then a combination of the index *and* the analog content of a mind paired with that index. Without that analog content, one may have an index, but the index has no meaning other than chance assignment by enculturation. As a thing requires both form and material difference so too language. A fact of language, which is not yet recognized, is that no matter which branch one starts with, it must be paired with the other, and that both must always say one and the same thing.

As the mind is responsible for human behavior, and as the mind functions wholly through the artifice of language, and as mankind is currently proto-linguistic, his behavior has not reached its biological destination yet and the human race is, frankly, quite savage and in danger. Thus I do my language project.

The only way to change the human condition, is to educate mankind into doing its own biologically defined job.

## PREFACE

The present performance is, so far as the end could be reached, the fulfillment of a design, formed about twenty-seven years ago, of one day presenting to the world, if I might, something like a complete grammar of the English language;—not a mere work of criticism, nor yet a work too tame, indecisive, and uncritical; for, in books of either of these sorts, our libraries already abound;—not a mere philosophical investigation of what is general or universal in grammar, nor yet a minute detail of what forms only a part of our own philology; for either of these plans falls very far short of such a purpose;—not a mere grammatical compend, abstract, or compilation, sorting with other works already before the public; for, in the production of school grammars, the author had early performed his part; and, of small treatises on this subject, we have long had a superabundance rather than a lack.

After about fifteen years devoted chiefly to grammatical studies and exercises, during most of which time I had been alternately instructing youth in four different languages, thinking it practicable to effect some improvement upon the manuals which explain our own, I prepared and published, for the use of schools, a duodecimo volume of about three hundred pages; which, upon the presumption that its principles were conformable to the best usage, and well established thereby, I entitled, “The Institutes of English Grammar.” Of this work, which, it is believed, has been gradually gaining in reputation and demand ever since its first publication, there is no occasion to say more here, than that it was the result of diligent study, and that it is, essentially, the nucleus, or the groundwork, of the present volume.

With much additional labour, the principles contained in the Institutes of English Grammar, have here been not only reaffirmed and rewritten, but occasionally improved in expression, or amplified in their details. New topics, new definitions, new rules, have also been added; and all parts of the subject have been illustrated by a multiplicity of new examples and exercises, which it has required a long time to amass and arrange. To the main doctrines, also, are here subjoined many new observations and criticisms, which are the results of no inconsiderable reading and reflection.

Regarding it as my business and calling, to work out the above-mentioned purpose as circumstances might permit, I have laid no claim to genius, none to infallibility; but I have endeavoured to be accurate, and aspired to be useful; and it is a part of my plan, that the reader of this volume shall never, through my fault, be left in doubt as to the origin of any thing it contains. It is but the duty of an author, to give every needful facility for a fair estimate of his work; and, whatever authority there may be for anonymous copying in works on grammar, the precedent is always bad.

The success of other labours, answerable to moderate wishes, has enabled me to pursue this task under favourable circumstances, and with an unselfish, independent aim. Not with vainglorious pride, but with reverent gratitude to God, I acknowledge this advantage, giving thanks for the signal mercy which has upborne me to the long-continued effort. Had the case been otherwise,—had the labours of the school-room been still demanded for my support,—the present large volume would never have appeared. I had desired some leisure for the completing of this design, and to it I scrupled not to

sacrifice the profits of my main employment, as soon as it could be done without hazard of adding another chapter to “the Calamities of Authors.”

The nature and design of this treatise are perhaps sufficiently developed in connexion with the various topics which are successively treated of in the Introduction. That method of teaching, which I conceive to be the best, is also there described. And, in the Grammar itself, there will be found occasional directions concerning the manner of its use. I have hoped to facilitate the study of the English language, not by abridging our grammatical code, or by rejecting the common phraseology of its doctrines, but by extending the former, improving the latter, and establishing both;—but still more, by furnishing new illustrations of the subject, and arranging its vast number of particulars in such order that every item may be readily found.

An other important purpose, which, in the preparation of this work, has been borne constantly in mind, and judged worthy of very particular attention, was the attempt to settle, so far as the most patient investigation and the fullest exhibition of proofs could do it, the multitudinous and vexatious disputes which have hitherto divided the sentiments of teachers, and made the study of English grammar so uninviting, unsatisfactory, and unprofitable, to the student whose taste demands a reasonable degree of certainty.

“Whenever labour implies the exertion of thought, it does good, at least to the strong: when the saving of labour is a saving of thought, it enfeebles. The mind, like the body, is strengthened by hard exercise: but, to give this exercise all its salutary effect, it should be of a reasonable kind; it should lead us to the perception of regularity, of order, of principle, of a law. When, after all the trouble we have taken, we merely find anomalies and confusion, we are disgusted with what is so uncongenial: and, as our higher faculties have not been called into action, they are not unlikely to be outgrown by the lower, and overborne as it were by the underwood of our minds. Hence, no doubt, one of the reasons why our language has been so much neglected, and why such scandalous ignorance prevails concerning its nature and history, is its unattractive, disheartening irregularity: none but Satan is fond of plunging into chaos.”—*Philological Museum*, (Cambridge, Eng., 1832,) Vol. i, p. 666.

If there be any remedy for the neglect and ignorance here spoken of, it must be found in the more effectual teaching of English grammar. But the principles of grammar can never have any beneficial influence over any person’s manner of speaking or writing, till by some process they are made so perfectly familiar, that he can apply them with all the readiness of a native power; that is, till he can apply them not only to what has been said or written, but to whatever he is about to utter. They must present themselves to the mind as by intuition, and with the quickness of thought; so as to regulate his language before it proceeds from the lips or the pen. If they come only by tardy recollection, or are called to mind but as contingent afterthoughts, they are altogether too late; and serve merely to mortify the speaker or writer, by reminding him of some deficiency or inaccuracy which there may then be no chance to amend.

But how shall, or can, this readiness be acquired? I answer, By a careful attention to such *exercises* as are fitted to bring the learner’s knowledge into practice. The student will therefore find, that I have given him something to *do*, as well as something to *learn*. But, by the formulæ and directions in this work, he is very carefully shown how to proceed; and, if he be a tolerable reader, it will be his own fault, if he does not, by such aid, become

a tolerable grammarian. The chief of these exercises are the *parsing* of what is right, and the *correcting* of what is wrong; both, perhaps, equally important; and I have intended to make them equally easy. To any real proficient in grammar, nothing can be more free from embarrassment, than the performance of these exercises, in all ordinary cases. For grammar, rightly learned, institutes in the mind a certain knowledge, or process of thought, concerning the sorts, properties, and relations, of all the words which can be presented in any intelligible sentence; and, with the initiated, a perception of the construction will always instantly follow or accompany a discovery of the sense: and instantly, too, should there be a perception of the error, if any of the words are misspelled, misjoined, misapplied,—or are, in any way, unfaithful to the sense intended.

Thus it is the great end of grammar, to secure the power of apt expression, by causing the principles on which language is constructed, if not to be constantly present to the mind, at least to pass through it more rapidly than either pen or voice can utter words. And where this power resides, there cannot but be a proportionate degree of critical skill, or of ability to judge of the language of others. Present what you will, grammar directs the mind immediately to a consideration of the sense; and, if properly taught, always creates a discriminating taste which is not less offended by specious absurdities, than by the common blunders of clownishness. Every one who has any pretensions to this art, knows that, to *parse* a sentence, is but to resolve it according to one's understanding of its import; and it is equally clear, that the power to *correct* an erroneous passage, usually demands or implies a knowledge of the author's thought.

But, if parsing and correcting are of so great practical importance as our first mention of them suggests, it may be well to be more explicit here concerning them. The pupil who cannot perform these exercises both accurately and fluently, is not truly prepared to perform them at all, and has no right to expect from any body a patient hearing. A slow and faltering rehearsal of words clearly prescribed, yet neither fairly remembered nor understandingly applied, is as foreign from parsing or correcting, as it is from elegance of diction. Divide and conquer, is the rule here, as in many other cases. Begin with what is simple; practise it till it becomes familiar; and then proceed. No child ever learned to speak by any other process. Hard things become easy by use; and skill is gained by little and little.

Of the whole method of parsing, it should be understood, that it is to be a critical exercise in utterance, as well as an evidence of previous study,—an exhibition of the learner's attainments in the practice, as well as in the theory, of grammar; and that, in any tolerable performance of this exercise, there must be an exact adherence to the truth of facts, as they occur in the example, and to the forms of expression, which are prescribed as models, in the book. For parsing is, in no degree, a work of invention; but wholly an exercise, an exertion of skill. It is, indeed, an exercise for all the powers of the mind, except the inventive faculty. Perception, judgement, reasoning, memory, and method, are indispensable to the performance. Nothing is to be guessed at, or devised, or uttered at random. If the learner can but rehearse the necessary definitions and rules, and perform the simplest exercise of judgement in their application, he cannot but perceive what he *must say* in order to speak the truth in parsing. His principal difficulty is in determining the parts of speech. To lessen this, the trial should commence with easy sentences, also with few of the definitions, and with definitions that have been perfectly learned. This difficulty being surmounted, let him follow the forms prescribed for the several praxes of this work, and he shall not err. The directions and examples given at the

head of each exercise, will show him exactly the number, the order, and the proper phraseology, of the particulars to be stated; so that he may go through the explanation with every advantage which a book can afford. There is no hope of him whom these aids will not save from “plunging into chaos.”

“Of all the works of man, language is the most enduring, and partakes the most of eternity. And, as our own language, so far as thought can project itself into the future, seems likely to be coeval with the world, and to spread vastly beyond even its present immeasurable limits, there cannot easily be a nobler object of ambition than to purify and better it.”—*Philological Museum*, Vol. i, p. 665.

It was some ambition of the kind here meant, awakened by a discovery of the scandalous errors and defects which abound in all our common English grammars, that prompted me to undertake the present work. Now, by the bettering of a language, I understand little else than the extensive teaching of its just forms, according to analogy and the general custom of the most accurate writers. This teaching, however, may well embrace also, or be combined with, an exposition of the various forms of false grammar by which inaccurate writers have corrupted, if not the language itself, at least their own style in it.

With respect to our present English, I know not whether any other improvement of it ought to be attempted, than the avoiding and correcting of those improprieties and unwarrantable anomalies by which carelessness, ignorance, and affectation, are ever tending to debase it, and the careful teaching of its true grammar, according to its real importance in education. What further amendment is feasible, or is worthy to engage attention, I will not pretend to say; nor do I claim to have been competent to so much as was manifestly desirable within these limits. But what I lacked in ability, I have endeavored to supply by diligence; and what I could conveniently strengthen by better authority than my own, I have not failed to support with all that was due, of names, guillemets, and references.

Like every other grammarian, I stake my reputation as an author, upon “a certain set of opinions,” and a certain manner of exhibiting them, appealing to the good sense of my readers for the correctness of both. All contrary doctrines are unavoidably censured by him who attempts to sustain his own; but, to grammatical censures, no more importance ought to be attached than what belongs to grammar itself. He who cares not to be accurate in the use of language, is inconsistent with himself, if he be offended at verbal criticism; and he who is displeased at finding his opinions rejected, is equally so, if he cannot prove them to be well founded. It is only in cases susceptible of a rule, that any writer can be judged deficient. I can censure no man for differing from me, till I can show him a principle which he ought to follow. According to Lord Kames, the standard of taste, both in arts and in manners, is “the common sense of mankind,” a principle founded in the universal conviction of a common nature in our species. (See *Elements of Criticism*, Chap, xxv, Vol. ii, p. 364.) If this is so, the doctrine applies to grammar as fully as to any thing about which criticism may concern itself.

But, to the discerning student or teacher, I owe an apology for the abundant condescension with which I have noticed in this volume the works of unskillful grammarians. For men of sense have no natural inclination to dwell upon palpable offences against taste and scholarship; nor can they be easily persuaded to approve the

course of an author who makes it his business to criticise petty productions. And is it not a fact, that grammatical authorship has sunk so low, that no man who is capable of perceiving its multitudinous errors, dares now stoop to notice the most flagrant of its abuses, or the most successful of its abusers? And, of the quackery which is now so prevalent, what can be a more natural effect, than a very general contempt for the study of grammar? My apology to the reader therefore is, that, as the honour of our language demands correctness in all the manuals prepared for schools, a just exposition of any that are lacking in this point, is a service due to the study of English grammar, if not to the authors in question.

The exposition, however, that I have made of the errors and defects of other writers, is only an incident, or underpart, of the scheme of this treatise. Nor have I anywhere exhibited blunders as one that takes delight in their discovery. My main design has been, to prepare a work which, by its own completeness and excellence, should deserve the title here chosen. But, a comprehensive code of false grammar being confessedly the most effectual means of teaching what is true, I have thought fit to supply this portion of my book, not from anonymous or uncertain sources, but from the actual text of other authors, and chiefly from the works of professed grammarians.

“In what regards the laws of grammatical purity,” says Dr. Campbell, “the violation is much more conspicuous than the observance.”—See *Philosophy of Rhetoric*, p. 190. It therefore falls in with my main purpose, to present to the public, in the following ample work, a condensed mass of special criticism, such as is not elsewhere to be found in any language. And, if the littleness of the particulars to which the learner’s attention is called, be reckoned an objection, the author last quoted has furnished for me, as well as for himself, a good apology. “The elements which enter into the composition of the hugest bodies, are subtile and inconsiderable. The rudiments of every art and science exhibit at first, to the learner, the appearance of littleness and insignificancy. And it is by attending to such reflections, as to a superficial observer would appear minute and hypercritical, that language must be improved, and eloquence perfected.”—*Ib.*, p. 244.

GOOLD BROWN.

LYNN, MASS., 1851.

**TABLE OF CONTENTS.****PRELIMINARY MATTERS.**

Preface to the Grammar of English Grammars;  
This Table of Contents;  
Catalogue of English Grammars and Grammarians;

**INTRODUCTION.**

Chapter I. Of the Science of Grammar;  
Chapter II. Of Grammatical Authorship;  
Chapter III. Of Grammatical Success and Fame;  
Chapter IV. Of the Origin of Language;  
Chapter V. Of the Power of Language;  
Chapter VI. Of the Origin and History of the English Language;  
Chapter VII. Changes and Specimens of the English Language;  
Chapter VIII. Of the Grammatical Study of the English Language;  
Chapter IX. Of the Best Method of Teaching Grammar;  
Chapter X. Of Grammatical Definitions;  
Chapter XI. Brief Notices of the Schemes of certain Grammars;

Chapter IX. Of Conjunctions.  
Corrections under the 8 Notes to Rule XXII  
Chapter X. Of Prepositions.  
Corrections under the 5 Notes to Rule XXIII  
Chapter XI. Promiscuous Exercises.  
Corrections of the 8 Lessons  
Chapter XII. General Review.  
Corrections under all the preceding Rules and Notes; 18 Lessons  
Chapter XIII. General Rule.  
Corrections under the General Rule; 16 Lessons  
Corrections under the Critical Notes  
Promiscuous Corrections of False Syntax; 5 Lessons, under Various Rules

### **THE KEY.—PART IV.—PROSODY.**

Chapter I. Punctuation  
Section I. The Comma;  
Corrections under its 17 Rules  
Section II. The Semicolon;  
Corrections under its 8 Rules  
Mixed Examples Corrected  
Section III. The Colon;  
Corrections under its 8 Rules  
Mixed Examples Corrected  
Section IV. The Period;  
Corrections under its 8 Rules  
Mixed Examples Corrected  
Section V. The Dash;  
Corrections under its 8 Rules  
Mixed Examples Corrected  
Section VI. The Eroteme;  
Corrections under its 3 Rules  
Mixed Examples Corrected  
Section VII. The Ecphoneme;  
Corrections under its 3 Rules  
Mixed Examples Corrected  
Section VIII. The Curves;  
Corrections under their 2 Rules  
Mixed Examples Corrected  
Section IX. All Points;

Corrections Good English Rightly Pointed

Chapter II. Utterance; no Corrections

Chapter III. Figures; no Corrections

Chapter IV. Versification.

False Prosody, or Errors of Metre, Corrected

**THE FOUR APPENDIXES.**

Appendix I. (To Orthography.) Of the Sounds of the Letters

Appendix II. (To Etymology.) Of the Derivation of Words

Appendix III. (To Syntax.) Of the Qualities of Style

Appendix IV. (To Prosody.) Of Poetic Diction; its Peculiarities

INDEX OF MATTERS.

A  
DIGESTED CATALOGUE  
OF  
ENGLISH GRAMMARS AND GRAMMARIANS,  
WITH SOME  
COLLATERAL WORKS AND AUTHORITIES,  
ESPECIALLY SUCH AS ARE CITED IN  
THE GRAMMAR OF ENGLISH GRAMMARS.

- ADAM, ALEXANDER, LL. D.; "Latin and English Grammar;" 12mo, pp. 302: Edinburgh, 1772; Boston, 1803.
- ADAMS, JOHN QUINCY, LL. D.; "Lectures on Rhetoric and Oratory;" 2 vols., 8vo: Cambridge, N. E., 1810.
- ADAMS, REV. CHARLES, A. M.; English Grammar; 12mo, pp. 172: 1st Edition, Boston, 1838.
- ADAMS, DANIEL, M. B.; English Grammar; 12mo, pp. 103: 3d Edition, Montpelier, Vt., 1814.
- ADAMS, E.; English Grammar; 18mo, pp. 143. Leicester, Mass., 1st Ed., 1806; 5th Ed., 1821.
- AICKIN, JOSEPH; English Grammar, 8vo: London, 1693.
- AINSWORTH, ROBERT; Latin and English Dictionary, 4to: 1st Ed., 1736; revised Ed., Lond., 1823.
- AINSWORTH, LUTHER; "A Practical System of English Grammar;" 12mo, pp. 144: 1st Ed., Providence, R. I., 1837.
- ALDEN, ABNER, A. M.; "Grammar Made Easy;" 12mo, pp. 180: 1st Ed., Boston, 1811.
- ALDEN, Rev. TIMOTHY, Jun.; English Grammar; 18mo, pp. 36: 1st Ed., Boston, 1811.
- ALDRICH, W.; "Lectures on English Grammar and Rhetoric, for Common Schools, Academies," &c.; 18mo, pp. 68: 11th Ed., Boston, 1847.
- ALEXANDER, CALEB, A. M.; (1.) "Grammatical Elements," published before 1794. (2.) "A Grammatical Institute of the Latin Language;" 12mo, pp. 132: Worcester, Mass., 1794. (3.) "A Grammatical System of the English Language;" 12mo, pp. 96; written at Mendon, Mass., 1795: 10th Ed., Keene, N. H., 1814. Also, (4.) "An Introduction to Latin," 1795; and, (5.) "An Introduction to the Speaking and Writing of English."
- ALEXANDER, SAMUEL; English Grammar; 18mo, pp. 216: 4th Edition, London, 1832.
- ALGER, ISRAEL, Jun., A. M.; "Abridgement of Murray's E. Gram.," &c.; 18mo, pp. 126: Boston, 1824 and 1842.
- ALLEN, Rev. WILLIAM, M. A.; "Grammar of the English Language," &c.; 18mo: London. Also, "The Elements of English Grammar." &c.; 12mo, pp. 457: London, 1813; 2d Ed.,
- ALLEN and CORNWELL; English Grammar; 18mo, pp. 162: 3d Edition, London, 1841.
- ALLEN, D. CAVERNO; "Grammatic Guide, or Common School Grammar;" 12mo, pp. 94: Syracuse, N. Y., 1847.
- ANDREW, JAMES, LL. D.; English Grammar; 8vo, pp. 129: London, 1817.
- ANDREWS & STODDARD; "A Grammar of the Latin Language;" 12mo, pp. 328: Boston, 1836; 11th Ed., 1845.

- ANGELL, OLIVER, A. M.; English Grammar; 12mo, pp. 90: 1st Edition, Providence, R. I., 1830.
- ANGUS, WILLIAM, M. A.; English Grammar; 12mo, pp. 255: 2d Edition, Glasgow, Scotland, 1807.
- ANON.; "The British Grammar;" 8vo, pp. 281: London, 1760, or near that date. Boston, Mass., 1784.
- ANON.; "A Comprehensive Grammar," &c.; 18mo, pp. 174: 3d Ed., Philadelphia, T. Dobson, 1789.
- ANON.; "The Comic Grammar," &c.; London, 1840.
- ANON.; "The Decoy," an English Grammar with Cuts; 12mo, pp. 33: New York, S. Wood & Sons, 1820.
- ANON.: E. Gram., "By T. C.;" 18mo, pp. 104: London, 1843.
- ANON.; Grammar and Rhetoric; 12mo, pp. 221: London, 1776.
- ANON.; "The English Tutor;" 8vo: London, 1747.
- ANON.; English Grammar, 12mo: London, Boosey, 1795.
- ANON.; English Grammar; 18mo, pp. 161: London, 1838.
- ANON.; English Grammar; 18mo, pp. 85: London, 1838.
- ANON.; An English Grammar, with Engravings; 18mo, pp. 16: London, 1820.
- ANON.; English Grammar, pp. 84: 1st Ed., Huddersfield, 1817.
- ANON.: "The Essentials of English Grammar;" 18mo, pp. 108: 3d Edition, London, 1821.
- ANON.; "A Plain and Comprehensive Grammar," in "The Complete Letter-Writer;" 12mo, pp. 31;—pages of the whole book, 215: London, 1811.
- ANON.; English Grammar; 18mo, pp. 131: Albany, N. Y., 1819.
- ANON.; (A. H. Maltby & Co. pub.;) Murray's Abridgement, "with Additions;" 18mo, pp. 120: Newhaven, Ct., 1822.
- ANON.; (James Loring, pub.;) Murray's Abridgement, "with Alterations and Improvements; by a Teacher of Youth;" (Lawson Lyon;) 18mo, pp. 72: 14th Ed., Boston, 1821.
- ANON.; "The Infant School Grammar;" (said to have been written by Mrs. Bethune;) 18mo, pp. 182: New York, 1830. Jonathan Seymour, proprietor.
- ANON.; Pestalozzian Grammar; 12mo, pp. 60: Boston, 1830.
- ANON.; Interrogative Grammar; 12mo, pp. 70: Boston, 1832.
- ANON.; Grammar with Cuts; 18mo, pp. 108: Boston, 1830. ANON.; "The Juvenile English Grammar;" 18mo, pp. 89: Boston, 1829. B. Perkins & Co., publishers and proprietors.
- ANON.; "The Little Grammarian;" 18mo, pp. 108: 2d Edition, Boston, 1829.
- ANON.; An Inductive Grammar; 12mo, pp. 185: Windsor, Vt., 1829.
- ANON.; "A Concise Grammar of the English Language, attempted in Verse;" 18mo, pp. 63: 1st Edition, New York, 1825. ANON.; "Edward's First Lessons in Grammar;" 18mo, pp. 108: 1st Ed., Boston, T. H. Webb & Co., 1843.
- ANON.; "The First Lessons in English Grammar;" 18mo, pp. 90: 1st Edition, Boston, 1842.
- ANON.; "A New Grammar of the English Language;" 12mo, pp. 124: New York, 1831; 2d Ed., Boston, 1834.
- ANON.; "Enclytica, or the Principles of Universal Grammar;" 8vo, pp. 133: London, J. Booth, 1814.

- ANON.; "The General Principles of Grammar, edited by a few Well-Wishers to Knowledge," 18mo, pp. 76: Philadelphia, Lea & Blanchard, 1847.
- ANON.; "English School Grammar;" small 12mo, pp. 32: London, 1850. A meagre sketch, published by "the Society for promoting Christian Knowledge."
- ANON.; "An English Grammar, together with a First Lesson in Reading;" 18mo, pp. 16: James Burns, London; 2d Ed., 1844. Not worth a pin.
- ARISTOTLE; his Poetics;—the Greek text, with Goulston's Latin Version, and Winstanley's Notes;—8vo, pp. 320: Oxford, England, 1780.
- ARNOLD, T. K., M. A.; English Grammar; 12mo, pp. 76: 2d Edition, London, 1841.
- ASH, JOHN, LL. D.; "Grammatical Institutes;" 18mo, pp. 142: London, first published about 1763; New York, "A New Edition, Revised and Corrected," 1799.
- BACON, CALEB, Teacher; "Murray's English Grammar Put into Questions and Answers;" 18mo, pp. 108: New York, 1st Edition, 1818; 5th Edition, 1823, 1827, and 1830.
- BADGLEY, JONATHAN; English Grammar; 12mo, pp. 200: 1st Edition, Utica, N. Y., 1845. Suppressed for plagiarism from G. Brown.
- BALCH, WILLIAM S.; (1.) "Lectures on Language;" 12mo, pp. 252: Providence, 1838. (2.) "A Grammar of the English Language;" 12mo, pp. 140: 1st Edition, Boston, 1839.
- BALDWIN, EDWARD; English Grammar; 18mo, pp. 148: London, 1810; 2d Ed., 1824.
- BARBER, Dr. JONATHAN; "A Grammar of Elocution;" 12mo; Newhaven, 1830.
- BARNARD, FREDERICK A. P., A. M.; "Analytic Grammar; with Symbolic Illustration;" 12mo, pp. 264: New York, 1836. This is a curious work, and remarkably well-written.
- BARNES, DANIEL H., of N. Y.; "The Red Book," or Bearcroft's "Practical Orthography," Revised and Enlarged; 12mo, pp. 347: New York, 1828.
- BARNES, WILLIAM, B. D.; (1.) English Grammar; 18mo, pp. 120: London, 1842. (2.) "A Philological Grammar, grounded upon English, and formed from a Comparison of more than Sixty Languages;" 8vo, pp. 312: London, 1854.
- BARRETT, JOHN; "A Grammar of the English Language;" 18mo, pp. 214: 2d Ed., Boston, 1819.
- BARRETT, SOLOMON, Jun.; (1.) "The Principles of Language;" 12mo, pp. 120: Albany, 1837. (2.) "The Principles of English Grammar;" 18mo, pp. 96; "Tenth Edition, Revised;" Utica, 1845. (3.) "The Principles of Grammar;" 12mo, pp. 407: "Revised Edition;" Cambridge, 1854.
- BARRIE, ALEXANDER; English Grammar; 24to, pp. 54: Edinburgh, 9th Ed., 1800.
- BARTLETT, MONTGOMERY R.; "The Common School Manual;" called in the Third or Philadelphia Edition, "The *National* School Manual;"—"in Four Parts," or Separate Volumes, 12mo: I, pp. 108; II, 302; III, 379; IV, promised "to consist of 450 or 500 pages." First three parts, "Second Edition," New York, 1830. A miserable jumble, in the successive pages of which, Grammar is mixed up with Spelling-columns, Reading-lessons, Arithmetic, Geometry, and the other supposed daily tasks of a school-boy!
- BAILEY, N., Schoolmaster; "English and Latin Exercises;" 12mo, pp. 183: London. 18th Ed., 1798.
- BAILEY, Rev. R. W., A. M.; "English Grammar," or "Manual of the English Language;" 12mo, pp. 240: 2d Ed., Philadelphia, 1854.
- BAYLEY, ANSELM, LL. D.; English Grammar, 8vo: London, 1772.

- BEALE, SOLON; English Grammar, 18mo, pp. 27: Bangor, Maine, 1833.
- BEALL, ALEXANDER; English Grammar, 12mo: 1st Ed., Cincinnati, Ohio, 1841.
- BEATTIE, JAMES, LL. D.; "Theory of Language:" London, 1783; Philadelphia, 1809. "Elements of Moral Science;" 12mo, pp. 572; Baltimore, 1813. See, in Part 1, the sections which treat of "The Faculty of Speech," and the "Essentials of Language;" and, in Part IV, those which treat of "Rhetorick, Figures, Sentences, Style, and Poetry."
- BECK, WILLIAM; "Outline of English Grammar;" very small, pp. 34: 3d Ed., London, 1829.
- BEECHER, CATHARINE E.; English Grammar, 12mo, pp. 74. 1st Ed., Hartford, Ct., 1829.
- BELL, JOHN; English Grammar, 12mo, pp. 446: (2 vols.): 1st Ed., Glasgow, 1769.
- BELLAMY, ELIZABETH; English Grammar, 12mo: London, 1802.
- BENEDICT,———; English Grammar, 12mo, pp. 192: 1st Ed., Nicholasville, Ky., 1832.
- BETTESWORTH, JOHN; English Grammar, 12mo: London, 1778.
- BICKNELL, ALEXANDER, Esq.; "The Grammatical Wreath; or, a Complete System of English Grammar;" 12mo, pp. 804: London, 1790. BINGHAM, CALEB, A. M.; "The Young Lady's Accidence;" 18mo, pp. 60: Boston, 1804; 20th Ed., 1815.
- BLAIR, HUGH, D. D., F. B. S.; "Lectures on Rhetoric and Belles-Lettres;" 8vo, pp. 500: London, 1783; New York, 1819.
- BLAIR, JOHN, D. D.; English Grammar; 12mo, pp. 145: 1st Ed., Philadelphia, 1831.
- BLAIR, DAVID, Rev.; "A Practical Grammar of the English Language;" 18mo, pp. 167: 7th Ed., London, 1815.
- BLAISDALE, SILAS; English Grammar; 18mo, pp. 88: 1st Ed., Boston, 1831.
- BLISS, LEONARD Jun.; English Grammar; 18mo, pp. 73: 1st Ed., Louisville, Ky., 1839.
- BOBBITT, A.; English Grammar; 12mo, pp. 136: 1st Ed., London, 1833.
- BOLLES, WILLIAM; (1.) "A Spelling-Book;" 12mo, pp. 180: Ster. Ed., N. London, 1831. (2.) "An Explanatory and Phonographic Pronouncing Dictionary of the English Language;" royal octavo, pp. 944; Ster. Ed., New London, 1845.
- BOOTH, DAVID; Introd. to Analytical Dict.; 8vo, pp. 168: London, 1814. Analytical Dictionary of the English Language: London, 1835. E. Grammar, 12mo: London, 1837.
- BRACE, JOAB; "The Principles of English Grammar;" (vile theft from Lennie;) 18mo, pp. 144: 1st Edition, Philadelphia, 1839.
- BRADLEY, JOSHUA, A. M.; "Youth's Literary Guide;" 12mo, pp. 192: 1st Ed., Windsor, Vt., 1815.
- BRADLEY, Rev. C.; English Grammar; 12mo, pp. 148: York, Eng., 1810; 3d Ed., 1813.
- BRIDIL, EDMUND, LL. D.; E. Gram., 4to: London, 1799.
- BRIGHTLAND, JOHN, *Pub.*; "A Grammar of the English Tongue;" 12mo, pp. 800: 7th Ed., London, 1748.
- BRITTAIN, Rev. LEWIS; English Grammar; 12mo, pp. 156: 2d Edition, London, 1790.
- BROMLEY, WALTER; English Grammar; 18mo, pp. 104: 1st Ed., Halifax, N. S., 1822.
- BROWN, GOOLD; (1.) "The Institutes of English Grammar;" 12mo, pp. 220-312: New York, 1st Ed., 1823; stereotyped in 1832, and again in 1846. (2.) "The First Lines of English Grammar;" early copies 18mo, late copies 12mo, pp. 108: New York, 1st Ed., 1823; stereotyped in 1827, and in 1844. (3.) "A Key to the Exercises for

Writing, contained in the Institutes of English Grammar," 12mo, pp. 51: New York, 1825. (4.) "A Catechism of English Grammar;" 18mo, pp. 72: New York, 1827. (5.) "A Compendious English Grammar;" 12mo, pp. 22: (in Part I of the Treasury of Knowledge:) New York, 1831. (6.) "The Grammar of English Grammars;" 8vo, pp. 1028; first printed in Boston in 1850 and 1851.

BROWN, JAMES; (1.) An Explanation of E. Grammar as taught by an Expensive Machine; 8vo, pp. 40: 1st Ed., Boston, 1815. (2.) "The American Grammar;" a Pamphlet; 12mo, pp. 48: Salem, N. Y., 1821. (3.) "An American Grammar;" 18mo, pp. 162: New York, 1821. (4.) "An Appeal from the British System of English Grammar to Common Sense;" 12mo, pp. 336: Philadelphia, 1837. (5.) "The American System of English Syntax;" 12mo, pp. 216: Philad., 1838. (6.) "An Exegesis of English Syntax;" 12mo, pp. 147: Philad., 1840. (7.) "The First Part of the American System of English Syntax;" 12mo, pp. 195: Boston, 1841. (8.) "An English Syntascope," a "Chart," and other fantastical works.

BROWN, J. H., A. M.; (with Gengemhre;) "Elements of English Grammar, on a Progressive System;" 12mo, pp. 213: Philad., 1855.

BROWN, RICHARD; English Grammar, 12mo: London, 1692.

BUCHANAN, JAMES; "A Regular English Syntax;" 12mo, pp. 196: 5th American Ed., Philad., 1792.

BUCKE, CHARLES; "A Classical Grammar of the E. Language;" 18mo, pp. 152: London, 1829.

BULLEN, Rev. H. ST. JOHN; English Grammar; 12mo, pp. 140: 1st Edition, London, 1797.

BULLIONS, Rev. PETER, D. D.; (1.) "Elements of the Greek Language;" (now called, "The Principles of Greek Grammar;") mostly a version of Dr. Moor's "Elementa Linguæ Græcæ;" 1st Ed., 1831. (2.) "The Principles of English Grammar;" (mostly copied from Lennie;) 12mo, pp. 187; 2d Ed., New York, 1837; 5th Ed., Revised, pp. 216, 1843. (3.) "The Principles of Latin Grammar;" (professedly, "upon the foundation of Adam's Latin Grammar;") 12mo, pp. 312: Albany, 1841: 12th Ed., New York, 1846. (4.) "Practical Lessons in English Grammar;" 12mo, pp. 132: New York, 1844. (5.) "An Analytical and Practical Grammar of the English Language;" 12mo, pp. 240: 1st Ed., New York, 1849.

BULLOKAR, WILLIAM; (1.) "Booke at Large for the Amendement of Orthographie for English Speech." (2.) "A Bref Grammar for English." London, 1586.

BURHANS, HEZEKIAH; "The Critical Pronouncing Spelling-Book;" 12mo, pp. 204: 1st Ed., Philad., 1823.

BURLES, EDWARD; E. Gram., 12mo: Lond., 1652.

BURN, JOHN; "A Practical Grammar of the E. Lang.;" 12mo, pp. 275: Glasgow, 1766; 10th Ed., 1810.

BURR, JONATHAN, A. M.; "A Compendium of Eng. Gram.;" 18mo, pp. 72: Boston, 1797,—1804,—1818.

BUTLER, CHARLES; E. Gram., 4to: Oxford, Eng., 1633.

BUTLER, NOBLE, A. M.; (1.) "A Practical Grammar of the E. Lang.;" 12mo, pp. 216: 1st Ed., Louisville, Ky., 1845. (2.) "Introductory Lessons in E. Grammar," 1845.

CAMPBELL, GEORGE, D. D., F. R. S.; "The Philosophy of Rhetoric;" 8vo, pp. 445: London, 1776: Philad., 1818.

- CARDELL, WM. S.; (1.) An "Analytical Spelling-Book;" (with Part of the "Story of Jack Halyard;") 12mo, pp. 192: (published at first under the fictitious name of "John Franklin Jones:") New York, 1823; 2d Ed., 1824. (2.) An "Essay on Language;" 12mo, pp. 203: New York, 1825. (3.) "Elements of English Grammar;" 18mo, pp. 141: New York, 1826; 3d Ed., Hartford, 1827. (4.) "Philosophic Grammar of the English Language;" 12mo, pp. 236: Philadelphia, 1827.

- "DESPAUTER, JOHN, a Flemish grammarian, whose books were, at one time, in great repute; he died in 1520."—Univ. Biog. Dict. Despauter's Latin Grammar, in Three Parts,—Etymology, Syntax, and Versification,—comprises 858 octavo pages. Dr. Adam says, in the "Preface to the Fourth Edition" of his Grammar, "The first complete edition of Despauter's Grammar was printed at Cologne, anno 1522; his Syntax had been published anno 1509." G. Brown's copy is a "complete edition," printed partly in 1517, and partly in 1518.

- DEVIS, ELLEN; *E. Gram.*; 18mo, pp. 130: London and Dublin; 1st Ed., 1777; 17th Ed., 1825. ☞ Devis's Grammar, spoken of in D. Blair's Preface, as being too "comprehensive and minute," is doubtless an other and much larger work.

## INTRODUCTION

### HISTORICAL AND CRITICAL

#### CHAPTER I.

#### OF THE SCIENCE OF GRAMMAR.

“Hæc de Grammatica quam brevissime potui: non ut omnia dicerem sectatus, (quod infinitum erat,) sed ut maxima necessaria.”—QUINTILIAN. *De Inst. Orat.*, Lib. i, Cap. x.

1. Language, in the proper sense of the term, is peculiar to man; so that, without a miraculous assumption of human powers, none but human beings can make words the vehicle of thought. An imitation of some of the articulate sounds employed in speech, may be exhibited by parrots, and sometimes by domesticated ravens, and we know that almost all brute animals have their peculiar natural voices, by which they indicate their feelings, whether pleasing or painful. But *language* is an attribute of reason, and differs essentially not only from all brute voices, but even from all the chattering, jabbering, and babbling of our own species, in which there is not an intelligible meaning, with division of thought, and distinction of words.

2. Speech results from the joint exercise of the best and noblest faculties of human nature, from our rational understanding and our social affection; and is, in the proper use of it, the peculiar ornament and distinction of man, whether we compare him with other orders in the creation, or view him as an individual preëminent among his fellows. Hence that science which makes known the nature and structure of speech, and immediately concerns the correct and elegant use of language, while it surpasses all the conceptions of the stupid or unlearned, and presents nothing that can seem desirable to the sensual and grovelling, has an intrinsic dignity which highly commends it to all persons of sense and taste, and makes it most a favourite with the most gifted minds. That science is Grammar. And though there be some geniuses who affect to despise the trammels of grammar rules, to whom it must be conceded that many things which have been unskillfully taught as such, deserve to be despised; yet it is true, as Dr. Adam remarks, that, “The study of Grammar has been considered an object of great importance by the wisest men in all ages.”—*Preface to Latin and English Gram.*, p. iii.

3. Grammar bears to language several different relations, and acquires from each a nature leading to a different definition. *First*, It is to language, as knowledge is to the thing known; and as doctrine, to the truths it inculcates. In these relations, grammar is a science. It is the first of what have been called the seven sciences, or liberal branches of knowledge; namely, grammar, logic, rhetoric, arithmetic, geometry, astronomy, and music. *Secondly*, It is as skill, to the thing to be done; and as power, to the instruments it employs. In these relations, grammar is an art; and as such, has long been defined, “*ars rectè scribendi, rectèque loquendi*” the art of writing and speaking correctly. *Thirdly*, It is as navigation, to the ocean, which nautic skill alone enables men to traverse. In this relation, theory and practice combine, and grammar becomes, like navigation, a practical science. *Fourthly*, It is as a chart, to a coast which we would visit. In this relation, our grammar is a text-book, which we take as a guide, or use as a help to our own observation. *Fifthly*, It is as a single voyage, to the open sea, the highway of nations. Such is our meaning, when we speak of the grammar of a particular text or passage.

4. Again: Grammar is to language a sort of self-examination. It turns the faculty of speech or writing upon itself for its own elucidation; and makes the tongue or the pen explain the uses and abuses to which both are liable, as well as the nature and excellency of that power, of which, these are the two grand instruments. From this account, some may begin to think that in treating of grammar we are dealing with something too various and changeable for the understanding to grasp; a dodging Proteus of the imagination, who is ever ready to assume some new shape, and elude the vigilance of the inquirer. But let the reader or student do his part; and, if he please, follow us with attention. We will endeavour, with welded links, to bind this Proteus, in such a manner that he shall neither escape from our hold, nor fail to give to the consulter an intelligible and satisfactory response. Be not discouraged, generous youth. Hark to that sweet far-reaching note:

“Sed, quanto ille magis formas se vertet in omnes,  
Tanto, nate, magis contende tenacia vincla.” VIRGIL. *Geor.* IV, 411.

“But thou, the more he varies forms, beware  
To strain his fetters with a stricter care.” DRYDEN’S VIRGIL.

5. If for a moment we consider the good and the evil that are done in the world through the medium of speech, we shall with one voice acknowledge, that not only the faculty itself, but also the manner in which it is used, is of incalculable importance to the welfare of man. But this reflection does not directly enhance our respect for grammar, because it is not to language as the vehicle of moral or of immoral sentiment, of good or of evil to mankind, that the attention of the grammarian is particularly directed. A consideration of the subject in these relations, pertains rather to the moral philosopher. Nor are the arts of logic and rhetoric now considered to be properly within the grammarian’s province. Modern science assigns to these their separate places, and restricts grammar, which at one period embraced all learning, to the knowledge of language, as respects its fitness to be the vehicle of any particular thought or sentiment which the speaker or writer may wish to convey by it. Accordingly grammar is commonly defined, by writers upon the subject, in the special sense of an art—“the *art* of speaking or writing a language with propriety or correctness.”—*Webster’s Dict.*

6. Lily says, “Grammatica est rectè scribendi atque loquendi ars;” that is, “Grammar is the art of writing and speaking correctly.” Despauter, too, in his definition, which is quoted in a preceding paragraph, not improperly placed writing first, as being that with which grammar is primarily concerned. For it ought to be remembered, that over any fugitive colloquial dialect, which has never been fixed by visible signs, grammar has no control; and that the speaking which the art or science of grammar teaches, is exclusively that which has reference to a knowledge of letters. It is the certain tendency of writing, to improve speech. And in proportion as books are multiplied, and the knowledge of written language is diffused, local dialects, which are beneath the dignity of grammar, will always be found to grow fewer, and their differences less. There are, in the various parts of the world, many languages to which the art of grammar has never yet been applied; and to which, therefore, the definition or true idea of grammar, however general, does not properly extend. And even where it has been applied, and is now honoured as a popular branch of study, there is yet great room for improvement: barbarisms and solecisms have not been rebuked away as they deserve to be.

7. Melancthon says, “Grammatica est certa loquendi ac scribendi ratio, Latinis Latinè.” Vossius, “Ars benè loquendi eoque et scribendi, atque id Latinis Latinè.” Dr. Prat,

*“Grammatica est rectè loquendi atque scribendi ars.”* Ruddiman also, in his Institutes of Latin Grammar, reversed the terms *writing* and *speaking*, and defined grammar, *“ars recè loquendi scribendique;”* and, either from mere imitation, or from the general observation that speech precedes writing, this arrangement of the words has been followed by most modern grammarians. Dr. Lowth embraces both terms in a more general one, and says, “Grammar is the art of *rightly expressing* our thoughts by words.” It is, however, the province of grammar, to guide us not merely in the expression of our own thoughts, but also in our apprehension of the thoughts, and our interpretation of the words, of others. Hence, Perizonius, in commenting upon Sanctius’s imperfect definition, *“Grammatica est ars rectè loquendi,”* not improperly asks, *“et quidni intelligendi et explicandi?”* “and why not also of understanding and explaining?” Hence, too, the art of *reading* is virtually a part of grammar; for it is but the art of understanding and speaking correctly that which we have before us on paper. And Nugent has accordingly given us the following definition: “Grammar is the art of reading, speaking, and writing a language by rules.”—*Introduction to Dict.*, p. xii.\*

8. The word *rectè*, rightly, truly, correctly, which occurs in most of the foregoing Latin definitions, is censured by the learned Richard Johnson, in his Grammatical Commentaries, on account of the vagueness of its meaning. He says, it is not only ambiguous by reason of its different uses in the Latin classics, but destitute of any signification proper to grammar. But even if this be true as regards its earlier application, it may well be questioned, whether by frequency of use it has not acquired a signification which makes it proper at the present time. The English word *correctly* seems to be less liable to such an objection; and either this brief term, or some other of like import, (as, “with correctness”—“with propriety,”) is still usually employed to tell what grammar is. But can a boy learn by such means what it is, *to speak and write grammatically*? In one sense, he can; and in an other, he cannot. He may derive, from any of these terms, some idea of grammar as distinguished from other arts; but no simple definition of this, or of any other art, can communicate to him that learns it, the skill of an artist.

9. R. Johnson speaks at large of *the relation of words* to each other in sentences, as constituting in his view the most essential part of grammar; and as being a point very much overlooked, or very badly explained, by grammarians in general. His censure is just. And it seems to be as applicable to nearly all the grammars now in use, as to those which he criticised a hundred and thirty years ago. But perhaps he gives to the relation of words, (which is merely their dependence on other words according to the sense,) an earlier introduction and a more prominent place, than it ought to have in a general system of grammar. To the right use of language, he makes four things to be necessary. In citing these, I vary the language, but not the substance or the order of his positions. *First*, That we should speak and write words according to the significations which belong to them: the teaching of which now pertains to lexicography, and not to grammar, except incidentally.

---

\* Ben Jonson’s notion of grammar, and of its parts, was as follows: “Grammar is the art of true and well-speaking a language: the writing is but an accident.

The Parts of Grammar are  
 Etymology; } which is { the true notation of words.  
 Syntaxe; } { the right ordering of them.

A word is a part of speech or note, whereby a thing is known or called; and consisteth of one or more letters. A letter is an indivisible part of a syllable, whose prosody, or right sounding, is perceived by the power; the orthography, or right writing, by the form. Prosody, and Orthography, are not parts of grammar, but diffused, like blood and spirits, through the whole.”—*Jonson’s Grammar*, Book I.

“*Secondly*, That we should observe *the relations* that words have one to another in sentences, and represent those relations by such variations, and particles, as are usual with authors in that language.” *Thirdly*, That we should acquire a knowledge of the proper sounds of the letters, and pay a due regard to accent in pronunciation. *Fourthly*, That we should learn to write words with their proper letters, spelling them as literary men generally do.

10. From these positions, (though he sets aside the first, as pertaining to lexicography, and not now to grammar, as it formerly did,) the learned critic deduces first his four parts of the subject, and then his definition of grammar. “Hence,” says he, “there arise Four Parts of Grammar; *Analogy*, which treats of the several parts of speech, their definitions, accidents, and formations; *Syntax*, which treats of the use of those things in construction, according to their relations; *Orthography*, which treats of spelling; and *Prosody*, which treats of accenting in pronunciation. So, then, the true definition of Grammar is this: Grammar is the art of *expressing the relations* of things in construction, with due accent in speaking, and orthography in writing, according to the custom of those whose language we learn.” Again he adds: “The word *relation* has other senses, taken by itself; but yet the *relation of words one to another in a sentence*, has no other signification than what I intend by it, namely, of cause, effect, means, end, manner, instrument, object, adjunct, and the like; which are names given by logicians to those relations under which the mind comprehends things, and therefore the most proper words to explain them to others. And if such things are too hard for children, then grammar is too hard; for there neither is, nor can be, any grammar without them. And a little experience will satisfy any man, that the young will as easily apprehend them, as *gender*, *number*, *declension*, and other grammar-terms.” See *R. Johnson’s Grammatical Commentaries*, p. 4.

11. It is true, that *the relation of words*—by which I mean that connexion between them, which the train of thought forms and suggests—or that dependence which one word has on an other according to the sense—lies at the foundation of all syntax. No rule or principle of construction can ever have any applicability beyond the limits, or contrary to the order, of this relation. To see what it is in any given case, is but to understand the meaning of the phrase or sentence. And it is plain, that no word ever necessarily agrees with an other, with which it is not thus connected in the mind of him who uses it. No word ever governs an other, to which the sense does not direct it. No word is ever required to stand immediately before or after an other, to which it has not some relation according to the meaning of the passage. Here then are the relation, agreement, government, and arrangement, of words in sentences; and these make up the whole of syntax—but not the whole of grammar. To this one part of grammar, therefore, the relation of words is central and fundamental; and in the other parts also, there are some things to which the consideration of it is incidental; but there are many more, like spelling, pronunciation, derivation, and whatsoever belongs merely to letters, syllables, and the forms of words, with which it has, in fact, no connexion. The relation of words, therefore, should be clearly and fully explained in its proper place, under the head of syntax; but the general idea of grammar will not be brought nearer to truth, by making it to be “the art of *expressing the relations* of things in construction,” &c., according to the foregoing definition.

12. The term *grammar* is derived from the Greek word γράμμα, a letter. The art or science to which this term is applied, had its origin, not in cursory speech, but in the practice of writing; and speech, which is first in the order of nature, is last with reference to grammar. The matter or common subject of grammar, is language in general; which,

being of two kinds, *spoken* and *written*, consists of certain combinations either of sounds or of visible signs, employed for the expression of thought. Letters and sounds, though often heedlessly confounded in the definitions given of vowels, consonants, &c., are, in their own nature, very different things. They address themselves to different senses; the former, to the sight; the latter, to the hearing. Yet, by a peculiar relation arbitrarily established between them, and in consequence of an almost endless variety in the combinations of either, they coincide in a most admirable manner, to effect the great object for which language was bestowed or invented; namely, to furnish a sure medium for the communication of thought, and the preservation of knowledge.

13. All languages, however different, have many things in common. There are points of a philosophical character, which result alike from the analysis of any language, and are founded on the very nature of human thought, and that of the sounds or other signs which are used to express it. When such principles alone are taken as the subject of inquiry, and are treated, as they sometimes have been, without regard to any of the idioms of particular languages, they constitute what is called General, Philosophical, or Universal Grammar. But to teach, with Lindley Murray and some others, that “Grammar may be considered as *consisting of two species*, Universal and Particular,” and that the latter merely “applies those general principles to a particular language,” is to adopt a twofold absurdity at the outset.\* For every cultivated language has its particular grammar, in which whatsoever is universal, is necessarily included; but of which, universal or general principles form only a part, and that comparatively small. We find therefore in grammar no “two species” of the same genus; nor is the science or art, as commonly defined and understood, susceptible of division into any proper and distinct sorts, except with reference to different languages—as when we speak of Greek, Latin, French, or English grammar.

14. There is, however, as I have suggested, a certain science or philosophy of language, which has been denominated Universal Grammar; being made up of those points only, in which many or all of the different languages preserved in books, are found

---

\* Horne Tooke eagerly seized upon a part of this absurdity, to prove that Dr. Lowth, from whom Murray derived the idea, was utterly unprepared for what he undertook in the character of a grammarian: “Dr. Lowth, when he undertook to write his *Introduction*, with the best intention in the world, most assuredly sinned against his better judgment. For he begins most judiciously, thus—‘Universal grammar explains the principles which are common to *all* languages. The grammar of any particular language, *applies* those common principles to that particular language.’ And yet, with *this clear truth* before his eyes, he boldly proceeds to give a *particular* grammar; without being himself possessed of one single principle of *universal* grammar.”—*Diversions of Purley*, Vol. 1, p. 224. If Dr. Lowth discredited his better judgement in attempting to write an English grammar, perhaps Murray, and his weaker copyists, have little honoured theirs, in supposing they were adequate to such a work. But I do not admit, that either Lowth or Murray “*begins most judiciously*,” in speaking of Universal and Particular grammar in the manner above cited. The authors who have started with this fundamental blunder, are strangely numerous. It is found in some of the most dissimilar systems that can be named. Even Oliver B. Peirce, who has a much lower opinion of Murray’s ability in grammar than Tooke had of Lowth’s, adopts this false notion with all implicitness, though he decks it in language more objectionable, and scorns to acknowledge whence he got it. See his *Gram.*, p. 16. De Sacy, in his *Principles of General Grammar*, says, “All rules of Syntax relate to two things, *Agreement and Government*.”—*Foxdick’s Tr.*, p. 108. And again: “None of these rules properly belong to General Grammar, as each language follows, in regard to the rules of Agreement and Government, a course peculiar to itself.”—*Ibid.*, p. 109. “It is with Construction [i.e., Arrangement] as with Syntax. It follows no general rule common to all languages.”—*Ibid.* According to these positions, which I do not admit to be strictly true, General or Universal Grammar has no principles of *Syntax* at all, whatever else it may have which Particular Grammar can assume and apply.

to coincide. All speculative minds are fond of generalization; and, in the vastness of the views which may thus be taken of grammar, such may find an entertainment which they never felt in merely learning to speak and write grammatically. But the pleasure of such contemplations is not the earliest or the most important fruit of the study. The first thing is, to know and understand the grammatical construction of our own language. Many may profit by this acquisition, who extend not their inquiries to the analogies or the idioms of other tongues. It is true, that every item of grammatical doctrine is the more worthy to be known and regarded, in proportion as it approaches to universality. But the principles of all practical grammar, whether universal or particular, common or peculiar, must first be learned in their application to some one language, before they can be distinguished into such classes; and it is manifest, both from reason and from experience, that the youth of any nation not destitute of a good book for the purpose, may best acquire a knowledge of those principles, from the grammatical study of their native tongue.

15. Universal or Philosophical Grammar is a large field for speculation and inquiry, and embraces many things which, though true enough in themselves, are unfit to be incorporated with any system of practical grammar, however comprehensive its plan. Many authors have erred here. With what is merely theoretical, such a system should have little to do. Philosophy, dealing in generalities, resolves speech not only as a whole into its constituent parts and separable elements, as anatomy shows the use and adaptation of the parts and joints of the human body; but also as a composite into its matter and form, as one may contemplate that same body in its entirety, yet as consisting of materials, some solid and some fluid, and these curiously modelled to a particular figure. Grammar, properly so called, requires only the former of these analyses; and in conducting the same, it descends to the thousand minute particulars which are necessary to be known in practice. Nor are such things to be despised as trivial and low: ignorance of what is common and elementary, is but the more disgraceful for being ignorance of mere rudiments. “Wherefore,” says Quintilian, “they are little to be respected, who represent this art as mean and barren; in which, unless you faithfully lay the foundation for the future orator, whatever superstructure you raise will tumble into ruins. It is an art, necessary to the young, pleasant to the old, the sweet companion of the retired, and one which in reference to every kind of study has in itself more of utility than of show. Let no one therefore despise as inconsiderable the elements of grammar. Not because it is a great thing, to distinguish consonants from vowels, and afterwards divide them into semivowels and mutes; but because, to those who enter the interior parts of this temple of science, there will appear in many things a great subtilty, which is fit not only to sharpen the wits of youth, but also to exercise the loftiest erudition and science.”—*De Institutione Oratoria*, Lib. i, Cap. iv.

16. Again, of the arts which spring from the composition of language. Here the art of logic, aiming solely at conviction, addresses the understanding with cool deductions of unvarnished truth; rhetoric, designing to move, in some particular direction, both the judgement and the sympathies of men, applies itself to the affections in order to persuade; and poetry, various in its character and tendency, solicits the imagination, with a view to delight, and in general also to instruct. But grammar, though intimately connected with all these, and essential to them in practice, is still too distinct from each to be identified with any of them. In regard to dignity and interest, these higher studies seem to have greatly the advantage over particular grammar; but who is willing to be an ungrammatical poet, orator, or logician? For him I do not write. But I would persuade my readers, that an acquaintance with that grammar which respects the genius of their vernacular tongue, is

of primary importance to all who would cultivate a literary taste, and is a necessary introduction to the study of other languages. And it may here be observed, for the encouragement of the student, that as grammar is essentially the same thing in all languages, he who has well mastered that of his own, has overcome more than half the difficulty of learning another; and he whose knowledge of words is the most extensive, has the fewest obstacles to encounter in proceeding further.

17. It was the “original design” of grammar, says Dr. Adam, to facilitate “the acquisition of languages;” and, of all practical treatises on the subject, this is still the main purpose. In those books which are to prepare the learner to translate from one tongue into another, seldom is any thing else attempted. In those also which profess to explain the right use of vernacular speech, must the same purpose be ever paramount, and the “original design” be kept in view. But the grammarian may teach many things incidentally. One cannot learn a language, without learning at the same time a great many opinions, facts, and principles, of some kind or other, which are necessarily embodied in it. For all language proceeds from, and is addressed to, the understanding; and he that perceives not the meaning of what he reads, makes no acquisition even of the language itself. To the science of grammar, the *nature of the ideas* conveyed by casual examples, is not very essential: to the learner, it is highly important. The best thoughts in the best diction should furnish the models for youthful study and imitation; because such language is not only the most worthy to be remembered, but the most easy to be understood. A distinction is also to be made between use and abuse. In nonsense, absurdity, or falsehood, there can never be any grammatical authority; because, however language may be abused, the usage which gives law to speech, is still that usage which is founded upon the *common sense* of mankind.

18. Grammar appeals to reason, as well as to authority, but to what extent it should do so, has been matter of dispute. “The knowledge of useful arts,” says Sanctius, “is not an invention of human ingenuity, but an emanation from the Deity, descending from above for the use of man, as Minerva sprung from the brain of Jupiter. Wherefore, unless thou give thyself wholly to laborious research into the nature of things, and diligently examine the *causes and reasons* of the art thou teachest, believe me, thou shalt but see with other men’s eyes, and hear with other men’s ears. But the minds of many are preoccupied with a certain perverse opinion, or rather ignorant conceit, that in grammar, or the art of speaking, there are no causes, and that reason is scarcely to be appealed to for any thing;—than which idle notion, I know of nothing more foolish;—nothing can be thought of which is more offensive. Shall man, endowed with reason, do, say, or contrive any thing, without design, and without understanding? Hear the philosophers; who positively declare that nothing comes to pass without a cause. Hear Plato himself; who affirms that names and words subsist by nature, and contends that language is derived from nature, and not from art.”

19. “I know,” says he, “that the Aristotelians think otherwise; but no one will doubt that names are the signs, and as it were the instruments, of things. But the instrument of any art is so adapted to that art, that for any other purpose it must seem unfit; thus with an auger we bore, and with a saw we cut wood; but we split stones with wedges, and wedges are driven with heavy mauls. We cannot therefore but believe that those who first gave names to things, did it with design; and this, I imagine, Aristotle himself understood when he said, *ad placitum nomina significare*. For those who contend that names were

made by chance, are no less audacious than if they would endeavour to persuade us, that the whole order of the universe was framed together fortuitously.”

20. “You will see,” continues he, “that in the first language, whatever it was, the names of things were taken from Nature herself; but, though I cannot affirm this to have been the case in other tongues, yet I can easily persuade myself that in every tongue a reason can be rendered for the application of every name; and that this reason, though it is in many cases obscure, is nevertheless worthy of investigation. Many things which were not known to the earlier philosophers, were brought to light by Plato; after the death of Plato, many were discovered by Aristotle; and Aristotle was ignorant of many which are now everywhere known. For truth lies hid, but nothing is more precious than truth. But you will say, ‘How can there be any certain origin to names, when one and the same thing is called by different names, in the several parts of the world?’ I answer, of the same thing there may be different causes, of which some people may regard one, and others, an other. \* \* \* There is therefore no doubt, that of all things, even of words, a reason is to be rendered: and if we know not what that reason is, when we are asked; we ought rather to confess that we do not know, than to affirm that none can be given. I know that Scaliger thinks otherwise; but this is the true account of the matter.”

21. “These several observations,” he remarks further, “I have unwillingly brought together against those stubborn critics who, while they explode reason from grammar, insist so much on the testimonies of the learned. But have they never read Quintilian, who says, (Lib. i, Cap. 6,) that, ‘Language is established by reason, antiquity, authority, and custom?’ He therefore does not exclude reason, but makes it the principal thing. Nay, in a manner, Laurentius, and other grammaticists, even of their fooleries, are forward to offer *reasons*, such as they are. Moreover, use does not take place without reason; otherwise, it ought to be called abuse, and not use. But from use authority derives all its force; for when it recedes from use, authority becomes nothing: whence Cicero reproves Cœlius and Marcus Antonius for speaking according to their own fancy, and not according to use. But, ‘Nothing can be lasting,’ says Curtius, (Lib. iv,) ‘which is not based upon reason.’ It remains, therefore, that of all things the reason be first assigned; and then, if it can be done, we may bring forward testimonies; that the thing, having every advantage, may be made the more clear.”—*Sanctii Minerva*, Lib. i, Cap. 2.

22. Julius Cæsar Scaliger, from whose opinion Sanctius dissents above, seems to limit the science of grammar to bounds considerably too narrow, though he found within them room for the exercise of much ingenuity and learning. He says, “Grammatica est scientia loquendi ex usu; neque enim constituit regulas scientibus usus modum, sed ex eorum stasis frequentibusque usurpationibus colligit communem rationem loquendi, quam discentibus traderet.”—*De Causis L. Latinæ*, Lib. iv, Cap. 76. “Grammar is the science of speaking according to use; for it does not establish rules for those who know the manner of use, but from the settled and frequent usages of these, gathers the common fashion of speaking, which it should deliver to learners.” This limited view seems not only to exclude from the science the use of the pen, but to exempt the learned from any obligation to respect the rules prescribed for the initiation of the young. But I have said, and with abundant authority, that the acquisition of a good style of writing is the main purpose of the study; and, surely, the proficient and adepts in the art can desire for themselves no such exemption. Men of genius, indeed, sometimes affect to despise the pettiness of all grammatical instructions; but this can be nothing else than affectation, since the usage of

the learned is confessedly the basis of all such instructions, and several of the loftiest of their own rank appear on the list of grammarians.

23. Quintilian, whose authority is appealed to above, belonged to that age in which the exegesis of histories, poems, and other writings, was considered an essential part of grammar. He therefore, as well as Diomedes, and other ancient writers, divided the grammarian's duties into two parts; the one including what is now called grammar, and the other the explanation of authors, and the stigmatizing of the unworthy. Of the opinion referred to by Sanctius, it seems proper to make here an ampler citation. It shall be attempted in English, though the paragraph is not an easy one to translate. I understand the author to say, "Speakers, too, have their rules to observe; and writers, theirs. Language is established by reason, antiquity, authority, and custom. Of reason the chief ground is analogy, but sometimes etymology. Ancient things have a certain majesty, and, as I might say, religion, to commend them. Authority is wont to be sought from orators and historians; the necessity of metre mostly excuses the poets. When the judgement of the chief masters of eloquence passes for reason, even error seems right to those who follow great leaders. But, of the art of speaking, custom is the surest mistress; for speech is evidently to be used as money, which has upon it a public stamp. Yet all these things require a penetrating judgement, especially analogy; the force of which is, that one may refer what is doubtful, to something similar that is clearly established, and thus prove uncertain things by those which are sure."—QUINT, *de Inst. Orat.*, Lib. i, Cap. 6, p. 48.

24. The science of grammar, whatever we may suppose to be its just limits, does not appear to have been better cultivated in proportion as its scope was narrowed. Nor has its application to our tongue, in particular, ever been made in such a manner, as to do *great* honour to the learning or the talents of him that attempted it. What is new to a nation, may be old to the world. The development of the intellectual powers of youth by instruction in the classics, as well as the improvement of their taste by the exhibition of what is elegant in literature, is continually engaging the attention of new masters, some of whom may seem to effect great improvements; but we must remember that the concern itself is of no recent origin. Plato and Aristotle, who were great masters both of grammar and of philosophy, taught these things ably at Athens, in the fourth century *before* Christ. Varro, the grammarian, usually styled the most learned of the Romans, was *contemporary* with the Saviour and his apostles. Quintilian lived in the *first* century of our era, and before he wrote his most celebrated book, taught a school twenty years in Rome, and received from the state a salary which made him rich. This "consummate guide of wayward youth," as the poet Martial called him, being neither ignorant of what had been done by others, nor disposed to think it a light task to prescribe the right use of his own language, was at first slow to undertake the work upon which his fame now reposes; and, after it was begun, diligent to execute it worthily, that it might turn both to his own honour, and to the real advancement of learning.

25. He says, at the commencement of his book: "After I had obtained a quiet release from those labours which for twenty years had devolved upon me as an instructor of youth, certain persons familiarly demanded of me, that I should compose something concerning the proper manner of speaking; but for a long time I withstood their solicitations, because I knew there were already illustrious authors in each language, by whom many things which might pertain to such a work, had been very diligently written, and left to posterity. But the reason which I thought would obtain for me an easier excuse, did but excite more earnest entreaty; because, amidst the various opinions of earlier

writers, some of whom were not even consistent with themselves, the choice had become difficult; so that my friends seemed to have a right to enjoin upon me, if not the labour of producing new instructions, at least that of judging concerning the old. But although I was persuaded not so much by the hope of supplying what was required, as by the shame of refusing, yet, as the matter opened itself before me, I undertook of my own accord a much greater task than had been imposed; that while I should thus oblige my very good friends by a fuller compliance, I might not enter a common path and tread only in the footsteps of others. For most other writers who have treated of the art of speaking, have proceeded in such a manner as if upon adepts in every other kind of doctrine they would lay the last touch in eloquence; either despising as little things the studies which we first learn, or thinking them not to fall to their share in the division which should be made of the professions; or, what indeed is next to this, hoping no praise or thanks for their ingenuity about things which, although necessary, lie far from ostentation: the tops of buildings make a show, their foundations are unseen.”—*Quintiliani de Inst. Orat., Proœmium*.

26. But the reader may ask, “What have all these things to do with English Grammar?” I answer, they help to show us whence and what it is. Some acquaintance with the history of grammar as a science, as well as some knowledge of the structure of other languages than our own, is necessary to him who professes to write for the advancement of this branch of learning—and for him also who would be a competent judge of what is thus professed. Grammar must not forget her origin. Criticism must not resign the protection of letters. The national literature of a country is in the keeping, not of the people at large, but of authors and teachers. But a grammarian presumes to be a judge of authorship, and a teacher of teachers; and is it to the honour of England or America, that in both countries so many are countenanced in this assumption of place, who can read no language but their mother tongue? English Grammar is not properly an indigenous production, either of this country or of Britain; because it is but a branch of the general science of philology—a new variety, or species, sprung up from the old stock long ago transplanted from the soil of Greece and Rome.

27. It is true, indeed, that neither any ancient system of grammatical instruction nor any grammar of an other language, however contrived, can be entirely applicable to the present state of our tongue; for languages must needs differ greatly one from an other, and even that which is called the same, may come in time to differ greatly from what it once was. But the general analogies of speech, which are the central principles of grammar, are but imperfectly seen by the man of one language. On the other hand, it is possible to know much of those general principles, and yet be very deficient in what is peculiar to our own tongue. Real improvement in the grammar of our language, must result from a view that is neither partial nor superficial. “Time, sorry artist,” as was said of old, “makes all he handles worse.” And Lord Bacon, seeming to have this adage in view, suggests: “If Time of course alter all things to the worse, and Wisdom and Counsel shall not alter them to the better, what shall be the end?”—*Bacon’s Essays*, p. 64.

28. Hence the need that an able and discreet grammarian should now and then appear, who with skillful hand can effect those corrections which a change of fashion or the ignorance of authors may have made necessary; but if he is properly qualified for his task, he will do all this without a departure from any of the great principles of Universal Grammar. He will surely be very far from thinking, with a certain modern author, whom I shall notice in an other chapter, that, “He is bound to take words and explain them as he

finds them in his day, *without any regard to their ancient construction and application.*”—*Kirkham's Gram.*, p. 28. The whole history of every word, so far as he can ascertain it, will be the view under which he will judge of what is right or wrong in the language which he teaches. Etymology is neither the whole of this view, nor yet to be excluded from it. I concur not therefore with Dr. Campbell, who, to make out a strong case, extravagantly says, “It is *never from an attention to etymology*, which would frequently mislead us, but from custom, the only infallible guide in this matter, that the meanings of words in present use must be learnt.”—*Philosophy of Rhetoric*, p. 188. Jamieson too, with an implicitness little to be commended, takes this passage from Campbell; and, with no other change than that of “*learn*” to “*learned*” publishes it as a corollary of his own.—*Grammar of Rhetoric*, p. 42. It is folly to state for truth what is so obviously wrong. Etymology and custom are seldom at odds; and where they are so, the latter can hardly be deemed infallible.

## CHAPTER II.

### OF GRAMMATICAL AUTHORSHIP.

“Respondeo, dupliciter aliquem dici grammaticum, arte et professione. Grammatici vera arte paucissimi sunt: et hi magna laude digni sunt, ut patuit: hos non vituperant summi viri; quia ipse Plinius ejusmodi grammaticus fuit, et de arte grammatica libelos edidit. Et Grellius veræ grammaticæ fuit diligentissimus doctor; sic et ipse Datus. Alii sunt grammatici professione, et ii plerumque sunt inceptissimi; quia scribimus indocti doctique, et indignissimus quisque hanc sibi artem vindicat:—hos mastigias multis probris docti summo jure insectantur.”—DESPAUTER. *Syntaxis*, fol. 1.

1. It is of primary importance in all discussions and expositions of doctrines, of any sort, to ascertain well the *principles* upon which our reasonings are to be founded, and to see that they be such as are immovably established in the nature of things; for error in first principles is fundamental, and he who builds upon an uncertain foundation, incurs at least a *hazard* of seeing his edifice overthrown. The lover of *truth* will be, at all times, diligent to seek it, firm to adhere to it, willing to submit to it, and ready to promote it; but even the truth may be urged unseasonably, and important facts are things liable to be misjoined. It is proper, therefore, for every grammarian gravely to consider, whether and how far the principles of his philosophy, his politics, his morals, or his religion, ought to influence, or actually do influence, his theory of language, and his practical instructions respecting the right use of words. In practice, grammar is so interwoven with all else that is known, believed, learned, or spoken of among men, that to determine its own peculiar principles with due distinctness, seems to be one of the most difficult points of a grammarian's duty.

2. From misapprehension, narrowness of conception, or improper bias, in relation to this point, many authors have started wrong; denounced others with intemperate zeal; departed themselves from sound doctrine; and produced books which are disgraced not merely by occasional oversights, but by central and radical errors. Hence, too, have sprung up, in the name of grammar, many unprofitable discussions, and whimsical systems of teaching, calculated rather to embarrass than to inform the student. Mere collisions of opinion, conducted without any acknowledged standard to guide the judgement, never tend to real improvement. Grammar is unquestionably a branch of that universal philosophy by which the thoroughly educated mind is enlightened to see all

things aright; for philosophy, in this sense of the term, is found in everything. Yet, properly speaking, the true grammarian is not a philosopher, nor can any man strengthen his title to the former character by claiming the latter; and it is certain, that a most disheartening proportion of what in our language has been published under the name of Philosophic Grammar, is equally remote from philosophy, from grammar, and from common sense.

3. True grammar is founded on the authority of reputable custom; and that custom, on the use which men make of their reason. The proofs of what is right are accumulative, and on many points there can be no dispute, because our proofs from the best usage, are both obvious and innumerable. On the other hand, the evidence of what is wrong is rather demonstrative; for when we would expose a particular error, we exhibit it in contrast with the established principle which it violates. He who formed the erroneous sentence, has in this case no alternative, but either to acknowledge the solecism, or to deny the authority of the rule. There are disputable principles in grammar, as there are moot points in law; but this circumstance affects no settled usage in either; and every person of sense and taste will choose to express himself in the way least liable to censure. All are free indeed from positive constraint on their phraseology; for we do not speak or write by statutes. But the ground of instruction assumed in grammar, is similar to that upon which are established the maxims of *common law*, in jurisprudence. The ultimate principle, then, to which we appeal, as the only true standard of grammatical propriety, is that species of custom which critics denominate GOOD USE; that is, present, reputable, general use.

4. Yet a slight acquaintance with the history of grammar will suffice to show us, that it is much easier to acknowledge this principle, and to commend it in words, than to ascertain what it is, and abide by it in practice. Good use is that which is neither ancient nor recent, neither local nor foreign, neither vulgar nor pedantic; and it will be found that no few have in some way or other departed from it, even while they were pretending to record its dictates. But it is not to be concealed, that in every living language, it is a matter of much inherent difficulty, to reach the standard of propriety, where usage is various; and to ascertain with clearness the decisions of custom, when we descend to minute details. Here is a field in which whatsoever is achieved by the pioneers of literature, can be appreciated only by thorough scholars; for the progress of improvement in any art or science, can be known only to those who can clearly compare its ruder with its more refined stages; and it often happens that what is effected with much labour, may be presented in a very small compass.

5. But the knowledge of grammar may *retrograde*; for whatever loses the vital principle of renovation and growth, tends to decay. And if mere copyists, compilers, abridgers, and modifiers, be encouraged as they now are, it surely will not advance. Style is liable to be antiquated by time, corrupted by innovation, debased by ignorance, perverted by conceit, impaired by negligence, and vitiated by caprice. And nothing but the living spirit of true authorship, and the application of just criticism, can counteract the natural tendency of these causes. English grammar is still in its infancy; and even bears, to the imagination of some, the appearance of a deformed and ugly dwarf among the liberal arts. Treatises are multiplied almost innumerable, but still the old errors survive. Names are rapidly added to our list of authors, while little or nothing is done for the science. Nay, while new blunders have been committed in every new book, old ones have been allowed to stand as by prescriptive right; and positions that were never true, and sentences that were never good English, have been published and republished under different names, till in our language

grammar has become the most ungrammatical of all studies! “Imitators generally copy their originals in an inverse ratio of their merits; that is, by adding as much to their faults, as they lose of their merits.”—KNIGHT, *on the Greek Alphabet*, p. 117.

“Who to the life an exact piece would make,  
Must not from others’ work a copy take.”—*Cowley*.

6. All science is laid in the nature of things; and he only who seeks it there, can rightly guide others in the paths of knowledge. He alone can know whether his predecessors went right or wrong, who is capable of a judgement independent of theirs. But with what shameful servility have many false or faulty definitions and rules been copied and copied from one grammar to another, as if authority had canonized their errors, or none had eyes to see them! Whatsoever is dignified and fair, is also modest and reasonable; but modesty does not consist in having no opinion of one’s own, nor reason in following with blind partiality the footsteps of others. Grammar unsupported by authority, is indeed mere fiction. But what apology is this, for that authorship which has produced so many grammars without originality? Shall he who cannot write for himself, improve upon him who can? Shall he who cannot paint, retouch the canvass of Guido? Shall modest ingenuity be allowed only to imitators and to thieves? How many a prefatory argument issues virtually in this! It is not deference to merit, but impudent pretence, practising on the credulity of ignorance! Commonness alone exempts it from scrutiny, and the success it has, is but the wages of its own worthlessness! To read and be informed, is to make a proper use of books for the advancement of learning; but to assume to be an author by editing mere commonplaces and stolen criticisms, is equally beneath the ambition of a scholar and the honesty of a man.

“T is true, the ancients we may rob with ease;  
But who with that mean shift himself can please?”  
*Sheffield, Duke of Buckingham.*

7. Grammar being a practical art, with the principles of which every intelligent person is more or less acquainted, it might be expected that a book written professedly on the subject, should exhibit some evidence of its author’s skill. But it would seem that a multitude of bad or indifferent writers have judged themselves qualified to teach the art of speaking and writing well; so that correctness of language and neatness of style are as rarely to be found in grammars as in other books. Nay, I have before suggested that in no other science are the principles of good writing so frequently and so shamefully violated. The code of false grammar embraced in the following work, will go far to sustain this opinion. There have been, however, several excellent scholars, who have thought it an object not unworthy of their talents, to prescribe and elucidate the principles of English Grammar. But these, with scarcely any exception, have executed their inadequate designs, not as men engaged in their proper calling, but as mere literary almoners, descending for a day from their loftier purposes, to perform a service, needful indeed, and therefore approved, but very far from supplying all the aid that is requisite to a thorough knowledge of the subject. Even the most meritorious have left ample room for improvement, though some have evinced an ability which does honour to themselves, while it gives cause to regret their lack of an inducement to greater labour. The mere grammarian can neither aspire to praise, nor stipulate for a reward; and to those who were best qualified to write, the subject could offer no adequate motive for diligence.

8. Unlearned men, who neither make, nor can make, any pretensions to a knowledge of grammar as a study, if they show themselves modest in what they profess, are by no means to be despised or undervalued for the want of such knowledge. They are subject to no criticism, till they turn authors and write for the public. And even then they are to be treated gently, if they have any thing to communicate, which is worthy to be accepted in a homely dress. Grammatical inaccuracies are to be kindly excused, in all those from whom nothing better can be expected; for people are often under a necessity of appearing as speakers or writers, before they can have learned to write or speak grammatically. The body is more to be regarded than raiment; and the substance of an interesting message, may make the manner of it a little thing. Men of high purposes naturally spurn all that is comparatively low; or all that may seem nice, overwrought, ostentatious, or finical. Hence St. Paul, in writing to the Corinthians, suggests that the design of his preaching might have been defeated, had he affected the orator, and turned his attention to mere “excellency of speech,” or “wisdom of words.” But this view of things presents no more ground for neglecting grammar, and making coarse and vulgar example our model of speech, than for neglecting dress, and making baize and rags the fashionable costume. The same apostle exhorts Timothy to “hold fast the form of sound *words*,” which he himself had taught him. Nor can it be denied that there is an obligation resting upon all men, to use speech fairly and understandingly. But let it be remembered, that all those upon whose opinions or practices I am disposed to animadvert, are either professed grammarians and philosophers, or authors who, by extraordinary pretensions, have laid themselves under special obligations to be *accurate* in the use of language. “The *wise in heart* shall be called prudent; and *the sweetness of the lips* increaseth learning.”—*Prov.*, xvi, 21. “The words of a man’s mouth are as deep waters, and the well-spring of wisdom [is] as a flowing brook.”—*Ib.*, xviii, 4. “A fool’s mouth is his destruction, and his lips are the snare of his soul.”—*Ib.*, xviii, 7.

9. The old maxim recorded by Bacon, “*Loquendum ut vulgus, sentiendum ut sapientes*,”—“We should speak as the vulgar, but think as the wise,” is not to be taken without some limitation. For whoever literally speaks as the vulgar, shall offend vastly too much with his tongue, to have either the understanding of the wise or the purity of the good. In all untrained and vulgar minds, the ambition of speaking well is but a dormant or very weak principle. Hence the great mass of uneducated people are lamentably careless of what they utter, both as to the matter and the manner; and no few seem naturally prone to the constant imitation of low example, and some, to the practice of every abuse of which language is susceptible. Hence, as every scholar knows, the least scrupulous of our lexicographers notice many terms but to censure them as “*low*,” and omit many more as being beneath their notice. Vulgarity of language, then, ever has been, and ever must be, repudiated by grammarians. Yet we have had pretenders to grammar, who could court the favour of the vulgar, though at the expense of all the daughters of Mnemosyne.

10. Hence the enormous insult to learning and the learned, conveyed in the following scornful quotations: “Grammarians, go to your *tailors* and *shoemakers*, and learn from them the *rational* art of constructing your grammars!”—*Neef’s Method of Education*, p. 62. “From a labyrinth without a clew, in which the *most enlightened scholars* of Europe have mazed themselves and misguided others, the author ventures to turn aside.”—*Cardell’s Gram.*, 12mo, p. 15. Again: “The *nations of unlettered men* so adapted their language to philosophic truth, that all physical and intellectual research can find no essential rule to reject or change.”—*Ibid.*, p. 91. I have shown that “the nations of unlettered men” are among that portion of the earth’s population, upon whose language the genius of grammar

has never yet condescended to look down! That people who make no pretensions to learning, can furnish better models or instructions than “the most enlightened scholars,” is an opinion which ought not to be disturbed by argument.

11. I regret to say, that even Dr. Webster, with all his obligations and pretensions to literature, has well-nigh taken ground with Neef and Cardell, as above cited; and has not forborne to throw contempt, even on grammar as such, and on men of letters indiscriminately, by supposing the true principles of every language to be best observed and kept by the illiterate. What marvel then, that all his multifarious grammars of the English language are despised? Having suggested that the learned must follow the practice of the populace, because they cannot control it, he adds: “Men of letters may revolt at this suggestion, but if they will attend to the history of our language, they will find the fact to be as here stated. It is commonly supposed that the tendency of this practice of unlettered men is *to corrupt the language*. But the fact is directly the reverse. I am prepared to prove, were it consistent with the nature of this work, that nineteen-twentieths of *all the corruptions* of our language, for five hundred years past, have been introduced by *authors*—men who have made alterations in particular idioms *which they did not understand*. The same remark is applicable to the *orthography* and *pronunciation*. The tendency of unlettered men is to *uniformity*—to *analogy*; and so strong is this disposition, that the common people have actually converted some of our irregular verbs into regular ones. It is to unlettered people that we owe the disuse of *holpen*, *bounden*, *sitten*, and the use of the regular participles, *swelled*, *helped*, *worked*, in place of the ancient ones. This popular tendency is not to be contemned and disregarded, as some of the learned affect to *do*;<sup>\*</sup> for it is governed by *the natural, primary principles of all languages*, to which we owe all their regularity and all their melody; viz., a love of uniformity in words of a like character, and a preference of an easy natural pronunciation, and a desire to express the most ideas with the smallest number of words and syllables. It is a fortunate thing for language, that these *natural principles* generally prevail over arbitrary and artificial rules.”—*Webster’s Philosophical Gram.*, p. 119; *Improved Gram.*, p. 78. So much for *unlettered erudition*!

12. If every thing that has been taught under the name of grammar, is to be considered as belonging to the science, it will be impossible ever to determine in what estimation the study of it ought to be held; for all that has ever been urged either for or against it, may, upon such a principle, be *proved* by reference to different authorities and irreconcilable opinions. But all who are studious to know, and content to follow, *the fashion* established by the concurrent authority of *the learned*,<sup>†</sup> may at least have some standard to refer to; and if a grammarian’s rules be based upon this authority, it must be considered the exclusive privilege of the unlearned to despise them—as it is of the unbred, to condemn the rules of civility. But who shall determine whether the doctrines contained in any given treatise are, or are not, based upon such authority? Who shall decide whether the contributions which any individual may make to our grammatical code, are,

<sup>\*</sup> This verb “*do*” is wrong, because “*to be contemned*” is passive.

<sup>†</sup> “A very good judge has left us his opinion and determination in this matter; that he ‘would take for his rule in speaking, not what might happen to be the faulty caprice of the multitude, but the consent and agreement of learned men.’”—*Creighton’s Dict.*, p. 21. The “good judge” here spoken of, is Quintilian; whose words on the point are these: “Necessarium est iudicium, constituendumque imprimis, id ipsum quid sit, quod *consuetudinem* vocemus. \* \* \* In loquendo, non, si quid vitiose multis insederit, pro regula sermonis, amplendum est. \* \* \* Ergo consuetudinem sermonis, vocabo *consensum eruditorum* sicut vivendi, consensum honorum.”—*De Inst. Orat.*, Lib. i. Cap. 6, p. 57.

or are not, consonant with the best usage? For this, there is no tribunal but the mass of readers, of whom few perhaps are very competent judges. And here an author's reputation for erudition and judgement, may be available to him: it is the public voice in his favour. Yet every man is at liberty to form his own opinion, and to alter it whenever better knowledge leads him to think differently.

13. But the great misfortune is, that they who need instruction, are not qualified to choose their instructor; and many who must make this choice for their children, have no adequate means of ascertaining either the qualifications of such as offer themselves, or the comparative merits of the different methods by which they profess to teach. Hence this great branch of learning, in itself too comprehensive for the genius or the life of any one man, has ever been open to as various and worthless a set of quacks and plagiaries as have ever figured in any other. There always have been some who knew this, and there may be many who know it now; but the credulity and ignorance which expose so great a majority of mankind to deception and error, are not likely to be soon obviated. With every individual who is so fortunate as to receive any of the benefits of intellectual culture, the whole process of education must begin anew; and, by all that sober minds can credit, the vision of human perfectibility is far enough from any national consummation.

14. Whatever any may think of their own ability, or however some might flout to find their errors censured or their pretensions disallowed; whatever improvement may actually have been made, or however fondly we may listen to boasts and felicitations on that topic; it is presumed, that the general ignorance on the subject of grammar, as above stated, is too obvious to be denied. What then is the remedy? and to whom must our appeal be made? Knowledge cannot be imposed by power, nor is there any domination in the republic of letters. The remedy lies solely in that zeal which can provoke to a generous emulation in the cause of literature; and the appeal, which has recourse to the learning of the learned, and to the common sense of all, must be pressed home to conviction, till every false doctrine stand refuted, and every weak pretender exposed or neglected. Then shall Science honour them that honour her; and all her triumphs be told, all her instructions be delivered, in "sound speech that cannot be condemned."

15. A generous man is not unwilling to be corrected, and a just one cannot but desire to be set right in all things. Even over noisy gainsayers, a calm and dignified exhibition of true doctrine, has often more influence than ever openly appears. I have even seen the author of a faulty grammar heap upon his corrector more scorn and personal abuse than would fill a large newspaper, and immediately afterwards, in a new edition of his book, renounce the errors which had been pointed out to him, stealing the very language of his amendments from the man whom he had so grossly vilified! It is true that grammarians have ever disputed, and often with more acrimony than discretion. Those who, in elementary treatises, have meddled much with philological controversy, have well illustrated the couplet of Denham:

"The tree of knowledge, blasted by disputes,  
Produces sapless leaves in stead of fruits."

16. Thus, then, as I have before suggested, we find among writers on grammar two numerous classes of authors, who have fallen into opposite errors, perhaps equally reprehensible; the visionaries, and the copyists. The former have ventured upon too much originality, the latter have attempted too little. "The science of philology," says Dr.

Alexander Murray, “is not a frivolous study, fit to be conducted by ignorant pedants or visionary enthusiasts. It requires more qualifications to succeed in it, than are usually united in those who pursue it:—a sound penetrating judgement; habits of calm philosophical induction; an erudition various, extensive, and accurate; and a mind likewise, that can direct the knowledge expressed in words, to illustrate the nature of the signs which convey it.”—*Murray’s History of European Languages*, Vol. ii, p. 333.

17. They who set aside the authority of custom, and judge every thing to be ungrammatical which appears to them to be unphilosophical, render the whole ground forever disputable, and weary themselves in beating the air. So various have been the notions of this sort of critics, that it would be difficult to mention an opinion not found in some of their books. Amidst this rage for speculation on a subject purely practical, various attempts have been made, to overthrow that system of instruction, which long use has rendered venerable, and long experience proved to be useful. But it is manifestly much easier to raise even plausible objections against this system, than to invent an other less objectionable. Such attempts have generally met the reception they deserved. Their history will give no encouragement to future innovators.

18. Again: While some have thus wasted their energies in eccentric flights, vainly supposing that the learning of ages would give place to their whimsical theories; others, with more success, not better deserved, have multiplied grammars almost innumerably, by abridging or modifying the books they had used in childhood. So that they who are at all acquainted with the origin and character of the various compends thus introduced into our schools, cannot but desire to see them all displaced by some abler and better work, more honourable to its author and more useful to the public, more intelligible to students and more helpful to teachers. Books professedly published for the advancement of knowledge, are very frequently to be reckoned, among its greatest impediments; for the interests of learning are no less injured by whimsical doctrines, than the rights of authorship by plagiarism. Too many of our grammars, profitable only to their makers and venders, are like weights attached to the heels of Hermes. It is discouraging to know the history of this science. But the multiplicity of treatises already in use, is a reason, not for silence, but for offering more. For, as Lord Bacon observes, the number of ill-written books is not to be diminished by ceasing to write, but by writing others which, like Aaron’s serpent, shall swallow up the spurious.\*

19. I have said that some grammars have too much originality, and others too little. It may be added, that not a few are chargeable with both these faults at once. They are original, or at least anonymous, where there should have been given other authority than that of the compiler’s name; and they are copies, or, at best, poor imitations, where the author should have shown himself capable of writing in a good style of his own. What then is the middle ground for the true grammarian? What is the kind, and what the degree, of originality, which are to be commended in works of this sort? In the first place, a grammarian must be a writer, an author, a man who observes and thinks for himself; and not a mere compiler, abridger, modifier, copyist, or plagiarist. Grammar is not the only

---

\* “The opinion of plenty is amongst the causes of want; and the great quantity of books maketh a show rather of superfluity than lack; which surcharge, nevertheless, is not to be removed by making no more books, but by making more good books, which, as the serpent of Moses, might devour the serpents of the enchanters.”—*Bacon*. In point of style, his lordship is here deficient; and he has also mixed and marred the figure which he uses. But the idea is a good one.

subject upon which we allow no man to innovate in doctrine; why, then, should it be the only one upon which a man may make it a merit, to work up silently into a book of his own, the best materials found among the instructions of his predecessors and rivals? Some definitions and rules, which in the lapse of time and by frequency of use have become a sort of public property, the grammarian may perhaps be allowed to use at his pleasure; yet even upon these a man of any genius will be apt to set some impress peculiar to himself. But the doctrines of his work ought, in general, to be expressed in his own language, and illustrated by that of others. With respect to quotation, he has all the liberty of other writers, and no more; for, if a grammarian makes “use of his predecessors’ labours,” why should any one think with Murray, “it is scarcely necessary to apologize for” this, “or for *omitting to insert* their names?”—*Introd. to L. Murray’s Gram.*, 8vo, p. 7.

20. The author of this volume would here take the liberty briefly to refer to his own procedure. His knowledge of what is *technical* in grammar, was of course chiefly derived from the writings of other grammarians; and to their concurrent opinions and practices, he has always had great respect; yet, in truth, not a line has he ever copied from any of them with a design to save the labour of composition. For, not to compile an English grammar from others already extant, but to compose one more directly from the sources of the art, was the task which he at first proposed to himself. Nor is there in all the present volume a single sentence, not regularly quoted, the authorship of which he supposes may now be ascribed to an other more properly than to himself. Where either authority or acknowledgement was requisite, names have been inserted. In the doctrinal parts of the volume, not only quotations from others, but most examples made for the occasion, are marked with guillemets, to distinguish them from the main text; while, to almost every thing which is really taken from any other known writer, a name or reference is added. For those citations, however, which there was occasion to repeat in different parts of the work, a single reference has sometimes been thought sufficient. This remark refers chiefly to the corrections in the Key, the references being given in the Exercises.

21. Though the theme is not one on which a man may hope to write well with little reflection, it is true that the parts of this treatise which have cost the author the most labour, are those which “consist chiefly of materials selected from the writings of others.” These, however, are not the didactical portions of the book, but the proofs and examples; which, according to the custom of the ancient grammarians, ought to be taken from other authors. But so much have the makers of our modern grammars been allowed to presume upon the respect and acquiescence of their readers, that the ancient exactness on this point would often appear pedantic. Many phrases and sentences, either original with the writer, or common to everybody, will therefore be found among the illustrations of the following work; for it was not supposed that any reader would demand for every thing of this kind the authority of some great name. Anonymous examples are sufficient to elucidate principles, if not to establish them; and elucidation is often the sole purpose for which an example is needed.

22. It is obvious enough, that no writer on grammar has any right to propose himself as authority for what he teaches; for every language, being the common property of all who use it, ought to be carefully guarded against the caprices of individuals; and especially against that presumption which might attempt to impose erroneous or arbitrary definitions and rules. “Since the matter of which we are treating,” says the philologist of Salamanca, “is to be verified, first by reason, and then by testimony and usage, none ought to wonder if we sometimes deviate from the track of great men; for, with whatever

authority any grammarian may weigh with me, unless he shall have confirmed his assertions by reason, and also by examples, he shall win no confidence in respect to grammar. For, as Seneca says, Epistle 95, ‘Grammarians are the *guardians*, not the *authors*, of language.’—*Sancti Minerva*, Lib. ii, Cap. 2. Yet, as what is intuitively seen to be true or false, is already sufficiently proved or detected, many points in grammar need nothing more than to be clearly stated and illustrated; nay, it would seem an injurious reflection on the understanding of the reader, to accumulate proofs of what cannot but be evident to all who speak the language.

23. Among men of the same profession, there is an unavoidable rivalry, so far as they become competitors for the same prize; but in competition there is nothing dishonourable, while excellence alone obtains distinction, and no advantage is sought by unfair means. It is evident that we ought to account him the best grammarian, who has the most completely executed the worthiest design. But no worthy design can need a false apology; and it is worse than idle to prevaricate. That is but a spurious modesty, which prompts a man to disclaim in one way what he assumes in an other—or to underrate the duties of his office, that he may boast of having “done all that could reasonably be expected.” Whoever professes to have improved the science of English grammar, must claim to know more of the matter than the generality of English grammarians; and he who begins with saying, that “little can be expected” from the office he assumes, must be wrongfully contradicted, when he is held to have done much. Neither the ordinary power of speech, nor even the ability to write respectably on common topics, makes a man a critic among critics, or enables him to judge of literary merit. And if, by virtue of these qualifications alone, a man will become a grammarian or a connoisseur, he can hold the rank only by courtesy—a courtesy which is content to degrade the character, that his inferior pretensions may be accepted and honoured under the name.

24. By the force of a late popular example, still too widely influential, grammatical authorship has been reduced, in the view of many, to little or nothing more than a mere serving-up of materials anonymously borrowed; and, what is most remarkable, even for an indifferent performance of this low office, not only unnamed reviewers, but several writers of note, have not scrupled to bestow the highest praise of grammatical excellence! And thus the palm of superior skill in grammar, has been borne away by a *professed compiler*, who had so mean an opinion of what his theme required, as to deny it even the common courtesies of compilation! What marvel is it, that, under the wing of such authority, many writers have since sprung up, to improve upon this most happy design; while all who were competent to the task, have been discouraged from attempting any thing like a complete grammar of our language? What motive shall excite a man to long-continued diligence, where such notions prevail as give mastership no hope of preference, and where the praise of his ingenuity and the reward of his labour must needs be inconsiderable, till some honoured compiler usurp them both, and bring his “most useful matter” before the world under better auspices? If the love of learning supply such a motive, who that has generously yielded to the impulse, will not now, like Johnson, feel himself reduced to an “humble drudge”—or, like Perizonius, apologize for the apparent folly of devoting his time to such a subject as grammar?

25. The first edition of the “Institutes of English Grammar,” the doctrinal parts of which are embraced in the present more copious work, was published in the year 1823; since which time, (within the space of twelve years,) about forty new compends, mostly professing to be abstracts of *Murray*, with improvements, have been added to our list of

English grammars. The author has examined as many as thirty of them, and seen advertisements of perhaps a dozen more. Being various in character, they will of course be variously estimated; but, so far as he can judge, they are, without exception, works of little or no real merit, and not likely to be much patronized or long preserved from oblivion. For which reason, he would have been inclined entirely to disregard the petty depredations which the writers of several of them have committed upon his earlier text, were it not possible, that by such a frittering-away of his work, he himself might one day seem to some to have copied that from others which was first taken from him. Trusting to make it manifest to men of learning, that in the production of the books which bear his name, far more has been done for the grammar of our language than any single hand had before achieved within the scope of practical philology, and that with perfect fairness towards other writers; he cannot but feel a wish that the integrity of his text should be preserved, whatever else may befall; and that the multitude of scribblers who judge it so needful to remodel Murray's defective compilation, would forbear to publish under his name or their own what they find only in the following pages.

26. The mere rivalry of their authorship is no subject of concern; but it is enough for any ingenuous man to have toiled for years in solitude to complete a work of public utility, without entering a warfare for life to defend and preserve it. Accidental coincidences in books are unfrequent, and not often such as to excite the suspicion of the most sensitive. But, though the criteria of plagiarism are neither obscure nor disputable, it is not easy, in this beaten track of literature, for persons of little reading to know what is, or is not, original. Dates must be accurately observed; and a multitude of minute things must be minutely compared. And who will undertake such a task but he that is personally interested? Of the thousands who are forced into the paths of learning, few ever care to know, by what pioneer, or with what labour, their way was cast up for them. And even of those who are honestly engaged in teaching, not many are adequate judges of the comparative merits of the great number of books on this subject. The common notions of mankind conform more easily to fashion than to truth; and even of some things within their reach, the majority seem content to take their opinions upon trust. Hence, it is vain to expect that that which is intrinsically best, will be everywhere preferred; or that which is meritoriously elaborate, adequately appreciated. But common sense might dictate, that learning is not encouraged or respected by those who, for the making of books, prefer a pair of scissors to the pen.

27. The fortune of a grammar is not always an accurate test of its merits. The goddess of the plenteous horn stands blindfold yet upon the floating prow; and, under her capricious favour, any pirate-craft, ill stowed with plunder, may sometimes speed as well, as barges richly laden from the golden mines of science. Far more are now afloat, and more are stranded on dry shelves, than can be here reported. But what this work contains, is candidly designed to qualify the reader to be himself a judge of what it *should* contain; and I will hope, so ample a report as this, being thought sufficient, will also meet his approbation. The favour of one discerning mind that comprehends my subject, is worth intrinsically more than that of half the nation: I mean, of course, the half of whom my gentle reader is not one.

"They praise and they admire they know not what,  
And know not whom, but as one leads the other."—*Milton*.

### CHAPTER III.

#### OF GRAMMATICAL SUCCESS AND FAME.

“Non is ego sum, cui aut jucundum, aut adeo opus sit, de aliis detrahere, et hac viâ ad famara contendere. Melioribus artibus laudem parare didici. Itaque non libenter dico, quod præsens institutum dicere cogit.”—JO. AUGUSTI ERNESTI *Præf. ad Græcum Lexicon*, p. vii.

1. The real history of grammar is little known; and many erroneous impressions are entertained concerning it: because the story of the systems most generally received has never been fully told; and that of a multitude now gone to oblivion was never worth telling. In the distribution of grammatical fame, which has chiefly been made by the hand of interest, we have had a strange illustration of the saying: “Unto every one that hath shall be given, and he shall have abundance; but from him that hath not, shall be taken away even that which he hath.” Some whom fortune has made popular, have been greatly overrated, if learning and talent are to be taken into the account; since it is manifest, that with no extraordinary claims to either, they have taken the very foremost rank among grammarians, and thrown the learning and talents of others into the shade, or made them tributary to their own success and popularity.

2. It is an ungrateful task to correct public opinion by showing the injustice of praise. Fame, though it may have been both unexpected and undeserved, is apt to be claimed and valued as part and parcel of a man’s good name; and the dissenting critic, though ever-so candid, is liable to be thought an envious detractor. It would seem in general most prudent to leave mankind to find out for themselves how far any commendation bestowed on individuals is inconsistent with truth. But, be it remembered, that celebrity is not a virtue; nor, on the other hand, is experience the cheapest of teachers. A good man may not have done all things ably and well; and it is certainly no small mistake to estimate his character by the current value of his copy-rights. Criticism may destroy the reputation of a book, and not be inconsistent with a cordial respect for the private worth of its author. The reader will not be likely to be displeased with what is to be stated in this chapter, if he can believe, that no man’s merit as a writer, may well be enhanced by ascribing to him that which he himself, for the protection of his own honour, has been constrained to disclaim. He cannot suppose that too much is alleged, if he will admit that a grammarian’s fame should be thought safe enough in his *own keeping*. Are authors apt to undervalue their own performances? Or because proprietors and publishers may profit by the credit of a book, shall it be thought illiberal to criticise it? Is the author himself to be disbelieved, that the extravagant praises bestowed upon him may be justified? “Superlative commendation,” says Dillwyn, “is near akin to *detractation*.” (See his *Reflections*, p. 22.) Let him, therefore, who will charge detractation upon me, first understand wherein it consists. I shall criticise, freely, both the works of the living, and the doctrines of those who, to us, live only in their works; and if any man dislike this freedom, let him rebuke it, showing wherein it is wrong or unfair. The amiable author just quoted, says again: “Praise has so often proved an *impostor*, that it would be well, wherever we meet with it, to treat it as a vagrant.”—*Ib.*, p. 100. I go not so far as this; but that eulogy which one knows to be false, he cannot but reckon impertinent.

3. Few writers on grammar have been more noted than WILLIAM LILY and LINDLEY MURRAY. Others have left better monuments of their learning and talents, but none perhaps have had greater success and fame. The Latin grammar which was for a long time

most popular in England, has commonly been ascribed to the one; and what the Imperial Review, in 1805, pronounced “the best English grammar, beyond all comparison, that has yet appeared,” was compiled by the other. And doubtless they have both been rightly judged to excel the generality of those which they were intended to supersede; and both, in their day, may have been highly serviceable to the cause of learning. For all excellence is but comparative; and to grant them this superiority, is neither to prefer them now, nor to justify the praise which has been bestowed upon their authorship. As the science of grammar can never be taught without a book, or properly taught by any book which is not itself grammatical, it is of some importance both to teachers and to students, to make choice of the best. Knowledge will not advance where grammars hold rank by prescription. Yet it is possible that many, in learning to write and speak, may have derived no inconsiderable benefit from a book that is neither accurate nor complete.

4. With respect to time, these two grammarians were three centuries apart; during which period, the English language received its most classical refinement, and the relative estimation of the two studies, Latin and English grammar, became in a great measure reversed. Lily was an Englishman, born at Odiham,\* in Hampshire, in 1466. When he had arrived at manhood, he went on a pilgrimage to Jerusalem; and while abroad studied some time at Rome, and also at Paris. On his return he was thought one of the most accomplished scholars in England. In 1510, Dr. John Colet, dean of St. Paul’s church, in London, appointed him the first high master of St. Paul’s School, then recently founded by this gentleman’s munificence. In this situation, Lily appears to have taught with great credit to himself till 1522, when he died of the plague, at the age of 56. For the use of this school, he wrote and published certain parts of the grammar which has since borne his name. Of the authorship of this work many curious particulars are stated in the preface by John Ward, which may be seen in the edition of 1793. Lily had able rivals, as well as learned coadjutors and friends. By the aid of the latter, he took precedence of the former; and his publications, though not voluminous, soon gained a general popularity. So that when an arbitrary king saw fit to silence competition among the philologists, by becoming himself, as Sir Thomas Elliott says, “the chiefe authour and setter-forth of an introduction into grammar, for the childrene of his lovyng subjects,” Lily’s Grammar was preferred for the basis of the standard. Hence, after the publishing of it became a privilege patented by the crown, the book appears to have been honoured with a royal title, and to have been familiarly called King Henry’s Grammar.

5. Prefixed to this book, there appears a very ancient epistle to the reader, which while it shows the reasons for this royal interference with grammar, shows also, what is worthy of remembrance, that guarded and maintained as it was, even royal interference was here ineffectual to its purpose. It neither produced uniformity in the methods of teaching, nor, even for instruction in a dead language, entirely prevented the old manual from becoming diverse in its different editions. The style also may serve to illustrate what I have elsewhere said about the duties of a modern grammarian. “As for the diversitie of grammars, it is well and profitably taken awaie by the King’s Majesties wisdom; who, foreseeing the inconvenience, and favorably providing the remedie, caused one kind of grammar by sundry learned men to be diligently drawn, and so to be set out, only every where to be taught, for the use of learners, and for the hurt in changing of schoolemaisters.” That is, to prevent the injury which schoolmasters were doing by a whimsical choice, or frequent

---

\* Not, “*Oldham*, in Hampshire,” as the Universal Biographical Dictionary has it; for *Oldham* is in *Lancashire*, and the name of Lily’s birthplace has sometimes been spelled “*Odiam*.”

changing, of grammars. But, says the letter, “The varietie of teaching is divers yet, and alwaies will be; for that every schoolemaister liketh that he knoweth, and seeth not the use of that he knoweth not; and therefore judgeth that the most sufficient waie, which he seeth to be the readiest meane, and perfectest kinde, to bring a learner to have a thorough knowledge therein.” The only remedy for such an evil then is, to teach those who are to be teachers, and to desert all who, for any whim of their own, desert sound doctrine.

6. But, to return. A law was made in England by Henry the Eighth, commanding Lily’s Grammar only, (or that which has commonly been quoted as Lily’s,) to be everywhere adopted and taught, as the common standard of grammatical instruction.\* Being long kept in force by means of a special inquiry, directed to be made by the bishops at their stated visitations, this law, for three hundred years, imposed the book on all the established schools of the realm. Yet it is certain, that about one half of what has thus gone under the name of Lily, (“because,” says one of the patentees, “he had *so considerable a hand* in the composition,”) was written by Dr. Colet, by Erasmus, or by others who improved the work after Lily’s death. And of the other half, it has been incidentally asserted in history, that neither the scheme nor the text was original. The Printer’s Grammar, London, 1787, speaking of the art of type-foundry, says: “The Italians in a short time brought it to *that* perfection, that in the beginning of the year 1474, they cast a letter not much inferior to the best types of the present age; as may be seen in a Latin Grammar, written by Omnibonus Leonicensus, and printed at Padua on the 14th of January, 1474; *from whom our grammarian, Lily, has taken the entire scheme of his Grammar, and transcribed the greatest part thereof, without paying any regard to the memory of this author.*” The historian then proceeds to speak about types. See also the same thing in the History of Printing, 8vo, London, 1770. This is the grammar which bears upon its title page: “*Quam solam Regia Majestas in omnibus scholis docendam præcipit.*”

7. Murray was an intelligent and very worthy man, to whose various labours in the compilation of books our schools are under many obligations. But in original thought and critical skill he fell far below most of “the authors to whom,” he confesses, “the grammatical part of his compilation is *principally indebted for its materials*; namely, Harris, Johnson, Lowth, Priestley, Beattie, Sheridan, Walker, Coote, Blair, and Campbell.”—*Introd. to Lindley Murray’s Gram.*, p. 7. It is certain and evident that he entered upon his task with a very insufficient preparation. His biography, which was commenced by himself and completed by one of his most partial friends, informs us, that, “Grammar did not particularly engage his attention, until a short time previous to the publication of his first work on that subject,” that, “His Grammar, as it appeared in the first edition, was completed in rather less than a year;” that, “It was begun in the spring of 1794, and published in the spring of 1795—though he had an intervening illness, which, for several weeks, stopped the progress of the work;” and that, “The Exercises and Key were also composed in about a year.”—*Life of L. Murray*, p. 188. From the very first sentence of his book, it appears that he entertained but a low and most erroneous idea of the duties of that sort of character in which he was about to come before the public.† He

---

\* There are other Latin grammars now in use in England; but what one is most popular, or whether any regard is still paid to the ancient edict or not, I cannot say. Dr. Adam, in his preface, dated 1793, speaking of Lily, says: “His Grammar was appointed, by an act *which is still in force*, to be taught in the established schools of England.” I have somehow gained the impression, that the act is now totally disregarded.—*G. Brown*.

† For this there is an obvious reason, or apology, in what his biographer states, as “the humble origin of his Grammar;” and it is such a reason as will go to confirm what I allege. This famous compilation was

improperly imagined, as many others have done, that “little can be expected” from a modern grammarian, or (as he chose to express it) “from a *new compilation*, besides a careful selection of the most useful matter, and some degree of improvement in the mode of adapting it to the understanding, and the gradual progress of learners.”—*Introd. to L. Murray’s Gram.*; 8vo, p. 5; 12mo, p. 3. As if, to be master of his own art—to think and write well himself, were no part of a grammarian’s business! And again, as if the jewels of scholarship, thus carefully selected, could need a burnish or a foil from other hands than those which fashioned them!

8. Murray’s general idea of the doctrines of grammar was judicious. He attempted no broad innovation on what had been previously taught; for he had neither the vanity to suppose he could give currency to novelties, nor the folly to waste his time in labours utterly nugatory. By turning his own abilities to their best account, he seems to have done much to promote and facilitate the study of our language. But his notion of grammatical authorship, cuts off from it all pretence to literary merit, for the sake of doing good; and, taken in any other sense than as a forced apology for his own assumptions, his language on this point is highly injurious towards the very authors whom he copied. To justify himself, he ungenerously places them, in common with others, under a degrading necessity which no able grammarian ever felt, and which every man of genius or learning must repudiate. If none of our older grammars disprove his assertion, it is time to have a new one that will; for, to expect the perfection of grammar from him who cannot treat the subject in a style at once original and pure, is absurd. He says, “The greater part of an English grammar *must necessarily be a compilation* ;” and adds, with reference to his own, “originality belongs to but a small portion of it. This I have acknowledged; and I trust *this acknowledgement* will protect me from all attacks, grounded on any supposed unjust and irregular assumptions.” This quotation is from a letter addressed by Murray to his American publishers, in 1811, after they had informed him of certain complaints respecting the liberties which he had taken in his work. See “*The Friend*,” Vol. iii, p. 34.

9. The acknowledgement on which he thus relies, does not appear to have been made, till his grammar had gone through several editions. It was, however, at some period, introduced into his short preface, or “Introduction,” in the following well-meant but singularly sophistical terms: “In *a work* which professes itself to be a *compilation*, and which, *from the nature and design of it*, must consist chiefly of materials selected from the writings of others, *it is scarcely necessary to apologise* for the use which the Compiler has made of his predecessors’ labours, or for *omitting to insert* their names. *From the alterations* which have been frequently made in the sentiments and the language, to suit the connexion, and to adapt them to the particular purposes for which they are introduced; and, in many instances, *from the uncertainty to whom* the passages originally belonged, the insertion of names *could seldom be made with propriety*. But if this could have been generally done, a work of this nature *would derive no advantage from it*, equal to the inconvenience of crowding the pages with a repetition of names and references. It is, however, proper to acknowledge, in general terms, that the authors to whom the grammatical part of this compilation is principally indebted for its materials, are Harris,

---

produced at the request of *two or three young teachers*, who had charge of a *small female school* in the neighbourhood of the author’s residence: and nothing could have been more unexpected to their friend and instructor, than that he, in consequence of this service, should become known the world over, as *Murray the Grammarian*. “In preparing the work, and consenting to the publication, he had no expectation that it would be read, except by the school for which it was designed, and two or three other schools conducted by persons who were also his friends.”—*Life of L. Murray*, p. 250.

Johnson, Lowth, Priestley, Beattie, Sheridan, Walker, and Coote.”—*Introd.*; *Duodecimo Gram.*, p. 4; *Octavo*, p. 7.

10. The fallacy, or absurdity, of this language sprung from necessity. An impossible case was to be made out. For compilation, though ever so fair, is not grammatical authorship. But some of the commenders of Murray have not only professed themselves satisfied with this general acknowledgement, but have found in it a candour and a liberality, a modesty and a diffidence, which, as they allege, ought to protect him from all animadversion. Are they friends to learning? Let them calmly consider what I reluctantly offer for its defence and promotion. In one of the recommendations appended to Murray’s grammars, it *is* said, “They have nearly superseded every thing else of the kind, by concentrating the remarks of the best authors on the subject.” But, in truth, with several of the best English grammars published previously to his own, Murray appears to have been totally unacquainted. The chief, if not the only school grammars which were largely copied by him, were Lowth’s and Priestley’s, though others perhaps may have shared the fate of these in being “superseded” by his. It may be seen by inspection, that in copying these two authors, the compiler, agreeably to what he says above, omitted all names and references—even such as they had scrupulously inserted: and, at the outset, assumed to be himself the sole authority for all his doctrines and illustrations; satisfying his own mind with making, some years afterwards, that general apology which we are now criticizing. For if he so mutilated and altered the passages which he adopted, as to make it improper to add the names of their authors, upon what other authority than his own do they rest? But if, on the other hand, he generally copied without alteration; his examples are still anonymous, while his first reason for leaving them so, is plainly destroyed: because his position is thus far contradicted by the fact.

11. In his later editions, however, there are two opinions which the compiler thought proper to support by regular quotations; and, now and then, in other instances, the name of an author appears. The two positions thus distinguished, are these: *First*, That the noun *means* is necessarily singular as well as plural, so that one cannot with propriety use the singular form, *mean*, to signify that by which an end is attained; *Second*, That the subjective mood, to which he himself had previously given all the tenses without inflection, is not different in form from the indicative, except in the present tense. With regard to the later point, I have shown, in its proper place, that he taught erroneously, both before and after he changed his opinion; and concerning the former, the most that can be proved by quotation, is, that both *mean* and *means* for the singular number, long have been, and still are, in good use, or sanctioned by many elegant writers; so that either form may yet be considered grammatical, though the irregular can claim to be so, only when it is used in this particular sense. As to his second reason for the suppression of names, to wit, “the *uncertainty to whom* the passages originally belonged,”—to make the most of it, it is but partial and relative; and, surely, no other grammar ever before so multiplied the difficulty in the eyes of teachers, and so widened the field for commonplace authorship, as has the compilation in question. The origin of a sentiment or passage may be uncertain to one man, and perfectly well known to another. The embarrassment which a *compiler* may happen to find from this source, is worthy of little sympathy. For he cannot but know from what work he is taking any particular sentence or paragraph, and those parts of a *grammar*, which are new to the eye of a great grammarian, may very well be credited to him who claims to have written the book. I have thus disposed of his second reason for the omission of names and references, in compilations of grammar.

12. There remains one more: “A work of this nature *would derive no advantage from it*, equal to the inconvenience of crowding the pages with a repetition of names and references.” With regard to a small work, in which the matter is to be very closely condensed, this argument has considerable force. But Murray has in general allowed himself very ample room, especially in his two octavoes. In these, and for the most part also in his duodecimoes, all needful references might easily have been added without increasing the size of his volumes, or injuring their appearance. In nine cases out of ten, the names would only have been occupied what is now blank space. It is to be remembered, that these books do not differ much, except in quantity of paper. His octavo Grammar is but little more than a reprint, in a larger type, of the duodecimo Grammar, together with his Exercises and Key. The demand for this expensive publication has been comparatively small; and it is chiefly to the others, that the author owes his popularity as a grammarian. As to the advantage which Murray or his work might have derived from an adherence on his part to the usual custom of compilers, *that* may be variously estimated. The remarks of the best grammarians or the sentiments of the best authors, are hardly to be thought the more worthy of acceptance, for being concentrated in such a manner as to merge their authenticity in the fame of the copyist. Let me not be understood to suggest that this good man sought popularity at the expense of others; for I do not believe that either fame or interest was his motive. But the right of authors to the credit of their writings, is a delicate point; and, surely, his example would have been worthier of imitation, had he left no ground for the foregoing objections, and carefully barred the way to any such interference.

13. But let the first sentence of this apology be now considered. It is here suggested, that because this work is a compilation, even such an acknowledgement as the author makes, is “scarcely necessary.” This is too much to say. Yet one may readily admit, that a compilation, “from the nature and design of it, must consist chiefly”—nay, *wholly*—“of materials selected from the writings of others.” But what able grammarian would ever willingly throw himself upon the horns of such a dilemma! The nature and design *of a book*, whatever they may be, are matters for which the author alone is answerable; but the nature and design *of grammar*, are no less repugnant to the strain of this apology, than to the vast number of errors and defects which were overlooked by Murray in his work of compilation. It is the express purpose of this practical science, to enable a man to write well himself. He that cannot do this, exhibits no excess of modesty when he claims to have “done all that could reasonably be expected in a work of this nature.”—*L. Murray’s Gram., Introd.*, p. 9. He that sees with other men’s eyes, is peculiarly liable to errors and inconsistencies: uniformity is seldom found in patchwork, or accuracy in secondhand literature. Correctness of language is in the mind, rather than in the hand or the tongue; and, in order to secure it, some originality of thought is necessary. A delineation from new surveys is not the less original because the same region has been sketched before; and how can he be the ablest of surveyors, who, through lack of skill or industry, does little more than transcribe the field-notes and copy the projections of his predecessors?

14. This author’s oversights are numerous. There is no part of the volume more accurate than that which he literally copied from Lowth. To the Short Introduction alone, he was indebted for more than a hundred and twenty paragraphs; and even in these there are many things obviously erroneous. Many of the best practical notes were taken from Priestley; yet it was he, at whose doctrines were pointed most of those “positions and discussions,” which alone the author claims as original. To some of these reasonings, however, his own alterations may have given rise; for, where he “persuades himself he is

not destitute of originality," he is often arguing against the text of his own earlier editions. Webster's well-known complaints of Murray's unfairness, had a far better cause than requital; for there was no generosity in ascribing them to peevishness, though the passages in question were not worth copying. On perspicuity and accuracy, about sixty pages were extracted from Blair; and it requires no great critical acumen to discover, that they are miserably deficient in both. On the law of language, there are fifteen pages from Campbell; which, with a few exceptions, are well written. The rules for spelling are the same as Walker's: the third one, however, is a gross blunder; and the fourth, a needless repetition.

15. Were this a place for minute criticism, blemishes almost innumerable might be pointed out. It might easily be shown that almost every rule laid down in the book for the observance of the learner, was repeatedly violated by the hand of the master. Nor is there among all those who have since abridged or modified the work, an abler grammarian than he who compiled it. Who will pretend that Flint, Alden, Comly, Jaudon, Russell, Bacon, Lyon, Miller, Alger, Maltby, Ingersoll, Fisk, Greenleaf, Merchant, Kirkham, Cooper, R. G. Greene, Woodworth, Smith, or Frost, has exhibited greater skill? It is curious to observe, how frequently a grammatical blunder committed by Murray, or some one of his predecessors, has escaped the notice of all these, as well as of many others who have found it easier to copy him than to write for themselves. No man professing to have copied and improved Murray, can rationally be supposed to have greatly excelled him; for to pretend to have produced an *improved copy of a compilation*, is to claim a sort of authorship, even inferior to his, and utterly unworthy of any man who is able to prescribe and elucidate the principles of English grammar.

16. But Murray's grammatical works, being extolled in the reviews, and made common stock in trade,—being published, both in England and in America, by booksellers of the most extensive correspondence, and highly commended even by those who were most interested in the sale of them,—have been eminently successful with the public; and in the opinion of the world, success is the strongest proof of merit. Nor has the force of this argument been overlooked by those who have written in aid of his popularity. It is the strong point in most of the commendations which have been bestowed upon Murray as a grammarian. A recent eulogist computes, that, "at least five millions of copies of his various school-books have been printed;" particularly commends him for his "candour and liberality towards rival authors;" avers that, "he went on, examining and correcting his Grammar, through all its forty editions, till he brought it to a degree of perfection which will render it as permanent as the English language itself;" censures (and not without reason) the "presumption" of those "superficial critics" who have attempted to amend the work, and usurp his honours; and, regarding the compiler's confession of his indebtedness to others, but as a mark of "his exemplary diffidence of his own merits," adds, (in very bad English,) "Perhaps there never was an author whose success and fame were more *unexpected by himself than Lindley Murray*."—*The Friend*, Vol. iii, p. 33.

17. In a New-York edition of Murray's Grammar, printed in 1812, there was inserted a "Caution to the Public," by Collins & Co., his American correspondents and publishers, in which are set forth the unparalleled success and merit of the work, "as it came *in purity* from the pen of the author;" with an earnest remonstrance against the several *revised editions* which had appeared at Boston, Philadelphia, and other places, and against the unwarrantable liberties taken by American teachers, in altering the work, under pretence of improving it. In this article it is stated, "that *the whole* of these mutilated editions *have*

*been seen* and examined by Lindley Murray himself, and that they, have met with *his decided disapprobation*. Every rational mind,” continue these gentlemen, “will agree with him, that, ‘the *rights of living authors*, and the *interests of science and literature*, demand the abolition of this *ungenerous practice*.’” (See this also in *Murray’s Key*, 12mo, N. Y., 1811, p. iii.) Here, then, we have the feeling and opinion of Murray himself, upon this tender point of right. Here we see the tables turned, and other men judging it “scarcely necessary to apologize for the use which *they have made* of their predecessors’ labours.”

18. It is really remarkable to find an author and his admirers so much at variance, as are Murray and his commenders, in relation to his grammatical authorship; and yet, under what circumstances could men have stronger desires to avoid apparent contradiction? They, on the one side, claim for him the highest degree of merit as a grammarian; and continue to applaud his works as if nothing more could be desired in the study of English grammar—a branch of learning which some of them are willing emphatically to call “*his science*.” He, on the contrary, to avert the charge of plagiarism, disclaims almost every thing in which any degree of literary merit consists; supposes it impossible to write an English grammar the greater part of which is not a “*compilation*,” acknowledges that originality belongs to but a small part of his own; trusts that such a general acknowledgement will protect him from all censure; suppresses the names of other writers, and leaves his examples to rest solely on his own authority; and, “contented with the great respectability of his private character and station, is satisfied with being *useful* as an author.”—*The Friend*, Vol. iii, p. 33. By the high praises bestowed upon his works, his own voice is overborne: the trumpet of fame has drowned it. His liberal authorship is profitable in trade, and interest has power to swell and prolong the strain.

19. The name and character of Lindley Murray are too venerable to allow us to approach even the errors of his grammars, without some recognition of the respect due to his personal virtues and benevolent intentions. For the private virtues of Murray, I entertain as cordial a respect as any other man. Nothing is argued against these, even if it be proved that causes independent of true literary merit have given him his great and unexpected fame as a grammarian. It is not intended by the introduction of these notices, to impute to him any thing more or less than what his own words plainly imply; except those inaccuracies and deficiencies which still disgrace his work as a literary performance, and which of course he did not discover. He himself knew that he had not brought the book to such perfection as has been ascribed to it; for, by way of apology for his frequent alterations, he says, “Works of this nature admit of repeated improvements; and are, perhaps, never complete.” Necessity has urged this reasoning upon me. I am as far from any invidious feeling, or any sordid motive, as was Lindley Murray. But it is due to truth, to correct erroneous impressions; and, in order to obtain from some an impartial examination of the following pages, it seemed necessary first to convince them, *that it is possible* to compose a better grammar than Murray’s, without being particularly indebted to him. If this treatise is not such, a great deal of time has been thrown away upon a useless project; and if it is, the achievement is no fit subject for either pride or envy. It differs from his, and from all the pretended amendments of his, as a new map, drawn from actual and minute surveys, differs from an old one, compiled chiefly from others still older and confessedly still more imperfect. The region and the scope are essentially the same; the tracing and the colouring are more original; and (if the reader can pardon the suggestion) perhaps more accurate and vivid.

20. He who makes a new grammar, does nothing for the advancement of learning, unless his performance excel all earlier ones designed for the same purpose; and nothing for his own honour, unless such excellence result from the exercise of his own ingenuity and taste. A good style naturally commends itself to every reader—even to him who cannot tell why it is worthy of preference. Hence there is reason to believe, that the true principles of practical grammar, deduced from custom and sanctioned by time, will never be generally superseded by any thing which individual caprice may substitute. In the republic of letters, there will always be some who can distinguish merit; and it is impossible that these should ever be converted to any whimsical theory of language, which goes to make void the learning of past ages. There will always be some who can discern the difference between originality of style, and innovation in doctrine,—between a due regard to the opinions of others, and an actual usurpation of their text; and it is incredible that these should ever be satisfied with any mere compilation of grammar, or with any such authorship as either confesses or betrays the writer's own incompetence. For it is not true, that, “an English grammar must necessarily be,” in any considerable degree, if at all, “a compilation;” nay, on such a theme, and in “the grammatical part” of the work, all compilation beyond a fair use of authorities regularly quoted, or of materials either voluntarily furnished or free to all, most unavoidably implies—not conscious “ability,” generously doing honour to rival merit—nor “exemplary diffidence,” modestly veiling its own—but inadequate skill and inferior talents, bribing the public by the spoils of genius, and seeking precedence by such means as not even the purest desire of doing good can justify.

21. Among the professed copiers of Murray, there is not one to whom the foregoing remarks do not apply, as forcibly as to him. For no one of them all has attempted any thing more honourable to himself, or more beneficial to the public, than what their master had before achieved; nor is there any one, who, with the same disinterestedness, has guarded his design from the imputation of a pecuniary motive. It is comical to observe what they say in their prefaces. Between praise to sustain their choice of a model, and blame to make room for their pretended amendments, they are often placed in as awkward a dilemma, as that which was contrived when grammar was identified with compilation. I should have much to say, were I to show them all in their true light.\* Few of them have had such success as to be worthy of notice here; but the names of many will find frequent place in my code of false grammar. The one who seems to be now taking the lead in fame and revenue, filled with glad wonder at his own popularity, is SAMUEL KIRKHAM. Upon this gentleman's performance, I shall therefore bestow a few brief observations. If I do not overrate this author's literary importance, a fair exhibition of the character of his grammar, may be made an instructive lesson to some of our modern literati. The book is a striking sample of a numerous species.

22. Kirkham's treatise is entitled, “English Grammar *in familiar Lectures*, accompanied by a *Compendium*,” that is, by a folded sheet. Of this work, of which I have recently seen copies purporting to be of the “SIXTY-SEVENTH EDITION,” and others again of the “HUNDRED AND FIFTH EDITION,” each published at Baltimore in 1835, I can give no earlier account, than what may be derived from the “SECOND EDITION, enlarged and much improved,” which was

---

\* Grammatici namque auctoritas per se nulla est; quom ex sola doctissimorum oraturum, historicorum, poetarum, et aliorum ideonorum scriptorum observatione, constet ortam esse veram grammaticam. *Multa dicenda forent, si grammatistarum ineptias refellere vellem*: sed nulla est gloria præterire asellos.”—DESPAUTERII *Præf. Art. Versif.*, fol. iii, 1517.

published at Harrisburg in 1825. The preface, which appears to have been written for his *first* edition, is dated, “Fredericktown, Md., August 22, 1823.” In it, there is no recognition of any obligation to Murray, or to any other grammarian in particular; but with the modest assumption, that the style of the “best philologists,” needed to be retouched, the book is presented to the world under the following pretensions:

“The author of this production has endeavoured to condense *all the most important subject-matter of the whole science*, and present it in so small a compass that the learner can become familiarly acquainted with it in a *short time*. He makes but small pretensions to originality in theoretical matter. Most of the principles laid down, have been selected from our *best modern philologists*. If his work is entitled to any degree of *merit*, it is not on account of a judicious selection of principles and rules, but for the easy mode adopted of communicating *these* to the mind of the learner.”—*Kirkham’s Grammar*, 1825, p. 10.

23. It will be found on examination, that what this author regarded as “*all the most important subject-matter of the whole science*” of grammar, included nothing more than the most common elements of the orthography, etymology, and syntax, of the English tongue—beyond which his scholarship appears not to have extended. Whatsoever relates to derivation, to the sounds of the letters, to prosody, (as punctuation, utterance, figures, versification, and poetic diction,) found no place in his “comprehensive system of grammar;” nor do his later editions treat any of these things amply or well. In short, he treats nothing well; for he is a bad writer. Commencing his career of authorship under circumstances the most forbidding, yet receiving encouragement from commendations bestowed in pity, he proceeded, like a man of business, to profit mainly by the chance; and, without ever acquiring either the feelings or the habits of a scholar, soon learned by experience that, “It is much better to *write* than [to] *starve*.”—*Kirkham’s Gram., Stereotyped*, p. 89. It is cruel in any man, to look narrowly into the faults of an author who peddles a school-book for bread. The starveling wretch whose defence and plea are poverty and sickness, demands, and must have, in the name of humanity, an immunity from criticism, if not the patronage of the public. Far be it from me, to notice any such character, except with kindness and charity. Nor need I be told, that tenderness is due to the “*young*,” or that noble results sometimes follow unhopeful beginnings. These things are understood and duly appreciated. The gentleman was young once, even as he says; and I, his equal in years, was then, in authorship, as young—though, it were to be hoped, not quite so immature. But, as circumstances alter cases, so time and chance alter circumstances. Under no circumstances, however, can the artifices of quackery be thought excusable in him who claims to be the very greatest of modern grammarians. The niche that in the temple of learning belongs to any individual, can be no other than that which his own labours have purchased: here, his *own merit* alone must be his pedestal. If this critical sketch be unimpeachably *just*, its publication requires no further warrant. The correction has been forborne, till the subject of it has become rich, and popular, and proud; proud enough at least to have published his utter contempt for me and all my works. Yet not for this do I judge him worthy of notice here, but merely as an apt example of some men’s grammatical success and fame. The ways and means to these grand results are what I purpose now to consider.

24. The common supposition, that the world is steadily advancing in knowledge and improvement, would seem to imply, that the man who could plausibly boast of being the most successful and most popular grammarian of the nineteenth century, cannot but be a scholar of such merit as to deserve some place, if not in the general literary history of his

age, at least in the particular history of the science which he teaches. It will presently be seen that the author of “English Grammar in Familiar Lectures,” boasts of a degree of success and popularity, which, in this age of the world, has no parallel. It is not intended on my part, to dispute any of his assertions on these points; but rather to take it for granted, that in reputation and revenue he is altogether as preëminent as he pretends to be. The character of his alleged *improvements*, however, I shall inspect with the eyes of one who means to know the certainty for himself; and, in this item of literary history, the reader shall see, in some sort, *what profit* there is in grammar. Is the common language of two of the largest and most enlightened nations on earth so little understood, and its true grammar so little known or appreciated, that one of the most unscholarly and incompetent of all pretenders to grammar can have found means to outrival all the grammarians who have preceded him? Have plagiarism and quackery become the only means of success in philology? Are there now instances to which an intelligent critic may point, and say, “This man, or that, though he can scarcely write a page of good English, has patched up a grammar, by the help of Murray’s text only, and thereby made himself rich?” Is there such a charm in the name of *Murray*, and the word *improvement*, that by these two implements alone, the obscurest of men, or the absurdest of teachers, may work his passage to fame; and then, perchance, by contrast of circumstances, grow conceited and arrogant, from the fortune of the undertaking? Let us see what we can find in Kirkham’s Grammar, which will go to answer these questions.

25. Take first from one page of his “hundred and fifth edition,” a few brief quotations, as a sample of his thoughts and style:

“They, however, who introduce *usages which depart from the analogy and philosophy* of a language, *are conspicuous* among the number of those who *form that language*, and have power to control it.” “PRINCIPLE.—A principle in grammar is a *peculiar construction* of the language, sanctioned by good usage.” “DEFINITION.—A definition in grammar is a *principle* of language expressed in a *definite form*.” “RULE.—A rule describes *the peculiar construction* or circumstantial relation of words, *which* custom has established for our observance.”—*Kirkham’s Grammar*, page 18.

Now, as “a rule describes a peculiar construction,” and “a principle is a peculiar construction,” and “a definition is a principle;” how, according to this grammarian, do a principle, a definition, and a rule, differ each from the others? From the rote here imposed, it is certainly not easier for the learner to conceive of all these things *distinctly*, than it is to understand how a departure from philosophy may make a man deservedly “*conspicuous*.” It were easy to multiply examples like these, showing the work to be deficient in clearness, the first requisite of style.

26. The following passages may serve as a specimen of the gentleman’s taste, and grammatical accuracy; in one of which, he supposes the neuter verb *is* to express an *action*, and every *honest man* to be *long since dead!* So it stands in all his editions. Did his praisers think so too?

“It is correct to say, *The man eats, he eats*; but we cannot say, *The man dog eats, he dog eats*. Why not? Because the man *is here represented* as the possessor, and dog, the property, or thing possessed; and the genius of our language requires, that when we add *to the possessor*, the *thing* which *he* is represented as possessing, *the possessor* shall take a particular form to show ITS case, or relation to the property.”—*Ib.*, p. 52.

THE PRESENT TENSE.—“This tense is sometimes applied to represent the *actions* of persons *long since dead*; as, ‘Seneca *reasons* and *moralizes* well; An HONEST MAN IS the noblest work of God.’—*Ib.*, p. 138.

PARTICIPLES.—“The term *Participle* comes from the Latin word *participio*,\* which signifies to *partake*.”—“Participles are formed by adding to the verb the termination *ing*, *ed*, or *en*. *Ing* signifies the same thing as the noun *being*. When *postfixed* to the *noun-state* of the verb, the *compound word* thus formed expresses a continued state of the *verbal denotement*. It implies that what is meant by the verb, is *being* continued.”—*Ib.*, p. 78. “All participles *are compound* in their meaning and office.”—*Ib.*, p. 79.

VERBS.—“Verbs express, not only *the state* or *manner of being*, but, likewise, all the different *actions* and *movements* of all creatures and things, whether animate or inanimate.”—*Ib.*, p. 62. “It can be easily shown, that from the noun and verb, all the other parts of speech have sprung. Nay, more. *They* may even be reduced to *one*. *Verbs do not, in reality, express actions*; but they are intrinsically *the mere NAMES of actions*.”—*Ib.*, p. 37.

PHILOSOPHICAL GRAMMAR.—“I have thought proper to intersperse through the pages of this work, under the head of ‘*Philosophical Notes*,’ an entire system of grammatical principles, as deduced from what *appears*<sup>†</sup> to me to be the *most rational and consistent* philosophical investigations.”—*Ib.*, p. 36. “Johnson, and Blair, and Lowth, *would have been laughed at*, had they essayed to thrust *any thing like our* modernized philosophical grammar *down the throats of their cotemporaries*.”—*Ib.*, p. 143.

Is it not a pity, that “more than one hundred thousand children and youth” should be daily poring over language and logic like this?

27. For the sake of those who happily remain ignorant of this successful empiricism, it is desirable that the record and exposition of it be made brief. There is little danger that it will long survive its author. But the present subjects of it are sufficiently numerous to deserve some pity. The following is a sample of the gentleman’s method of achieving what he both justly and exultingly supposes, that Johnson, or Blair, or Lowth, could not have effected. He scoffs at his own grave instructions, as if they had been the production of some *other* impostor. Can the fact be credited, that in the following instances, he speaks of *what he himself teaches*?—of what he seriously pronounces “*most rational and consistent*?”—of what is part and parcel of that philosophy of his, which he declares, “will *in general be found to accord* with the *practical theory* embraced in the body of his work?”—See *Kirkham’s Gram.*, p. 36.

“Call this ‘*philosophical parsing*, on reasoning principles, according to the original laws of nature and of thought,’ and *the pill will be swallowed*, by pedants and their dupes, with the greatest ease imaginable.”—*Kirkham’s Gram.*, p. 144. “For the *satisfaction* of those teachers who prefer it, and *for their adoption, too*, a modernized philosophical theory of the moods and tenses is here presented. If it is not quite so convenient and useful as the old

\* The Latin word for *participle* is *participium*, which makes *participio* in the dative or the ablative case; but the Latin word for *partake* is *participo*, and not “*participio*.”—G. BROWN.

† This sentence is manifestly bad English: either the singular verb “*appears*” should be made plural, or the plural noun “*investigations*” should be made singular.—G. BROWN.

one, they need not hesitate to adopt it. It has the advantage of being *new*; and, moreover, it sounds *large*, and will make the *commonalty stare*. Let it be distinctly understood that you teach ‘[Kirkham’s] *philosophical grammar*, founded on reason and common sense,’ and you will pass for a very learned man, and make all the good housewives wonder at the rapid march of intellect, and the vast improvements of the age.”—*Ib.*, p. 141.

28. The *pretty promises* with which these “Familiar Lectures” abound, are also worthy to be noticed here, as being among the peculiar attractions of the performance. The following may serve as a specimen:

“If you *proceed according to my instructions*, you will be sure to acquire a practical knowledge of Grammar in *a short time*.”—*Kirkham’s Gram.*, p. 49. “If you have sufficient *resolution to do this*, you will, in a short time, *perfectly understand* the nature and office of the different parts of speech, their various properties and relations, and the rules of syntax that apply to them; *and, in a few weeks*, be able to speak and write accurately.”—*Ib.*, p. 62. “You will please to turn back and read over again *the whole five lectures*. You must exercise *a little* patience.”—*Ib.*, p. 82. “By studying these lectures with attention, you will acquire *more grammatical* knowledge in three months, than is commonly obtained in *two years*.”—*Ib.*, p. 82. “I will conduct you *so smoothly through the moods and tenses*, and the conjugation of verbs, that, instead of finding yourself involved in obscurities and deep intricacies, you will scarcely find *an obstruction to impede your progress*.”—*Ib.*, p. 133. “The supposed Herculean task of learning to conjugate verbs, will be transformed into *a few hours of pleasant pastime*.”—*Ib.*, p. 142. “*By examining carefully* the conjugation of the verb through this mood, you will find it *very easy*.”—*Ib.*, p. 147. “By pursuing the following direction, you can, *in a very short time*, learn to conjugate any verb.”—*Ib.*, p. 147. “Although this mode of procedure *may, at first, appear to be laborious*, yet, as it is necessary, I trust you will not hesitate to adopt it. *My confidence in your perseverance*, induces me to recommend *any course* which I know will tend to facilitate your progress.”—*Ib.*, p. 148.

29. The grand boast of this author is, that he *has succeeded* in “pleasing himself and the public.” He trusts to have “gained the latter point,” to so great an extent, and with such security of tenure, that henceforth no man can safely question *the merit* of his performance. Happy mortal! to whom that success which is the ground of his pride, is also the glittering ægis of his sure defence! To this he points with exultation and self-applause, as if the prosperity of the wicked, or the popularity of an imposture, had never yet been heard of in this clever world!\* Upon *what* merit this success has been founded, my readers may judge, when I shall have finished this slight review of his work. Probably no other grammar was ever so industriously spread. Such was the author’s perseverance in his

---

\* “What! a book have *no merit*, and yet be called for at the rate of *sixty thousand copies a year*! What a slander is this upon the public taste! What an insult to the understanding and discrimination of the good people of these United States! According to this reasoning, all the inhabitants of our land must be fools, except one man, and that man is GOOLD BROWN!”—KIRKHAM, *in the Knickerbocker*, Oct. 1837, p. 361.

Well may the honest critic expect to be called a slanderer of “the public taste,” and an insulter of the nation’s “understanding,” if both the merit of this vaunted book and the wisdom of its purchasers are to be measured and proved by the author’s profits, or the publisher’s account of sales! But, possibly, between the intrinsic merit and the market value of some books there may be a difference. Lord Byron, it is said, received from Murray his bookseller, nearly ten dollars a line for the Fourth Canto of Childe Harold, or about as much for every two lines as Milton obtained for the whole of Paradise Lost. Is this the true ratio of the merit of these authors, or of the wisdom of the different ages in which they lived?

measures to increase the demand for his book, that even the attainment of such accuracy as he was capable of, was less a subject of concern. For in an article designed “to ward off some of the arrows of criticism,”—an advertisement which, from the eleventh to the “one hundred and fifth edition,” has been promising “to the *publick another and a better* edition,”—he plainly offers this urgent engagement, as “an apology for its defects:”

“The author is apprehensive that his work is *not yet as* accurate and *as* much simplified as it *may be*. If, however, the disadvantages of lingering under a broken constitution, and of being able to devote to this subject *only a small portion of his time*, snatched from the *active pursuits of a business life*, (active as far as imperfect health permits him to be,) are any apology for his defects, he hopes that the candid will set down *the apology to his credit*.—Not that he would beg a truce with the gentlemen *criticks* and reviewers. Any compromise with them would betray a want of *self-confidence* and *moral courage*, which he would by no means, be willing to avow.”—*Kirkham’s Gram.*, (Adv. of 1829,) p. 7.

30. Now, to this painful struggle, this active contention between business and the vapours, let all *credit* be given, and all *sympathy* be added; but, as an aid to the studies of healthy children, what better is the book, for any forbearance or favour that may have been won by this apology? It is well known, that, till *phrenology* became the common talk, the author’s principal business was, to commend his own method of teaching *grammar*, and to turn this publication to profit. This honourable industry, aided, as himself suggests, by “not much *less* than one thousand written recommendations,” is said to have wrought for him, in a very few years, a degree of success and fame, at which both the eulogists of Murray and the friends of English grammar may hang their heads. As to a “*compromise*” with any critic or reviewer whom he cannot bribe, it is enough to say of that, it is morally impossible. Nor was it necessary for such an author to throw the gauntlet, to prove himself not lacking in “*self-confidence*.” He can show his “*moral courage*,” only by daring do right.

31. In 1829, after his book had gone through ten editions, and the demand for it had become so great as “to call forth twenty thousand copies during the year,” the prudent author, intending to veer his course according to the *trade-wind*, thought it expedient to retract his former acknowledgement to “our best modern philologists,” and to profess himself a modifier of the Great Compiler’s code. Where then holds the anchor of his praise? Let the reader say, after weighing and comparing his various pretensions:

“Aware that there is, in the *publick* mind, a strong predilection for the doctrines contained in Mr. Murray’s grammar, he has thought proper, not merely from motives of policy, but from choice, *to select his principles chiefly from that work*; and, moreover, to adopt, as far as consistent with his own views, *the language of that eminent philologist*. In no instance has he varied from him, unless he conceived that, in so doing, *some practical advantage* would be gained. He hopes, *therefore*, to escape the censure so frequently and so justly awarded to those *unfortunate innovators* who have not scrupled to alter, mutilate, and torture the text of that able writer, merely to gratify an itching propensity to figure in the world *as authors*, and gain an ephemeral popularity by arrogating to themselves *the credit due to another*.”\*—*Kirkham’s Gram.*, 1829, p. 10.

---

\* Kirkham’s real opinion of Murray cannot be known from this passage only. How able is that writer who is chargeable with the *greatest want* of taste and discernment? “In regard to the application of the final

32. Now these statements are either true or false; and I know not on which supposition they are most creditable to the writer. Had any Roman grammarist thus profited by the name of Varro or Quintilian, he would have been filled with constant dread of somewhere meeting the injured author's frowning shade! Surely, among the professed admirers of Murray, no other man, whether innovator or copyist, unfortunate or successful, is at all to be compared to this gentleman for the audacity with which he has "not scrupled to alter, mutilate, and torture, the text of that able writer." Murray simply intended to do good, and good that might descend to posterity; and this just and generous intention goes far to excuse even his errors. But Kirkham, speaking of posterity, scruples not to disavow and to renounce all care for them, or for any thing which a coming age may think of his character: saying,

"My pretensions reach not so far. To the *present generation only*, I present my claims. Should it lend me a listening ear, and grant me its suffrages, *the height of my ambition* will be attained."—*Advertisement, in his Elocution*, p. 346.

His whole design is, therefore, upon the very face of it, a paltry scheme of present income. And, seeing his entered classes of boys and girls must soon have done with him, he has doubtless acted wisely, and quite in accordance with his own interest, to have made all possible haste in his career.

33. Being no rival with him in this race, and having no personal quarrel with him on any account, I would, for his sake, fain rejoice at his success, and withhold my criticisms; because he is said to have been liberal with his gains, and because he has not, like some others, copied me instead of Murray. But the vindication of a greatly injured and perverted science, constrains me to say, on this occasion, that pretensions less consistent with themselves, or less sustained by taste and scholarship, have seldom, if ever, been promulgated in the name of grammar. I have, certainly, no intention to say more than is due to the uninformed and misguided. For some who are ungenerous and prejudiced themselves, will not be unwilling to think me so; and even this freedom, backed and guarded as it is by facts and proofs irrefragable, may still be ingeniously ascribed to an ill motive. To two thirds of the community, one grammar is just as good as an other; because they neither know, nor wish to know, more than may be learned from the very worst. An honest expression of sentiment against abuses of a literary nature, is little the fashion of these times; and the good people who purchase books upon the recommendations of others, may be slow to believe there is no merit where so much has been attributed. But facts may well be credited, in opposition to courteous flattery, when there are the author's own words and works to vouch for them in the face of day. Though a thousand of our great men may have helped a copier's weak copyist to take "some practical advantage" of the world's credulity, it is safe to aver, in the face of dignity still greater, that testimonials more fallacious have seldom mocked the cause of learning. They did not read his book.

---

pause in reading blank verse, *nothing can betray a greater want of rhetorical taste and philosophical acumen*, than the directions of Mr. Murray."—*Kirkham's Elocution*, p. 145. Kirkham is indeed no judge either of the merits, or of the demerits, of Murray's writings; nor is it probable that this criticism originated with himself. But, since it appears in his name, let him have the credit of it, and of representing the compiler whom he calls "*that able writer*" and "*that eminent philologist*," as an untasteful dunce, and a teacher of *nonsense*: "To say that, unless we 'make every *line* sensible to the ear,' we mar the melody, and suppress the numbers of the poet, is *all nonsense*."—*Ibid*. See Murray's Grammar, on "Poetical Pauses;" 8vo, p. 260; 12mo, 210.

34. Notwithstanding the author's change in his professions, the work is now essentially the same as it was at first; except that its errors and contradictions have been greatly multiplied, by the addition of new matter inconsistent with the old. He evidently cares not what doctrines he teaches, or whose; but, as various theories are noised abroad, seizes upon different opinions, and mixes them together, that his books may contain something to suit all parties. "*A System of Philosophical Grammar*," though but an idle speculation, even in his own account, and doubly absurd in him, as being flatly contradictory to his main text, has been thought worthy of insertion. And what his title-page denominates "*A New System of Punctuation*," though mostly in the very words of Murray, was next invented to supply a deficiency which he at length discovered. To admit these, and some other additions, the "comprehensive system-of grammar" was gradually extended from 144 small duodecimo pages, to 228 of the ordinary size. And, in this compass, it was finally stereotyped in 1829; so that the ninety-four editions published since, have nothing new for history.

35. But the publication of an other work designed for schools, "*An Essay an Elocution*" shows the progress of the author's mind. Nothing can be more radically opposite, than are some of the elementary doctrines which this gentleman is now teaching; nothing, more strangely inconsistent, than are some of his declarations and professions. For instance: "A consonant is a letter that cannot be perfectly sounded without the help of a vowel."—*Kirkham's Gram.*, p. 19. Again: "A consonant is not only capable of being perfectly sounded without the help of a vowel, but, moreover, of forming, like a vowel, a separate syllable."—*Kirkham's Elocution*, p. 32. Take a second example. He makes "ADJECTIVE PRONOUNS" a *prominent division* and *leading title*, in treating of the pronouns proper; defines the term in a manner peculiar to himself; prefers and uses it in all his parsing; and yet, by the third sentence of the story, the learner is conducted to this just conclusion: "Hence, such a thing as an *adjective-pronoun* cannot exist."—*Grammar*, p. 105. Once more. Upon his own rules, or such as he had borrowed, he comments thus, and comments *truly*, because he had either written them badly or made an ill choice: "But some of these rules are foolish, trifling, and unimportant."—*Elocution*, p. 97. Again: "Rules 10 and 11, rest on a sandy foundation. They appear not to be based on the principles of the language."—*Grammar*, p. 59. These are but specimens of his own frequent testimony against himself! Nor shall he find refuge in the impudent falsehood, that the things which I quote as his, are not his own.\* These contradictory texts, and scores of others which might be added to them, are as rightfully his own, as any doctrine he has ever yet inculcated. But, upon the credulity of ignorance, his high-sounding certificates and unbounded boasting can impose any thing. They overrule all in favour of cue of the worst grammars extant;—of which he says, "it is now studied by more than one hundred thousand children and youth; and is more extensively used than *all other English grammars* published in the United States."—*Elocution*, p. 347. The booksellers say, he receives from his publishers *ten cents a copy*, on this work, and that he reports the sale of *sixty thousand copies per annum*. Such has of late been his public boast. I have once had the story from his own lips, and of course congratulated him, though I dislike the book. Six thousand dollars a year, on this most miserable modification of Lindley Murray's

---

\* "Now, in these instances, I should be fair game, were it not for the *trifling* difference, that I happen to present the doctrines and notions of *other writers*, and NOT my own, as stated by my learned censor."—KIRKHAM, *in the Knickerbocker*, Oct. 1837, p. 360. If the instructions above cited are not his own, there is not, within the lids of either book, a penny's worth that is. His fruitful copy-rights are void in law: the "learned censor's" pledge shall guaranty this issue.—G. B. 1838.

Grammar! Be it so—or double, if he and the public please. Murray had so little originality in his work, or so little selfishness in his design, that he would not take any thing; and his may ultimately prove the better bargain.

36. A man may boast and bless himself as he pleases, his fortune, surely, can never be worthy of an other's envy, so long as he finds it inadequate to his own great merits, and unworthy of his own poor gratitude. As a grammarian, Kirkham claims to be second only to Lindley Murray; and says, "Since the days of Lowth, no other work on grammar, Murray's only excepted, has been so favourably received by the *publick* as his own. As a proof of this, he would mention, that within the last six years it has passed through *fifty* editions."—*Preface to Elocution*, p. 12. And, at the same time, and in the same preface, he complains, that, "Of all the labours done under the sun, the labours *of the pen* meet with the poorest reward."—*Ibid.*, p. 5. This too clearly favours the report, that his books were not written by himself, but by others whom he hired. Possibly, the anonymous helper may here have penned, not his employer's feeling, but a line of his own experience. But I choose to ascribe the passage to the professed author, and to hold him answerable for the inconsistency. Willing to illustrate by the best and fairest examples these fruitful means of grammatical fame, I am glad of his present success, which, through this record, shall become yet more famous. It is the only thing which makes him worthy of the notice here taken of him. But I cannot sympathize with his complaint, because he never sought any but "the poorest reward;" and more than all he sought, he found. In his last "Address to Teachers," he says, "He may doubtless be permitted emphatically to say with Prospero, '*Your breath has filled my sails.*'"—*Elocution*, p. 18. If this boasting has any truth in it, he ought to be satisfied. But it is written, "He that loveth silver, shall not be satisfied with silver; nor he that loveth abundance, with increase." Let him remember this.\* He now announces three or four other works as forthcoming shortly. What these will achieve, the world will see. But I must confine myself to the Grammar.

37. In this volume, scarcely any thing is found where it might be expected. "The author," as he tells us in his preface, "has not followed the common 'artificial and unnatural arrangement adopted by most of his predecessors;' *yet he* has endeavoured to pursue a more judicious one, namely, '*the order of the understanding.*'"—*Grammar*, p. 12. But if this is the order of his understanding, he is greatly to be pitied. A book more confused in its plan, more wanting in method, more imperfect in distinctness of parts, more deficient in symmetry, or more difficult of reference, shall not easily be found in stereotype. Let the reader try to follow us here. Bating twelve pages at the beginning, occupied by the title, recommendations, advertisement, contents, preface, hints to teachers, and advice to lecturers; and fifty-four at the end, embracing syntax, orthography, orthoëpy, provincialisms, prosody, punctuation, versification, rhetoric, figures of speech, and a Key, all in the sequence here given; the work consists of fourteen chapters of grammar, absurdly called "Familiar Lectures." The first treats of sundries, under half a dozen titles, but chiefly of Orthography; and the last is three pages and a half, of the most common remarks, on Derivation. In the remaining twelve, the Etymology and Syntax of the ten parts of speech are commingled; and an attempt is made, to teach simultaneously all that the author judged important in either. Hence he gives us, in a strange congeries, rules, remarks, illustrations, false syntax, systematic parsing, exercises

---

\* I am sorry to observe that the gentleman, Phrenologist, as he professes to be, has so little *reverence* in his crown. He could not read the foregoing suggestion without scoffing at it. Biblical truth is not powerless, though the scornful may refuse its correction.—G. B. 1838.

in parsing, two different orders of notes, three different orders of questions, and a variety of other titles merely occasional. All these things, being additional to his main text, are to be connected, in the mind of the learner, with the parts of speech successively, in some new and inexplicable catenation found only in the arrangement of the lectures. The author himself could not see through the chaos. He accordingly made his table of contents a mere meagre alphabetical index. Having once attempted in vain to explain the order of his instructions, he actually gave the matter up in despair!

38. In length, these pretended lectures vary, from three or four pages, to eight-and-thirty. Their subjects run thus: 1. Language, Grammar, Orthography; 2. Nouns and Verbs; 3. Articles; 4. Adjectives; 5. Participles; 6. Adverbs; 7. Prepositions; 8. Pronouns; 9. Conjunctions; 10. Interjections and Nouns; 11. Moods and Tenses; 12. Irregular Verbs; 13. Auxiliary, Passive, and Defective Verbs; 14. Derivation. Which, now, is “more judicious,” such confusion as this, or the arrangement which has been common from time immemorial? Who that has any respect for the human intellect, or whose powers of mind deserve any in return, will avouch this jumble to be “the order of the understanding?” Are the methods of science to be accounted mere hinderances to instruction? Has grammar really been made easy by this confounding of its parts? Or are we lured by the name, “*Familiar Lectures*,”—a term manifestly adopted as a mere decoy, and, with respect to the work itself, totally inappropriate? If these chapters have ever been actually delivered as a series of lectures, the reader must have been employed on some occasions eight or ten times as long as on others! “People,” says Dr. Johnson, “have now-a-days got a strange opinion that every thing should be taught by *lectures*. Now, I cannot see that lectures can do so much good as a private reading of the books from which the lectures are taken. I know of nothing that can be best taught by lectures, except where experiments are to be shown. You may teach chymistry by lectures—you *might* teach the making of shoes by lectures.”—*Boswell’s Life of Johnson*.

39. With singular ignorance and untruth, this gentleman claims to have invented a better method of analysis than had ever been practised before. Of other grammars, his preface avers, “They have *all overlooked* what the author considers a very important object; namely, *a systematick order of parsing*.”—*Grammar*, p. 9. And, in his “Hints to Teachers,” presenting himself as a model, and his book as a paragon, he says: “By pursuing this system, he can, with less labour, advance a pupil *farther* in the practical knowledge of this *abstruse science*, in *two months*, than he could in *one year*, when he taught in the *old way*.”—*Grammar*, p. 12. What his “*old way*” was, does not appear. Doubtless something sufficiently bad. And as to his new way, I shall hereafter have occasion to show that *that* is sufficiently bad also. But to this gasconade the simple-minded have given credit—because the author showed certificates that testified to his great success, and called him “amiable and modest!” But who can look into the book, or into the writer’s pretensions in regard to his predecessors, and conceive the merit which has made him—“preëminent by so much odds?” Was Murray less praiseworthy, less amiable, or less modest? In illustration of my topic, and for the sake of literary justice, I have selected that honoured “*Compiler*” to show the abuses of praise; let the history of this his vaunting *modifier* cap the climax of vanity. In general, his amendments of “that eminent philologist,” are not more skillful than the following touch upon an eminent dramatist; and here, it is plain, he has mistaken two nouns for adjectives, and converted into bad English a beautiful passage, the sentiment of which is worthy of an *author’s* recollection:

“The evil *deed* or *deeds* that men do, *lives* after them;  
The good *deed* or *deeds* is oft interred with their bones.”\*

*Kirkham's Grammar*, p. 75.

40. Lord Bacon observes, “Nothing is thought so easy a request to a great person as his letter; and yet, if it be not in a good cause, it is so much out of his reputation.” It is to this mischievous facility of recommendation, this prostituted influence of great names, that the inconvenient diversity of school-books, and the continued use of bad ones, are in a great measure to be attributed. It belongs to those who understand the subjects of which authors profess to treat, to judge fairly and fully of their works, and then to let the *reasons* of their judgement be known. For no one will question the fact, that a vast number of the school-books now in use are either egregious plagiarisms or productions of no comparative merit. And, what is still more surprising and monstrous, presidents, governors, senators, and judges; professors, doctors, clergymen, and lawyers; a host of titled connoisseurs; with incredible facility lend their names, not only to works of inferior merit, but to the vilest thefts, and the wildest absurdities, palmed off upon their own and the public credulity, under pretence of improvement. The man who thus prefixes his letter of recommendation to an ill-written book, publishes, out of mere courtesy, a direct impeachment of his own scholarship or integrity. Yet, how often have we seen the honours of a high office, or even of a worthy name, prostituted to give a temporary or local currency to a book which it would disgrace any man of letters to quote! With such encouragement, nonsense wrestles for the seat of learning, exploded errors are republished as novelties, original writers are plundered by dunces, and men that understand nothing well, profess to teach all sciences!

---

\* Every schoolboy is familiar with the following lines, and rightly understands the words “*evil*” and “*good*” to be *nouns*, and not *adjectives*.

“The *evil* that men do, lives after them;  
The *good* is oft interred with their bones.”—SHAKESPEARE.

*Julius Cæsar, Act 3: Antony's Funeral Oration over Cæsar's Body.*

Kirkham has vehemently censured me for *omitting the brackets* in which he encloses the words that he supposes to be *understood* in this couplet. But he forgets two important circumstances: *First*, that I was quoting, not the bard, but the grammarist; *Second*, that a writer uses brackets, to distinguish *his own* amendments of what he quotes, and not those of an other man. Hence the marks which he has used, would have been *improper* for me. Their insertion does not make his reading of the passage *good English*, and, consequently, does not avert the point of my criticism.

The foregoing Review of *Kirkham's Grammar*, was published as an extract from my manuscript, by the editors of the Knickerbocker, in their number for June, 1837. Four months afterwards, with friendships changed, they gave, him the “justice” of appearing in their pages, in a long and virulent article against me and my works, representing me, “with emphatic force,” as “*a knave, a liar, and a pedant.*” The *enmity* of that effusion I forgave; because I bore him no personal ill-will, and was not selfish enough to quarrel for my own sake. Its *imbecility* clearly proved, that in this critique there is nothing *with which he could justly find fault*. Perceiving that no point of this argument could be broken, he *changed the ground*, and satisfied himself with despising, upbraiding, and vilifying the writer. Of what *use* this was, others may judge.

This extraordinary grammarian survived the publication of my criticism about ten years, and, it is charitably hoped, died happily; while I have had, for a period somewhat longer, all the benefits which his earnest “*castigation*” was fit to confer. It is not perceived, that what was written before these events, should now be altered or suppressed by reason of them. With his pretended “defence,” I shall now concern myself no further than simply to deny one remarkable assertion contained in it; which is this—that I, Gould Brown, “at the funeral of Aaron Ely,” in 1830, “praised, and *highly* praised, this self-same Grammar, and declared it to be ‘A GOOD WORK!’”—KIRKHAM, *in the Knickerbocker*, Oct., 1837, p. 362. I treated him always courteously, and, on this solemn occasion, walked with him without disputing on grammar; but, if this statement of his has any reasonable foundation, I know not what it is.—G. B. in 1850.

41. All praise of excellence must needs be comparative, because the thing itself is so. To excel in grammar, is but to know better than others wherein grammatical excellence consists. Hence there is no fixed point of perfection beyond which such learning may not be carried. The limit to improvement is not so much in the nature of the subject, as in the powers of the mind, and in the inducements to exert them upon a theme so humble and so uninviting. Dr. Johnson suggests, in his masterly preface, “that a whole life cannot be spent upon syntax and etymology, and that even a whole life would not be sufficient.” Who then will suppose, in the face of such facts and confessions as have been exhibited, that either in the faulty publications of Murray, or among the various modifications of them by other hands we have any such work as deserves to be made a permanent standard of instruction in English grammar? With great sacrifices, both of pleasure and of interest, I have humbly endeavoured to supply this desideratum; and it remains for other men to determine, and other times to know, what place shall be given to these my labours, in the general story of this branch of learning. Intending to develop not only the principles but also the history of grammar, I could not but speak of its authors. The writer who looks broadly at the past and the present, to give sound instruction to the future, must not judge of men by their shadows. If the truth, honestly told, diminish the stature of some, it does it merely by clearing the sight of the beholder. Real greatness cannot suffer loss by the dissipating of a vapour. If reputation has been raised upon the mist of ignorance, who but the builder shall lament its overthrow? If the works of grammarians are often ungrammatical, whose fault is this but their own? If *all* grammatical fame is little in itself, how can the abatement of what is undeserved of it be much? If the errors of some have long been tolerated, what right of the critic has been lost by nonuser? If the interests of Science have been sacrificed to Mammon, what rebuke can do injustice to the craft? Nay, let the broad-axe of the critic hew up to the line, till every beam in her temple be smooth and straight. For, “certainly, next to commending good writers, the greatest service to learning is, to expose the bad, who can only in that way be made of any use to it.”\* And if, among the makers of grammars, the scribblings of some, and the filchings of others, are discreditable alike to themselves and to their theme, let the reader consider, how great must be the intrinsic worth of that study which still maintains its credit in spite of all these abuses!

## CHAPTER IV.

### OF THE ORIGIN OF LANGUAGE.

“Tot fallaciis obrutum, tot hallucinationibus demersum, tot adhuc tenebris circumfusum studium hocce mihi visum est, ut nihil satis tuto in hac materia præstari posse arbitratus sim, nisi nova quadam arte critica præmissa.”—SCIPIO MAFFEIUS: *Cassiod. Complexiones*, p. xxx.

1. The origin of things is, for many reasons, a peculiarly interesting point in their history. Among those who have thought fit to inquire into the prime origin of speech, it has been matter of dispute, whether we ought to consider it a special gift from Heaven, or an acquisition of industry—a natural endowment, or an artificial invention. Nor is any thing that has ever yet been said upon it, sufficient to set the question permanently at rest. That there is in some words, and perhaps in some of every language, a natural connexion between the sounds uttered and the things signified, cannot be denied; yet, on the other hand, there is, in the use of words in general, so much to which nature affords no clew or index, that this whole process of communicating thought by speech, seems to

---

\* See *Notes to Pope's Dunciad*, Book II, verse 140.

be artificial. Under an other head, I have already cited from Sanctius some opinions of the ancient grammarians and philosophers on this point. With the reasoning of that zealous instructor, the following sentence from Dr. Blair very obviously accords: “To suppose words invented, or names given to things, in a manner purely arbitrary, without any ground or reason, is to suppose an effect without a cause. There must have always been some motive which led to the assignation of one name rather than an other.”—*Rhet.*, Lect. vi, p. 55.

2. But, in their endeavours to explain the origin and early progress of language, several learned men, among whom is this celebrated lecturer, have needlessly perplexed both themselves and their readers, with sundry questions, assumptions, and reasonings, which are manifestly contrary to what has been made known to us on the best of all authority. What signifies it\* for a man to tell us how nations rude and barbarous invented interjections first,<sup>†</sup> and then nouns, and then verbs,<sup>‡</sup> and finally the other parts of speech; when he himself confesses that he does not know whether language “can be considered a human invention at all;” and when he believed, or ought to have believed, that the speech of the first man, though probably augmented by those who afterwards used it, was, essentially, the one language of the earth for more than eighteen centuries? The task of inventing a language *de novo*, could surely have fallen upon no man but Adam; and he, in the garden of Paradise, had doubtless some aids and facilities not common to every wild man of the woods.

3. The learned Doctor was equally puzzled to conceive, “either how society could form itself, previously to language, or how words could rise into a language, previously to society formed.”—*Blair’s Rhet.*, Lect. vi, p. 54. This too was but an idle perplexity, though thousands have gravely pored over it since, as a part of the study of rhetoric; for, if neither could be previous to the other, they must have sprung up simultaneously. And it is a sort of slander upon our prime ancestor, to suggest, that, because he was “*the first*,” he must have been “*the rudest*” of his race; and that, “consequently, those first rudiments of speech,” which alone the supposition allows to him or to his family, “must have been poor and narrow.”—*Blair’s Rhet.*, p. 54. It is far more reasonable to think, with a later author, that, “Adam had an insight into natural things far beyond the acutest philosopher, as may be gathered from his giving of names to all creatures, according to their different constitutions.”—*Robinson’s Scripture Characters*, p. 4.

4. But Dr. Blair is not alone in the view which he here takes. The same thing has been suggested by other learned men. Thus Dr. James P. Wilson, of Philadelphia, in an octavo published in 1817, says: “It is difficult to discern how communities could have existed without language, and equally so to discover how language could have obtained, in a

---

\* A modern namesake of the Doctor’s, the *Rev. David Blair*, has the following conception of the *utility* of these speculations: “To enable children to comprehend the *abstract idea* that all the words in a language consist but of *nine kinds*, it will be found useful to explain how *savage tribes* who *having no language*, would first invent one, beginning with interjections and nouns, and proceeding from one part of speech to another, as their introduction might successively be called for by necessity or luxury.”—*Blair’s Pract. Gram.*, Pref., p. vii.

† “Interjections, I *shewed*, or passionate exclamations, were the *first elements* of speech. Men laboured to communicate their feelings to one another, by those expressive cries and gestures which nature taught them.”—*Dr. Hugh Blair’s Lectures*, p. 57.

‡ “It is certain that the verb was invented before the noun, in all the languages of which a tolerable account has been procured, either in ancient or modern times.”—*Dr. Alex. Murray’s History of European Languages*, Vol. I, p. 326.

peopled world, prior to society.”—*Wilson’s Essay on Gram.*, p. 1. I know not how so many professed Christians, and some of them teachers of religion too, with the Bible in their hands, can reason upon this subject as they do. We find them, in their speculations, conspiring to represent primeval man, to use their own words, as a “*savage*, whose ‘howl at the appearance of danger, and whose exclamations of joy at the sight of his prey, reiterated, or varied with the change of objects, were probably the origin of language.’”—*Booth’s Analytical Dictionary*. In the dawn of society, ages may have passed away, with little more converse than what these efforts would produce.”—*Gardiner’s Music of Nature*, p. 31. Here Gardiner quotes Booth with approbation, and the latter, like Wilson, may have borrowed his ideas from Blair. Thus are we taught by a multitude of guessers, grave, learned, and oracular, that the last of the ten parts of speech was in fact the first: “*Interjections* are exceedingly interesting in one respect. They are, there can be little doubt, *the oldest words* in all languages; and may be considered the elements of speech.”—*Bucke’s Classical Gram.*, p. 78. On this point, however, Dr. Blair seems not to be quite consistent with himself: “Those exclamations, therefore, which by grammarians are called *interjections*, uttered in a strong and passionate manner, were, *beyond doubt*, the first elements or beginnings of speech.”—*Rhet.*, Lect. vi, p. 55. “The *names* of sensible objects were, *in all languages*, the words most early introduced.”—*Rhet.*, Lect. xiv, p. 135. “The *names of sensible objects*,” says Murray too, “were the words most early introduced.”—*Octavo Gram.*, p. 336. But what says the Bible?

5. Revelation informs us that our first progenitor was not only endowed with the faculty of speech, but, as it would appear, actually incited by the Deity to exert that faculty in giving *names* to the objects by which he was surrounded. “Out of the ground the Lord God formed every beast of the field and every fowl of the air; and brought them unto Adam, to see what he would call them: and whatsoever Adam called every living creature, that was the name thereof. And Adam gave names to all cattle, and to the fowls of the air, and to every beast of the field; but for Adam there was not found a help meet for him.”—*Gen.*, ii, 19, 20. This account of the first naming of the other creatures by man, is apparently a parenthesis in the story of the creation of woman, with which the second chapter of Genesis concludes. But, in the preceding chapter, the Deity is represented not only as calling all things into existence *by his Word*; but as *speaking to the first human pair*, with reference to their increase in the earth, and to their dominion over it, and over all the living creatures formed to inhabit it. So that the order of the events cannot be clearly inferred from the order of the narration. The manner of this communication to man, may also be a subject of doubt. Whether it was, or was not, made by a voice of words, may be questioned. But, surely, that Being who, in creating the world and its inhabitants, manifested his own infinite wisdom, eternal power, and godhead, does not lack words, or any other means of signification, if he will use them. And, in the inspired record of his work in the beginning, he is certainly represented, not only as naming all things imperatively, when he spoke them into being, but as expressly calling the light *Day*, the darkness *Night*, the firmament *Heaven*, the dry land *Earth*, and the gatherings of the mighty waters *Seas*.

6. Dr. Thomas Hartwell Horne, in commending a work by Dr. Ellis, concerning the origin of human wisdom and understanding, says: “It shows satisfactorily, that religion *and language* entered the world by divine revelation, without the aid of which, man had not been a rational or religious creature.”—*Study of the Scriptures*, Vol. i, p. 4. “Plato attributes the primitive words of the *first language* to a divine origin;” and Dr. Wilson remarks, “The transition from silence to speech, implies an effort of the understanding too

great for man.”—*Essay on Gram.*, p. 1. Dr. Beattie says, “Mankind must have spoken in all ages, the young constantly learning to speak by imitating those who were older; and, if so, our first parents must have received this art, as well as some others, by inspiration.”—*Moral Science*, p. 27. Horne Tooke says, “I imagine that it is, *in some measure*, with the vehicle of our thoughts, as with the vehicles for our bodies. Necessity produced both.”—*Diversions of Purley*, Vol. i, p. 20. Again: “Language, it is true, *is an art*, and a glorious one; whose influence extends over all the others, and in which finally all science whatever must centre: but an art *springing from necessity*, and originally invented by artless men, who did not sit down like philosophers to invent it.”—*Ib.*, Vol. i, p. 259.

7. Milton imagines Adam’s first knowledge of speech, to have sprung from the hearing of his own voice; and that voice to have been raised, instinctively, or spontaneously, in an animated inquiry concerning his own origin—an inquiry in which he addresses to unintelligent objects, and inferior creatures, such questions as the Deity alone could answer:

“Myself I then perused, and limb by limb  
 Surveyed, and sometimes went, and sometimes ran  
 With supple joints, as lively vigor led:  
 But who I was, or where, or from what cause,  
 Knew not; *to speak I tried, and forthwith spake;*  
*My tongue obeyed, and readily could name*  
*Whatever I saw.* ‘Thou Sun,’ said I, ‘fair light,  
 And thou enlightened Earth, so fresh and gay,  
 Ye Hills and Dales, ye Rivers, Woods, and Plains;  
 And ye that live and move, fair Creatures! tell,  
 Tell, if ye saw, how came I thus, how here?  
 Not of myself; by some great Maker then,  
 In goodness and in power preëminent:  
 Tell me how I may know him, how adore,  
 From whom I have that thus I move and live,  
 And feel that I am happier than I know.’”

*Paradise Lost*, Book viii, l. 267.

But, to the imagination of a poet, a freedom is allowed, which belongs not to philosophy. We have not always the means of knowing how far he *literally* believes what he states.

8. My own opinion is, that language is partly natural and partly artificial. And, as the following quotation from the Greek of Ammonius will serve in some degree to illustrate it, I present the passage in English for the consideration of those who may prefer ancient to modern speculations: “In the same manner, therefore, as mere motion is from nature, but dancing is something positive; and as wood exists in nature, but a door is something positive; so is the mere utterance of vocal sound founded in nature, but the signification of ideas by nouns or verbs is something positive. And hence it is, that, as to the simple power of producing vocal sound—which is as it were the organ or instrument of the soul’s faculties of knowledge or volition—as to this vocal power, I say, man seems to possess it from nature, in like manner as irrational animals; but as to the power of using significantly nouns or verbs, or sentences combining these, (which are not natural but positive,) this he possesses by way of peculiar eminence; because he alone of all mortal

beings partakes of a soul which can move itself, and operate to the production of arts. So that, even in the utterance of sounds, the inventive power of the mind is discerned; as the various elegant compositions, both in metre, and without metre, abundantly prove.”—*Ammon. de Interpr.*, p. 51.\*

9. Man was made for society; and from the first period of human existence the race were social. Monkish seclusion is manifestly unnatural; and the wild independence of the savage, is properly denominated a state of nature, only in contradistinction to that state in which the arts are cultivated. But to civilized life, or even to that which is in any degree social, language is absolutely necessary. There is therefore no danger that the language of any nation shall fall into disuse, till the people by whom it is spoken, shall either adopt some other, or become themselves extinct. When the latter event occurs, as is the case with the ancient Hebrew, Greek, and Latin, the language, if preserved at all from oblivion, becomes the more permanent; because the causes which are constantly tending to improve or deteriorate every living language, have ceased to operate upon those which are learned only from ancient books. The inflections which now compose the declensions and conjugations of the dead languages, and which indeed have ever constituted the peculiar characteristics of those forms of speech, must remain forever as they are.

10. When a nation changes, its language, as did our forefathers in Britain, producing by a gradual amalgamation of materials drawn from various tongues a new one differing from all, the first stages of its grammar will of course be chaotic and rude. Uniformity springs from the steady application of rules; and polish is the work of taste and refinement. We may easily err by following the example of our early writers with more reverence than judgement; nor is it possible for us to do justice to the grammarians, whether early or late, without a knowledge both of the history and of the present state of the science which they profess to teach. I therefore think it proper rapidly to glance at many things remote indeed in time, yet nearer to my present purpose, and abundantly more worthy of the student's consideration, than a thousand matters which are taught for grammar by the authors of treatises professedly elementary.

11. As we have already seen, some have supposed that the formation of the first language must have been very slow and gradual. But of this they offer no proof, and from the pen of inspiration we seem to have testimony against it. Did Adam give names to all the creatures about him, and then allow those names to be immediately forgotten? Did not both he and his family continually use his original nouns in their social intercourse? and how could they use them, without other parts of speech to form them into sentences? Nay, do we not know from the Bible, that on several occasions our prime ancestor expressed himself like an intelligent man, and used all the parts of speech which are now considered *necessary*? What did he say, when his fit partner, the fairest and loveliest work of God, was presented to him? “This is now bone of my bones, and flesh of my flesh: she shall be called Woman, because she was taken out of Man.” And again: Had he not other words than nouns, when he made answer concerning his transgression: “I heard thy voice in the garden, and I was afraid, because I was naked; and I hid myself?” What is it, then, but a groundless assumption, to make him and his immediate descendants ignorant savages, and to affirm, with Dr. Blair, that “their speech must have been poor and narrow?” It is not possible now to ascertain what degree of perfection the oral communication of the first

---

\* The Greek of this passage, together with a translation not very different from the foregoing, is given as a marginal note, in *Harris's Hermes*, Book III, Chap. 3d.

age exhibited. But, as languages are now known to improve in proportion to the improvement of society in civilization and intelligence, and as we cannot reasonably suppose the first inhabitants of the earth to have been savages, it seems, I think, a plausible conjecture, that the primeval tongue was at least sufficient for all the ordinary intercourse of civilized men, living in the simple manner ascribed to our early ancestors in Scripture; and that, in many instances, human speech subsequently declined far below its original standard.

12. At any rate, let it be remembered that the first language spoken on earth, whatever it was, originated in Eden before the fall; that this “one language,” which all men understood until the dispersion, is to be traced, not to the cries of savage hunters, echoed through the wilds and glades where Nimrod planted Babel, but to that eastern garden of God’s own planting, wherein grew “every tree that is pleasant to the sight and good for food,” to that paradise into which the Lord God put the new-created man, “to dress it and to keep it.” It was here that Adam and his partner learned to speak, while yet they stood blameless and blessed, entire and wanting nothing; free in the exercise of perfect faculties of body and mind, capable of acquiring knowledge through observation and experience, and also favoured with immediate communications with their Maker. Yet Adam, having nothing which he did not receive, could not originally bring any real knowledge into the world with him, any more than men do now: this, in whatever degree attained, must be, and must always have been, either an acquisition of reason, or a revelation from God. And, according to the understanding of some, even in the beginning, “That was not first which is spiritual, but that which is natural; and afterward that which is spiritual.”—1 [Cor.](#), xv, 46. That is, the spirit of Christ, the second Adam, was bestowed on the first Adam, after his creation, as the life and the light of the immortal soul. For, “In [Him](#) was life, and the life was the light of men,” a life which our first parents forfeited and lost on the day of their transgression. “It was undoubtedly in the light of this pure influence that Adam had such an intuitive discerning of the creation, as enabled him to give names to all creatures according to their several natures.”—[Phipps, on Man](#), p. 4. A lapse from all this favour, into conscious guilt and misery; a knowledge of good withdrawn, and of evil made too sure; followed the first transgression. Abandoned then in great measure by superhuman aid, and left to contend with foes without and foes within, mankind became what history and observation prove them to have been; and henceforth, by painful experience, and careful research, and cautious faith, and humble docility, must they gather the fruits of [knowledge](#); by a vain desire and false conceit of which, they had forfeited the tree of life. So runs the story

“Of man’s first disobedience, and the fruit  
Of that forbidden tree, whose mortal taste  
Brought death into the world, and all our wo,  
With loss of Eden, till one greater Man  
Restore us, and regain the blissful seat.”

13. The analogy of words in the different languages now known, has been thought by many to be sufficiently frequent and clear to suggest the idea of their common origin. Their differences are indeed great; but perhaps not greater, than the differences in the several races of men, all of whom, as revelation teaches, sprung from one common stock. From the same source we learn, that, till the year of the world 1844, “The whole earth was

of one language, and of one speech.”—*Gen.*, xi, 1.\* At that period, the whole world of mankind consisted only of the descendants of the eight souls who had been saved in the ark, and so many of the eight as had survived the flood one hundred and eighty-eight years. Then occurred that remarkable intervention of the Deity, in which he was pleased to confound their language; so that they could not understand one another’s speech, and were consequently scattered abroad upon the face of the earth. This, however, in the opinion of many learned men, does not prove the immediate formation of any new languages.

14. But, whether new languages were thus immediately formed or not, the event, in all probability, laid the foundation for that diversity which subsequently obtained among the languages of the different nations which sprung from the dispersion; and hence it may be regarded as the remote cause of the differences which now exist. But for the immediate origin of the peculiar characteristical differences which distinguish the various languages now known, we are not able with much certainty to account. Nor is there even much plausibility in the speculations of those grammarians who have attempted to explain the order and manner in which the declensions, the moods, the tenses, or other leading features of the languages, were first introduced. They came into use before they could be generally known, and the partial introduction of them could seldom with propriety be made a subject of instruction or record, even if there were letters and learning at hand to do them this honour. And it is better to be content with ignorance, than to form such conjectures as imply any thing that is absurd or impossible. For instance: Neilson’s *Theory of the Moods*, published in the *Classical Journal* of 1819, though it exhibits ingenuity and learning, is liable to this strong objection; that it proceeds on the supposition, that the moods of English verbs, and of several other derivative tongues, were invented in a certain order by persons, not speaking a language learned chiefly from their fathers, but uttering a new one as necessity prompted. But when or where, since the building of Babel, has this ever happened? That no dates are given, or places mentioned, the reader regrets, but he cannot marvel.

15. By what successive changes, our words in general, and especially the minor parts of speech, have become what we now find them, and what is their original and proper signification according to their derivation, the etymologist may often show to our entire satisfaction. Every word must have had its particular origin and history; and he who in such things can explain with certainty what is not commonly known, may do some service to science. But even here the utility of his curious inquiries may be overrated; and

---

\* The Bible does not say positively that there was no diversity of languages *before the flood*; but, since the life-time of Adam extended fifty-six years into that of Lamech, the father of Noah, and two hundred and forty-three into that of Methuselah, the father of Lamech, with both of whom Noah was contemporary nearly six hundred years, it is scarcely possible that there should have occurred any such diversity, either in Noah’s day or before, except from some extraordinary cause. Lord Bacon regarded the multiplication of languages at Babel as a general evil, which had had no parallel but in the curse pronounced after Adam’s transgression. When “the language of all the earth” was “confounded,” Noah was yet alive, and he is computed to have lived 162 years afterwards; but whether in his day, or at how early a period, “grammar” was thought of, as a remedy for this evil, does not appear. Bacon says, “Concerning speech and words, the consideration of them hath produced the science of grammar. For man still striveth to reintegrate himself in those benedictions, of which, by his fault, he hath been deprived; and as he hath striven against the first general curse by the invention of all other arts, so hath he striven to come forth from *the second general curse, which was the confusion of tongues, by the art of grammar*; whereof the use in a mother tongue is small, in a foreign tongue more, but most in such foreign tongues as have ceased to be vulgar tongues, and are turned only to learned tongues.”—See *English Journal of Education*, Vol. viii, p. 444.

whenever, for the sake of some favourite theory, he ventures into the regions of conjecture, or allows himself to be seduced from the path of practical instruction, his errors are obstinate, and his guidance is peculiarly deceptive. Men fond of such speculations, and able to support them with some show of learning, have done more to unsettle the science of grammar, and to divert ingenious teachers from the best methods of instruction, than all other visionaries put together. Etymological inquiries are important, and I do not mean to censure or discourage them, merely as such; but the folly of supposing that in our language words must needs be of the same class, or part of speech, as that to which they may be traced in an other, deserves to be rebuked. The words *the* and *an* may be articles in English, though obviously traceable to something else in Saxon; and a learned man may, in my opinion, be better employed, than in contending that *if*, *though*, and *although*, are not conjunctions, but verbs!

16. Language is either oral or written; the question of its origin has consequently two parts. Having suggested what seemed necessary respecting the origin of *speech*, I now proceed to that of *writing*. Sheridan says, “We have in use *two kinds of language*, the spoken and the written: the one, the gift of God; the other, the invention of man.”—*Elocution*, p. xiv. If this ascription of the two things to their sources, were as just as it is clear and emphatical, both parts of our question would seem to be resolved. But this great rhetorician either forgot his own doctrine, or did not mean what he here says. For he afterwards makes the former kind of language as much a work of art, as any one will suppose the latter to have been. In his sixth lecture, he comments on the gift of speech thus: “But still we are to observe, that nature did no more than furnish the power and means; *she did not give the language*, as in the case of the passions, but left it to the industry of men, to find out and agree upon such articulate sounds, as they should choose to make the symbols of their ideas.”—*Ib.*, p. 147. He even goes farther, and supposes certain *tones of the voice* to be things invented by man: “Accordingly, as she did not furnish the *words*, which were to be the symbols of his ideas; neither did she furnish the *tones*, which were to manifest, and communicate by their own virtue, the internal exertions and emotions, of such of his nobler faculties, as chiefly distinguish him from the brute species; but left them also, like words, to the care and invention of man.”—*Ibidem*. On this branch of the subject, enough has already been presented.

17. By most authors, alphabetic writing is not only considered an artificial invention, but supposed to have been wholly unknown in the early ages of the world. Its antiquity, however, is great. Of this art, in which the science of grammar originated, we are not able to trace the commencement. Different nations have claimed the honour of the invention; and it is not decided, among the learned, to whom, or to what country, it belongs. It probably originated in Egypt. For, “The Egyptians,” it is said, “paid divine honours to the Inventor of Letters, whom they called *Theuth*: and Socrates, when he speaks of him, considers him as a god, or a god-like man.”—*British Gram.*, p. 32. Charles Bucke has it, “That the first inventor of letters is supposed to have been *Memnon*; who was, in consequence, fabled to be the son of Aurora, goddess of the morning.”—*Bucke’s Classical Gram.*, p. 5. The ancients in general seem to have thought Phœnicia the birthplace of Letters:

“Phœnicians first, if ancient fame be true,  
The sacred mystery of letters knew;  
They first, by sound, in various lines design’d,  
Express’d the meaning of the thinking mind;

The power of words by figures rude conveyed,  
And useful science everlasting made.”

*Rowe's Lucan*, B. iii, l. 334.

18. Some, however, seem willing to think writing coeval with speech. Thus Bicknell, from Martin's Physico-Grammatical Essay: “We are told by Moses, that Adam *gave names to every living creature*;<sup>\*</sup> but how those names were written, or what sort of characters he made use of, is not known to us; nor indeed whether Adam ever made use of a written language at all; since we find no mention made of any in the sacred history.”—*Bicknell's Gram.*, Part ii, p. 5. A certain late writer on English grammar, with admirable flippancy, cuts this matter short, as follows,—satisfying himself with pronouncing all speech to be natural, and all writing artificial: “Of how many primary kinds is language? It is of two kinds; natural or spoken, and artificial or written.”—*Oliver B. Peirce's Gram.*, p. 15. “Natural language is, to a limited extent, (the representation of the passions,) common to brutes as well as man; but artificial language, being the work of invention, is peculiar to man.”—*Ib.*, p. 16.<sup>†</sup>

19. The writings delivered to the Israelites by Moses, are more ancient than any others now known. In the thirty-first chapter of Exodus, it is said, that God “gave unto Moses, upon Mount Sinai, two tables of testimony, tables of stone, *written with the finger of God*.” And again, in the thirty-second: “The tables were the work of God, and the writing was *the writing of God*, graven upon the tables.” But these divine testimonies, thus miraculously written, do not appear to have been the first writing; for Moses had been previously commanded to write an account of the victory over Amalek, “for a memorial in a book, and rehearse it in the ears of Joshua.”—*Exod.*, xvii, 14. This first battle of the Israelites occurred in Rephidim, a place on the east side of the western gulf of the Red Sea, at or near Horeb, but before they came to Sinai, upon the top of which, (on the fiftieth day after their departure from Egypt,) Moses received the ten commandments of the law.

20. Some authors, however, among whom is Dr. Adam Clarke, suppose that in this instance the order of the events is not to be inferred from the order of the record, or that there is room to doubt whether the use of letters was here intended; and that there consequently remains a strong probability, that the sacred Decalogue, which God himself delivered to Moses on Sinai, A. M. 2513, B. C. 1491, was “the first writing *in alphabetical characters* ever exhibited to the world.” See *Clarke's Succession of Sacred Literature*, Vol. i, p. 24. Dr. Scott, in his General Preface to the Bible, seems likewise to favour the same opinion. “Indeed,” says he, “there is some probability in the opinion, that the art of writing was first communicated by revelation, to Moses, in order to perpetuate, with certainty, those facts, truths, and laws, which he was employed to deliver to Israel. Learned men

<sup>\*</sup> It should be, “*to all living creatures*,” for each creature had, probably, but one name.—G. Brown.

<sup>†</sup> Some recent German authors of note suppose language to have sprung up among men *of itself*, like spontaneous combustion in oiled cotton; and seem to think, that people of strong feelings and acute minds must necessarily or naturally utter their conceptions by words—and even by words both spoken and written. Frederick Von Schlegel, admitting “the *spontaneous origin* of language generally,” and referring speech to its “*original source*—a deep feeling, and a clear discriminating intelligence,” adds: “The oldest system of writing *developed itself* at the same time, and in the same manner, as the spoken language; not wearing at first the symbolic form, which it subsequently assumed in compliance with the necessities of a less civilized people, but composed of certain signs, which, in accordance with the simplest elements of language, actually conveyed the sentiments of the race of men then existing.”—*Millington's Translation of Schlegel's Æsthetic Works*, p. 455.

find no traces of *literary*, or alphabetical, writing, in the history of the nations, till long after the days of Moses; unless the book of Job may be regarded as an exception. The art of expressing almost an infinite variety of sounds, by the interchanges of a few letters, or marks, seems more like a discovery to man from heaven, than a human invention; and its beneficial effects, and almost absolute necessity, for the preservation and communication of true religion, favour the conjecture.”—*Scott's Preface*, p. xiv.

21. The time at which Cadmus, the Phoenician, introduced this art into Greece, cannot be precisely ascertained. There is no reason to believe it was antecedent to the time of Moses; some chronologists make it between two and three centuries later. Nor is it very probable, that Cadmus invented the sixteen letters of which he is said to have made use. His whole story is so wild a fable, that nothing certain can be inferred from it. Searching in vain for his stolen sister—his sister Europa, carried off by Jupiter—he found a wife in the daughter of Venus! Sowing the teeth of a dragon, which had devoured his companions, he saw them spring up to his aid a squadron of armed soldiers! In short, after a series of wonderful achievements and bitter misfortunes, loaded with grief and infirm with age, he prayed the gods to release him from the burden of such a life; and, in pity from above, both he and his beloved Hermionè were changed into serpents! History, however, has made him generous amends, by ascribing to him the invention of letters, and accounting him the worthy benefactor to whom the world owes all the benefits derived from literature. I would not willingly rob him of this honour. But I must confess, there is no feature of the story, which I can conceive to give any countenance to his claim; except that as the great progenitor of the race of authors, his sufferings correspond well with the calamities of which that unfortunate generation have always so largely partaken.

22. The benefits of this invention, if it may be considered an invention, are certainly very great. In oral discourse the graces of elegance are more lively and attractive, but well-written books are the grand instructors of mankind, the most enduring monuments of human greatness, and the proudest achievements of human intellect. “The chief glory of a nation,” says Dr. Johnson, “arises from its authors.” Literature is important, because it is subservient to all objects, even those of the very highest concern. Religion and morality, liberty and government, fame and happiness, are alike interested in the cause of letters. It was a saying of Pope Pius the Second, that, “Common men should esteem learning as silver, noblemen value it as gold, and princes prize it as jewels.” The uses of learning are seen in every thing that is not itself useless.\* It cannot be overrated, but where it is perverted; and whenever that occurs, the remedy is to be sought by opposing learning to learning, till the truth is manifest, and that which is reprehensible, is made to appear so.

23. I have said, learning cannot be overrated, but where it is perverted. But men may differ in their notions of what learning is; and, consequently, of what is, or is not, a perversion of it. And so far as this point may have reference to theology, and the things of God, it would seem that the Spirit of God alone can fully show us its bearings. If the illumination of the Spirit is necessary to an understanding and a reception of scriptural truth, is it not by an inference more erudite than reasonable, that some great men have

---

\* “Modern Europe owes a principal share of its enlightened and moral state to the restoration of learning: the advantages which have accrued to history, religion, the philosophy of the mind, and the progress of society; the benefits which have resulted from the models of Greek and Roman taste—in short, all that a knowledge of the progress and attainments of man in past ages can bestow on the present, has reached it through the medium of philology.”—*Dr. Murray's History of European Languages*, Vol. II, p. 335.

presumed to limit to a verbal medium the communications of Him who is everywhere His own witness, and who still gives to His own holy oracles all their peculiar significance and authority? Some seem to think the Almighty has never given to men any notion of Himself, except by words. “Many ideas,” says the celebrated Edmund Burke, “have never been at all presented to the senses of any men *but by words*, as God,\* angels, devils, heaven, and hell, all of which have however a great influence over the passions.”—*On the Sublime and [the] Beautiful*, p. 97. That God can never reveal facts or truths except by words, is a position with which I am by no means satisfied. Of the great truths of Christianity, Dr. Wayland, in his *Elements of Moral Science*, repeatedly avers, “All these being *facts*, can never be known, except *by language*, that is, by revelation.”—*First Edition*, p. 132. Again: “All of them being of the *nature of facts*, they could be made known to man *in no other way than by language*.”—*Ib.*, p. 136. But it should be remembered, that these same facts were otherwise made known to the prophets; (1 Pet., i, 11;) and that which has been done, is not impossible, whether there is reason to expect it again or not. So of the Bible, Calvin says, “No man can have the least knowledge of true and sound doctrine, without having been a disciple of the Scripture.”—*Institutes*, B. i, Ch. 6. Had Adam, Abel, Enoch, Noah, and Abraham, then, no such knowledge? And if such they had, what Scripture taught them? We ought to value the Scriptures too highly to say of them any thing that is *unscriptural*. I am, however, very far from supposing there is any *other doctrine* which can be safely substituted for the truths revealed of old, the truths contained in the Holy Scriptures of the Old and New Testaments:

“Left only in those written records pure,  
Though not but by the Spirit understood.”†—*Milton*.

## CHAPTER V.

### OF THE POWER OF LANGUAGE.

“Quis huic studio literarum, quod profitentur ii, qui grammatici vocantur, penitus se dedidit, quin omnem illarum artium pæne infinitam *vim* et *materiam* scientiæ cogitatione comprehenderit?”—CICERO. *De Oratore*, Lib. i, 3.

1. The peculiar *power* of language is another point worthy of particular consideration. The power of an instrument is virtually the power of him who wields it; and, as language is used in common, by the wise and the foolish, the mighty and the impotent, the candid and the crafty, the righteous and the wicked, it may perhaps seem to the reader a difficult matter, to speak intelligibly of its *peculiar power*. I mean, by this phrase, its fitness or efficiency to or for the accomplishment of the purposes for which it is used. As it is the nature of an agent, to be the doer of something, so it is the nature of an instrument, to be

\* “The idea of God is a development from within, and a matter of faith, not an induction from without, and a matter of proof. When Christianity has developed its correlative principles within us, then we find evidences of its truth everywhere; nature is full of them: but we cannot find them before, simply because we have no eye to find them with.”—H. N. HUDSON: *Democratic Review*, May, 1845.

† So far as mind, soul, or spirit, is a subject of natural science, (under whatever name,) it may of course be known naturally. To say to what extent theology may be considered a natural science, or how much knowledge of any kind may have been opened to men otherwise than by words, is not now in point. Dr. Campbell says, “Under the general term [*physiology*] I also comprehend *natural theology* and *psychology*, which, in my opinion, have been most unnaturally disjoined by philosophers. Spirit, which here comprises only the Supreme Being and the human soul, is surely as much included under the notion of natural object as a body is, and is knowable to the philosopher purely in the same way, by observation and experience.”—*Philosophy of Rhetoric*, p. 66. It is quite unnecessary for the teacher of languages to lead his pupils into any speculations on this subject. It is equally foreign to the history of grammar and to the philosophy of rhetoric.

that with which something is effected. To make signs, is to do something, and, like all other actions, necessarily implies an agent; so all signs, being things by means of which other things are represented, are obviously the instruments of such representation. Words, then, which represent thoughts, are things in themselves; but, as signs, they are relative to other things, as being the instruments of their communication or preservation. They are relative also to him who utters them, as well as to those who may happen to be instructed or deceived by them. “Was it Mirabeau, Mr. President, or what other master of the human passions, who has told us that words are things? They are indeed things, and things of mighty influence, not only in addresses to the passions and high-wrought feelings of mankind, but in the discussion of legal and political questions also; because a just conclusion is often avoided, or a false one reached, by the adroit substitution of one phrase or one word for an other.”—*Daniel Webster, in Congress*, 1833.

2. To speak, is a moral action, the quality of which depends upon the motive, and for which we are strictly accountable. “But I say unto you, that every idle word that men shall speak, they shall give account thereof in the day of judgement; for by thy words thou shalt be justified, and by thy words thou shalt be condemned.”—*Matt.*, xii, 36, 37. To listen, or to refuse to listen, is a moral action also; and there is meaning in the injunction, “Take heed what ye hear.”—*Mark*, iv, 24. But why is it, that so much of what is spoken or written, is spoken or written in vain? Is language impotent? It is sometimes employed for purposes with respect to which it is utterly so; and often they that use it, know not how insignificant, absurd, or ill-meaning a thing they make of it. What is said, with whatever inherent force or dignity, has neither power nor value to him who does not understand it;\* and, as Professor Duncan observes, “No word can be to any man the sign of an idea, till that idea comes to have a real existence in his mind.”—*Logic*, p. 62. In instruction, therefore, speech ought not to be regarded as the foundation or the essence of knowledge, but as the sign of it; for knowledge has its origin in the power of sensation, or reflection, or consciousness, and not in that of recording or communicating thought. Dr. Spurzheim was not the first to suggest, “It is time to abandon the immense error of supposing that words and precepts are sufficient to call internal feelings and intellectual faculties into active exercise.”—*Spurzheim’s Treatise on Education*, p. 94.

3. But to this it may be replied, When God wills, the signs of knowledge are knowledge; and words, when he gives the ability to understand them, may, in some sense, become—“spirit and life.” See *John*, vi, 63. Where competent intellectual faculties exist, the intelligible signs of thought do move the mind to think; and to think sometimes with deep feelings too, whether of assent or dissent, of admiration or contempt. So wonderful a thing is a rational soul, that it is hard to say to what ends the language in which it speaks, may, or may not, be sufficient. Let experience determine. We are often unable to excite in others the sentiments which we would: words succeed or fail, as they are received or resisted. But let a scornful expression be addressed to a passionate man, will not the words “call

---

\* “Except ye utter by the tongue words easy to be understood, how shall it be known what is spoken? for ye shall speak into the air. There are, it may be, so many kinds of voices in the world, and none of them is without signification. Therefore, if I know not the meaning of the voice, I shall be unto him that speaketh, a barbarian; and he that speaketh, shall be a barbarian unto me.”—1 *Cor.*, xiv. 9, 10, 11. “It is impossible that our knowledge of words should outstrip our knowledge of things. It may, and often doth, come short of it. Words may be remembered as sounds, but [they] cannot be understood as signs, whilst we remain unacquainted with the things signified.”—*Campbell’s Philosophy of Rhetoric*, p. 160. “Words can excite only ideas already acquired, and if no previous ideas have been formed, they are mere unmeaning sounds.”—*Spurzheim on Education*, p. 200.

internal feelings” into action? And how do feelings differ from thoughts?\* Hear Dr. James Rush: “The human mind is the place of representation of all the existences of nature which are brought within the scope of the senses. The representatives are called ideas. These ideas are the simple passive pictures of things, or [else] they exist with an activity, capable of so affecting the physical organs as to induce us to seek the continuance of that which produces them, or to avoid it. This active or vivid class of ideas comprehends the passions. The functions of the mind here described, exist then in different forms and degrees, from the simple idea, to the highest energy of passion: and the terms, thought, sentiment, emotion, feeling, and passion, are but the verbal signs of these degrees and forms. Nor does there appear to be any line of classification, for separating thought from passion: since simple thoughts, without changing their nature, do, from interest or incitement, often assume the colour of passion.”—*Philosophy of the Human Voice*, p. 328.

4. Lord Kames, in the Appendix to his *Elements of Criticism*, divides *the senses* into external and internal, defining *perception* to be the act by which through the former we know outward objects, and *consciousness* the act by which through the latter we know what is within the mind. An *idea*, according to his definition, (which he says is precise and accurate,) is, “That *perception* of a real object which *is raised* in the mind by the power of *memory*.” But among the real objects from which memory may raise ideas, he includes the workings of the mind itself, or whatever we remember of our former passions, emotions, thoughts, or designs. Such a definition, he imagines, might have saved *Locke*, *Berkley*, and their followers, from much vain speculation; for with the ideal systems of these philosophers, or with those of Aristotle and Des Cartes, he by no means coincides. This author says, “As ideas are the chief materials employed in reasoning and reflecting, it is of consequence that their nature and differences be understood. It appears now that ideas may be distinguished into three kinds: first, Ideas derived from original perceptions, properly termed *ideas of memory*; second, Ideas communicated *by language* or other signs; and third, Ideas *of imagination*. These ideas differ from each other in many respects; but chiefly in respect to their *proceeding from different causes*. The first kind is derived from real existences that have been objects of our senses; *language is the cause of the second*, or any other sign that has the same power with language; and a man’s imagination is to himself the cause of the third. It is scarce [ly] necessary to add, that an idea, originally of imagination, being conveyed to others by language or any other vehicle, becomes in their mind an idea of the second kind; and again, that an idea of this kind, being afterwards recalled to the mind, becomes in that circumstance an idea of memory.”—*El. of Crit.*, Vol. ii, p. 384.

5. Whether, or how far, language is to the mind itself *the instrument of thought*, is a question of great importance in the philosophy of both. Our literature contains occasional

---

\* Sheridan the electioneer makes this distinction: “All that passes in the mind of man, may be reduced to two classes, which I call ideas and emotions. By ideas, I mean all thoughts which rise, and pass in succession in the mind. By emotions, all exertions of the mind in arranging, combining, and separating its ideas; as well as the effects produced on all the mind itself by those ideas; from the more violent agitation of the passions, to the calmer feelings produced by the operation of the intellect and the fancy. In short, thought is the object of the one; internal feeling, of the other. That which serves to express the former, I call the language of ideas; and the latter, the language of emotions. Words are the signs of the one: tones, of the other. Without the use of these two sorts of language, it is impossible to communicate through the ear, all that passes in the mind of man.”—*Sheridan’s Art of Reading*; *Blair’s Lectures*, p. 333.

assertions bearing upon this point, but I know of no full or able discussion of it.\* Cardell's instructions proceed upon the supposition, that neither the reason of men, nor even that of superior intelligences, can ever operate independently of words. "Speech," says he, "is to the mind what action is to animal bodies. Its improvement is the improvement of our intellectual nature, and a duty to God who gave it."—*Essay on Language*, p. 3. Again: "An attentive investigation will show, that there is no way in which the individual mind can, within itself, to any extent, *combine its ideas*, but by the intervention of words. Every process of the reasoning powers, beyond the immediate perception of sensible objects, depends on the structure of speech; and, in a great degree, according to the excellence of this *chief instrument of all mental operations*, will be the means of personal improvement, of the social transmission of thought, and the elevation of national character. From this, it may be laid down as a broad principle, that no individual can make great advances in intellectual improvement, beyond the bounds of a ready-formed language, as the necessary means of his progress."—*Ib.*, p. 9. These positions might easily be offset by contrary speculations of minds of equal rank; but I submit them to the reader, with the single suggestion, that the author is not remarkable for that sobriety of judgement which gives weight to opinions.

6. We have seen, among the citations in a former chapter, that Sanctius says, "Names are the signs, and as it were *the instruments, of things*." But what he meant by "*instrumenta rerum*" is not very apparent. Dr. Adam says, "The principles of grammar may be traced from the progress of the mind in the acquisition of language. Children first express their feelings by motions and gestures of the body, by cries and tears. *This is* † the language of nature, and therefore universal. *It fitly represents* ‡ the quickness of sentiment and thought, which are as instantaneous as the impression of light on the eye. Hence we always express our stronger feelings by these natural signs. But when we want to make known to others the particular conceptions of the mind, we must represent them by parts, we must divide and analyze them. We express *each part by certain signs*,§ and join these together, according to the order of their relations. Thus words are *both the instrument and signs* \*\* *the division* of thought."—*Preface to Latin Gram.*

7. The utterance of words, or the making of signs of any sort, requires time;†† but it is here suggested by Dr. Adam, that sentiment and thought, though susceptible of being retained or recalled, naturally flash upon the mind with immeasurable quickness.‡‡ If so, they must originate in something more spiritual than language. The Doctor does not affirm that words are the instruments of thought, but of *the division* of thought. But it is

\* "Language is *the great instrument*, by which all the faculties of the mind are brought forward, moulded, polished, and exerted."—*Sheridan's Elocution*, p. xiv.

† It should be, "*These are*."—G. B.

‡ It should be, "*They fitly represent*."—G. B.

§ This is badly expressed; for, according to his own deduction, *each part* has but *one sign*. It should be, "We express *the several parts by as many several signs*."—G. Brown.

\*\* It would be better English to say, "the *instruments* and *the signs*."—G. Brown.

†† "Good speakers do not pronounce above three syllables in a second of time; and generally only two and a half, taking in the necessary pauses."—*Steele's Melody of Speech*.

‡‡ The same idea is also conveyed in the following sentence from Dr. Campbell: "Whatever regards the analysis of the operations of the mind, *which is quicker than lightning in all her energies*, must in a great measure be abstruse and dark."—*Philosophy of Rhetoric*, p. 289. Yet this philosopher has given it as his opinion, "that we really *think by signs* as well as speak by them."—*Ib.*, p. 284. To reconcile these two positions with each other, we must suppose that thinking by signs, or words, is a process infinitely more rapid than speech.

manifest, that if they effect this, they are not the only instruments by means of which the same thing may be done. The deaf and dumb, though uninstructed and utterly ignorant of language, can think; and can, by rude signs of their own inventing, manifest a similar division, corresponding to the individuality of things. And what else can be meant by "*the division of thought*," than our notion of objects, as existing severally, or as being distinguishable into parts? There can, I think, be no such division respecting that which is perfectly pure and indivisible in its essence; and, I would ask, is not simple continuity apt to exclude it from our conception of every thing which appears with uniform coherence? Dr. Beattie says, "It appears to me, that, as all things are individuals, all thoughts must be so too."—*Moral Science*, Chap. i, Sec. 1. If, then, our thoughts are thus divided, and consequently, as this author infers, have not in themselves any of that generality which belongs to the signification of common nouns, there is little need of any instrument to divide them further: the mind rather needs help, as Cardell suggests, "to combine its ideas." \*

8. So far as language is a work of art, and not a thing conferred or imposed upon us by nature, there surely can be in it neither division nor union that was not first in the intellect for the manifestation of which it was formed. First, with respect to generalization. "The human mind," says Harris, "by an energy as spontaneous and familiar to its nature, as the seeing of colour is familiar to the eye, discerns at once what in many is one, what in things dissimilar and different is similar and the same."—*Hermes*, p. 362. Secondly, with respect to division. Mechanical separations are limited: "But the mind surmounts all power of concretion; and can place in the simplest manner every attribute by itself; convex without concave; colour without superficies; superficies without body; and body without its accidents: as distinctly each one, as though they had never been united. And thus it is, that it penetrates into the recesses of all things, not only dividing them as wholes, into their more conspicuous parts, but persisting till it even separate those elementary principles which, being blended together after a more mysterious manner, are united in the minutest part as much as in the mightiest whole."—*Harris's Hermes*, p. 307.

9. It is remarkable that this philosopher, who had so sublime conceptions of the powers of the human mind, and who has displayed such extraordinary acuteness in his investigations, has represented the formation of words, or the utterance of language, as equalling in speed the progress of our very thoughts; while, as we have seen, an other author, of great name, avers, that thought is "as instantaneous as the impression of light on the eye." Philosophy here too evidently nods. In showing the advantage of words, as

---

\* That generalization or abstraction which gives to similar things a common name, is certainly no laborious exercise of intellect; nor does any mind find difficulty in applying such a name to an individual by means of the article. The general sense and the particular are alike easy to the understanding, and I know not whether it is worth while to inquire which is first in order. Dr. Alexander Murray says, "It must be attentively remembered, that all terms run from a general to a particular sense. The work of abstraction, the ascent from individual feelings to classes of these, was finished before terms were invented. Man was silent till he had formed some ideas to communicate; and association of his perceptions soon led him to think and reason in ordinary matters."—*Hist. of European Languages*, Vol. I, p. 94. And, in a note upon this passage, he adds: "This is to be understood of primitive or radical terms. By the assertion that man was silent till he had formed ideas to communicate, is not meant, that any of our species were originally destitute of the natural expressions of feeling or thought. All that it implies, is, that man had been subjected, during an uncertain period of time, to the impressions made on his senses by the material world, before he began to express the natural varieties of these by articulated sounds. \* \* \* \* \* Though the abstraction which formed such classes, might be greatly aided or supported by the signs; yet it were absurd to suppose that the sign was invented, till the sense demanded it."—*Ib.*, p. 399.

compared with pictures, Harris says, “If we consider the ease and speed with which words are formed,—an ease which knows no trouble or fatigue, and a *speed which equals the progress of our very thoughts*,\*—we may plainly perceive an answer to the question here proposed, Why, in the common intercourse of men with men, imitations have been rejected, and symbols preferred.”—*Hermes*, p. 336. Let us hear a third man, of equal note: “Words have been called *winged*; and they well deserve that name, when their abbreviations are compared with the progress which speech could make without these inventions; but, compared with the rapidity of thought, they have not *the smallest claim to that title*. Philosophers have calculated the difference of velocity between sound and light; but who will attempt to calculate the difference between speech and thought!”—*Horne Tooke’s Epea Pteroenta*, Vol. i, p. 23.

10. It is certain, that, in the admirable economy of the creation, natures subordinate are made, in a wonderful manner, subservient to the operations of the higher; and that, accordingly, our first ideas are such as are conceived of things external and sensible. Hence all men whose intellect appeals only to external sense, are prone to a philosophy which reverses the order of things pertaining to the mind, and tends to materialism, if not to atheism. “But”—to refer again to Harris—“the intellectual scheme which never forgets Deity, postpones every thing corporeal to the primary mental Cause. It is here it looks for the origin of intelligible ideas, even of those which exist in human capacities. For though sensible objects may be the destined medium to awaken the dormant energies of man’s understanding, yet are those energies themselves no more contained, in sense, than the explosion of a cannon, in the spark which gave it fire. In short, all minds that are, are similar and congenial; and so too are their ideas, or intelligible forms. Were it otherwise, there could be no intercourse between man and man, or (what is more important) between man and God.”—*Hermes*, p. 393.

11. A doctrine somewhat like this, is found in the Meditations of the emperor Marcus Aurelius Antoninus, though apparently repugnant to the polytheism commonly admitted by the Stoics, to whom he belonged: “The world, take it all together, is but one; there is but one sort of matter to make it of, one God to govern it, and one law to guide it. For, run through the whole system of rational beings, and you will find reason and truth but single and the same. And thus beings of the same kind, and endued with the same reason, are made happy by the same exercises of it.”—Book vii, Sec. 9. Again: “Let your soul receive the Deity as your blood does the air; for the influences of the one are no less vital, than those of the other. This correspondence is very practicable: for there is an ambient omnipresent Spirit, which lies as open and pervious to your mind, as the air you breathe does to your lungs: but then you must remember to be disposed to draw it.”—Book viii, Sec. 54; *Collier’s Translation*.

12. Agreeably to these views, except that he makes a distinction between a natural and a supernatural idea of God, we find Barclay, the early defender of the Quakers, in an argument with a certain Dutch nobleman, philosophizing thus: “If the Scripture then be true, there is in men a supernatural idea of God, which altogether differs from this natural

---

\* Dr. Alexander Murray too, In accounting for the frequent abbreviation of words, seems to suggest the possibility of giving them the celerity of thought: “Contraction is a change which results from a propensity to make the signs *as rapid as the thoughts* which they express. Harsh combinations soon suffer contraction. Very long words preserve only the principal, that is, the accented part. If a nation accents its words on the last syllable, the preceding ones will often be short, and liable to contraction. If it follow a contrary practice, the terminations are apt to decay.”—*History of European Languages*, Vol. I, p. 172.

idea—I say, in all men; because all men are capable of salvation, and consequently of enjoying this divine vision. Now this capacity consisteth herein, that they have such a supernatural idea in themselves.\* For if there were no such idea in them, it were impossible they should so know God; for whatsoever is clearly and distinctly known, is known by its proper idea; neither can it otherwise be clearly and distinctly known. *For the ideas of all things are divinely planted in our souls*; for, as the better philosophy teacheth, they are not begotten in us by outward objects or outward causes, but only are by these outward things excited or stirred up. And this is true, not only in supernatural ideas of God and things divine, and in natural ideas of the natural principles of human understanding, and conclusions thence deduced by the strength of human reason; but even in the ideas of outward objects, which are perceived by the outward senses: as that noble Christian philosopher Boëthius hath well observed; to which also the Cartesian philosophy agreeth.” I quote only to show the concurrence of others, with Harris’s position. Barclay carries on his argument with much more of a similar import. See *Sewell’s History*, folio, p. 620.

13. But the doctrine of ideas existing primarily in God, and being divinely planted in our souls, did not originate with Boëthius: it may be traced back a thousand years from his time, through the philosophy of Proclus, Zeno, Aristotle,† Plato, Socrates, Parmenides, and Pythagoras. It is absurd to suppose any production or effect to be more excellent than its cause. That which really produces motion, cannot itself be inert; and that which actually causes the human mind to think and reason, cannot itself be devoid of intelligence. “For knowledge can alone produce knowledge.” ‡ A doctrine apparently at variance with this, has recently been taught, with great confidence, among the professed discoveries of *Phrenology*. How much truth there may be in this new “*science*,” as it is called, I am not prepared to say; but, as sometimes held forth, it seems to me not only to clash with some of the most important principles of mental philosophy, but to make the power of thought the result of that which is in itself inert and unthinking. Assuming that the primitive faculties of the human understanding have not been known in earlier times, it professes to have discovered, in the physical organization of the brain, their proper source, or essential condition, and the true index to their measure, number, and distribution. In short, the leading phrenologists, by acknowledging no spiritual substance, virtually deny that ancient doctrine, “It is not in flesh to think, or bones to reason,” § and make the mind either a material substance, or a mere mode without substantial being.

14. “The doctrine of *immaterial substances*,” says Dr. Spurzheim, “is not sufficiently amenable to the test of observation; it is founded on belief, and only supported by hypothesis.”—*Phrenology*, Vol. i, p. 20. But it should be remembered, that our notion of material substance, is just as much a matter of hypothesis. All accidents, whether they be qualities or actions, we necessarily suppose to have some support; and this we call

---

\* “We cannot form a distinct idea of any moral or intellectual quality, unless we find some trace of it in ourselves.”—*Beattie’s Moral Science, Part Second, Natural Theology*, Chap. II, No. 424.

† “Aristotle tells us that the world is a copy or transcript of those ideas which are in the mind of the first Being, and that those ideas which are in the mind of man, are a transcript of the world. To this we may add, that words are the transcripts of those ideas which are in the mind of man, and that writing or printing *are* [is] the transcript of words.”—*Addison, Spect.*, No. 166.

‡ Bolingbroke on Retirement and Study, Letters on History, p. 364.

§ See this passage in “The Economy of Human Life,” p. 105—a work feigned to be a compend of Chinese maxims, but now generally understood to have been written or compiled by *Robert Dodsley*, an eminent and ingenious bookseller in London.

*substance*, deriving the term from the Latin, or *hypostasis*, if we choose to borrow from the Greek. But what this substance, or hypostasis, is, independently of its qualities or actions, we know not. This is clearly proved by Locke. What do we mean by *matter*? and what by *mind*? *Matter* is that which is solid, extended, divisible, movable, and occupies space. *Mind* is that which thinks, and wills, and reasons, and remembers, and worships. Here are qualities in the one case; operations in the other. Here are two definitions as totally distinct as any two can be; and he that sees not in them a difference of *substance*, sees it nowhere: to him all natures are one; and that one, an absurd supposition.

15. In favour of what is urged by the phrenologists, it may perhaps be admitted, as a natural law, that, “If a picture of a visible object be formed upon the retina, and the impression be communicated, by the nerves, to the brain, *the result* will be an act of perception.”—*Wayland’s Moral Science*, p. 4. But it does not follow, nor did the writer of this sentence believe, that perception is a mere act or attribute of the organized matter of the brain. A material object can only occasion in our sensible organs a corporeal motion, which has not in it the nature of thought or perception; and upon what principle of causation, shall a man believe, in respect to vision, that the thing which he sees, is more properly the cause of the idea conceived of it, than is the light by which he beholds it, or the mind in which that idea is formed? Lord Kames avers, that, “*Colour*, which appears to the eye as spread upon a substance, has no existence *but in the mind* of the spectator.”—*Elements of Criticism*, i, 178. And Cicero placed the perception, not only of colour, but of taste, of sound, of smell, and of touch, in the mind, rather than in the senses. “*Illud est album, hoc dulce, canorum illud, hoc bene olens, hoc asperum: animo jam hæc tenemus comprehensa, non sensibus.*”—*Ciceronis Acad.* Lib. ii, 7. Dr. Beattie, however, says: “Colours inhere not in the coloured body, but in the light that falls upon it; \* \* \* and the word *colour* denotes, an external thing, and never a sensation of the mind.”—*Moral Science*, i, 54. Here is some difference of opinion; but however the thing may be, it does not affect my argument; which is, that to perceive or think is an act or attribute of our immaterial substance or nature, and not to be supposed the effect either of the objects perceived or of our own corporeal organization.

16. Divine wisdom has established the senses as the avenues through which our minds shall receive notices of the forms and qualities of external things; but the sublime conception of the ancients, that these forms and qualities had an abstract preëxistence in the divine mind, is a common doctrine of many English authors, as Milton, Cowper, Akenside, and others. For example: “Now if *Ens primum* be the cause of *entia a primo*, then he hath the idea of them in him: for he made them by counsel, and not by necessity; for then he should have needed them, and they have a parhelion of that wisdom that is in his Idea.”—*Richardson’s Logic*, p. 16: Lond. 1657.

“Then the Great Spirit, whom his works adore,  
Within his own deep essence view’d the forms,  
The forms eternal of created things.”—AKENSIDE.

*Pleasures of the Imagination*, Book i.

“And in the school of sacred wisdom taught,  
To read his wonders, in whose thought the world,  
Fair as it is, existed ere it was.”—COWPER.

*Task: Winter Morning Walk*, p. 150.

“Thence to behold this new-created world,  
The addition of his empire, how it show’d  
In prospect from his throne, how good, how fair,  
Answering his great idea.”—MILTON.

*Paradise Lost*, Book vii, line 554.

“Thought shines from God as shines the morn;  
Language from kindling thought is born.”

ANON.: *a Poem in imitation of Coleridge*.

17. “Original Truth,” \* says Harris, “having the most intimate connection with the *Supreme Intelligence*, may be said (as it were) to shine with unchangeable splendor, enlightening throughout the universe every possible subject, by nature susceptible of its benign influence. Passions and other obstacles may prevent indeed its efficacy, as clouds and vapours may obscure the sun; but itself neither admits diminution, nor change, because the darkness respects only particular percipients. Among *these* therefore we must look for ignorance and error, and for that *subordination of intelligence* which is their natural consequence. Partial views, the imperfections of sense; inattention, idleness, the turbulence of passions; education, local sentiments, opinions, and belief; conspire in many instances to furnish us with ideas, some too partial, and (what is worse than all this) with many that are erroneous, and contrary to truth. These it behoves us to correct as far as possible, by cool suspense and candid examination. Thus by a connection perhaps little expected, the cause of *Letters*, and that of *Virtue*, appear to coincide; it being the business of both, to examine our ideas, and to amend them by the standard of nature and of truth.”—See *Hermes*, p. 406.

18. Although it seems plain from our own consciousness, that the mind is an active self-moving principle or essence, yet capable of being moved, after its own manner, by other causes outward as well as inward; and although it must be obvious to reflection, that all its ideas, perceptions, and emotions, are, with respect to itself, of a spiritual nature—bearing such a relation to the spiritual substance in which alone they appear, as bodily motion is seen to bear to material substances; yet we know, from experience and observation, that they who are acquainted with words, are apt to think in words—that is, mentally to associate their internal conceptions with the verbal signs which they have learned to use. And though I do not conceive the position to be generally true, that words are to the mind itself the necessary instruments of thought, yet, in my apprehension, it cannot well be denied, that in some of its operations and intellectual reaches, the mind is greatly assisted by its own contrivances with respect to language. I refer not now to the communication of knowledge; for, of this, language is admitted to be properly the instrument. But there seem to be some processes of thought, or calculation, in which the mind, by a wonderful artifice in the combination of terms, contrives to prevent

---

\* “Those philosophers whose ideas of *being* and *knowledge* are derived from body and sensation, have a short method to explain the nature of *Truth*.—It is a *factitious* thing, made by every man for himself; which comes and goes, just as it is remembered and forgot; which in the order of things makes its appearance *the last* of all, being not only subsequent to sensible objects, but even to our sensations of them! According to this hypothesis, there are many truths, which have been, and are no longer; others, that will be, and have not been yet; and multitudes, that possibly may never exist at all. But there are other reasoners, who must surely have had very different notions; those, I mean, who represent Truth not as *the last*, but as *the first* of beings; who call it *immutable*, *eternal*, *omnipresent*; attributes that all indicate something more than human.”—*Harris’s Hermes*, p. 403.

embarrassment, and help itself forward in its conceptions, when the objects before it are in themselves perhaps infinite in number or variety.

19. We have an instance of this in numeration. No idea is more obvious or simple than that of unity, or one. By the continual addition of this, first to itself to make two, and then to each higher combination successively, we form a series of different numbers, which may go on to infinity. In the consideration of these, the mind would not be able to go far without the help of words, and those peculiarly fitted to the purpose. The understanding would lose itself in the multiplicity, were it not aided by that curious concatenation of names, which has been contrived for the several parts of the succession. As far as *twelve* we make use of simple unrelated terms. Thenceforward we apply derivatives and compounds, formed from these in their regular order, till we arrive at a *hundred*. This one new word, *hundred*, introduced to prevent confusion, has nine hundred and ninety-nine distinct repetitions in connexion with the preceding terms, and thus brings us to a *thousand*. Here the computation begins anew, runs through all the former combinations, and then extends forward, till the word *thousand* has been used nine hundred and ninety-nine thousand times; and then, for ten hundred thousand, we introduce the new word *million*. With this name we begin again as before, and proceed till we have used it a million of times, each combination denoting a number clearly distinguished from every other; and then, in like manner, we begin and proceed, with *billions*, *trillions*, *quadrillions*, *quintillions*, *etc.*, to any extent we please.

20. Now can any one suppose that words are not here, in some true sense, the instruments of thought, or of the intellectual process thus carried on? Were all these different numbers to be distinguished directly by the mind itself, and denominated by terms destitute of this artificial connexion, it may well be doubted whether the greatest genius in the world would ever be able to do what any child may now effect by this orderly arrangement of words; that is, to distinguish exactly the several stages of this long progression, and see at a glance how far it is from the beginning of the series. “The great art of knowledge,” says Duncan, “lies in managing with skill the capacity of the intellect, and contriving such helps, as, if they strengthen not its natural powers, may yet expose them to no unnecessary fatigue. When ideas become very complex, and by the multiplicity of their parts grow too unwieldy to be dealt with in the lump, we must ease the view of the mind by taking them to pieces, and setting before it the several portions separately, one after another. By this leisurely survey we are enabled to take in the whole; and if we can draw it into such an orderly combination as will naturally lead the attention, step by step, in any succeeding consideration of the same idea, we shall have it ever at command, and with a single glance of thought be able to run over all its parts.”—*Duncan’s Logic*, p. 37, Hence we may infer the great importance of method in grammar; the particulars of which, as Quintilian says, are infinite.\*

---

\* Of the best method of teaching grammar, I shall discourse in an other chapter. That methods radically different must lend to different results, is no more than every intelligent person will suppose. The formation of just methods of instruction, or true systems of science, is work for those minds which are capable of the most accurate and comprehensive views of the things to be taught. He that is capable of “originating and producing” truth, or true “ideas,” if any but the Divine Being is so, has surely no need to be trained into such truth by any factitious scheme of education. In all that he thus originates, he is himself a *Novum Organon* of knowledge, and capable of teaching others, especially those officious men who would help him with their second-hand authorship, and their paltry catechisms of common-places. I allude here to the fundamental principle of what in some books is called “*The Productive System of Instruction*,” and to those schemes of grammar which are professedly founded on it. We are told that, “The *leading principle* of this

21. Words are in themselves but audible or visible signs, mere arbitrary symbols, used, according to common practice and consent, as significant of our ideas or thoughts.\* But so well are they fitted to be made at will the medium of mental conference, that nothing else can be conceived to equal them for this purpose. Yet it does not follow that they who have the greatest knowledge and command of words, have all they could desire in this respect. For language is in its own nature but an imperfect instrument, and even when tuned with the greatest skill, will often be found inadequate to convey the impression with which the mind may labour. Cicero, that great master of eloquence, frequently confessed, or declared, that words failed him. This, however, may be thought to have been uttered as a mere figure of speech; and some may say, that the imperfection I speak of, is but an incident of the common weakness or ignorance of human nature; and that if a man always knew what to say to an other in order to persuade or confute, to encourage or terrify him, he would always succeed, and no insufficiency of this kind would ever be felt or imagined. This also is plausible; but is the imperfection less, for being sometimes traceable to an ulterior source? Or is it certain that human languages used by perfect wisdom, would all be perfectly competent to their common purpose? And if some would be found less so than others, may there not be an insufficiency in the very nature of them all?

22. If there is imperfection in any instrument, there is so much the more need of care and skill in the use of it. Duncan, in concluding his chapter about words as signs of our ideas, says, "It is apparent, that we are sufficiently provided with the means' of communicating our thoughts one to another; and that the mistakes so frequently complained of on this head, are wholly owing to ourselves, in not sufficiently defining the terms we use; or perhaps not connecting them with clear and determinate ideas."—*Logic*, p. 69. On the other hand, we find that some of the best and wisest of men confess the inadequacy of language, while they also deplore its misuse. But, whatever may be its inherent defects, or its culpable abuses, it is still to be honoured as almost the only medium for the communication of thought and the diffusion of knowledge. Bishop Butler remarks, in his *Analogy of Religion*, (a most valuable work, though defective in style,) "So likewise the imperfections attending the only method by which nature enables and directs us to communicate our thoughts to each other, are innumerable. Language is, in its very nature, inadequate, ambiguous, liable to infinite abuse, even from negligence; and so

---

system, is that which its name indicates—that the child should be regarded not as a mere recipient of the ideas of others, but as an agent *capable of collecting, and originating, and producing* most of the ideas which are necessary for its education, when presented with the objects or the facts from which they may be derived."—*Smith's New Gram.*, Pref., p. 5: *Amer. Journal of Education*, New Series, Vol. I, No. 6, Art. 1. It ought to be enough for any teacher, or for any writer, if he finds his readers or his pupils ready *recipients* of the ideas which he aims to convey. What more they know, they can never owe to him, unless they learn it from him against his will; and what they happen to lack, of understanding or believing him, may very possibly be more his fault than theirs.

\* Lindley Murray, anonymously copying somebody, I know not whom, says: "Words derive their meaning from the consent and practice of those who use them. *There is no necessary connexion between words and ideas*. The association between the sign and the thing signified, is purely arbitrary."—*Octavo Gram.*, Vol. i, p. 139. The second assertion here made, is very far from being literally true. However arbitrary may be the use or application of words, their connexion with ideas is so necessary, that they cannot be words without it. Signification, as I shall hereafter prove, is a part of the very essence of a word, the most important element of its nature. And Murray himself says, "The understanding and language have a strict connexion."—*Ib.*, Vol. i, p. 356. In this, he changes without amendment the words of Blair: "Logic and rhetoric have here, as in many other cases, a strict connexion."—*Blair's Rhet.*, p. 120.

liable to it from design, that every man can deceive and betray by it.”—Part ii, Chap. 3. Lord Kames, too, seconds this complaint, at least in part: “Lamentable is the imperfection of language, almost in every particular that falls not under external sense. I am talking of a matter exceedingly clear in the perception, and yet I find no small difficulty to express it clearly in words.”—*Elements of Criticism*, Vol. i, p. 86. “All writers,” says Sheridan, “seem to be under the influence of one common delusion, that by the help of words alone, they can communicate all that passes in their minds.”—*Lectures on Elocution*, p. xi.

23. Addison also, in apologizing for Milton’s frequent use of old words and foreign idioms, says, “I may further add, that Milton’s sentiments and ideas were so wonderfully sublime, that it would have been impossible for him to have represented them in their full strength and beauty, without having recourse to these foreign assistances. *Our language sunk under him*, and was unequal to that greatness of soul which furnished him with such glorious conceptions.”—*Spectator*, No. 297. This, however, Dr. Johnson seems to regard as a mere compliment to genius; for of Milton he says, “The truth is, that both in prose and verse, he had formed his style by a perverse and pedantick principle.” But the grandeur of his thoughts is not denied by the critic; nor is his language censured without qualification. “Whatever be the faults of his diction, he cannot want the praise of copiousness and variety: he was master of his language in its full extent; and has selected the melodious words with such diligence, that from his book alone the Art of English Poetry might be learned.”—*Johnson’s Life of Milton: Lives*, p. 92.

24. As words abstractly considered are empty and vain, being in their nature mere signs, or tokens, which derive all their value from the ideas and feelings which they suggest; it is evident that he who would either speak or write well, must be furnished with something more than a knowledge of sounds and letters. Words fitly spoken are indeed both precious and beautiful—“like apples of gold in pictures of silver.” But it is not for him whose soul is dark, whose designs are selfish, whose affections are dead, or whose thoughts are vain, to say with the son of Amram, “My doctrine shall drop as the rain, my speech shall distil as the dew; as the small rain upon the tender herb, and as the showers upon the grass.”—*Deut.*, xxxii, 2. It is not for him to exhibit the true excellency of speech, because he cannot feel its power. It is not for him, whatever be the theme, to convince the judgement with deductions of reason, to fire the imagination with glowing imagery, or win with graceful words the willing ear of taste. His wisdom shall be silence, when men are present; for the soul of manly language, is the soul that thinks and feels as best becomes a man.

## CHAPTER VI.

### OF THE ORIGIN AND HISTORY OF THE ENGLISH LANGUAGE.

“Non mediocres enim tenebræ in sylva, ubi hæc captanda: neque eon, quo pervenire volumus semitæ tritæ: neque non in tramitibus quædam objecta, quæ euntem retinere possent.”—VARRO. *De Lingua Latina*, Lib. iv, p. 4.

1. In order that we may set a just value upon the literary labours of those who, in former times, gave particular attention to the culture of the English language, and that we may the better judge of the credibility of modern pretensions to further improvements, it seems necessary that we should know something of the course of events through which its acknowledged melioration in earlier days took place. For, in this case, the extent of a

man's knowledge is the strength of his argument. As Bacon quotes Aristotle, "Qui respiciunt ad pauca, de facili pronunciant." He that takes a narrow view, easily makes up his mind. But what is any opinion worth, if further knowledge of facts can confute it?

2. Whatsoever is successively varied, or has such a manner of existence as time can affect, must have had both an origin and a progress; and may have also its particular *history*, if the opportunity for writing it be not neglected. But such is the levity of mankind, that things of great moment are often left without memorial, while the hand of Literature is busy to beguile the world with trifles or with fictions, with fancies or with lies. The rude and cursory languages of barbarous nations, till the genius of Grammar arise to their rescue, are among those transitory things which unsparing time is ever hurrying away, irrecoverably, to oblivion. Tradition knows not what they were; for of their changes she takes no account. Philosophy tells us, they are resolved into the variable, fleeting breath of the successive generations of those by whom they were spoken; whose kindred fate it was, to pass away unnoticed and nameless, lost in the elements from which they sprung.

3. Upon the history of the English language, darkness thickens as we tread back the course of time. The subject of our inquiry becomes, at every step, more difficult and less worthy. We have now a tract of English literature, both extensive and luminous; and though many modern writers, and no few even of our writers on grammar, are comparatively very deficient in style, it is safe to affirm that the English language in general has never been written or spoken with more propriety and elegance, than it is at the present day. Modern English we read with facility; and that which was good two centuries ago, though considerably antiquated, is still easily understood. The best way, therefore, to gain a practical knowledge of the changes which our language has undergone, is, to read some of our older authors in retrograde order, till the style employed at times more and more remote, becomes in some degree familiar. Pursued in this manner, the study will be less difficult, and the labour of the curious inquirer, which may be suspended or resumed at pleasure, will be better repaid, than if he proceed in the order of history, and attempt at first the Saxon remains.

4. The value of a language as an object of study, depends chiefly on the character of the *books* which it contains; and, secondarily, on its connexion with others more worthy to be thoroughly known. In this instance, there are several circumstances which are calculated soon to discourage research. As our language took its rise during the barbarism of the dark ages, the books through which its early history must be traced, are not only few and meagre, but, in respect to grammar, unsettled and diverse. It is not to be expected that inquiries of this kind will ever engage the attention of any very considerable number of persons. Over the minds of the reading public, the attractions of novelty hold a much greater influence, than any thing that is to be discovered in the dusk of antiquity. All old books contain a greater or less number of obsolete words, and antiquated modes of expression, which puzzle the reader, and call him too frequently to his glossary. And even the most common terms, when they appear in their ancient, unsettled orthography, are often so disguised as not to be readily recognized.

5. These circumstances (the last of which should be a caution to us against innovations in spelling) retard the progress of the reader, impose a labour too great for the ardour of his curiosity, and soon dispose him to rest satisfied with an ignorance, which, being general, is not likely to expose him to censure. For these reasons, ancient authors

are little read; and the real antiquary is considered a man of odd habits, who, by a singular propensity, is led into studies both unfashionable and fruitless—a man who ought to have been born in the days of old, that he might have spoken the language he is so curious to know, and have appeared in the costume of an age better suited to his taste.

6. But *Learning* is ever curious to explore the records of time, as well as the regions of space; and wherever her institutions flourish, she will amass her treasures, and spread them before her votaries. Difference of languages she easily overcomes; but the leaden reign of unlettered Ignorance defies her scrutiny. Hence, of one period of the world's history, she ever speaks with horror—that “long night of apostasy,” during which, like a lone Sibyl, she hid her precious relics in solitary cells, and fleeing from degraded Christendom, sought refuge with the eastern caliphs. “This awful decline of true religion in the world carried with it almost every vestige of civil liberty, of classical literature, and of scientific knowledge; and it will generally be found in experience that they must all stand or fall together.”—*Hints on Toleration*, p. 263. In the tenth century, beyond which we find nothing that bears much resemblance to the English language as now written, this mental darkness appears to have gathered to its deepest obscurity; and, at that period, England was sunk as low in ignorance, superstition, and depravity, as any other part of Europe.

7. The English language gradually varies as we trace it back, and becomes at length identified with the Anglo-Saxon; that is, with the dialect spoken by the Saxons after their settlement in England. These Saxons were a fierce, warlike, unlettered people from Germany; whom the ancient Britons had invited to their assistance against the Picts and Scots. Cruel and ignorant, like their Gothic kindred, who had but lately overrun the Roman empire, they came, not for the good of others, but to accommodate themselves. They accordingly seized the country; destroyed or enslaved the ancient inhabitants; or, more probably, drove the remnant of them into the mountains of Wales. Of Welsh or ancient British words, Charles Bucke, who says in his grammar that he took great pains to be accurate in his scale of derivation, enumerates but one hundred and eleven, as now found in our language; and Dr. Johnson, who makes them but ninety-five, argues from their paucity, or almost total absence, that the Saxons could not have mingled at all with these people, or even have retained them in vassalage.

8. The ancient languages of France and of the British isles are said to have proceeded from an other language yet more ancient, called the *Celtic*; so that, from one common source, are supposed to have sprung the present Welsh, the present Irish, and the present Highland Scotch.\* The term *Celtic* Dr. Webster defines, as a noun, “The language of the Celts;” and, as an adjective, “Pertaining to the primitive inhabitants of the south and west

---

\* “The language which is, at present, spoken throughout Great Britain, is neither the ancient primitive speech of the island, nor derived from it; but is altogether of foreign origin. The language of the first inhabitants of our island, beyond doubt, was the Celtic, or Gaelic, common to them with Gaul; from which country, it appears, by many circumstances, that Great Britain was peopled. This Celtic tongue, which is said to be very expressive and copious, and is, probably, one of the most ancient languages in the world, obtained once in most of the western regions of Europe. It was the language of Gaul, of Great Britain, of Ireland, and very probably, of Spain also; till, in the course of those revolutions which by means of the conquests, first, of the Romans, and afterwards, of the northern nations, changed the government, speech, and, in a manner, the whole face of Europe, *this tongue was gradually obliterated*; and now subsists only in the mountains of Wales, in the Highlands of Scotland, and among the wild Irish. For the Irish, the Welsh, and the Erse, are no other than different dialects of the same tongue, the ancient Celtic.”—*Blair's Rhetoric*, Lect. IX, p. 85.

of Europe, or to the early inhabitants of Italy, Gaul, Spain, and Britain.” What *unity*, according to this, there was, or could have been, in the ancient Celtic tongue, does not appear from books, nor is it easy to be conjectured.\* Many ancient writers sustain this broad application of the term *Celtæ* or *Celts*; which, according to Strabo’s etymology of it, means horsemen, and seems to have been almost as general as our word *Indians*. But Cæsar informs us that the name was more particularly claimed by the people who, in his day, lived in France between the Seine and the Garonne, and who by the Romans were called *Galli*, or *Gauls*.

9. The *Celtic* tribes are said to have been the descendants of Gomer, the son of Japhet. The English historians agree that the first inhabitants of their island owed their origin and their language to the *Celtæ*, or Gauls, who settled on the opposite shore. Julius Cæsar, who invaded Britain about half a century before the Christian era, found the inhabitants ignorant of letters, and destitute of any history but oral tradition. To this, however, they paid great attention, teaching every thing in verse. Some of the Druids, it is said in Cæsar’s Commentaries, spent twenty years in learning to repeat songs and hymns that were never committed to writing. These ancient priests, or diviners, are represented as having great power, and as exercising it in some respects beneficially; but their horrid rites, with human sacrifices, provoked the Romans to destroy them. Smollett says, “Tiberius suppressed those human sacrifices in Gaul; and Claudius destroyed the Druids of that country; but they subsisted in Britain till the reign of Nero, when Paulus Suetonius reduced the island of Anglesey, which was the place of their retreat, and overwhelmed them with such unexpected and sudden destruction, that all their knowledge and tradition, conveyed to them in the songs of their predecessors, perished at once.”—*Smollett’s Hist. of Eng.*, 4to, B. i, Ch. i, §7.

10. The Romans considered Britain a province of their empire, for a period of about five hundred years; but the northern part of the island was never entirely subdued by them, and not till Anno Domini 78, a hundred and thirty-three years after their first invasion of the country, had they completed their conquest of England. Letters and arts, so far at least as these are necessary to the purposes of war or government, the victors carried with them; and under their auspices some knowledge of Christianity was, at a very early period, introduced into Britain. But it seems strange, that after all that is related of their conquests, settlements, cities, fortifications, buildings, seminaries, churches, laws, &c., they should at last have left the Britons in so helpless, degraded, and forlorn a condition. They *did not sow among them the seeds* of any permanent improvement.

11. The Roman government, being unable to sustain itself at home, withdrew its forces finally from Britain in the year 446, leaving the wretched inhabitants almost as savage as it found them, and in a situation even less desirable. Deprived of their native resources, their ancient independence of spirit, as well as of the laws, customs, institutions, and

---

\* With some writers, the *Celtic* language is *the Welsh*; as may be seen by the following extract: “By this he requires an Impossibility, since much the greater Part of Mankind can by no means spare 10 or 11 Years of their Lives in learning those dead Languages, to arrive at a perfect Knowledge of their own. But by this Gentleman’s way of Arguing, we ought not only to be Masters of *Latin* and *Greek*, but of *Spanish*, *Italian*, *High-Dutch*, *Low-Dutch*, *French*, the *Old Saxon*, *Welsh*, *Runic*, *Gothic*, and *Islandic*; since much the greater number of Words of common and general Use are derived from *those Tongues*. Nay, by the same way of Reasoning we may prove, that the *Romans* and *Greeks* did not understand their own Tongues, because they were not acquainted with *the Welsh*, or *ancient Celtic*, there being above 620 radical *Greek* Words derived from *the Celtic*, and of the Latin a much greater Number.”—*Preface to Brightland’s Grammar*, p. 5.

leaders, that had kept them together under their old dynasties, and now deserted by their foreign protectors, they were apparently left at the mercy of blind fortune, the wretched vicissitudes of which there was none to foresee, none to resist. The glory of the Romans now passed away. The mighty fabric of their own proud empire crumbled into ruins. Civil liberty gave place to barbarism; Christian truth, to papal superstition; and the lights of science were put out by both. The shades of night gathered over all; settling and condensing, “till almost every point of that wide horizon, over which the Sun of Righteousness had diffused his cheering rays, was enveloped in a darkness more awful and more portentous than that which of old descended upon rebellious Pharaoh and the callous sons of Ham.”—*Hints on Toleration*, p. 310.

12. The Saxons entered Britain in the year 449. But what was the form of their language at that time, cannot now be known. It was a dialect of the *Gothic* or *Teutonic*; which is considered the parent of all the northern tongues of Europe, except some few of Sclavonian origin. The only remaining monument of the Gothic language is a copy of the Gospels, translated by Ulphilas; which is preserved at Upsal, and called, from its embellishments, *the Silver Book*. This old work has been three times printed in England. We possess not yet in America all the advantages which may be enjoyed by literary men in the land of our ancestors; but the stores of literature, both ancient and modern, are somewhat more familiar to us, than is there supposed; and the art of printing is fast equalizing, to all nations that cultivate learning, the privilege of drinking at its ancient fountains.

13. It is neither liberal nor just to argue unfavourably of the intellectual or the moral condition of any remote age or country, merely from our own ignorance of it. It is true, we can derive from no quarter a favourable opinion of the state of England after the Saxon invasion, and during the tumultuous and bloody government of the heptarchy. But I will not darken the picture through design. If justice were done to the few names—to Gildas the wise, the memorialist of his country’s sufferings and censor of the nation’s depravity, who appears a solitary star in the night of the sixth century—to the venerable Bede, the greatest theologian, best scholar, and only historian of the seventh—to Alcuin, the abbot of Canterbury, the luminary of the eighth—to Alfred the great, the glory of the ninth, great as a prince, and greater as a scholar, seen in the evening twilight of an age in which the clergy could not read;—if justice were done to all such, we might find something, even in these dark and rugged times, if not to soften the grimness of the portrait, at least to give greater distinctness of feature.

14. In tracing the history of our language, Dr. Johnson, who does little more than give examples, cites as his first specimen of ancient English, a portion of king Alfred’s paraphrase in imitation of Boëthius. But this language of Alfred’s is not English; but rather, as the learned doctor himself considered it, an example of the Anglo-Saxon in its highest state of purity. This dialect was first changed by admixture with words derived from the Danish and the Norman; and, still being comparatively rude and meagre, afterwards received large accessions from the Latin, the French, the Greek, the Dutch—till, by gradual changes, which the etymologist may exhibit, there was at length produced a language bearing a sufficient resemblance to the present English, to deserve to be called English at this day.

15. The formation of our language cannot with propriety be dated earlier than the thirteenth century. It was then that a free and voluntary amalgamation of its chief

constituent materials took place; and this was somewhat earlier than we date the revival of learning. The English of the thirteenth century is scarcely intelligible to the modern reader. Dr. Johnson calls it “a kind of intermediate diction, neither Saxon nor English;” and says, that Sir John Gower, who wrote in the latter part of the fourteenth century, was “the first of our authors who can be properly said to have written English.” Contemporary with Gower, the father of English poetry, was the still greater poet, his disciple Chaucer; who embraced many of the tenets of Wickliffe, and imbibed something of the spirit of the reformation, which was now begun.

16. The literary history of the fourteenth and fifteenth centuries is full of interest; for it is delightful to trace the progress of great and obvious improvement. The reformation of religion and the revival of learning were nearly simultaneous. Yet individuals may have acted a conspicuous part in the latter, who had little to do with the former; for great learning does not necessarily imply great piety, though, as Dr. Johnson observes, “the Christian religion always implies or produces a certain degree of civility and learning.”—*Hist. Eng. Lang. before his 4to Dict.* “The ordinary instructions of the clergy, both philosophical and religious, gradually fell into contempt, as the Classics superseded the one, and the Holy Scriptures expelled the other. The first of these changes was effected by *the early grammarians* of Europe; and it gave considerable aid to the reformation, though it had no immediate connexion with that event. The revival of the English Bible, however, completed the work: and though its appearance was late, and its progress was retarded in every possible manner, yet its dispersion was at length equally rapid, extensive, and effectual.”—*Constable’s Miscellany*, Vol. xx, p. 75.

17. Peculiar honour is due to those who lead the way in whatever advances human happiness. And, surely, our just admiration of the character of the *reformers* must be not a little enhanced, when we consider what they did for letters as well as for the church. Learning does not consist in useless jargon, in a multitude of mere words, or in acute speculations remote from practice; else the seventeen folios of St. Thomas Aquinas, the angelical doctor of the thirteenth century, and the profound disputations of his great rival, Duns Scotus the subtle, for which they were revered in their own age, had not gained them the contempt of all posterity. From such learning the lucid reasoning of the reformers delivered the halls of instruction. The school divinity of the middle ages passed away before the presence of that which these men learned from the Bible, as did in a later age the Aristotelian philosophy before that which Bacon drew from nature.

18. Towards the latter part of the fourteenth century, Wickliffe furnished the first entire translation of the Bible into English. In like manner did the Germans, a hundred and fifty years after, receive it in their tongue from the hands of Luther; who says, that at twenty years of age, he himself had not seen it in any language. Wickliffe’s English style is elegant for the age in which he lived, yet very different from what is elegant now. This first English translation of the Bible, being made about a hundred years before the introduction of printing into England, could not have been very extensively circulated. A large specimen of it may be seen in Dr. Johnson’s *History of the English Language*. Wickliffe died in 1384. The art of printing was invented about 1440, and first introduced into England, in 1468; but the first printed edition of the Bible in English, was executed in Germany. It was completed, October 5th, 1535.

19. “Martin Luther, about the year 1517, first introduced metrical psalmody into the service of the church, which not only kept alive the enthusiasm of the reformers, but

formed a rallying point for his followers. This practice spread in all directions; and it was not long ere six thousand persons were heard singing together at St. Paul's Cross in London. Luther was a poet and musician; but the same talent existed not in his followers. Thirty years afterwards, Sternhold versified fifty-one of the Psalms; and in 1562, with the help of Hopkins, he completed the Psalter. These poetical effusions were chiefly sung to German melodies, which the good taste of Luther supplied: but the Puritans, in a subsequent age, nearly destroyed these germs of melody, assigning as a reason, that music should be so simplified as to suit all persons, and that all may join."—*Dr. Gardiner's Music of Nature*, p. 283.

20. "The schools and colleges of England in the fifteenth and sixteenth centuries were not governed by a system of education which would render their students very eminent either as scholars or as gentlemen: and the monasteries, which were used as seminaries, even until the reformation, taught only the corrupt Latin used by the ecclesiastics. The time however was approaching, when the united efforts of Stanbridge, Linacre, Sir John Cheke, Dean Colet, Erasmus, William Lily, Roger Ascham, &c., were successful in reviving the Latin tongue in all its purity; and even in exciting a taste for Greek in a nation the clergy of which opposed its introduction with the same vehemence which characterized their enmity to a reformation in religion. The very learned Erasmus, the first who undertook the teaching of the Greek language at Oxford, met with few friends to support him; notwithstanding Oxford was the seat of nearly all the learning in England."—*Constable's Miscellany*, Vol. xx, p. 146.

21. "The priests preached against it, as a very recent invention of the arch-enemy; and confounding in their misguided zeal, the very foundation of their faith, with the object of their resentment, they represented the New Testament itself as 'an impious and dangerous book,' because it was written in that heretical language. Even after the accession of Henry VIII, when Erasmus, who had quitted Oxford in disgust, returned under his especial patronage, with the support of several eminent scholars and powerful persons, his progress was still impeded, and the language opposed. The University was divided into parties, called Greeks and Trojans, the latter being the strongest, from being favoured by the monks; and the Greeks were driven from the streets, with hisses and other expressions of contempt. It was not therefore until Henry VIII and Cardinal Wolsey gave it their positive and powerful protection, that this persecuted language was allowed to be quietly studied, even in the institutions dedicated to learning."—*Ib.*, p. 147.

22. These curious extracts are adduced to show the *spirit of the times*, and the obstacles then to be surmounted in the cause of learning. This popular opposition to Greek, did not spring from a patriotic design to prefer and encourage English literature; for the improvement of this was still later, and the great promoters of it were all of them classical scholars. They wrote in English, not because they preferred it, but because none but those who were bred in colleges, could read any thing else; and, even to this very day, the grammatical study of the English language is shamefully neglected in what are called the higher institutions of learning. In alleging this neglect, I speak comparatively. Every student, on entering upon the practical business of life, will find it of far more importance to him, to be skillful in the language of his own country than to be distinguished for any knowledge which the learned only can appreciate. "Will the greatest Mastership in Greek and Latin, or [the] translating [of] these Languages into English, avail for the Purpose of acquiring an elegant English Style? No—we know just the Reverse from woeful Experience! And, as Mr. Locke and the Spectator observe, Men who have threshed hard at Greek and

Latin for ten or eleven years together, are very often deficient in their own Language.”—*Preface to the British Gram.*, 8vo, 1784, p. xxi.

23. That the progress of English literature in early times was slow, will not seem wonderful to those who consider what is affirmed of the progress of other arts, more immediately connected with the comforts of life. “Down to the reign of Elizabeth, the greater part of the houses in considerable towns, had no chimneys: the fire was kindled against the wall, and the smoke found its way out as well as it could, by the roof, the door, or the windows. The houses were mostly built of wattling, plastered over with clay; and the beds were only straw pallets, with a log of wood for a pillow. In this respect, even the king fared no better than his subjects; for, in Henry the Eighth’s time, we find directions, ‘to examine every night the straw of the king’s bed, that no daggers might be concealed therein.’ A writer in 1577, speaking of the progress of luxury, mentions three things especially, that were ‘marvellously altered for the worse in England;’ the multitude of chimneys lately erected, the increase of lodgings, and the exchange of treen platters into pewter, and wooden spoons into silver and tin; and he complains bitterly that oak instead of willow was employed in the building of houses.”—REV. ROYAL ROBBINS: *Outlines of History*, p. 377.

24. Shakspeare appeared in the reign of Elizabeth; outlived her thirteen years; and died in 1616 aged 52. The English language in his hands did not lack power or compass of expression. His writings are now more extensively read, than any others of that age; nor has any very considerable part of his phraseology yet become obsolete. But it ought to be known, that the printers or editors of the editions which are now read, have taken extensive liberty in modernizing his orthography, as well as that of other old authors still popular. How far such liberty is justifiable, it is difficult to say. Modern readers doubtless find a convenience in it. It is very desirable that the orthography of our language should be made uniform, and remain permanent. Great alterations cannot be suddenly introduced; and there is, in stability, an advantage which will counterbalance that of a slow approximation to regularity. Analogy may sometimes decide the form of variable words, but the concurrent usage of the learned must ever be respected, in this, as in every other part of grammar.

25. Among the earliest of the English grammarians, was Ben Jonson, the poet; who died in the year 1637, at the age of sixty-three. His grammar, (which Horne Tooke mistakingly calls “the *first* as well as the *best* English grammar,”) is still extant, being published in the several editions of his works. It is a small treatise, and worthy of attention only as a matter of curiosity. It is written in prose, and designed chiefly for the aid of foreigners. Grammar is an unpoetical subject, and therefore not wisely treated, as it once very generally was, in verse. But every poet should be familiar with the art, because the formal principles of his own have always been considered as embraced in it. To its poets, too, every language must needs be particularly indebted; because their compositions, being in general more highly finished than works in prose, are supposed to present the language in its most agreeable form. In the preface to the Poems of Edmund Waller, published in 1690, the editor ventures to say, “He was, indeed, the Parent of English Verse, and the first that shewed us our Tongue had Beauty and Numbers in it. Our Language owes more to Him, than the French does to Cardinal Richelieu and the whole Academy. \* \* \* \* The Tongue came into His hands a rough diamond: he polished it first; and to *that* degree, that all artists since him have admired the workmanship, without pretending to mend it.”—*British Poets*, Vol. ii, Lond., 1800: *Waller’s Poems*, p. 4.

26. Dr. Johnson, however, in his *Lives of the Poets*, abates this praise, that he may transfer the greater part of it to Dryden and Pope. He admits that, “After about half a century of forced thoughts and rugged metre, some advances towards nature and harmony had been already made by Waller and Denham;” but, in distributing the praise of this improvement, he adds, “It may be doubted whether Waller and Denham could have over-born [*overborne*] the prejudices which had long prevailed, and which even then were sheltered by the protection of Cowley. The new versification, as it was called, may be considered as owing its establishment to Dryden; from whose time it is apparent that English poetry has had no tendency to relapse to its former savageness.”—*Johnson's Life of Dryden: Lives*, p. 206. To Pope, as the translator of Homer, he gives this praise: “His version may be said to have tuned the English tongue; for since its appearance no writer, however deficient in other powers, has wanted melody.”—*Life of Pope: Lives*, p. 567. Such was the opinion of Johnson; but there are other critics who object to the versification of Pope, that it is “monotonous and cloying.” See, in Leigh Hunt's *Feast of the Poets*, the following couplet, and a note upon it:

“But ever since Pope spoil'd the ears of the town  
With his cuckoo-song verses half up and half down.”

27. The unfortunate Charles I, as well as his father James I, was a lover and promoter of letters. He was himself a good scholar, and wrote well in English, for his time: he ascended the throne in 1625, and was beheaded in 1648. Nor was Cromwell himself, with all his religious and military enthusiasm, wholly insensible to *literary* merit. This century was distinguished by the writings of Milton, *Dryden*, Waller, Cowley, Denham, Locke, and others; and the reign of Charles II, which is embraced in it, has been considered by some “the Augustan age of English literature.” But that honour, if it may well be bestowed on any, belongs rather to a later period. The best works produced in the eighteenth century, are so generally known and so highly esteemed, that it would be lavish of the narrow space allowed to this introduction, to speak particularly of their merits. Some grammatical errors may be found in almost all books; but our language was, in general, written with great purity and propriety by Addison, Swift, Pope, Johnson, Lowth, Hume, Horne, and many other celebrated authors who flourished in the last century. Nor was it much before this period, that the British writers took any great pains to be accurate in the use of their own language;

“Late, very late, correctness grew our care,  
When the tir'd nation breath'd from civil war.”—*Pope*.

28. English books began to be printed in the early part of the sixteenth century; and, as soon as a taste for reading was formed, the press threw open the flood-gates of general knowledge, the streams of which are now pouring forth, in a copious, increasing, but too often turbid tide, upon all the civilized nations of the earth. This mighty engine afforded a means by which superior minds could act more efficiently and more extensively upon society in general. And thus, by the exertions of genius adorned with learning, our native tongue has been made the polished vehicle of the most interesting truths, and of the most important discoveries; and has become a language copious, strong, refined, and capable of no inconsiderable degree of harmony. Nay, it is esteemed by some who claim to be

competent judges, to be the strongest, the richest, the most elegant, and the most susceptible of sublime imagery, of all the languages in the world.

## CHAPTER VII.

### CHANGES AND SPECIMENS OF THE ENGLISH LANGUAGE.

“Quot enim verba, et nonnunquam in deterius, hoc, quo vivimus, sæculo, partim aliqâ, partim nullâ necessitate cogente, mutata sunt?”—ROU. AINSWORTH: *Lat. Dict.*, 4to; Præf., p. xi.

1. In the use of language, every one chooses his words from that common stock which he has learned, and applies them in practice according to his own habits and notions. If the style of different writers of the same age is various, much greater is the variety which appears in the productions of different ages. Hence the date of a book may often be very plausibly conjectured from the peculiarities of its style. As to what is best in itself, or best adapted to the subject in hand, every writer must endeavour to become his own judge. He who, in any sort of composition, would write with a master's hand, must first apply himself to books with a scholar's diligence. He must think it worth his while to inform himself, that he may be critical. Desiring to give the student all the advantage, entertainment, and satisfaction, that can be expected from a work of this kind, I shall subjoin a few brief specimens in illustration of what has been said in the foregoing chapter. The order of time will be followed *inversely*; and, as Saxon characters are not very easily obtained, or very apt to be read, the Roman letters will be employed for the few examples to which the others would be more appropriate. But there are some peculiarities of ancient usage in English, which, for the information of the young reader, it is proper in the first place to explain.

2. With respect to the letters, there are *several changes* to be mentioned. (1.) The pages of old books are often crowded with capitals: it was at one time the custom to distinguish all nouns, and frequently verbs, or any other important words, by heading them with a great letter. (2.) The letter Ess, of the lower case, had till lately two forms, the long and the short, as *f* and *s*; the former very nearly resembling the small *f*, and the latter, its own capital. The short *s* was used *at the end of words*, and the long *f*, in other places; but the latter is now laid aside, in favour of the more distinctive form. (3.) The letters *I* and *J* were formerly considered as one and the same. Hence we find *hallelujah* for *halleluiah*, *Iohn* for *John*, *iudgement* for *judgement*, &c. And in many dictionaries, the words beginning with *J* are still mixed with those which begin with *I*. (4.) The letters *U* and *V* were mixed in like manner, and for the same reason; the latter being a consonant power given to the former, and at length distinguished from it by a different form. Or rather, the figure of the capital seems to have been at last appropriated to the one, and that of the small letter to the other. But in old books the forms of these two letters are continually confounded or transposed. Hence it is, that our *Double-u* is composed of two *Ve*s; which, as we see in old books, were sometimes printed separately: as, *VV*, for *W*; or *vv*, for *w*.

3. The *orthography* of our language, rude and unsettled as it still is in many respects, was formerly much more variable and diverse. In books a hundred years old or more, we often find the most common words spelled variously by the same writer, and even upon the very same page. With respect to the forms of words, a few particulars may here be noticed: (1.) The article *an*, from which the *n* was dropped before words beginning with a

consonant sound, is often found in old books where *a* would be more proper; as, *an heart*, *an help*, *an hill*, *an one*, *an use*. (2.) Till the seventeenth century, the possessive case was written without the apostrophe; being formed at different times, in *es*, *is*, *ys*, or *s*, like the plural; and apparently without rule or uniformity in respect to the doubling of the final consonant: as *Goddess*, *Godes*, *Godis*, *Godys*, or *Gods*, for *God's*; so *mannes*, *mannis*, *mannys* or *mans*, for *man's*. Dr. Ash, whose English Grammar was in some repute in the latter part of the eighteenth century, argued against the use of the apostrophe, alleging that it was seldom used to distinguish the possessive case till about the beginning of that century; and he then prophesied that the time would come, when *correct writers would lay it aside again*, as a strange corruption, an improper “departure from the original formation” of that case of English nouns. And, among the speculations of these latter days, I have somewhere seen an attempt to disparage this useful sign, and explode it, as an unsightly thing *never well established*. It does not indeed, like a syllabic sign, inform the ear or affect the sound; but still it is useful, because it distinguishes to the eye, not only the *case*, but the *number*, of the nouns thus marked. Pronouns, being different in their declension, do not need it, and should therefore always be written without it.

4. The common usage of those who have spoken English, has always inclined rather to brevity than to melody; contraction and elision of the ancient terminations of words, constitute no small part of the change which has taken place, or of the difference which perhaps always existed between the solemn and the familiar style. In respect to euphony, however, these terminations have certainly nothing to boast; nor does the earliest period of the language appear to be that in which they were the most generally used without contraction. That degree of smoothness of which the tongue was anciently susceptible, had certainly no alliance with these additional syllables. The long sonorous endings which constitute the declensions and conjugations of the most admired languages, and which seem to chime so well with the sublimity of the Greek, the majesty of the Latin, the sweetness of the Italian, the dignity of the Spanish, or the polish of the French, *never had* any place in English. The inflections given to our words never embraced any other vowel power than that of the short *e* or *i*; and even, this we are inclined to dispense with, whenever we can; so that most of our grammatical inflections are, to the ear, nothing but consonants blended with the final syllables of the words to which they are added. *Ing* for the first participle, *er* for the comparative degree, and *est* for the superlative, are indeed added as whole syllables; but the rest, as *d* or *ed* for preterits and perfect participles, *s* or *es* for the plural number of nouns, or for the third person singular of verbs, and *st* or *est* for the second person singular of verbs, nine times in ten, fall into the sound or syllable with which the primitive word terminates. English verbs, as they are now commonly used, run through their entire conjugation without acquiring a single syllable from inflection, except sometimes when the sound of *d*, *s*, or *st* cannot be added to them.

5. This simplicity, so characteristic of our modern English, as well as of the Saxon tongue, its proper parent, is attended with advantages that go far to compensate for all that is consequently lost in euphony, or in the liberty of transposition. Our formation of the moods and tenses, by means of a few separate auxiliaries, all monosyllabic, and mostly without inflection, is not only simple and easy, but beautiful, chaste, and strong. In my opinion, our grammarians have shown far more affection for the obsolete or obsolescent terminations *en*, *eth*, *est*, and *edst*, than they really deserve. Till the beginning of the sixteenth century, *en* was used to mark the plural number of verbs, as, *they sayen* for *they say*; after which, it appears to have been dropped. Before the beginning of the seventeenth century, *s* or *es* began to dispute with *th* or *eth* the right of forming the third

person singular of verbs; and, as the Bible and other grave books used only the latter, a clear distinction obtained, between the solemn and the familiar style, which distinction is well known at this day. Thus we have, *He runs, walks, rides, reaches*, &c., for the one; and, *He runneth, walketh, rideth, reacheth*, &c., for the other. About the same time, or perhaps earlier, the use of the second person singular began to be avoided in polite conversation, by the substitution of the plural verb and pronoun; and, when used in poetry, it was often contracted, so as to prevent any syllabic increase. In old books, all verbs and participles that were intended to be contracted in pronunciation, were contracted also, in some way, by the writer: as, “*call’d, carry’d, sacrific’d*,” “*fly’st, ascrib’st, cryd’st*,” “*tost, curst, blest, finisht*,” and others innumerable. All these, and such as are like them, we now pronounce in the same way, but usually write differently; as, *called, carried, sacrificed; fliest, ascribest, criettst; tossed, cursed, blessed, finished*. Most of these topics will be further noticed in the Grammar.

## I. ENGLISH OF THE NINETEENTH CENTURY.

### 6. *Queen Victoria’s Answer to an Address*.—*Example written in 1837*.

“I thank you for your condolence upon the death of his late Majesty, for the justice which you render to his character, and to the measures of his reign, and for your warm congratulations upon my accession to the throne. I join in your prayers for the prosperity of my reign, the best security for which is to be found in reverence for our holy religion, and in the observance of its duties.”—VICTORIA, *to the Friends’ Society*.

### 7. *From President Adams’s Eulogy on Lafayette*.—*Written in 1834*.

“Pronounce him one of the first men of his age, and you have yet not done him justice. Try him by that test to which he sought in vain to stimulate the vulgar and selfish spirit of Napoleon; class him among the men who, to compare and seat themselves, must take in the compass of all ages; turn back your eyes upon the records of time; summon from the creation of the world to this day the mighty dead of every age and every clime; and where, among the race of merely mortal men, shall one be found, who, as the benefactor of his kind, shall claim to take precedence of Lafayette?”—JOHN QUINCY ADAMS.

### 8. *From President Jackson’s Proclamation against Nullification*.—1832.

“No, we have not erred! The Constitution is still the object of our reverence, the bond of our Union, our defence in danger, the source of our prosperity in peace. It shall descend, as we have received it, uncorrupted by sophistical construction, to our posterity: and the sacrifices of local interest, of State prejudices, of personal animosities, that were made to bring it into existence, will again be patriotically offered for its support.”—ANDREW JACKSON.

### 9. *From a Note on one of Robert Hall’s Sermons*.—*Written about 1831*.

“After he had written down the striking apostrophe which occurs at about page 76 of most of the editions—‘Eternal God! on what are thine enemies intent! what are those enterprises of guilt and horror, that, for the safety of their performers, require to be enveloped in a darkness which the eye of Heaven must not *penetrate*!’—he asked, ‘Did I say *penetrate*, sir, when I preached, it?’ ‘Yes.’ ‘Do you think, sir, I may venture to alter it? for no man who considered the force of the English language, would use a word of three syllables there, but from absolute necessity.’ ‘You are doubtless at liberty to alter it, if you think well.’ ‘Then be so good, sir, as to take your pencil, and for *penetrate* put *pierce*; *pierce* is the word, sir, and the only word to be used there.’—OLINTHUS GREGORY.

10. *King William's Answer to an Address*.—*Example written in* 1830.

"I thank you sincerely for your condolence with me, on account of the loss which I have sustained, in common with my people, by the death of my lamented brother, his late Majesty. The assurances which you have conveyed to me, of loyalty and affectionate attachment to my person, are very gratifying to my feelings. You may rely upon my favour and protection, and upon my anxious endeavours to promote morality and true piety among all classes of my subjects."—WILLIAM IV, *to the Friends*.

11. *Reign of George IV*, 1830 *back to* 1820.—*Example written in* 1827.

"That morning, thou, that slumbered\* not before,  
Nor slept, great Ocean I laid thy waves to rest,  
And hushed thy mighty minstrelsy. No breath  
Thy deep composure stirred, no fin, no oar;  
Like beauty newly dead, so calm, so still,  
So lovely, thou, beneath the light that fell  
From angel-chariots sentinelled on high,  
Reposed, and listened, and saw thy living change,  
Thy dead arise. Charybdis listened, and Scylla;  
And savage Euxine on the Thracian beach  
Lay motionless: and every battle ship  
Stood still; and every ship of merchandise,  
And all that sailed, of every name, stood still."

ROBERT POLLOK: *Course of Time*, Book VII, line 634-647.

**II. ENGLISH OF THE EIGHTEENTH CENTURY.**12. *Reign of George III*, 1820 *back to* 1760.—*Example written in* 1800.

"There is, it will be confessed, a delicate sensibility to character, a sober desire of reputation, a wish to possess the esteem of the wise and good, felt by the purest minds, which is at the farthest remove from arrogance or vanity. The humility of a noble mind scarcely dares approve of itself, until it has secured the approbation of others. Very different is that restless desire of distinction, that passion for theatrical display, which inflames the heart and occupies the whole attention of vain men. \* \* \* The truly good man is jealous over himself, lest the notoriety of his best actions, by blending itself with their motive, should diminish their value; the vain man performs the same actions for the sake of that notoriety. The good man quietly discharges his duty, and shuns ostentation; the

---

\* The author of this specimen, through a solemn and sublime poem in ten books, *generally* simplified the preterit verb of the second person singular, by omitting the termination *st* or *est*, whenever his measure did not require the additional syllable. But his tuneless editors have, in many instances, taken the rude liberty both to spoil his versification, and to publish under his name what he did not write. They have given him *bad prosody*, or unutterable *harshness of phraseology*, for the sake of what they conceived to be *grammar*. So *Kirkham*, in copying the foregoing passage, alters it as he will; and alters it *differently*, when he happens to write some part of it twice: as,

"That morning, thou, that *slumberedst* not before,  
Nor *slept*, great Ocean! *laidst* thy waves at rest,  
And *hushed* thy mighty minstrelsy."—*Kirkham's Elocution*, p. 203.

Again:

"That morning, thou, that *slumberedst* not before,  
Nor *sleptst*, great Ocean, *laidst* thy waves at rest,  
And *hush'dst* thy mighty minstrelsy."—*Kirkham's Elocution*, p. 44.

vain man considers every good deed lost that is not publickly displayed. The one is intent upon realities, the other upon semblances: the one aims to *be* virtuous, the other to *appear* so.”—ROBERT HALL: *Sermon on Modern Infidelity*.

13. *From Washington’s Farewell Address.—Example written in 1796.*

“Of all the dispositions and habits which lead to political prosperity, Religion and Morality are indispensable supports. In vain would that man claim the tribute of patriotism, who should labour to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and cherish them. A volume could not trace all their connexions with private and publick felicity. Let it simply be asked, where is the security for property, for reputation, for life, if the sense of religious obligation desert the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition, that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of a peculiar structure; reason and experience both forbid us to expect that national morality can prevail in exclusion of religious principle.”—GEORGE WASHINGTON.

14. *From Dr. Johnson’s Life of Addison.—Example written about 1780.*

“That he always wrote as he would think it necessary to write now, cannot be affirmed; his instructions were such as the character of his readers made proper. That general knowledge which now circulates in common talk, was in his time rarely to be found. Men not professing learning, were not ashamed of ignorance; and in the female world, any acquaintance with books was distinguished only to be censured. His purpose was to infuse literary curiosity, by gentle and unsuspected conveyance, into the gay, the idle, and the wealthy; he therefore presented knowledge in the most alluring form, not lofty and austere, but accessible and familiar. When he shewed them their defects, he shewed them likewise that they might easily be supplied. His attempt succeeded; inquiry was awakened, and comprehension expanded. An emulation of intellectual elegance was excited, and from this time to our own, life has been gradually exalted, and conversation purified and enlarged.”—SAMUEL JOHNSON: *Lives*, p. 321.

15. *Reign of George II, 1760 back to 1727.—Example written in 1751.*

“We Britons in our time have been remarkable borrowers, as our *multiform* Language may sufficiently shew. Our Terms in *polite Literature* prove, that this came from *Greece*; our terms in *Music* and *Painting*, that these came from *Italy*; our Phrases in *Cookery* and *War*, that we learnt these from the French; and our phrases in *Navigation*, that we were taught by the *Flemings* and *Low Dutch*. These many and very different Sources of our Language may be the cause, why it is so deficient in *Regularity* and *Analogy*. Yet we have this advantage to compensate the defect, that what we want in *Elegance*, we gain in *Copiousness*, in which last respect few Languages will be found superior to our own.”—JAMES HARRIS: *Hermes*, Book iii, Ch. v, p. 408.

16. *Reign of George I, 1727 back to 1714.—Example written about 1718.*

“There is a certain coldness and indifference in the phrases of our European languages, when they are compared with the Oriental forms of speech: and it happens very luckily, that the Hebrew idioms ran into the English tongue, with a particular grace and beauty. Our language has received innumerable elegancies and improvements from that infusion of Hebraisms, which are derived to it out of the poetical passages in holy writ. They give a force and energy to our expressions, warm and animate our language,

and convey our thoughts in more ardent and intense phrases, than any that are to be met with in our tongue.”—JOSEPH ADDISON: *Evidences*, p. 192.

17. *Reign of Queen Anne*, 1714 to 1702.—*Example written in 1708.*

“Some by old words to Fame have made pretence,  
 Ancients in phrase, mere moderns in their sense;  
 Such labour’d nothings, in so strange a style,  
 Amaze th’ unlearn’d, and make the learned smile.”  
 “In words, as fashions, the same rule will hold;  
 Alike fantastick, if too new or old:  
 Be not the first by whom the new are try’d,  
 Nor yet the last to lay the old aside.”

ALEXANDER POPE: *Essay on Criticism*, l. 324-336.

### III. ENGLISH OF THE SEVENTEENTH CENTURY.

18. *Reign of William III*, 1702 to 1689.—*Example published in 1700.*

“And when we see a Man of *Milton’s* Wit *Chime* in with such a *Herd*, and Help on the *Cry* against *Hirelings*! We find How Easie it is for *Folly* and *Knavery* to Meet, and that they are Near of Kin, tho they bear Different Aspects. Therefor since *Milton* has put himself upon a *Level* with the *Quakers* in this, I will let them go together. And take as little Notice of his *Buffoonry*, as of their *Dulnefs* against *Tythes*. Ther is nothing worth *Quoting* in his *Lampoon* against the *Hirelings*. But what ther is of *Argument* in it, is fully Confider’d in what follows.”—CHARLES LESLIE: *Divine Right of Tithes, Pref.*, p. xi.

19. *Reign of James II*, 1689 back to 1685.—*Example written in 1685.*

“His conversation, wit, and parts,  
 His knowledge in the noblest useful arts,  
 Were such, dead authors could not give;  
 But habitudes of those who live;  
 Who, lighting him, did greater lights receive:  
 He drain’d from all, and all they knew;  
 His apprehension quick, his judgment true:  
 That the most learn’d with shame confess  
 His knowledge more, his reading only less.”

JOHN DRYDEN: *Ode to the Memory of Charles II; Poems*, p. 84.

20. *Reign of Charles II*, 1685 to 1660.—*Example from a Letter to the Earl of Sunderland, dated, “Philadelphia, 28th 5th mo. July, 1683.”*

“And I will venture to say, that by the help of God, and such noble Friends, I will show a Province in seven years, equal to her neighbours of forty years planting. I have lay’d out the Province into Countys. Six are begun to be seated; they lye on the great river, and are planted about six miles back. The town platt is a mile long, and two deep,—has a navigable river on each side, the least as broad as the Thames at Woolwych, from three to eight fathom water. There is built about eighty houses, and I have settled at least three hundred farmes contiguous to it.”—WILLIAM PENN: *The Friend*, Vol. vii, p. 179.

21. *From an Address or Dedication to Charles II.*—*Written in 1675.*

“There is no [other] king in the world, who can so experimentally testify of God’s providence and goodness; neither is there any [other], who rules so many free people, so many true Christians: which thing renders thy government more honourable, thyself more considerable, than the accession of many nations filled with slavish and superstitious souls.”—ROBERT BARCLAY: *Apology*, p. viii.

22. The following example, from the commencement of *Paradise Lost*, first published in 1667, has been cited by several authors, to show how large a proportion of our language is of Saxon origin. The thirteen words in Italics are the only ones in this passage, which seem to have been derived from any other source.

“Of man’s first *disobedience*, and the *fruit*  
Of that forbidden tree, whose *mortal* taste  
Brought death into the world, and all our woe,  
With loss of *Eden*; till one greater Man  
*Restore* us, and *regain* the blissful *seat*,  
Sing, heav’nly *Muse*, that on the *secret* top  
Of *Oreb*, or of *Sinai*, didst *inspire*  
That shepherd, who first taught the chosen seed,  
In the beginning, how the Heav’ns and Earth  
Rose out of *Chaos*.”—MILTON: *Paradise Lost*, Book I.

23. *Examples written during Cromwell’s Protectorate*, 1660 to 1650.

“The Queene was pleased to shew me the letter, the seale beinge a Roman eagle, havinge characters about it almost like the Greeke. This day, in the afternoone, the vice-chauncellor came to me and stayed about four hours with me; in which tyme we conversed upon the longe debates.”—WHITELOCKE. *Bucke’s Class. Gram.*, p. 149.

“I am yet heere, and have the States of Holland ingaged in a more than ordnary maner, to procure me audience of the States Generall. Whatever happen, the effects must needes be good.”—STRICKLAND: *Bucke’s Classical Gram.*, p. 149.

24. *Reign of Charles I*, 1648 to 1625.—*Example from Ben Jonson’s Grammar, written about 1634; but the orthography is more modern.*

“The second and third person singular of the present are made of the first, by adding *est* and *eth*; which last is sometimes shortened into *s*. It seemeth to have been poetical licence which first introduced this abbreviation of the third person into use; but our best grammarians have condemned it upon some occasions, though perhaps not to be absolutely banished the common and familiar style.”

“The persons plural keep the termination of the first person singular. In former times, till about the reign of Henry the eighth, they were wont to be formed by adding *en*; thus, *loven*, *sayen*, *complainen*. But now (whatever is the cause) it hath quite grown out of use, and that other so generally prevailed, that I dare not presume to set this afoot again: albeit (to tell you my opinion) I am persuaded that the lack hereof well considered, will be found a great blemish to our tongue. For seeing *time* and *person* be, as it were, the right and left hand of a verb, what can the maiming bring else, but a lameness to the whole body?”—*Book i*, Chap. xvi.

25. *Reign of James I*, 1625 to 1603.—*From an Advertisement, dated 1608.*

"I svppose it altogether needlesse (Christian Reader) by commending M. *VWilliam Perkins*, the Author of this booke, to wooe your holy affection, which either himselfe in his life time by his Christian conversation hath woon in you, or sithence his death, the neuer-dying memorie of his excellent knowledge, his great humilitie, his sound religion, his feruent zeale, his painefull labours, in the Church of God, doe most iustly challenge at your hands: onely in one word, I dare be bold to say of him as in times past *Nazianzen* spake of *Athanasius*. His life was a good definition of a true minister and preacher of the Gospell."—*The Printer to the Reader*.

26. *Examples written about the end of Elizabeth's reign*—1603.

"Some say, That euer 'gainst that season comes  
Wherein our Saviour's Birth is celebrated,  
The Bird of Dawning singeth all night long;  
And then, say they, no Spirit dares walk abroad:  
The nights are wholsom, then no Planets strike,  
No Fairy takes, nor Witch hath pow'r to charm;  
So hallow'd and so gracious is the time."

SHAKSPEARE: *Hamlet*.

"The sea, with such a storme as his bare head  
In hell-blacke night indur'd, would haue buoy'd up  
And quench'd the stelled fires.  
Yet, poore old heart, he holpe the heuens to raine.  
If wolues had at thy gate howl'd that sterne time,  
Thou shouldst haue said, Good porter, turne the key."

SHAKSPEARE: *Lear*.

#### IV. ENGLISH OF THE SIXTEENTH CENTURY.

27. *Reign of Elizabeth*, 1603 *back to* 1558.—*Example written in* 1592.

"As for the soule, it is no accidentarie qualitie, but a spirituall and inuisible essence or nature, subsisting by it selfe. Which plainly appears in that the soules of men haue beeing and continuance as well forth of the bodies of men as in the same; and are as wel subiect to torments as the bodie is. And whereas we can and doe put in practise sundrie actions of life, sense, motion, vnderstanding, we doe it onely by the power and vertue of the soule. Hence ariseth the difference betweene the soules of men, and beasts. The soules of men are substances: but the soules of other creatures seeme not to be substances; because they haue no beeing out of the bodies in which they are."—WILLIAM PERKINS: *Theol. Works*, folio, p. 155.

28. *Examples written about the beginning of Elizabeth's reign*.—1558.

"Who can perswade, when treason is aboue reason; and mighte ruleth righte; and it is had for lawfull, whatsoever is lustfull; and commotioners are better than commissioners; and common woe is named common weale?"—SIR JOHN CHEKE.

"If a yong gentleman will venture him selfe into the companie of ruffians, it is over great a jeopardie, lest their facions, maners, thoughts, taulke, and dedes, will verie sone be over like."—ROGER ASCHAM.

29. *Reign of Mary the Bigot*, 1558 *to* 1553.—*Example written about* 1555.

“And after that Philosophy had spoken these wordes the said companye of the musys poetically beyng rebukyd and sad, caste downe their countenance to the ground, and by blussing confessed their shamefastnes, and went out of the doores. But I (that had my syght dull and blynd wyth wepyng, so that I knew not what woman this was hauyng soo great auctoritie) was amasyd or astonyed, and lokyng downeward, towarde the ground, I began pryvyle to look what thyng she would save ferther.”—COLVILLE: *Version from Boëthius: Johnson’s Hist. of E. L.*, p. 29.

30. *Example referred by Dr. Johnson to the year 1553.*

“Pronunciation is an apte ordering bothe of the voyce, countenance, and all the whole bodye, accordyng to the worthineia of such woordes and mater as by speache are declared. The vse hereof is suche for anye one that liketh to haue prayse for tellynge his tale in open assemblie, that hauing a good tongue, and a comelye countenance, he shal be thought to passe all other that haue not the like vtteraunce: though they have muche better learning.”—DR. WILSON: *Johnson’s Hist. E. L.*, p. 45.

31. *Reign of Edward VI, 1553 to 1547.—Example written about 1550.*

“Who that will followe the graces manyfolde  
Which are in vertue, shall finde auancement:  
Wherefore ye fooles that in your sinne are bolde,  
Ensue ye wisdom, and leaue your lewde intent,  
Wisdom is the way of men most excellent:  
Therefore haue done, and shortly spede your pace,  
To quaynt your self and company with grace.”

ALEXANDER BARCLAY: *Johnson’s Hist. E. L.*, p. 44.

32. *Reign of Henry VIII, 1547 to 1509.—Example dated 1541.*

“Let hym that is angry euen at the fyrste consyder one of these thinges, that like as he is a man, so is also the other, with whom he is angry, and therefore it is as lefull for the other to be angry, as unto hym: and if he so be, than shall that anger be to hym displeasent, and stere hym more to be angrie.”—SIR THOMAS ELLIOTT: *Castel of Helthe*.

33. *Example of the earliest English Blank Verse; written about 1540.*

The supposed author died in 1541, aged 38. The piece from which these lines are taken describes the death of *Zoroas*, an Egyptian astronomer, slain in Alexander’s first battle with the Persians.

“The Persians waild such sapience to foregoe;  
And very sone the Macedonians wisht  
He would have lived; king Alexander selfe  
Demde him a man unmete to dye at all;  
Who wonne like praise for conquest of his yre,  
As for stoute men in field that day subdued,  
Who princes taught how to discerne a man,  
That in his head so rare a jewel beares;  
But over all those same Camenes,\* those same

---

\* *Camenes*, the *Muses*, whom Horace called *Camænæ*. The former is an English plural from the latter, or from the Latin word *camena*, a muse or song. These lines are copied from Dr. Johnson’s History of the English Language; their *orthography* is, in some respects, *too modern* for the age to which they are assigned.

Divine Camenes, whose honour he procurde,  
 As tender parent doth his daughters weale,  
 Lamented, and for thankes, all that they can,  
 Do cherish hym deceast, and sett hym free,  
 From dark oblivion of devouring death."

*Probably written by* SIR THOMAS WYAT.

34. *A Letter written from prison, with a coal.* The writer, *Sir Thomas More*, whose works, both in prose and verse, were considered models of pure and elegant style, had been Chancellor of England, and the familiar confidant of Henry VIII, by whose order he was beheaded in 1535.

"Myne own good doughter, our Lorde be thanked I am in good helthe of bodye, and in good quiet of minde: and of worldly thynges I no more desyer then I haue. I beseche hym make you all mery in the hope of heauen. And such thynges as I somewhat longed to talke with you all, concerning the worlde to come, our Lorde put them into your myndes, as I truste he doth and better to by hys holy spirite: who blesse you and preserue you all. Written wyth a cole by your tender louing father, who in hys pore prayers forgetteth none of you all, nor your babes, nor your nources, nor your good husbandes, nor your good husbandes shrewde wyues, nor your fathers shrewde wyfe neither, nor our other frendes. And thus fare ye hartely well for lacke of paper. THOMAS MORE, knight."—*Johnson's Hist.* E. Lang., p. 42.

35. *From More's Description of Richard III.—Probably written about* 1520.

"Richarde the third sonne, of whom we nowe entreate, was in witte and courage egall with either of them, in bodye and prowesse farre vnder them bothe, little of stature, ill fetured of limmes, croke backed, his left shoulder much higher than his right, hard fauoured of visage, and such as is in states called warlye, in other menne otherwise, he was malicious, wrathfull, enuious, and from afore his birth euer frowarde. \* \* \* Hee was close and secrete, a deep dissimuler, lowlye of counteynaunce, arrogant of heart—dispitious and cruell, not for euill will alway, but after for ambicion, and either for the suretie and encrease of his estate. Frende and foe was muche what indifferent, where his aduauntage grew, he spared no mans deathe, whose life withstoode his purpose. He slew with his owne handes king Henry the sixt, being prisoner in the Tower."—SIR THOMAS MORE: *Johnson's History of the English Language*, p. 39.

36. *From his description of Fortune, written about the year* 1500.

"Fortune is stately, solemne, prowde, and hye:  
 And rychesse geueth, to haue seruyce therefore.  
 The nedy begger catcheth an half peny:  
 Some manne a thousaude pounce, some lesse some more.  
 But for all that she kepeth euer in store,  
 From euery manne some parcell of his wyll,  
 That he may pray therefore and serve her styll.  
 Some manne hath good, but chyldren hath he none.  
 Some manne hath both, but he can get none health.  
 Some hath al thre, but vp to honours trone,  
 Can he not crepe, by no maner of stelth.  
 To some she sendeth chyldren, ryches, welthe,

Honour, woorshyp, and reuerence all hys lyfe:  
But yet she pyncheth hym with a shrewde wife.”

SIR THOMAS MORE.

## V. ENGLISH OF THE FIFTEENTH CENTURY.

37. *Example for the reign of Henry VII, who was crowned on Bosworth field, 1485, and who died in 1509.*

“Wherefor and forasmoche as we haue sent for our derrest wif, and for our derrest moder, to come unto us, and that we wold have your advis and counsail also in soche matters as we haue to doo for the subduying of the rebelles, we praie you, that, yeving your due attendaunce vppon our said derrest wif and lady moder, ye come with thaym unto us; not failing herof as ye purpose to doo us plaisir. Yeven undre our signett, at our Castell of Kenelworth, the xiii daie of Maye.”—HENRY VII: *Letter to the Earl of Ormond: Bucke’s Classical Gram.*, p. 147.

38. *Example for the short reign of Richard III,—from 1485 to 1483.*

“Right reverend fader in God, right trusty and right wel-beloved, we grete yow wele, and wol and charge you that under oure greate seale, being in your warde, ye do make in all haist our lettres of proclamation severally to be directed unto the shirrefs of everie countie within this oure royaume.”—RICHARD III: *Letter to his Chancellor.*

39. *Reign of Edward IV,—from 1483 to 1461.—Example written in 1463.*

“Forasmoche as we by divers meanes bene credibly enformed and undarstand for certyne, that owr greate adversary Henry, naminge hym selfe kynge of England, by the malicious counseyle and exitacion of Margaret his wife, namynge hir selfe queane of England, have conspired,” &c.—EDWARD IV: *Letter of Privy Seal.*

40. *Examples for the reign of Henry VI,—from 1461 back to 1422.*

“When Nembroth [i.e. *Nimrod*] by Might, for his own Glorye, made and incorporate the first Realme, and subduyd it to hymself by Tyrannye, he would not have it governyd by any other Rule or Lawe, but by his own Will; by which and for th’ accomplishment thereof he made it. And therefor, though he had thus made a Realme, holy Scripture denyd to cal hym a Kyng, *Quia Rex dicitur a Regendo*; Whych thyng he did not, but oppressyd the People by Myght.”—SIR JOHN FORTESCUE.

41. *Example from Lydgate, a poetical Monk, who died in 1440.*

“Our life here short of wit the great dulnes  
The heuy soule troubled with trauayle,  
And of memorye the glasyng brotelnes,  
Drede and vncunning haue made a strong batail  
With werines my spirite to assayle,  
And with their subtil creping in most queint  
Hath made my spirit in makynge for to feint.”

JOHN LYDGATE: *Fall of Princes*, Book III, Prol.

42. *Example for the reign of Henry V,—from 1422 back to 1413.*

“I wolle that the Duc of Orliance be kept stille withyn the Castil of Pontefret, with owte goyng to Robertis place, or to any other disport, it is better he lak his disport then we were disceyved. Of all the remanant dothe as ye thenketh.”—*Letter of* HENRY V.

43. *Example for the reign of Henry IV,—from 1413 back to 1400.*

“Right heigh and myghty Prynce, my goode and gracious Lorde,—I recommaund me to you as lowly as I kan or may with all my pouer hert, desiryng to hier goode and gracious tydynges of your worshipful astate and welfare.”—LORD GREY: *Letter to the Prince of Wales: Bucke’s Classical Gram.*, p. 145.

## VI. ENGLISH OF THE FOURTEENTH CENTURY.

44. *Reign of Richard II, 1400 back to 1377.—Example written in 1391.*

“Lytel Lowys my sonne, I perceve well by certaine evidences thyne abylyte to lerne scyences, touching nombres and proporcions, and also well consydre I thy besye prayer in especyal to lerne the trefyse of the *astrolabye*. Than for as moche as a philosopher saithe, he wrapeth hym in his frende, that condiscendeth to the ryghtfull prayers of his frende: therefore I have given the a sufficient astrolabye for oure orizont, compowned after the latitude of Oxenforde: vpon the whiche by meditacion of this lytell tretise, I purpose to teche the a certame nombre of conclusions, pertaynyng to this same instrument.”—GEOFFREY CHAUCER: *Of the Astrolabe*.

45. *Example written about 1385—to be compared with that of 1555, on p. 87.*

“And thus this companie of muses iblamed casten wrothly the chere downward to the yerth, and shewing by rednesse their shame, thei passeden sorowfully the threshold. And I of whom the sight plounged in teres was darked, so that I ne might not know what that woman was, of so Imperial auctoritie, I woxe all abashed and stonied, and cast my sight doune to the yerth, and began still for to abide what she would doen afterward.”—CHAUCER: *Version from Boëthius: Johnson’s Hist. of E. L.*, p. 29.

46. *Poetical Example—probably written before 1380.*

“O Socrates, thou stedfast champion;  
 She ne might nevyr be thy turmentour,  
 Thou nevyr dreddist her oppression,  
 Ne in her chere foundin thou no favour,  
 Thou knewe wele the disceipt of her colour,  
 And that her moste worship is for to lie,  
 I knowe her eke a false dissimulour,  
 For finally Fortune I doe defie.”—CHAUCER.

47. *Reign of Edward III, 1377 to 1327.—Example written about 1360.*

“And eke full ofte a littell skare  
 Vpon a banke, er men be ware,  
 Let in the streme, whiche with gret peine,  
 If any man it shall restreine.  
 Where lawe failleth, errour groweth;  
 He is not wise, who that ne troweth.”—SIR JOHN GOWER.

48. *Example from Mandeville, the English traveller—written in* 1356.

“And this sterre that is toward the Northe, that wee clepen the lode sterre, ne apperethe not to hem. For whiche cause, men may wel perceyve, that the lond and the see ben of rownde schapp and forme. For the partie of the firmament schewethe in o contree, that schewethe not in another contree. And men may well preuen be experience and sotyle compassement of wytt, that zif a man fond passages be schippes, that wolde go to serchen the world, men mighte go be schippe all aboute the world, and aboven and benethen. The whiche thing I prove thus, aftre that I have seyn. \* \* \* Be the whiche I seye zou certeynly, that men may envirowne alle the erthe of alle the world, as wel undre as aboven, and turnen azen to his contree, that hadde companye and schippyng and conduyt: and alle weyes he scholde fynde men, londes, and yles, als wel as in this contree.”—SIR JOHN MANDEVILLE; *Johnson’s Hist. of E. L.*, p. 26.

49. *Example from Rob. Langland’s “Vision of Pierce Ploughman,”* 1350.

“In the somer season,  
When hot was the Sun,  
I shope me into shroubs,  
As I a shepe were;  
In habit as an harmet,  
Vnholy of werkes,  
Went wyde in this world  
Wonders to heare.”

50. *Description of a Ship—referred to the reign of Edward II:* 1327-1307.

“Such ne saw they never none,  
For it was so gay begone,  
Every nayle with gold ygrave,  
Of pure gold was his sklave,  
Her mast was of ivory,  
Of samyte her sayle wytly,  
Her robes all of whyte sylk,  
As whyte as ever was ony mylke.  
The noble ship was without  
With clothes of gold spread about  
And her loft and her wyndlance  
All of gold depaynted was.”

ANONYMOUS: *Bucke’s Gram.*, p. 143.

51. *From an Elegy on Edward I, who reigned till* 1307 *from* 1272.

“Thah mi tonge were made of stel,  
Ant min herte yzote of bras,  
The goodness myht y never telle,  
T hat with kyng Edward was:  
Kyng, as thou art cleped conquerour,  
In uch bataille thou hadest prys;  
God bringe thi soule to the honour,  
That ever wes ant ever ys.

Now is Edward of Carnavan  
 Kyng of Engelond al aplyght;  
 God lete him never be worse man  
 Then his fader, ne lasse myht,  
 To holden his pore men to ryht,  
 Ant understonde good counsail,  
 Al Engelond for to wysse and dyht;  
 Of gode knyhtes darh him nout fail.”  
 ANON.: *Percy's Reliques*, Vol. ii, p. 10.

## VII. ENGLISH OF THE THIRTEENTH CENTURY.

52. *Reign of Henry III*, 1272 to 1216.—*Example from an old ballad entitled Richard of Almaine*; which Percy says was “made by one of the adherents of Simon de Montfort, earl of Leicester, soon after the battle of Lewes, which was fought, May 14, 1264.”—*Percy's Reliques*, Vol. ii.

“Sitteth alle stille, and herkneth to me;  
 The kyng of Almaine, bi mi leaute,  
 Thritti thousent pound askede he  
 For te make the pees in the countre,  
 Ant so he dude more.  
 Richard, thah thou be ever trichard,  
 Trichten shalt thou never more.”

53. In the following examples, I substitute Roman letters for the Saxon. At this period, we find the characters mixed. The style here is that which Johnson calls “a kind of intermediate diction, neither Saxon nor English.” Of these historical rhymes, by *Robert of Gloucester*, the Doctor gives us more than two hundred lines; but he dates them no further than to say, that the author “is placed by the criticks in the thirteenth century.”—*Hist. of Eng. Lang.*, p. 24.

“Alfred thys noble man, as in the ger of grace he nom  
 Eygte hondred and syxty and tuelue the kyndom.  
 Arst he adde at Rome ybe, and, vor ys grete wysdom,  
 The pope Leo hym blessedde, tho he thuder com,  
 And the kynges croune of hys lond, that in this lond gut ys:  
 And he led hym to be kyng, ar he kyng were y wys.  
 An he was kyng of Engelond, of alle that ther come,  
 That vorst thus ylad was of the pope of Rome,  
 An suththe other after hym of the erchebyssopes echon.”

“Clere he was god ynou, and gut, as me telleth me,  
 He was more than ten ger old, ar he couthe ys abece.  
 Ac ys gode moder ofte smale gyftes hym tok,  
 Vor to byleue other pie, and loky on ys boke.  
 So that by por clergye ys rygt lawes he wonde,  
 That neuere er nere y mad to gouerny ys lond.”

ROBERT OF GLOUCESTER: *Johnson's Hist. of E. L.*, p. 25.

54. *Reign of John*, 1216 back to 1199.—*Subject of Christ's Crucifixion*.

Bot grasse and flure and greneris.  
 Thoy ther be ioi and gret dute.  
 Ther nis met bot ænlic frute.  
 Ther nis halle bure no bench.  
 Bot watir manis thurst to quench.”

ANON.: *Johnson's Hist. Eng. Lang.*, p. 23.

59. *Reign of Henry I, 1135 to 1100.—Part of an Anglo-Saxon Hymn.*

“Heuene & erthe & all that is,  
 Biloken is on his honde.  
 He deth al that his wille is,  
 On sea and ec on londe.

He is orde albuten orde.  
 And ende albuten ende.  
 He one is eure on eche stede,  
 Wende wer thu wende.

He is buuen us and binethen,  
 Biuoren and ec bihind.  
 Se man that Godes wille deth,  
 He mai hine aihwar uinde.

Eche rune he iherth,  
 And wot eche dede.  
 He durh sighth eches ithanc,  
 Wai hwat sel us to rede.

Se man neure nele don god,  
 Ne neure god lif leden,  
 Er deth & dom come to his dure,  
 He mai him sore adreden.

Hunger & thurst, hete & chele,  
 Ecthe and all unhelthe,  
 Durh deth com on this midelard,  
 And other uniselthe.

Ne mai non herte hit ithenche,  
 Ne no tunge telle,  
 Hu muchele pinum and hu uele,  
 Bieth inne helle.

Louie God mid ure hierte,  
 And mid all ure mihte,  
 And ure emcristene swo us self,  
 Swo us lereth drihte.”

ANON.: *Johnson's Hist. Eng. Lang.*, p. 21.

**IX. ANGLO-SAXON OF THE ELEVENTH CENTURY, COMPARED WITH ENGLISH.**60. *Saxon*.—11<sup>th</sup> *Century*.\***LUCÆ, CAP. I.**

“5. On Herodes dagum Iudea cynincges, wæs sum sacred on naman Zacharias, of Abian tune: and his wif wæs of Aarones dohtrum, and hyre nama waas Elizabeth.

6. Sothlice hig wæron butu rihtwise beforan Gode, gangende on eallum his bebodum and rihtwisnessum, butan wrohte.

7. And hig næfdon nan bearn, fortham the Elizabeth wæs unberende; and hy on hyra dagum butu forth-eodun.

8. Sothlice wæs geworden tha Zacharias hys sacerdhades breac on his gewrixles endebyrðnesse beforan Gode,

9. Æfter gewunan thæs sacerdhades hlotes, he eode that he his offrunge sette, tha he on Godes tempel eode.

10. Eall werod thæs folces wæs ute gebiddende on thære offrunge timan.

11. Tha ætywde him Drihtnes engel standende on thæs weofodes swithran healfe.

12. Tha weard Zacharias gedrefed that geseonde, and him ege onhreas.

*English*.—14<sup>th</sup> *Century*.**LUK, CHAP. I.**

“5. In the dayes of Eroude kyng of Judee ther was a prest Zacarye by name, of the sort of Abia: and his wyf was of the doughtris of Aaron, and hir name was Elizabeth.

6. And bothe weren juste bifore God, goynge in alle the maundementis and justifyingis of the Lord, withouten playnt.

7. And thei hadden no child, for Elizabeth was bareyn; and bothe weren of greet age in her dayes.

8. And it befel that whanne Zacarye schould do the office of presthod in the ordir of his course to fore God,

9. Aftir the custom of the presthood, he wente forth by lot, and entride into the temple to encensen.

10. And al the multitude of the puple was without forth and preyede in the our of encensying.

11. And an aungel of the Lord apperide to him, and stood on the right half of the auter of encense. 12. And Zacarye seyinge was afrayed, and drede fel upon him.

13. And the aungel sayde to him, Zacarye, drede thou not; for thy preier is herd, and Elizabeth thi wif schal bere to thee a sone, and his name schal be clepid Jon.”

*English*.—17<sup>th</sup> *Century*.**LUKE, CHAP. I.**

“5. There was in the days of Herod the king of Judea, a certain priest named Zacharias, of the course of Abia: and his wife was of the daughters of Aaron, and her name was Elisabeth.

6. And they were both righteous before God, walking in all the commandments and ordinances of the Lord, blameless.

7. And they had no child, because that Elisabeth was barren; and they both were now well stricken in years.

8. And it came to pass, that while he executed the priest's office before God in the order of his course,

9. According to the custom of the priest's office, his lot was to burn incense when he went into the temple of the Lord.

10. And the whole multitude of the people were praying without at the time of incense.

11. And there appeared unto him an angel of the Lord, standing on the right side of the altar of incense.

12. And when Zacharias saw him, he was troubled, and fear fell upon him.

13. But the angel said unto him, Fear not, Zacharias; for thy prayer is heard, and thy wife

\* The Saxon characters being known nowadays to but very few readers, I have thought proper to substitute for them, in the latter specimens of this chapter, the Roman; and, as the old use of colons and periods for the smallest pauses, is liable to mislead a common observer, the punctuation too has here been modernized.

is gehyred, and thin wif  
Elizabeth the sunu centh,  
and thu nemst hys naman  
Johannes.”

*Wickliffe's Bible*, 1380.

Elisabeth shall bear thee a  
son, and thou shall call his  
name John.”

*Common Bible*, 1610.

See Dr. Johnson's History of the English Language, in his Quarto Dictionary.

## X. ANGLO-SAXON IN THE TIME OF KING ALFRED.

61. Alfred the Great, who was the youngest son of Ethelwolf, king of the West Saxons, succeeded to the crown on the death of his brother Ethelred, in the year 871, being then twenty-two years old. He had scarcely time to attend the funeral of his brother, before he was called to the field to defend his country against the Danes. After a reign of more than twenty-eight years, rendered singularly glorious by great achievements under difficult circumstances, he died universally lamented, on the 28th of October, A.D. 900. By this prince the university of Oxford was founded, and provided with able teachers from the continent. His own great proficiency in learning, and his earnest efforts for its promotion, form a striking contrast with the ignorance which prevailed before. “In the ninth century, throughout the whole kingdom of the West Saxons, no man could be found who was scholar enough to instruct the young king Alfred, then a child, even in the first elements of reading: so that he was in his twelfth year before he could name the letters of the alphabet. When that renowned prince ascended the throne, he made it his study to draw his people out of the sloth and stupidity in which they lay; and became, as much by his own example as by the encouragement he gave to learned men, the great restorer of arts in his dominions.”—*Life of Bacon*.

62. The language of eulogy must often be taken with some abatement: it does not usually present things in their due proportions. How far the foregoing quotation is true, I will not pretend to say; but what is called “the revival of learning,” must not be supposed to have begun at so early a period as that of Alfred. The following is a brief specimen of the language in which that great man wrote; but, printed in Saxon characters, it would appear still less like English.

“On thære tide the Gotan of Siththiu mægthe with Romana rice gewin upahofon. and mith heora cyningum. Rædgota and Eallerica wæron hatne. Romane burig abraecon. and eall Italia rice that is betwux tham muntum and Sicilia tham ealonde in anwald gerehton. and tha ægter tham foresprecenan cyningum Theodric feng to tham ilcan rice se Theodric wæs Amulinga. he wass Cristen. theah he on tham Arrianiscan gedwolan durhwunode. He gehet Romanum his freondscype. swa that hi mostan heora ealdricha wyrthe beon.”—KING ALFRED: *Johnson's Hist. of E. L.*, 4to Dict., p. 17.

## CHAPTER VIII.

### OF THE GRAMMATICAL STUDY OF THE ENGLISH LANGUAGE.

“Grammatica quid est? ars rectè scribendi rectèque loquendi; poetarum enarrationem continens; omnium Scientiarum fons uberrimus. \* \* \* Nostra ætas parum perita rerum veterum, nimis brevi gyro grammaticum sepsit; at apud antiques olim tantum auctoritatis hic ordo habuit, ut censores essent et judices scriptorum omnium soli grammatici; quos ob id etiam Criticos vocabant.”—DESPAUTER. *Præf. ad Synt*, fol. 1.

1. Such is the peculiar power of language, that there is scarcely any subject so trifling, that it may not thereby be plausibly magnified into something great; nor are there many things which cannot be ingeniously disparaged till they shall seem contemptible. Cicero goes further: “Nihil est tam incredibile quod non dicendo fiat probabile;”—“There is nothing so incredible that it may not by the power of language be made probable.” The study of grammar has been often overrated, and still oftener injuriously decried. I shall neither join with those who would lessen in the public esteem that general system of doctrines, which from time immemorial has been taught as grammar; nor attempt, either by magnifying its practical results, or by decking it out with my own imaginings, to invest it with any artificial or extraneous importance.

2. I shall not follow the footsteps of *Neef*, who avers that, “Grammar and incongruity are identical things,” and who, under pretence of reaching the same end by better means, scornfully rejects as nonsense every thing that others have taught under that name; because I am convinced, that, of all methods of teaching, none goes farther than his, to prove the reproachful assertion true. Nor shall I imitate the declamation of *Cardell*; who, at the commencement of his Essay, recommends the general study of language on earth, from the consideration that, “The faculty of speech is the medium of social bliss for superior intelligences in an eternal world;” \* and who, when he has exhausted censure in condemning the practical instruction of others, thus lavishes praise, in both his grammars, upon that formless, void, and incomprehensible theory of his own: “This application of words,” says he, “in their endless use, by one plain rule, to all things which nouns can name, instead of being the fit subject of blind cavil, *is the most sublime theme presented to the intellect on earth. It is the practical intercourse of the soul at once with its God, and with all parts of his works!*”—*Cardell’s Gram.*, 12mo, p. 87; *Gram.*, 18mo, p. 49.

3. Here, indeed, a wide prospect opens before us; but he who traces science, and teaches what is practically useful, must check imagination, and be content with sober truth.

“For apt the mind or fancy is to rove  
Uncheck’d, and of her roving is no end.”—MILTON.

Restricted within its proper limits, and viewed in its true light, the practical science of grammar has an intrinsic dignity and merit sufficient to throw back upon any man who dares openly assail it, the lasting stigma of folly and self-conceit. It is true, the judgements of men are fallible, and many opinions are liable to be reversed by better knowledge: but what has been long established by the unanimous concurrence of the learned, it can hardly be the part of a wise instructor now to dispute. The literary reformer who, with the last named gentleman, imagines “that the persons to whom the civilized world have looked up to for instruction in language were all wrong alike in the main points,” † intends no middle course of reformation, and must needs be a man either of great merit, or of little modesty.

---

\* Essay on Language, by William S. Cardell, New York, 1825, p. 2. This writer was a great admirer of Horne Tooke, from whom he borrowed many of his notions of grammar, but not this extravagance. Speaking of the words *right* and *just*, the latter says, “They are applicable only to *man*; *to whom alone language belongs*, and of whose sensations only words are the representatives.”—*Diversions of Purley*, Vol. ii, p. 9.

† CARDELL: *Both Grammars*, p. 4.

4. The English language may now be regarded as the common inheritance of about fifty millions of people; who are at least as highly distinguished for virtue, intelligence, and enterprise, as any other equal portion of the earth's population. All these are more or less interested in the purity, permanency, and right use of that language; inasmuch as it is to be, not only the medium of mental intercourse with others for them and their children, but the vehicle of all they value, in the reversion of ancestral honour, or in the transmission of their own. It is even impertinent, to tell a man of any respectability, that the study of this his native language is an object of great importance and interest: if he does not, from these most obvious considerations, feel it to be so, the suggestion will be less likely to convince him, than to give offence, as conveying an implicit censure.

5. Every person who has any ambition to appear respectable among people of education, whether in conversation, in correspondence, in public speaking, or in print, must be aware of the absolute necessity of a competent knowledge of the language in which he attempts to express his thoughts. Many a ludicrous anecdote is told, of persons venturing to use words of which they did not know the proper application; many a ridiculous blunder has been published to the lasting disgrace of the writer; and so intimately does every man's reputation for sense depend upon his skill in the use of language, that it is scarcely possible to acquire the one without the other. Who can tell how much of his own good or ill success, how much of the favour or disregard with which he himself has been treated, may have depended upon that skill or deficiency in grammar, of which, as often as he has either spoken or written, he must have afforded a certain and constant evidence.\*

6. I have before said, that to excel in grammar, is but to know better than others wherein grammatical excellence consists; and, as this excellence, whether in the thing itself, or in him that attains to it, is merely comparative, there seems to be no fixed point of perfection beyond which such learning may not be carried. In speaking or writing to different persons, and on different subjects, it is necessary to vary one's style with great nicety of address; and in nothing does true genius more conspicuously appear, than in the facility with which it adopts the most appropriate expressions, leaving the critic no fault to expose, no word to amend. Such facility of course supposes an intimate knowledge of all words in common use, and also of the principles on which they are to be combined.

7. With a language which we are daily in the practice of hearing, speaking, reading, and writing, we may certainly acquire no inconsiderable acquaintance, without the formal study of its rules. All the true principles of grammar were presumed to be known to the learned, before they were written for the aid of learners; nor have they acquired any independent authority, by being recorded in a book, and denominated grammar. The teaching of them, however, has tended in no small degree to settle and establish the construction of the language, to improve the style of our English writers, and to enable us to ascertain with more clearness the true standard of grammatical purity. He who learns only by rote, may speak the words or phrases which he has thus acquired; and he who has the genius to discern intuitively what is regular and proper, may have further aid from the analogies which he thus discovers; but he who would add to such acquisitions the satisfaction of knowing what is right, must make the principles of language his study.

---

\* "*Quoties dicimus, toties de nobis judicatur.*"—*Cicero*. "As often as we speak, so often are we judged."

8. To produce an able and elegant writer, may require something more than a knowledge of grammar rules; yet it is argument enough in favour of those rules, that without a knowledge of them no elegant and able writer is produced. Who that considers the infinite number of phrases which words in their various combinations may form, and the utter impossibility that they should ever be recognized individually for the purposes of instruction and criticism, but must see the absolute necessity of dividing words into classes, and of showing, by general rules of formation and construction, the laws to which custom commonly subjects them, or from which she allows them in particular instances to deviate? Grammar, or the art of writing and speaking, must continue to be learned by some persons; because it is of indispensable use to society. And the only question is, whether children and youth shall acquire it by a regular process of study and method of instruction, or be left to glean it solely from their own occasional observation of the manner in which other people speak and write.

9. The practical solution of this question belongs chiefly to parents and guardians. The opinions of teachers, to whose discretion the decision will sometimes be left, must have a certain degree of influence upon the public mind; and the popular notions of the age, in respect to the relative value of different studies, will doubtless bias many to the adoption or the rejection of this. A consideration of the point seems to be appropriate here, and I cannot forbear to commend the study to the favour of my readers; leaving every one, of course, to choose how much he will be influenced by my advice, example, or arguments. If past experience and the history of education be taken for guides, the study of English grammar will not be neglected; and the method of its inculcation will become an object of particular inquiry and solicitude. The English language ought to be learned at school or in colleges, as other languages usually are; by the study of its grammar, accompanied with regular exercises of parsing, correcting, pointing, and scanning; and by the perusal of some of its most accurate writers, accompanied with stated exercises in composition and elocution. In books of criticism, our language is already more abundant than any other. Some of the best of these the student should peruse, as soon as he can understand and relish them. Such a course, pursued with regularity and diligence, will be found the most direct way of acquiring an English style at once pure, correct, and elegant.

10. If any intelligent man will represent English grammar otherwise than as one of the most useful branches of study, he may well be suspected of having formed his conceptions of the science, not from what it really is in itself, but from some of those miserable treatises which only caricature the subject, and of which it is rather an advantage to be ignorant. But who is so destitute of good sense as to deny, that a graceful and easy conversation in the private circle, a fluent and agreeable delivery in public speaking, a ready and natural utterance in reading, a pure and elegant style in composition, are accomplishments of a very high order? And yet of all these, the proper study of English grammar is the true foundation. This would never be denied or doubted, if young people did not find, under some other name, better models and more efficient instruction, than what was practised on them for grammar in the school-room. No disciple of an able grammarian can ever speak ill of grammar, unless he belong to that class of knaves who vilify what they despair to reach.

11. By taking proper advantage of the ductility of childhood, intelligent parents and judicious teachers may exercise over the studies, opinions, and habits of youth a strong and salutary control; and it will seldom be found in experience, that those who have been early taught to consider grammatical learning as worthy and manly, will change their

opinion in after life. But the study of grammar is not so enticing that it may be disparaged in the hearing of the young, without injury. What would be the natural effect of the following sentence, which I quote from a late well-written religious homily? “The pedagogue and his dunce may exercise their wits correctly enough, in the way of grammatical analysis, on some splendid argument, or burst of eloquence, or thrilling descant, or poetic rapture, to the strain and soul of which not a fibre in their nature would yield a vibration.”—*New-York Observer*, Vol. ix, p. 73.

12. Would not the bright boy who heard this from the lips of his reverend minister, be apt the next day to grow weary of the parsing lesson required by his schoolmaster? And yet what truth is there in the passage? One can no more judge of the fitness of language, without regard to the meaning conveyed by it, than of the fitness of a suit of clothes, without knowing for whom they were intended. The grand clew to the proper application of all syntactical rules, is *the sense*; and as any composition is faulty which does not rightly deliver the author’s meaning, so every solution of a word or sentence is necessarily erroneous, in which that meaning is not carefully noticed and literally preserved. To parse rightly and fully, is nothing else than to understand rightly and explain fully; and whatsoever is well expressed, it is a shame either to misunderstand or to misinterpret.

13. This study, when properly conducted and liberally pursued, has an obvious tendency to dignify the whole character. How can he be a man of refined literary taste, who cannot speak and write his native language grammatically? And who will deny that every degree of improvement in literary taste tends to brighten and embellish the whole intellectual nature? The several powers of the mind are not so many distinct and separable agents, which are usually brought into exercise one by one; and even if they were, there might be found, in a judicious prosecution of this study, a healthful employment for them all. The *imagination*, indeed, has nothing to do with the elements of grammar; but in the exercise of composition, young fancy may spread her wings as soon as they are fledged; and for this exercise the previous course of discipline will have furnished both language and taste, as well as sentiment.

14. The regular grammatical study of our language is a thing of recent origin. Fifty or sixty years ago, such an exercise was scarcely attempted in any of the schools, either in this country or in England.\* Of this fact we have abundant evidence both from books, and from the testimony of our venerable fathers yet living. How often have these presented this as an apology for their own deficiencies, and endeavoured to excite us to greater diligence, by contrasting our opportunities with theirs! Is there not truth, is there not power, in the appeal? And are we not bound to avail ourselves of the privileges which they have provided, to build upon the foundations which their wisdom has laid, and to carry forward the work of improvement? Institutions can do nothing for us, unless the love of learning preside over and prevail in them. The discipline of our schools can never approach perfection, till those who conduct, and those who frequent them, are strongly actuated by that disposition of mind, which generously aspires to all attainable excellence.

---

\* “Nor had he far to seek for the source of our impropriety in the use of words, when he should reflect that the study of our own language, has never been made a part of the education of our youth. Consequently, the use of words is got wholly by chance, according to the company that we keep, or the books that we read.” SHERIDAN’S ELOCUTION, *Introd.*, p. viii, dated “July 10, 1762,” 2d Amer. Ed.

15. To rouse this laudable spirit in the minds of our youth, and to satisfy its demands whenever it appears, ought to be the leading objects with those to whom is committed the important business of instruction. A dull teacher, wasting time in a school-room with a parcel of stupid or indolent boys, knows nothing of the satisfaction either of doing his own duty, or of exciting others to the performance of theirs. He settles down in a regular routine of humdrum exercises, dreading as an inconvenience even such change as proficiency in his pupils must bring on; and is well content to do little good for little money, in a profession which he honours with his services merely to escape starvation. He has, however, one merit: he pleases his patrons, and is perhaps the only man that can; for they must needs be of that class to whom moral restraint is tyranny, disobedience to teachers, as often right as wrong; and who, dreading the expense, even of a school-book, always judge those things to be cheapest, which cost the least and last the longest. What such a man, or such a neighbourhood, may think of English grammar, I shall not stop to ask.

16. To the following opinion from a writer of great merit, I am inclined to afford room here, because it deserves refutation, and, I am persuaded, is not so well founded as the generality of the doctrines with which it is presented to the public. “Since human knowledge is so much more extensive than the opportunity of individuals for acquiring it, it becomes of the greatest importance so to economize the opportunity as to make it subservient to the acquisition of as large and as valuable a portion as we can. It is not enough to show that a given branch of education is useful: you must show that it is the most useful that can be selected. Remembering this, I think it would be expedient to dispense with the formal study of English grammar,—a proposition which I doubt not many a teacher will hear with wonder and disapprobation. We learn the grammar in order that we may learn English; and we learn English whether we study grammars or not. Especially we *shall* acquire a competent knowledge of our own language, if other departments of our education *were* improved.”

17. “A boy learns more English grammar by joining in an hour’s conversation with educated people, than in poring for an hour over Murray or Horne Tooke. If he is accustomed to such society and to the perusal of well-written books, he will learn English grammar, though he never sees a word about syntax; and if he is not accustomed to such society and such reading, the ‘grammar books’ at a boarding-school will not teach it. Men learn their own language by habit, and not by rules: and this is just what we might expect; for the grammar of a language is itself formed from the prevalent habits of speech and writing. A compiler of grammar first observes these habits, and then makes his rules: but if a person is himself familiar with the habits, why study the rules? I say nothing of grammar as a general science; because, although the philosophy of language be a valuable branch of human knowledge, it were idle to expect that school-boys should understand it. The objection is, to the system of attempting to teach children formally that which they will learn practically without teaching.”—JONATHAN DYMOND: *Essays on Morality*, p. 195.

18. This opinion, proceeding from a man who has written upon human affairs with so much ability and practical good sense, is perhaps entitled to as much respect as any that has ever been urged against the study in question. And so far as the objection bears upon those defective methods of instruction which experience has shown to be inefficient, or of little use, I am in no wise concerned to remove it. The reader of this treatise will find their faults not only admitted, but to a great extent purposely exposed; while an attempt is here made, as well as in my earlier grammars, to introduce a method which it is hoped will

better reach the end proposed. But it may easily be perceived that this author's proposition to dispense with the formal study of English grammar is founded upon an untenable assumption. Whatever may be the advantages of those purer habits of speech, which the young naturally acquire from conversation with educated people, it is not true, that, without instruction directed to this end, they will of themselves become so well educated as to speak and write grammatically. Their language may indeed be comparatively accurate and genteel, because it is learned of those who have paid some attention to the study; but, as they cannot always be preserved from hearing vulgar and improper phraseology, or from seeing it in books, they cannot otherwise be guarded from improprieties of diction, than by a knowledge of the rules of grammar. One might easily back this position by the citation of some scores of faulty sentences from the pen of this very able writer himself.

19. I imagine there can be no mistake in the opinion, that in exact proportion as the rules of grammar are unknown or neglected in any country, will corruptions and improprieties of language be there multiplied. The "general science" of grammar, or "the philosophy of language," the author seems to exempt, and in some sort to commend; and at the same time his proposition of exclusion is applied not merely to the school-grammars, but *a fortiori* to this science, under the notion that it is unintelligible to school-boys. But why should any principle of grammar be the less intelligible on account of the extent of its application? Will a boy pretend that he cannot understand a rule of English grammar, because he is told that it holds good in all languages? Ancient etymologies, and other facts in literary history, must be taken by the young upon the credit of him who states them; but the doctrines of general grammar are to the learner the easiest and the most important principles of the science. And I know of nothing in the true philosophy of language, which, by proper definitions and examples, may not be made as intelligible to a boy, as are the principles of most other sciences. The difficulty of instructing youth in any thing that pertains to language, lies not so much in the fact that its philosophy is above their comprehension, as in our own ignorance of certain parts of so vast an inquiry;—in the great multiplicity of verbal signs; the frequent contrariety of practice; the inadequacy of memory; the inveteracy of ill habits; and the little interest that is felt when we speak merely of words.

20. The grammatical study of our language was early and strongly recommended by Locke,\* and other writers on education, whose character gave additional weight to an opinion which they enforced by the clearest arguments. But either for want of a good grammar, or for lack of teachers skilled in the subject and sensible of its importance, the general neglect so long complained of as a grievous imperfection in our methods of education, has been but recently and partially obviated. "The attainment of a correct and

---

\* "To Write and Speak correctly, gives a Grace, and gains a favourable Attention to what one has to say: And since 'tis *English*, that an English Gentleman will have constant use of, that is the Language he should chiefly Cultivate, and wherein most care should be taken to polish and perfect his Stile. To speak or write better *Latin* than *English*, may make a Man be talk'd of, but he would find it more to his purpose to Express himself well in his own Tongue, that he uses every moment, than to have the vain Commendation of others for a very insignificant quality. This I find universally neglected, and no care taken any where to improve Young Men in their own Language, that they may thoroughly understand and be Masters of it. If any one among us have a facility or purity more than ordinary in his Mother Tongue, it is owing to Chance, or his Genius, or any thing, rather than to his Education or any care of his Teacher. To Mind what *English* his Pupil speaks or writes is below the Dignity of one bred up amongst *Greek* and *Latin*, though he have but little of them himself. These are the learned Languages fit only for learned Men to meddle with and teach: *English* is the Language of the illiterate Vulgar."—Locke, *on Education*, p. 339; *Fourth Ed.*, London, 1699.

elegant style,” says Dr. Blair, “is an object which demands application and labour. If any imagine they can catch it merely by the ear, or acquire it by the slight perusal of some of our good authors, they will find themselves much disappointed. The many errors, even in point of grammar, the many offences against purity of language, which are committed by writers who are far from being contemptible, demonstrate, that a *careful study* of the language is previously requisite, in all who aim at writing it properly.”—*Blair’s Rhetoric*, Lect. ix, p. 91.

21. “To think justly, to write well, to speak agreeably, are the three great ends of academic instruction. The Universities will excuse me, if I observe, that both are, in one respect or other, defective in these three capital points of education. While in Cambridge the general application is turned altogether on speculative knowledge, with little regard to polite letters, taste, or style; in Oxford the whole attention is directed towards classical correctness, without any sound foundation laid in severe reasoning and philosophy. In Cambridge and in Oxford, the art of speaking agreeably is so far from being taught, that it is hardly talked or thought of. *These defects* naturally produce dry unaffecting compositions in the one; superficial taste and puerile elegance in the other; ungracious or affected speech in both.”—DR. BROWN, 1757: *Estimate*, Vol. ii, p. 44.

22. “A grammatical study of our own language makes no part of the ordinary method of instruction, which we pass through in our childhood; and it is very seldom we apply ourselves to it afterward. Yet the want of it will not be effectually supplied by any other advantages whatsoever. Much practice in the polite world, and a general acquaintance with the best authors, are good helps; but alone [they] will hardly be sufficient: We have writers, who have enjoyed these advantages in their full extent, and yet cannot be recommended as models of an accurate style. Much less then will, what is commonly called learning, serve the purpose; that is, a critical knowledge of ancient languages, and much reading of ancient authors: The greatest critic and most able grammarian of the last age, when he came to apply his learning and criticism to an English author, was frequently at a loss in matters of ordinary use and common construction in his own vernacular idiom.”—DR. LOWTH, 1763: *Pref. to Gram.*, p. vi.

23. “To the pupils of our public schools the acquisition of their own language, whenever it is undertaken, is an easy task. For he who is acquainted with several grammars already, finds no difficulty in adding one more to the number. And this, no doubt, is one of the reasons why English engages so small a proportion of their time and attention. It is not frequently read, and is still less frequently written. Its supposed facility, however, or some other cause, seems to have drawn upon it such a degree of neglect as certainly cannot be praised. The students in those schools are often distinguished by their compositions in the learned languages, before they can speak or write their own with correctness, elegance, or fluency. A classical scholar too often has his English style to form, when he should communicate his acquisitions to the world. In some instances it is never formed with success; and the defects of his expression either deter him from appearing before the public at all, or at least counteract in a great degree the influence of his work, and bring ridicule upon the author. Surely these evils might easily be prevented or diminished.”—DR. BARROW: *Essays on Education*, London, 1804; Philad., 1825, p. 87.

24. “It is also said that those who know Latin and Greek generally express themselves with more clearness than those who do not receive a liberal education. It is indeed natural that those who cultivate their mental powers, write with more clearness than the

uncultivated individual. The mental cultivation, however, may take place in the mother tongue as well as in Latin or Greek. Yet the spirit of the ancient languages, further is declared to be superior to that of the modern. I allow this to be the case; but I do not find that the English style is improved by learning Greek. It is known that literal translations are miserably bad, and yet young scholars are taught to translate, word for word, faithful to their dictionaries. Hence those who do not make a peculiar study of their own language, will not improve in it by learning, in this manner, Greek and Latin. Is it not a pity to hear, what I have been told by the managers of one of the first institutions of Ireland, that it was easier to find ten teachers for Latin and Greek, than one for the English language, though they proposed double the salary to the latter? Who can assure us that the Greek orators acquired their superiority by their acquaintance with foreign languages; or, is it not obvious, on the other hand, that they learned ideas and expressed them in their mother tongue?”—DR. SPURZHEIM: *Treatise on Education*, 1832, p. 107.

25. “Dictionaries were compiled, which comprised all the words, together with their several definitions, or the sense each one expresses and conveys to the mind. These words were analyzed and classed according to their essence, attributes, and functions. Grammar was made a rudiment leading to the principles of all thoughts, and teaching by simple examples, the general classification of words and their subdivisions in expressing the various conceptions of the mind. Grammar is then the key to the perfect understanding of languages; without which we are left to wander all our lives in an intricate labyrinth, without being able to trace back again any part of our way.”—*Chazotte’s Essay on the Teaching of Languages*, p. 45. Again: “Had it not been for his dictionary and his grammar, which taught him the essence of all languages, and the natural subdivision of their component parts, he might have spent a life as long as Methuselah’s, in learning words, without being able to attain to a degree of perfection in any of the languages.”—*Ib.*, p. 50. “Indeed, it is not easy to say, to what degree, and in how many different ways, both memory and judgement may be improved by an intimate acquaintance with grammar; which is therefore, with good reason, made the first and fundamental part of literary education. The greatest orators, the most elegant scholars, and the most accomplished men of business, that have appeared in the world, of whom I need only mention Cæsar and Cicero, were not only studious of grammar, but most learned grammarians.”—DR. BEATTIE: *Moral Science*, Vol. i, p. 107.

26. Here, as in many other parts of my work, I have chosen to be liberal of quotations; not to show my reading, or to save the labour of composition, but to give the reader the satisfaction of some other authority than my own. In commending the study of English grammar, I do not mean to discountenance that degree of attention which in this country is paid to other languages; but merely to use my feeble influence to carry forward a work of improvement, which, in my opinion, has been wisely begun, but not sufficiently sustained. In consequence of this improvement, the study of grammar, which was once prosecuted chiefly through the medium of the dead languages, and was regarded as the proper business of those only who were to be instructed in Latin and Greek, is now thought to be an appropriate exercise for children in elementary schools. And the sentiment is now generally admitted, that even those who are afterwards to learn other languages, may best acquire a knowledge of the common principles of speech from the grammar of their vernacular tongue. This opinion appears to be confirmed by that experience which is at once the most satisfactory proof of what is feasible, and the only proper test of what is useful.

27. It must, however, be confessed, that an acquaintance with ancient and foreign literature is absolutely necessary for him who would become a thorough philologist or an accomplished scholar; and that the Latin language, the source of several of the modern tongues of Europe, being remarkably regular in its inflections and systematic in its construction, is in itself the most complete exemplar of the structure of speech, and the best foundation for the study of grammar in general. But, as the general principles of grammar are common to all languages, and as the only successful method of learning them, is, to commit to memory the definitions and rules which embrace them, it is reasonable to suppose that the language most intelligible to the learner, is the most suitable for the commencement of his grammatical studies. A competent knowledge of English grammar is also in itself a valuable attainment, which is within the easy reach of many young persons whose situation in life debars them from the pursuit of general literature.

28. The attention which has lately been given to the culture of the English language, by some who, in the character of critics or lexicographers, have laboured purposely to improve it, and by many others who, in various branches of knowledge, have tastefully adorned it with the works of their genius, has in a great measure redeemed it from that contempt in which it was formerly held in the halls of learning. But, as I have before suggested, it does not yet appear to be sufficiently attended to in the course of what is called a *liberal education*. Compared with, other languages, the English exhibits both excellences and defects; but its flexibility, or power of accommodation to the tastes of different writers, is great; and when it is used with that mastership which belongs to learning and genius, it must be acknowledged there are few, if any, to which it ought on the whole to be considered inferior. But above all, it is *our own*; and, whatever we may know or think of other tongues, it can never be either patriotic or wise, for the learned men of the United States or of England to pride themselves chiefly upon them.

29. Our language is worthy to be assiduously studied by all who reside where it is spoken, and who have the means and the opportunity to become critically acquainted with it. To every such student it is vastly more important to be able to speak and write well in English, than to be distinguished for proficiency in the learned languages and yet ignorant of his own. It is certain that many from whom better things might be expected, are found miserably deficient in this respect. And their neglect of so desirable an accomplishment is the more remarkable and the more censurable on account of the facility with which those who are acquainted with the ancient languages may attain to excellence in their English style. "Whatever the advantages or defects of the English language be, as it is our own language, it deserves a high degree of our study and attention. \* \* \* Whatever knowledge may be acquired by the study of other languages, it can never be communicated with advantage, unless by such as can write and speak their own language well."—DR. BLAIR: *Rhetoric*, Lect. ix, p. 91.

30. I am not of opinion that it is expedient to press this study to much extent, if at all, on those whom poverty or incapacity may have destined to situations in which they will never hear or think of it afterwards. The course of nature cannot be controlled; and fortune does not permit us to prescribe the same course of discipline for all. To speak the language which they have learned without study, and to read and write for the most common purposes of life, may be education enough for those who can be raised no higher. But it must be the desire of every benevolent and intelligent man, to see the advantages of literary, as well as of moral culture, extended as far as possible among the people. And it

is manifest, that in proportion as the precepts of the divine Redeemer are obeyed by the nations that profess his name, will all distinctions arising merely from the inequality of fortune be lessened or done away, and better opportunities be offered for the children of indigence to adorn themselves with the treasures of knowledge.

31. We may not be able to effect all that is desirable; but, favoured as our country is, with great facilities for carrying forward the work of improvement, in every thing which can contribute to national glory and prosperity, I would, in conclusion of this topic, submit—that a critical knowledge of our common language is a subject worthy of the particular attention of all who have the genius and the opportunity to attain it;—that on the purity and propriety with which American authors write this language, the reputation of our national literature greatly depends;—that in the preservation of it from all changes which ignorance may admit or affectation invent, we ought to unite as having one common interest;—that a fixed and settled orthography is of great importance, as a means of preserving the etymology, history, and identity of words;—that a grammar freed from errors and defects, and embracing a complete code of definitions and illustrations, rules and exercises, is of primary importance to every student and a great aid to teachers;—that as the vices of speech as well as of manners are contagious, it becomes those who have the care of youth, to be masters of the language in its purity and elegance, and to avoid as much as possible every thing that is reprehensible either in thought or expression.

## CHAPTER IX.

### OF THE BEST METHOD OF TEACHING GRAMMAR.

“Quomodo differunt grammaticus et grammatista? Grammaticus est qui diligenter, acutè, scienterque possit aut dicere aut scribere, et poetas enarrare: idem literatus dicitur. Grammatista est qui barbaris literis obstrepat, cui abusus pro usu est; Græcis Latinam dat etymologiam, et totus in nugis est: Latinè dicitur literator.”—DESPAUTER. *Synt.*, fol. 1.

1. It is hardly to be supposed that any person can have a very clear conviction of the best method of doing a thing, who shall not at first have acquired a pretty correct and adequate notion of the thing to be done. Arts must be taught by artists; sciences, by learned men; and, if Grammar is the science of words, the art of writing and speaking well, the best speakers and writers will be the best teachers of it, if they choose to direct their attention to so humble an employment. For, without disparagement of the many worthy men whom choice or necessity has made schoolmasters, it may be admitted that the low estimation in which school-keeping is commonly held, does mostly exclude from it the first order of talents, and the highest acquirements of scholarship. It is one strong proof of this, that we have heretofore been content to receive our digests of English grammar, either from men who had had no practical experience in the labours of a school-room, or from miserable modifiers and abridgers, destitute alike of learning and of industry, of judgement and of skill.

2. But, to have a correct and adequate notion of English grammar, and of the best method of learning or teaching it, is no light attainment. The critical knowledge of this subject lies in no narrow circle of observation; nor are there any precise limits to possible improvement. The simple definition in which the general idea of the art is embraced, “Grammar is the art of writing and speaking correctly,” however useful in order to fix the learner’s conception, can scarcely give him a better knowledge of the thing itself, than he would have of the art of painting, when he had learned from Dr. Webster, that it is “the art

of representing to the eye, by means of figures and colors, any object of sight, and sometimes emotions of the mind.” The first would no more enable him to write a sonnet, than the second, to take his master’s likeness. The force of this remark extends to all the technical divisions, definitions, rules, and arrangements of grammar; the learner may commit them all to memory, and know but very little about the art.

3. This fact, too frequently illustrated in practice, has been made the basis of the strongest argument ever raised against the study of grammar; and has been particularly urged against the ordinary technical method of teaching it, as if the whole of that laborious process were useless. It has led some men, even of the highest talents, to doubt the expediency of that method, under any circumstances, and either to discountenance the whole matter, or invent other schemes by which they hoped to be more successful. The utter futility of the old accident has been inferred from it, and urged, even in some well-written books, with all the plausibility of a fair and legitimate deduction. The hardships of children, compelled to learn what they did not understand, have been bewailed in prefaces and reviews; incredible things boasted by literary jugglers, have been believed by men of sense; and the sympathies of nature, with accumulated prejudices, have been excited against that method of teaching grammar, which after all will be found in experience to be at once the easiest, the shortest, and the best. I mean, essentially, the ancient positive method, which aims directly at the inculcation of principles.

4. It has been already admitted, that definitions and rules committed to memory and not reduced to practice, will never enable any one to speak and write correctly. But it does not follow, that to study grammar by learning its principles, or to teach it technically by formal lessons, is of no real utility. Surely not. For the same admission must be made with respect to the definitions and rules of every practical science in the world; and the technology of grammar is even more essential to a true knowledge of the subject, than that of almost any other art. “To proceed upon principles at first,” says Dr. Barrow, “is the most compendious method of attaining every branch of knowledge; and the truths impressed upon the mind in the years of childhood, are ever afterwards the most firmly remembered, and the most readily applied.”—*Essays*, p. 84. Reading, as I have said, is a part of grammar; and it is a part which must of course precede what is commonly called in the schools the study of grammar. Any person who can read, can learn from a book such simple facts as are within his comprehension; and we have it on the authority of Dr. Adam, that, “The principles of grammar are the first abstract truths which a young mind can comprehend.”—*Pref. to Lat. Gram.*, p. 4.

5. It is manifest, that, with respect to this branch of knowledge, the duties of the teacher will vary considerably, according to the age and attainments of his pupils, or according to each student’s ability or inclination to profit by his printed guide. The business lies partly between the master and his scholar, and partly between the boy and his book. Among these it may be partitioned variously, and of course unwisely; for no general rule can precisely determine for all occasions what may be expected from each. The deficiencies of any one of the three must either be supplied by the extraordinary readiness of an other, or the attainment of the purpose be proportionably imperfect. What one fails to do, must either be done by an other, or left undone. After much observation, it seems to me, that the most proper mode of treating this science in schools, is, to throw the labour of its acquisition almost entirely upon the students; to require from them very accurate rehearsals as the only condition on which they shall be listened to; and to refer them to their books for the information which they need, and in general for the solution of

all their doubts. But then the teacher must see that he does not set them to grope their way through a wilderness of absurdities. He must know that they have a book, which not only contains the requisite information, but arranges it so that every item of it may be readily found. That knowledge may reasonably be required at their recitations, which culpable negligence alone could have prevented them from obtaining.

6. Most grammars, and especially those which are designed for the senior class of students, to whom a well-written book is a sufficient instructor, contain a large proportion of matter which is merely to be read by the learner. This is commonly distinguished in type from those more important doctrines which constitute the frame of the edifice. It is expected that the latter will receive a greater degree of attention. The only successful method of teaching grammar, is, to cause the principal definitions and rules to be committed thoroughly to memory, that they may ever afterwards be readily applied. Oral instruction may smoothe the way, and facilitate the labour of the learner; but the notion of communicating a competent knowledge of grammar without imposing this task, is disproved by universal experience. Nor will it avail any thing for the student to rehearse definitions and rules of which he makes no practical application. In etymology and syntax, he should be alternately exercised in learning small portions of his book, and then applying them in parsing, till the whole is rendered familiar. To a good reader, the achievement will be neither great nor difficult; and the exercise is well calculated to improve the memory and strengthen all the faculties of the mind.

7. The objection drawn from the alleged inefficiency of this method, lies solely against the practice of those teachers who disjoin the principles and the exercises of the art; and who, either through ignorance or negligence, impose only such tasks as leave the pupil to suppose, that the committing to memory of definitions and rules, constitutes the whole business of grammar.\* Such a method is no less absurd in itself, than contrary to the practice of the best teachers from the very origin of the study. The epistle prefixed to King Henry's Grammar almost three centuries ago, and the very sensible preface to the old British Grammar, an octavo reprinted at Boston in 1784, give evidence enough that a better method of teaching has long been known. Nay, in my opinion, the very best method cannot be essentially different from that which has been longest in use, and is probably most known. But there is everywhere ample room for improvement. Perfection was never attained by the most learned of our ancestors, nor is it found in any of our schemes. English grammar can be better taught than it is now, or ever has been. Better scholarship would naturally produce this improvement, and it is easy to suppose a race of teachers more erudite and more zealous, than either we or they.

---

\* A late author, in apologizing for his choice in publishing a grammar without forms of praxis, (that is, without any provision for a stated application of its principles by the learner,) describes the whole business of *Parsing* as a "dry and uninteresting recapitulation of the disposal of a few parts of speech, and their *often times told* positions and influence;" urges "the *unimportance* of parsing, *generally*;" and represents it to be only "a finical and ostentatious parade of practical pedantry."—*Wright's Philosophical Gram.*, pp. 224 and 226. It would be no great mistake to imagine, that *this gentleman's system* of grammar, applied in any way to practice, could not fail to come under this unflattering description; but, to entertain this notion of parsing in general, is as great an error, as that which some writers have adopted on the other hand, of making this exercise their sole process of inculcation, and supposing it may profitably supersede both the usual arrangement of the principles of grammar and the practice of explaining them by definitions. It is asserted in Parkhurst's "English Grammar for Beginners, on the Inductive Method of Instruction," that, "to teach the child a definition at the outset, is beginning at the *wrong end*;" that, "with respect to all that goes under the name of etymology in grammar, it is learned chiefly by practice in parsing, and scarcely at all by the aid of definitions."—*Preface*, pp. 5 and 6.

8. Where invention and discovery are precluded, there is little room for novelty. I have not laboured to introduce a system of grammar essentially new, but to improve the old and free it from abuses. The mode of instruction here recommended is the result of long and successful experience. There is nothing in it, which any person of common abilities will find it difficult to understand or adopt. It is the plain didactic method of definition and example, rule and praxis; which no man who means to teach grammar well, will ever desert, with the hope of finding an other more rational or more easy. This book itself will make any one a grammarian, who will take the trouble to observe and practise what it teaches; and even if some instructors should not adopt the readiest means of making their pupils familiar with its contents, they will not fail to instruct by it as effectually as they can by any other. A hope is also indulged, that this work will be particularly useful to many who have passed the ordinary period allotted to education. Whoever is acquainted with the grammar of our language, so as to have some tolerable skill in teaching it, will here find almost every thing that is true in his own instructions, clearly embraced under its proper head, so as to be easy of reference. And perhaps there are few, however learned, who, on a perusal of the volume, would not be furnished with some important rules and facts which had not before occurred to their own observation.

9. The greatest peculiarity of the method is, that it requires the pupil to speak or write a great deal, and the teacher very little. But both should constantly remember that grammar is the art of speaking and writing well; an art which can no more be acquired without practice, than that of dancing or swimming. And each should ever be careful to perform his part handsomely—without drawling, omitting, stopping, hesitating, faltering, miscalling, reiterating, stuttering, hurrying, slurring, mouthing, misquoting, mispronouncing, or any of the thousand faults which render utterance disagreeable and inelegant. It is the learner's diction that is to be improved; and the system will be found well calculated to effect that object; because it demands of him, not only to answer questions on grammar, but also to make a prompt and practical application of what he has just learned. If the class be tolerable readers, and have learned the art of attention, it will not be necessary for the teacher to say much; and in general he ought not to take up the time by so doing. He should, however, carefully superintend their rehearsals; give the word to the next when any one errs; and order the exercise in such a manner that either his own voice, or the example of his best scholars, may gradually correct the ill habits of the awkward, till all learn to recite with clearness, understanding well what they say, and making it intelligible to others.

10. Without oral instruction and oral exercises, a correct habit of speaking our language can never be acquired; but written rules, and exercises in writing, are perhaps quite as necessary, for the formation of a good style. All these should therefore be combined in our course of English grammar. And, in order to accomplish two objects at once, the written doctrines, or the definitions and rules of grammar, should statedly be made the subject of a critical exercise in utterance; so that the boy who is parsing a word, or correcting a sentence, in the hearing of others, may impressively realize, that he is then and there exhibiting his own skill or deficiency in oral discourse. Perfect forms of parsing and correcting should be given him as models, with the understanding that the text before him is his only guide to their right application. It should be shown, that in parsing any particular word, or part of speech, there are just so many things to be said of it, and no more, and that these are to be said in the best manner: so that whoever tells fewer, omits something requisite; whoever says more, inserts something irrelevant; and whoever

proceeds otherwise, either blunders in point of fact, or impairs the beauty of the expression. I rely not upon what are called "*Parsing Tables*" but upon the precise forms of expression which are given in the book for the parsing of the several sorts of words. Because the questions, or abstract directions, which constitute the common parsing tables, are less intelligible to the learner than a practical example; and more time must needs be consumed on them, in order to impress upon his memory the number and the sequence of the facts to be stated.

11. If a pupil happen to be naturally timid, there should certainly be no austerity of manner to embarrass his diffidence; for no one can speak well, who feels afraid. But a far more common impediment to the true use of speech, is carelessness. He who speaks before a school, in an exercise of this kind, should be made to feel that he is bound by every consideration of respect for himself, or for those who hear him, to proceed with his explanation or rehearsal, in a ready, clear, and intelligible manner. It should be strongly impressed upon him, that the grand object of the whole business, is his own practical improvement; that a habit of speaking clearly and agreeably, is itself one half of the great art of grammar; that to be slow and awkward in parsing, is unpardonable negligence, and a culpable waste of time; that to commit blunders in rehearsing grammar, is to speak badly about the art of speaking well; that his recitations must be limited to such things as he perfectly knows; that he must apply himself to his book, till he can proceed without mistake; finally, that he must watch and imitate the utterance of those who speak well, ever taking that for the best manner, in which there are the fewest things that could be *mimicked*.\*

12. The exercise of parsing should be commenced immediately after the first lesson of etymology—the lesson in which are contained the definitions of the ten parts of speech; and should be carried on progressively, till it embraces all the doctrines which are applicable to it. If it be performed according to the order prescribed in the following work, it will soon make the student perfectly familiar with all the primary definitions and rules of grammar. It asks no aid from a dictionary, if the performer knows the meaning of the words he is parsing; and very little from the teacher, if the forms in the grammar have received any tolerable share of attention. It requires just enough of thought to keep the mind attentive to what the lips are uttering; while it advances by such easy gradations and constant repetitions as leave the pupil utterly without excuse, if he does not know what to say. Being neither wholly extemporaneous nor wholly rehearsed by rote, it has more dignity than a school-boy's conversation, and more ease than a formal recitation, or declamation; and is therefore an exercise well calculated to induce a habit of uniting correctness with fluency in ordinary speech—a species of elocution as valuable as any other.†

---

\* Hesitation in speech may arise from very different causes. If we do not consider this, our efforts to remove it may make it worse. In most instances, however, it may be overcome by proper treatment, "Stammering," says a late author, "is occasioned by an *over-effort to articulate*; for when the mind of the speaker is so occupied with his subject as not to allow him to reflect upon his defect, he will talk without difficulty. All stammerers can sing, owing to the continuous sound, and the slight manner in which the consonants are touched in singing; so a drunken man can run, though he cannot walk or stand still."—*Gardiner's Music of Nature*, p. 30.

"To think rightly, is of knowledge; to speak fluently, is of nature;

To read with profit, is of care; but to write aptly, is of practice." *Book of Thoughts*, p. 140.

† "There is nothing more becoming [to] a *Gentleman*, or more useful in all the occurrences of life, than to be able, on any occasion, to speak well, and to the purpose."—*Locke, on Education*, §171. "But yet, I think I may ask my reader, whether he doth not know a great many, who live upon their estates, and so, with the

13. Thus would I unite the practice with the theory of grammar; endeavouring to express its principles with all possible perspicuity, purity, and propriety of diction; retaining, as necessary parts of the subject, those technicalities which the pupil must needs learn in order to understand the disquisitions of grammarians in general; adopting every important feature of that system of doctrines which appears to have been longest and most generally taught; rejecting the multitudinous errors and inconsistencies with which unskillful hands have disgraced the science and perplexed the schools; remodelling every ancient definition and rule which it is possible to amend, in respect to style, or grammatical correctness; supplying the numerous and great deficiencies with which the most comprehensive treatises published by earlier writers, are chargeable; adapting the code of instruction to the present state of English literature, without giving countenance to any innovation not sanctioned by reputable use; labouring at once to extend and to facilitate the study, without forgetting the proper limits of the science, or debasing its style by puerilities.

14. These general views, it is hoped, will be found to have been steadily adhered to throughout the following work. The author has not deviated much from the principles adopted in the most approved grammars already in use; nor has he acted the part of a servile copyist. It was not his design to introduce novelties, but to form a practical digest of established rules. He has not laboured to subvert the general system of grammar, received from time immemorial; but to improve upon it, in its present application to our tongue. That which is excellent, may not be perfect; and amendment may be desirable, where subversion would be ruinous. Believing that no theory can better explain the principles of our language, and no contrivance afford greater facilities to the student, the writer has in general adopted those doctrines which are already best known; and has contented himself with attempting little more than to supply the deficiencies of the system, and to free it from the reproach of being itself ungrammatical. This indeed was task enough; for, to him, all the performances of his predecessors seemed meagre and greatly deficient, compared with what he thought needful to be done. The scope of his labours has been, to define, dispose, and exemplify those doctrines anew; and, with a scrupulous regard to the best usage, to offer, on that authority, some further contributions to the stock of grammatical knowledge.

15. Having devoted many years to studies of this nature, and being conversant with most of the grammatical treatises already published, the author conceived that the objects above referred to, might be better effected than they had been in any work within his knowledge. And he persuades himself, that, however this work may yet fall short of possible completeness, the improvements here offered are neither few nor inconsiderable. He does not mean to conceal in any degree his obligations to others, or to indulge in

---

name, should have the qualities of Gentlemen, who cannot so much as tell a story as they should; much less speak clearly and persuasively in any business. This I think not to be so much their fault, as the fault of their education.—They have been taught *Rhetoric*, but yet never taught how to express themselves handsomely with their tongues or pens in the language they are always to use; as if the names of the figures that embellish the discourses of those who understood the art of speaking, were the very art and skill of speaking well. *This, as all other things of practice, is to be learned, not by a few, or a great many rules given; but by EXERCISE and APPLICATION according to GOOD RULES, or rather PATTERNS, till habits are got, and a facility of doing it well.*—*Ib.*, §189. The forms of parsing and correcting which the following work supplies, are “*patterns*,” for the performance of these practical “*exercises*,” and *such patterns* as ought to be implicitly followed, by every one who means to be a ready and correct speaker on these subjects.

censure without discrimination. He has no disposition to depreciate the labours, or to detract from the merits, of those who have written ably upon this topic. He has studiously endeavoured to avail himself of all the light they have thrown upon the subject. With a view to further improvements in the science, he has also resorted to the original sources of grammatical knowledge, and has not only critically considered what he has seen or heard of our vernacular tongue, but has sought with some diligence the analogies of speech in the structure of several other languages. If, therefore, the work now furnished be thought worthy of preference, as exhibiting the best method of teaching grammar; he trusts it will be because it deviates least from sound doctrine, while, by fair criticism upon others, it best supplies the means of choosing judiciously.

16. Of all methods of teaching grammar, that which has come nearest to what is recommended above, has doubtless been the most successful; and whatever objections may have been raised against it, it will probably be found on examination to be the most analogous to nature. It is analytic in respect to the doctrines of grammar, synthetic in respect to the practice, and logical in respect to both. It assumes the language as an object which the learner is capable of conceiving to be one whole; begins with the classification of all its words, according to certain grand differences which make the several parts of speech; then proceeds to divide further, according to specific differences and qualities, till all the classes, properties, and relations, of the words in any intelligible sentence, become obvious and determinate: and he to whom these things are known, so that he can see at a glance what is the construction of each word, and whether it is right or not, is a good grammarian. The disposition of the human mind to generalize the objects of thought, and to follow broad analogies in the use of words, discovers itself early, and seems to be an inherent principle of our nature. Hence, in the language of children and illiterate people, many words are regularly inflected even in opposition to the most common usage.

17. It has unfortunately become fashionable to inveigh against the necessary labour of learning by heart the essential principles of grammar, as a useless and intolerable drudgery. And this notion, with the vain hope of effecting the same purpose in an easier way, is giving countenance to modes of teaching well calculated to make superficial scholars. When those principles are properly defined, disposed, and exemplified, the labour of learning them is far less than has been represented; and the habits of application induced by such a method of studying grammar, are of the utmost importance to the learner. Experience shows, that the task may be achieved during the years of childhood; and that, by an early habit of study, the memory is so improved, as to render those exercises easy and familiar, which, at a later period, would be found very difficult and irksome. Upon this plan, and perhaps upon every other, some words will be learned before the ideas represented by them are fully comprehended, or the things spoken of are fully understood. But this seems necessarily to arise from the order of nature in the development of the mental faculties; and an acquisition cannot be lightly esteemed, which has signally augmented and improved that faculty on which the pupil's future progress in knowledge depends.

18. The memory, indeed, should never be cultivated at the expense of the understanding; as is the case, when the former is tasked with ill-devised lessons by which the latter is misled and bewildered. But truth, whether fully comprehended or not, has no perplexing inconsistencies. And it is manifest that that which does not in some respect surpass the understanding, can never enlighten it—can never awaken the spirit of inquiry

or satisfy research. How often have men of observation profited by the remembrance of words which, at the time they heard them, they did not “*perfectly understand!*” We never study any thing of which we imagine our knowledge to be perfect. To learn, and, to understand, are, with respect to any science or art, one and the same thing. With respect to difficult or unintelligible phraseology alone, are they different. He who by study has once stored his memory with the sound and appropriate language of any important doctrine, can never, without some folly or conceit akin to madness, repent of the acquisition. Milton, in his academy, professed to teach things rather than words; and many others have made plausible profession of the same thing since. But it does not appear, that even in the hands of Milton, the attempt was crowned with any remarkable success. See *Dr. Barrow’s Essays*, p. 85.

19. The vain pretensions of several modern simplifiers, contrivers of machines, charts, tables, diagrams, vincula, pictures, dialogues, familiar lectures, ocular analyses, tabular compendiums, inductive exercises, productive systems, intellectual methods, and various new theories, for the purpose of teaching grammar, may serve to deceive the ignorant, to amuse the visionary, and to excite the admiration of the credulous; but none of these things has any favourable relation to that improvement which may justly be boasted as having taken place within the memory of the present generation. The definitions and rules which constitute the doctrines of grammar, may be variously expressed, arranged, illustrated, and applied; and in the expression, arrangement, illustration, and application of them, there may be room for some amendment; but no contrivance can ever relieve the pupil from the necessity of committing them thoroughly to memory. The experience of all antiquity is added to our own, in confirmation of this; and the judicious teacher, though he will not shut his eyes to a real improvement, will be cautious of renouncing the practical lessons of hoary experience, for the futile notions of a vain projector.

20. Some have been beguiled with the idea, that great proficiency in grammar was to be made by means of a certain fanciful method of *induction*. But if the scheme does not communicate to those who are instructed by it, a better knowledge of grammar than the contrivers themselves seem to have possessed, it will be found of little use.\* By the happy method of Bacon, to lead philosophy into the common walks of life, into the ordinary business and language of men, is to improve the condition of humanity; but, in teaching grammar, to desert the plain didactic method of definition and example, rule and praxis, and pretend to lead children by philosophic induction into a knowledge of words, is to throw down the ladder of learning, that boys may imagine themselves to ascend it, while they are merely stiling over the low level upon which its fragments are cast.

21. The chief argument of these inductive grammarians is founded on the principle, that children cannot be instructed by means of any words which they do not perfectly understand. If this principle were strictly true, children could never be instructed by words at all. For no child ever fully understands a word the first time he hears or sees it; and it is rather by frequent repetition and use, than by any other process, that the meaning of words is commonly learned. Hence most people make use of many terms which they cannot very accurately explain, just as they do of many *things*, the real nature

---

\* The principal claimants of “the Inductive Method” of Grammar, are Richard W. Green, Roswell C. Smith, John L. Parkhurst, Dyor H. Sanborn, Bradford Frazee, and, Solomon Barrett, Jr.; a set of writers, differing indeed in their qualifications, but in general not a little deficient in what constitutes an accurate grammarian.

of which they do not comprehend. The first perception we have of any word, or other thing, when presented to the ear or the eye, gives us some knowledge of it. So, to the signs of thought, as older persons use them, we soon attach some notion of what is meant; and the difference between this knowledge, and that which we call an understanding of the word or thing, is, for the most part, only in degree. Definitions and explanations are doubtless highly useful, but induction is not definition, and an understanding of words may be acquired without either; else no man could ever have made a dictionary. But, granting the principle to be true, it makes nothing for this puerile method of induction; because the regular process by definitions and examples is both shorter and easier, as well as more effectual. In a word, this whole scheme of inductive grammar is nothing else than a series of *leading* questions and *manufactured* answers; the former being generally as unfair as the latter are silly. It is a remarkable tissue of ill-laid premises and of forced illogical sequences.

22. Of a similar character is a certain work, entitled, “English Grammar on the *Productive System*: a method of instruction recently adopted in Germany and Switzerland.” It is a work which certainly will be “*productive*” of no good to any body but the author and his publishers. The book is as destitute of taste, as of method; of authority, as of originality. It commences with “the *inductive* process,” and after forty pages of such matter as is described above, becomes a “*productive* system,” by means of a misnamed “RECAPITULATION;” which jumbles together the etymology and the syntax of the language, through seventy-six pages more. It is then made still more “*productive*” by the appropriation of a like space to a reprint of Murray’s Syntax and Exercises, under the inappropriate title, “GENERAL OBSERVATIONS.” To Prosody, including punctuation and the use of capitals, there are allotted six pages, at the end; and to Orthography, four lines, in the middle of the volume! (See p. 41.) It is but just, to regard the *title* of this book, as being at once a libel and a lie; a libel upon the learning and good sense of Woodbridge;\* and a practical lie, as conveying a false notion of the origin of what the volume contains.

23. What there is in Germany or Switzerland, that bears *any resemblance* to this misnamed system of English Grammar, remains to be shown. It would be prodigal of the reader’s time, and inconsistent with the studied brevity of this work, to expose the fallacy of what is pretended in regard to the origin of this new method. Suffice it to say, that the anonymous and questionable account of the “Productive System of Instruction,” which the author has borrowed from a “valuable periodical,” to save himself the trouble of writing a preface, and, as he says, to “*assist* [the reader] in forming an opinion of the comparative merits of *the system*” is not only destitute of all authority, but is totally irrelevant, except to the whimsical *name* of his book. If every word of it be true, it is insufficient to give us even the slightest reason to suppose, that any thing analogous to his production ever had existence in either of those countries; and yet it is set forth on purpose to convey the idea that such a system “*now predominates*” in the schools of both. (See *Pref.*, p. 5.) The infidel *Neef*, whose new method of education has been tried in our country, and with its promulgator forgot, was an accredited disciple of this boasted “productive school;” a zealous coadjutor with Pestalozzi himself, from whose halls he emanated to “teach the offspring of a free people”—to teach them the nature of things sensible, and a contempt for all the wisdom of *books*. And what similarity is there between his method of teaching and

---

\* William C. Woodbridge edited the Journal, and probably wrote the article, from which the author of “English Grammar on the Productive System” took his “*Preface*.”

that of *Roswell C. Smith*, except their pretence to a common parentage, and that both are worthless?

24. The success of Smith's Inductive and Productive Grammars, and the fame perhaps of a certain "Grammar in Familiar Lectures," produced in 1836 a rival work from the hands of a gentleman in New Hampshire, entitled, "An Analytical Grammar of the English Language, embracing *the Inductive and Productive Methods of Teaching*, with *Familiar Explanations in the Lecture Style*" &c. This is a fair-looking duodecimo volume of three hundred pages, the character and pretensions of which, if they could be clearly stated, would throw further light upon the two fallacious schemes of teaching mentioned above. For the writer says, "This grammar professes *to combine* both the *Inductive* and *Productive* methods of imparting instruction, of which much has been said within a few years *past*"—*Preface*, p. iv. And again: "The inductive and productive methods of instruction contain the essence of modern improvements."—*Gram.*, p. 139. In what these modern improvements consist, he does not inform us; but, it will be seen, that he himself claims the *copyright* of *all* the improvements which he allows to *English grammar* since the appearance of Murray in 1795. More than two hundred pretenders to such improvements, appear however within the time; nor is the grammarian of Holdgate the least positive of the claimants. This new purveyor for the public taste, dislikes the catering of his predecessor, who poached in the fields of Murray; and, with a tacit censure upon *his productions*, has *honestly bought* the rareties which he has served up. In this he has the advantage. He is a better writer too than some who make grammars; though no adept at composition, and a total stranger to method. To call his work a "*system*" is a palpable misnomer; to tell what it is, an impossibility. It is a grammatical chaos, bearing such a resemblance to Smith's or Kirkham's as one mass of confusion naturally bears to another, yet differing from both in almost every thing that looks like order in any of the three.

25. The claimant of the combination says, "this new system of English grammar now offered to the public, embraces *the principles* of a 'Systematic Introduction to English Grammar,' by John L. Parkhurst; and the *present author* is indebted to Mr. Parkhurst for a knowledge of *the manner* of applying the principles involved in *his peculiar method* of teaching grammatical science. He is also under obligations to Mr. Parkhurst for many useful hints received several years since while under his instruction.—The *copy right* of Parkhurst's Grammar has been purchased by the writer of this, who alone is responsible for the present application of *its definitions*. Parkhurst's Systematic Introduction to English Grammar has passed through two editions, and is *the first improved system* of English grammar that has appeared before the public *since the first introduction* of Lindley Murray's English Grammar."—*Sanborn's Gram.*, Preface, p. iii. What, then, is "THE PRODUCTIVE SYSTEM?" and with whom did it originate? The thousands of gross blunders committed by its professors, prove at least that it is no system of writing grammatically; and, whether it originated with Parkhurst or with Pestalozzi, with Sanborn or with Smith, as it is confessedly a method but "recently adopted," and, so far as appears, never fairly tested, so is it a method that needs only to be *known*, to be immediately and forever exploded.

26. The best instruction is that which ultimately gives the greatest facility and skill in practice; and grammar is best taught by that process which brings its doctrines most directly home to the habits as well as to the thoughts of the pupil—which the most effectually conquers inattention, and leaves the deepest impress of shame upon

blundering ignorance. In the language of some men, there is a vividness, an energy, a power of expression, which penetrates even the soul of dullness, and leaves an impression both of words unknown and of sentiments unfelt before. Such men can teach; but he who kindly or indolently accommodates himself to ignorance, shall never be greatly instrumental in removing it. "The colloquial barbarisms of boys," says Dr. Barrow, "should never be suffered to pass without notice and censure. Provincial tones and accents, and all defects in articulation, should be corrected whenever they are heard; lest they grow into established habits, unknown, from their familiarity, to him who is guilty of them, and adopted by others, from the imitation of his manner, or their respect for his authority."—*Barrow's Essays on Education*, p. 88.

27. In the whole range of school exercises, there is none of greater importance than that of parsing; and yet perhaps there is none which is, in general, more defectively conducted. Scarcely less useful, as a means of instruction, is the practice of correcting false syntax orally, by regular and logical forms of argument; nor does this appear to have been more ably directed towards the purposes of discipline. There is so much to be done, in order to effect what is desirable in the management of these things; and so little prospect that education will ever be generally raised to a just appreciation of that study which, more than all others, forms the mind to habits of correct thinking; that, in reflecting upon the state of the science at the present time, and upon the means of its improvement, the author cannot but sympathize, in some degree, with the sadness of the learned Sanctius; who tells us, that he had "always lamented, and often with tears, that while other branches of learning were excellently taught, grammar, which is the foundation of all others, lay so much neglected, and that for this neglect there seemed to be no adequate remedy."—*Pref. to Minerva*. The grammatical use of language is in sweet alliance with the moral; and a similar regret seems to have prompted the following exclamation of the Christian poet:

"Sacred Interpreter of human thought,  
How few respect or use thee as they ought!"—COWPER.

28. No directions, either oral or written, can ever enable the heedless and the unthinking to speak or write well. That must indeed be an admirable book, which can attract levity to sober reflection, teach thoughtlessness the true meaning of words, raise vulgarity from its fondness for low examples, awaken the spirit which attains to excellency of speech, and cause grammatical exercises to be skillfully managed, where teachers themselves are so often lamentably deficient in them. Yet something may be effected by means of better books, if better can be introduced. And what withstands?—Whatever there is of ignorance or error in relation to the premises. And is it arrogant to say there is much? Alas! in regard to this, as well as to many a weightier matter, one may too truly affirm, *Multa non sunt sicut multis videntur*—Many things are not as they seem to many. Common errors are apt to conceal themselves from the common mind; and the appeal to reason and just authority is often frustrated, because a wrong head defies both. But, apart from this, there are difficulties: multiplicity perplexes choice; inconvenience attends change; improvement requires effort; conflicting theories demand examination; the principles of the science are unprofitably disputed; the end is often divorced from the means; and much that belies the title, has been published under the name.

29. It is certain, that the printed formularies most commonly furnished for the important exercises of parsing and correcting, are either so awkwardly written or so negligently followed, as to make grammar, in the mouths of our juvenile orators, little else

than a crude and faltering jargon. Murray evidently intended that his book of exercises should be constantly used with his grammar; but he made the examples in the former so dull and prolix, that few learners, if any, have ever gone through the series agreeably to his direction. The publishing of them in a separate volume, has probably given rise to the absurd practice of endeavouring to teach his grammar without them. The forms of parsing and correcting which this author furnishes, are also misplaced; and when found by the learner, are of little use. They are so verbose, awkward, irregular, and deficient, that the pupil must be either a dull boy or utterly ignorant of grammar, if he cannot express the facts extemporaneously in better English. They are also very meagre as a whole, and altogether inadequate to their purpose; many things that frequently occur in the language, not being at all exemplified in them, or even explained in the grammar itself. When we consider how exceedingly important it is, that the business of a school should proceed without loss of time, and that, in the oral exercises here spoken of, each pupil should go through his part promptly, clearly, correctly, and fully, we cannot think it a light objection that these forms, so often to be repeated, are so badly written. Nor does the objection lie against this writer only: "*Ab uno disce omnes.*" But the reader may demand some illustrations.\*

30. First—from his etymological parsing: "O Virtue! how amiable thou art!" Here his form for the word *Virtue* is—"Virtue is a *common substantive*, of the *neuter* gender, of the *third* person, in the singular number, and the nominative case."—*Murray's Gram.*, 8vo, Vol. ii, p. 2. It should have been—"Virtue is a common *noun*, personified *proper*, of the *second* person, singular number, *feminine* gender, and nominative case." And then the definitions of all these things should have followed in regular numerical order. He gives the class of this noun wrong, for virtue addressed becomes an individual; he gives the gender wrong, and in direct contradiction to what he says of the word in his section on

---

\* Many other grammars, later than Murray's, have been published, some in England, some in America, and some in both countries; and among these there are, I think, a few in which a little improvement has been made, in the methods prescribed for the exercises of parsing and correcting. In most, however, *nothing of the kind has been attempted*. And, of the formularies which have been given, the best that I have seen, are still miserably defective, and worthy of all the censure that is expressed in the paragraph above; while others, that appear in works not entirely destitute of merit, are absolutely *much worse* than Murray's, and worthy to condemn to a speedy oblivion the books in which they are printed. In lieu of forms of expression, clear, orderly, accurate, and full; such as a young parser might profitably imitate; such as an experienced one would be sure to approve; what have we? A chaos of half-formed sentences, for the ignorant pupil to flounder in; an infinite abyss of blunders, which a world of criticism could not fully expose! See, for example, the seven pages of parsing, in the neat little book entitled, "A Practical Grammar of the English Language, by the Rev. David Blair: Seventh Edition: London, 1815:" pp. 49 to 57. I cannot consent to quote more than one short paragraph of the miserable jumble which these pages contain. Yet the author is evidently a man of learning, and capable of writing well on some subjects, if not on this. "Bless the Lord, O my soul!" Form: "*Bless*, a verb, (repeat 97); active (repeat 99); active voice (102); *infinitive mood* (107); *third person, soul being the nominative* (118); present tense (111); conjugate the verb after the pattern (129); its object is Lord (99)."—*Blair's Gram.*, p. 50. Of the paragraphs referred to, I must take some notice: "107. The *imperative* mood commands or orders or intreats."—*Ib.*, p. 19. "118. The *second person* is always the pronoun *thou* or *you* in the singular, and *ye* or *you* in the plural."—*Ib.*, p. 21. "111. The *imperative* mood has no distinction of tense: and the *infinitive* has no distinction of persons."—*Ib.*, p. 20. Now the author should have said: "*Bless* is a redundant active-transitive verb, from *bless*, *blessed* or *blest*, *blessing*, *blessed* or *blest*; found in the *imperative* mood, present tense, *second* person, and singular number:" and, if he meant to parse the word *syntactically*, he should have added: "and agrees with its nominative *thou* understood; according to the rule which says, 'Every finite verb must agree with its subject or nominative, in person and number.' Because the meaning is—*Bless thou* the Lord." This is the whole story. But, in the form above, several things are false; many, superfluous; some, deficient; several, misplaced; nothing, right. Not much better are the models furnished by *Kirkham*, *Smith*, *Lennie*, *Bullions*, and other late authors.

gender; he gives the person wrong, as may be seen by the pronoun *thou*, which represents it; he repeats the definite article three times unnecessarily, and inserts two needless prepositions, making them different where the relation is precisely the same: and all this, in a sentence of two lines, to tell the properties of the noun *Virtue!*—But further: in etymological parsing, the definitions explaining the properties of the parts of speech, ought to be regularly and rapidly rehearsed by the pupil, till all of them become perfectly familiar; and till he can discern, with the quickness of thought, what alone will be true for the full description of any word in any intelligible sentence. All these the author omits; and, on account of this omission, his whole method of etymological parsing is, miserably deficient.\*

31. Secondly—from his syntactical parsing: “*Vice* degrades us.” Here his form for the word *Vice* is—“*Vice* is a common substantive, *of* the third person, *in the* singular number,

\* Of Dr. Bullions’s forms of parsing, as exhibited in his English Grammar, which is a modification of Lennie’s Grammar, it is difficult to say, whether they are most remarkable for their deficiencies, their redundancies, or their contrariety to other teachings of the same author or authors. Both Lennie and Bullions adopt the rule, that, “An *ellipsis* is *not allowable* when it would obscure the sentence, weaken its force, or be attended with an impropriety.”—*L.*, p. 91; *B.*, p. 130. And the latter strengthens this doctrine with several additional observations, the first of which reads thus: “In general, *no word should be omitted* that is necessary to the *full and correct construction*, or even *harmony* of a sentence.”—*Bullions, E. Gr.*, 130. Now the parsing above alluded to, has been thought particularly commendable for its *brevity*—a quality certainly desirable, so far as it consists with the end of parsing, or with the more needful properties of a good style, clearness, accuracy, ease, and elegance. But, if the foregoing rule and observation are true, the models furnished by these writers are not commendably brief, but miserably defective. Their brevity is, in fact, such as renders them all *bad English*; and not only so, it makes them obviously inadequate to their purpose, as bringing into use but a part of the principles which the learner had studied. It consists only in the omission of what ought to have been inserted. For example, this short line, “*I lean upon the Lord*,” is parsed by both of these gentlemen thus: “*I, the first personal* pronoun, masculine, or feminine, singular, *the* nominative—*lean*, a verb, *neuter*, first person singular, present, indicative—*upon*, a preposition—*the*, an article, the definite—*Lord*, a noun, masculine, singular, the objective, (governed by *upon*.)”—*Lennie’s Principles of English Gram.*, p. 51; *Bullions’s*, 74. This is a little sample of their etymological parsing, in which exercise they generally omit not only all the definitions or “reasons” of the various terms applied, but also all the following particulars: first, the verb *is*, and certain *definitives* and *connectives*, which are “necessary to the full and correct construction” of their sentences; secondly, the distinction of nouns as *proper* or *common*; thirdly, the *person* of nouns, *first*, *second*, or *third*; fourthly, the words, *number*, *gender*, and *case*, which are necessary to the sense and construction of certain words used; fifthly, the distinction of adjectives as belonging to *different classes*; sixthly, the division of verbs as being *regular* or *irregular*, *redundant* or *defective*; seventhly, sometimes, (Lennie excepted,) the division of verbs as *active*, *passive*, or *neuter*; eighthly, the words *mood* and *tense*, which Bullions, on page 131, pronounces “quite unnecessary,” and inserts in his own formule on page 132; ninthly, the distinction of adverbs as expressing *time*, *place*, *degree*, or *manner*; tenthly, the distinction of conjunctions as *copulative* or disjunctive; lastly, the distinction of interjections as indicating *different emotions*. All these things does their completest specimen of etymological parsing lack, while it is grossly encumbered with parentheses of syntax, which “*must be omitted* till the pupil get the *rules* of syntax.”—*Lennie*, p. 51. It is also vitiated with several absurdities, contradictions, and improper changes of expression: as, “*His, the third personal pronoun*,” (*B.*, p. 23;)—“*me, the first personal pronoun*,” (*Id.*, 74;)—“*A, The indefinite article*,” (*Id.*, 73;)—“*a*, an article, the indefinite,” (*Id.*, 74;)—“When the *verb is passive*, parse thus: ‘*A verb active*, in the passive voice, *regular, irregular*,’ &c.”—*Bullions*, p. 131. In stead of teaching sufficiently, as elements of etymological parsing, the definitions which belong to this exercise, and then dismissing them for the principles of syntax, Dr. Bullions encumbers his method of syntactical parsing with such a series of etymological questions and answers as cannot but make it one of the slowest, longest, and most tiresome ever invented. He thinks that the pupil, after parsing any word syntactically, “*should be requested to assign a reason for every thing contained in his statement!*”—*Principles of E. Grammar*, p. 131. And the teacher is to ask questions as numerous as the reasons! Such is the parsing of a text-book which has been pronounced “superior to any other, for use in our common schools”—“a *complete* grammar of the language, and *available for every purpose* for which Mr. Brown’s can possibly be used.”—*Ralph K. Finch’s Report*, p. 12.

and the nominative case.”—*Murray’s Gram.*, 8vo, Vol. ii, p. 9. Now, when the learner is told that this is the syntactical parsing of a noun, and the other the etymological, he will of course conclude, that to advance from the etymology to the syntax of this part of speech, is merely, *to omit the gender*—this being the only difference between the two forms. But even this difference had no other origin than the compiler’s carelessness in preparing his octavo book of exercises—the gender being inserted in the duodecimo. And what then? Is the syntactical parsing of a noun to be precisely the same as the etymological? Never. But Murray, and all who admire and follow his work, are content to parse many words by halves—making, or pretending to make, a necessary distinction, and yet often omitting, in both parts of the exercise, every thing which constitutes the difference. He should here have said—“*Vice* is a common noun, of the third person, singular number, neuter gender, and nominative case: and is the subject of *degrades*; according to the rule which says, ‘A noun or a pronoun which is the subject of a verb, must be in the nominative case.’ Because the meaning is—*vice degrades*.” This is the whole description of the word, with its construction; and to say less, is to leave the matter unfinished.

32. Thirdly—from his “Mode of verbally correcting erroneous sentences:” Take his first example: “The man is prudent which speaks little.” (How far silence is prudence, depends upon circumstances: I waive that question.) The learner is here taught to say, “This sentence is incorrect; because *which* is a pronoun *of the neuter gender, and does not agree in gender* with its antecedent *man*, which is masculine. But a pronoun should agree with its antecedent in gender, &c. according to the fifth rule of syntax. *Which* should *therefore* be *who*, a relative pronoun, agreeing with its antecedent *man*; and the sentence should stand thus: ‘The man is prudent *who* speaks little.’”—*Murray’s Octavo Gram.*, Vol. ii, p. 18; *Exercises*, 12mo, p. xii. Again: “‘After I visited Europe, I returned to America.’ This sentence,” says Murray, “*is not correct*, because the verb *visited* is in the imperfect tense, and yet used here to express an action, not only past, but prior to the time referred to by the verb *returned*, to which it relates. By the thirteenth rule of syntax, when verbs are used that, in point of time, relate to each other, the order of time should be observed. The imperfect tense *visited* should therefore have been *had visited*, in the pluperfect tense, representing the action of *visiting*, not only as past, but also as prior to the time of *returning*. The sentence corrected would stand thus: ‘After I *had visited* Europe, I returned to America.’”—*Gr.*, ii, p. 19; *and Ex.* 12mo, p. xii. These are the first two examples of Murray’s verbal corrections, and the only ones retained by Alger, in his *improved, recopy-righted edition* of *Murray’s Exercises*. Yet, in each of them, is the argumentation palpably false! In the former, truly, *which* should be *who*; but not because *which* is “of the *neuter gender*,” but because the application of that relative to *persons*, is now nearly obsolete. Can any grammarian forget that, in speaking of brute animals, male or female, we commonly use *which*, and never *who*? But if *which* must needs be *neuter*, the world is wrong in this.—As for the latter example, it is right as it stands; and the correction is, in some sort, tautological. The conjunctive adverb *after* makes one of the actions subsequent to the other, and gives to the *visiting* all the priority that is signified by the pluperfect tense. “*After* I *visited* Europe,” is equivalent to “*When* I *had visited* Europe.” The whole argument is therefore void.\*

---

\* There are many other critics, besides Murray and Alger, who seem not to have observed the import of *after* and *before* in connexion with the tenses. Dr. Bullions, on page 139th of his English Grammar, copied the foregoing example from Lennie, who took it from Murray. Even Richard Hiley, and William Harvey Wells, grammarians of more than ordinary tact, have been obviously misled by the false criticism above cited. One

33. These few brief illustrations, out of thousands that might be adduced in proof of the faultiness of the common manuals, the author has reluctantly introduced, to show that even in the most popular books, with all the pretended improvements of revisers, the grammar of our language has never been treated with that care and ability which its importance demands. It is hardly to be supposed that men unused to a teacher's duties, can be qualified to compose such books as will most facilitate his labours. Practice is a better pilot than theory. And while, in respect to grammar, the consciousness of failure is constantly inducing changes from one system to another, and almost daily giving birth to new expedients as constantly to end in the same disappointment; perhaps the practical instructions of an experienced teacher, long and assiduously devoted to the study, may approve themselves to many, as seasonably supplying the aid and guidance which they require.

34. From the doctrines of grammar, novelty is rigidly excluded. They consist of details to which taste can lend no charm, and genius no embellishment. A writer may express them with neatness and perspicuity—their importance alone can commend them to notice. Yet, in drawing his illustrations from the stores of literature, the grammarian may select some gems of thought, which will fasten on the memory a worthy sentiment, or relieve the dullness of minute instruction. Such examples have been taken from various authors, and interspersed through the following pages. The moral effect of early lessons being a point of the utmost importance, it is especially incumbent on all those who are endeavouring to confer the benefits of intellectual culture, to guard against the admission or the inculcation of any principle which may have an improper tendency, and be ultimately prejudicial to those whom they instruct. In preparing this treatise for publication, the author has been solicitous to avoid every thing that could be offensive to the most delicate and scrupulous reader; and of the several thousands of quotations introduced for the illustration or application of the principles of the science, he trusts that the greater part will be considered valuable on account of the sentiments they contain.

---

of Hiley's Rules of Syntax, with its illustration, stands thus: "In *the use of the different tenses*, we must particularly *observe to use that tense* which clearly and properly conveys the sense intended; thus, instead of saying, 'After I *visited* Europe, I returned to America,' we should say, 'After I *had visited* Europe, I returned to America.'"—*Hiley's Gram.*, p. 90. Upon this he thought it needful to comment thus: "'After I *visited* Europe, I returned to America,' *this sentence is incorrect; visited* ought to be *had visited*, because the action *implied* by the verb *visited* WAS COMPLETED *before* the other past action *returned*."—*Ib.*, p. 91. See nearly the same thing in *Wells's School Grammar*, 1st Edition, p. 151; but his later editions are wisely altered. Since "*visited* and *was completed*" are of the same tense, the argument from the latter, if it proves any thing, proves the former to be *right*, and the proposed change needless, or perhaps worse than needless. "I *visited* Europe *before* I *returned* to America," or, "I *visited* Europe, *and afterwards returned* to America," is good English, and not to be improved by any change of tense; yet here too we see the *visiting* "*was completed before*" the return, or HAD BEEN COMPLETED *at the time* of the return. I say, "The Pluperfect Tense is that which expresses what *had taken* place *at* some past time mentioned: as, 'I *had seen* him, *when* I met you.'" Murray says, "The Pluperfect Tense represents a *thing* not only as past, but also as prior to some *other point of time* specified in the sentence: as, I *had finished* my letter *before* he arrived." Hiley says, "The *Past-Perfect* expresses an action or event which *was past before* some *other past action or event* mentioned in the sentence, *and to which* it refers; as, I *had finished* my lessons *before* he came." With this, Wells appears to concur, his example being similar. It seems to me, that these last two definitions, and their example too, are bad; because by the help of *before* or *after*, "*the past before the past*" may be clearly expressed by the *simple past tense*: as, "I *finished* my letter *before* he *arrived*."—"I *finished* my lessons *before* he *came*." "He *arrived* soon *after* I *finished* the letter."—"Soon *after* it *was completed*, he *came in*."

35. The nature of the subject almost entirely precludes invention. The author has, however, aimed at that kind and degree of originality which are to be commended in works of this sort. What these are, according to his view, he has sufficiently explained in a preceding chapter. And, though he has taken the liberty of a grammarian, to think for himself and write in a style of his own, he trusts it will be evident that few have excelled him in diligence of research, or have followed more implicitly the dictates of that authority which gives law to language. In criticising the critics and grammarians of the schools, he has taken them upon their own ground—showing their errors, for the most part, in contrast with the common principles which they themselves have taught; and has hoped to escape censure, in his turn, not by sheltering himself under the name of a popular master, but by a diligence which should secure to his writings at least the humble merit of self-consistency. His progress in composing this work has been slow, and not unattended with labour and difficulty. Amidst the contrarieties of opinion, that appear in the various treatises already before the public, and the perplexities inseparable from so complicated a subject, he has, after deliberate consideration, adopted those views and explanations which appeared to him the least liable to objection, and the most compatible with his ultimate object—the production of a work which should show, both extensively and accurately, what is, and what is not, good English.

36. The great art of meritorious authorship lies chiefly in the condensation of much valuable thought into few words. Although the author has here allowed himself ampler room than before, he has still been no less careful to store it with such information as he trusted would prevent the ingenious reader from wishing its compass less. He has compressed into this volume the most essential parts of a mass of materials in comparison with which the book is still exceedingly small. The effort to do this, has greatly multiplied his own labour and long delayed the promised publication; but in proportion as this object has been reached, the time and patience of the student must have been saved. Adequate compensation for this long toil, has never been expected. Whether from this performance any profit shall accrue to the author or not, is a matter of little consequence; he has neither written for bread, nor on the credit of its proceeds built castles in the air. His ambition was, to make an acceptable book, by which the higher class of students might be thoroughly instructed, and in which the eyes of the critical would find little to condemn. He is too well versed in the history of his theme, too well aware of the precarious fortune of authors, to indulge in any confident anticipations of extraordinary success: yet he will not deny that his hopes are large, being conscious of having cherished them with a liberality of feeling which cannot fear disappointment. In this temper he would invite the reader to a thorough perusal of these pages.

37. A grammar should speak for itself. In a work of this nature, every word or tittle which does not recommend the performance to the understanding and taste of the skillful, is, so far as it goes, a certificate against it. Yet if some small errors shall have escaped detection, let it be recollected that it is almost impossible to compose and print, with perfect accuracy, a work of this size, in which so many little things should be observed, remembered, and made exactly to correspond. There is no human vigilance which multiplicity may not sometimes baffle, and minuteness sometimes elude. To most persons grammar seems a dry and difficult subject; but there is a disposition of mind, to which what is arduous, is for that very reason alluring. “*Quo difficilior, hoc præclarior*,” says Cicero; “The more difficult, the more honourable.” The merit of casting up a high-way in a rugged land, is proportionate not merely to the utility of the achievement, but to the magnitude of the obstacles to be overcome. The difficulties encountered in boyhood from

the use of a miserable epitome and the deep impression of a few mortifying blunders made in public, first gave the author a fondness for grammar; circumstances having since favoured this turn of his genius, he has voluntarily pursued the study, with an assiduity which no man will ever imitate for the sake of pecuniary recompense.

## CHAPTER X. OF GRAMMATICAL DEFINITIONS.

“Scientiam autem nusquam esse censebant, nisi in animi motionibus atque rationibus: quâ de causâ *definitiones* rerum probabant, et has ad omnia, de quibus disceptabatur, adhibebant.”—CICERONIS *Academica*, Lib. i, 9.

1. “The first and highest philosophy,” says Puffendorf, “is that which delivers the most accurate and comprehensive *definitions* of things.” Had all the writers on English grammar been adepts in this philosophy, there would have been much less complaint of the difficulty and uncertainty of the study. “It is easy,” says Murray, “to advance plausible objections against almost every definition, rule, and arrangement of grammar.”—*Gram.*, 8vo, p. 59. But, if this is true, as regards his, or any other work, the reason, I am persuaded, is far less inherent in the nature of the subject than many have supposed.\* Objectionable definitions and rules are but evidences of the ignorance and incapacity of him who frames them. And if the science of grammar has been so unskillfully treated that almost all its positions may be plausibly impugned, it is time for some attempt at a reformation of the code. The language is before us, and he who knows most about it, can best prescribe the rules which we ought to observe in the use of it. But how can we expect children to deduce from a few particulars an accurate notion of general principles and their exceptions, where learned doctors have so often faltered? Let the abettors of grammatical “*induction*” answer.

2. Nor let it be supposed a light matter to prescribe with certainty the principles of grammar. For, what is requisite to the performance? To know certainly, in the first place, what is the *best usage*. Nor is this all. Sense and memory must be keen, and tempered to retain their edge and hold, in spite of any difficulties which the subject may present. To understand things exactly as they are; to discern the differences by which they may be distinguished, and the resemblances by which they ought to be classified; to know, through the proper evidences of truth, that our ideas, or conceptions, are rightly conformable to the nature, properties, and relations, of the objects of which we think; to

---

\* Samuel Kirkham, whose grammar is briefly described in the third chapter of this introduction, boldly lays the blame of all his philological faults, upon our noble *language itself*; and even conceives, that a well-written and faultless grammar cannot be a good one, because it will not accord with that reasonless jumble which he takes every existing language to be! How diligently he laboured to perfect his work, and with what zeal for truth and accuracy, may be guessed from the following citation: “The truth is, after all *which* can be done to render the definitions and rules of grammar comprehensive and accurate, they will still be found, when critically examined by men of learning and science, *more* or *less* exceptionable. *These exceptions and imperfections* are the unavoidable consequence of the *imperfections of the language*. Language as well as every thing else *of human invention*, will always be *imperfect*. Consequently, a perfect system of grammatical principles, *would not suit it*. A perfect grammar will not be produced, until some perfect being writes it for a perfect language; and a perfect language will not be constructed, until *some super-human agency* is employed in its production. All grammatical principles and systems which are not *perfect* are *exceptionable*.”—*Kirkham’s Grammar*, p. 66. The unplausible sophistry of these strange remarks, and the palliation they afford to the multitudinous defects of the book which contains them, may be left, without further comment, to the judgement of the reader.

see how that which is complex may be resolved into its elements, and that which is simple may enter into combination; to observe how that which is consequent may be traced to its cause, and that which is regular be taught by rule; to learn from the custom of speech the proper connexion between words and ideas, so as to give to the former a just application, to the latter an adequate expression, and to things a just description; to have that penetration which discerns what terms, ideas, or things, are definable, and therefore capable of being taught, and what must be left to the teaching of nature: these are the essential qualifications for him who would form good definitions; these are the elements of that accuracy and comprehensiveness of thought, to which allusion has been made, and which are characteristic of “the first and highest philosophy.”

3. Again, with reference to the cultivation of the mind, I would add: To observe accurately the appearances of things, and the significations of words; to learn first principles first, and proceed onward in such a manner that every new truth may help to enlighten and strengthen the understanding; and thus to comprehend gradually, according to our capacity, whatsoever may be brought within the scope of human intellect:—to do these things, I say, is, to ascend by sure steps, so far as we may, from the simplest elements of science—which, in fact, are our own, original, undefinable notices of things—towards the very topmost height of human wisdom and knowledge. The ancient saying, that truth lies hid, or in the bottom of a well, must not be taken without qualification; for “the first and highest philosophy” has many principles which even a child may understand. These several suggestions, the first of which the Baron de Puffendorf thought not unworthy to introduce his great work on the Law of Nature and of Nations, the reader, if he please, may bear in mind, as he peruses the following digest of the laws and usages of speech.

4. “Definitions,” says Duncan, in his Elements of Logic, “are intended to make known the meaning of words standing for *complex ideas*;<sup>\*</sup> and were we always careful to form those ideas exactly in our minds, and copy our definitions from that appearance, much of the confusion and obscurity complained of in languages might be prevented.”—P. 70. Again he says: “The writings of the mathematicians are a clear proof, how much the advancement of human knowledge depends upon a right use of definitions.”—P. 72. Mathematical science has been supposed to be, in its own nature, that which is best calculated to develop and strengthen the reasoning faculty; but, as speech is emphatically *the discourse of reason*, I am persuaded, that had the grammarians been equally clear and logical in their instructions, their science would never have been accounted inferior in this respect. Grammar is perhaps the most comprehensive of all studies; but it is chiefly owing to the unskillfulness of instructors, and to the errors and defects of the systems in use, that it is commonly regarded as the most dry and difficult.

5. “Poor Scaliger (who well knew what a definition should be) from his own melancholy experience exclaimed—‘*Nihil infelicius grammatico definitore!*’ Nothing is more unhappy than the grammatical definer.”—*Tooke’s Diversions*, Vol. i, p. 238. Nor do our later

---

\* The phrase *complex ideas*, or *compound ideas*, has been used for the notions which we have of things consisting of different parts, or having various properties, so as to embrace some sort of plurality: thus our ideas of *all bodies* and *classes of things* are said to be complex or compound. *Simple ideas* are those in which the mind discovers no parts or plurality: such are the ideas of *heat*, *cold*, *blueness*, *redness*, *pleasure*, *pain*, *volition*, &c. But some writers have contended, that the *composition of ideas* is a fiction; and that all the complexity, in any case, consists only in the use of a *general term* in lieu of many particular ones. Locke is on one side of this debate, Horne Tooke, on the other.

teachers appear to have been more fortunate in this matter. A majority of all the definitions and rules contained in the great multitude of English grammars which I have examined, are, in some respect or other, erroneous. The nature of their multitudinous faults, I must in general leave to the discernment of the reader, except the passages be such as may be suitably selected for examples of false syntax. Enough, however, will be exhibited, in the course of this volume, to make the foregoing allegation credible; and of the rest a more accurate judgement may perhaps be formed, when they shall have been compared with what this work will present as substitutes. The importance of giving correct definitions to philological terms, and of stating with perfect accuracy whatsoever is to be learned as doctrine, has never been duly appreciated. The grand source of the disheartening difficulties encountered by boys in the study of grammar, lies in their ignorance of the meaning of words. This cause of embarrassment is not to be shunned and left untouched; but, as far as possible, it ought to be removed. In teaching grammar, or indeed any other science, we cannot avoid the use of many terms to which young learners may have attached no ideas. Being little inclined or accustomed to reflection, they often hear, read, or even rehearse from memory, the plainest language that can be uttered, and yet have no very distinct apprehension of what it means. What marvel then, that in a study abounding with terms taken in a peculiar or technical sense, many of which, in the common manuals, are either left undefined, or are explained but loosely or erroneously, they should often be greatly puzzled, and sometimes totally discouraged?

6. *Simple ideas* are derived, not from teaching, but from sensation or consciousness; but *complex ideas*, or the notions which we have of such things as consist of various parts, or such as stand in any known relations, are definable. A person can have no better definition of *heat*, or of *motion*, than what he will naturally get by *moving* towards a *fire*. Not so of our complex or general ideas, which constitute science. The proper objects of scientific instruction consist in those genuine perceptions of pure mind, which form the true meaning of generic names, or common nouns; and he who is properly qualified to teach, can for the most part readily tell what should be understood by such words. But are not many teachers too careless here? For instance: a boy commencing the process of calculation, is first told, that, "Arithmetic is the art of computing by numbers," which sentence he partly understands; but should he ask his teacher, "What is a *number*, in arithmetic?" what answer will he get? Were Gould Brown so asked, he would simply say, "*A number, in arithmetic, is an expression that tells how many;*" for every expression that tells how many, is a number in arithmetic, and nothing else is. But as no such definition is contained in *the books*,\* there are ten chances to one, that, simple as the matter is, the readiest master you shall find, will give an erroneous answer. Suppose the teacher should say, "That is a question which I have not thought of; turn to your dictionary." The boy reads from Dr. Webster: "NUMBER—the designation of a unit in reference to other units, or in reckoning, counting, enumerating."—"Yes," replies the master, "that is it; Dr. Webster is unrivalled in giving definitions." Now, has the boy been instructed, or only puzzled? Can he conceive how the number *five* can be a *unit*? or how the word *five*, the figure 5, or the numeral letter V, is "the designation of a *unit*?" He knows that each of these is a number,

---

\* Dilworth appears to have had a true *idea* of the thing, but he does not express it as a definition; "Q. Is an Unit of one, a Number? A. An Unit is a number, *because it may properly answer the question how many!*"—*Schoolmaster's Assistant*, p. 2. A number in arithmetic, and a number in grammar, are totally different things. The *plural* number, as *men* or *horses*, does not tell *how many*; nor does the word *singular* mean *one*, as the author of a recent grammar says it does. The *plural* number is *one* number, but it is not *the singular*. "The *Productive System*" teaches thus: "What does the word *singular* mean? It means *one*."—*Smith's New Gram.*, p. 7.

and that the oral monosyllable *five* is the same number, in an other form; but is still as much at a loss for a proper answer to his question, as if he had never seen either schoolmaster or dictionary. So is it with a vast number of the simplest things in grammar.

7. Since what we denominate scientific terms, are seldom, if ever, such as stand for ideas simple and undefinable; and since many of those which represent general ideas, or classes of objects, may be made to stand for more or fewer things, according to the author's notion of classification; it is sufficiently manifest that the only process by which instruction can effectually reach the understanding of the pupil and remove the difficulties spoken of, is that of delivering accurate definitions. These are requisite for the information and direction of the learner; and these must be thoroughly impressed upon his mind, as the only means by which he can know exactly how much and what he is to understand by our words. The power which we possess, of making known all our complex or general ideas of things by means of definitions, is a faculty wisely contrived in the nature of language, for the increase and spread of science; and, in the hands of the skillful, it is of vast avail to these ends. It is "the first and highest philosophy," instructing mankind, to think clearly and speak accurately; as well as to know definitely, in the unity and permanence of a general nature, those things which never could be known or spoken of as the individuals of an infinite and fleeting multitude.

8. And, without contradiction, the shortest and most successful way of teaching the young mind to distinguish things according to their proper differences, and to name or describe them aright, is, to tell in direct terms what they severally are. Cicero intimates that all instruction appealing to reason ought to proceed in this manner: "Omnis enim quæ à ratione suscipitur de re aliqua institutio, debet à *definitione* proficisci, ut intelligatur quid sit id, de quo disputetur."—*Off.* Lib. i, p. 4. Literally thus: "For all instruction which from reason is undertaken concerning any thing, ought to proceed from a *definition*, that it may be understood what the thing is, about which the speaker is arguing." Little advantage, however, will be derived from any definition, which is not, as Quintilian would have it, "Lucida et succincta rei descriptio,"—"a clear and brief description of the thing."

9. Let it here be observed that scientific definitions are of *things*, and not merely of *words*; or if equally of words *and* things, they are rather of nouns than of the other parts of speech. For a definition, in the proper sense of the term, consists not in a mere change or explanation of the verbal sign, but in a direct and true answer to the question, What is such or such a thing? In respect to its extent, it must with equal exactness include every thing which comes under the name, and exclude every thing which does not come under the name: then will it perfectly serve the purpose for which it is intended. To furnish such definitions, (as I have suggested,) is work for those who are capable of great accuracy both of thought and expression. Those who would qualify themselves for teaching any particular branch of knowledge, should make it their first concern to acquire clear and accurate ideas of all things that ought to be embraced in their instructions. These ideas are to be gained, either by contemplation upon the things themselves as they are presented naturally, or by the study of those books in which they are rationally and clearly explained. Nor will such study ever be irksome to him whose generous desire after knowledge, is thus deservedly gratified.

10. But it must be understood, that although scientific definitions are said to be *of things*, they are not copied immediately from the real essence of the things, but are formed

from the conceptions of the author's mind concerning that essence. Hence, as Duncan justly remarks, "A mistaken idea never fails to occasion a mistake also in the definition." Hence, too, the common distinction of the logicians, between definitions of the *name* and definitions of the *thing*, seems to have little or no foundation. The former term they applied to those definitions which describe the objects of pure intellection, such as triangles, and other geometrical figures; the latter, to those which define objects actually existing in external nature. The mathematical definitions, so noted for their certainty and completeness, have been supposed to have some peculiar preëminence, as belonging to the former class. But, in fact the idea of a triangle exists as substantively in the mind, as that of a tree, if not indeed more so; and if I define these two objects, my description will, in either case, be equally a definition both of the name and of the thing; but in neither, is it copied from any thing else than that notion which I have conceived, of the common properties of all triangles or of all trees.

11. Infinitives, and some other terms not called nouns, may be taken abstractly or substantively, so as to admit of what may be considered a regular definition; thus the question, "What is it *to read*?" is nearly the same as, "What is *reading*?" "What is it *to be wise*?" is little different from, "What is *wisdom*?" and a true answer might be, in either case, a true definition. Nor are those mere translations or explanations of words, with which our dictionaries and vocabularies abound, to be dispensed with in teaching: they prepare the student to read various authors with facility, and furnish him with a better choice of terms, when he attempts to write. And in making such choice, let him remember, that as affectation of *hard* words makes composition ridiculous, so the affectation of *easy* and *common* ones may make it unmanly. But not to digress. With respect to grammar, we must sometimes content ourselves with such explications of its customary terms, as cannot claim to be perfect definitions; for the most common and familiar things are not always those which it is the most easy to define. When Dr. Johnson was asked, "What is *poetry*?" he replied, "Why, sir, it is easier to tell what it is not. We all know what *light* is: but it is not easy *to tell what it is*."—*Boswell's Life of Johnson*, Vol. iii, p. 402. This was thought by the biographer to have been well and ingeniously said.

12. But whenever we encounter difficulties of this sort, it may be worth while to seek for their *cause*. If we find it, the understanding is no longer puzzled. Dr. Johnson seemed to his biographer, to show, by this ready answer, the acuteness of his wit and discernment. But did not the wit consist in adroitly excusing himself, by an illusory comparison? What analogy is there between the things which he compares? Of the difficulty of defining *poetry*, and the difficulty of defining *light*, the reasons are as different as are the two things themselves, *poetry* and *light*. The former is something so various and complex that it is hard to distinguish its essence from its accidents; the latter presents an idea so perfectly simple and unique that all men conceive of it exactly in the same way, while none can show wherein it essentially consists. But is it true, that, "We all know *what light is*?" Is it not rather true, that we know nothing at all about it, but what it is just as easy to tell as to think? We know it is that reflexible medium which enables us to see; and this is definition enough for all but the natively blind, to whom no definition perhaps can ever convey an adequate notion of its use in respect to sight.

13. If a person cannot tell what a thing is, it is commonly considered to be a fair inference, that he does not know. Will any grammarian say, "I know well enough what the thing is, but I cannot tell?" Yet, taken upon this common principle, the authors of our English grammars, (if in framing their definitions they have not been grossly wanting to

themselves in the exercise of their own art,) may be charged, I think, with great ignorance, or great indistinctness of apprehension; and that, too, in relation to many things among the very simplest elements of their science. For example: Is it not a disgrace to a man of letters, to be unable to tell accurately what a letter is? Yet to say, with Lowth, Murray, Churchill, and a hundred others of inferior name, that, “A letter is *the first principle* or *least part* of a word,” is to utter what is neither good English nor true doctrine. The two articles *a* and *the* are here inconsistent with each other. “A letter” is *one* letter, *any* letter; but “*the first principle* of a word” is, surely, not one or any principle taken *indefinitely*. Equivocal as the phrase is, it must mean either *some particular principle*, or some particular *first* principle, of a word; and, taken either way, the assertion is false. For it is manifest, that in *no sense* can we affirm of *each* of the letters of a word, that it is “*the first principle*” of that word. Take, for instance, the word *man*. Is *m* the first principle of this word? You may answer, “Yes; for it is the first *letter*.” Is *a* the first principle? “No; it is the *second*.” But *n* too is a letter; and is *n* the first principle? “No; it is the *last*!” This grammatical error might have been avoided by saying, “*Letters* are the first principles, or least parts, of words.” But still the definition would not be true, nor would it answer the question, What is a letter? The true answer to which is: “A letter is an alphabetic *character*, which commonly represents some elementary sound of human articulation, or speech.”

14. This true definition sufficiently distinguishes letters from the marks used in punctuation, because the latter are not alphabetic, and they represent silence, rather than sound; and also from the Arabic figures used for numbers, because these are no part of any alphabet, and they represent certain entire words, no one of which consists only of one letter, or of a single element of articulation. The same may be said of all the characters used for abbreviation; as, & for *and*, \$ for *dollars*, or the marks peculiar to mathematicians, to astronomers, to druggists, &c. None of these are alphabetic, and they represent significant words, and not single elementary sounds: it would be great dullness, to assume that a word and an elementary sound are one and the same thing. But the reader will observe that this definition embraces *no idea* contained in the faulty one to which I am objecting; neither indeed could it, without a blunder. So wide from the mark is that notion of a letter, which the popularity of Dr. Lowth and his copyists has made a hundred-fold more common than any other!\* According to an other erroneous definition given by these same gentlemen, “*Words* are articulate *sounds*, used by common consent, as signs of our ideas.”—*Murray’s Gram.*, p. 22; *Kirkham’s*, 20; *Ingersoll’s*, 7; *Alger’s*, 12; *Russell’s*, 7; *Merchant’s*, 9; *Fisk’s*, 11; *Greenleaf’s*, 20; and many others. See *Lowth’s Gram.*, p. 6; from which almost all authors have taken the notion, that words consist of “*sounds*” only. But letters are no principles or parts of *sounds* at all; unless you will either have visible marks to be sounds, or the sign to be a principle or part of the thing signified. Nor are they always principles or parts of *words*: we sometimes write what is *not a word*; as when, by letters, we denote pronunciation alone, or imitate brute voices. If words were formed of articulate sounds only, they could not exist in books, or be in any wise known to the deaf and dumb. These two primary definitions, then, are both false; and, taken together, they involve the absurdity of dividing things acknowledged to be indivisible. In

---

\* It is truly astonishing that so great a majority of our grammarians could have been so blindly misled, as they have been, in this matter; and the more so, because a very good definition of a Letter was both published and republished, about the time at which Lowth’s first appeared: viz., “What is a letter? A Letter is the Sign, Mark, or Character of a simple or uncompounded Sound. Are Letters Sounds? No. Letters are only the Signs or Symbols of Sounds, not the Sounds themselves.”—*The British Grammar*, p. 3. See the very same words on the second page of *Buchanan’s “English Syntax,”* a work which was published as early as 1767.

utterance, we cannot divide consonants from their vowels; on paper, we can. Hence letters are the least parts of written language only; but the least parts of spoken words are syllables, and not letters. Every definition of a consonant implies this.

15. They who cannot define a letter or a word, may be expected to err in explaining other grammatical terms. In my opinion, nothing is well written, that can possibly be misunderstood; and if any definition be likely to *suggest* a wrong idea, this alone is enough to condemn it: nor does it justify the phraseology, to say, that a more reasonable construction can be put upon it. By Murray and others, the young learner is told, that, “A *vowel* is an articulate *sound*, that can be perfectly *uttered by itself*,” as if a vowel were nothing but a sound, and that a sort of echo, which can *utter itself*; and next, that, “A *consonant* is an articulate *sound*, which cannot be perfectly uttered *without the help of* a vowel.” Now, by their own showing, every letter is either a vowel or a consonant; hence, according to these definitions, all the letters are articulate *sounds*. And, if so, what is a “silent letter?” It is a *silent articulate sound*! Again: ask a boy, “What is a *triphthong*?” He answers in the words of Murray, Weld, Pond, Smith, Adams, Kirkham, Merchant, Ingersoll, Bacon, Alger, Worcester, and others: “A triphthong is the union of three vowels, *pronounced in like manner*: as *eau* in beau, *iew* in view.” He accurately cites an entire paragraph from his grammar, but does he well conceive how the three vowels in *beau* or *view* are “pronounced *in like manner*?” Again: “A *syllable* is a *sound*, either simple or *compound*, pronounced by a single impulse of the voice.”—*Murray’s Gram.*, 8vo, p. 22. This definition resolves syllables into *sounds*; whereas their true elements are *letters*. It also mistakes the participle *compounded* for the adjective *compound*; whereas the latter only is the true reverse of *simple*. A *compound sound* is a sound composed of others which may be separated; a *sound compounded* is properly that which is made an ingredient with others, but which may itself be simple.

16. It is observable, that in their attempts to explain these prime elements of grammar, Murray, and many others who have copied him, overlook all *written* language; whereas their very science itself took its origin, name, and nature, from the invention of writing; and has consequently no bearing upon any dialect which has not been written. Their definitions absurdly resolve letters, vowels, consonants, syllables, and words, all into *sounds*; as if none of these things had any existence on paper, or any significance to those who read in silence. Hence, their explanations of all these elements, as well as of many other things equally essential to the study, are palpably erroneous. I attribute this to the carelessness with which men have compiled or made up books of grammar; and that carelessness to those various circumstances, already described, which have left diligence in a grammarian no hope of praise or reward. Without alluding here to my own books, no one being obliged to accuse himself, I doubt whether we have any school grammar that is much less objectionable in this respect, than Murray’s; and yet I am greatly mistaken, if nine tenths of all the definitions in Murray’s system are not faulty. “It was this sort of definitions, which made *Scaliger* say, ‘*Nihil infelicius definitore grammatico.*’”—See *Johnson’s Gram. Com.*, p. 351; also *Paragraph* 5th, above.

17. Nor can this objection be neutralized by saying, it is a mere matter of opinion—a mere prejudice originating in rivalry. For, though we have ample choice of terms, and may frequently assign to particular words a meaning and an explanation which are in some degree arbitrary; yet whenever we attempt to define things under the name which custom has positively fixed upon them, we are no longer left to arbitrary explications; but are bound to think and to say that only which shall commend itself to the understanding of

others, as being altogether true to nature. When a word is well understood to denote a particular object or class of objects, the definition of it ought to be in strict conformity to what is known of the real being and properties of the thing or things contemplated. A definition of this kind is a proposition susceptible of proof and illustration; and therefore whatsoever is erroneously assumed to be the proper meaning of such a term, may be refuted. But those persons who take every thing upon trust, and choose both to learn and to teach mechanically, often become so slavishly habituated to the peculiar phraseology of their text-books, that, be the absurdity of a particular expression what it may, they can neither discover nor suspect any inaccuracy in it. It is also very natural even for minds more independent and acute, to regard with some reverence whatsoever was gravely impressed upon them in childhood. Hence the necessity that all school-books should proceed from skillful hands. Instruction should tell things as they are, and never falter through negligence.

18. I have admitted that definitions are not the only means by which a general knowledge of the import of language may be acquired; nor are they the only means by which the acquisition of such knowledge may be aided. To exhibit or point out *things* and tell their names, constitutes a large part of that instruction by which the meaning of words is conveyed to the young mind; and, in many cases, a mere change or apposition of terms may sufficiently explain our idea. But when we would guard against the possibility of misapprehension, and show precisely what is meant by a word, we must fairly define it. There are, however, in every language, many words which do not admit of a formal definition. The import of all definitive and connecting particles must be learned from usage, translation, or derivation; and nature reserves to herself the power of explaining the objects of our simple original perceptions. "All words standing for complex ideas are definable; but those by which we denote simple ideas, are not. For the perceptions of this latter class, having no other entrance into the mind, than by sensation or reflection, can be acquired only by experience."—*Duncan's Logic*, p. 63. "And thus we see, that as our simple ideas are the materials and foundation of knowledge, so the names of simple ideas may be considered as the elementary parts of language, beyond which we cannot trace the meaning and signification of words. When we come to them, we suppose the ideas for which they stand to be already known; or, if they are not, experience alone must be consulted, and not definitions or explications."—*Ibid.*, p. 69.

19. But this is no apology for the defectiveness of any definition which might be made correct, or for the effectiveness of our English grammars, in the frequent omission of all explanation, and the more frequent adoption of some indirect form of expression. It is often much easier to make some loose observation upon what is meant by a given word or term in science, than to frame a faultless definition of the thing; because it is easier to refer to some of the relations, qualities, offices, or attributes of things, than to discern wherein their essence consists, so as to be able to tell directly and clearly what they are. The improvement of our grammatical code in this respect, was one of the principal objects which I thought it needful to attempt, when I first took up the pen as a grammarian. I cannot pretend to have seen, of course, every definition and rule which has been published on this subject; but, if I do not misjudge a service too humble for boasting, I have myself framed a greater number of new or improved ones, than all other English grammarians together. And not a few of them have, since their first publication in 1823, been complimented to a place in other grammars than my own. This is in good keeping with the authorship which has been spoken of in an other chapter; but I am constrained to say, it affords no proof that they were well written. If it did, the definitions and rules in

Murray's grammar must undoubtedly be thought the most correct that ever have been given: they have been more frequently copied than any others.

20. But I have ventured to suggest, that nine tenths of this author's definitions are bad, or at least susceptible of some amendment. If this can be shown to the satisfaction of the reader, will he hope to find an other English grammar in which the eye of criticism may not detect errors and deficiencies with the same ease? My object is, to enforce attention to the proprieties of speech; and this is the very purpose of all grammar. To exhibit here all Murray's definitions, with criticisms upon them, would detain us too long. We must therefore be content to take a part of them as a sample. And, not to be accused of fixing only upon the worst, we will take a *series*. Let us then consider in their order his definitions of the nine parts of speech;—for, calling the participle a verb, he reduces the sorts of words to that number. And though not one of his nine definitions now stands exactly as it did in his early editions, I think it may be said, that not one of them is now, if it ever has been, expressed grammatically.

21. FIRST DEFINITION:—"An Article is a word *prefixed* to substantives, *to point them out*, and to show how far *their*\* signification extends."—*Murray, and others*, from, *Lowth's Gram.*, p. 10. This is obscure. In what manner, or in what respect, does an article point out substantives? To point them out *as such*, or to show which words are substantives, seems at first view to be the meaning intended; but it is said soon after, "*A* or *an* is used in a vague sense, to *point out* one single *thing* of the kind, in other respects *indeterminate*; as, 'Give me *a* book;' 'Bring me *an* apple.'"—*Lowth*, p. 11; *Murray*, p. 31. And again: "It is *of the nature* of both the articles to determine or limit *the thing* spoken of."—*Murray's Gram.*, 8vo, p. 170. Now to point out *nouns* among the parts of speech, and to point out *things* as individuals of their class, are very different matters; and which of these is the purpose for which articles are used, according to Lowth and Murray? Their definition says the former, their explanations imply the latter; and I am unable to determine which they really meant. The term *placed before* would have been better than "*prefixed*;" because the latter commonly implies junction, as well as location. The word "*indeterminate*" is not a very easy one for a boy; and, when he has found out what it means, he may possibly not know to which of the four preceding nouns it ought to be referred:—"in a vague *sense*, to point out one single *thing* of the *kind*, in other *respects* indeterminate." What is this "vague sense?" and what is it, that is "indeterminate?"

22. SECOND DEFINITION:—"A Substantive or Noun is the name of any thing *that* exists, or of *which* we have any notion."—*Murray, and others*. According to his own syntax, this sentence of Murray's is wrong; for he himself suggests, that when two or more relative clauses refer to the same antecedent, the same pronoun should be used in each. Of clauses connected like these, this is true. He should therefore have said, "A Substantive, or Noun, is the name of any thing *which* exists, or of *which* we have any notion." His rule, however, though good against a text like this, is utterly wrong in regard to many others, and not very accurate in taking *two* for a "*series*" thus: "Whatever relative is used, in one of a *series* of clauses relating to the same antecedent, the same relative ought, generally to be used in *them all*. In the following sentence, *this rule is violated*: 'It is remarkable, that Holland, against *which* the war was undertaken, and *that*, in the very beginning, was reduced to the brink of destruction, lost nothing.' The clause ought to have been, 'and

---

\* In Murray's octavo Grammar, this word is *the* in the first chapter, and *their* in the second; in the duodecimo, it is *their* in both places.

*which* in the very beginning.”—*Murray’s Gram.*, 8vo, p. 155. But both the rule and the example, badly as they correspond, were borrowed from Priestley’s Grammar, p. 102, where the text stands thus: “Whatever relative *be* used, in one of a *series* of clauses, relating to the same antecedent, the same ought to be used in *them all*. It is remarkable, that Holland,” &c.

23. THIRD DEFINITION:—“An Adjective is a word added to a substantive, to express *its* quality.”—*Lowth, Murray, Bullions, Pond, and others*. Here we have the choice of two meanings; but neither of them is according to truth. It seems doubtful whether “*its* quality” is the *adjective’s* quality, or the *substantive’s*; but in either sense, the phrase is false; for an adjective is added to a noun, not to express any quality either of the adjective or of the noun, but to express some quality of the *thing signified* by the noun. But the definition is too much restricted; for adjectives may be added to pronouns as well as to nouns, nor do they always express *quality*.

24. FOURTH DEFINITION:—“A Pronoun is a word used instead of a noun, to *avoid the too frequent* repetition of *the same word*.”—*Dr. Ash’s Gram.*, p. 25; *Murray’s*, 28 and 50; *Felton’s*, 18; *Alger’s*, 13; *Bacon’s*, 10; *and others*. The latter part of this sentence is needless, and also contains several errors. 1. The verb *avoid* is certainly very ill-chosen; because it implies intelligent agency, and not that which is merely instrumental. 2. The article *the* is misemployed for *a*; for, “*the* too frequent repetition,” should mean *some particular* too frequent repetition—an idea not intended here, and in itself not far from absurdity. 3. The phrase, “*the same word*” may apply to the pronoun itself as well as to the noun: in saying, “*I* came, *I* saw, *I* conquered,” there is as frequent a repetition of *the same word*, as in saying, “*Cæsar* came, *Cæsar* saw, *Cæsar* conquered.” If, therefore, the latter part of this definition must be retained, the whole should be written thus: “A Pronoun is a word used *in stead* of a noun, to *prevent* too frequent *a* repetition of *it*.”

25. FIFTH DEFINITION:—“A Verb is a word which signifies *to be, to do, or to suffer*”—*Lowth, Murray, and others*. NOTE:—“A verb may generally be distinguished by *its making sense* with any of the personal pronouns, or the word *to* before it.”—*Murray, and others*. It is confessedly difficult to give a perfect definition of a *verb*; and if, with Murray, we will have the participles to be verbs, there must be no small difficulty in forming one that shall be tolerable. Against the foregoing old explanation, it may be objected, that the phrase *to suffer*, being now understood in a more limited sense than formerly, does not well express the nature or import of a passive verb. I have said, “A Verb is a word that signifies *to be, to act, or to be acted upon*.” Children cannot readily understand, how every thing that is in any way *acted upon*, may be said *to suffer*. The participle, I think, should be taken as a distinct part of speech, and have its own definition. The note added by Murray to his definition of a verb, would prove the participle not to be included in this part of speech, and thus practically contradict his scheme. It is also objectionable in respect to construction. The phrase “*by its making sense*” is at least very questionable English; for “*its making*” supposes *making* to be a noun, and “*making sense*” supposes it to be an active participle. But Lowth says, “Let it be either the one or the other, and abide by its own construction.” Nay, the author himself, though he therein contradicts an other note of his own, virtually condemns the phrase, by his caution to the learner against treating words in *ing*, “as if they were of an *amphibious species*, partly nouns and partly verbs.”—*Murray’s Gram.*, 8vo, p. 193.

26. SIXTH DEFINITION:—"An Adverb is *a part of speech joined* to a verb, an adjective, *and sometimes to* another adverb, to express some *quality* or *circumstance* respecting *it*."—*Murray's Gram.*, pp. 28 and 114. See *Dr. Ash's Gram.*, p. 47. This definition contains many errors; some of which are gross blunders. 1. The first word, "An," is erroneously put for *The*: *an* adverb is *one* adverb, not the whole class; and, if, "An adverb is *a part of speech*," any and every adverb is a *part of speech*; then, how many parts of speech are there? 2. The word "*joined*" is not well chosen; for, with the exception of *not* in *cannot*, the adverb is very rarely *joined* to the word to which it relates. 3. The want of a comma before *joined*, perverts the construction; for the phrase, "*speech joined* to a verb," is nonsense; and to suppose *joined* to relate to the noun *part*, is not much better. 4. The word "*and*" should be *or*; because no adverb is ever added to three or four different terms at once. 5. The word "*sometimes*" should be omitted; because it is needless, and because it is inconsistent with the only conjunction which will make the definition true. 6. The preposition "*to*" should either be inserted before "*an adjective*," or suppressed before the term which follows; for when several words occur in the same construction, uniformity of expression is desirable. 7. For the same reason, (if custom may be thus far conformed to analogy,) the article "*an*" ought, in cases like this, if not always, to be separated from the word *other*; thus, "An adverb is a word added to *a* verb, *a* participle, *an* adjective, or *an* other adverb." Were the eye not familiar with it, *another* would be thought as irregular as *theother*. 8. The word "*quality*" is wrong; for no adverb ever expresses any *quality*, as such; qualities are expressed by *adjectives*, and never, in any direct manner, by adverbs. 9. The "*circumstances*" which we express by adverbs never belong to the *words*, as this definition avers that they do, but always to the *actions* or *qualities* which the words signify. 10. The pronoun *it*, according to Murray's second rule of syntax, ought to be *them*, and so it stands in his own early editions; but if *and* be changed to *or*, as I have said it should be, the pronoun *it* will be right.

27. SEVENTH DEFINITION:—"Prepositions serve to connect words with *one another*, and to show the relation *between them*."—*Lowth, Murray, and others*. This is only an observation, not a definition, as it ought to have been; nor does it at all distinguish the preposition from the conjunction. It does not reach the thing in question. Besides, it contains an actual solecism in the expression. The word "*between*" implies *but two* things; and the phrase "*one another*" is not applicable where there are but two. It should be, "to connect words with *each other*, and to show the *relation between* them;"—or else, "to connect words with *one an other*, and to show the *relations among* them." But the latter mode of expression would not apply to prepositions considered severally, but only to the whole class.

28. EIGHTH DEFINITION:—"A Conjunction is *a part of speech* that is *chiefly* used to connect sentences; so as, out of two *or more* sentences, to make but one: it sometimes connects only words."—*Murray, and others*. Here are more than thirty words, awkwardly and loosely strung together; and all that is said in them, might be much better expressed in half the number. For example: "A Conjunction is a word which connects other terms, and commonly of two sentences makes but one." But verbosity and want of unity are not the worst faults of this definition. We have three others to point out. 1. "A conjunction is" not "*a part of speech*," because *a* conjunction is *one* conjunction, and a part of speech is a whole class, or sort, of words. A similar error was noticed in Murray's definition of an adverb; and so common has this blunder become, that by a comparison of the definitions which different authors have given of the parts of speech, probably it will be found, that, by some hand or other, every one of the ten has been commenced in this way. 2. The

words “*or more*” are erroneous, and ought to be omitted; for no one conjunction can connect more than two terms, in that consecutive order which the sense requires. Three or more simple sentences may indeed form a compound sentence; but, as they cannot be joined in a *cluster*, they must have two or more connectives. 3. The last clause erroneously suggests, that any or every conjunction “*sometimes connects only words*,” but the conjunctions which may connect only words, are not more than five, whereas those which connect only sentences are four times as many.

29. NINTH DEFINITION:—“Interjections are words *thrown in between the parts of a sentence*, to express the passions or emotions of the *speaker*; as, ‘O Virtue! how amiable thou art!’”—*Murray, and many others*. This definition, which has been copied from grammar to grammar, and committed to memory millions of times, is obviously erroneous, and directly contradicted by the example. Interjections, though often enough thrown in between the parts of a *discourse*, are very rarely “thrown in between the parts of a *sentence*.” They more frequently occur at the beginning of a sentence than any where else; and, in such cases, they do not come under this narrow definition. The author, at the head of his chapter on interjections, appends to this definition two other examples; both of which contradict it in like manner: “*Oh!* I have alienated my friend.”—“*Alas!* I fear for life.” Again: Interjections are used occasionally, in *written*, as well as in *oral* discourse; nor are they less indicative of the emotions of the *writer*, than of those “of the *speaker*.”

30. I have thus exhibited, with all intentional fairness of criticism, the entire series of these nine primary definitions; and the reader may judge whether they sustain the praises which have been bestowed on the book,\* or confirm the allegations which I have made against it. He will understand that my design is, here, as well as in the body of this work, to teach grammar practically, by *rectifying*, so far as I may, all sorts of mistakes either in it or respecting it; to compose a book which, by a condensed exposition of such errors as are commonly found in other grammars, will at once show the need we have of a better, and be itself a fit substitute for the principal treatises which it censures. Grammatical errors are universally considered to be small game for critics. They must therefore be very closely grouped together, to be worth their room in this work. Of the tens of thousands who have learned for grammar a multitude of ungrammatical definitions and rules, comparatively few will ever know what I have to say of their acquisitions. But this I cannot help. To the readers of the present volume it is due, that its averments should be clearly illustrated by particular examples; and it is reasonable that these should be taken from the most accredited sources, whether they do honour to their framers or not. My argument is only made so much the stronger, as the works which furnish its proofs, are the more esteemed, the more praised, or the more overrated.

31. Murray tells us, “There is no necessary connexion between words and ideas.”—*Octavo Gram.*, Vol. i, p. 139. Though this, as I before observed, is not altogether true, he doubtless had very good reason to distinguish, in his teaching, “between *the sign* and *the thing signified*.” Yet, in his own definitions and explanations, he frequently *confounds* these very things which he declares to be so widely different as not even to have a “necessary connexion.” Errors of this kind are very common in all our English grammars.

---

\* “The *definitions* and the *rules* throughout the Grammar, are expressed with neatness and perspicuity. They are as short and comprehensive as the nature of the subject would admit: and they are well adapted both to the understanding and the memory of young persons.”—*Life of L. Murray*, p. 245. “It may truly be said that the language in every part of the work, is simple, correct, and perspicuous.”—*Ib.*, p. 246.

Two instances occur in the following sentence; which also contains an error in doctrine, and is moreover obscure, or rather, in its literal sense, palpably absurd: "To substantives belong gender, number, and case; and *they* are *all of* the third person *when spoken of*, and of the second person *when spoken to*."—*Murray's Gram.*, p. 38; *Alger's Murray*, 16; *Merchant's*, 23; *Bacon's*, 12; *Maltby's*, 12; *Lyon's*, 7; *Guy's*, 4; *Ingersoll's*, 26; *S. Putnam's*, 13; *T. H. Miller's*, 17; *Rev. T. Smith's*, 13. Who, but a child taught by language like this, would ever think of *speaking to a noun*? or, that a noun of the second person *could not be spoken of*? or, that a noun cannot be put in the *first person*, so as to agree with *I* or *we*? Murray himself once taught, that, "Pronouns *must always agree* with their antecedents, *and* the nouns for which they stand, in gender, number, and *person*;" and he departed from a true and important principle of syntax, when he altered his rule to its present form. But I have said that the sentence above is obscure, or its meaning absurd. What does the pronoun "*they*" represent? "*Substantives*," according to the author's intent; but "*gender, number, and case*," according to the obvious construction of the words. Let us try a parallel." To scribes belong pen, ink, and paper; and *they* are all of primary importance when there is occasion to use them, and of none at all when they are not needed." Now, if this sentence is *obscure*, the other is not less so; but, if this is perfectly *clear*, so that what is said is obviously and only what is intended, then it is equally clear, that what is said in the former, is gross absurdity, and that the words cannot reasonably be construed into the sense which the writer, and his copyists, designed.

32. All Murray's grammars, not excepting the two volumes octavo, are as *incomplete* as they are *inaccurate*; being deficient in many things which are of so great importance that they should not be excluded from the very smallest epitome. For example: On the subject of the *numbers*, he attempted but one definition, and that is a fourfold solecism. He speaks of the *persons*, but gives neither definitions nor explanations. In treating of the *genders*, he gives but one formal definition. His section on the *cases* contains no regular definition. On the *comparison* of adjectives, and on the *moods* and *tenses* of verbs, he is also satisfied with a very loose mode of teaching. The work as a whole exhibits more industry than literary taste, more benevolence of heart than distinctness of apprehension; and, like all its kindred and progeny, fails to give to the principles of grammar that degree of clearness of which they are easily susceptible. The student does not know this, but he feels the effects of it, in the obscurity of his own views on the subject, and in the conscious uncertainty with which he applies those principles. In grammar, the terms *person, number, gender, case, mood, tense*, and many others, are used in a technical and peculiar sense; and, in all scientific works, the sense of technical terms should be clearly and precisely defined. Nothing can be gained by substituting other names of modern invention; for these also would need definitions as much as the old. We want to know the things themselves, and what they are most appropriately called. We want a book which will tell us, in proper order, and in the plainest manner, what all the elements of the science are.

33. What does he know of grammar, who cannot directly and properly answer such questions as these?—"What are numbers, in grammar? What is the singular number? What is the plural number? What are persons, in grammar? What is the first person? What is the second person? What is the third person? What are genders, in grammar? What is the masculine gender? What is the feminine gender? What is the neuter gender? What are cases, in grammar? What is the nominative case? What is the possessive case? What is the objective case?"—And yet the most complete acquaintance with every sentence or word of Murray's tedious compilation, may leave the student at a loss for a proper

answer, not only to each of these questions, but also to many others equally simple and elementary! A boy may learn by heart all that Murray ever published on the subject of grammar, and still be left to confound the numbers in grammar with numbers in arithmetic, or the persons in grammar with persons in civil life! Nay, there are among the professed *improvers* of this system of grammar, *men* who have actually confounded these things, which are so totally different in their natures! In “Smith’s New Grammar on the Productive System,” a work in which Murray is largely copied and strangely metamorphosed, there is an abundance of such confusion. For instance: “What is the meaning of the word *number*? Number means *a sum that may be counted*.”—*R. C. Smith’s New Gram.*, p. 7. From this, by a tissue of half a dozen similar absurdities, called *inductions*, the novice is brought to the conclusion that the numbers are *two*—as if there were in nature but two sums that might be counted! There is no end to the sickening detail of such blunders. How many grammars tell us, that, “The first person is the *person who speaks*,” that, “The second person is the *person spoken to*,” and that, “the third person is the *person spoken of*!” As if the three persons of a verb, or other part of speech, were so many *intelligent beings*! As if, by exhibiting a word in the three persons, (as *go*, *goest*, *goes*,) we put it first *into the speaker*, then *into the hearer*, and then *into somebody else*! Nothing can be more abhorrent to grammar, or to sense, than such confusion. The things which are identified in each of these three definitions, are as unlike as Socrates and moonshine! The one is a thinking being; the other, a mere form peculiar to certain words. But Chandler, of Philadelphia, (“the Grammar King,” forsooth!) without mistaking the grammatical persons for rational souls, has contrived to crowd into his definition of *person* more errors of conception and of language,—more insult to common sense,—than one could have believed it possible to put together in such space. And this ridiculous old twaddle, after six and twenty years, he has deliberately re-written and lately republished as something “adapted to the schools of America.” It stands thus: “*Person is a distinction which is made in a noun between its representation of its object, either as spoken to, or spoken of*.”—*Chandler’s E. Grammar*; Edition of 1821, p. 16; Ed. 1847, p. 21.

34. Grammarians have often failed in their definitions, because it is impossible to define certain terms in the way in which the description has been commonly attempted. He who undertakes what is impossible must necessarily fail; and fail too, to the discredit of his ingenuity. It is manifest that whenever a generic name in the singular number is to be defined, the definition must be founded upon some property or properties common to all the particular things included under the term. Thus, if I would define a *globe*, a *wheel*, or a *pyramid*, my description must be taken, not from what is peculiar to one or an other of these things, but from those properties only which are common to all globes, all wheels, or all pyramids. But what property has *unity* in common with *plurality*, on which a definition of *number* may be founded? What common property have the *three cases*, by which we can clearly define *case*? What have the *three persons* in common, which, in a definition of *person*, could be made evident to a child? Thus all the great classes of grammatical modifications, namely, *persons*, *numbers*, *genders*, *cases*, *moods*, and *tenses*, though they admit of easy, accurate, and obvious definitions in the plural, can scarcely be defined at all in the singular. I do not say, that the terms *person*, *number*, *gender*, *case*, *mood*, and *tense*, in their technical application to grammar, are all of them equally and absolutely undefinable in the singular; but I say, that no definition, just in sense and suitable for a child, can ever be framed for any one of them. Among the thousand varied attempts of grammarians to explain them so, there are a hundred gross solecisms for every tolerable definition. For this, as I have shown, there is a very simple reason in the nature of the things.

35. But this reason, as well as many other truths equally important and equally clear, our common grammarians, have, so far as I know, every man of them, overlooked. Consequently, even when they were aiming at the right thing, they frequently fell into gross errors of expression; and, what is still more surprising, such errors have been entailed upon the very art of grammar, and the art of authorship itself, by the prevalence of an absurd notion, that modern writers on this subject can be meritorious authors without originality. Hence many a school-boy is daily rehearsing from his grammar-book what he might well be ashamed to have written. For example, the following definition from Murray's grammar, is found in perhaps a dozen other compends, all professing to teach the art of speaking and writing with propriety: "*Number* is the *consideration of an object*, as *one* or *more*."\* Yet this short sentence, as I have before suggested, is a fourfold

---

\* For this definition, see *Murray's Gram.*, 8vo, p. 40; *Duodecimo*, 41; *Smaller Gram.*, 18; *Alger's*, 18; *Bacon's*, 15; *Frost's*, 8; *Ingersoll's*, 17; *A Teacher's*, 8; *Maltby's*, 14; *T. H. Miller's*, 20; *Pond's*, 18; *S. Putnam's*, 15; *Russell's*, 11; *Merchant's Murray*, 25; and *Worcester's Univ. and Crit. Dictionary*. Many other grammarians have attempted to define number; with what success a few examples will show: (1.) "Number is the distinction of one from many."—*W. Allen's Gram.*, p. 40; *Merchant's School Gram.*, 28; *Greenleaf's*, 22; *Nutting's*, 17; *Picket's*, 19; *D. Adams's*, 31. (2.) "Number is the distinction of one from more."—*Fisher's Gram.*, 51; *Alden's*, 7. (3.) "Number is the distinction of one from several or many."—*Coar's Gram.*, p. 24. (4.) "Number is the distinction of one from more than one."—*Sanborn's Gram.*, p. 24; *J. Flint's*, 27; *Wells's*, 52. (5.) "Number is the distinction of one from more than one, or many."—*Grant's Latin Gram.*, p. 7. (6.) "What is number? Number is the Distinction of one, from two, or many."—*British Gram.*, p. 89; *Buchanan's*, 16. (7.) "You inquire, 'What is number?' Merely this: *the distinction* of one from two, or many. Greek substantives have *three* numbers."—*Bucke's Classical Gram.*, p. 38. All these authors say, that, in English, "there are *two numbers*, the singular and the plural." According to their explanations, then, we have *two "distinctions of one from two, several, more, or many;"* and the Greeks, by adding a dual number, have *three!* Which, then, of the two or three modifications or forms, do they mean, when they say, "Number is *the distinction*" &c.? Or, if none of them, *what else* is meant? All these definitions had their origin in an old Latin one, which, although it is somewhat better, makes doubtful logic in its application: "NUMERUS est, unius et multorum distinctio. Numeri igitur sunt *duo*; Singularis et Pluralis."—*Ruddiman's Gram.*, p. 21. This means: (8.) "Number is a distinction of one and many. The numbers *therefore* are *two*; the Singular and the Plural." But we have yet other examples: as, (9.) "Number is the distinction of *objects*, as one or more."—*Kirkham's Gram.*, p. 39. "The *distinction* of *objects* as *one*," is very much like "the consideration of *an object* as *more than one*." (10.) "Number distinguishes *objects* as *one* or more."—*Cooper's Murray*, p. 21; *Practical Gram.*, p. 18. That is, number makes the plural to be either plural or singular for distinction's sake! (11.) "Number is the distinction of *nouns* with regard to the *objects* signified, *as one* or more."—*Fisk's Murray*, p. 19. Here, too, number has "regard" to the same confusion: while, by a gross error, its "distinction" is confined to "*nouns*" only! (12.) "Number is *that property* of a *noun* by which it expresses *one* or *more* than one."—*Bullions's E. Gram.*, p. 12; *Analyt. Gram.*, 25. Here again number is improperly limited to "*a noun*;" and is said to be one sign of two, or either of two, incompatible ideas! (13.) "Number shows *how many* are meant, whether one or more."—*Smith's new Gram.*, p. 45. This is not a *definition*, but a false assertion, in which Smith again confounds arithmetic with grammar! *Wheat* and *oats* are of different numbers; but neither of these numbers "means *a sum that may be counted*," or really "shows *how many* are meant." So of "*Man* in general, *Horses* in general, &c."—*Brightland's Gram.*, p. 77. (14.) "Number is *the difference* in a *noun or pronoun*, to denote either a single thing or more than one."—*Davenport's Gram.*, p. 14. This excludes the numbers of a *verb*, and makes the singular and the plural to be essentially one thing. (15.) "Number is a modification of nouns and verbs, &c. according as the thing spoken of is represented, as, *one* or *more*, with regard to number."—*Burn's Gram.*, p. 32. This also has many faults, which I leave to the discernment of the reader. (16.) "What is number? Number *shows the distinction* of one from many."—*Wilcox's Gram.*, p. 6. This is no answer to the question asked; besides, it is obviously worse than the first form, which has "*is*," for "*shows*." (17.) "What is Number? It is *the* representation of *objects* with respect to singleness, or plurality."—*O. B. Peirce's Gram.*, p. 34. If there are two numbers, they are neither of them properly described in this definition, or in any of the preceding ones. There is a gross misconception, in taking each or either of them to be an alternate representation of two incompatible ideas. And this sort of error is far from being confined to the present subject; it runs through a vast number of the various definitions contained in our grammars. (18.) "*Number* is *the inflection* of a *noun*, to indicate *one object or more than one*. Or, *Number* is *the expression*

solecism. *First*, the word “*number*” is wrong; because those modifications of language, which distinguish unity and plurality, cannot be jointly signified by it. *Secondly*, the word “*consideration*” is wrong; because *number* is not *consideration*, in any sense which can be put upon the terms: *condition*, *constitution*, *configuration*, or any other word beginning with *con*, would have done just as well. *Thirdly*, “the consideration of *an* object as *one*,” is but idle waste of thought; for, that one thing is one,—that *an* object is *one* object,—every child knows by *intuition*, and not by “*consideration*.” *Lastly*, to consider “*an* object as *more*” than one, is impossible; unless this admirable definition lead us into a misconception in so plain a case! So much for the art of “the grammatical definer.”

36. Many other examples, equally faulty and equally common, might, be quoted and criticised for the further proof and illustration of what I have alleged. But the reader will perhaps judge the foregoing to be sufficient. I have wished to be brief, and yet to give my arguments, and the neglected facts upon which they rest, their proper force upon the mind. Against such prejudices as may possibly arise from the authorship of rival publications, or from any interest in the success of one book rather than of an other, let both my judges and me be on our guard. I have intended to be fair; for captiousness is not criticism. If the reader perceives in these strictures any improper bias, he has a sort of discernment which it is my misfortune to lack. Against the compilers of grammars, I urge no conclusions at which any man can hesitate, who accedes to my preliminary remarks upon them; and these may be summed up in the following couplet of the poet Churchill:

“To copy beauties, forfeits all pretence  
To fame;—to copy faults, is want of sense.”

## CHAPTER XI.

### BRIEF NOTICES OF THE SCHEMES OF CERTAIN GRAMMARS.

“Sed ut perveniri ad summa nisi ex principiis non potest: ita, procedente jam opere, minima incipiunt esse quæ prima sunt.”—QUINTILIAN. *De Inst. Orat.*, Lib. x, Cap. 1, p. 560.

---

of unity or of more than unity.”—*Hiley's Gram.*, p. 14. How hard this author laboured to *think what number is*, and could not! (19.) “Number is the distinction of *unity and plurality*.”—*Hart's E. Gram.*, p. 40. Why say, “*distinction*,” the numbers, or *distinctions*, being two? (20.) “Number is *the capacity of nouns* to represent either one or more than one object.”—*Barrett's Revised Gram.*, p. 40. (21.) “Number is *a property of the noun which* denotes *one* or *more* than one.”—*Weld's Gram.*, 2d Ed., p. 55. (22.) “Number is *a property of the noun or pronoun* [,] *by which it* denotes *one, or more* than one.”—*Weld's Gram., Abridged Ed.*, p. 49. (23.) “Number is *the property* that distinguishes *one from more* than one.”—*Weld's Gram., Improved Ed.*, p. 60. This, of course, excludes the plural. (24.) “Number is *a modification of nouns* to denote whether one object is meant, or more than one.”—*Butler's Gram.*, p. 19. (25.) “Number is *that modification of the Noun* which distinguishes one from more than one.”—*Spencer's Gram.*, p. 26. Now, it is plain, that not one of these twenty-five definitions comports with the idea that the singular is one number and the plural an other! Not one of them exhibits any tolerable approach to accuracy, either of thought or of expression! Many of the grammarians have not attempted any definition of *number*, or of *the numbers*, though they speak of both the singular and the plural, and perhaps sometimes apply the term *number* to *the distinction* which is *in each*: for it is the property of the singular number, to distinguish unity from plurality: and of the plural, to distinguish plurality from unity. Among the authors who are thus silent, are Lily, Colet, Brightland, Harris, Lowth, Ash, Priestly, Bicknell, Adam, Gould, Harrison, Comly, Jaudon, Webster, Webber, Churchill, Staniford, Lennie, Dalton, Blair, Cobbett, Cobb, A. Flint, Felch, Guy, Hall, and S. W. Clark. Adam and Gould, however, in explaining the properties of *verbs*, say: “Number marks *how many* we suppose to be, to act, or to suffer.”—*A.*, 80; *G.*, 78.

1. The *history* of grammar, in the proper sense of the term, has heretofore been made no part of the study. I have imagined that many of its details might be profitable, not only to teachers, but to that class of learners for whose use this work is designed. Accordingly, in the preceding pages, there have been stated numerous facts properly historical, relating either to particular grammars, or to the changes and progress of this branch of instruction. These various details it is hoped will be more entertaining, and perhaps for that reason not less useful, than those explanations which belong merely to the construction and resolution of sentences. The attentive reader must have gathered from the foregoing chapters some idea of what the science owes to many individuals whose names are connected with it. But it seems proper to devote to this subject a few pages more, in order to give some further account of the origin and character of certain books.

2. The manuals by which grammar was first taught in English, were not properly English Grammars. They were translations of the Latin *Accidence*; and were designed to aid British youth in acquiring a knowledge of the Latin language, rather than accuracy in the use of their own. The two languages were often combined in one book, for the purpose of teaching sometimes both together, and sometimes one through the medium of the other. The study of such works doubtless had a tendency to modify, and perhaps at that time to improve, the English style of those who used them. For not only must variety of knowledge have led to copiousness of expression, but the most cultivated minds would naturally be most apt to observe what was orderly in the use of speech. A language, indeed, after its proper form is well fixed by letters, must resist all introduction of foreign idioms, or become corrupted. Hence it is, that Dr. Johnson avers, "The great pest of speech is frequency of translation. No book was ever turned from one language into another, without imparting something of its native idiom; this is the most mischievous and comprehensive innovation."—*Preface to Joh. Dict.*, 4to, p. 14. Without expressly controverting this opinion, or offering any justification of mere metaphrases, or literal translations, we may well assert, that the practice of comparing different languages, and seeking the most appropriate terms for a free version of what is ably written, is an exercise admirably calculated to familiarize and extend grammatical knowledge.

3. Of the class of books here referred to, that which I have mentioned in an other chapter, as Lily's or King Henry's Grammar, has been by far the most celebrated and the most influential. Concerning this treatise, it is stated, that its parts were not put together in the present form, until eighteen or twenty years after Lily's death. "The time when this work was completed," says the preface of 1793, "has been differently related by writers. Thomas Hayne places it in the year 1543, and Anthony Wood, in 1545. But neither of these accounts can be right; for I have seen a beautiful copy, printed upon vellum, and illuminated, anno 1542, in quarto. And it may be doubted whether this was the first edition."—*John Ward, Pref.*, p. vii. In an Introductory Lecture, read before the University of London in 1828, by Thomas Dale, professor of English literature, I find the following statement: "In this reign,"—the reign of Henry VIII,—"the study of grammar was reduced to a system, by the promulgation of many grammatical treatises; one of which was esteemed of sufficient importance to be honoured with a royal name. It was called, 'The Grammar of King Henry the Eighth;' and to this, 'with other works, the young Shakspeare was probably indebted for some learning and much loyalty.' But the honour of producing the first English grammar is claimed by William Bullokar, who published, in the year 1586, 'A Bref Grammar for English,' being, to use his own words, 'the first Grammar for English that ever waz, except my Grammar at large.'"

4. Ward's preface to Lily commences thus: "If we look back to the origin of our common *Latin Grammar*, we shall find it was no hasty performance, nor the work of a single person; but composed at different times by several eminent and learned men, till the whole was at length finished, and by the order of *King Henry VIII.*[,] brought into that form in which it has ever since continued. The *English introduction* was written by the reverend and learned Dr. *John Colet*, Dean of St. *Paul's*, for the use of the school he had lately founded there; and was dedicated by him to *William Lily*, the first high master of that school, in the year 1510; for which reason it has usually gone by the name of *Paul's Accidence*. The substance of it remains the same, as at first; though it has been much altered in the manner of expression, and sometimes the order, with other improvements. The *English syntax* was the work of *Lily*, as appears by the title in the most ancient editions, which runs thus: *Gulielmi Lili Angli Rudimenta*. But it has been greatly improved since his time, both with, regard to the method, and an enlargement of double the quantity."

5. Paul's Accidence is therefore probably the oldest grammar that can now be found in our language. It is not, however, an English grammar; because, though written in antique English, and embracing many things which are as true of our language as of any other, it was particularly designed for the teaching of *Latin*. It begins thus: "In speech be these eight parts following: Noun, Pronoun, Verb, Participle, declined; Adverb, Conjunction, Preposition, Interjection, undeclined." This is the old platform of the Latin grammarians; which differs from that of the Greek grammars, only in having no Article, and in separating the Interjection from the class of Adverbs. Some Greek grammarians, however, separate the Adjective from the Noun, and include the Participle with the Verb: thus, "There are in Greek eight species of words, called Parts of Speech; viz. Article, Noun, Adjective, Pronoun, Verb, Adverb, Preposition, and Conjunction."—*Anthon's Valpy*, p. 18. With respect to our language, the plan of the Latin Accidence is manifestly inaccurate; nor can it be applied, without some variation, to the Greek. In both, as well as in all other languages that have *Articles*, the best amendment of it, and the nearest adherence to it, is, to make the Parts of Speech *ten*; namely, the Article, the Noun, the Adjective, the Pronoun, the Verb, the Participle, the Adverb, the Conjunction, the Preposition, and the Interjection.

6. The best Latin grammarians admit that the Adjective ought not to be called a Noun; and the best Greek grammarians, that the Interjections ought not to be included among Adverbs. With respect to Participles, a vast majority of grammarians in general, make them a distinct species, or part of speech; but, on this point, the English grammarians are about equally divided: nearly one half include them with the verbs, and a few call them adjectives. In grammar, it is wrong to deviate from the old groundwork, except for the sake of truth and improvement; and, in this case, to vary the series of parts, by suppressing one and substituting an other, is in fact a greater innovation, than to make the terms ten, by adding one and dividing an other. But our men of nine parts of speech innovated yet more: they added the Article, as did the Greeks; divided the Noun into Substantive and Adjective; and, without good reason, suppressed the Participle. And, of latter time, not a few have thrown the whole into confusion, to show the world "the order of [their] understanding." What was grammar fifty years ago, some of these have not thought it worth their while to inquire! And the reader has seen, that, after all this, they can complacently talk of "the censure so frequently and so justly awarded to *unfortunate innovators*."—KIRKHAM'S *Gram.*, p. 10.

7. The old scheme of the Latin grammarians has seldom, if ever, been *literally* followed in English; because its distribution of the parts of speech, as declined and undeclined, would not be true with respect to the English participle. With the omission of this unimportant distinction, it was, however, scrupulously retained by Dilworth, by the author of the British Grammar, by William Ward, by Buchanan, and by some others now little known, who chose to include both the article and the adjective with the noun, rather than to increase the number of the parts of speech beyond eight. Dr. Priestley says, “I shall adopt the *usual distribution* of words into eight classes; viz. Nouns, Adjectives, Pronouns, Verbs, Adverbs, Prepositions, Conjunctions, and Interjections.\* I do this in compliance with the practice of most Grammarians; and because, *if any number, in a thing so arbitrary, must be fixed upon*, this seems to be as comprehensive and distinct as any. All the innovation I have made hath been to throw out the *Participle*, and substitute the *Adjective*, as more evidently a distinct part of speech.”—*Rudiments of English Gram.*, p. 3. All this comports well enough with Dr. Priestley’s haste and carelessness; but it is not true, that he either adopted, “the usual distribution of words,” or made an other “as comprehensive and distinct as any.” His “*innovation*,” too, which has since been countenanced by many other writers, I have already shown to be greater, than if, by a promotion of the article and the adjective, he had made the parts of speech ten. Dr. Beattie, who was Priestley’s coeval, and a much better scholar, adopted this number without hesitation, and called every one of them by what is still its right name: “In English there are *ten* sorts of words, which are all found in the following short sentence; ‘I now see the good man coming; but, alas! he walks with difficulty.’ *I* and *he* are pronouns; *now* is an adverb; *see* and *walks* are verbs; *the* is an article; *good*, an adjective; *man* and *difficulty* are nouns, the former substantive, the latter abstract; *coming* is a participle; *but*, a conjunction; *alas!* an interjection; *with*, a preposition. That no other sorts of words are necessary in language, will appear, when we have seen in what respects these are necessary.”—*Beattie’s Moral Science*, Vol. i, p. 30. This distribution is precisely that which the best *French* grammarians have *usually* adopted.

8. Dr. Johnson professes to adopt the division, the order, and the terms, “of the common grammarians, without inquiring whether a fitter distribution might not be found.”—*Gram. before 4to Dict.*, p. 1. But, in the Etymology of his Grammar, he makes no enumeration of the parts of speech, and treats only of articles, nouns, adjectives, pronouns, and verbs; to which if we add the others, according to the common grammarians, or according to his own Dictionary, the number will be *ten*. And this distribution, which was adopted by Dr. Ash about 1765, by Murray the schoolmaster about 1790, by Caleb Alexander in 1795, and approved by Dr. Adam in 1793, has since been very extensively followed; as may be seen in Dr. Crombie’s treatise, in the Rev. Matt. Harrison’s, in Dr. Mandeville’s reading-books, and in the grammars of Harrison, Staniford, Alden, Coar, John Peirce, E. Devis, C. Adams, D. Adams, Chandler, Comly, Jaudon, Ingersoll, Hull, Fuller, Greenleaf, Kirkham, Ferd. H. Miller, Merchant, Mack, Nutting, Bucke, Beck, Barrett, Barnard, Maunder, Webber, Emmons, Hazen, Bingham, Sanders,

---

\* These are the parts of speech in some late grammars; as, Barrett’s, of 1854, Butler’s, Covell’s, Day’s, Frazee’s, Fowle’s New, Spear’s, Weld’s, Wells’s, and the Well-wishers’. In Frost’s Practical Grammar, the words of the language are said to be “divided into *eight* classes,” and the names are given thus: “*Noun, Article, Pronoun, Verb, Adverb, Preposition, Conjunction, and Interjection*.”—P. 29. But the author afterwards treats of the *Adjective*, between the *Article* and the *Pronoun*, just as if he had forgotten to name it, and could not count nine with accuracy! In Perley’s Grammar, the parts of speech are a different eight: namely, “*Nouns, Adjectives, Verbs, Adverbs, Prepositions, Conjunctions, Interjections, and Particles*!”—P. 8. S. W. Clark has Priestley’s classes, but calls Interjections “Exclamations.”

and many others. Dr. Lowth's distribution is the same, except that he placed the adjective after the pronoun, the conjunction after the preposition, and, like Priestley, called the participle a verb, thus making the parts of speech *nine*. He also has been followed by many; among whom are Bicknell, Burn, Lennie, Mennye, Lindley Murray, W. Allen, Guy, Churchill, Wilson, Cobbett, Davis, David Blair, Davenport, Mendenhall, Wilcox, Picket, Pond, Russell, Bacon, Bullions, Brace, Hart, Lyon, Tob. H. Miller, Alger, A. Flint, Folker, S. Putnam, Cooper, Frost, Goldsbury, Hamlin, T. Smith, R. C. Smith, and Woodworth. But a third part of these, and as many more in the preceding list, are confessedly mere modifiers of Murray's compilation; and perhaps, in such a case, those have done best who have deviated least from the track of him whom they professed to follow.\*

9. Some seem to have supposed, that by reducing the number of the parts of speech, and of the rules for their construction, the study of grammar would be rendered more easy and more profitable to the learner. But this, as would appear from the history of the science, is a mere retrogression towards the rudeness of its earlier stages. It is hardly worth while to dispute, whether there shall be nine parts of speech or ten; and perhaps enough has already been stated, to establish the expediency of assuming the latter number. Every word in the language must be included in some class, and nothing is gained by making the classes larger and less numerous. In all the artificial arrangements of science, distinctions are to be made according to the differences in things; and the simple question here is, what differences among words shall be at first regarded. To overlook, in our primary division, the difference between a verb and a participle, is merely to reserve for a subdivision, or subsequent explanation, a species of words which most grammarians have recognized as a distinct sort in their original classification.

10. It should be observed that the early period of grammatical science was far remote from the days in which *English* grammar originated. Many things which we now teach and defend as grammar, were taught and defended two thousand years ago, by the philosophers of Greece and Rome. Of the parts of speech, Quintilian, who lived in the first century of our era, gives the following account: "For the ancients, among whom were Aristotle† and Theodectes, treated only of verbs, nouns, and conjunctions: as the verb is what we say, and the noun, that of which we say it, they judged the power of discourse to be in *verbs*, and the matter in *nouns*, but the connexion in *conjunctions*. Little by little, the philosophers, and especially the Stoics, increased the number: first, to the conjunctions were added *articles*; afterwards, *prepositions*; to nouns, was added the *appellation*; then the *pronoun*; afterwards, as belonging to each verb, the *participle*; and, to verbs in common, *adverbs*. Our language [i. e., the *Latin*] does not require articles, wherefore they are scattered among the other parts of speech; but there is added to the foregoing the *interjection*. But some, on the authority of good authors, make the parts only eight; as Aristarchus, and, in our day, Palæmon; who have included the vocable, or appellation, with the noun, as a species of it. But they who make the noun one and the vocable an other, reckon nine. But there are also some who divide the vocable from the appellation; making the former to signify any thing manifest to sight or touch, as *house*, *bed*; and the latter, any thing to which either or both are wanting, as *wind*, *heaven*, *god*, *virtue*. They

---

\* Felton, who is confessedly a modifier of Murray, claims as a merit, "*the rejection of several useless parts of speech*" yet acknowledges "*nine*," and treats of *ten*; "viz., *Nouns, Pronouns, Verbs, Participles, Prepositions, Adjectives*, [Articles,] *Adverbs, Conjunctions, Exclamations*."—O. C. Felton's *Gram.* p. 5, and p. 9.

† Quintilian is at fault here; for, in some of his writings, if not generally, Aristotle recognized *four* parts of speech; namely, verbs, nouns, conjunctions, and articles. See *Aristot. de Poetica*, Cap. xx.

have also added the *asseveration* and the *attrectation*, which I do not approve. Whether the vocable or appellation should be included with the noun or not, as it is a matter of little consequence, I leave to the decision of others.”—See QUINTIL. *de Inst. Orat.*, Lib. i, Cap. 4, §24.

11. Several writers on English grammar, indulging a strange unsettlement of plan, seem not to have determined in their own minds, how many parts of speech there are, or ought to be. Among these are Horne Tooke, Webster, Dalton, Cardell, Green, and Cobb; and perhaps, from what he says above, we may add the name of Priestley. The present disputation about the sorts of words, has been chiefly owing to the writings of Horne Tooke, who explains the minor parts of speech as mere abbreviations, and rejects, with needless acrimony, the common classification. But many have mistaken the nature of his instructions, no less than that of the common grammarians. This author, in his third chapter, supposes his auditor to say, “But you have not all this while informed me *how many parts of speech* you mean to lay down.” To whom he replies, “That shall be as you please. Either *two*, or *twenty*, or *more*.” Such looseness comported well enough with his particular purpose; because he meant to teach the derivation of words, and not to meddle at all with their construction. But who does not see that it is impossible to lay down rules for the *construction* of words, without first dividing them into the classes to which such rules apply? For example: if a man means to teach, that, “A verb must agree with its subject, or nominative, in person and number,” must he not first show the learner *what words are verbs*? and ought he not to see in this rule a reason for not calling the participle a verb? Let the careless followers of Lowth and Priestley answer. Tooke did not care to preserve any parts of speech at all. His work is not a system of grammar; nor can it be made the basis of any regular scheme of grammatical instruction. He who will not grant that the same words may possibly be used as different parts of speech, must make his parts of speech either very few or very many. This author says, “I do not allow that *any* words change their nature in this manner, so as to belong sometimes to one part of speech, and sometimes to another, from the different ways of using them. I never could perceive any such fluctuation in any word whatever.”—*Diversions of Purley*, Vol. i, p. 68.

12. From his own positive language, I imagine this ingenious author never well considered what constitutes the sameness of words, or wherein lies the difference of the parts of speech; and, without understanding these things, a grammarian cannot but fall into errors, unless he will follow somebody that knows them. But Tooke confessedly contradicts, and outfaces “*all other Grammarians*” in the passage just cited. Yet it is plain, that the whole science of grammar—or at least the whole of etymology and syntax, which are its two principal parts—is based upon a division of words into the parts of speech; a division which necessarily refers, in many instances, the same words to different sections according to the manner in which they are used. “Certains mots répondent, ainsi au même temps, à diverses parties d’raison selon que la grammaire les emploie diversement.”—*Buffier*, Art. 150. “Some words, from the different ways in which they are used, belong sometimes to one part of speech, sometimes to another.”—*M’Culloch’s Gram.*, p. 37. “And so say all other Grammarians.”—*Tooke, as above*.

13. The history of *Dr. Webster*, as a grammarian, is singular. He is remarkable for his changeableness, yet always positive; for his inconsistency, yet very learned; for his zeal “to correct popular errors,” yet often himself erroneous; for his fertility in resources, yet sometimes meagre; for his success as an author, yet never satisfied; for his boldness of innovation, yet fond of appealing to antiquity. His grammars are the least judicious, and

at present the least popular, of his works. They consist of four or five different treatises, which for their mutual credit should never be compared: it is impossible to place any firm reliance upon the authority of a man who contradicts himself so much. Those who imagine that the last opinions of so learned a man must needs be right, will do well to wait, and see what will be his last: they cannot otherwise know to what his instructions will finally lead: Experience has already taught him the folly of many of his pretended improvements, and it is probable his last opinions of English grammar will be most conformable to that just authority with which he has ever been tampering. I do not say that he has not exhibited ingenuity as well as learning, or that he is always wrong when he contradicts a majority of the English grammarians; but I may venture to say, he was wrong when he undertook to disturb the common scheme of the parts of speech, as well as when he resolved to spell all words exactly as they are pronounced.

14. It is not commonly known with how rash a hand this celebrated author has sometimes touched the most settled usages of our language. In 1790, which was seven years after the appearance of his first grammar, he published an octavo volume of more than four hundred pages, consisting of Essays, moral, historical, political, and literary, which might have done him credit, had he not spoiled his book by a grammatical whim about the reformation of orthography. Not perceiving that English literature, multiplied as it had been within two or three centuries, had acquired a stability in some degree corresponding to its growth, he foolishly imagined it was still as susceptible of change and improvement as in the days of its infancy. Let the reader pardon the length of this digression, if for the sake of any future schemer who may chance to adopt a similar conceit, I cite from the preface to this volume a specimen of the author's practice and reasoning. The ingenious attorney had the good sense quickly to abandon this project, and content himself with less glaring innovations; else he had never stood as he now does, in the estimation of the public. But there is the more need to record the example, because in one of the southern states the experiment has recently been tried again. A still abler member of the same profession, has renewed it but lately; and it is said there are yet remaining some converts to this notion of improvement. I copy literally, leaving all my readers and his to guess for themselves why he spelled "*writers*" with a *w* and "*riting*" without.

15. "During the course of ten or twelv yeers, I hav been laboring to correct popular errors, and to assist my yung brethren in the road to truth and virtue; my publications for theze purposes hav been numerous; much time haz been spent, which I do not regret, and much censure incurred, which my hart tells me I do not dezerv." \* \* \* "The reeder wil observ that the *orthography* of the volum iz not uniform. The reezon iz, that many of the essays hav been published before, in the common orthography, and it would hav been a laborious task to copy the whole, for the sake of changing the spelling. In the essays, ritten within the last yeer, a considerable change of spelling iz introduced by way of experiment. This liberty waz taken by the writers before the age of queen Elizabeth, and to this we are indeted for the preference of modern spelling over that of Gower and Chaucer. The man who admits that the change of *hoasbonde*, *mynde*, *ygone*, *moneth* into *husband*, *mind*, *gone*, *month*, iz an improovment, must acknowlege also the riting of *helth*, *breth*, *rong*, *tung*, *munth*, to be an improovment. There iz no alternativ. Every possible reezon that could ever be offered for altering the spelling of wurds, stil exists in full force; and if a gradual reform should not be made in our language, it wil proof that we are less under the influence of reezon than our ancestors."—*Noah Webster's Essays, Preface*, p. xi.

16. But let us return, with our author, to the question of the parts of speech. I have shown that if we do not mean to adopt some less convenient scheme, we must count them *ten*, and preserve their ancient order as well as their ancient names.\* And, after all his vacillation in consequence of reading Horne Tooke, it would not be strange if Dr. Webster should come at last to the same conclusion. He was not very far from it in 1828, as may be shown by his own testimony, which he then took occasion to record. I will give his own words on the point: "There is great difficulty in devising a correct classification of the several sorts of words; and probably no classification that shall be simple and at the same time philosophically correct, can be invented. There are some words that do not strictly fall under any description of any class yet devised. Many attempts have been made and are still making to remedy this evil; but such schemes as I have seen, do not, in my apprehension, correct the defects of the old schemes, nor simplify the subject. On the other hand, all that I have seen, serve only to obscure and embarrass the subject, by substituting new arrangements and new terms which are as incorrect as the old ones, and less intelligible. I have attentively viewed these subjects, in all the lights which my opportunities have afforded, and am convinced that the distribution of words, most generally received, *is the best that can be formed*, with some slight alterations adapted to the particular construction of the English language."

17. This passage is taken from the advertisement, or preface, to the Grammar which accompanies the author's edition of his great quarto Dictionary. Now the several schemes which bear his own name, were doubtless all of them among those which he had that he had "*seen*;" so that he here condemns them all collectively, as he had previously condemned some of them at each reformation. Nor is the last exempted. For although he here plainly gives his vote for that common scheme which he first condemned, he does not adopt it without "some slight alterations;" and in contriving these alterations he is inconsistent with his own professions. He makes the parts of speech *eight*, thus: "1. The name or noun; 2. The pronoun or substitute; 3. The adjective, attribute, or attributive; 4. The verb; 5. The adverb; 6. The preposition; 7. The connective or conjunction; 8. The exclamation or interjection." In his Rudiments of English Grammar, published in 1811, "to unfold the *true principles* of the language," his parts of speech were *seven*; "viz. 1. Names or nouns; 2. Substitutes or pronouns; 3. Attributes or adjectives; 4. Verbs, with their participles; 5. Modifiers or adverbs; 6. Prepositions; 7. Connectives or conjunctions." In his Philosophical and Practical Grammar, published in 1807, a book which professes to teach "the *only legitimate principles*, and established usages," of the language, a twofold division of words is adopted; first, into two general classes, primary and secondary; then into "*seven species* or parts of speech," the first two belonging to the former class, the other five to the latter; thus: "1. Names or nouns; 2. Verbs; 3. Substitutes; 4. Attributes; 5. Modifiers; 6. Prepositions; 7. Connectives." In his "Improved Grammar of the English Language," published in 1831, the same scheme is retained, but the usual names are preferred.

18. How many different schemes of classification this author invented, I know not; but he might well have saved himself the trouble of inventing any; for, so far as appears, none of his last three grammars ever came to a second edition. In the sixth edition of his "Plain

---

\* "As there are ten different characters or figures in arithmetic to represent all possible quantities, there are also ten kinds of words or parts of speech to represent all possible sentences: viz.: article, noun, adjective, pronoun, verb, participle, adverb, preposition, conjunction, interjection."—*Chauvior's Punctuation*, p. 104.

and Comprehensive Grammar, grounded on the *true principles* and idioms of the language,” a work which his last grammatical preface affirms to have been originally fashioned “on the model of Lowth’s,” the parts of speech are reckoned “*six*; nouns, articles, pronouns, adjectives, verbs, and abbreviations or particles.” This work, which he says “was extensively used in the schools of this country,” and continued to be in demand, he voluntarily suppressed; because, after a profitable experiment of four and twenty years, he found it so far from being grounded on “true principles,” that the whole scheme then appeared to him incorrigibly bad. And, judging from this sixth edition, printed in 1800, the only one which I have seen, I cannot but concur with him in the opinion. More than one half of the volume is a loose *Appendix* composed chiefly of notes taken from Lowth and Priestley; and there is a great want of method in what was meant for the body of the work. I imagine his several editions must have been different grammars with the same title; for such things are of no uncommon occurrence, and I cannot otherwise account for the assertion that this book was compiled “on *the model of Lowth’s*, and on the same principles as [those on which] Murray has constructed his.”—*Advertisement in Webster’s Quarto Dict.*, 1st Ed.

19. In a treatise on grammar, a bad scheme is necessarily attended with inconveniences for which no merit in the execution can possibly compensate. The first thing, therefore, which a skillful teacher will notice in a work of this kind, is the arrangement. If he find any difficulty in discovering, at sight, what it is, he will be sure it is bad; for a lucid order is what he has a right to expect from him who pretends to improve upon all the English grammarians. Dr. Webster is not the only reader of the EPEA PTEROENTA, who has been thereby prompted to meddle with the common scheme of grammar; nor is he the only one who has attempted to simplify the subject by reducing the parts of speech to *six*. John Dalton of Manchester, in 1801, in a small grammar which he dedicated to Horne Tooke, made them six, but not the same six. He would have them to be, nouns, pronouns, verbs, adverbs, conjunctions, and prepositions. This writer, like Brightland, Tooke, Fisher, and some others, insists on it that the articles are *adjectives*. Priestley, too, throwing them out of his classification, and leaving the learner to go almost through his book in ignorance of their rank, at length assigns them to the same class, in one of his notes. And so has Dr. Webster fixed them in his late valuable, but not faultless, dictionaries. But David Booth, an etymologist perhaps equally learned, in his “Introduction to an Analytical Dictionary of the English Language,” declares them to be of the same species as the *pronouns*; from which he thinks it strange that they were ever separated! See *Booth’s Introd.*, p. 21.

20. Now, what can be more idle, than for teachers to reject the common classification of words, and puzzle the heads of school-boys with speculations like these? It is easy to admit all that etymology can show to be true, and still justify the old arrangement of the elements of grammar. And if we depart from the common scheme, where shall we stop? Some have taught that the parts of speech are only *five*; as did the latter stoics, whose classes, according to Priscian and Harris, were these: articles, nouns appellative, nouns proper, verbs, and conjunctions. Others have made them *four*; as did Aristotle and the elder stoics, and, more recently, Milnes, Brightland, Harris, Ware, Fisher, and the author of a work on Universal Grammar, entitled *Enclytica*. Yet, in naming the four, each of these contrives to differ from *all the rest*! With Aristotle, they are, “nouns, verbs, articles, and conjunctions;” with Milnes, “nouns, adnouns, verbs, and particles;” with Brightland, “names, qualities, affirmations, and particles;” with Harris, “substantives, attributives, definitives, and connectives;” with Ware, “the name, the word, the assistant, the

connective;” with Fisher, “names, qualities, verbs, and particles;” with the author of *Enclytica*, “names, verbs, modes, and connectives.” But why make the classes so numerous as four? Many of the ancients, Greeks, Hebrews, and Arabians, according to Quintilian, made them *three*; and these three, according to Vossius, were nouns, verbs, and particles. “Veteres Arabes, Hebræi, et Græci, tres, non amplius, classes faciebant; 1. Nomen, 2. Verbum, 3. Particula seu Dictio.”—*Voss. de Anal.*, Lib. i, Cap. 1.

21. Nor is this number, *three*, quite destitute of modern supporters; though most of these come at it in an other way. D. St. Quentin, in his Rudiments of General Grammar, published in 1812, divides words into the “three general classes” last mentioned; viz., “1. Nouns, 2. Verbs, 3. Particles.”—P. 5. Booth, who published the second edition of his etymological work in 1814, examining severally the ten parts of speech, and finding what he supposed to be the true origin of all the words in some of the classes, was led to throw one into an other, till he had destroyed seven of them. Then, resolving that each word ought to be classed according to the meaning which its etymology fixes upon it, he refers the number of classes to *nature*, thus: “If, then, each [word] has a *meaning*, and is capable of raising an idea in the mind, that idea must have its prototype in nature. It must either denote an *exertion*, and is therefore a *verb*; or a *quality*, and is, in that case, an *adjective*; or it must express an *assemblage* of qualities, such as is observed to belong to some individual object, and is, on this supposition, the *name* of such object, or a *noun*. \* \* \* We have thus given an account of the different divisions of words, and have found that the whole may be classed under the three heads of Names, Qualities, and Actions; or Nouns, Adjectives, and Verbs.”—*Introd. to Analyt. Dict.*, p. 22.

22. This notion of the parts of speech, as the reader will presently see, found an advocate also in the author of the popular little story of Jack Halyard. It appears in his Philosophic Grammar published in Philadelphia in 1827. Whether the writer borrowed it from Booth, or was led into it by the light of “nature,” I am unable to say: he does not appear to have derived it from the ancients. Now, if either he or the lexicographer has discovered in “nature” a prototype for this scheme of grammar, the discovery is only to be proved, and the schemes of all other grammarians, ancient or modern, must give place to it. For the reader will observe that this triad of parts is not that which is mentioned by Vossius and Quintilian. But authority may be found for reducing the number of the parts of speech yet lower. Plato, according to Harris, and the first inquirers into language, according to Horne Tooke, made them *two*; nouns and verbs, which Crombie, Dalton, M’Culloch, and some others, say, are the only parts essentially necessary for the communication of our thoughts. Those who know nothing about grammar, regard all words as of *one* class. To them, a word is simply a word; and under what other name it may come, is no concern of theirs.

23. Towards this point, tends every attempt to simplify grammar by suppressing any of the *ten* parts of speech. Nothing is gained by it; and it is a departure from the best authority. We see by what steps this kind of reasoning may descend; and we have an admirable illustration of it in the several grammatical works of William S. Cardell. I shall mention them in the order in which they appeared; and the reader may judge whether the author does not ultimately arrive at the conclusion to which the foregoing series is conducted. This writer, in his Essay on Language, reckons seven parts of speech; in his New-York Grammar, six; in his Hartford Grammar, three principal, with three others subordinate; in his Philadelphia Grammar, three only—nouns, adjectives, and verbs. Here he alleges, “The unerring plan of *nature* has established three classes of perceptions, and

consequently three parts of speech.”—P. 171. He says this, as if he meant to abide by it. But, on his twenty-third page, we are told, “Every adjective is either a noun or a participle.” Now, by his own showing, there are no participles: he makes them all adjectives, in each of his schemes. It follows, therefore, that all his adjectives, including what others call participles, are nouns. And this reduces his three parts of speech to two, in spite of “the unerring plan of *nature!*” But even this number is more than he well believed in; for, on the twenty-first page of the book, he affirms, that, “All other terms are but derivative forms and new applications of *nouns.*” So simple a thing is this method of grammar! But Neef, in his zeal for reformation, carries the anticlimax fairly off the brink; and declares, “In the grammar which shall be the work of my pupils, there shall be found no nouns, no pronouns, no articles, no participles, no verbs, no prepositions, no conjunctions, no adverbs, no interjections, no gerunds, not even one single supine. Unmercifully shall they be banished from it.”—*Neef's Method of Education*, p. 60.

24. When Cardell's system appeared, several respectable men, convinced by “his powerful demonstrations,” admitted that he had made “many things in the *established doctrines* of the expounders of language appear sufficiently ridiculous;” \* and willingly lent him the influence of their names, trusting that his admirable scheme of English grammar, in which their ignorance saw nothing but new truth, would be speedily “perfected and generally embraced.” † Being invited by the author to a discussion of his principles, I opposed them *in his presence*, both privately and publicly; defending against him, not unsuccessfully, those doctrines which time and custom have sanctioned. And, what is remarkable, that candid opposition which Cardell himself had treated with respect, and parried in vain, was afterwards, by some of his converts, impeached of all unfairness, and even accused of wanting common sense. “No one,” says Niebuhr, “ever overthrew a literary idol, without provoking the anger of its worshipers.”—*Philological Museum*, Vol. i, p. 489. The certificates given in commendation of this “set of opinions,” though they had no extensive effect on the public, showed full well that the signers knew little of the history of grammar; and it is the continual repetition of such things, that induces me now to dwell upon its history, for the information of those who are so liable to be deceived by exploded errors republished as novelties. A eulogist says of Cardell, “He had adopted a set of opinions, which, to most of his readers, appeared *entirely new.*” A reviewer proved, that all his pretended novelties are to be found in certain grammars now forgotten, or seldom read. The former replies, Then he [Cardell,] is right—and the man is no less stupid than abusive, who finds fault; for here is proof that the former “had highly respectable authority for almost every thing he has advanced!”—See *The Friend*, Vol. ii, pp. 105 and 116, from which all the quotations in this paragraph, except one, are taken.

25. The reader may now be curious to know what these doctrines were. They were summed up by the reviewer, thus: “Our author pretends to have drawn principally from his own resources, in making up his books; and many may have supposed there is more *novelty* in them than there really is. For instance: 1. He classes the *articles* with *adjectives*; and so did Brightland, Tooke, Fisher, Dalton, and Webster. 2. He calls the *participles*, *adjectives*; and so did Brightland and Tooke. 3. He make the *pronouns*, either *nouns* or *adjectives*; and so did Adam, Dalton, and others. 4. He distributes the *conjunctions* among the other parts of speech; and so did Tooke. 5. He rejects the *interjections*; and so did Valla, Sanctius, and Tooke. 6. He makes the *possessive case* an

\* *The Friend*, 1829, Vol. ii, p. 117.

† *The Friend*, Vol. ii, p. 105.

*adjective*; and so did Brightland. 7. He says our language has *no cases*; and so did Harris. 8. He calls *case*, *position*; and so did James Brown. 9. He reduces the adjectives to two classes, *defining* and *describing*; and so did Dalton. 10. He declares all *verbs* to be *active*; and so did Harris, (in his *Hermes*, Book i, Chap. ix,) though he admitted the *expediency* of the common division, and left to our author the absurdity of contending about it. Fisher also rejected the class of *neuter verbs*, and called them all *active*. 11. He reduces the *moods* to *three*, and the *tenses* to *three*; and so did Dalton, in the very same words. Fisher also made the *tenses three*, but said there *are no moods* in English. 12. He makes the *imperative mood* always *future*; and so did Harris, in 1751. Nor did the doctrine originate with him; for Brightland, a hundred years ago, [about 1706,] ascribed it to some of his predecessors. 13. He reduces the whole of our *syntax* to about *thirty lines*; and two thirds of these are useless; for Dr. Johnson expressed it quite as fully in *ten*. But their explanations are both good for nothing; and Wallis, more wisely, omitted it altogether.”—*The Friend*, Vol. ii, p. 59.

26. Dr. Webster says, in a marginal note to the preface of his *Philosophical Grammar*, “Since the days of *Wallis*, who published a *Grammar of the English Language*, in Latin, in the reign of Charles II.,] from which Johnson and Lowth borrowed most of their rules, *little improvement* has been made in English grammar. Lowth supplied some valuable criticisms, most of which however respect obsolete phrases; but many of his criticisms are extremely erroneous, and they have had an ill effect, in perverting the true idioms of our language. Priestley furnished a number of new and useful observations on the peculiar phrases of the English language. To which may be added some good remarks of Blair and Campbell, interspersed with many errors. Murray, not having mounted to the original sources of information, and professing only to select and arrange the rules and criticisms of preceding writers, has furnished little or nothing new. Of the numerous compilations of inferior character, it may be affirmed, that they have added nothing to the stock of grammatical knowledge.” And the concluding sentence of this work, as well as of his *Improved Grammar*, published in 1831, extends the censure as follows: “It is not the English language only whose history and principles are yet to be illustrated; but the grammars and dictionaries of *all other* languages, with which I have any acquaintance, must be revised and corrected, before their elements and true construction can be fully understood.” In an advertisement to the grammar prefixed to his quarto *American Dictionary*, the Doctor is yet more severe upon books of this sort. “I close,” says he, “with the single remark, that from all the observations I have been able to make, I am convinced the dictionaries and grammars which have been used in our seminaries of learning for the last forty or fifty years, are *so incorrect and imperfect* that they have introduced or sanctioned more errors than they have amended; in other words, had the people of England and of these States been left to learn the pronunciation and construction of their vernacular language solely by tradition, and the reading of good authors, the language would have been spoken and written with more purity than it has been and now is, by those who have learned to adjust their language by the rules which dictionaries prescribe.”

27. Little and much are but relative terms; yet when we look back to the period in which English grammar was taught only in Latin, it seems extravagant to say, that “little improvement has been made” in it since. I have elsewhere expressed a more qualified sentiment. “That the grammar of our language has made considerable progress since the days of Swift, who wrote a petty treatise on the subject, is sufficiently evident; but whoever considers what remains to be done, cannot but perceive how ridiculous are many of the

boasts and felicitations which we have heard on that topic.” \* Some further notice will now be taken of that progress, and of the writers who have been commonly considered the chief promoters of it, but especially of such as have not been previously mentioned in a like connexion. Among these may be noticed *William Walker*, the preceptor of Sir Isaac Newton, a teacher and grammarian of extraordinary learning, who died in 1684. He has left us sundry monuments of his taste and critical skill: one is his “Treatise of English Particles,”—a work of great labour and merit, but useless to most people now-a-days, because it explains the English in Latin; an other, his “Art of Teaching Improv’d,”—which is also an able treatise, and apparently well adapted to its object, “the Grounding of a Young Scholar in the Latin Tongue.” In the latter, are mentioned other works of his, on “*Rhetorick*, and *Logick*” which I have not seen.

28. In 1706, *Richard Johnson* published an octavo volume of more than four hundred pages, entitled, “Grammatical Commentaries; being an Apparatus to a New National Grammar: by way of animadversion upon the falsities, obscurities, redundancies and defects of Lily’s System now in use.” This is a work of great acuteness, labour, and learning; and might be of signal use to any one who should undertake to prepare a new or improved Latin grammar: of which, in my opinion, we have yet urgent need. The English grammarian may also peruse it with advantage, if he has a good knowledge of Latin—and without such knowledge he must be ill prepared for his task. This work is spoken of and quoted by some of the early English grammarians; but the hopes of the writer do not appear to have been realized. His book was not calculated to supply the place of the common one; for the author thought it impracticable to make a new grammar, suitable for boys, and at the same time to embrace in it proofs sufficient to remove the prejudices of teachers in favour of the old. King Henry’s edict in support of Lily, was yet in force, backed by all the partiality which long habit creates; and Johnson’s learning, and labour, and zeal, were admired, and praised, and soon forgot.

29. Near the beginning of the last century, some of the generous wits of the reign of Queen Anne, seeing the need there was of greater attention to their vernacular language, and of a grammar more properly English than any then in use, produced a book with which the later writers on the same subjects, would have done well to have made themselves better acquainted. It is entitled “A Grammar of the English Tongue; with the Arts of Logick, Rhetorick, Poetry, &c. Illustrated with useful Notes; giving the Grounds and Reasons of Grammar in General. The Whole making a Compleat System of an English Education. *Published by* JOHN BRIGHTLAND, for the Use of the Schools of Great Britain and Ireland.” It is ingeniously recommended in a certificate by Sir Richard Steele, or the Tattler, under the fictitious name of Isaac Bickerstaff, Esq., and in a poem of forty-three lines, by Nahum Tate, poet laureate to her Majesty. It is a duodecimo volume of three hundred pages; a work of no inconsiderable merit and originality; and written in a style which, though not faultless, has scarcely been surpassed by any English grammarian since. I quote it as Brightland’s:† who were the real authors, does not appear. It seems to

\* See the Preface to my Compendious English Grammar in the American editions of *the Treasury of Knowledge*, Vol. i, p. 8.

† Some say that Brightland himself was the writer of this grammar; but to suppose him the sole author, hardly comports with its dedication to the Queen, by her “most Obedient and Dutiful *Subjects*, the *Authors*,” or with the manner in which these are spoken of, in the following lines, by the laureate:

“Then say what Thanks, what Praises must attend  
*The Gen’rous Wits*, who thus could condescend!  
 Skill, that to Art’s sublimest Orb can reach,

be the work of more than one, and perhaps the writers of the Tattler were the men. My copy is of the seventh edition, London, printed for Henry Lintot, 1746. It is evidently the work of very skillful hands; yet is it not in all respects well planned or well executed. It unwisely reduces the parts of speech to four; gives them new names; and rejects more of the old system than the schools could be made willing to give up. Hence it does not appear to have been very extensively adopted.

30. It is now about a hundred and thirty years, since *Dr. Swift*, in a public remonstrance addressed to the Earl of Oxford, complained of the imperfect state of our language, and alleged in particular, that “in many instances it offended against every part of grammar.” \* Fifty years afterward, *Dr. Lowth* seconded this complaint, and pressed it home upon the polite and the learned. “Does he mean,” says the latter, “that the English language, as it is spoken by the politest part of the nation, and as it stands in the writings of the most approved authors, often offends against every part of grammar? *Thus far, I am afraid the charge is true.*”—*Lowth’s Grammar, Preface*, p. iv. Yet the learned Doctor, to whom much praise has been justly ascribed for the encouragement which he gave to this neglected study, attempted nothing more than “A Short Introduction to English Grammar;” which, he says, “was calculated for the learner *even of the lowest class*,” and those who would enter more deeply into the subject, he referred to *Harris*; whose work is not an English grammar, but “A Philosophical Inquiry concerning Universal Grammar.” Lowth’s Grammar was first published in 1758. At the commencement of his preface, the reverend author, after acknowledging the enlargement, polish, and refinement, which the language had received during the preceding two hundred years, ventures to add, “but, whatever other improvements it may have received, it hath made *no advances* in grammatical accuracy.” I do not quote this assertion to affirm it literally true, in all its apparent breadth; but there is less reason to boast of the correctness even now attained, than to believe that the writers on grammar are not the authors who have in general come nearest to it in practice. Nor have the ablest authors always produced the best compends for the literary instruction of youth.

31. The treatises of the learned doctors Harris, Lowth, Johnson, Ash, Priestley, Horne Tooke, Crombie, Coote, and Webster, owe their celebrity not so much to their intrinsic fitness for school instruction, as to the literary reputation of the writers. Of *Harris’s Hermes*, (which, in comparison with our common grammars, is indeed a work of much ingenuity and learning, full of interesting speculations, and written with great elegance both of style and method,) *Dr. Lowth* says, it is “the most beautiful and perfect example of analysis, that has been exhibited since the days of Aristotle.”—*Preface to Gram.*, p. x. But

---

Employ’d its humble Elements to Teach!  
 Yet worthily Esteem’d, because we know  
 To raise *Their* Country’s Fame *they* stoop’d so low.”—TATE.

\* Dr. Campbell, in his Philosophy of Rhetoric, page 158th, makes a difficulty respecting the meaning of this passage: cites it as an instance of the misapplication of the term *grammar*; and supposes the writer’s notion of the thing to have been, “of grammar in the abstract, *an* universal archetype by which the particular grammars of all different tongues ought to be regulated.” And adds, “If this was his meaning, I cannot say whether he is in the right or in the wrong, in this accusation. I acknowledge myself to be entirely ignorant of this ideal grammar.” It would be more fair to suppose that Dr. Swift meant by “*grammar*” the rules and principles according to which the English language ought to be spoken and written; and, (as I shall hereafter show,) it is no great hyperbole to affirm, that every part of the code—nay, well-nigh every one of these rules and principles—is, in many instances, violated, if not by what may be called *the language itself*, at least by those speakers and writers who are under the strongest obligations to know and observe its true use.

these two authors, if their works be taken together, as the latter intended they should be, supply no sufficient course of English grammar. The instructions of the one are too limited, and those of the other are not specially directed to the subject.

32. *Dr. Johnson*, who was practically one of the greatest grammarians that ever lived, and who was very nearly coetaneous with both Harris and Lowth, speaks of the state of English grammar in the following terms: “I found our speech copious without order, and energetick *without rules*: wherever I turned my view, there was perplexity to be disentangled, and confusion to be regulated.”—*Preface to Dict.*, p. 1. Again: “Having therefore *no assistance but from general grammar*, I applied myself to the perusal of our writers; and noting whatever might be of use to ascertain or illustrate any word or phrase, accumulated in time the materials of a dictionary.”—*Ibid.* But it is not given to any one man to do every thing; else, Johnson had done it. His object was, to compile a dictionary, rather than to compose a grammar, of our language. To lexicography, grammar is necessary, as a preparation; but, as a purpose, it is merely incidental. Dr. Priestley speaks of Johnson thus: “I must not conclude this preface, without making my acknowledgements to Mr. *Johnson*, whose admirable dictionary has been of the greatest use to me in the study of our language. It is pity he had not formed as just, and as extensive an idea of English grammar. Perhaps this very useful work may still be reserved for his distinguished abilities in this way.”—*Priestley’s Grammar, Preface*, p. xxiii. Dr. Johnson’s English Grammar is all comprised in fourteen pages, and of course it is very deficient. The syntax he seems inclined entirely to omit, as (he says) Wallis did, and Ben Jonson had better done; but, for form’s sake, he condescends to bestow upon it ten short lines.

33. My point here is, that the best grammarians have left much to be done by him who may choose to labour for the further improvement of English grammar; and that a man may well deserve comparative praise, who has not reached perfection in a science like this. Johnson himself committed many errors, some of which I shall hereafter expose; yet I cannot conceive that the following judgement of his works was penned without some bias of prejudice: “Johnson’s merit ought not to be denied to him; but his dictionary is the most imperfect and faulty, and the least valuable *of any* \* of his productions; and that share of merit which it possesses, makes it by so much the more hurtful. I rejoice, however, that though the least valuable, he found it the most profitable: for I could never read his preface without shedding a tear. And yet it must be confessed, that his *grammar* and *history* and *dictionary* of what *he calls* the English language, are in all respects (except the bulk of the *latter* †) most truly contemptible performances; and a reproach to the learning and industry of a nation which could receive them with the slightest approbation. Nearly one third of this dictionary is as much the language of the Hottentots as of the English; and it would be no difficult matter so to translate any one of the plainest and most popular numbers of the *Spectator* into the language of this dictionary, that no mere Englishman, though well read in his own language, would be able to comprehend one sentence of it. It appears to be a work of labour, and yet is in truth one of the most idle performances ever offered to the public; compiled by an author who possessed not one single requisite for the undertaking, and (being a publication of a set of booksellers) owing

---

\* The phrase “*of any*” is here erroneous. These words ought to have been omitted; or the author should have said—“the least valuable of *all* his productions.”

† This word *latter* should have been *last*; for *three* works are here spoken of.

its success to that very circumstance which alone must make it impossible that it should deserve success.”—*Tooke’s Diversions of Purley*, Vol. i, p. 182.

34. *Dr. Ash’s* “Grammatical Institutes, or Easy Introduction to Dr. Lowth’s English Grammar,” is a meagre performance, the ease of which consists in nothing but its brevity. *Dr. Priestley*, who in the preface to his third edition acknowledges his obligations to Johnson, and also to Lowth, thought it premature to attempt an English grammar; and contented himself with publishing a few brief “Rudiments,” with a loose appendix consisting of “Notes and Observations, for the use of those who have made some proficiency in the language.” He says, “With respect to our own language, there seems to be a kind of claim upon all who make use of it, to do something for its improvement; and the best thing we can do for this purpose at present, is, to exhibit its actual structure, and the varieties with which it is used. When these are once distinctly pointed out, and generally attended to, the best forms of speech, and those which are most agreeable to the analogy of the language, will soon recommend themselves, and come into general use; and when, by this means, the language shall be written with sufficient uniformity, we may hope to see a complete grammar of it. At present, *it is by no means ripe for such a work*;\* but we may approximate to it very fast, if all persons who are qualified to make remarks upon it, will give a little attention to the subject. In such a case, a few years might be sufficient to complete it.”—*Priestley’s Grammar, Preface*, p. xv. In point of time, both Ash and Priestley expressly claim priority to Lowth, for their first editions; but the former having allowed his work to be afterwards entitled an Introduction to Lowth’s, and the latter having acknowledged some improvements in his from the same source, they have both been regarded as later authors.

35. The great work of the learned etymologist *John Horne Tooke*, consists of two octavo volumes, entitled, “EPEA PTEROENTA, or the Diversions of Purley.” This work explains, with admirable sagacity, the origin and primitive import of many of the most common yet most obscure English words; and is, for that reason, a valuable performance. But as it contains nothing respecting the construction of the language, and embraces no proper system of grammatical doctrines, it is a great error to suppose that the common principles of practical grammar ought to give place to such instructions, or even be modelled according to what the author proves to be true in respect to the origin of particular words. The common grammarians were less confuted by him, than many of his readers have imagined; and it ought not to be forgotten that his purpose was as different from theirs, as

---

\* With this opinion concurred the learned James White, author of a Grammatical Essay on the English Verb, an octavo volume of more than three hundred pages, published in London in 1761. This author says, “Our Essays towards forming an English Grammar, have not been very many: from the reign of Queen Elizabeth, to that of Queen Ann, there are but Two that the author of the Present knows of: one in English by the renown’d Ben Jonson, and one in Latin by the learn’d Dr. Wallis. In the reign of Queen Ann indeed, there seems to have arisen a noble Spirit of ingenious Emulation in this Literary way: and to this we owe the treatises compos’d at that period for the use of schools, by Brightland, Greenwood, and Maittaire. But, since that time, nothing hath appear’d, that hath come to this Essayist’s knowledge, deserving *to be taken any notice of* as tending to illustrate our Language by ascertaining the Grammar of it; except Anselm Bayly’s Introduction to Languages, Johnson’s Grammar prefix’d to the Abridgement of his Dictionary, and the late Dr. Ward’s Essays upon the English Language.—These are all the Treatises he hath met with, relative to this subject; all which he hath perus’d *very* attentively, and made the best use of them in his power. But notwithstanding all these aids, something still remains to be done, at least it so appears to him, *preparatory to attempting with success the Grammar of our Language*. All our efforts of this kind seem to have been render’d ineffectual hitherto, chiefly by the prevalency of two false notions: one of which is, that our Verbs have no Moods; and the other, that our Language hath no Syntax.”—*White’s English Verb*, p. viii.

are their schemes of Grammar from the plan of his critical “Diversions.” In this connexion may be mentioned an other work of similar size and purpose, but more comprehensive in design; the “History of European Languages,” by that astonishing linguist the late *Dr. Alexander Murray*. This work was left unfinished by its lamented author; but it will remain a monument of erudition never surpassed, acquired in spite of wants and difficulties as great as diligence ever surmounted. Like Tooke’s volumes, it is however of little use to the mere English scholar. It can be read to advantage only by those who are acquainted with several other languages. The works of *Crombie* and *Coote* are more properly essays or dissertations, than elementary systems of grammar.

36. The number of English grammars has now become so very great, that not even a general idea of the comparative merits or defects of each can here be given. I have examined with some diligence all that I have had opportunity to obtain; but have heard of several which I have never yet seen. Whoever is curious to examine at large what has been published on this subject, and thus to qualify himself to judge the better of any new grammar, may easily make a collection of one or two hundred bearing different names. There are also many works not called grammars, from which our copyists have taken large portions of their compilations. Thus Murray confessedly copied from ten authors; five of whom are Beattie, Sheridan, Walker, Blair, and Campbell. Dr. Beattie, who acquired great celebrity as a teacher, poet, philosopher, and logician, was well skilled in grammar; but he treated the subject only in critical disquisitions, and not in any distinct elementary work adapted to general use. Sheridan and Walker, being lexicographers, confined themselves chiefly to orthography and pronunciation. Murray derived sundry principles from the writings of each; but the English Grammar prepared by the latter, was written, I think, several years later than Murray’s. The learned doctors Blair and Campbell wrote on rhetoric, and not on the elementary parts of grammar. Of the two, the latter is by far the more accurate writer. Blair is fluent and easy, but he furnishes not a little false syntax; Campbell’s *Philosophy of Rhetoric* is a very valuable treatise. To these, and five or six other authors whom I have noticed, was Lindley Murray “principally indebted for his materials.” Thus far of the famous contributors to English grammar. The *Lectures on Rhetoric and Oratory*, delivered at Harvard University by John Quincy Adams, and published in two octavo volumes in 1810, are such as do credit even to that great man; but they descend less to verbal criticism, and enter less into the peculiar province of the grammarian, than do most other works of a similar title.

37. Some of the most respectable authors or compilers of more general systems of English grammar for the use of schools, are the writer of the *British Grammar*, Bicknell, Buchanan, William Ward, Alexander Murray the schoolmaster, Mennye, Fisher, Lindley Murray, Penning, W. Allen, Grant, David Blair, Lennie, Guy, Churchill. To attempt any thing like a review or comparative estimate of these, would protract this introduction beyond all reasonable bounds; and still others would be excluded, which are perhaps better entitled to notice. Of mere modifiers and abridgers, the number is so great, and the merit or fame so little, that I will not trespass upon the reader’s patience by any further mention of them or their works. Whoever takes an accurate and comprehensive view of the history and present state of this branch of learning, though he may not conclude, with Dr. Priestley, that it is premature to attempt a complete grammar of the language, can scarcely forbear to coincide with Dr. Barrow, in the opinion that among all the treatises heretofore produced no such grammar is found. “Some superfluities have been expunged, some mistakes have been rectified, and some obscurities have been cleared; still, however, that all the grammars used in our different schools, public as well as private, are

disgraced by errors or defects, is a complaint as just as it is frequent and loud.”—*Barrow's Essays*, p. 83.

38. Whether, in what I have been enabled to do, there will be found a remedy for this complaint, must be referred to the decision of others. Upon the probability of effecting this, I have been willing to stake some labour; how much, and with what merit, let the candid and discerning, when they shall have examined for themselves, judge. It is certain that we have hitherto had, of our language, no complete grammar. The need of such a work I suppose to be at this time in no small degree felt, especially by those who conduct our higher institutions of learning; and my ambition has been to produce one which might deservedly stand along side of the Port-Royal Latin and Greek Grammars, or of the *Grammaire des Grammaires* of Girault Du Vivier. If this work is unworthy to aspire to such rank, let the patrons of English literature remember that the achievement of my design is still a desideratum. We surely have no other book which might, in any sense, have been called “*the Grammar of English Grammars*,” none, which, either by excellence, or on account of the particular direction of its criticism, might take such a name. I have turned the eyes of Grammar, in an especial manner, upon the conduct of her own household; and if, from this volume, the reader acquire a more just idea of *the grammar* which is displayed in *English grammars*, he will discover at least one reason for the title which has been bestowed upon the work. Such as the book is, I present it to the public, without pride, without self-seeking, and without anxiety: knowing that most of my readers will be interested in estimating it *justly*; that no true service, freely rendered to learning, can fail of its end; and that no achievement merits aught with Him who graciously supplies all ability. The opinions expressed in it have been formed with candour, and are offered with submission. If in any thing they are erroneous, there are those who can detect their faults. In the language of an ancient master, the earnest and assiduous *Despauter*, I invite the correction of the candid: “Nos quoque, quantumcunque diligentes, cùm a candidis tùm a lividis carpemur: a candidis interdum justè; quos oro, ut de erratis omnibus amicè me admoneant—erro nonnunquam quia homo sum.”

GOOLD BROWN.

*New York*, 1836.

## THE GRAMMAR OF ENGLISH GRAMMARS.

GRAMMAR, as an art, is the power of reading, writing, and speaking correctly. As an acquisition, it is the essential skill of scholarship. As a study, it is the practical science which teaches the right use of language.

*An English Grammar* is a book which professes to explain the nature and structure of the English language; and to show, on just authority, what is, and what is not, good English.

ENGLISH GRAMMAR, in itself, is the art of reading, writing, and speaking the English language correctly. It implies, in the adept, such knowledge as enables him to avoid improprieties of speech; to correct any errors that may occur in literary compositions; and to parse, or explain grammatically, whatsoever is rightly written.

*To read* is to perceive what is written or printed, so as to understand the words, and be able to utter them with their proper sounds.

*To write* is to express words and thoughts by letters, or characters, made with a pen or other instrument.

*To speak* is to utter words orally, in order that they may be heard and understood.

Grammar, like every other liberal art, can be properly taught only by a regular analysis, or systematic elucidation, of its component parts or principles; and these parts or principles must be made known chiefly by means of definitions and examples, rules and exercises.

A *perfect definition* of any thing or class of things is such a description of it, as distinguishes that entire thing or class from every thing else, by briefly telling *what it is*.

An *example* is a particular instance or model, serving to prove or illustrate some given proposition or truth.

A *rule of grammar* is some law, more or less general, by which custom regulates and prescribes the right use of language.

An *exercise* is some technical performance required of the learner in order to bring his knowledge and skill into practice.

LANGUAGE, in the primitive sense of the term, embraced only vocal expression, or human speech uttered by the mouth; but after letters were invented to represent articulate sounds, language became twofold, *spoken* and *written*, so that the term, *language*, now signifies, *any series of sounds or letters formed into words and employed for the expression of thought*.

Of the composition of language we have also two kinds, *prose* and *verse*; the latter requiring a certain number and variety of syllables in each line, but the former being free from any such restraint.

The *least parts* of written language are letters; of spoken language, syllables; of language significant in each part, words; of language combining thought, phrases; of language subjoining sense, clauses; of language coördinating sense, members; of language completing sense, sentences.

A discourse, or narration, of any length, is but a series of sentences; which, when written, must be separated by the proper points, that the meaning and relation of all the words may be quickly and clearly perceived by the reader, and the whole be uttered as the sense requires.

In extended compositions, a sentence is usually less than a paragraph; a paragraph, less than a section; a section, less than a chapter; a chapter, less than a book; a book, less than a volume; and a volume, less than the entire work.

The common order of *literary division*, then, is; of a large work, into volumes; of volumes, into books; of books, into chapters; of chapters, into sections; of sections, into paragraphs; of paragraphs, into sentences; of sentences, into members; of members, into clauses; of clauses, into phrases; of phrases, into words; of words, into syllables; of syllables, into letters.

But it rarely happens that any one work requires the use of all these divisions; and we often assume some natural distinction and order of parts, naming each as we find it; and also subdivide into articles, verses, cantoes, stanzas, and other portions, as the nature of the subject suggests.

Grammar is divided into four parts; namely, Orthography, Etymology, Syntax, and Prosody.

Orthography treats of letters, syllables, separate words, and spelling.

Etymology treats of the different *parts of speech*, with their classes and modifications.

Syntax treats of the relation, agreement, government, and arrangement of words in sentences.

Prosody treats of punctuation, utterance, figures, and versification.

### OBSERVATIONS.

OBS. 1.—In the Introduction to this work, have been taken many views of the study, or general science, of grammar; many notices of its history, with sundry criticisms upon its writers or critics; and thus language has often been presented to the reader's consideration, either as a whole, or with broader scope than belongs to the teaching of its particular forms. We come now to the work of *analyzing* our own tongue, and of laying down those special rules and principles which should guide us in the use of it, whether in speech or in writing. The author intends to dissent from other grammarians no more than they are found to dissent from truth and reason; nor will he expose their errors further than is necessary for the credit of the science and the information of the learner. A candid critic can have no satisfaction merely in finding fault with other men's performances. But

the facts are not to be concealed, that many pretenders to grammar have shown themselves exceedingly superficial in their knowledge, as well as slovenly in their practice; and that many vain composers of books have proved themselves *despisers* of this study, by the abundance of their inaccuracies, and the obviousness of their solecisms.

OBS. 2.—Some grammarians have taught that the word *language* is of much broader signification, than that which is given to it in the definition above. I confine it to speech and writing. For the propriety of this limitation, and against those authors who describe the thing otherwise, I appeal to the common sense of mankind. One late writer defines it thus: “LANGUAGE is *any means* by which one *person* communicates his *ideas* to *another*.”—*Sanders’s Spelling-Book*, p. 7. The following is the explanation of an other slack thinker: “One may, by speaking or by writing, (and sometimes *by motions*,) communicate his thoughts to others. *The process* by which this is done, is called LANGUAGE.—*Language is the expression* of thought *and feeling*.”—*S. W. Clark’s Practical Gram.*, p. 7. Dr. Webster goes much further, and says, “LANGUAGE, in its most extensive sense, is the instrument or means of communicating ideas *and affections* of the mind *and body*, from one *animal to another*. In this sense, *brutes possess the power of language*; for by various inarticulate sounds, they make known their wants, desires, and sufferings.”—*Philosophical Gram.*, p. 11; *Improved Gram.*, p. 5. This latter definition the author of that vain book, “*the District School*,” has adopted in his chapter on Grammar. Sheridan, the celebrated actor and orthoëpist, though he seems to confine language to the human species, gives it such an extension as to make words no necessary part of its essence. “The first thought,” says he, “that would occur to every one, who had not properly considered the point, is, that language is composed of words. And yet, this is so far from being an adequate idea of language, that the point in which most men think its very essence to consist, is not even a necessary property of language. For language, in its full extent, means, any way or method whatsoever, by which *all that passes in the mind of one man*, may be manifested to another.”—*Sheridan’s Lectures on Elocution*, p. 129. Again: “I have already *shown*, that words are, in their own nature, *no essential part of language*, and are only considered so through custom.”—*Ib.* p. 135.

OBS. 3.—According to S. Kirkham’s notion, “LANGUAGE, in its most extensive sense, implies those signs by which *men and brutes*, communicate *to each other* their thoughts, affections and desires.”—*Kirkham’s English Gram.*, p. 16. Again: “*The language of brutes* consists in the use of those inarticulate sounds by which they express *their thoughts and affections*.”—*Ib.* To me it seems a shameful abuse of speech, and a vile descent from the dignity of grammar, to make the voices of “*brutes*” any part of language, as taken in a literal sense. We might with far more propriety raise our conceptions of it to the spheres above, and construe literally the metaphors of David, who ascribes to the starry heavens, both “*speech*” and “*language*,” “*voice*” and “*words*,” daily “*uttered*” and everywhere “*heard*.” See *Psalms* xix.

OBS. 4.—But, strange as it may seem, Kirkham, commencing his instructions with the foregoing definition of language, proceeds to divide it, agreeably to this notion, into two sorts, *natural* and *artificial*; and affirms that the former “is common both to man and brute,” and that the language which is peculiar to man, the language which consists of *words*, is altogether an *artificial invention*: \* thereby contradicting at once a host of the

---

\* A similar doctrine, however, is taught by no less an author than “the Rev. Alexander Crombie, LL. D.,” who says, in the first paragraph of his introduction, “LANGUAGE consists of intelligible signs, and is the

most celebrated grammarians and philosophers, and that without appearing to know it. But this is the less strange, since he immediately forgets his own definition and division of the subject, and as plainly contradicts himself. Without limiting the term at all, without excluding his fanciful “*language of brutes*,” he says, on the next leaf, “*Language is conventional*, and not only *invented*, but, in its progressive advancement, *varied for purposes of practical convenience*. Hence it assumes *any and every form* which those who make use of it, choose to give it.”—*Kirkham’s Gram.*, p. 18. This, though scarcely more rational than his “*natural language of men and brutes*,” plainly annihilates that questionable section of grammatical science, whether brutal or human, by making all language a thing “*conventional*” and “*invented*.” In short, it leaves no ground at all for any grammatical science of a positive character, because it resolves all forms of language into the irresponsible will of those who utter any words, sounds, or noises.

OBS. 5.—Nor is this gentleman more fortunate in his explanation of what may really be called language. On one page, he says, “*Spoken language or speech*, is made up of articulate sounds uttered by the human voice.”—*Kirkham’s Gram.*, p. 17. On the next, “The most important use of *that faculty called speech*, is, to convey our thoughts to others.”—*Ib.*, p. 18. Thus the grammarian who, in the same short paragraph, seems to “defy the ingenuity of man to give his words any other meaning than that which he himself intends *them to express*,” (*Ib.*, p. 19,) either writes so badly as to make any ordinary false syntax appear trivial, or actually conceives man to be the inventor of one of his own *faculties*. Nay, does he not make man the contriver of that “natural language” which he possesses “in common with the brutes?” a language “*The meaning of which*,” he says, “*all the different animals perfectly understand*?”—See his *Gram.*, p. 16. And if this notion again be true, does it not follow, that a horse knows perfectly well what horned cattle mean by their bellowing, or a flock of geese by their gabbling? I should not have noticed these things, had not the book which teaches them, been made popular by *a thousand* imposing attestations to its excellence and accuracy. For grammar has nothing at all to do with inarticulate voices, or the imaginary languages of *brutes*. It is scope enough for one science to explain all the languages, dialects, and speeches, that lay claim to *reason*. We need not enlarge the field, by descending

“To beasts, whom \* God on their creation-day  
Created mute to all articulate sound.”—*Milton*.†

---

medium, by which *the mind* communicates *its thoughts*. It is either articulate, or inarticulate; artificial, or natural. The former is peculiar to man; the latter is *common to all animals*. By inarticulate language, we mean those instinctive cries, by which the several tribes of inferior creatures are enabled to express their sensations and desires. By articulate language is understood a system of expression, composed of simple *sounds*, differently modified by the organs of speech, and variously combined.”—*Treatise on the Etymology and Syntax of the English Language*, p. 1. See the same doctrine also in *Hiley’s Gram.*, p. 141. The language which “is *common to all animals*,” can be no other than that in which Æsop’s wolves and weasels, goats and grasshoppers, talked—a language quite too unreal for *grammar*. On the other hand, that which is composed of *sounds* only, and not of letters, includes but a mere fraction of the science.

\* The pronoun *whom* is not properly applicable to beasts, unless they are *personified*: the relative *which* would therefore, perhaps, have been preferable here, though *whom* has a better sound.—G. B.

† “The great difference between men and brutes, in the utterance of sound by the mouth, consists in the power of *articulation* in man, and the entire want of it in brutes.”—*Webster’s Improved Gram.*, p. 8.

## PART I. ORTHOGRAPHY.

ORTHOGRAPHY treats of letters, syllables, separate words, and spelling.

### CHAPTER I.—OF LETTERS.

A *Letter* is an alphabetic character, which commonly represents some elementary sound of the human voice, some element of speech.

An elementary sound of the human voice, or an element of speech, is one of the simple sounds which compose a spoken language.

The sound of a letter is commonly called its *power*: when any letter of a word is not sounded, it is said to be *silent* or *mute*.

The letters in the English alphabet, are twenty-six; the simple or primary sounds which they represent, are about thirty-six or thirty-seven.

A knowledge of the letters consists in an acquaintance with these *four sorts of things*; their *names*, their *classes*, their *powers*, and their *forms*.

The letters are written, or printed, or painted, or engraved, or embossed, in an infinite variety of shapes and sizes; and yet are always *the same*, because their essential properties do not change, and their names, classes, and powers, are mostly permanent.

The following are some of the different sorts of types, or styles of letters, with which every reader should be early acquainted:—

1. The Roman: A a, B b, C c, D d, E e, F f, G g, H h, I i, J j, K k, L l, M m, N n, o, P p, Q q, R r, S s, T t, U u, V v, W w, X x, Y y, Z z.

2. The Italic: *A a, B b, C c, D d, E e, F f, G g, H h, I i, J j, K k, L l, M m, N n, o, P p, Q q, R r, S s, T t, U u, V v, W w, X x, Y y, Z z.*

3. The Script: *A a, B b, C c, D d, E e, F f, G g, H h, I i, J j, K k, L l, M m, N n, o, P p, Q q, R r, S s, T t, U u, V v, W w, X x, Y y, Z z.*

4. The Old English: A a, B b, C c, D d, E e, F f, G g, H h, I i, J j, K k, L l, M m, N n, o, P p, Q q, R r, S s, T t, U u, V v, W w, X x, Y y, Z z.

### OBSERVATIONS.

OBS. 1.—A letter *consists* not in the figure only, or in the power only, but in the figure and power united; as an ambassador consists not in the man only, or in the commission only, but in the man commissioned. The figure and the power, therefore, are necessary to

constitute the letter; and a name is as necessary, to call it by, teach it, or tell what it is. The *class* of a letter is determined by the nature of its power, or sound; as the ambassador is plenipotentiary or otherwise, according to the extent of his commission. To all but the deaf and dumb, written language is the representative of that which is spoken; so that, in the view of people in general, the powers of the letters are habitually identified with their sounds, and are conceived to be nothing else. Hence any given sound, or modification of sound, which all men can produce at pleasure, when arbitrarily associated with a written sign, or conventional character, constitutes what is called *a letter*. Thus we may produce the sounds of *a, e, o*, then, by a particular compression of the organs of utterance, modify them all, into *ba, be, bo*, or *fa, fe, fo*; and we shall see that *a, e*, and *o*, are letters of one sort, and *b* and *f* of an other. By *elementary* or *articulate* sounds,\* then, we mean not only the simple tones of the voice itself, but the modifying stops and turns which are given them in speech, and marked by letters: the real voices constituting vowels; and their modifications, consonants.

OBS. 2.—A mere mark to which no sound or power is ever given, cannot be a letter; though it may, like the marks used for punctuation, deserve a name and a place in grammar. Commas, semicolons, and the like, represent *silence*, rather than sounds, and are therefore not letters. Nor are the Arabic figures, which represent entire *words*, nor again any symbols standing for *things*, (as the astronomic marks for the sun, the moon, the planets,) to be confounded with letters; because the representative of any word or number, of any name or thing, differs widely in its power, from the sign of a simple elementary sound: i. e., from any constituent *part* of a written word. The first letter of a word or name does indeed sometimes stand for the whole, and is still a letter; but it is so, as being the first element of the word, and not as being the representative of the whole.

OBS. 3.—In their definitions of vowels and consonants, many grammarians have resolved letters into *sounds only*; as, “A Vowel is an articulate *sound*,” &c.—“A Consonant is an articulate *sound*,” &c.—*L. Murray’s Gram.*, p. 7. But this confounding of the visible signs with the things which they signify, is very far from being a true account of either. Besides, letters combined are capable of a certain mysterious power which is independent of all sound, though speech, doubtless, is what they properly represent. In practice, almost all the letters may occasionally happen to be *silent*; yet are they not, in these cases, necessarily useless. The deaf and dumb also, to whom none of the letters express or represent sounds, may be taught to read and write understandingly. They even learn in some way to distinguish the accented from the unaccented syllables, and to have some notion of *quantity*, or of something else equivalent to it; for some of them, it is said, can compose verses according to the rules of prosody. Hence it would appear, that the powers of the letters are not, of necessity, identified with their sounds; the things being in some

---

\* Strictly speaking, an *articulate sound* is not a simple element of speech, but rather a complex one, whether syllable or word; for *articulate* literally means *jointed*. But our grammarians in general, have applied the term to the sound of a letter, a syllable, or a word, indiscriminately: for which reason, it seems not very suitable to be used alone in describing any of the three. Sheridan says, “The essence of a syllable consists in *articulation only*, for every *articulate sound* of course forms a syllable.”—*Lectures on Elocution*, p. 62. If he is right in this, not many of our letters—or, perhaps more properly, none of them—can singly represent articulate sounds. The looseness of this term induces me to add or prefer an other. “The Rev. W. Allen,” who comes as near as any of our grammarians, to the true definition of a *letter*, says: 1. “The sounds used in language are called *articulate sounds*.” 2. “A letter is a character used in printing or writing, to represent an *articulate sound*.”—*Allen’s Elements of E. Gram.*, p. 2. Dr. Adam says: 1. “A letter is the mark of *a sound*, or of *an articulation of sound*.” 2. “A vowel is properly called a *simple sound*; and the sounds formed by the concurrence of vowels and consonants, *articulate sounds*.”—*Latin and English Gram.*, pp. 1 and 2.

respect distinguishable, though the terms are commonly taken as synonymous. The fact is, that a word, whether spoken or written, is of itself *significant*, whether its corresponding form be known or not. Hence, in the one form, it may be perfectly intelligible to the illiterate, and in the other, to the educated deaf and dumb; while, to the learned who hear and speak, either form immediately suggests the other, with the meaning common to both.

OBS. 4.—Our knowledge of letters rises no higher than to the forms used by the ancient Hebrews and Phœnicians. Moses is supposed to have written in characters which were nearly the same as those called Samaritan, but his writings have come to us in an alphabet more beautiful and regular, called the Chaldee or Chaldaic, which is said to have been made by Ezra the scribe, when he wrote out a new copy of the law, after the rebuilding of the temple. Cadmus carried the Phœnician alphabet into Greece, where it was subsequently altered and enlarged. The small letters were not invented till about the seventh century of our era. The Latins, or Romans, derived most of their capitals from the Greeks; but their small letters, if they had any, were made afterwards among themselves. This alphabet underwent various changes, and received very great improvements, before it became that beautiful series of characters which we now use, under the name of *Roman letters*. Indeed these particular forms, which are now justly preferred by many nations, are said to have been adopted after the invention of printing. “The Roman letters were first used by Sweynheim and Pannartz, printers who settled at Rome, in 1467. The earliest work printed wholly in this character in England, is said to have been Lily’s or Paul’s Accidence, printed by Richard Pinson, 1518. The Italic letters were invented by Aldus Manutius at Rome, towards the close of the fifteenth century, and were first used in an edition of Virgil, in 1501.”—*Constables Miscellany*, Vol. xx, p. 147. The Saxon alphabet was mostly Roman. Not more than one quarter of the letters have other forms. But the changes, though few, give to a printed page a very different appearance. Under William the Conqueror, this alphabet was superseded by the modern Gothic, Old English, or Black letter; which, in its turn, happily gave place to the present Roman. The Germans still use a type similar to the Old English, but not so heavy.

OBS. 5.—I have suggested that a true knowledge of the letters implies an acquaintance with their *names*, their *classes*, their *powers*, and their *forms*. Under these four heads, therefore, I shall briefly present what seems most worthy of the learner’s attention at first, and shall reserve for the appendix a more particular account of these important elements. The most common and the most useful things are not those about which we are in general most inquisitive. Hence many, who think themselves sufficiently acquainted with the letters, do in fact know but very little about them. If a person is able to read some easy book, he is apt to suppose he has no more to learn respecting the letters; or he neglects the minute study of these elements, because he sees what words they make, and can amuse himself with stories of things more interesting. But merely to understand common English, is a very small qualification for him who aspires to scholarship, and especially for a *teacher*. For one may do this, and even be a great reader, without ever being able to name the letters properly, or to pronounce such syllables as *ca, ce, ci, co, cu, cy*, without getting half of them wrong. No one can ever teach an art more perfectly than he has learned it; and if we neglect the *elements* of grammar, our attainments must needs be proportionately unsettled and superficial.

**I. NAMES OF THE LETTERS.**

The *names* of the letters, as now commonly spoken and written in English, are *A, Bee, Cee, Dee, E, Eff, Gee, Aitch, I, Jay, Kay, Ell, Em, En, O, Pee, Kue, Ar, Ess, Tee, U, Vee, Double-u, Ex, Wy, Zee*.

**OBSERVATIONS.**

OBS. 1.—With the learning and application of these names, our literary education begins; with a continual rehearsal of them in spelling, it is for a long time carried on; nor can we ever dispense with them, but by substituting others, or by ceasing to mention the things thus named. What is obviously indispensable, needs no proof of its importance. But I know not whether it has ever been noticed, that these names, like those of the days of the week, are worthy of particular distinction, for their own nature. They are words of a very peculiar kind, being nouns that are at once *both proper and common*. For, in respect to rank, character, and design, each letter is a thing strictly individual and identical—that is, it is ever one and the same; yet, in an other respect, it is a comprehensive sort, embracing individuals both various and numberless. Thus every B is a *b*, make it as you will; and can be nothing else than that same letter b, though you make it in a thousand different fashions, and multiply it after each pattern innumerable. Here, then, we see individuality combined at once with great diversity, and infinite multiplicity; and it is *to this combination*, that letters owe their wonderful power of transmitting thought. Their *names*, therefore, should always be written with capitals, as proper nouns, at least in the singular number; and should form the plural regularly, as ordinary appellatives. Thus: (if we adopt the names now most generally used in English schools:) *A, Aes; Bee, Bees; Cee, Cees; Dee, Dees; E, Ees; Eff, Effs; Gee, Gees; Aitch, Aitches; I, Ies; Jay, Jays; Kay, Kays; Ell, Ells; Em, Ems; En, Ens; O, Oes; Pee, Pees; Kue, Kues; Ar, Ars; Ess, Esses; Tee, Tees; U, Ues; Vee, Vees; Double-u, Double-ues; Ex, Exes; Wy, Wies; Zee, Zees*.

OBS. 2.—The names of the letters, as expressed in the modern languages, are mostly framed *with reference* to their powers, or sounds. Yet is there in English no letter of which the name is always identical with its power: for *A, E, I, O, and U*, are the only letters which can name themselves, and all these have other sounds than those which their names express. The simple powers of the other letters are so manifestly insufficient to form any name, and so palpable is the difference between the nature and the name of each, that did we not know how education has been trifled with, it would be hard to believe even Murray, when he says, “They are frequently confounded by writers on grammar. Observations and reasonings on the *name*, are often applied to explain the *nature* of a consonant; and by this means the student is led into error and perplexity.”—*L. Murray’s Gram.*, 8vo, p. 8. The confounding of names with the things for which they stand, implies, unquestionably, great carelessness in the use of speech, and great indistinctness of apprehension in respect to things; yet so common is this error, that Murray himself has many times fallen into it.\* Let

---

\* Of this sort of blunder, the following false definition is an instance: “A *Vowel* is a letter, *the name of which* makes a full open sound.”—*Lennie’s Gram.*, p. 5; *Brace’s*, 7; *Hazen’s*, 10. All this is just as true of a consonant as of a vowel. The comma too, used in this sentence, defeats even the sense which the writers intended. It is surely no description either of a vowel or of a consonant, to say, that it is a letter, and that the name of a letter makes a full open sound. Again, a late grammarian teaches, that the names of all the letters are nothing but *Roman capitals*, and then seems to inquire which of *these names* are *vowels*, thus: “Q. How many letters are in the alphabet? *A*. Twenty-six. Q. What are their names? *A*. A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z. Q. Which of *these* are called *Vowels*?”—*Fowle’s Common School Gram.*, *Part First*, p. 7. If my worthy friend Fowle had known or considered *what are the names* of the letters in English, he might have made a better beginning to his grammar than this.

the learner therefore be on his guard, remembering that grammar, both in its study and in its practice, requires the constant exercise of a rational discernment. Those letters which name themselves, take for their names those sounds which they usually represent at the end of an accented syllable; thus the names, *A, E, I, O, U*, are uttered with the sounds given to the same letters in the first syllables of the other names, *Abel, Enoch, Isaac, Obed, Urim*; or in the first syllables of the common words, *paper, penal, pilot, potent, pupil*. The other letters, most of which can never be perfectly sounded alone, have names in which their powers are combined with other sounds more vocal; as, *Bee, Cee, Dee,—Ell, Em, En,—Jay, Kay, Kue*. But in this respect the terms *Aitch* and *Double-u* are irregular; because they have no obvious reference to the powers of the letters thus named.

OBS. 3.—Letters, like all other things, must be learned and spoken of *by their names*; nor can they be spoken of otherwise; yet, as the simple characters are better known and more easily exhibited than their written names, the former are often substituted for the latter, and are read as the words for which they are assumed. Hence the orthography of these words has hitherto been left too much to mere fancy or caprice. Our dictionaries, by a strange oversight or negligence, do not recognize them as words; and writers have in general spelled them with very little regard to either authority or analogy. What they are, or ought to be, has therefore been treated as a trifling question: and, what is still more surprising, several authors of spelling-books make no mention at all of them; while others, here at the very threshold of instruction, teach falsely—giving “*he*” for *Aitch*, “*er*” for *Ar*, “*oo*” or “*uu*” for *Double-u*, “*ye*” for *Wy*, and writing almost all the rest improperly. So that many persons who think themselves well educated, would be greatly puzzled to name on paper these simple elements of all learning. Nay, there can be found a hundred men who can readily write the alphabetic names which were in use two or three thousand years ago in Greece or Palestine, for one who can do the same thing with propriety, respecting those which we now employ so constantly in English;\* and yet the words themselves are as familiar to every school-boy’s lips as are the characters to his eye. This fact may help to convince us, that *the grammar* of our language has never yet been sufficiently taught. Among all the particulars which constitute this subject, there are none which better deserve to be everywhere known, by proper and determinate names, than these prime elements of all written language.

OBS. 4.—Should it happen to be asked a hundred lustrums hence, what were the names of the letters in “the Augustan age of English literature,” or in the days of William the Fourth and Andrew Jackson, I fear the learned of that day will be as much at a loss for an answer, as would most of our college tutors now, were they asked, by what series of names the Roman youth were taught to spell. Might not Quintilian or Varro have obliged

---

\* By the colloquial phrase, “to a Tee” we mean, “to a *nicety*, to a *tittle*, a *jot*, an *iota*. Had the British poet Cawthorn, himself a noted schoolmaster, known how to write the name of “T,” he would probably have preferred it in the following couplet:

“And swore by Varro’s shade that he  
Conceived the medal to a T.”—*British Poets*, Vol. VII, p. 65.

Here the name would certainly be much fitter than the letter, because the text does not in reality speak of the letter. With the names of the Greek letters, the author was better acquainted; the same poem exhibits two of them, where the characters themselves are spoken of:

“My eye can trace divinely true,  
In this dark curve a little Mu;  
And here, you see, there *seems* to lie  
The ruins of a Doric Xi.”—*Ibidem*.

The critical reader will see that “*seems*” should be *seem*, to agree with its nominative “*ruins*.”

many, by recording these? As it is, we are indebted to Priscian, a grammarian of the sixth century, for almost all we know about them. But even the information which may be had, on this point, has been strangely overlooked by our common Latin grammarians.\* What, but the greater care of earlier writers, has made the Greek names better known or more important than the Latin? In every nation that is not totally illiterate, custom must have established for the letters a certain set of names, which are *the only true ones*, and which are of course to be preferred to such as are local or unauthorized. In this, however, as in other things, use may sometimes vary, and possibly improve; but when its decisions are clear, no feeble reason should be allowed to disturb them. Every parent, therefore, who would have his children instructed to read and write the English language, should see that in the first place they learn to name the letters as they are commonly named in English. A Scotch gentleman of good education informs me, that the names of the letters, as he first learned them in a school in his own country, were these: “A, Ib, Ec, Id, E, Iff, Ig, Ich, I, Ij, Ik, Ill, Im, In, O, Ip, Kue, Ir, Iss, It, U, Iv, Double-u, Ix, Wy, Iz;” but that in the same school the English names are now used. It is to be hoped, that all teachers will in time abandon every such local usage, and name the letters *as they ought to be named*; and that the day will come, in which the regular English *orthography* of these terms, shall be steadily preferred, ignorance of it be thought a disgrace, and the makers of school-books feel no longer at liberty to alter names that are a thousand times better known than their own.

OBS. 5.—It is not in respect to their *orthography* alone, that these first words in literature demand inquiry and reflection: the *pronunciation* of some of them has often been taught erroneously, and, with respect to three or four of them, some writers have attempted to make an entire change from the customary forms which I have recorded. Whether the name of the first letter should be pronounced “*Aye*,” as it is in England, “*Ah*,” as it is in Ireland, or “*Aw*,” as it is in Scotland, is a question which Walker has largely discussed, and clearly decided in favour of the first sound; and this decision accords with the universal practice of the schools in America. It is remarkable that this able critic, though he treated minutely of the letters, naming them all in the outset of his “Principles” subsequently neglected the names of them all, except the first and the last. Of *Zee*, (which has also been called *Zed*, *Zad*, *Izzard*, *Uzzard*, *Izzet*, and *Iz*),† he says, “Its common name is *izzard*, which Dr. Johnson explains into *s hard*; if, however, this is the meaning, it is a gross misnomer; for the *z* is not the hard, but the soft *s*;‡ but as it has a less sharp, and

---

\* Lily, reckoning without the H, J, or V, speaks of the Latin letters as “*twenty-two*,” but *says nothing* concerning their names. Ruddiman, Adam, Grant, Gould, and others, who include the H, J, and V, rightly state the number to be “*twenty-five*,” but, concerning their names, are likewise *entirely silent*. Andrews and Stoddard, not admitting the K, teach thus: “The letters of the Latin language are *twenty-four*. They *have the same names* as the corresponding characters in English.”—*Andrews and Stoddard’s Latin Gram.*, p. 1. A later author speaks thus: “The Latin Alphabet consists of *twenty-five* letters, *the same in name and form* as the English, but without the *w*.”—*Bullions’s Latin Gram.*, p. 1. It would probably be nearer to the truth, to say, “The Latin Alphabet, *like the French*, has no W; it consists of twenty-five letters, which are *the same in name and form as the French*.” Will it be pretended that the French names and the English do not differ?

† The Scotch *Iz* and the Craven *Izzet*, if still in use anywhere, are names strictly local, not properly English, nor likely to spread. “IZZET, the letter Z. This is probably the corruption of *izzard*, the old and common name for the letter, though I know not, says *Nares*, on what authority.”—*Glossary of Craven*, *w. Izzet*. “Z z, zed, more commonly called *izzard* or *uzzard*, that is, *s hard*.”—*Dr. Johnson’s Gram.*, p. 1.

“And how she sooth’d me when with study sad

I labour’d on to reach the final *Zad*.”—*Crabbe’s Borough*, p. 228.

‡ William Bolles, in his new Dictionary, says of the letter Z: “Its sound is uniformly that of a *hard S*.” The *name*, however, he pronounces as I do; though he writes it not *Zee* but *zê*; giving not the *orthography* of the name, as he should have done, but a mere index of its pronunciation. Walker proves by citations from

therefore not so audible a sound, it is not impossible *but* it may mean *s surd*. *Zed*, borrowed from the French, is the more fashionable name of this letter; but, in my opinion, *not to be admitted, because the names of the letters ought to have no diversity.*—*Walker's Principles*, No. 483. It is true, the name of a letter ought to be one, and in no respect diverse; but where diversity has already obtained, and become firmly rooted in custom, is it to be obviated by insisting upon what is old-fashioned, awkward, and inconvenient? Shall the better usage give place to the worse? Uniformity cannot be so reached. In this country, both *Zed* and *Izzard*, as well as the worse forms *Zad* and *Uzzard*, are now fairly superseded by the softer and better term *Zee*; and whoever will spell aloud, with each of these names, a few such words as *dizzy*, *mizzen*, *gizzard*, may easily perceive why none of the former can ever be brought again into use. The other two, *Iz* and *Izzet*, being localisms, and not authorized English, I give up all six; *Zed* to the French, and the rest to oblivion.

OBS. 6.—By way of apology for noticing the name of the first letter, Walker observes, “If a diversity of names to vowels did not confound us in our spelling, or declaring to each other the component letters of a word, it would be entirely needless to enter into *so trifling a question* as the mere name of a letter; but when we find ourselves unable to convey signs to each other on account of this diversity of names, and that words themselves are endangered by an improper utterance of their component parts, it seems highly incumbent on us to attempt a uniformity in this point, which, insignificant as it may seem, is undoubtedly the foundation of a just and regular pronunciation.”—*Dict.*, *under A*. If diversity in this matter is so perplexing, what shall we say to those who are attempting innovations without assigning reasons, or even pretending authority? and if a knowledge of these names is the basis of a just pronunciation, what shall we think of him who will take no pains to ascertain how he ought to speak and write them? He who pretends to teach the proper fashion of speaking and writing, cannot deal honestly, if ever he silently prefer a suggested improvement, to any established and undisturbed usage of the language; for, in grammar, no individual authority can be a counterpoise to general custom. The best usage can never be that which is little known, nor can it be well ascertained and taught by him who knows little. Inquisitive minds are ever curious to learn the nature, origin, and causes of things; and that instruction is the most useful, which is best calculated to gratify this rational curiosity. This is my apology for dwelling so long upon the present topic.

OBS. 7.—The names originally given to the letters were not mere notations of sound, intended solely to express or make known the powers of the several characters then in use; nor ought even the modern names of our present letters, though formed with special reference to their sounds, to be considered such. Expressions of mere sound, such as the notations in a pronouncing dictionary, having no reference to what is meant by the sound, do not constitute words at all; because they are not those acknowledged signs to which a meaning has been attached, and are consequently without that significance which is an essential property of words. But, in every language, there must be a series of sounds by which the alphabetical characters are commonly known in speech; and which, as they are the acknowledged names of these particular objects, must be entitled to a place among *the words* of the language. It is a great error to judge otherwise; and a greater to make it a “trifling question” in grammar, whether a given letter shall be called by one name or by an

---

Professor Ward and Dr. Wallis, that these authors considered the *sharp* or *hissing* sound of *s* the “hard” sound; and the *flat* sound, like that of *z*, its “soft” sound. See his *Dictionary*, 8vo, p. 53.

other. Who shall say that *Daleth*, *Delta*, and *Dee*, are not three *real words*, each equally important in the language to which it properly belongs? Such names have always been in use wherever literature has been cultivated; and as the forms and powers of the letters have been changed by the nations, and have become different in different languages, there has necessarily followed a change of the names. For, whatever inconvenience scholars may find in the diversity which has thence arisen, to name these elements in a set of foreign terms, inconsistent with the genius of the language to be learned, would surely be attended with a tenfold greater. We derived our letters, and their names too, from the Romans; but this is no good reason why the latter should be spelled and pronounced as we suppose they were spelled and pronounced in Rome.

OBS. 8.—The names of the twenty-two letters in Hebrew, are, without dispute, proper *words*; for they are not only significant of the letters thus named, but have in general, if not in every instance, some other meaning in that language. Thus the mysterious ciphers which the English reader meets with, and wonders over, as he reads the 119th Psalm, may be resolved, according to some of the Hebrew grammars, as follows:—

Ⲁ Aleph, A, an ox, or a leader; Ⲃ Beth, Bee, house; Ⲅ Gimel, Gee, a camel; Ⲇ Daleth, Dee, a door; Ⲉ He, E, she, or behold; Ⲋ Vau, U, a hook, or a nail; Ⲍ Zain, Zee, armour; Ⲏ Cheth, or Heth, Aitch, a hedge; Ⲑ Teth, Tee, a serpent, or a scroll; Ⲓ Jod, or Yod, I, or Wy, a hand shut; Ⲕ Caph, Cee, a hollow hand, or a cup; Ⲗ Lamed, Ell, an ox-goad; Ⲙ Mem, Em, a stain, or spot; Ⲛ Nun, En, a fish, or a snake; Ⲝ Samech, Ess, a basis, or support; Ⲟ Ain, or Oin, O, an eye, or a well; Ⲡ Pe, Pee, a lip, or mouth; Ⲣ Tzaddi, or Tsadhe, Tee-zee, (i. e. tz, or ts,) a hunter's pole; Ⲥ Koph, Kue, or Kay, an ape; Ⲧ Resch, or Resh, Ar, a head; Ⲩ Schin, or Sin, Ess-aitch, or Ess, a tooth; Ⲫ Tau, or Thau, Tee, or Tee-aitch, a cross, or mark.

These English names of the Hebrew letters are written with much less uniformity than those of the Greek, because there has been more dispute respecting their powers. This is directly contrary to what one would have expected; since the Hebrew names are words originally significant of other things than the letters, and the Greek are not. The original pronunciation of both languages is admitted to be lost, or involved in so much obscurity that little can be positively affirmed about it; and yet, where least was known, grammarians have produced the most diversity; aiming at disputed sounds in the one case, but generally preferring a correspondence of letters in the other.

OBS. 9.—The word *alphabet* is derived from the first two names in the following series. The Greek letters are twenty-four; which are formed, named, and sounded, thus:—

A α, Alpha, a; B β, Beta, b; Γ γ, Gamma, g hard; Δ δ], Delta, d; E ε, Epsilon, e short; Ζ ζ, Zeta, z; H η, Eta, e long; Θ θ, Theta, th; I ι, Iota, i; K κ, Kappa, k; Λ λ, Lambda, l; M μ, Mu, m; N ν, Nu, n; Ξ ξ, Xi, x; O ο, Omicron, o short; Π π, Pi, p; Ρ ρ, Rho, r; Σ σ ς, Sigma, s; Τ τ, Tau, t; Υ υ, Upsilon, u; Φ φ, Phi, ph; Χ χ, Chi, ch; Ψ ψ, Psi, ps; Ω ω, Omega, o long.

Of these names, our English dictionaries explain the first and the last; and Webster has defined *Iota*, and *Zeta*, but without reference to the meaning of the former in Greek. *Beta*, *Delta*, *Lambda*, and perhaps some others, are also found in the etymologies or definitions of Johnson and Webster, both of whom spell the word *Lambda* and its

derivative *lambdoidal* without the silent *b*, which is commonly, if not always, inserted by the authors of our Greek grammars, and which Worcester, more properly, retains.

OBS. 10.—The reader will observe that the foregoing names, whether Greek or Hebrew, are in general much less simple than those which our letters now bear; and if he has ever attempted to spell aloud in either of those languages, he cannot but be sensible of the great advantage which was gained when to each letter there was given a short name, expressive, as ours mostly are, of its ordinary power. This improvement appears to have been introduced by the Romans, whose names for the letters were even more simple than our own. But so negligent in respect to them have been the Latin grammarians, both ancient and modern, that few even of the learned can tell what they really were in that language; or how they differed, either in orthography or sound, from those of the English or the French, the Hebrew or the Greek. Most of them, however, may yet be ascertained from Priscian, and some others of note among the ancient philologists; so that by taking from later authors the names of those letters which were not used in old times, we can still furnish an entire list, concerning the accuracy of which there is not much room to dispute. It is probable that in the ancient pronunciation of Latin, *a* was commonly sounded as in *father*; *e* like the English *a*; *i* mostly like *e* long; *y* like *i* short; *c* generally and *g* always hard, as in *come* and *go*. But, as the original, native, or just pronunciation of a language is not necessary to an understanding of it when written, the existing nations have severally, in a great measure, accommodated themselves, in their manner of reading this and other ancient tongues.

OBS. 11.—As the Latin language is now printed, its letters are twenty-five. Like the French, it has all that belong to the English alphabet, except the *Double-u*. But, till the first Punic war, the Romans wrote C for G, and doubtless gave it the power as well as the place of the Gamma or Gimel. It then seems to have slid into K; but they used it also for S, as we do now. The ancient Saxons, generally pronounced C as K, but sometimes as Ch. Their G was either guttural, or like our Y. In some of the early English grammars the name of the latter is written *Ghee*. The letter F, when first invented, was called, from its shape, Digamma, and afterwards Ef. J, when it was first distinguished from I, was called by the Hebrew name Jod, and afterwards Je. V, when first distinguished from U, was called Vau, then Va, then Ve. Y, when the Romans first borrowed it from the Greeks, was called Ypsilon; and Z, from the same source, was called Zeta; and, as these two letters were used only in words of Greek origin, I know not whether they ever received from the Romans any shorter names. In Schneider's Latin Grammar, the letters are named in the following manner; except Je and Ve, which are omitted by this author: "A, Be, Ce, De, E, Ef, Ge, Ha, I, [Je,] Ka, El, Em, En, O, Pe, Cu, Er, Es, Te, U, [Ve,] Ix, Ypsilon, Zeta." And this I suppose to be the most proper way of writing their names *in Latin*, unless we have sufficient authority for shortening Ypsilon into Y, sounded as short *i*, and for changing Zeta into Ez.

OBS. 12.—In many, if not in all languages, the five vowels, A, E, I, O, U, name themselves; but they name themselves differently to the ear, according to the different ways of uttering them in different languages. And as the name of a consonant necessarily requires one or more vowels, that also may be affected in the same manner. But in every language there should be a known way both of writing and of speaking every name in the series; and that, if there is nothing to hinder, should be made conformable to *the genius of the language*. I do not say that the names above can be regularly declined in Latin; but in English it is as easy to speak of two Dees as of two trees, of two Kays as of two days, of

two Exes as of two foxes, of two Effs as of two skiffs; and there ought to be no more difficulty about the correct way of writing the word in the one case, than in the other. In Dr. Sam. Prat's Latin Grammar, (an elaborate octavo, all Latin, published in London, 1722,) nine of the consonants are reckoned mutes; b, c, d, g, p, q, t, j, and v; and eight, semivowels; f, l, m, n, r, s, x, z. "All the mutes," says this author, "are named by placing *e* after them; as, be, ce, de, ge, except *q*, which ends in *u*." See p. 8. "The semivowels, beginning with *e*, end in themselves; as, ef, *ach*, el, em, en, er, es, *ex*, (or, as Priscian will have it, *ix*,) *eds*." See p. 9. This mostly accords with the names given in the preceding paragraph; and so far as it does not, I judge the author to be wrong. The reader will observe that the Doctor's explanation is neither very exact nor quite complete: K is a mute which is not enumerated, and the rule would make the name of it *Ke*, and not *Ka*;—H is not one of his eight semivowels, nor does the name Ach accord with his rule or seem like a Latin word;—the name of Z, according to his principle, would be *Ez* and not "*Eds*," although the latter may better indicate the *sound* which was then given to this letter.

OBS. 13.—If the history of these names exhibits diversity, so does that of almost all other terms; and yet there is some way of writing every word with correctness, and correctness tends to permanence. But Time, that establishes authority, destroys it also, when he fairly sanctions newer customs. To all names worthy to be known, it is natural to wish a perpetual uniformity; but if any one thinks the variableness of these to be peculiar, let him open the English Bible of the fourteenth century, and read a few verses, observing the names. For instance: "Forsothe whanne *Eroude* was to bringynge forth hym, in that nigt *Petir* was slepynge bitwixe tweyno knytis."—*Dedis*, (i. e., *Acts*,) xii, 6. "*Crist Ihesu* that is to demynge the quyke and deed."—2 *Tim.*, iv, 1. Since this was written for English, our language has changed much, and at the same time acquired, by means of the press, some aids to stability. I have recorded above the *true* names of the letters, as they are now used, with something of their history; and if there could be in human works any thing unchangeable, I should wish, (with due deference to all schemers and fault-finders,) that these names might remain the same forever.

OBS. 14.—If any change is desirable in our present names of the letters, it is that we may have a shorter and simpler term in stead of *Double-u*. But can we change this well known name? I imagine it would be about as easy to change *Alpha*, *Upsilon*, or *Omega*; and perhaps it would be as useful. Let Dr. Webster, or any defender of his spelling, try it. He never named the *English* letters rightly; long ago discarded the term *Double-u*; and is not yet tired of his experiment with "*oo*;" but thinks still to make the vowel sound of this letter its name. Yet he writes his new name wrong; has no authority for it but his own; and is, most certainly, reprehensible for the *innovation*.\* If *W* is to be named as a vowel, it ought to *name itself*, as other vowels do, and not to take *two Oes* for its written name. Who that knows what it is, to name a letter, can think of naming *w* by double *o*? That it is possible for an ingenious man to misconceive this simple affair of naming the letters, may appear not only from the foregoing instance, but from the following quotation: "Among the thousand mismanagements of literary instruction, there is at the outset in the hornbook, *the pretence to represent elementary sounds* by syllables composed of two or more elements; as, *Be*, *Kay*, *Zed*, *Double-u*, and *Aitch*. These words are used in infancy, and through life, as *simple elements* in the process of synthetic spelling. If the definition of a *consonant* was made by the master from the practice of the child, it might suggest pity for the pedagogue, but should not make us forget the realities of nature."—*Dr. Rush, on the*

\* Dr. Webster died in 1843. Most of this work was written while he was yet in vigour.

*Philosophy of the Human Voice*, p. 52. This is a strange allegation to come from such a source. If I bid a boy spell the word *why*, he says, “Double-u, Aitch, Wy, *hwi*,” and knows that he has spelled and pronounced the word correctly. But if he conceives that the five syllables which form the three words, *Double-u*, and *Aitch*, and *Wy*, are the three simple sounds which he utters in pronouncing the word *why*, it is not because the hornbook, or the teacher of the hornbook, ever made any such blunder or “pretence;” but because, like some great philosophers, he is capable of misconceiving very plain things. Suppose he should take it into his head to follow Dr. Webster’s books, and to say, “Oo, he, ye, *hwi*,” who, but these doctors, would imagine, that such spelling was supported either by “the realities of nature,” or by the authority of custom? I shall retain both the old “definition of a consonant,” and the usual names of the letters, notwithstanding the contemptuous pity it may excite in the minds of *such* critics.

## II. CLASSES OF THE LETTERS.

The letters are divided into two general classes, *vowels* and *consonants*.

A *vowel* is a letter which forms a perfect sound when uttered alone; as, *a, e, o*.

A *consonant* is a letter which cannot be perfectly uttered till joined to a vowel; as, *b, c, d*.\*

The vowels are *a, e, i, o, u*, and sometimes *w* and *y*. All the other letters are consonants.

*W* or *y* is called a consonant when it precedes a vowel heard in the same syllable; as in *wine, twine, whine; ye, yet, youth*: in all other cases, these letters are vowels; as in *Yssel, Ystadt, yttria; newly, dewy, eyebrow*.

## CLASSES OF CONSONANTS.

The consonants are divided, with respect to their powers, into *semivowels* and *mutés*.

A *semivowel* is a consonant which can be imperfectly sounded without a vowel, so that at the end of a syllable its sound may be protracted; as, *l, n, z*, in *al, an, az*.

A *mute* is a consonant which cannot be sounded at all without a vowel, and which at the end of a syllable suddenly stops the breath; as, *k, p, t*, in *ak, ap, at*.

The semivowels are, *f, h, j, l, m, n, r, s, v, w, x, y, z*, and *c* and *g* soft: but *w* or *y* at the end of a syllable, is a vowel; and the sound of *c, f, g, h, j, s*, or *x*, can be protracted only as an *aspirate*, or strong breath.

---

\* This old definition *John L. Parkhurst* disputes:—says it “is *ambiguous*,”—questions whether it means, “that the *name* of such a letter, or the *simple sound*,” requires a vowel! “If the latter,” says he, “*the assertion is false*. The simple sounds, represented by the consonants, can be uttered separately, distinctly, and perfectly. It can be done with the *utmost ease*, even by a little child.”—*Parkhurst’s Inductive Gram. for Beginners*, p. 164. He must be one of these modern philosophers who delight to *make mouths* of these voiceless elements, to show how much may be done without sound from the larynx.

Four of the semivowels,—*l*, *m*, *n*, and *r*,—are termed *liquids*, on account of the fluency of their sounds; and four others,—*v*, *w*, *y*, and *z*,—are likewise more vocal than the aspirates.

The mutes are eight;—*b*, *d*, *k*, *p*, *q*, *t*, and *c* and *g* hard: three of these,—*k*, *q*, and *c* hard,—sound exactly alike: *b*, *d*, and *g* hard, stop the voice less suddenly than the rest.

### OBSERVATIONS.

OBS. 1.—The foregoing division of the letters is of very great antiquity, and, in respect to its principal features sanctioned by almost universal authority; yet if we examine it minutely, either with reference to the various opinions of the learned, or with regard to the essential differences among the things of which it speaks, it will not perhaps be found in all respects indisputably certain. It will however be of use, as a basis for some subsequent rules, and as a means of calling the attention of the learner to the manner in which he utters the sounds of the letters. A knowledge of about three dozen different elementary sounds is implied in the faculty of speech. The power of producing these sounds with distinctness, and of adapting them to the purposes for which language is used, constitutes perfection of utterance. Had we a perfect alphabet, consisting of one symbol, and only one, for each elementary sound; and a perfect method of spelling, freed from silent letters, and precisely adjusted to the most correct pronunciation of words; the process of learning to read would doubtless be greatly facilitated. And yet any attempt toward such a reformation, any change short of the introduction of some entirely new mode of writing, would be both unwise and impracticable. It would involve our laws and literature in utter confusion, because pronunciation is the least permanent part of language; and if the orthography of words were conformed entirely to this standard, their origin and meaning would, in many instances, be soon lost. We must therefore content ourselves to learn languages as they are, and to make the best use we can of our present imperfect system of alphabetic characters; and we may be the better satisfied to do this, because the deficiencies and redundancies of this alphabet are not yet so well ascertained, as to make it certain what a perfect one would be.

OBS. 2.—In order to have a right understanding of the letters, it is necessary to enumerate, as accurately as we can, the elementary *sounds* of the language; and to attend carefully to the manner in which these sounds are enunciated, as well as to the characters by which they are represented. The most unconcerned observer cannot but perceive that there are certain differences in the sounds, as well as in the shapes, of the letters; and yet under what heads they ought severally to be classed, or how many of them will fall under some particular name, it may occasionally puzzle a philosopher to tell. The student must consider what is proposed or asked, use his own senses, and judge for himself. With our lower-case alphabet before him, he can tell by his own eye, which are the long letters, and which the short ones; so let him learn by his own ear, which are the vowels, and which, the consonants. The processes are alike simple; and, if he be neither blind nor deaf, he can do both about equally well. Thus he may know for a certainty, that *a* is a short letter, and *b* a long one; the former a vowel, the latter a consonant: and so of others. Yet as he may doubt whether *t* is a long letter or a short one, so he may be puzzled to say whether *w* and *y*, as heard in *we* and *ye*, are vowels or consonants: but neither of these difficulties should impair his confidence in any of his other decisions. If he attain by observation and practice a clear and perfect pronunciation of the letters, he will be able to class them for himself with as much accuracy as he will find in books.

OBS. 3.—Grammarians have generally agreed that every letter is either a vowel or a consonant; and also that there are among the latter some semivowels, some mutes, some aspirates, some liquids, some sharps, some flats, some labials, some dentals, some nasals, some palatals, and perhaps yet other species; but in enumerating the letters which belong to these several classes, they disagree so much as to make it no easy matter to ascertain what particular classification is best supported by their authority. I have adopted what I conceive to be the best authorized, and at the same time the most intelligible. He that dislikes the scheme, may do better, if he can. But let him with modesty determine what sort of discoveries may render our ancient authorities questionable. Aristotle, three hundred and thirty years before Christ, divided the Greek letters into *vowels*, *semivowels*, and *mutes*, and declared that no syllable could be formed without a vowel. In the opinion of some neoterics, it has been reserved to our age, to detect the fallacy of this. But I would fain believe that the Stagirite knew as well what he was saying, as did Dr. James Rush, when, in 1827, he declared the doctrine of vowels and consonants to be “a misrepresentation.” The latter philosopher resolves the letters into “*tonics*, *subtonics*, and *atonic*,” and avers that “consonants alone may form syllables.” Indeed, I cannot but think the ancient doctrine better. For, to say that “consonants alone may form syllables,” is as much as to say that consonants are not consonants, but vowels! To be consistent, the attempters of this reformation should never speak of vowels or consonants, semivowels or mutes; because they judge the terms inappropriate, and the classification absurd. They should therefore adhere strictly to their “*tonics*, *subtonics*, and *atonic*,” which classes, though apparently the same as vowels, semivowels, and mutes, are better adapted to their new and peculiar division of these elements. Thus, by reforming both language and philosophy at once, they may make what they will of either!

OBS. 4.—Some teach that *w* and *y* are always vowels: conceiving the former to be equivalent to *oo*, and the latter to *i* or *e*. Dr. Lowth says, “*Y* is always a vowel,” and “*W* is either a vowel or a diphthong.” Dr. Webster supposes *w* to be always “a vowel, a simple sound;” but admits that, “At the beginning of words, *y* is called an *articulation* or *consonant*, and *with some propriety perhaps*, as it brings the root of the tongue in close contact with the lower part of the palate, and nearly in the position to which the close *g* brings it.”—*American Dict.*, *Octavo*. But I follow Wallis, Brightland, Johnson, Walker, Murray, Worcester, and others, in considering both of them sometimes vowels and sometimes consonants. They are consonants at the beginning of words in English, because their sounds take the article *a*, and not *an*, before them; as, *a wall*, *a yard*, and not, *an wall*, *an yard*. But *oo* or the sound of *e*, requires *an*, and not *a*; as, *an eel*, *an oozy bog*.<sup>\*</sup> At the end of a syllable we know they are vowels; but at the beginning, they are so

---

<sup>\*</sup> This test of what is, or is not, a vowel sound or a consonant sound, is often appealed to, and is generally admitted to be a just one. Errors in the application of *an* or *a* are not unfrequent, but they do not affect the argument. It cannot be denied, that it is proper to use *a*, and not proper to use *an*, before the initial sound of *w* or *y* with a vowel following. And this rule holds good, whether the sound be expressed by these particular letters, or by others; as in the phrases, “*a wonder*, *a one*, *a yew*, *a use*, *a ewer*, *a humour*, *a yielding temper*.” But I have heard it contended, that these are vowel sounds, notwithstanding they require *a*; and that the *w* and *y* are always vowels, because even a vowel sound (it was said) requires *a* and not *an*, whenever an other vowel sound immediately follows it. Of this notion, the following examples are a sufficient refutation: *an aëronaut*, *an aërial tour*, *an oeiliad*, *an eyewink*, *an eyas*, *an iambus*, *an oasis*, *an o’ersight*, *an oil*, *an oyster*, *an owl*, *an ounce*. The initial sound of *yielding* requires *a*, and not *an*; but those who call the *y* a vowel, say, it is equivalent to the unaccented long *e*. This does not seem to me to be exactly true; because the latter sound requires *an*, and not *a*; as, “Athens, as well as Thebes, had *an Eëtion*.”

squeezed in their pronunciation, as to follow a vowel without any hiatus, or difficulty of utterance; as, “*O worthy youth! so young, so wise!*”

OBS. 5.—Murray’s rule, “*W* and *y* are consonants when they begin a word or syllable, but in every other situation they are vowels,” which is found in Comly’s book, *Kirkham’s*, Merchant’s, Ingersoll’s, Fisk’s. Hart’s, Hiley’s, Alger’s, Bullions’s, Pond’s, S. Putnam’s, Weld’s, and in sundry other grammars, is favourable to my doctrine, but too badly conceived to be quoted here as authority. It *undesignedly* makes *w* a consonant in *wine*, and a vowel in *twine*; and *y* a consonant when it *forms* a syllable, as in *dewy*: for a letter that *forms* a syllable, “begins” it. But *Kirkham* has lately learned his letters anew; and, supposing he had Dr. Rush on his side, has philosophically taken their names for their sounds. He now calls *y* a “*diphthong*.” But he is wrong here by his own showing: he should rather have called it a *triphthong*. He says, “By pronouncing in a very deliberate and perfectly natural manner, the letter *y*, (which is a *diphthong*,) the *unpractised* student will perceive, that the sound produced, is compound; being formed, at its opening, of the obscure sound of *oo* as heard in *oo-ze*, which sound rapidly slides into that of *i*, and then advances to that of *ee* as heard in *e-ve*, and on which it gradually passes off into silence.”—*Kirkham’s Elocution*, p. 75. Thus the “unpractised student” is taught that *b-y* spells *bw-y*; or, if pronounced “very deliberately, *boo-i-ee!*” Nay, this grammarist makes *b*, not a labial mute, as Walker, Webster, Cobb, and others, have called it, but a nasal subtonic, or semivowel. He delights in protracting its “guttural murmur;” perhaps, in assuming its name for its sound; and, having proved, that “consonants are capable of forming syllables,” finds no difficulty in mouthing this little monosyllable *by* into *b-oo-i-ee!* In this way, it is the easiest thing in the world, for such a man to outface Aristotle, or any other divider of the letters; for he *makes* the sounds by which he judges. “Boy,” says the teacher of *Kirkham’s Elocution*, “describe the protracted sound of *y*.”—*Kirkham’s Elocution*, p. 110. The pupil may answer, “That letter, sir, has no longer or more complex sound, than what is heard in the word *eye*, or in the vowel *i*; but the book which I study, describes it otherwise. I know not whether I can make you understand it, but I will *tr-oo-i-ee*.” If the word *try*, which the author uses as an example, does not exhibit his “protracted sound of *y*,” there is no word that does: the sound is a mere fiction, originating in strange ignorance.

OBS. 6.—In the large print above, I have explained the principal classes of the letters, but not all that are spoken of in books. It is proper to inform the learner that the *sharp* consonants are *t*, and all others after which our contracted preterits and participles require that *d* should be sounded like *t*, as in the words faced, reached, stuffed, laughed, triumphed, croaked, cracked, houghed, reaped, nipped, piqued, missed, wished, earthed, betrothed, fixed. The *flat* or *smooth* consonants are *d*, and all others with which the proper sound of *d* may be united; as in the words, daubed, judged, hugged, thronged, sealed, filled, aimed, crammed, pained, planned, feared, marred, soothed, loved, dozed, buzzed. The *labials* are those consonants which are articulated chiefly by the lips; among which, Dr. Webster reckons *b*, *f*, *m*, *p*, and *v*. But Dr. Rush says, *b* and *m* are nasals, the latter, “purely nasal.” \* The *dentals* are those consonants which are referred to the teeth; the

---

\* Dr. Rush, in his *Philosophy of the Human Voice*, has exhibited some acuteness of observation, and has written with commendable originality. But his accuracy is certainly not greater than his confidence. On page 57th, he says, “The *m*, *n*, and *ng*, are *purely nasal*,” on page 401st, “Some of the tonic elements, and one of the subtonics, are made *by the assistance of the lips*; they are *o-we*, *oo-ze*, *ou-r*, and *m*.” Of the intrinsic value of his work, I am not prepared or inclined to offer any opinion; I criticise him only so far as he strikes at grammatical principles long established, and worthy still to be maintained.

*nasals* are those which are affected by the nose; and the *palatals* are those which compress the palate, as *k* and hard *g*. But these last-named classes are not of much importance; nor have I thought it worth while to notice *minutely* the opinions of writers respecting the others, as whether *h* is a semivowel, or a mute, or neither.

OBS. 7.—The Cherokee alphabet, which was invented in 1821, by See-quo-yah, or George Guess, an ingenious but wholly illiterate Indian, contains eighty-five letters, or characters. But the sounds of the language are much fewer than ours; for the characters represent, not simple tones and articulations, but *syllabic sounds*, and this number is said to be sufficient to denote them all. But the different syllabic sounds in our language amount to some thousands. I suppose, from the account, that *See-quo-yah* writes his name, in his own language, with three letters; and that characters so used, would not require, and probably would not admit, such a division as that of vowels and consonants. One of the Cherokees, in a letter to the American Lyceum, states, that a knowledge of this mode of writing is so easily acquired, that one who understands and speaks the language, “can learn to read in a day; and, indeed,” continues the writer, “I have known some to acquire the art in a single evening. It is only necessary to learn the different sounds of the characters, to be enabled to read at once. In the English language, we must not only first learn the letters, but to spell, before reading; but in Cherokee, all that is required, is, to learn the letters; for they have *syllabic sounds*, and by connecting different ones together, a word is formed: in which there is no art. All who understand the language can do so, and both read and write, so soon as they can learn to trace with their fingers the forms of the characters. I suppose that more than one half of the Cherokees can read their own language, and are thereby enabled to acquire much valuable information, with which they otherwise would never have been blessed.”—*W. S. Coodey*, 1831.

OBS. 8.—From the foregoing account, it would appear that the Cherokee language is a very peculiar one: its words must either be very few, or the proportion of polysyllables very great. The characters used in China and Japan, stand severally for *words*; and their number is said to be not less than seventy thousand; so that the study of a whole life is scarcely sufficient to make a man thoroughly master of them. Syllabic writing is represented by Dr. Blair as a great improvement upon the Chinese method, and yet as being far inferior to that which is properly *alphabetic*, like ours. “The first step, in this new progress,” says he, “was the invention of an alphabet of syllables, which probably preceded the invention of an alphabet of letters, among some of the ancient nations; and which is said to be retained to this day, in Ethiopia, and some countries of India. By fixing upon a particular mark, or character, for every syllable in the language, the number of characters, necessary to be used in writing, was reduced within a much smaller compass than the number of words in the language. Still, however, the number of characters was great; and must have continued to render both reading and writing very laborious arts. Till, at last, some happy genius arose, and tracing the sounds made by the human voice, to their most simple elements, reduced them to a very few *vowels and consonants*; and, by affixing to each of these, the signs which we now call letters, taught men how, by their combinations, to put in writing all the different words, or combinations of sound, which they employed in speech. By being reduced to this simplicity, the art of writing was brought to its highest state of perfection; and, in this state, we now enjoy it in all the countries of Europe.”—*Blair’s Rhetoric, Lect. VII*, p. 68.

OBS. 9.—All certain knowledge of the sounds given to the letters by Moses and the prophets having been long ago lost, a strange dispute has arisen, and been carried on for

centuries, concerning this question, “Whether the Hebrew letters are, or are not, *all consonants*,” the vowels being supposed by some to be suppressed and understood; and not written, except by *points* of comparatively late invention. The discussion of such a question does not properly belong to English grammar; but, on account of its curiosity, as well as of its analogy to some of our present disputes, I mention it. Dr. Charles Wilson says, “After we have sufficiently known the figures and names of the letters, the next step is, to learn to enunciate or to pronounce them, so as to produce articulate sounds. On this subject, which appears at first sight very plain and simple, numberless contentions and varieties of opinion meet us at the threshold. From the earliest period of the invention of written characters to represent human language, however more or less remote that time may be, it seems absolutely certain, that the distinction of letters into *vowels and consonants* must have obtained. All the speculations of the Greek grammarians assume this as a first principle.” Again: “I beg leave only to premise this observation, that I absolutely and unequivocally deny the position, that all the letters of the Hebrew alphabet are consonants; and, after the most careful and minute inquiry, give it as my opinion, that of the twenty-two letters of which the Hebrew alphabet consists, five are vowels and seventeen are consonants. The five vowels by name are, Aleph, He, Vau, Yod, and Ain.”—*Wilson’s Heb. Gram.*, pp. 6 and 8.

### III. POWERS OF THE LETTERS.

The *powers* of the letters are properly those elementary sounds which their figures are used to represent; but letters formed into words, are capable of communicating thought independently of sound. The simple elementary sounds of any language are few, commonly not more than *thirty-six*;<sup>\*</sup> but they may be variously *combined*, so as to form words innumerable.

Different vowel sounds, or vocal elements, are produced by opening the mouth differently, and placing the tongue in a peculiar manner for each; but the voice may vary in loudness, pitch, or time, and still utter the same vowel power.

The *vowel sounds* which form the basis of the English language, and which ought therefore to be perfectly familiar to every one who speaks it, are those which are heard at the beginning of the words, *ate, at, ah, all, eel, ell, isle, ill, old, on, ooze, use, us*, and that of *u* in *bull*.

In the formation of syllables, some of these fourteen primary sounds may be joined together, as in *ay, oil, out, owl*; and all of them may be preceded or followed by certain motions and positions of the lips and tongue, which will severally convert them into other terms in speech. Thus the same essential sounds may be changed into a new series of words by an *f*; as, *fate, fat, far, fall, feel, fell, file, fill, fold, fond, fool, fuse, fuss, full*. Again, into as many more with a *p*; as, *pate, pat, par, pall, peel, pell, pile, pill, pole, pond, pool, pule, purl, pull*.

Each of the vowel sounds may be variously expressed by letters. About half of them are sometimes words: the rest are seldom, if ever, used alone even to form syllables. But

---

<sup>\*</sup> Dr. Comstock, by enumerating as elementary the sound of the diphthong *ou*, as in *our*, and the complex power of *wh*, as in *what*, (which sounds ought not to be so reckoned,) makes the whole number of vocal elements in English to be “*thirty-eight*.” See *Comstock’s Elocution*, p. 19.

the reader may easily learn to utter them all, separately, according to the foregoing series. Let us note them as plainly as possible: eigh, *ā*, ah, awe, *ēh*, *ē*, eye, *ī*, oh, *ō*, oo, yew, *ū*, *û*.

Thus the eight long sounds, *eigh*, *ah*, *awe*, *eh*, *eye*, *oh*, *ooh*, *yew*, are, or may be, words; but the six less vocal, called the short vowel sounds, as in *at*, *et*, *it*, *ot*, *ut*, *put*, are commonly heard only in connexion with consonants; except the first, which is perhaps the most frequent sound of the vowel A or *a*—a sound sometimes given to the word *a*, perhaps most generally; as in the phrase, “twice *ā* day.”

The simple *consonant sounds* in English are twenty-two: they are marked by *b*, *d*, *f*, *g* *hard*, *h*, *k*, *l*, *m*, *n*, *ng*, *p*, *r*, *s*, *sh*, *t*, *th sharp*, *th flat*, *v*, *w*, *y*, *z*, and *zh*. But *zh* is written only to show the sound of other letters; as of *s* in *pleasure*, or *z* in *azure*.

All these sounds are heard distinctly in the following words: *buy*, *die*, *fie*, *guy*, *high*, *kie*, *lie*, *my*, *nigh*, *eying*, *pie*, *rye*, *sigh*, *shy*, *tie*, *thigh*, *thy*, *vie*, *we*, *ye*, *zebra*, *seizure*. Again: most of them may be repeated in the same word, if not in the same syllable; as in *bibber*, *diddle*, *fifty*, *giggle*, *high-hung*, *cackle*, *lily*, *mimic*, *ninny*, *singing*, *pippin*, *mirror*, *hissest*, *flesh-brush*, *tittle*, *thinketh*, *thither*, *vivid*, *witwal*, *union*,\* *dizzies*, *vision*.

With us, the consonants J and X represent, not simple, but complex sounds: hence they are never doubled. J is equivalent to *dzh*; and X, either to *ks* or to *gz*. The former ends no English word, and the latter begins none. To the initial X of foreign words, we always give the simple sound of Z; as in *Xerxes*, *xebec*.

The consonants C and Q have no sounds peculiar to themselves. Q has always the power of *k*. C is hard, like *k*, before *a*, *o*, and *u*; and soft, like *s*, before *e*, *i*, and *y*: thus the syllables, *ca*, *ce*, *ci*, *co*, *cu*, *cy*, are pronounced, *ka*, *se*, *si*, *ko*, *ku*, *sy*. S before *c* preserves the former sound, but coalesces with the latter; hence the syllables, *sca*, *sce*, *sci*, *sco*, *scu*, *scy*, are sounded, *ska*, *se*, *si*, *sko*, *sku*, *sy*. *Ce* and *ci* have sometimes the sound of *sh*; as in *ocean*, *social*. *Ch* commonly represents the compound sound of *tsh*; as in *church*.

G, as well as C, has different sounds before different vowels. G is always hard, or guttural, before *a*, *o*, and *u*; and generally soft, like *j*, before *e*, *i*, or *y*: thus the syllables, *ga*, *ge*, *gi*, *go*, *gu*, *gy*, are pronounced *ga*, *je*, *ji*, *go*, *gu*, *jy*.

The possible combinations and mutations of the twenty-six letters of our alphabet, are many millions of millions. But those clusters which are unpronounceable, are useless. Of such as may be easily uttered, there are more than enough for all the purposes of useful writing, or the recording of speech.

Thus it is, that from principles so few and simple as about six or seven and thirty plain elementary sounds, represented by characters still fewer, we derive such a variety of oral and written signs, as may suffice to explain or record all the sentiments and transactions of all men in all ages.

---

\* This word is commonly heard in two syllables, *yune'yun*; but if Walker is right in making it three, *yu'ne-un*, the sound of *y* consonant is heard in it but once. Worcester's notation is “*yūn'yun*.” The long sound of *u* is *yu*; hence Walker calls the letter, when thus sounded, a “semi-consonant diphthong.”

**OBSERVATIONS.**

OBS. 1.—A knowledge of sounds can be acquired, in the first instance, only by the ear. No description of the manner of their production, or of the differences which distinguish them, can be at all intelligible to him who has not already, by the sense of hearing, acquired a knowledge of both. What I here say of the sounds of the letters, must of course be addressed to those persons only who are able both to speak and to read English. Why then attempt instruction by a method which both ignorance and knowledge on the part of the pupil, must alike render useless? I have supposed some readers to have such an acquaintance with the powers of the letters, as is but loose and imperfect; sufficient for the accurate pronunciation of some words or syllables, but leaving them liable to mistakes in others; extending perhaps to all the sounds of the language, but not to a ready analysis or enumeration of them. Such persons may profit by a written description of the powers of the letters, though no such description can equal the clear impression of the living voice. Teachers, too, whose business it is to aid the articulation of the young, and, by a patient inculcation of elementary principles, to lay the foundation of an accurate pronunciation, may derive some assistance from any notation of these principles, which will help their memory, or that of the learner. The connexion between letters and sounds is altogether *arbitrary*; but a few positions, being assumed and made known, in respect to some characters, become easy standards for further instruction in respect to others of similar sound.

OBS. 2.—The importance of being instructed at an early age, to pronounce with distinctness and facility all the elementary sounds of one's native language, has been so frequently urged, and is so obvious in itself, that none but those who have been themselves neglected, will be likely to disregard the claims of their children in this respect.\* But surely an accurate knowledge of the ordinary powers of the letters would be vastly more common, were there not much hereditary negligence respecting the manner in which these important rudiments are learned. The utterance of the illiterate may exhibit wit and native talent, but it is always more or less barbarous, because it is not aided by a knowledge of orthography. For pronunciation and orthography, however they may seem, in our language especially, to be often at variance, are certainly correlative: a true knowledge of either tends to the preservation of both. Each of the letters represents some one or more of the elementary sounds, exclusive of the rest; and each of the elementary sounds, though several of them are occasionally transferred, has some one or two letters to which it most properly or most frequently belongs. But borrowed, as our language has been, from a great variety of sources, to which it is desirable ever to retain the means of tracing it, there is certainly much apparent lack of correspondence between its oral and its written form. Still the discrepancies are few, when compared with the instances of exact conformity; and, if they are, as I suppose they are, unavoidable, it is as useless to complain of the trouble they occasion, as it is to think of forcing a reconciliation. The wranglers in this controversy, can never agree among themselves, whether orthography shall conform to pronunciation, or pronunciation to orthography. Nor does any one of

---

\* Children ought to be accustomed to speak loud, and to pronounce all possible sounds and articulations, even those of such foreign languages as they will be obliged to learn; for almost every language has its particular sounds which we pronounce with difficulty, if we have not been early accustomed to them. Accordingly, nations who have the greatest number of sounds in their speech, learn the most easily to pronounce foreign languages, since they know their articulations by having met with similar sounds in their own language."—*Spurzheim, on Education*, p. 159.

them well know how our language would either sound or look, were he himself appointed sole arbiter of all variances between our spelling and our speech.

OBS. 3.—“Language,” says Dr. Rush, “was long ago analyzed into its alphabetic elements. Wherever this analysis is known, the art of teaching language has, with the best success, been conducted upon the rudimental method.” \* \* \* “The art of reading consists in having all the vocal elements under complete command, that they may be properly applied, for the vivid and elegant delineation of the sense and sentiment of discourse.”—*Philosophy of the Voice*, p. 346. Again, of “the pronunciation of the alphabetic elements,” he says, “The least deviation *from the assumed standard* converts the listener into the critic; and I am surely speaking within bounds when I say, that for every miscalled element in discourse, ten succeeding words are lost to the greater part of an audience.”—*Ibid.*, p. 350. These quotations plainly imply both the practicability and the importance of teaching the pronunciation of our language analytically by means of its present orthography, and agreeably to the standard assumed by the grammarians. The first of them affirms that it has been done, “with the best success,” according to some ancient method of dividing the letters and explaining their sounds. And yet, both before and afterwards, we find this same author complaining of our alphabet and its subdivisions, as if sense or philosophy must utterly repudiate both; and of our orthography, as if a ploughman might teach us to spell better: and, at the same time, he speaks of softening his censure through modesty. “The deficiencies, redundancies, and confusion, of the system of alphabetic characters in this language, prevent the adoption of its subdivisions in this essay.”—*Ib.*, p. 52. Of the specific sounds given to the letters, he says, “The first of these matters is under the rule of every body, and therefore is very properly to be excluded from the discussions of that philosophy which desires to be effectual in its instruction. How can we hope to establish a system of elemental pronunciation in a language, when great masters in criticism condemn at once every attempt, in so simple and useful a labour as the correction of its orthography!”—P. 256. Again: “I *deprecate noticing* the faults of speakers, in the pronunciation of the alphabetic elements. It is better for criticism to be modest on this point, till it has the sense or independence to make our alphabet and its uses, look more like the work of what is called—wise and transcendent humanity: till the pardonable variety of pronunciation, and the *true spelling by the vulgar*, have satirized into reformation that pen-craft which keeps up the troubles of orthography for no other purpose, as one can divine, than to boast of a very questionable merit as a criterion of education.”—*Ib.*, p. 383.

OBS. 4.—How far these views are compatible, the reader will judge. And it is hoped he will excuse the length of the extracts, from a consideration of the fact, that a great master of the “pen-craft” here ridiculed, a noted stickler for needless Kays and Ues, now commonly rejected, while he boasts that his grammar, which he mostly copied from Murray’s, is teaching the old explanation of the alphabetic elements to “more than one hundred thousand children and youth,” is also vending under his own name an abstract of the new scheme of “*tonicks*, *subtonicks*, and *atonicks*,” and, in one breath, bestowing superlative praise on both, in order, as it would seem, to monopolize all inconsistency. “Among those who have successfully laboured in the philological field, *Mr. Lindley Murray* stands forth in bold relief, as undeniably at the head of the list.”—*Kirkham’s Elocution*, p. 12. “The modern candidate for oratorical fame, stands on very different, and far more advantageous, ground, than that occupied by the young and aspiring Athenian; especially since a *correct analysis of the vocal organs*, and a faithful record of their operations, have been given to the world by *Dr. James Rush*, of Philadelphia—a name that will *outlive* the

unquarried marble of our mountains.”—*Ibid.*, p. 29. “But what is to be said when presumption pushes itself into the front ranks of elocution, and thoughtless friends undertake to support it? The fraud must go on, till presumption quarrels, as often happens, with its own friends, or with itself, and thus dissolves the spell of its merits.”—*Rush, on the Voice*, p. 405.

OBS. 5.—The question respecting the *number* of simple or elementary sounds in our language, presents a remarkable puzzle: and it is idle, if not ridiculous, for any man to declaim about the imperfection of our alphabet and orthography, who does not show himself able to solve it. All these sounds may easily be written in a plain sentence of three or four lines upon almost any subject; and every one who can read, is familiar with them all, and with all the letters. Now it is either easy *to count* them, or it is difficult. If difficult, wherein does the difficulty lie? and how shall he who knows not what and how many they are, think himself capable of reforming our system of their alphabetic signs? If easy, why do so few pretend to know their number? and of those who do pretend to this knowledge, why are there so few that agree? A certain verse in the seventh chapter of Ezra, has been said to contain all the letters. It however contains no *j*; and, with respect to the sounds, it lacks that of *f*, that of *th sharp*, and that of *u* in *bull*. I will suggest a few additional words for these; and then both all the letters, and all the sounds, of the English language, will be found in the example; and most of them, many times over: “And I, even I, Artaxerxes, the king, do make a decree to all the treasurers’ who ‘are beyond the river, that whatsoever Ezra the priest, the scribe of the law of the God of heaven, shall require of you, it be done speedily’ and faithfully, according to that which he shall enjoin.” Some letters, and some sounds, are here used much more frequently than others; but, on an average, we have, in this short passage, each sound five times, and each letter eight. How often, then, does a man speak all the elements of his language, who reads well but one hour!

OBS. 6.—Of the number of elementary sounds in our language, different orthoëpists report differently; because they cannot always agree among themselves, wherein the identity or the simplicity, the sameness or the singleness, even of well-known sounds, consists; or because, if each is allowed to determine these points for himself, no one of them adheres strictly to his own decision. They may also, each for himself, have some peculiar way of utterance, which will confound some sounds which other men distinguish, or distinguish some which other men confound. For, as a man may write a very bad hand which shall still be legible, so he may utter many sounds improperly and still be understood. One may, in this way, make out a scheme of the alphabetic elements, which shall be true of his own pronunciation, and yet have obvious faults when tried by the best usage of English speech. It is desirable not to multiply these sounds beyond the number which a correct and elegant pronunciation of the language obviously requires. And what that number is, it seems to me not very difficult to ascertain; at least, I think we may fix it with sufficient accuracy for all practical purposes. But let it be remembered, that all who have hitherto attempted the enumeration, have deviated more or less from their own decisions concerning either the simplicity or the identity of sounds; but, most commonly, it appears to have been thought expedient to admit some exceptions concerning both. Thus the long or diphthongal sounds of *I* and *U*, are admitted by some, and excluded by others; the sound of *j*, or soft *g*, is reckoned as simple by some, and rejected as compound by others; so a part, if not all, of what are called the long and the short vowels, as heard in *ale* and *ell*, *arm* and *am*, *all* and *on*, *isle* or *eel* and *ill*, *tone* and *tun*, *pule* or *pool* and *pull*, have been declared essentially the same by some, and essentially different by others. Were we to recognize as elementary, no sounds but such as are unquestionably simple in

themselves, and indisputably different in quality from all others, we should not have more sounds than letters: and this is a proof that we have characters enough, though the sounds are perhaps badly distributed among them.

OBS. 7.—I have enumerated *thirty-six* well known sounds, which, in compliance with general custom, and for convenience in teaching. I choose to regard as the oral elements of our language. There may be found some reputable authority for adding four or five more, and other authority as reputable, for striking from the list seven or eight of those already mentioned. For the sake of the general principle, which we always regard in writing, a principle of universal grammar, *that there can be no syllable without a vowel*, I am inclined to teach, with Brightland, Dr. Johnson, L. Murray, and others, that, in English, as in French, there is given to the vowel *e* a certain very obscure sound which approaches, but amounts not to an absolute suppression, though it is commonly so regarded by the writers of dictionaries. It may be exemplified in the words *oven*, *shovel*, *able*;<sup>\*</sup> or in the unemphatic article *the* before a consonant, as in the sentence, “Take the nearest:” we do not hear it as “*thee nearest*,” nor as “*then carest*,” but more obscurely. There is also a feeble sound of *i* or *y* unaccented, which is equivalent to *ee* uttered feebly, as in the word *diversity*. This is the most common sound of *i* and of *y*. The vulgar are apt to let it fall into the more obscure sound of short *u*. As elegance of utterance depends much upon the preservation of this sound from such obtuseness, perhaps Walker and others have done well to mark it as *e* in *me*; though some suppose it to be peculiar, and others identify it with the short *i* in *fit*. Thirdly, a distinction is made by some writers, between the vowel sounds heard in *hate* and *bear*, which Sheridan and Walker consider to be the same. The apparent difference may perhaps result from the following consonant *r*, which is apt to affect the sound of the vowel which precedes it. Such words as *bear*, *care*, *dare*, *careful*, *parent*, are very liable to be corrupted in pronunciation, by too broad a sound of the *a*; and, as the multiplication of needless distinctions should be avoided, I do not approve of adding an other sound to a vowel which has already quite too many. Worcester, however, in his new Dictionary, and Wells, in his new Grammar, give to the vowel A *six* or *seven* sounds in lieu of *four*; and Dr. Mandeville, in his Course of Reading, says, “A has *eight* sounds.”—P. 9.

OBS. 8.—Sheridan made the elements of his oratory *twenty-eight*. Jones followed him implicitly, and adopted the same number.<sup>†</sup> Walker recognized several more, but I know not

\* If it be admitted that the two semivowels *l* and *n* have vocality enough of their own to form a very feeble syllable, it will prove only that there are these exceptions to an important general rule. If the name of *Haydn* rhymes with *maiden*, it makes one exception to the rule of writing; but it is no part of the English language. The obscure sound of which I speak, is sometimes improperly confounded with that of short *u*; thus a recent writer, who professes great skill in respect to such matters, says, “One of the most common sounds in our language is that of the vowel *u*, as in the word *urn*, or as the diphthong *ea* in the word *earth*, for which we have no character. Writers have made various efforts to express it, as in *earth*, *berth*, *mirth*, *worth*, *turf*, in which all the vowels are indiscriminately used in turn. ☞ *This defect has led* to the absurd method of placing the vowel after the consonants, instead of between them, when a word *terminates with this sound*; as in the following, *Bible*, *pure*, *centre*, *circle*, instead of *Bibel*, *puer*, *center*, *cirkel*.”—*Gardiner’s Music of Nature*, p. 498. “It would be a great step towards perfection to spell our words as they are pronounced!”—*Ibid.*, p. 499. How often do the reformers of language multiply the irregularities of which they complain!

† “The number of simple sounds in our tongue is twenty-eight, 9 Vowels and 19 Consonants. *H* is no letter, but merely a mark of aspiration.”—*Jones’s Prosodial Gram.* before his *Dict.*, p. 14.

“The number of simple vowel and consonant sounds in our tongue is twenty-eight, and one pure aspiration *h*, making in all twenty-nine.”—*Bolles’s Octavo Dict., Introd.*, p. 9.

whether he has anywhere told us *how many there are*. Lindley Murray enumerates *thirty-six*, and the same thirty-six that are given in the main text above. The eight sounds not counted by Sheridan are these: 1. The Italian *a*, as in *far*, *father*, which he reckoned but a lengthening of the *a* in *hat*; 2. The short *o*, as in *hot*, which he supposed to be but a shortening of the *a* in *hall*; 3. The diphthongal *i*, as in *isle*, which he thought but a quicker union of the sounds of the diphthong *oi*, but which, in my opinion, is rather a very quick union of the sounds *ah* and *ee* into *ay*, *I*;<sup>\*</sup> 4. The long *u*, which is acknowledged to be equal to *yu* or *yew*, though perhaps a little different from *you* or *yoo*,<sup>†</sup> the sound given it by Walker; 5. The *u* heard in *pull*, which he considered but a shortening of *oo*; 6. The consonant *w*, which he conceived to be always a vowel, and equivalent to *oo*; 7. The consonant *y*, which he made equal to a short *ee*; 8. The consonant *h*, which he declared to be no letter, but a mere breathing. In all other respects, his scheme of the alphabetic elements agrees with that which is adopted in this work, and which is now most commonly taught.

OBS. 9.—The effect of *Quantity* in the prolation of the vowels, is a matter with which every reader ought to be experimentally acquainted. *Quantity* is simply the *time* of utterance, whether long or short. It is commonly spoken of with reference to *syllables*, because it belongs severally to all the distinct or numerable impulses of the voice, and to these only; but, as vowels or diphthongs may be uttered alone, the notion of quantity is of course as applicable to them, as to any of the more complex sounds in which consonants are joined with them. All sounds imply time; because they are the transient effects of certain percussions which temporarily agitate the air, an element that tends to silence. When mighty winds have swept over sea and land, and the voice of the *Ocean* is raised, he speaks to the towering cliffs in the deep tones of a *long* quantity; the rolling billows, as they meet the shore, pronounce the long-drawn syllables of his majestic elocution. But see him again in gentler mood; stand upon the beach and listen to the rippling of his more frequent waves: he will teach you *short* quantity, as well as long. In common parlance, to avoid tediousness, to save time, and to adapt language to circumstances, we usually utter words with great rapidity, and in comparatively short quantity. But in oratory, and sometimes in ordinary reading, those sounds which are best fitted to fill and gratify the ear, should be sensibly protracted, especially in emphatic words; and even the shortest syllable, must be so lengthened as to be uttered with perfect clearness: otherwise the performance will be judged defective.

---

"The number of *letters* in the English language is twenty-six; but the number of *elements* is thirty-eight."—*Comstock's Elocution*, p. 18. "There are thirty-eight elements in the English alphabet, and to represent those elements by appropriate characters, we should have thirty-eight letters. There is, then, a deficiency in our alphabet of twelve letters—and he who shall supply this imperfection, will be one of the greatest benefactors of the human race."—*Ib.*, p. 19. "Our alphabet is both redundant and defective. *C*, *q*, and *z*, are respectively represented by *k* or *s*, *k*, and *ks*, or *gz*; and the remaining twenty-three letters are employed to represent *forty-one* elementary sounds."—*Wells's School Gram.*, 1st Ed., p. 36.

"The simple sounds were in no wise to be reckoned of any certain number: by the first men they were determined to no more than ten, as spine suppose; as others, fifteen or twenty; it is however certain that mankind in general never exceed *twenty* simple sounds; and of these only five are reckoned strictly such."—*Bicknell's Grammar*, Part ii, p. 4.

<sup>\*</sup> "When these sounds are openly pronounced, they produce the familiar assent *ay*: which, by the old English dramatic writers, was often expressed by *I*."—*Walker*. We still hear it so among the vulgar; as, "*I*, *I*, sir, presently!" for "*Ay*, *ay*, sir, presently!" Shakspeare wrote,

"To sleepe, perchance to dreame; *I*, there's the rub."—*Bucke's Classical Gram.*, p. 143.

<sup>†</sup> Walker pronounces *yew* and *you* precisely alike, "*yoo*;" but, certainly, *ew* is not commonly equivalent to *oo*, though some make it so: thus Gardiner, in his scheme of the vowels, says, "*ew* equals *oo*, as in *new*, *noo*."—*Music of Nature*, p. 483. *Noo* for *new*, is a *vulgarism*, to my ear.—G. BROWN.

OBS. 10.—Some of the vowels are usually uttered in longer time than others; but whether the former are naturally long, and the latter naturally short, may be doubted: the common opinion is, that they are. But one author at least denies it; and says, “We must explode the pretended natural epithets *short* and *long* given to our vowels, independent on accent: and we must observe that our silent *e* final lengthens not its syllable, unless the preceding vowel be accented.”—*Mackintosh’s Essay on E. Gram.*, p. 232. The distinction of long and short vowels which has generally obtained, and the correspondences which some writers have laboured to establish between them, have always been to me sources of much embarrassment. It would appear, that in one or two instances, sounds that differ only in length, or time, are commonly recognized as different elements; and that grammarians and orthoëpists, perceiving this, have attempted to carry out the analogy, and to find among what they call the long vowels a parent sound for each of the short ones. In doing this, they have either neglected to consult the ear, or have not chosen to abide by its verdict. I suppose the vowels heard in *pull* and *pool* would be necessarily identified, if the former were protracted or the latter shortened; and perhaps there would be a like coalescence of those heard in *of* and *all*, were they tried in the same way, though I am not sure of it. In protracting the *e* in *met*, and the *i* in *ship*, ignorance or carelessness might perhaps, with the help of our orthoëpists, convert the former word into *mate* and the latter into *sheep*; and, as this would breed confusion in the language, the avoiding of the similarity may perhaps be a sufficient reason for confining these two sounds of *e* and *i*, to that short quantity in which they cannot be mistaken. But to suppose, as some do, that the protraction of *u* in *tun* would identify it with the *o* in *tone*, surpasses any notion I have of what stupidity may misconceive. With one or two exceptions, therefore, it appears to me that each of the pure vowel sounds is of such a nature, that it may be readily recognized by its own peculiar quality or tone, though it be made as long or as short as it is possible for any sound of the human voice to be. It is manifest that each of the vowel sounds heard in *ate*, *at*, *arm*, *all*, *eel*, *old*, *ooze*, *us*, may be protracted to the entire extent of a full breath slowly expended, and still be precisely the same one simple sound;\* and, on the contrary, that all but one may be shortened to the very minimum of vocality, and still be severally known without danger of mistake. The prolation of a pure vowel places the organs of utterance in that particular position which the sound of the letter requires, and then *holds them unmoved* till we have given to it all the length we choose.

OBS. 11.—In treating of the quantity and quality of the vowels, Walker says, “The first distinction of sound that seems to obtrude itself upon us when we utter the vowels, is a long and a short sound, according to the greater or less duration of time taken up in pronouncing them. This distinction is so obvious as to have been adopted in all languages, and is that to which we annex *clearer ideas than to any other*; and though the short sounds of some vowels have not in our language been classed with sufficient accuracy with their parent long ones, yet this has bred but little confusion, as vowels long and short are always sufficiently distinguishable.”—*Principles*, No. 63. Again: “But though the terms long and short, as applied to vowels, are pretty generally understood, an accurate ear will easily perceive that these terms do not always mean the long and short sounds of the respective vowels to which they are applied; for, if we choose to be directed by the ear, in

---

\* “As harmony is an inherent property of sound, the ear should be first called to the attention of *simple sounds*; though, in reality, all are composed *of three*, so nicely blended as to *appear* but as one.”—*Gardiner’s Music of Nature*, p. 8. “Every sound is a mixture of three tones; as much as a ray of light is composed of three prismatic colours.”—*Ib.*, p. 387.

denominating vowels long or short, we must certainly give these appellations to those sounds only which have *exactly the same radical tone*, and differ only in the long or short emission of that tone.”—*Ib.*, No. 66. He then proceeds to state his opinion that the vowel sounds heard in the following words are thus correspondent: *tame, them; car, carry; wall, want; dawn, gone; theme, him; tone, nearly tun; pool, pull*. As to the long sounds of *i* or *y*, and of *u*, these two being diphthongal, he supposes the short sound of each to be no other than the short sound of its latter element *ee* or *oo*. Now to me most of this is exceedingly unsatisfactory; and I have shown why.

OBS. 12.—If men’s notions of the length and shortness of vowels are the clearest ideas they have in relation to the elements of speech, how comes it to pass that of all the disputable points in grammar, this is the most perplexed with contrarieties of opinion? In coming before the world as an author, no man intends to place himself clearly in the wrong; yet, on the simple powers of the letters, we have volumes of irreconcilable doctrines. A great connoisseur in things of this sort, who professes to have been long “in the habit of listening to sounds of every description, and that with more than ordinary attention,” declares in a recent and expensive work, that “in every language we find the vowels *incorrectly classed*”; and, in order to give to “the simple elements of English utterance” a better explanation than others have furnished, he devotes to a new analysis of our alphabet the ample space of twenty octavo pages, besides having several chapters on subjects connected with it. And what do his twenty pages amount to? I will give the substance of them in ten lines, and the reader may judge. He does not tell us *how many* elementary sounds there are; but, professing to arrange the vowels, long and short, “in the order in which they are naturally found,” as well as to show of the consonants that the mutes and liquids form correspondents in regular pairs, he presents a scheme which I abbreviate as follows. VOWELS: 1. *A*, as in *āll* and *whāt*, or *o*, as in *orifice* and *nōt*; 2. *U*—*ūrn* and *hūt*, or *lōve* and *cōme*; 3. *O*—*vōte* and *echō*; 4. *A*—*āh* and *hāt*; 5. *A*—*hāzy*, no short sound; 6. *E*—*ēel* and *it*; 7. *E*—*mērcy* and *mēt*; 8. *O*—*prōve* and *adō*; 9. *OO*—*tōol* and *fōot*; 10. *W*—*vow* and *law*; 11. *Y*—(like the first *e*—) *syntax* and *dutȳ*. DIPHTHONGS: 1. *I*—as *ah-ee*; 2. *U*—as *ee-oo*; 3. *OU*—as *au-oo*. CONSONANTS: 1. Mutes,—*c* or *s, f, h, k* or *q, p, t, th sharp, sh*; 2. Liquids,—*l*, which has no corresponding mute, and *z, v, r, ng, m, n, th flat* and *j*, which severally correspond to the eight mutes in their order; 3. Subliquids,—*g hard, b*, and *d*. See “*Music of Nature*,” by *William Gardiner*, p. 480, and after.

OBS. 13.—Dr. Rush comes to the explanation of the powers of the letters as the confident first revealer of nature’s management and wisdom; and hopes to have laid the foundation of a system of instruction in reading and oratory, which, if adopted and perfected, “will beget a similarity of opinion and practice,” and “be found to possess an excellence which must grow into sure and irreversible favour.”—*Phil. of the Voice*, p. 404. “We have been willing,” he says, “*to believe, on faith alone*, that nature is wise in the contrivance of speech. Let us now show, by our works of analysis, how she manages the *simple elements* of the voice, in the production of their unbounded combinations.”—*Ibid.*, p. 44. Again: “Every one, with peculiar self-satisfaction, thinks he reads well, and yet all read differently: there is, however, *but one mode* of reading well.”—*Ib.*, p. 403. That one mode, some say, his philosophy alone teaches. Of that, others may judge. I shall only notice here what seems to be his fundamental position, that, on all the vocal elements of language, nature has stamped duplicity. To establish this extraordinary doctrine, he first attempts to prove, that “the letter *a*, as heard in the word *day*,” combines two distinguishable yet inseparable sounds; that it is a compound of what he calls, with reference to vowels and syllables in general, “the radical and the vanishing movement of

the voice,”—a single and indivisible element in which “two sounds are heard continuously successive,” the sounds of *a* and *e* as in *ale* and *eve*. He does not know that some grammarians have contended that *ay* in *day* is a proper diphthong, in which both the vowels are heard; but, so pronouncing it himself, infers from the experiment, that there is no simpler sound of the vowel *a*. If this inference is not wrong, the word *shape* is to be pronounced *sha-epe*; and, in like manner, a multitude of other words will acquire a new element not commonly heard in them.

OBS. 14.—But the doctrine stops not here. The philosopher examines, in some similar way, the other simple vowel sounds, and finds a beginning and an end, a base and an apex, a radical and a vanishing movement, to them all; and imagines a sufficient warrant from nature to divide them all “into two parts,” and to convert most of them into diphthongs, as well as to include all diphthongs with them, as being altogether as simple and elementary. Thus he begins with confounding all distinction between diphthongs and simple vowels; except that which he makes for himself when he admits “the radical and the vanish,” the first half of a sound and the last, to have no difference in quality. This admission is made with respect to the vowels heard in *ooze*, *eel*, *err*, *end*, and *in*, which he calls, not diphthongs, but “monothongs.” But in the *a* of *ale*, he hears *ā-ee*; in that of *an*, *ā-ē*; (that is, the short *a* followed by something of the sound of *e* in *err*;) in that of *art*, *ah-ē*; in that of *all*, *awe-ē*; in the *i* of *isle*, *ī-ee*; in the *o* of *old*, *ō-oo*; in the proper diphthong *ou*, *ou-oo*; in the *oy* of *boy*, he knows not what. After his explanation of these mysteries, he says, “The seven radical sounds with their vanishes, which have been described, include, as far as I can perceive, all the elementary diphthongs of the English language.”—*Ib.*, p. 60. But all the sounds of the vowel *u*, whether diphthongal or simple, are excluded from his list, unless he means to represent one of them by the *e* in *err*; and the complex vowel sound heard in *voice* and *boy*, is confessedly omitted on account of a doubt whether it consists of two sounds or of three! The elements which he enumerates are thirty-five; but if *oi* is not a triphthong, they are to be thirty-six. Twelve are called “*Tonics*; and are heard in the usual sound of the separated *Italics*, in the following words: *A-ll*, *a-rt*, *a-n*, *a-le*, *ou-r*, *i-sle*, *o-ld*, *ee-l*, *oo-ze*, *e-rr*, *e-nd*, *i-n*,”—*Ib.*, p. 53. Fourteen are called “*Subtonics*; and are marked by the separated *Italics*, in the following words: *B-ow*, *d-are*, *g-ive*, *v-ile*, *z-one*, *y-e*, *u-o*, *th-en*, *a-z-ure*, *si-ng*, *l-ove*, *m-ay*, *n-ot*, *r-oe*.”—*Ib.*, p. 54. Nine are called “*Atonics*; they are heard in the words, *U-p*, *ou-t*, *ar-k*, *i-f*, *ye-s*, *h-e*, *wh-eat*, *th-in*, *pu-sh*.”—*Ib.*, p. 56. My opinion of this scheme of the alphabet the reader will have anticipated.

#### IV. FORMS OF THE LETTERS.

In printed books of the English language, the Roman characters are generally employed; sometimes, the *Italic*; and occasionally, the Old English; but in handwriting, *Script letters* are used, the forms of which are peculiarly adapted to the pen.

Characters of different sorts or sizes should never be *needlessly mixed*; because facility of reading, as well as the beauty of a book, depends much upon the regularity of its letters.

In the ordinary forms of the Roman letters, every thick stroke that slants, slants from the left to the right downwards, except the middle stroke in *Z*; and every thin stroke that slants, slants from the left to the right upwards.

Italics are chiefly used to distinguish emphatic or remarkable words: in the Bible, they show what words were supplied by the translators.

In manuscripts, a single line drawn under a word is meant for Italics; a double line, for small capitals; a triple line, for full capitals.

In every kind of type or character, the letters have severally *two forms*, by which they are distinguished as *capitals* and *small letters*. Small letters constitute the body of every work; and capitals are used for the sake of eminence and distinction.

The titles of books, and the heads of their principal divisions, are printed wholly in capitals. Showbills, painted signs, and short inscriptions, commonly appear best in full capitals.

Some of these are so copied in books; as, “I found an altar with this inscription, TO THE UNKNOWN GOD.”—*Acts*, xvii, 23. “And they set up over his head, his accusation written, THIS IS JESUS, THE KING OF THE JEWS.”—*Matt.*, xxvii, 37.

## RULES FOR THE USE OF CAPITALS.

### RULE I.—OF BOOKS.

When particular books are mentioned by their names, the chief words in their titles begin with capitals, and the other letters are small; as, “Pope’s Essay on Man”—“the Book of Common Prayer”—“the Scriptures of the Old and New Testaments.” \*

### RULE II.—FIRST WORDS.

The first word of every distinct sentence, or of any clause separately numbered or paragraphed, should begin with a capital; as, “Rejoice evermore. Pray without ceasing. In every thing give thanks: for this is the will of God in Christ Jesus concerning you. Quench not the Spirit. Despise not prophesyings. Prove all things: hold fast that which is good.”—1 *Thess.*, v, 16—21.

“14. He has given his assent to their acts of pretended legislation:

15. *For* quartering large bodies of armed troops among us:

16. *For* protecting them, by a mock trial, from punishment for murders:

17. *For* cutting off our trade with all parts of the world:

18. *For* imposing taxes on us without our consent:” &c.

*Declaration of American Independence.*

### RULE III.—OF THE DEITY.

All names of the Deity, and sometimes their emphatic substitutes, should begin with capitals; as, “God, Jehovah, the Almighty, the Supreme Being, Divine Providence, the Messiah, the Comforter, the Father, the Son, the Holy Spirit, the Lord of Sabaoth.”

“The hope of my spirit turns trembling to Thee.”—*Moore*.

---

\* The titular name of the sacred volume is “The Holy Bible.” The word *Scripture* or *Scriptures* is a *common* name for the writings contained in this inestimable volume, and, in the book itself, is seldom distinguished by a capital; but, in other works, it seems proper in general to write it so, by way of eminence.

## RULE IV.—PROPER NAMES.

Proper names, of every description, should always begin with capitals; as, “Saul of Tarsus, Simon Peter, Judas Iscariot, England, London, the Strand, the Thames, the Pyrenees, the Vatican, the Greeks, the Argo and the Argonauts.”

## RULE V.—OF TITLES.

Titles of office or honour, and epithets of distinction, applied to persons, begin usually with capitals; as, “His Majesty William the Fourth, Chief Justice Marshall, Sir Matthew Hale, Dr. Johnson, the Rev. Dr. Chalmers, Lewis the Bold, Charles the Second, James the Less, St. Bartholomew, Pliny the Younger, Noah Webster, Jun., Esq.”

## RULE VI.—ONE CAPITAL.

Those compound proper names which by analogy incline to a union of their parts without a hyphen, should be so written, and have but one capital: as, “Eastport, Eastville, Westborough, Westfield, Westtown, Whitehall, Whitechurch, Whitehaven, Whiteplains, Mountmellick, Mountpleasant, Germantown, Germanflats, Blackrock, Redhook, Kinderhook, Newfoundland, Statenland, Newcastle, Northcastle, Southbridge, Fairhaven, Dekalb, Deruyter, Lafayette, Macpherson.”

## RULE VII.—TWO CAPITALS.

The compounding of a name under one capital should be avoided when the general analogy of other similar terms suggests a separation under two; as, “The chief mountains of Ross-shire are Ben Chat, *Benchasker*, Ben Golich, Ben Nore, Ben Foscarg, and Ben Wyvis.”—*Glasgow Geog.*, Vol. ii, p. 311. Write *Ben Chasker*. So, when the word *East*, *West*, *North*, or *South*, as part of a name, denotes relative position, or when the word *New* distinguishes a place by contrast, we have generally separate words and two capitals; as, “East Greenwich, West Greenwich, North Bridgewater, South Bridgewater, New Jersey, New Hampshire.”

## RULE VIII.—COMPOUNDS.

When any adjective or common noun is made a distinct part of a compound proper name, it ought to begin with a capital; as, “The United States, the Argentine Republic, the Peak of Teneriffe, the Blue Ridge, the Little Pedee, Long Island, Jersey City, Lower Canada, Green Bay, Gretna Green, Land’s End, the Gold Coast.”

## RULE IX.—APPOSITION.

When a common and a proper name are associated merely to explain each other, it is in general sufficient, if the proper name begin with a capital, and the appellative, with a small letter; as, “The prophet Elisha, Matthew the publican, the brook Cherith, the river Euphrates, the Ohio river, Warren county, Flatbush village, New York city.”

## RULE X.—PERSONIFICATIONS.

The name of an object personified, when it conveys an idea strictly individual, should begin with a capital; as, “Upon this, *Fancy* began again to bestir herself.”—*Addison*. “Come, gentle *Spring*, ethereal mildness, come.”—*Thomson*.

## RULE XI.—DERIVATIVES.

Words derived from proper names, and having direct reference to particular persons, places, sects, or nations, should begin with capitals; as, “Platonic, Newtonian, Greek, or Grecian, Romish, or Roman, Italic, or Italian, German, or Germanic, Swedish, Turkish, Chinese, Genoese, French, Dutch, Scotch, Welsh:” so, perhaps, “to Platonize, Grecize, Romanize, Italicize, Latinize, or Frenchify.”

## RULE XII.—OF I AND O.

The words *I* and *O* should always be capitals; as, “Praise the Lord, O Jerusalem; praise thy God, O Zion.”—*Psalms* cxlvii. “O wretched man that I am!”—“For that which I do, I allow not: for what I would, that do I not; but what I hate, that do I.”—*Rom.*, vii, 24 and 15.

## RULE XIII.—OF POETRY.

Every line in poetry, except what is regarded as making but one verse with the line preceding, should begin with a capital; as,

“Our sons their fathers’ failing language see,  
And such as Chaucer is, shall Dryden be.”—*Pope*.

Of the exception, some editions of the Psalms in Metre are full of examples; as,

“Happy the man whose tender care  
relieves the poor distress’d!  
When troubles compass him around,  
the Lord shall give him rest.”

*Psalms with Com. Prayer*, N. Y., 1819, Ps. xli.

## RULE XIV.—OF EXAMPLES.

The first word of a full example, of a distinct speech, or of a direct quotation, should begin with a capital; as, “Remember this maxim: ‘Know thyself.’”—“Virgil says, ‘Labour conquers all things.’”—“Jesus answered them, Is it not written in your law, I said, Ye are gods?”—*John*, x, 34. “Thou knowest the commandments, Do not commit adultery, Do not kill, Do not steal, Do not bear false witness, Honour thy father and thy mother.”—*Luke*, xviii, 20.

## RULE XV.—CHIEF WORDS.

Other words of particular importance, and such as denote the principal subjects treated of, may be distinguished by capitals; and names subscribed frequently have capitals throughout: as, “In its application to the Executive, with reference to the Legislative branch of the Government, the same rule of action should make the President ever anxious to avoid the exercise of any discretionary authority which can be regulated by Congress.”—ANDREW JACKSON, 1835.

## RULE XVI.—NEEDLESS CAPITALS.

Capitals are improper wherever there is not some special rule or reason for their use: a century ago books were disfigured by their frequency; as, “Many a Noble *Genius* is lost for want of *Education*. Which wou’d then be Much More Liberal. As it was when the *Church* Enjoy’d her *Possessions*. And *Learning* was, in the *Dark Ages*, Preserv’d almost only among the *Clergy*.”—CHARLES LESLIE, 1700; *Divine Right of Tythes*, p. 228.

## OBSERVATIONS.

OBS. 1.—The letters of the alphabet, read by their names, are equivalent to words. They are a sort of universal signs, by which we may mark and particularize objects of any sort, named or nameless; as, “To say, therefore, that while A and B are both quadrangular, A is more or less quadrangular than B, is absurd.”—*Murray’s Gram.*, p. 50. Hence they are used in the sciences as symbols of an infinite variety of things or ideas, being construed both substantively and adjectively; as, “In ascending from the note C to D, the interval is equal to an inch; and from D to E, the same.”—*Music of Nature*, p. 293. “We have only to imagine the G clef placed below it.”—*Ib.* Any of their forms may be used for such purposes, but the custom of each science determines our choice. Thus Algebra employs small Italics; Music, Roman capitals; Geometry, for the most part, the same; Astronomy, Greek characters; and Grammar, in some part or other, every sort. Examples: “Then comes *answer* like an ABC book.”—*Beauties of Shakspeare*, p. 97. “Then comes *question* like an *a, b, c*, book.—*Shakspeare*.” See A, B, C, in *Johnson’s quarto Dict.* Better:—“like an *A-Bee-Cee* book.”

“For A, his magic pen evokes an O,  
And turns the tide of Europe on the foe.”—*Young*.

OBS. 2.—A lavish use of capitals defeats the very purpose for which the letters were distinguished in rank; and carelessness in respect to the rules which govern them, may sometimes misrepresent the writer’s meaning. On many occasions, however, their use or disuse is arbitrary, and must be left to the judgement and taste of authors and printers. Instances of this kind will, for the most part, concern *chief words*, and come under the fifteenth rule above. In this grammar, the number of rules is increased; but the foregoing are still perhaps too few to establish an accurate uniformity. They will however tend to this desirable result; and if doubts arise in their application, the difficulties will be in particular examples only, and not in the general principles of the rules. For instance: In 1 Chron., xxix, 10th, some of our Bibles say, “Blessed be thou, LORD God of Israel our father, for ever and ever.” Others say, “Blessed be thou, LORD God of Israel, our Father, for ever and ever.” And others, “Blessed be thou, LORD God of Israel our Father, for ever and ever.” The last is wrong, either in the capital F, or for lack of a comma after *Israel*. The others differ in meaning; because they construe the word *father*, or *Father*, differently. Which is right I know not. The first agrees with the Latin Vulgate, and the second, with the Greek text of the Septuagint; which two famous versions here disagree, without ambiguity in either.\*

OBS. 3.—The innumerable discrepancies in respect to capitals, which, to a greater or less extent, disgrace the very best editions of our most popular books, are a sufficient evidence of the want of better directions on this point. In amending the rules for this purpose, I have not been able entirely to satisfy myself; and therefore must needs fail to satisfy the very critical reader. But the public shall have the best instructions I can give. On Rule 1st, concerning *Books*, it may be observed, that when particular books or writings are mentioned by other terms than their real titles, the principle of the rule does not apply. Thus, one may call *Paradise Lost*, “Milton’s *great poem*,” or the *Diversions of Purley*, “the *etymological investigations* of Horne Tooke.” So it is written in the Bible, “And

\* “Benedictus es Domine Deus Israel patris nostri ab eterno in eternum.”—*Vulgate*. “O Eternel! Dieu d’Israël, notre père, tu es béni de tout temps et à toujours.”—*Common French Bible*. “Εὐλογητὸς εἰ Κύριε ὁ Θεὸς Ἰσραὴλ ὁ πατὴρ ἡμῶν ἀπὸ τοῦ αἰῶνος καὶ ἕως τοῦ αἰῶνος.”—*Septuagint*.

there was delivered unto him *the book of the prophet* Esaias.”—*Luke*, iv, 17. Because the name of Esaias, or Isaiah, seems to be the only proper title of his book.

OBS. 4.—On Rule 2d, concerning *First Words*, it may be observed, that the using of other points than the period, to separate sentences that are totally distinct in sense, as is sometimes practised in quoting, is no reason for the omission of capitals at the beginning of such sentences; but, rather, an obvious reason for their use. Our grammarians frequently manufacture a parcel of puerile examples, and, with the formality of apparent quotation, throw them together in the following manner: “He is above disguise;” “we serve under a good master;” “he rules over a willing people;” “we should do nothing beneath our character.”—*Murray’s Gram.*, p. 118. These sentences, and all others so related, should, unquestionably, begin with capitals. Of themselves, they are distinct enough to be separated by the period and a dash. With examples of one’s own making, the quotation points may be used or not, as the writer pleases; but not on their insertion or omission, nor even on the quality of the separating point, depends in all cases the propriety or impropriety of using initial capitals. For example: “The Future Tense is the form of the verb which denotes future time; as, John *will come*, you shall go, they will learn, the sun will rise to-morrow, he will return next week.”—*Frazer’s Improved Gram.*, p. 38; *Old Edition*, 35. To say nothing of the punctuation here used, it is certain that the initial words, *you*, *they*, *the*, and *he*, should have commenced with capitals.

OBS. 5.—On Rule 3d, concerning *Names of Deity*, it may be observed, that the words *Lord* and *God* take the nature of proper names, only when they are used in reference to the Eternal Divinity. The former, as a title of honour to men, is usually written with a capital; but, as a common appellative, with a small letter. The latter, when used with reference to any fabulous deity, or when made plural to speak of many, should seldom, if ever, begin with a capital; for we do not write with a capital any common name which we do not mean to honour: as, “Though there be that are called *gods*, whether in heaven or in earth—as there be *gods* many, and *lords* many.”—1 *Cor.*, viii, 5. But a diversity of design or conception in respect to this kind of distinction, has produced great diversity concerning capitals, not only in original writings, but also in reprints and quotations, not excepting even the sacred books. Example: “The Lord is a great God, and a great King above all *Gods*.”—*Gurney’s Essays*, p. 88. Perhaps the writer here exalts the inferior beings called gods, that he may honour the one true God the more; but the Bible, in four editions to which I have turned, gives the word *gods* no capital. See *Psalms*, xcv, 3. The word *Heaven* put for God, begins with a capital; but when taken literally, it commonly begins with a small letter. Several nouns occasionally connected with names of the Deity, are written with a very puzzling diversity: as, “The Lord of *Sabaoth*,”—“The Lord God of *hosts*,”—“The God of *armies*,”—“The Father of *goodness*,”—“The Giver of all *good*,”—“The Lord, the righteous *Judge*.” All these, and many more like them, are found sometimes with a capital, and sometimes without. *Sabaoth*, being a foreign word, and used only in this particular connexion, usually takes a capital; but the equivalent English words do not seem to require it. For “*Judge*,” in the last example, I would use a capital; for “*good*” and “*goodness*,” in the preceding ones, the small letter: the one is an eminent name, the others are mere attributes. Alger writes, “*the Son of Man*,” with two capitals; others, perhaps more properly, “*the Son of man*,” with one—wherever that phrase occurs in the New Testament. But, in some editions, it has no capital at all.

OBS. 6.—On Rule 4th, concerning *Proper Names*, it may be observed, that the application of this principle supposes the learner to be able to distinguish between proper

names and common appellatives. Of the difference between these two classes of words, almost every child that can speak, must have formed some idea. I once noticed that a very little boy, who knew no better than to call a pigeon a turkey because the creature had feathers, was sufficiently master of this distinction, to call many individuals by their several names, and to apply the common words, *man*, *woman*, *boy*, *girl*, &c., with that generality which belongs to them. There is, therefore, some very plain ground for this rule. But not all is plain, and I will not veil the cause of embarrassment. It is only an act of imposture, to pretend that grammar *is easy*, in stead of making it so. Innumerable instances occur, in which the following assertion is by no means true: "The distinction between a common and a proper noun is *very obvious*."—*Kirkham's Gram.*, p 32. Nor do the remarks of this author, or those of any other that I am acquainted with, remove any part of the difficulty. We are told by this gentleman, (in language incorrigibly bad,) that, "*Nouns* which denote the genus, species, or variety of beings or things, are always common; as, *tree*, the genus; *oak*, *ash*, *chestnut*, *poplar*, different species; and *red oak*, *white oak*, *black oak*, varieties."—*Ib.*, p. 32. Now, as it requires *but one noun* to denote either a genus or a species, I know not how to conceive of *those* "*nouns* which denote *the genus* of things," except as of other confusion and nonsense; and, as for the three varieties of oak, there are surely no "*nouns*" here to denote them, unless he will have *red*, *white*, and *black* to be nouns. But what shall we say of—"the Red sea, the White sea, the Black sea;" or, with two capitals, "Red Sea, White Sea, Black Sea," and a thousand other similar terms, which are neither proper names unless they are written with capitals, nor written with capitals unless they are first judged to be proper names? The simple phrase, "the united states," has nothing of the nature of a proper name; but what is the character of the term, when written with two capitals, "the United States?" If we contend that it is not then a proper name, we make our country anonymous. And what shall we say to those grammarians who contend, that "*Heaven*, *Hell*, *Earth*, *Sun*, and *Moon*, are proper names;" and that, as such, they should be written with capitals? See *Churchill's Gram.*, p. 380.

OBS. 7.—It would seem that most, if not all, proper names had originally some common signification, and that very many of our ordinary words and phrases have been converted into proper names, merely by being applied to particular persons, places, or objects, and receiving the distinction of capitals. How many of the oceans, seas, lakes, capes, islands, mountains, states, counties, streets, institutions, buildings, and other things, which we constantly particularize, have no other proper names than such as are thus formed, and such as are still perhaps, in many instances, essentially appellative! The difficulties respecting these will be further noticed below. A proper noun is the name of some particular individual, group, or people; as, *Adam*, *Boston*, the *Hudson*, the *Azores*, the *Andes*, the *Romans*, the *Jews*, the *Jesuits*, the *Cherokees*. This is as good a definition as I can give of a proper noun or name. Thus we commonly distinguish the names of particular persons, places, nations, tribes, or sects, with capitals. Yet we name the sun, the moon, the equator, and many other particular objects, without a capital; for *the* word may give a particular meaning to a common noun, without converting it into a proper name: but if we say *Sol*, for the sun, or *Luna*, for the moon, we write it with a capital. With some apparent inconsistency, we commonly write the word *Gentiles* with a capital, but *pagans*, *heathens*, and *negroes*, without: thus custom has marked these names with degradation. The names of the days of the week, and those of the months, however expressed, appear to me to partake of the nature of proper names, and to require capitals: as, *Sunday*, *Monday*, *Tuesday*, *Wednesday*, *Thursday*, *Friday*, *Saturday*; or, as the Friends denominate them, *Firstday*, *Secondday*, *Thirdday*, *Fourthday*, *Fifthday*, *Sixthday*, *Seventhday*. So, if they will not use *January*, *February*, &c., they should write as proper

names their *Firstmonth*, *Secondmonth*, &c. The Hebrew names for the months, were also proper nouns: to wit, Abib, Zif, Sivan, Thamuz, Ab, Elul, Tisri, Marchesvan, Chisleu, Tebeth, Shebat, Adar; the year, with the ancient Jews, beginning, as ours once did, in March.

OBS. 8.—On Rule 5th, concerning *Titles of Honour*, it may be observed, that names of office or rank, however high, do not require capitals merely as such; for, when we use them alone in their ordinary sense, or simply place them in apposition with proper names, without intending any particular honour, we begin them with a small letter: as, “the emperor Augustus;”—“our mighty sovereign, Abbas Carascan;”—“David the king;”—“Tidal king of nations;”—“Bonner, bishop of London;”—“The sons of Eliphaz, the first-born you of Esau; duke Teman, duke Omar, duke Zepho, duke Kenaz, duke Korah, duke Gatam, and duke Amalek.”—*Gen.*, xxxvi, 15. So, sometimes, in addresses in which even the greatest respect is intended to be shown: as, “O *sir*, we came indeed down at the first time to buy food.”—*Gen.*, xliii, 20. “O my *lord*, let thy servant, I pray thee, speak a word in my *lord’s* ears.”—*Gen.*, xliv, 18. The Bible, which makes small account of worldly honours, seldom uses capitals under this rule; but, in some editions, we find “Nehemiah the *Tirshatha*,” and “Herod the *Tetrarch*,” each with a needless capital. Murray, in whose illustrations the word *king* occurs nearly one hundred times, seldom honours his Majesty with a capital; and, what is more, in all this mawkish mentioning of royalty, nothing is said of it *that is worth knowing*. Examples: “The *king* and the queen had put on their robes.”—*Murray’s Gram.*, p. 154. “The *king*, with his life-guard, has just passed through the village.”—*Ib.*, 150. “The *king* of Great Britain’s dominions.”—*Ib.*, 45. “On a sudden appeared the *king*.”—*Ib.*, 146. “Long live the *King*!”—*Ib.*, 146. “On which side soever the *king* cast his eyes.”—*Ib.*, 156. “It is the *king* of Great Britain’s.”—*Ib.*, 176. “He desired to be their *king*.”—*Ib.*, 181. “They desired him to be their *king*.”—*Ib.*, 181. “He caused himself to be proclaimed *king*.”—*Ib.*, 182. These examples, and thousands more as simple and worthless, are among the pretended quotations by which this excellent man, thought “to promote the cause of virtue, as well as of learning!”

OBS. 9.—On Rule 6th, concerning *One Capital for Compounds*, I would observe, that perhaps there is nothing more puzzling in grammar, than to find out, amidst all the diversity of random writing, and wild guess-work in printing, the true way in which the compound names of places should be written. For example: What in Greek was “*ho Areios Pagos*,” the *Martial Hill*, occurs twice in the New Testament: once, in the accusative case, “*ton Areion Pagan*,” which is rendered *Areopagus*; and once, in the genitive, “*tou Areiou Pagou*,” which, in different copies of the English Bible is made *Mars’ Hill*, *Mars’ hill*, *Mars’-hill*, *Marshall*, *Mars Hill*, and perhaps *Mars hill*. But if *Mars* must needs be put in the possessive case, (which I doubt,) they are all wrong: for then it should be *Mars’s Hill*; as the name *Campus Martins* is rendered “*Mars’s Field*,” in Collier’s Life of Marcus Antoninus. We often use nouns adjectively; and *Areios* is an adjective: I would therefore write this name *Mars Hill*, as we write *Bunker Hill*. Again: *Whitehaven* and *Fairhaven* are commonly written with single capitals; but, of six or seven *towns* called *Newhaven* or *New Haven*, some have the name in one word and some in two. *Haven* means a *harbour*, and the words, *New Haven*, written separately, would naturally be understood of a harbour: the close compound is obviously more suitable for the name of a city or town. In England, compounds of this kind are more used than in America; and in both countries the tendency of common usage seems to be, to contract and consolidate such terms. Hence the British counties are almost all named by compounds ending with the word *shire*; as, Nottinghamshire, Derbyshire, Staffordshire, Leicestershire, Northamptonshire,

Warwickshire, Worcestershire, &c. But the best books we have, are full of discrepancies and errors in respect to names, whether foreign or domestic; as, “*Ulswater* is somewhat smaller. The handsomest is *Derwentwater*.”—*Balbi’s Geog.*, p. 212. “*Ulswater*, a lake of England,” &c. “*Derwent-Water*, a lake in Cumberland,” &c.—*Univ. Gazetteer*, “*Ulleswater*, lake, Eng. situated partly in Westmoreland,” &c.—*Worcester’s Gaz.* “*Derwent Water*, lake, Eng. in Cumberland.”—*Ibid.* These words, I suppose, should be written *Ullswater* and *Derwentwater*.

OBS. 10.—An affix, or termination, differs from a distinct word; and is commonly understood otherwise, though it may consist of the same letters and have the same sound. Thus, if I were to write *Stow Bridge*, it would be understood of a *bridge*; if *Stowbridge*, of a *town*; or the latter might even be the name of a *family*. So *Belleisle* is the proper name of a *strait*; and *Belle Isle* of several different *islands* in France and America. Upon this plain distinction, and the manifest inconvenience of any violation of so clear an analogy of the language, depends the propriety of most of the corrections which I shall offer under Rule 6th. But if the inhabitants of any place choose to call their town a creek, a river, a harbour, or a bridge, and to think it officious in other men to pretend to know better, they may do as they please. If between them and their correctors there lie a mutual charge of misnomer, it is for the literary world to determine who is right. Important names are sometimes acquired by mere accident. Those which are totally inappropriate, no reasonable design can have bestowed. Thus a fancied resemblance between the island of Aquidneck, in Narraganset Bay, and that of Rhodes, in the Ægean Sea, has at length given to a *state*, or *republic*, which lies *chiefly on the main land*, the absurd name of *Rhode Island*; so that now, to distinguish Aquidneck itself, geographers resort to the strange phrase, “*the Island of Rhode Island*.”—*Balbi*. The official title of this little republic, is, “*the State of Rhode Island and Providence Plantations*.” But this name is not only too long for popular use, but it is doubtful in its construction and meaning. It is capable of being understood in four different ways. 1. A stranger to the fact, would not learn from this phrase, that the “Providence Plantations” are included in the “State of Rhode Island,” but would naturally infer the contrary. 2. The phrase, “Rhode Island and Providence Plantations,” may be supposed to mean “Rhode Island [Plantations] and Providence Plantations.” 3. It may be understood to mean “Rhode Island and Providence [i.e., two] Plantations.” 4. It may be taken for “Rhode Island” [i.e., as an island,] and the “Providence Plantations.” Which, now, of all these did Charles the Second mean, when he gave the colony this name, with his charter, in 1663? It happened that he meant the last; but I doubt whether any man in the state, except perhaps some learned lawyer, can *parse* the phrase, with any certainty of its true construction and meaning. This old title can never be used, except in law. To write the popular name “*Rhodeisland*,” as Dr. Webster has it in his American Spelling-Book, p. 121, would be some improvement upon it; but to make it *Rhodeland*, or simply *Rhode*, would be much more appropriate. As for *Rhode Island*, it ought to mean nothing but the island; and it is, in fact, *an abuse of language* to apply it otherwise. In one of his parsing lessons, Sanborn gives us for good English the following tautology: “*Rhode Island* derived its name from the *island of Rhode Island*.”—*Analytical Gram.*, p. 37. Think of that sentence!

OBS. 11.—On Rules 7th and 8th, concerning *Two Capitals for Compounds*, I would observe, with a general reference to those *compound terms* which designate particular places or things, that it is often no easy matter to determine, either from custom or from analogy, whether such common words as may happen to be embraced in them, are to be accounted parts of compound proper names and written with capitals, or to be regarded

as appellatives, requiring small letters according to Rule 9th. Again the question may be, whether they ought not to be joined to the foregoing word, according to Rule 6th. Let the numerous examples under these four rules be duly considered: for usage, in respect to each of them, is diverse; so much so, that we not unfrequently find it contradictory, in the very same page, paragraph, or even sentence. Perhaps we may reach some principles of uniformity and consistency, by observing the several different kinds of phrases thus used.

1. We often add an adjective to an old proper name to make a new one, or to serve the purpose of distinction: as, New York, New Orleans, New England, New Bedford; North America, South America; Upper Canada, Lower Canada; Great Pedee, Little Pedee; East Cambridge, West Cambridge; Troy, West Troy. All names of this class require two capitals: except a few which are joined together; as *Northampton*, which is sometimes more analogically written *North Hampton*. 2. We often use the possessive case with some common noun after it; as, Behring's Straits, Baffin's Bay, Cook's Inlet, Van Diemen's Land, Martha's Vineyard, Sacket's Harbour, Glenn's Falls. Names of this class generally have more than one capital; and perhaps all of them should be written so, except such as coalesce; as, Gravesend, Moorestown, the Crowsnest. 3. We sometimes use two common nouns with *of* between them; as, the Cape of Good Hope, the Isle of Man, the Isles of Shoals, the Lake of the Woods, the Mountains of the Moon. Such nouns are usually written with more than one capital. I would therefore write "the Mount of Olives" in this manner, though it is not commonly found so in the Bible. 4. We often use an adjective and a common noun; as, the Yellow sea, the Indian ocean, the White hills, Crooked lake, the Red river; or, with two capitals, the Yellow Sea, the Indian Ocean, the White Hills, Crooked Lake, the Red River. In this class of names the adjective is the distinctive word, and always has a capital; respecting the other term, usage is divided, but seems rather to favour two capitals. 5. We frequently put an appellative, or common noun, before or after a proper name; as, New York city, Washington street, Plymouth county, Greenwich village. "The Carondelet canal extends from the city of New Orleans to the bayou St. John, connecting lake Pontchartrain with the Mississippi river."—*Balbi's Geog.* This is apposition. In phrases of this kind, the common noun often has a capital, but it seldom absolutely requires it; and in general a small letter is more correct, except in some few instances in which the common noun is regarded as a permanent part of the name; as in *Washington City*, *Jersey City*. The words *Mount*, *Cape*, *Lake*, and *Bay*, are now generally written with capitals when connected with their proper names; as, Mount Hope, Cape Cod, Lake Erie, Casco Bay. But they are not always so written, even in modern books; and in the Bible we read of "mount Horeb, mount Sinai, mount Zion, mount Olivet," and many others, always with a single capital.

OBS. 12.—In modern compound names, the hyphen is now less frequently used than it was a few years ago. They seldom, if ever, need it, unless they are employed as adjectives; and then there is a manifest propriety in inserting it. Thus the phrase, "the New London Bridge," can be understood only of a new bridge in London; and if we intend by it a bridge in New London, we must say, "the New-London Bridge." So "the New York Directory" is not properly a directory for New York, but a new directory for York. I have seen several books with titles which, for this reason, were evidently erroneous. With respect to the ancient Scripture names, of this class, we find, in different editions of the Bible, as well as in other books, many discrepancies. The reader may see a very fair specimen of them, by comparing together the last two vocabularies of Walker's Key. He will there meet with an abundance of examples like these: "Uz'zen Shérah, Uzzen-shérah; Talitha Cúmi, Talithacúmi; Náthan Mélech, Nathan'-melech; A'bel Mehólath, Abel-mehólath; Házel Elpóni, Hazelepóni; Az'noth Tábor, Asnoth-tábor; Báal Ham'on, Baal-hámon; Hámon Gog,

Ham'ongog; Báal Zébub, Bāal'zebub; Shéthar Boz'nāi, Shether-boz'nāi; Meródach Bal'adan, Merodach-bal'adan." All these glaring inconsistencies, and many more, has Dr. Webster restereotyped from Walker, in his octavo Dictionary! I see no more need of the hyphen in such names, than in those of modern times. They ought, in some instances, to be joined together without it; and, in others, to be written separately, with double capitals. But special regard should be had to the ancient text. The phrase, "Talitha, cumi,"—i. e., "Damsel, arise,"—is found in some Bibles, "Talitha-cumi;" but this form of it is no more correct than either of those quoted above. See *Mark*, v, 41st, in *Griesbach's Greek Testament*, where a comma divides this expression.

OBS. 13.—On Rule 10th, concerning *Personifications*, it may be well to observe, that not every noun which is the name of an object personified, must begin with a capital, but only such as have a resemblance to *proper nouns*; for the word *person* itself, or *persons*, or any other common noun denoting persons or a person, demands no such distinction. And proper names of persons are so marked, not with any reference to personality, but because they are *proper nouns*—or names of individuals, and not names of sorts. Thus, Æsop's viper and file are both personified, where it is recorded, "What ails thee, fool?" says the *file* to the *viper*," but the fable gives to these names no capitals, except in the title of the story. It may here be added, that, according to their definitions of personification, our grammarians and the teachers of rhetoric have hitherto formed no very accurate idea of what constitutes the figure. Lindley Murray says, "PERSONIFICATION [,] or PROSOPOPŒIA, is that figure by which we attribute *life* and *action* to *inanimate* objects."—*Octavo Gram.*, p. 346; *Duodecimo*, p. 211. Now this is all wrong, doubly wrong,—wrong in relation to what personification is, and wrong too in its specification of the objects which may be personified. For "*life and action*" not being peculiar to *persons*, there must be something else than these ascribed, to form the figure; and, surely, the objects which *Fancy* thinks it right to personify, are not always "*inanimate*." I have elsewhere defined the thing as follows: "*Personification* is a figure by which, in imagination, we ascribe intelligence and personality to unintelligent beings or abstract qualities."—*Inst.*, p. 234.

OBS. 14.—On Rule 11th, concerning *Derivatives*, I would observe, that not only the proper adjectives, to which this rule more particularly refers, but also nouns, and even verbs, derived from such adjectives, are frequently, if not generally, written with an initial capital. Thus, from *Greece*, we have *Greek*, *Greeks*, *Greekish*, *Greeking*, *Grecise*, *Grecism*, *Grecian*, *Grecians*, *Grecianize*. So Murray, copying Blair, speaks of "*Latinised English*;" and, again, of style strictly "*English*, without *Scotticisms* or *Galicisms*."—*Mur. Gram.*, 8vo, p. 295; *Blair's Lect.*, pp. 93 and 94. But it is questionable, how far this principle respecting capitals ought to be carried. The examples in Dr. Johnson's quarto Dictionary exhibit the words, *gallicisms*, *anglicisms*, *hebrician*, *latinize*, *latinized*, *judaized*, and *christianized*, without capitals; and the words *Latinisms*, *Grecisms*, *Hebraisms*, and *Frenchified*, under like circumstances, with them. Dr. Webster also defines *Romanize*, "To *Latinize*; to conform to *Romish* opinions." In the examples of Johnson, there is a manifest inconsistency. Now, with respect to adjectives from proper names, and also to the nouns formed immediately from such adjectives, it is clear that they ought to have capitals: no one will contend that the words *American* and *Americans* should be written with a small *a*. With respect to *Americanism*, *Galicism*, and other similar words, there may be some room to doubt. But I prefer a capital for these. And, that we may have a uniform rule to go by, I would not stop here, but would write *Americanize* and *Americanized* with a capital also; for it appears that custom is in favour of thus distinguishing nearly all verbs and participles of this kind, so long as they retain an obvious reference to their particular origin. But

when any such word ceases to be understood as referring directly to the proper name, it may properly be written without a capital. Thus we write *jalap* from *Jalapa*, *hermetical* from *Hermes*, *hymeneal* from *Hymen*, *simony*, from *Simon*, *philippic* from *Philip*; the verbs, to *hector*, to *romance*, to *japan*, to *christen*, to *philippize*, to *galvanize*; and the adverbs *hermetically* and *jesuitically*, all without a capital: and perhaps *judaize*, *christianize*, and their derivatives, may join this class. Dr. Webster's octavo Dictionary mentions "the *prussic* acid" and "*prussian* blue," without a capital; and so does Worcester's.

OBS. 15.—On Rule 12th, concerning *I* and *O*, it may be observed, that although many who occasionally write, are ignorant enough to violate this, as well as every other rule of grammar, yet no printer ever commits blunders of this sort. Consequently, the few erroneous examples which will be exhibited for correction under it, will not be undesigned mistakes. Among the errors of books, we do not find the printing of the words *I* and *O* in small characters; but the confounding of *O* with the other interjection *oh*, is not uncommon even among grammarians. The latter has no concern with this rule, nor is it equivalent to the former, as a sign: *O* is a note of wishing, earnestness, and vocative address; but *oh* is, properly, a sign of sorrow, pain, or surprise. In the following example, therefore, a line from Milton is perverted:—

"*Oh* thou! that with surpassing glory crowned!"—*Bucke's Gram.*, p. 88.

OBS. 16.—On Rule 13th, concerning *Poetry*, it may be observed, that the principle applies only to regular versification, which is the common form, if not the distinguishing mark, of poetical composition. And, in this, the practice of beginning every line with a capital is almost universal; but I have seen some books in which it was whimsically disregarded. Such poetry as that of Macpherson's *Ossian*, or such as the common translation of the *Psalms*, is subjected neither to this rule, nor to the common laws of verse.

OBS. 17.—On Rule 14th, concerning *Examples*, *Speeches*, and *Quotations*, it may be observed, that the propriety of beginning these with a capital or otherwise, depends in some measure upon their form. One may suggest certain words by way of example, (as *see*, *saw*, *seeing*, *seen*,) and they will require no capital; or he may sometimes write one half of a sentence in his own words, and quote the other with the guillemets and no capital; but whatsoever is cited as being said with other relations of what is called *person*, requires something to distinguish it from the text into which it is woven. Thus Cobbett observes, that, "The French, in their Bible, say *Le Verbe*, where we say *The Word*."—*E. Gram.*, p. 21. Cobbett says *the whole* of this; but he here refers one short phrase to the French nation, and an other to the English, not improperly beginning each with a capital, and further distinguishing them by Italics. Our common Bibles make no use of the quotation points, but rely solely upon capitals and the common points, to show where any particular speech begins or ends. In some instances, the insufficiency of these means is greatly felt, notwithstanding the extraordinary care of the original writers, in the use of introductory phrases. Murray says, "When a quotation is brought in obliquely after a comma, a capital is unnecessary: as, 'Solomon observes, "that pride goes before destruction."'—*Octavo Gram.*, p. 284. But, as the word '*that*' belongs not to Solomon, and the next word begins his assertion, I think we ought to write it, "Solomon observes, that, '*Pride goeth* before destruction.'" Or, if we do not mean to quote him literally, we may omit the guillemets, and say, "Solomon observes that pride goes before destruction."

**IMPROPRIETIES FOR CORRECTION.****ERRORS RESPECTING CAPITALS.**

☞ [The improprieties in the following examples are to be corrected orally by the learner, according to the formulæ given, or according to others framed from them with such slight changes as the several quotations may require. A correct example will occasionally be admitted for the sake of contrast, or that the learner may see the quoted author's inconsistency. It will also serve as a block over which stupidity may stumble and wake up. But a full explanation of what is intended, will be afforded in the Key.]

**UNDER RULE I.—OF BOOKS.**

“Many a reader of the bible knows not who wrote the acts of the apostles.”—*G. B.*

[FORMULÆ OF CORRECTION.—Not proper, because the words, *bible*, *acts*, and *apostles*, here begin with small letters. But, according to Rule 1st, “When particular books are mentioned by their names, the chief words in their titles begin with capitals, and the other letters are small.” Therefore, “Bible” should begin with a capital B; and “Acts” and “Apostles,” each with a large A.]

“The sons of Levi, the chief of the fathers, were written in the book of the chronicles.”—SCOTT'S BIBLE: *Neh.*, xii, 23. “Are they not written in the book of the acts of Solomon?”—SCOTT, ALGER: 1 *Kings*, xi, 41. “Are they not written in the book of the Chronicles of the kings of Israel?”—ALGER: 1 *Kings*, xxii, 39. “Are they not written in the book of the chronicles of the kings of Judah?”—SCOTT: *ib.*, ver. 45. “Which were written in the law of Moses, and in the prophets, and in the psalms.”—SCOTT: *Luke*, xxiv, 44. “The narrative of which may be seen in Josephus's History of the Jewish wars.”—*Scott's Preface*, p. ix. “This history of the Jewish war was Josephus's first work, and published about A.D. 75.”—*Note to Josephus*. “I have read,” says Photius, “the chronology of Justus of Tiberias.”—*Ib.*, *Jos. Life*. “A philosophical grammar, written by James Harris, Esquire.”—*Murray's Gram.*, p. 34. “The reader is referred to Stroud's sketch of the slave laws.”—*Anti-Slavery Mag.*, i, 25. “But God has so made the bible that it interprets itself.”—*Ib.*, i, 78. “In 1562, with the help of Hopkins, he completed the psalter.”—*Music of Nature*, p. 283. “Gardiner says this of *Sternhold*; of whom the universal biographical dictionary and the American encyclopedia affirm, that he died in 1549.”—*Author*. “The title of a Book, to wit: ‘English Grammar in familiar lectures,’” &c.—*Kirkham's Gram.*, p. 2. “We had not, at that time, seen Mr. Kirkham's ‘Grammar in familiar Lectures.’”—*Ib.*, p. 3. “When you parse, you may spread the Compendium before you.”—*Ib.*, p. 53. “Whenever you parse, you may spread the compendium before you.”—*Ib.*, p. 113. “Adelung was the author of a grammatical and critical dictionary of the German language, and other works.”—*Univ. Biog. Dict.* “Alley, William, author of ‘the poor man's library,’ and a translation of the Pentateuch, died in 1570.”—*Ib.*

**UNDER RULE II.—OF FIRST WORDS.**

“Depart instantly: improve your time: forgive us our sins.”—*Murray's Gram.*, p. 61.

[FORMULÆ.—Not proper, because the words *improve* and *forgive* begin with small letters. But, according to Rule 2nd, “The first word of every distinct sentence should begin with a capital.” Therefore, “Improve” should begin with a capital I; and “Forgive,” with a capital F.]

EXAMPLES: “Gold is corrupting; the sea is green; a lion is bold.”—*Mur. Gram.*, p. 170; *et al.* Again: “It may rain; he may go or stay; he would walk; they should learn.”—*Ib.*, p. 64; *et al.* Again: “Oh! I have alienated my friend; alas! I fear for life.”—*Ib.*, p. 128; *et al.* Again: “He went from London to York;” “she is above disguise;” “they are supported by industry.”—*Ib.*, p. 28; *et al.* “On the foregoing examples, I have a word to say. they are better than a fair specimen of their kind, our grammars abound with worse illustrations, their models of English are generally spurious quotations. few of their proof-texts have any just parentage, goose-eyes are abundant, but names scarce. who fathers the foundlings? nobody. then let their merit be nobody’s, and their defects his who could write no better.”—*Author.* “*goose-eyes!*” says a bright boy; “pray, what are they? does this Mr. Author make new words when he pleases? *dead-eyes* are in a ship, they are blocks, with holes in them, but what are goose-eyes in grammar?” ANSWER: “*goose-eyes* are quotation points, some of the Germans gave them this name, making a jest of their form, the French call them *guillemets*, from the name of their inventor.”—*Author.* “*it* is a personal pronoun, of the third person singular.”—*Comly’s Gram.*, 12th Ed., p. 126. “*ourselves* is a personal pronoun, of the first person plural.”—*Ib.*, 138. “*thee* is a personal pronoun, of the second person singular.”—*Ib.*, 126. “*contentment* is a noun common, of the third person singular.”—*Ib.*, 128. “*were* is a neuter verb, of the indicative mood, imperfect tense.”—*Ib.*, 129.

#### UNDER RULE III.—OF DEITY.

“O thou dispenser of life! thy mercies are boundless.”—*W. Allen’s Gram.*, p. 449.

[FORMULE.—Not proper, because the word *dispenser* begins with a small letter. But, according to Rule 3d, “All names of the Deity, and sometimes their emphatic substitutes, should begin with capitals.” Therefore, “Dispenser” should here begin with a capital D.]

“Shall not the judge of all the earth do right?”—SCOTT: *Gen.*, xviii, 25. “And the spirit of God moved upon the face of the waters.”—*Murray’s Gram.*, p. 330. “It is the gift of him, who is the great author of good, and the Father of mercies.”—*Ib.*, 287. “This is thy god that brought thee up out of Egypt.”—SCOTT, ALGER: *Neh.*, ix, 18. “For the lord is our defence; and the holy one of Israel is our king.”—See *Psalms* lxxxix, 18. “By making him the responsible steward of heaven’s bounties.”—*Anti-Slavery Mag.*, i, 29. “Which the Lord, the righteous judge, shall give me at that day.”—SCOTT, FRIENDS: 2 *Tim.*, iv, 8. “The cries of them \* \* \* entered into the ears of the Lord of sabaoth.”—SCOTT: *James*, v, 4. “In Horeb, the deity revealed himself to Moses, as the eternal I am, the self-existent one; and, after the first discouraging interview of his messengers with Pharaoh, he renewed his promise to them, by the awful name, jehovah—a name till then unknown, and one which the Jews always held it a fearful profanation to pronounce.”—*Author.* “And god spake unto Moses, and said unto him, I am the lord: and I appeared unto Abraham, unto Isaac, and unto Jacob, by the name of god almighty; but by my name jehovah was I not known to them.”—See \* *Exod.*, vi, 2. “Thus saith the lord the king of Israel, and his redeemer the lord of hosts; I am the first, and I am the last; and besides me there is no god.”—See *Isa.*, xlv, 6.

---

\* Where the word “*See*” accompanies the reference, the reader may generally understand that the citation, whether right or wrong in regard to grammar, is not in all respects *exactly* as it will be found in the place referred to. Cases of this kind, however, will occur but seldom; and it is hoped the reasons for admitting a few, will be sufficiently obvious. Brevity is indispensable; and some rules are so generally known and observed, that one might search long for half a dozen examples of their undesigned violation. Wherever an error is made intentionally in the Exercises, the true reading and reference are to be expected in the Key.

“His impious race their blasphemy renew’d,  
And nature’s king through nature’s optics view’d.”—*Dryden*, p. 90.

UNDER RULE IV.—OF PROPER NAMES.

“Islamism prescribes fasting during the month ramazan.”—*Balbi’s Geog.*, p. 17.

[FORMULE.—Not proper, because the word *ramazan* here begins with a small letter. But, according to Rule 4th, “Proper names, of every description, should always begin with capitals.” Therefore, “Ramazan” should begin with a capital R. The word is also misspelled: it should rather be *Ramadan*.]

“Near mecca, in arabia, is jebel nor, or the mountain of light, on the top of which the mussulmans erected a mosque, that they might perform their devotions where, according to their belief, mohammed received from the angel gabriel the first chapter of the Koran.”—*Author*. “In the kaaba at mecca, there is a celebrated block of volcanic basalt, which the mohammedans venerate as the gift of gabriel to abraham, but their ancestors once held it to be an image of remphan, or saturn; so ‘the image which fell down from jupiter,’ to share with diana the homage of the ephesians, was probably nothing more than a meteoric stone.”—*Id*. “When the lycaonians, at lystra, took paul and barnabas to be gods, they called the former mercury, on account of his eloquence, and the latter jupiter, for the greater dignity of his appearance.”—*Id*. “Of the writings of the apostolic fathers of the first century, but few have come down to us; yet we have in those of barnabas, clement of rome, hermas, ignatius, and polycarp, very certain evidence of the authenticity of the New Testament, and the New Testament is a voucher for the old.”—*Id*.

“It is said by tatian, that theagenes of rhegium, in the time of cambyses, stesimbrotus the thracian, antimachus the colophonian, herodotus of halicarnassus, dionysius the olynthian, ephorus of cumæ, philochorus the athenian, metaclides and chamæleon the peripatetics, and zenodotus, aristophanes, callimachus, erates, eratosthenes, aristarchus, and apollodorus, the grammarians, all wrote concerning the poetry, the birth, and the age of homer.” See *Coleridge’s Introd.*, p. 57. “Yet, for aught that now appears, the life of homer is as fabulous as that of hercules; and some have even suspected, that, as the son of jupiter and alcmena, has fathered the deeds of forty other herculeses, so this unfathered son of critheis, themisto, or whatever dame—this melesigenes, mæonides, homer—the blind schoolmaster, and poet, of smyrna, chios, colophon, salamis, rhodes, argos, athens, or whatever place—has, by the help of lycurgus, solon, pisistratus, and other learned ancients, been made up of many poets or homers, and set so far aloft and aloof on old parnassus, as to become a god in the eyes of all greece, a wonder in those of all Christendom.”—*Author*.

“Why so sagacious in your guesses?  
Your *effs*, and *tees*, and *arrs*, and *esses*?”—*Swift*.

UNDER RULE V.—OF TITLES.

“The king has conferred on him the title of duke.”—*Murray’s Key*, 8vo, p. 193.

[FORMULE.—Not proper, because the word *duke* begins with a small letter. But, according to Rule 5th, “Titles of office or honour, and epithets of distinction, applied to persons, begin usually with capitals.” Therefore, “Duke” should here begin with a capital D.]

“At the court of queen Elizabeth.”—*Murray’s Gram.*; 8vo, p. 157; 12mo, p. 126; *Fisk’s*, 115; *et al*. “The laws of nature are, truly, what lord Bacon styles his aphorisms, laws of

laws.”—*Murray’s Key*, p. 260. “Sixtus the fourth was, if I mistake not, a great collector of books.”—*Ib.*, p. 257. “Who at that time made up the court of king Charles the second.”—*Murray’s Gram.*, p. 314. “In case of his majesty’s dying without issue.”—*Kirkham’s Gram.*, p. 181. “King Charles the first was beheaded in 1649.”—*W. Allen’s Gram.*, p. 45. “He can no more impart or (to use lord Bacon’s word,) *transmit* convictions.”—*Kirkham’s Eloc.*, p. 220. “I reside at lord Stormont’s, my old patron and benefactor.”—*Murray’s Gram.*, p. 176. “We staid a month at lord Lyttleton’s, the ornament of his country.”—*Ib.*, p. 177. “Whose prerogative is it? It is the king of Great Britain’s;” “That is the duke of Bridgewater’s canal;” “The bishop of Llandaff’s excellent book;” “The Lord mayor of London’s authority.”—*Ib.*, p. 176. “Why call ye me lord, lord, and do not the things which I say?”—See GRIESBACH: *Luke*, vi, 46. “And of them he chose twelve, whom also he named apostles.”—SCOTT: *Luke*, vi, 13. “And forthwith he came to Jesus, and said, Hail, master; and kissed him.”—See *the Greek: Matt.*, xxvi, 49. “And he said, Nay, father Abraham: but if one went unto them from the dead, they will repent.”—*Luke*, xvi, 30.

#### UNDER RULE VI.—OF ONE CAPITAL.

“Fall River, a village in Massachusetts, population 3431.”—See *Univ. Gaz.*, p. 416.

[FORMULE.—Not proper, because the name *Fall River* is here written in two parts, and with two capitals. But, according to Rule 6th, “Those compound proper names which by analogy incline to a union of their parts without a hyphen, should be so written, and have but one capital.” Therefore, *Fallriver*, as the name of a *town*, should be one word, and retain but one capital.]

“Dr. Anderson died at West Ham, in Essex, in 1808.”—*Biog. Dict.* “Mad River, [the name of] two towns in Clark and Champaign counties, Ohio.”—*Williams’s Universal Gazetteer*. “White Creek, town of Washington county, N. York.”—*Ib.* “Salt Creek, the name of four towns in different parts of Ohio.”—*Ib.* “Salt Lick, a town of Fayette county, Pennsylvania.”—*Ib.* “Yellow Creek, a town of Columbiana county, Ohio.”—*Ib.* “White Clay, a hundred of New Castle county, Delaware.”—*Ib.* “Newcastle, town and halfshire of Newcastle county, Delaware.”—*Ib.* “Sing-Sing, a village of West Chester county, New York, situated in the town of Mount Pleasant.”—*Ib.* “West Chester, a county of New York; also a town in Westchester county.”—*Ib.* “West Town, a village of Orange county, New York.”—*Ib.* “White Water, a town of Hamilton county, Ohio.”—*Ib.* “White Water River, a considerable stream that rises in Indiana, and flowing southeasterly, unites with the Miami, in Ohio.”—*Ib.* “Black Water, a village of Hampshire, in England, and a town in Ireland.”—*Ib.* “Black Water, the name of seven different rivers in England, Ireland, and the United States.”—*Ib.* “Red Hook, a town of Dutchess county, New York, on the Hudson.”—*Ib.* “Kinderhook, a town of Columbia county, New York, on the Hudson.”—*Ib.* “New Fane, a town of Niagara county, New York.”—*Ib.* “Lake Port, a town of Chicot county, Arkansas.”—*Ib.* “Moose Head Lake, the chief source of the Kennebeck, in Maine.”—*Ib.* “Macdonough, a county of Illinois, population (in 1830) 2,959.”—*Ib.*, p. 408. “Mc Donough, a county of Illinois, with a courthouse, at Macomb.”—*Ib.*, p. 185. “Half-Moon, the name of two towns, in New York and Pennsylvania; also of two bays in the West Indies.”—See *Worcester’s Gaz.* “Le Boeuf, a town of Erie county, Pennsylvania, near a small lake of the same name.”—*Ib.* “Charles City, James City, Elizabeth City, names of counties in Virginia, not cities, nor towns.”—See *Univ. Gaz.* “The superior qualities of the waters of the Frome, here called Stroud water.”—*Balbi’s Geog.*, p. 223.

## UNDER RULE VII.—TWO CAPITALS.

“The Forth rises on the north side of Benlomond, and runs easterly.”—*Glas. Geog.*

[FORMULE.—Not proper, because the name “*Benlomond*” is compounded under one capital, contrary to the general analogy of other similar terms. But, according to Rule 7th, “The compounding of a name under one capital should be avoided when the general analogy of other similar terms suggests a separation under two.” Therefore, “Ben Lomond” should be written with two capitals and no hyphen.]

“The red granite of Ben-nevis is said to be the finest in the world.”—*Ib.*, ii, 311. “Benmore, in Perthshire, is 3,915 feet above the level of the sea.”—*Ib.*, 313. “The height of Benclough is 2,420 feet.”—*Ib.* “In Sutherland and Caithness, are Ben Ormod, Ben Clibeg, Ben Grin, Ben Hope, and Ben Lugal.”—*Ib.*, 311. “Benvracky is 2,756 feet high; Ben-ledi, 3,009; and Benvoirlich, 3,300.”—*Ib.*, 313. “The river Dochart gives the name of Glendochart to the vale through which it runs.”—*Ib.*, 314. “About ten miles from its source, the Tay diffuses itself into Lochdochart.”—*Geog. altered.* LAKES:—“Lochard, Loch-Achray, Loch-Con, Loch-Doine, Loch-Katrine, Loch-Lomond, Loch-Voil.”—*Scott’s Lady of the Lake.* GLENS:—“Glenfinlas, Glen Fruin, Glen Luss, Ross-dhu, Leven-glen, Strath-Endrick, Strath-Gartney, Strath-Ire.”—*Ib.* MOUNTAINS:—“Ben-an, Benharrow, Benledi, Benlomond, Benvoirlich, Ben-venue, and sometimes Benvenue.”—*Ib.* “Fenelon died in 1715, deeply lamented by all the inhabitants of the Low-countries.”—*Murray’s Sequel*, p. 322. “And Pharaoh-nechoh made Eliakim, the son of Josiah, king.”—SCOTT, FRIENDS: 2 *Kings*, xxiii, 34. “Those who seem so merry and well pleased, call her *Good Fortune*; but the others, who weep and wring their hands, *Bad-fortune*.”—*Collier’s Tablet of Cebes.*

## UNDER RULE VIII.—OF COMPOUNDS.

“When Joab returned, and smote Edom in the valley of salt.”—SCOTT: *Ps.* lx, *title.*

[FORMULE.—Not proper, because the words *valley* and *salt* begin with small letters. But, according to Rule 8th, “When any adjective or common noun is made a distinct part of a compound proper name, it ought to begin with a capital.” Therefore, “Valley” should here begin with a capital V, and “Salt” with a capital S.]

“Then Paul stood in the midst of Mars’ hill and said,” &c.—SCOTT: *Acts*, xvii, 22. “And at night he went out, and abode in the mount that is called the mount of Olives.”—*Luke*, xxi, 37. “Abgillus, son of the king of the Frisii, surnamed Prester John, was in the Holy land with Charlemagne.”—*Univ. Biog. Dict.* “Cape Palmas, in Africa, divides the Grain coast from the Ivory coast.”—*Dict. of Geog.*, p. 125. “The North Esk, flowing from Loch-lee, falls into the sea three miles north of Montrose.”—*Ib.*, p. 232. “At Queen’s ferry, the channel of the Forth is contracted by promontories on both coasts.”—*Ib.*, p. 233. “The Chestnut ridge is about twenty-five miles west of the Alleghanies, and Laurel ridge, ten miles further west.”—*Balbi’s Geog.*, p. 65. “Washington City, the metropolis of the United States of America.”—*W.’s Univ. Gaz.*, p. 380. “Washington city, in the District of Columbia, population (in 1830) 18,826.”—*Ib.*, p. 408. “The loftiest peak of the white mountains, in new Hampshire, is called mount Washington.”—*Author.* “Mount’s bay, in the west of England, lies between the land’s end and lizard point.”—*Id.* “Salamis, an island of the Egean Sea, off the southern coast of the ancient Attica.”—*Dict. of Geog.* “Rhodes, an island of the Egean sea, the largest and most easterly of the Cyclades.”—*Ib.* “But he overthrew

Pharaoh and his host in the Red sea.”—BRUCE’S BIBLE: *Ps.* cxxxvi, 15. “But they provoked him at the sea, even at the Red sea.”—SCOTT: *Ps.* cvi, 7.\*

#### UNDER RULE IX.—OF APPPOSITION.

“At that time, Herod the Tetrarch heard of the fame of Jesus.”—ALGER: *Matt.*, xiv, 1.

[FORMULE.—Not proper, because the word *Tetrarch* begins with a capital letter. But, according to Rule 8th, “When a common and a proper name are associated merely to explain each other, it is in general sufficient, if the proper name begin with a capital, and the appellative, with a small letter.” Therefore, “tetrarch” should here begin with a small *t*.]

“Who has been more detested than Judas the Traitor?”—*Author*. “St. Luke, the Evangelist, was a physician of Antioch, and one of the converts of St. Paul.”—*Id.* “Luther, the Reformer, began his bold career by preaching against papal indulgences.”—*Id.* “The Poet Lydgate was a disciple and admirer of Chaucer: he died in 1440.”—*Id.* “The Grammarian Varro, ‘the most learned of the Romans,’ wrote three books when he was eighty years old.”—*Id.* “John Despauter, the great Grammarian of Flanders, whose works are still valued, died in 1520.”—*Id.* “Nero, the Emperor and Tyrant of Rome, slew himself to avoid a worse death.”—*Id.* “Cicero the Orator, ‘the Father of his Country,’ was assassinated at the age of 64.”—*Id.* “Euripides, the Greek Tragedian, was born in the Island of Salamis, B. C. 476.”—*Id.* “I will say unto God my Rock, Why hast thou forgotten me?”—SCOTT: *Ps.* xlii, 9. “Staten Island, an island of New York, nine miles below New York City.”—*Univ. Gaz.* “When the son of Atreus, King of Men, and the noble Achilles first separated.”—*Coleridge’s Introd.*, p. 83.

“Hermes, his Patron-God, those gifts bestow’d,  
Whose shrine with weaning lambs he wont to load.”—POPE: *Odys.*, B. 19.

#### UNDER RULE X.—OF PERSONIFICATIONS.

“But wisdom is justified of all her children.”—SCOTT, ALGER: *Luke*, vii, 35.

[FORMULE.—Not proper, because the word *wisdom* begins with a small letter. But, according to Rule 10th, “The name of an object personified, when it conveys an idea strictly individual, should begin with a capital.” Therefore, “Wisdom” should here begin with a capital W.]

“Fortune and the church are generally put in the feminine gender.”—*Murray’s Gram.*, i, p. 37. “Go to your natural religion; lay before her Mahomet, and his disciples.”—*Blair’s Rhetoric*, p. 157: see also *Murray’s Gram.*, i, 347. “O death! where is thy sting? O grave! where is thy victory?”—1 *Cor.*, xv, 55; *Murray’s Gram.*, p. 348; *English Reader*, 31; *Merchant’s Gram.*, 212. “Ye cannot serve God and Mammon.”—SCOTT, FRIENDS, ET AL.: *Matt.*, vi, 24. “Ye cannot serve God and mammon.”—*IDEM*: *Luke*, xvi, 13. “This house was built as if suspicion herself had dictated the plan.”—See *Key*. “Poetry distinguishes herself from prose, by yielding to a musical law.”—See *Key*. “My beauteous deliverer thus uttered her divine instructions: ‘My name is religion. I am the offspring of truth and love, and the parent of benevolence, hope, and joy. That monster, from whose power I have freed you, is called superstition: she is the child of discontent, and her followers are fear and sorrow.’”—See *Key*. “Neither hope nor fear could enter the retreats; and habit had so absolute a power, that even conscience, if religion had employed her in their favour, would not have been able to force an entrance.”—See *Key*.

\* “Et irritaverunt ascendentes in mare, Mare rubrum.”—*Latin Vulgate, folio, Psal.* cv, 7. This, I think, should have been “Mare Rubrum,” with two capitals.—G. BROWN.

“In colleges and halls in ancient days,  
There dwelt a sage called discipline.”—*Wayland's M. Sci.*, p. 368.

UNDER RULE XI.—OF DERIVATIVES.

“In English, I would have gallicisms avoided.”—FELTON: *Johnson's Dict.*

[FORMULE.—Not proper, because the word *gallicisms* here begins with a small letter. But, according to Rule 11th, “Words derived from proper names, and having direct reference to particular persons, places, sects, or nations, should begin with capitals.” Therefore, “Gallicisms” should begin with a capital G.]

“Sallust was born in Italy, 85 years before the christian era.”—*Murray's Seq.*, p. 357. “Dr. Doddridge was not only a great man, but one of the most excellent and useful christians, and christian ministers.”—*Ib.*, 319. “They corrupt their style with untutored anglicisms.”—MILTON: *in Johnson's Dict.* “Albert of Stade, author of a chronicle from the creation to 1286, a benedictine of the 13th century.”—*Universal Biog. Dict.* “Graffio, a jesuit of Capua in the 16th century, author of two volumes on moral subjects.”—*Ib.* “They frenchify and italianize words whenever they can.”—See *Key*. “He who sells a christian, sells the grace of God.”—*Anti-Slavery Mag.*, p. 77. “The first persecution against the christians, under Nero, began A.D. 64.”—*Gregory's Dict.* “P. Rapin, the jesuit, uniformly decides in favour of the Roman writers.”—*Cobbett's E. Gram.*, ¶ 171. “The Roman poet and epicurean philosopher Lucretius has said,” &c.—*Cohen's Florida*, p. 107. Spell “calvinistic, atticism, gothicism, epicurism, jesuitism, sabianism, socinianism, anglican, anglicism, anglicize, vandalism, gallicism, romanize.”—*Webster's El. Spelling-Book*, 130-133. “The large ternate bat.”—*Webster's Dict.* *w.* ROSSET; *Bolles's Dict.*, *w.* ROSET.

“Church-ladders are not always mounted best  
By learned clerks, and latinists profess'd.”—*Cowper*.

UNDER RULE XII.—OF I AND O.

“Fall back, fall back; i have not room:—o! methinks i see a couple whom i should know.”—*Lucian, varied*.

[FORMULE.—Not proper, because the word *I*, which occurs three times, and the word *O*, which occurs once, are here printed in letters of the lower case.\* But, according to Rule 12th, “The words *I* and *O* should always be capitals.” Therefore, each should be changed to a capital, as often as it occurs.]

“Nay, i live as i did, i think as i did, i love you as i did; but all these are to no purpose: the world will not live, think, or love, as i do.”—*Swift, varied*. “Whither, o! whither shall i fly? o wretched prince! o cruel reverse of fortune! o father Micipsa! is this the consequence of thy generosity?”—*Sallust, varied*. “When i was a child, i spake as a child, i understood as a child, i thought as a child; but when i became a man, i put away childish things.”—1 *Cor.*, xiii, 11, *varied*. “And i heard, but i understood not: then said i, o my Lord, what shall be the end of these things?”—*Dan.*, xii, 8, *varied*. “Here am i; i think i am very good, and i am quite sure i am very happy, yet i never wrote a treatise in my life.”—*Few Days in Athens, varied*. “Singular, Vocative, *o master*; Plural, Vocative, *o masters*.”—*Bicknell's Gram.*, p. 30.

“I, i am he; o father! rise, behold  
Thy son, with twenty winters now grown old!”—See *Pope's Odyssey*.

\* The printers, from the manner in which they place their types before them, call the small letters “lower-case letters,” or “letters of the lower case.”

## UNDER RULE XIII.—OF POETRY.

“Reason’s whole pleasure, all the joys of sense,  
lie in three words—health, peace, and competence;  
but health consists with temperance alone,  
and peace, O Virtue! peace is all thy own.”

*Pope's Essay on Man, a fine London Edition.*

[FORMULE.—Not proper, because the last three lines of this example begin with small letters. But, according to Rule 18th, “Every line in poetry, except what is regarded as making but one verse with the preceding line, should begin with a capital.” Therefore, the words, “Lie,” “But,” and “And,” at the commencement of these lines, should severally begin with the capitals L, B, and A.]

“Observe the language well in all you write,  
and swerve not from it in your loftiest flight.  
The smoothest verse and the exactest sense  
displease us, if ill English give offence:  
a barbarous phrase no reader can approve;  
nor bombast, noise, or affectation love.  
In short, without pure language, what you write  
can never yield us profit or delight.  
Take time for thinking, never work in haste;  
and value not yourself for writing fast.”

See *Dryden's Art of Poetry*:—*British Poets*, Vol. iii, p. 74.

## UNDER RULE XIV.—OF EXAMPLES.

“The word *rather* is very properly used to express a small degree or excess of a quality: as, ‘she is *rather* profuse in her expenses.’”—*Murray's Gram.*, p. 47.

[FORMULE.—Not proper, because the word *she* begins with a small letter. But, according to Rule 14th, “The first word of a full example, of a distinct speech, or of a direct quotation, should begin with a capital.” Therefore, the word “She” should here begin with a capital S.]

“*Neither* imports *not either*; that is, not one nor the other: as, ‘neither of my friends was there.’”—*Murray's Gram.*, p. 56. “When we say, ‘he is a tall man,’ ‘this is a fair day,’ we make some reference to the ordinary size of men, and to different weather.”—*Ib.*, p. 47. “We more readily say, ‘A million of men,’ than ‘a thousand of men.’”—*Ib.*, p. 169. “So in the instances, ‘two and two are four,’ ‘the fifth and sixth volumes will complete the set of books.’”—*Ib.*, p. 124. “The adjective may frequently either precede or follow it [the verb]: as, ‘the man is *happy*,’ or, ‘*happy* is the man.’ ‘The interview was *delightful*,’ or, ‘*delightful* was the interview.’”—*Ib.*, p. 168. “If we say, ‘he writes a pen,’ ‘they ran the river,’ ‘the tower fell the Greeks,’ ‘Lambeth is Westminster-abbey,’ [we speak absurdly;] and, it is evident, there is a vacancy which must be filled up by some connecting word: as thus, ‘He writes *with* a pen,’ ‘they ran *towards* the river,’ ‘the tower fell *upon* the Greeks,’ ‘Lambeth is *over against* Westminster-abbey.’”—*Ib.*, p. 118. “Let me repeat it;—he only is great, who has the habits of greatness.”—*Murray's Key*, 241. “I say not unto thee, until seven times; but, until seventy times seven.”—See *Matt.*, xviii, 22.

“The Panther smil’d at this; and when, said she,  
Were those first councils disallow’d by me?”—*Dryden*, p. 95.

UNDER RULE XV.—OF CHIEF WORDS.

“The supreme council of the nation is called the divan.”—*Balbi’s Geog.*, p. 360.

[FORMULE.—Not proper, because the word *divan* begins with a small letter. But, according to Rule 15th, “Other words of particular importance, and such as denote the principal subjects treated of, may be distinguished by capitals.” Therefore, “Divan” should here begin with a capital D.]

“The British parliament is composed of kings, lords, and commons.”—*Murray’s Key*, p. 184. “A popular orator in the House of Commons has a sort of patent for coining as many new terms as he pleases.”—See *Campbell’s Rhet.*, p. 169; *Murray’s Gram.*, 364. “They may all be taken together, as one name; as, the *house of commons*.”—*Merchant’s School Gram.*, p. 25. “Intrusted to persons in whom the parliament could confide.”—*Murray’s Gram.*, 8vo, p. 202. “For ‘The Lords’ house,’ it were certainly better to say, ‘The house of lords;’ and, in stead of ‘The commons’ vote,’ to say, ‘The votes of the commons.’”—See *ib.*, p. 177, 4th *Amer. Ed.*; also *Priestley’s Gram.*, p. 69. “The house of lords were so much influenced by these reasons.”—*Murray’s Gram.*, 8vo, p. 152; *Priestley’s Gram.*, 188. “Rhetoricians commonly divide them into two great classes; figures of words, and figures of thought. The former, figures of words, are commonly called tropes.”—*Blair’s Rhet.*, p. 132. “Perhaps figures of imagination, and figures of passion, might be a more useful distribution.”—*Ib.*, p. 133. “Hitherto we have considered sentences, under the heads of perspicuity, unity, and strength.”—*Ib.*, p. 120.

“The word is then depos’d, and in this view,  
You rule the scripture, not the scripture you.”—*Dryden*, p. 95.

UNDER RULE XVI.—OF NEEDLESS CAPITALS.

“Be of good cheer: It is I; be not afraid.”—*Alger. Matt.*, xiv, 27.

[FORMULE.—Not proper, because the word *It* begins with a capital *I*, for which there appears to be neither rule nor reason. But, according to Rule 16th, “Capitals are improper wherever there is not some special rule or reason for their use.” Therefore, ‘it’ should here begin with a small letter, as Dr. Scott has it.]

“Between passion and lying, there is not a Finger’s breadth.”—*Murray’s Key*, p. 240. “Can our Solicitude alter the course, or unravel the intricacy, of human events?”—*Ib.*, p. 242. “The last edition was carefully compared with the Original M. S.”—*Ib.*, p. 239. “And the governor asked him, saying, Art thou the King of the Jews?”—*ALGER: Matt.*, xxvii, 11. “Let them be turned back for a reward of their shame, that say, Aha, Aha!”—*FRIENDS’ BIBLE: Ps.*, lxx, 3. “Let them be desolate for a reward of their shame, that say unto me, Aha, aha!”—*IB.: Ps.*, xl, 15. “What think ye of Christ? whose Son is he? They say unto him, The Son of David. He saith unto them, How then doth David in Spirit call him Lord?”—*SCOTT: Matt.*, xxii, 42, 43. “Among all Things in the Universe, direct your Worship to the Greatest; And which is that? ‘T is that Being which Manages and Governs all the Rest.”—*Meditations of M. Aurelius Antoninus*, p. 76. “As for Modesty and Good Faith, Truth and Justice, they have left this wicked World and retired to Heaven: And now what is it that can keep you here?”—*Ib.*, p. 81.

“If Pulse of Terse, a Nation’s Temper shows,  
In keen Iambics English Metre flows.”—*Brightland’s Gram.*, p. 151.

## PROMISCUOUS ERRORS RESPECTING CAPITALS.

### LESSON I.—MIXED.

“Come, gentle spring, Ethereal mildness, come.”—*Gardiner’s Music of Nature*, p. 411.

[FORMULES.—1. Not proper, because the word *spring* begins with a small letter. But, according to Rule 10th, “The name of an object personified, when it conveys an idea strictly individual, should begin with a capital.” Therefore “Spring” should here begin with a capital S.

2. Not proper again, because the word *Ethereal* begins with a capital E, for which there appears to be neither rule nor reason. But, according to Rule 16th. “Capitals are improper whenever there is not some special rule or reason for their use.” Therefore, “ethereal” should here begin with a small letter.]

As, “He is the Cicero of his age; he is reading the lives of the Twelve Cæsars.”—*Murray’s Gram.*, p. 36. “In the History of Henry the fourth, by father Daniel, we are surprized at not finding him the great man.”—*Priestley’s Gram.*, p. 151. “In the history of Henry the fourth, by Father Daniel, we are *surprised* at not finding him the great man.”—*Murray’s Gram.*, p. 172; *Ingersoll’s*, 187; *Fisk’s*, 99. “Do not those same poor peasants use the Lever and the Wedge, and many other instruments?”—*Murray*, 288; from *Harris*, 293. “Arithmetic is excellent for the gauging of Liquors; Geometry, for the measuring of Estates; Astronomy, for the making of Almanacks; and Grammar, perhaps, for the drawing of Bonds and Conveyances.”—*Harris’s Hermes*, p. 295. “The wars of Flanders, written in Latin by Famianus Strada, is a book of some note.”—*Blair’s Rhet.*, p. 364. “*William* is a noun.—why? *was* is a verb.—why? *a* is an article.—why? *very* is an adverb.—why?” &c.—*Merchant’s School Gram.*, p. 20. “In the beginning was the word, and that word was with God, and God was that word.”—*Gwilt’s Saxon Gram.*, p. 49. “The greeks are numerous in thessaly, macedonia, romelia, and albania.”—*Balbi, varied*. “He is styled by the Turks, Sultan (Mighty) or Padishah (lord).”—*Balbi’s Geog.*, p. 360. “I will ransom them from the power of the grave; I will redeem them from death: O death, I will be thy plagues;\* O grave, I will be thy destruction.”—SCOTT, ALGER, ET AL.: *Hosea*, xiii, 14. “Silver and Gold have I none; but such as I have, give I unto thee.”—*Murray’s Gram.*, 8vo, p. 321. “Return, we beseech thee, O God of Hosts, look down from heaven, and behold, and visit this vine.”—*Ib.*, p. 342. “In the Attic Commonwealth, it was the privilege of every citizen to rail in public.”—*Ib.*, p. 316. “They assert that, in the phrases, ‘give me *that*,’ ‘*this* is John’s,’ and ‘*such* were *some* of you,’ the words in italics are pronouns: but that, in the following phrases, they are not pronouns; ‘*this* book is instructive,’ ‘*some* boys are ingenious,’ ‘*my* health is declining,’ ‘*our* hearts are deceitful,’ &c.”—*Ib.*, p. 58. “And the coast bends again to the northwest, as far as Far Out head.”—*Glasgow Geog.*, Vol. ii, p. 308. Dr. Webster, and other makers of spelling-books, very improperly write “sunday, monday, tuesday, wednesday, thursday, friday, saturday,” without capitals.—See *Webster’s Elementary Spelling-Book* p. 85. “The commander in chief of the Turkish navy is styled the capitan-pasha.”—*Balbi’s Geog.*, p. 360. “Shall we not much rather be in subjection unto the father

\* I imagine that “*plagues*” should here be *plague*, in the singular number, and not plural. “Ero more ius, o mors; morsus tuus ero, inferne.”—*Vulgate*. “Ποῦ ἢ δκιν σου, θάνατε; ποῦ τὸ κέντρον σου, ἄδη;”—*Septuagint*, *ibid*.

of spirits, and live?"—SCOTT'S BIBLE: *Heb.*, xii, 9. "Shall we not much rather be in subjection unto the Father of Spirits, and live?"—FRIENDS' BIBLE: *Heb.*, xii, 9. "He was more anxious to attain the character of a Christian hero."—*Murray's Sequel*, p. 308. "Beautiful for situation, the joy of the whole earth, is mount Zion."—*Psalms*, xlviii, 2. "The Lord is my Helper, and I will not fear what man shall do unto me."—SCOTT: *Heb.*, xiii, 6. "Make haste to help me, O LORD my Salvation."—SCOTT: *Ps.*, xxxviii, 22.

"The City, which Thou seest, no other deem  
Than great and glorious Rome, Queen of the Earth."

*Harris's Hermes*, p. 49.

#### LESSON II.—MIXED.

"That range of hills, known under the general name of mount Jura."—*Priestley's Gram.*, p. 110. "He rebuked the Red sea also, and it was dried up."—SCOTT: *Ps.*, cvi, 9. "Jesus went unto the mount of Olives."—*John*, viii, 1. "Milton's book, in reply to the *Defence of the king*, by Salmasius, gained him a thousand pounds from the parliament, and killed his antagonist with vexation."—See *Murray's Sequel*, 343. "Mandeville, sir John, an Englishman, famous for his travels, born about 1300, died in 1372."—*Biog. Dict.* "Ettrick pen, a mountain in Selkirkshire, Scotland, height 2,200 feet."—*Glasgow Geog.*, Vol. ii, p. 312. "The coast bends from Dungsbyhead in a northwest direction to the promontory of Dunnet head."—*Ib.*, p. 307. "Gen. Gaines ordered a detachment of near 300 men, under the command of Major Twiggs, to surround and take an Indian Village, called Fowl Town, about fourteen miles from fort Scott."—*Cohen's Florida*, p. 41. "And he took the damsel by the hand, and said unto her, Talitha Cumi."—ALGER: *Mark*, v, 4. "On religious subjects, a frequent recurrence of scripture-language is attended with peculiar force."—*Murray's Gram.*, p. 318. "Contemplated with gratitude to their Author, the Giver of all Good."—*Ib.*, p. 289. "When he, the Spirit of Truth, is come, he will guide you into all truth."—*Ib.*, p. 171; *Fisk*, 98; *Ingersoll*, 186. "See the lecture on verbs, rule XV. note 4."—*Fisk's E. Gram.*, p. 117. "At the commencement of lecture II. I informed you that Etymology treats, 3dly, of derivation."—*Kirkham's Gram.*, p. 171. "This VIII. lecture is a very important one."—*Ib.*, p. 113. "Now read the XI. and XII. lectures *four* or *five* times over."—*Ib.*, p. 152. "In 1752, he was advanced to the bench, under the title of lord Kames."—*Murray's Sequel*, p. 331. "One of his maxims was, 'know thyself.'"—*Lempriere's Dict.*, *n. Chilo*. "Good master, what good thing shall I do, that I may have eternal life?"—See *Matt.*, xix, 16. "His best known works, however, are 'anecdotes of the earl of Chatham,' 2 vols. 4to., 3 vols. 8vo., and 'biographical, literary, and political anecdotes of several of the most eminent persons of the present age; never before printed,' 3 vols. 8vo. 1797."—*Univ. Biog. Dict.*, *n. Almon*. "O gentle sleep, Nature's soft nurse, how have I frightened thee?"—*Merchant's School Gram.*, p. 172. "O sleep, O gentle sleep, Nature's soft nurse," &c.—SINGER'S SHAK. *Sec. Part of Hen.* IV, Act iii. "Sleep, gentle sleep, Nature's soft nurse," &c.—*Dodd's Beauties of Shakspeare*, p. 129.

"And Peace, O, Virtue! Peace is all thy own."—*Pope's Works*, p. 379.

"And peace, O virtue! peace is all thy own."—*Murray's Gram.*, ii, 16.

#### LESSON III.—MIXED.

"Fenelon united the characters of a nobleman and a Christian pastor. His book entitled 'An explication of the Maxims of the Saints concerning the interior life,' gave considerable offence to the guardians of orthodoxy."—*Murray's Sequel*, p. 321. "When

natural religion, who before was only a spectator, is introduced as speaking by the centurion's voice."—*Blair's Rhet.*, p. 157. "You cannot deny, that the great mover and author of nature constantly explaineth himself to the eyes of men, by the sensible intervention of arbitrary signs, which have no similitude, or connexion, with the things signified."—*Berkley's Minute Philosopher*, p. 169. "The name of this letter is double U, its form, that of a double V."—*Wilson's Essay on Gram.*, p. 19. "Murray, in his spelling book, wrote 'Charles-Town' with a Hyphen and two Capitals."—See p. 101. "He also wrote 'european' without a capital."—See p. 86. "They profess themselves to be pharisees, who are to be heard and not imitated."—*Calvin's Institutes, Ded.*, p. 55. "Dr. Webster wrote both 'Newhaven' and 'Newyork' with single capitals."—See his *American Spelling-Book*, p. 111. "Gayhead, the west point of Martha's Vineyard."—*Williams's Univ. Gaz.* Write "Craborchard, Eggharbor, Longisland, Perthamboy, Westhampton, Littlecompton, Newpaltz, Crownpoint, Fellspoint, Sandyhook, Portpenn, Portroyal. Portobello, and Portorico."—*Webster's American Spelling-Book*, 127-140. Write the names of the months: "january, february, march, april, may, june, july, august, september, october, november, december."—*Cobb's Standard Spelling-Book*, 21-40. Write the following names and words properly: "tuesday, wednesday, thursday, friday, saturday, saturn;—christ, christian, christmas, christendom, michaelmas, indian, bacchanals;—Easthampton, omega, johannes, aonian, levitical, deuteronomy, european."—*Cobb's Standard Spelling-Book*, sundry places.

"Eight Letters in some Syllables we find,  
And no more Syllables in Words are joined." *Brightland's Gram.*, p. 61.

## CHAPTER II.—OF SYLLABLES.

A *Syllable* is one or more letters pronounced in one sound; and is either a word, as, *a*, *an*, *ant*; or a part of a word, as *di* in *dial*.

In every word there are as many syllables as there are distinct sounds, or separate impulses of the voice; as, *gram-ma-ri-an*.

A word of one syllable is called a *monosyllable*; a word of two syllables, a *dissyllable*; a word of three syllables, a *trissyllable*; and a word of four or more syllables, a *polysyllable*.

Every vowel, except *u*, may form a syllable of itself; but the consonants belong to the vowels or diphthongs; and without a vowel no syllable can be formed.

## DIPHTHONGS AND TRIPHTHONGS.

A *diphthong* is two vowels joined in one syllable; as, *ea* in *beat*, *ou* in *sound*. In *œ* or *æ*, old or foreign, the characters often unite.

A *proper diphthong* is a diphthong in which both the vowels are sounded; as, *oi* in *voice*, *ow* in *vow*.

An *improper diphthong* is a diphthong in which only one of the vowels is sounded; as, *oa* in *loaf*, *eo* in *people*.

A *triphthong* is three vowels joined in one syllable; as, *eau* in *beau*, *iew* in *view*, *oeu* in *manoeuvre*.

A *proper triphthong* is a triphthong in which all the vowels are sounded; as, *uoy* in *buoy*.

An *improper triphthong* is a triphthong in which only one or two of the vowels are sounded; as, *eau* in *beauty*, *iou* in *anxious*. The diphthongs in English are twenty-nine; embracing all but six of the thirty-five possible combinations of two vowels: *aa*, *ae*, *ai*, *ao*, *au*, *aw*, *ay*,—*ea*, *ee*, *ei*, *eo*, *eu*, *ew*, *ey*,—*ia*, *ie*, (*ii*), *io*, (*iu*, *iw*, *iy*),—*oa*, *oe*, *oi*, *oo*, *ou*, *ow*, *oy*,—*ua*, *ue*, *ui*, *uo*, (*uu*, *uw*), *uy*.

Ten of these diphthongs, being variously sounded, may be either proper or improper; to wit, *ay*,—*ie*,—*oi*, *ou*, *ow*,—*ua*, *ue*, *ui*, *uo*, *uy*.

The proper diphthongs appear to be thirteen; *ay*,—*ia*, *ie*, *io*,—*oi*, *ou*, *ow*, *oy*,—*ua*, *ue*, *ui*, *uo*, *uy*: of which combinations, only three, *ia*, *io*, and *oy*, are invariably of this class.

The improper diphthongs are twenty-six; *aa*, *ae*, *ai*, *ao*, *au*, *aw*, *ay*,—*ea*, *ee*, *ei*, *eo*, *eu*, *ew*, *ey*,—*ie*,—*oa*, *oe*, *oi*, *oo*, *ou*, *ow*,—*ua*, *ue*, *ui*, *uo*, *uy*.

The only proper triphthong in English is *uoy*, as in *buoy*, *buoyant*, *buoyancy*; unless *uoi* in *quoit* may be considered a parallel instance.

The improper triphthongs are sixteen; *awe*, *aye*,—*eau*, *eou*, *ewe*, *eye*,—*ieu*, *iew*, *iou*,—*oeu*, *owe*,—*uai*, *uaw*, *uay*, *uea*, *uee*.

## SYLLABICATION.

In dividing words into syllables, we are to be directed chiefly by the ear; it may however be proper to observe, as far as practicable, the following rules.

### RULE I.—CONSONANTS.

Consonants should generally be joined to the vowels or diphthongs which they modify in utterance; as, *An-ax-ag'-o-ras*, *ap-os-tol'-i-cal*.\*

---

\* It is hoped that not many persons will be so much puzzled as are Dr. Latham and Professor Fowler, about the application of this rule. In their recent works on The English Language, these gentlemen say, "In certain words of more than one syllable, *it is difficult to say* to which syllable the intervening Consonant belongs. For instance, *does* the *v* in *river* and the *v* in *fever* belong to the first or to the second syllable? Are the words to be divided thus, *ri-ver*, *fe-ver*? or thus, *riv-er*, *fev-er*?"—*Fowler's E. Gram.*, 1850, §85; *Latham's Hand-Book*, p. 95. Now I suppose it plain, that, by the rule given above, *fever* is to be divided in the former way, and *river* in the latter; thus, *fe-ver*, *riv-er*. But this paragraph of Latham's or Fowler's is written, not to disembarass the learner, but just as if it were a grammarian's business to confound his readers with fictitious dilemmas—and those expressed ungrammatically! Of the two Vees, so illogically associated in one question, and so solecistically spoken of by the singular verb "*does*," one belongs to the former syllable, and the other, to the latter; nor do I discover that "it is difficult to say" this, or to be well assured that it is right. What an admirable passage for one great linguist to *steal* from another!

## RULE II.—VOWELS.

Two vowels, coming together, if they make not a diphthong, must be parted in dividing the syllables; as, *A-cka'-i-a*, *A-o'-ni-an*, *a-e'-ri-al*.

## RULE III.—TERMINATIONS.

Derivative and grammatical terminations should generally be separated from the radical words to which they have been added; as, *harm-less*, *great-ly*, *connect-ed*: thus *count-er* and *coun-ter* are different words.

## RULE IV.—PREFIXES.

Prefixes, in general, form separate syllables; as, *mis-place*, *out-ride*, *up-lift*: but if their own primitive meaning be disregarded, the case may be otherwise; thus, *re-create*, and *rec'-reate*, *re-formation*, and *ref-ormation*, are words of different import.

## RULE V.—COMPOUNDS.

Compounds, when divided, should be divided into the simple words which compose them; as, *boat-swain*, *foot-hold*, *never-the-less*.

## RULE VI.—LINES FULL.

At the end of a line, a word may be divided, if necessary; but a syllable must never be broken.

## OBSERVATIONS.

OBS. 1.—The doctrine of English syllabication is attended with some difficulties; because its purposes are various, and its principles, often contradictory. The old rules, borrowed chiefly from grammars of other languages, and still retained in some of our own, are liable to very strong objections.\* By aiming to divide on the vowels, and to force the consonants, as much as possible, into the beginning of syllables, they often pervert or misrepresent our pronunciation. Thus Murray, in his Spelling-Book, has “*gra-vel*, *fi-nish*, *me-lon*, *bro-ther*, *bo-dy*, *wi-dow*, *pri-son*, *a-va-ri-ce*, *e-ve-ry*, *o-ran-ges*, *e-ne-my*, *me-di-cine*, *re-pre-sent*, *re-so-lu-tion*,” and a multitude of other words, divided upon a principle by which the young learner can scarcely fail to be led into error respecting their sounds. This method of division is therefore particularly reprehensible in such books as are designed to teach the true pronunciation of words; for which reason, it has been generally abandoned in our modern spelling-books and dictionaries: the authors of which have severally aimed at some sort of compromise between etymology and pronunciation; but they disagree so much, as to the manner of effecting it, that no two of them will be found alike, and very few, if any, entirely consistent with themselves.

OBS. 2.—The object of syllabication may be any one of the following four; 1. To enable a child to read unfamiliar words by spelling them; 2. To show the derivation or composition of words; 3. To exhibit the exact pronunciation of words; 4. To divide words properly, when it is necessary to break them at the ends of lines. With respect to the first

\* “The usual rules for dividing [words into] syllables, are not only *arbitrary* but false and absurd. They contradict the very definition of a syllable given by the authors themselves. \* \* \* A syllable in pronunciation is an *indivisible* thing; and strange as it may appear, what is *indivisible* in utterance is *divided* in writing: when the very purpose of dividing words into syllables in writing, is to lead the learner to a just pronunciation.”—*Webster’s Improved Gram.*, p. 156; *Philosophical Gram.*, 221.

of these objects, Walker observes, “When a child has made certain advances in reading, but is ignorant of the sound of many of the longer words, it may not be improper to lay down the common general rule to him, that a consonant between two vowels must go to the latter, and that two consonants coming together must be divided. *Farther than this it would be absurd to go with a child.*”—*Walker’s Principles*, No. 539. Yet, as a caution be it recorded, that, in 1833, an itinerant lecturer from the South, who made it his business to teach what he calls in his title-page, “An *Abridgment* of Walker’s Rules on the Sounds of the Letters,”—an *Abridgement*, which, he says in his preface, “will be found to contain, it is believed, all the important rules that are established by Walker, and to carry his principles *farther* than he himself has *done*”—befooled the Legislature of Massachusetts, the School Committee and Common Council of Boston, the professor of elocution at Harvard University, and many other equally wise men of the east, into the notion that English pronunciation could be conveniently taught to children, in “four or five days,” by means of some three or four hundred rules of which the following is a specimen: “RULE 282. When a single consonant is preceded by a vowel under the preantepenultimate accent, and is followed by a vowel that is succeeded by a consonant, it belongs to the accented vowel.”—*Mulkey’s Abridgement of Walker’s Rules*, p. 34.

OBS. 3.—A grosser specimen of literary quackery, than is the publication which I have just quoted, can scarcely be found in the world of letters. It censures “the principles laid down and illustrated by Walker,” as “so elaborate and so verbose as to be wearisome to the scholar and useless to the child;” and yet declares them to be, “for the most part, the true rules of pronunciation, according to the analogy of the language.”—*Mulkey’s Preface*, p. 3. It professes to be an abridgement and simplification of those principles, especially adapted to the wants and capacities of children; and, at the same time, imposes upon the memory of the young learner twenty-nine rules for syllabication, similar to that which I have quoted above; whereas Walker himself, with all his verbosity, expressly declares it “*absurd*,” to offer more than one or two, and those of the very simplest character. It is to be observed that the author teaches nothing but the elements of reading; nothing but the sounds of letters and syllables; nothing but a few simple fractions of the great science of grammar: and, for this purpose, he would conduct the learner through the following particulars, and have him remember them all: 1. *Fifteen distinctions* respecting the “classification and organic formation of the letters.” 2. *Sixty-three rules* for “the sounds of the vowels, according to their relative positions.” 3. *Sixty-four explanations* of “the different sounds of the diphthongs.” 4. *Eighty-nine rules* for “the sounds of the consonants, according to position.” 5. *Twenty-three heads*, embracing a hundred and fifty-six principles of accent. 6. *Twenty-nine “rules* for dividing words into syllables.” 7. *Thirty-three “additional principles;*” which are thrown together promiscuously, because he could not class them. 8. *Fifty-two pages* of “irregular Words,” forming particular exceptions to the foregoing rules. 9. *Twenty-eight pages* of notes extracted from Walker’s Dictionary, and very prettily called “The Beauties of Walker.” All this is Walker simplified for children!

OBS. 4.—Such is a brief sketch of Mulkey’s system of orthoëpy; a work in which “he claims to have devised what has heretofore been a *desideratum*—a mode by which children in our common schools may be taught *the rules* for the pronunciation of their mother tongue.”—*Preface*, p. 4. The faults of the book are so exceedingly numerous, that to point them out, would be more toil, than to write an accurate volume of twice the size. And is it possible, that a system like this could find patronage in the metropolis of New England, in that proud centre of arts and sciences, and in the proudest halls of learning and of legislation? Examine the gentleman’s credentials, and take your choice between the

adoption of his plan, as a great improvement in the management of syllables, and the certain conclusion that great men may be greatly duped respecting them. Unless the public has been imposed upon by a worse fraud than mere literary quackery, the authorities I have mentioned did extensively patronize the scheme; and the Common Council of that learned city did order, November 14th, 1833, "That the School Committee be and they are hereby authorized to employ Mr. William Mulkey to give a course of Lectures on Orthoëpy *to the several instructors of the public schools*, and that the sum of five hundred dollars is hereby appropriated for that purpose, and that the same amount be withdrawn from the reserved fund."—See *Mulkey's Circular*.

OBS. 5.—Pronunciation is best taught to children by means of a good spelling-book; a book in which the words are arranged according to their analogies, and divided according to their proper sounds. Vocabularies, dictionaries, and glossaries, may also be serviceable to those who are sufficiently advanced to learn how to use them. With regard to the first of the above named purposes of syllabication, I am almost ready to dissent even from the modest opinion of Walker himself; for ignorance can only guess at the pronunciation of words, till positive instruction comes in to give assurance; and it may be doubted whether even the simple rule or rules suggested by Walker would not about as often mislead the young reader as correct him. With regard to the second purpose, that of showing the derivation or composition of words, it is plain, that etymology, and not pronunciation, must here govern the division; and that it should go no further than to separate the constituent parts of each word; as, *ortho-graphy*, *theo-logy*. But when we divide for the third purpose, and intend to show what is the pronunciation of a word, we must, if possible, divide into such syllabic sounds as will exactly recompose the word, when put together again; as, *or-thog-ra-phy*, *the-ol-o-gy*. This being the most common purpose of syllabication, perhaps it would be well to give it a general preference; and adopt it whenever we can, not only in the composing of spelling-books and dictionaries, but also in the dividing of words at the ends of lines.

OBS. 6.—Dr. Lowth says, "The best and easiest rule, for dividing the syllables in spelling, is, to divide them as they are naturally divided in a right pronunciation; without regard to the derivation of words, or the possible combination of consonants at the beginning of a syllable."—*Lowth's Gram.*, p. 5. And Walker approves of the principle, with respect to the third purpose mentioned above: "This," says that celebrated orthoëpist, "is the method adopted by those who would convey the whole sound, by giving distinctly every part; and, when this is the object of syllabication, Dr. Lowth's rule is certainly to be followed."—*Walker's Principles*,—No. 541. But this rule, which no one can apply till he has found out the pronunciation, will not always be practicable where that is known, and perhaps not always expedient where it is practicable. For example: the words *colonel*, *venison*, *transition*, *propitious*, cannot be so divided as to exhibit their pronunciation; and, in such as *acid*, *magic*, *pacify*, *legible*, *liquidate*, it may not be best to follow the rule, because there is some reasonable objection to terminating the first syllables of these words with *c*, *g*, and *q*, especially at the end of a line. The rule for terminations may also interfere with this, called "Lowth's," as in *sizable*, *rising*, *dronish*.

OBS. 7.—For the dividing of words into syllables, I have given six rules, which are perhaps as many as will be useful. They are to be understood as general principles; and, as to the exceptions to be made in their application, or the settling of their conflicting claims to attention, these may be left to the judgement of each writer. The old principle of dividing by the eye, and not by the ear, I have rejected; and, with it, all but one of the five

rules which the old grammarians gave for the purpose. “The divisions of the letters into syllables, should, unquestionably, be the same in written, as in spoken language; otherwise the learner is misguided, and seduced by false representations into injurious errors.”—*Wilson’s Essay on Gram.*, p. 37. Through the influence of books in which the words are divided according to their sounds, the pronunciation of the language is daily becoming more and more uniform; and it may perhaps be reasonably hoped, that the general adoption of this method of syllabication, and a proper exposition of the occasional errors of ignorance, will one day obviate entirely the objection arising from the instability of the principle. For the old grammarians urged, that the scholar who had learned their rules should “strictly conform to them; and that he should industriously avoid *that random Method of dividing by the Ear*, which is subject to mere jumble, as it must be continually fluctuating according to the various Dialects of different Countries.”—*British Grammar*, p. 47.

OBS. 8.—The important exercise of oral spelling is often very absurdly conducted. In many of our schools, it may be observed that the teacher, in giving out the words to be spelled, is not always careful to utter them with what he knows to be their true sounds, but frequently accommodates his pronunciation to the known or supposed ignorance of the scholar; and the latter is still more frequently allowed to hurry through the process, without putting the syllables together as he proceeds; and, sometimes, without forming or distinguishing the syllables at all. Merely to pronounce a word and then name its letters, is an exceedingly imperfect mode of spelling; a mode in which far more is lost in respect to accuracy of speech, than is gained in respect to time. The syllables should not only be distinctly formed and pronounced, but pronounced as they are heard in the whole word; and each should be successively added to the preceding syllables, till the whole sound is formed by the reunion of all its parts. For example: *divisibility*. The scholar should say, “Dee I, de; Vee I Ess, viz, de-viz; I, de-viz-e; Bee I Ell, bil, de-viz-e-bil; I, de-viz-e-bil-e; Tee Wy, te, de-viz-e-bil-e-te.” Again: *chicanery*. “Cee Aitch I, she; Cee A, ka, she-ka; En E Ar, nur, she-ka-nur; Wy, she-ka-nur-e.” One of the chief advantages of oral spelling, is its tendency to promote accuracy of pronunciation; and this end it will reach, in proportion to the care and skill with which it is conducted. But oral spelling should not be relied on as the sole means of teaching orthography. It will not be found sufficient. The method of giving out words for practical spelling on slates or paper, or of reading something which is to be written again by the learner, is much to be commended, as a means of exercising those scholars who are so far advanced as to write legibly. This is called, in the schools, *dictation*.

## IMPROPRIETIES FOR CORRECTION.

### ERRORS IN SYLLABICATION.

#### LESSON I.—CONSONANTS.

1. Correct the division of the following words of two syllables: “ci-vil, co-lour, co-py, da-mask, do-zen, e-ver, fea-ther, ga-ther, hea-ven, hea-vy, ho-ney, le-mon, li-nen, mea-dow, mo-ney, ne-ver, o-live, o-range, o-ther, phea-sant, plea-sant, pu-nish, ra-ther, rea-dy, ri-ver, ro-bin, scho-lar, sho-vel, sto-mach, ti-mid, whe-ther.”—*Murray’s Spelling-Book*, N. Y., 1819, p. 43-50.

[FORMULE.—Not proper, because the *v* in *ci-vil*, the *l* in *co-lour*, the *p* in *co-py*, &c., are written with the following vowel, but spoken with that which precedes. But, according to Rule 1st, “Consonants should generally be joined to the vowels or diphthongs which they

modify in utterance.” Therefore, these words should be divided thus: *civ-il*, *col-our*, *cop-y*, &c.]

2. Correct the division of the following words of three syllables: “be-ne-fit, ca-bi-net, ca-nis-ter, ca-ta-logue, cha-rac-ter, cha-ri-ty, co-vet-ous, di-li-gence, di-mi-ty, e-le-phant, e-vi-dent, e-ver-green, fri-vo-lous, ga-ther-ing, ge-ne-rous, go-vern-ess, go-vern-or, ho-nes-ty, ka-len-dar, la-ven-der, le-ve-ret, li-be-ral, me-mo-ry, mi-nis-ter, mo-dest-ly, no-vel-ty, no-bo-dy, pa-ra-dise, po-ver-ty, pre-sent-ly, pro-vi-dence, pro-per-ly, pri-son-er, ra-ven-ous, sa-tis-fy, se-ve-ral, se-pa-rate, tra-vel-ler, va-ga-bond;—con-si-der, con-ti-nue, de-li-ver, dis-co-ver, dis-fi-gure, dis-ho-nest, dis-tri-bute, in-ha-bit, me-cha-nic, what-e-ver;—re-com-mend, re-fu-gee, re-pri-mand.”—*Murray: ib.*, p. 67-83.

3. Correct the division of the following words of four syllables: “ca-ter-pil-lar, cha-ri-ta-ble, di-li-gent-ly, mi-se-ra-ble, pro-fit-a-ble, to-le-ra-ble;—be-ne-vo-lent, con-si-der-ate, di-mi-nu-tive, ex-pe-ri-ment, ex-tra-va-gant, in-ha-bi-tant, no-bi-li-ty, par-ti-cu-lar, pros-pe-ri-ty, ri-di-cu-lous, sin-ce-ri-ty;—de-mon-stra-tion, e-du-ca-tion, e-mu-la-tion, e-pi-de-mic, ma-le-fac-tor, ma-nu-fac-ture, me-mo-ran-dum, mo-de-ra-tor, pa-ra-ly-tic, pe-ni-ten-tial, re-sig-na-tion, sa-tis-fac-tion, se-mi-co-lon.”—*Murray: ib.*, p. 84-87.

4. Correct the division of the following words of five syllables: “a-bo-mi-na-ble, a-po-the-ca-ry, con-sid-e-ra-ble, ex-pla-na-to-ry, pre-pa-ra-to-ry;—a-ca-de-mi-cal, cu-ri-o-si-ty, ge-o-gra-phi-cal, ma-nu-fac-to-ry, sa-tis-fac-to-ry, me-ri-to-ri-ous;—cha-rac-te-ri-s-tic, e-pi-gram-ma-tic, ex-pe-ri-ment-al, po-ly-syl-la-ble, con-sid-e-ra-tion.”—*Murray: ib.*, p. 87-89.

5. Correct the division of the following proper names: “He-len, Leo-nard, Phi-lip, Ro-bert, Ho-race, Tho-mas;—Ca-ro-line, Ca-tha-rine, Da-ni-el, De-bo-rah, Do-ro-thy, Fre-de-rick, I-sa-bel, Jo-na-than, Ly-di-a, Ni-cho-las, O-li-ver, Sa-mu-el, Si-me-on, So-lo-mon, Ti-mo-thy, Va-len-tine;—A-me-ri-ca, Bar-tho-lo-mew, E-li-za-beth, Na-tha-ni-el, Pe-ne-lo-pe, The-o-phi-lus.”—*Murray: ib.*, p. 98-101.

## LESSON II.—MIXED.

1. Correct the division of the following words, by Rule 1st: “cap-rice, es-teem, dis-es-teem, ob-lige;—az-ure, mat-ron, pat-ron, phal-anx, sir-en, trait-or, trench-er, barb-er, burn-ish, garn-ish, tarn-ish, varn-ish, mark-et, musk-et, pamph-let;—brave-ry, knave-ry, siave-ry, eve-ning, scene-ry, bribe-ry, nice-ty, chi-cane-ry, ma-chine-ry, im-age-ry;—as-y-lum, hor-i-zon,—fi-nan-cier, he-ro-ism,—sar-don-yx, scur-ri-lous,—com-e-di-an, post-e-rior.”—*Webster’s Spelling-Books*.

2. Correct the division of the following words by Rule 2d: “oy-er, fol-io, gen-ial, gen-ius, jun-ior, sa-tiate, vi-tiate;—am-bro-sia, cha-mel-ion, par-hel-ion, con-ven-ient, in-gen-ious, om-nis-cience, pe-cul-iar, so-cia-ble, par-tial-i-ty, pe-cun-ia-ry;—an-nun-ciate, e-nun-ciate, ap-pre-ciate, as-so-ciate, ex-pa-tiate, in-gra-tiate, in-i-tiate, li-cen-tiate, ne-go-tiate, no-vi-ciate, of-fi-ciate, pro-pi-tiate, sub-stan-tiate.”—*Webster: Old Spelling-Book*, 86-91; *New*, 121-128.

3. Correct the division of the following words by Rule 3d: “dres-ser, has-ty, pas-try, sei-zure, rol-ler, jes-ter, wea-ver, vam-per, han-dy, dros-sy, glos-sy, mo-ver, mo-ving, oo-

zy, ful-ler, trus-ty, weigh-ty, noi-sy, drow-sy, swar-thy.”—*Cobb’s Standard Spelling-Book*. Again: “eas-tern, full-y, pull-et, rill-et, scan-ty, nee-dy.”—*Webster*.

4. Correct the division of the following words by Rule 4th: “aw-ry,”—*Webster’s Old Book*, 52; “ath-wart,”—*Ib.*, 93; “pros-pect-ive,”—*Ib.*, 66; “pa-renth-e-sis,”—*Ib.*, 93; “res-ist-i-bil-ity,”—*Webster’s New Book*, 93; “hem-is-pher-ic,”—*Ib.*, 130; “mo-nos-tich, he-mis-tick,” \*—*Walker’s Dict.*, 8vo; *Cobb*, 33; “tow-ards,”—*Cobb*, 48.

5. Correct the division of the following words by Rule 5th: “E’n-gland,”—*Murray’s Spelling-Book*, p. 100; “a-no-ther,”—*Ib.*, 71; “a-noth-er,”—*Emerson*, 76; “Be-thes-da, Beth-a-ba-ra,”—*Webster*, 141; *Cobb*, 159.

### LESSON III.—MIXED.

1. Correct the division of the following words, according to their derivation: “ben-der, bles-sing, bras-sy, chaf-fy, chan-ter, clas-per, craf-ty, cur-dy, fen-der, fil-my, fus-ty, glas-sy, graf-ter, gras-sy, gus-ty, ban-ded, mas-sy, mus-ky, rus-ty, swel-ling, tel-ler, tes-ted, thrif-ty, ves-ture.”—*Cobb’s Standard Spelling-Book*.

2. Correct the division of the following words, so as to give no wrong notion of their derivation and meaning: “barb-er, burn-ish, brisk-et, cank-er, chart-er, cuck-oo, furn-ish, garn-ish, guil-ty, hank-er, lust-y, port-al, tarn-ish, test-ate, test-y, trait-or, treat-y, varn-ish, vest-al, di-urn-al, e-tern-al, in-fern-al, in-tern-al, ma-tern-al, noc-turn-al, pa-tern-al.”—*Webster’s Elementary Spelling-Book*.

3. Correct the division of the following words, so as to convey no wrong idea of their pronunciation: “ar-mo-ry, ar-te-ry, butch-er-y, cook-e-ry, eb-o-ny, em-e-ry, ev-e-ry, fel-o-ny, fop-pe-ry, flip-pe-ry, gal-le-ry, his-to-ry, liv-e-ry, lot-te-ry, mock-e-ry, mys-te-ry, nun-ne-ry, or-re-ry, pil-lo-ry, quack-e-ry, sor-ce-ry, witch-e-ry.”—*Ib.*, 41-42.

4. Correct the division of the following words, and give to *n* before *k* the sound of *ng*: “ank-le, bask-et, blank-et, buck-le, cack-le, crank-le, crink-le, east-er, fick-le, freck-le, knuck-le, mark-et, monk-ey, port-ress, pick-le, poult-ice, punch-eon, qua-drant, qua-drate, squa-dron, rank-le, shack-le, sprink-le, tink-le, twink-le, wrink-le.”—*Cobb’s Standard Spelling-Book*.

5. Correct the division of the following words, with a proper regard to Rules 1st and 3d: “a-scribe, bland-ish, bran-chy, clou-dy, dus-ty, drea-ry, eve-ning, faul-ty, fil-thy, fros-ty, gau-dy, gloo-my, heal-thy, hear-ken, hear-ty, hoa-ry, lea-ky, loung-er, mar-shy, migh-ty, mil-ky, naugh-ty, pas-sing, pit-cher, rea-dy, roc-ky, spee-dy, stea-dy, stor-my, thirs-ty, thor-ny, trus-ty, ves-try, wes-tern, weal-thy.”—*Emerson’s Spelling-Book*, 17-44.

## CHAPTER III.—OF WORDS.

---

\* This word, like *distich* and *monostich*, is from the Greek *stichos*, a verse; and is improperly spelled by Walker with a final *k*. It should be *hemistich*, with the accent on the first syllable. See *Webster*, *Scott*, *Perry*, *Worcester*, and others.

A *Word* is one or more syllables spoken or written as the sign of some idea, or of some manner of thought. Words are distinguished as *primitive* or *derivative*, and as *simple* or *compound*. The former division is called their *species*; the latter, their *figure*.

A *primitive* word is one that is not formed from any simpler word in the language; as, *harm*, *great*, *connect*.

A *derivative* word is one that is formed from some simpler word in the language; as, *harmless*, *greatly*, *connected*, *disconnect*, *unconnected*.

A *simple* word is one that is not compounded, not composed of other words; as, *watch*, *man*, *house*, *tower*, *never*, *the*, *less*.

A *compound* word is one that is composed of two or more simple words; as, *watchman*, *watchhouse*, *watchtower*, *nevertheless*.

Permanent compounds are consolidated; as, *bookseller*, *schoolmaster*; others, which may be called temporary compounds, are formed by the hyphen; as, *good-natured*, *negro-merchant*.

### *RULES FOR THE FIGURE OF WORDS.*

#### RULE I.—COMPOUNDS.

Words regularly or analogically united, and commonly known as forming a compound, should never be needlessly broken apart. Thus, *steamboat*, *railroad*, *red-hot*, *well-being*, *new-coined*, are preferable to the phrases, *steam boat*, *rail road*, *red hot*, *well being*, *new coined*; and *toward us* is better than the old phrase, *to us ward*.

#### RULE II.—SIMPLES.

When the simple words would only form a regular phrase, of the same meaning, the compounding of any of them ought to be avoided. Thus, the compound *instead* is not to be commended, because the simple phrase, *in stead of*, is exactly like the other phrases, *in lieu of*, *in place of*, *in room of*, in which we write no compound.

#### RULE III.—THE SENSE.

Words otherwise liable to be misunderstood, must be joined together or written separately, as the sense and construction may happen to require. Thus, a *glass house* is a house made of glass, but a *glasshouse* is a house in which glass is made; so a *negro merchant* is a coloured trader, but a *negro-merchant* is a man who buys and sells negroes.

#### RULE IV.—ELLIPSES.

When two or more compounds are connected in one sentence, none of them should be split to make an ellipsis of half a word. Thus, “*six or seventeen*” should not be said for “*sixteen or seventeen*,” nor ought we to say, “*calf, goat, and sheepskins*” for “*calfskins, goatskins, and sheepskins*” In the latter instance, however, it might be right to separate all the words; as in the phrase, “*soup, coffee, and tea houses*.”—*Liberator*, x, 40.

## RULE V.—THE HYPHEN.

When the parts of a compound do not fully coalesce, as *to-day*, *to-night*, *to-morrow*; or when each retains its original accent, so that the compound has more than one, or one that is movable, as *first-born*, *hanger-on*, *laughter-loving*, *garlic-eater*, *butterfly-shell*, the hyphen should be inserted between them.

## RULE VI.—NO HYPHEN.

When a compound has but one accented syllable in pronunciation, as *watchword*, *statesman*, *gentleman*, and the parts are such as admit of a complete coalescence, no hyphen should be inserted between them. Churchill, after much attention to this subject, writes thus: "The practical instruction of the *countinghouse* imparts a more thorough knowledge of *bookkeeping*, than all the fictitious transactions of a mere *schoolbook*, however carefully constructed to suit particular purposes."—*New Gram.*, p. vii. But *counting-house*, having more stress on the last syllable than on the middle one, is usually written with the hyphen; and *book-keeping* and *school-book*, though they may not need it, are oftener so formed than otherwise.

## OBSERVATIONS.

OBS. 1.—Words are the least parts of significant language; that is, of language significant in each part; for, to syllables, taken merely as syllables, no meaning belongs. But, to a word, signification of some sort or other, is essential; there can be no word without it; for a sign or symbol must needs represent or signify something. And as I cannot suppose words to represent external things, I have said "A *Word* is one or more syllables spoken or written as the sign of some *idea*." But of *what* ideas are the words of our language significant? Are we to say, "Of *all* ideas;" and to recognize as an English word every syllable, or combination of syllables, to which we know a meaning is attached? No. For this, in the first place, would confound one language with an other; and destroy a distinction which must ever be practically recognized, till all men shall again speak one language. In the next place, it would compel us to embrace among our words an infinitude of terms that are significant only of *local* ideas, such as men any where or at any time may have had concerning any of the individuals they have known, whether persons, places, or things. But, however important they may be in the eyes of men, the names of particular persons, places, or things, because they convey only particular ideas, do not properly belong to what we call *our language*. Lexicographers do not collect and define proper names, because they are beyond the limits of their art, and can be explained only from history. I do not say that proper names are to be excluded from grammar; but I would show wherein consists the superiority of general terms over these. For if our common words did not differ essentially from proper names, we could demonstrate nothing in science: we could not frame from them any general or affirmative proposition at all; because all our terms would be particular, and not general; and because every individual thing in nature must necessarily be for ever itself only, and not an other.

OBS. 2.—Our common words, then, are the symbols neither of external particulars, nor merely of the sensible ideas which external particulars excite in our minds, but mainly of those general or universal ideas which belong rather to the intellect than to the senses. For intellection differs from sensation, somewhat as the understanding of a man differs from the perceptive faculty of a brute; and language, being framed for the reciprocal commerce of human minds, whose perceptions include both, is made to consist of signs of ideas both general and particular, yet without placing them on equal ground. Our general

ideas—that is, our ideas conceived as common to many individuals, existing in any part of time, past, present, or future—such, for example, as belong to the words *man*, *horse*, *tree*, *cedar*, *wave*, *motion*, *strength*, *resist*—such ideas, I say, constitute that most excellent significance which belongs to words primarily, essentially, and immediately; whereas, our particular ideas, such as are conceived only of individual objects, which are infinite in number and ever fleeting, constitute a significance which belongs to language only secondarily, accidentally, and mediately. If we express the latter at all, we do it either by proper names, of which but very few ever become generally known, or by means of certain changeable limitations which are added to our general terms; whereby language, as Harris observes, “without wandering into infinitude, contrives how to denote things infinite.”—*Hermes*, p. 345. The particular manner in which this is done, I shall show hereafter, in Etymology, when I come to treat of articles and definitives.

OBS. 3.—If we examine the structure of proper names, we shall find that most of them are compounds, the parts of which have, in very many instances, some general signification. Now a complete phrase commonly conveys some particular notion or conception of the mind; but, in this case, the signification of the general terms is restricted by the other words which are added to them. Thus *smith* is a more general term than *goldsmith*; and *goldsmith* is more general than a *goldsmith*; a *goldsmith*, than the *goldsmith*; the *goldsmith*, than one *Goldsmith*; one *Goldsmith*, than Mr. *Goldsmith*; Mr. *Goldsmith*, than *Oliver Goldsmith*. Thus we see that the simplest mode of designating particular persons or objects, is that of giving them *proper names*; but proper names must needs be so written, that they may be known as proper names, and not be mistaken for common terms. I have before observed, that we have some names which are both proper and common; and that these should be written with capitals, and should form the plural regularly. It is surprising that the *Friends*, who are in some respects particularly scrupulous about language, should so generally have overlooked the necessity there is, of *compounding* their numerical names of the months and days, and writing them uniformly with capitals, as proper names. For proper names they certainly are, in every thing but the form, whenever they are used without the article, and without those other terms which render their general idea particular. And the compound form with a capital, is as necessary for *Firstday*, *Secondday*, *Thirdday*, &c., as for *Sunday*, *Monday*, *Tuesday*, &c. “The first day of the week,”—“The seventh day of the month,”—“The second month of summer,”—“The second month in the year,” &c., are good English phrases, in which any compounding of the terms, or any additional use of capitals, would be improper; but, for common use, these phrases are found too long and too artificial. We must have a less cumbersome mode of specifying the months of the year and the days of the week. What then? Shall we merely throw away the terms of particularity, and, without substituting in their place the form of proper names, apply general terms to particular thoughts, and insist on it that this is right? And is not this precisely what is done by those who reject as heathenish the ordinary names of the months and days, and write “*first day*,” for *Sunday*, in stead of “the first day of the week;” or “*second month*,” for *February*, in stead of “the second month in the year;” and so forth? This phraseology may perhaps be well understood by those to whom it is familiar, but still it is an abuse of language, because it is inconsistent with the common acceptation of the terms. Example: “The departure of a ship will take place *every sixth day* with punctuality.”—*Philadelphia Weekly Messenger*. The writer of this did not mean, “*every Friday*,” and it is absurd for the *Friends* so to understand it, or so to write, when that is what they mean.

OBS. 4.—In the ordinary business of life, it is generally desirable to express our meaning as briefly as possible; but legal phraseology is always full to the letter, and often redundant. Hence a merchant will write, “Nov. 24, 1837,” or, “11 mo. 24th, 1837;” but a conveyancer will have it, “On the twenty-fourth day of November, one thousand eight hundred and thirty-seven;”—or, perhaps, “On the twenty-fourth day of the eleventh month, in the year of our Lord one thousand eight hundred and thirty-seven.” Accordingly we find that, in common daily use, all the names of the months, except *March*, *May*, *June*, and *July*, are abbreviated; thus, *Jan.*, *Feb.*, *Apr.*, *Aug.*, *Sept.*, *Oct.*, *Nov.*, *Dec.* And sometimes even the Arabic number of the year is made yet shorter; as ‘37 for 1837; or 1835-6-7, for 1835, 1836, and 1837. In like manner, in constructing tables of time, we sometimes denote the days of the week by the simple initials of their names; as, S. for Sunday, M. for Monday, &c. But, for facility of abbreviation, the numerical names, whether of the months or of the days, are perhaps still more convenient. For, if we please, we may put the simple Arabic figures for them; though it is better to add *d.* for *day*, and *mo.* for *month*: as, 1 d., 2 d., 3 d., &c.;—1 mo., 2 mo., 3 mo., &c.:—or more compactly thus: 1d., 2d., 3d., &c.;—1mo., 2mo., 3mo., &c. But, take which mode of naming we will, our ordinary expression of these things should be in neither extreme, but should avoid alike too great brevity and too great prolixity; and, therefore, it is best to make it a general rule in our literary compositions, to use the full form of proper names for the months and days, and to denote the years by Arabic figures written in full.

OBS. 5.—In considering the nature of words, I was once a little puzzled with a curious speculation, if I may not term it an important inquiry, concerning the *principle of their identity*. We often speak of “*the same words*,” and of “*different words*,” but wherein does the sameness or the difference of words consist? Not in their pronunciation; for the same word may be differently pronounced; as, *pā’ron* or *pā’tron*, *mā’ron* or *mā’tron*. Not in their orthography; for the same word may be differently spelled; as, *favour* or *favor*, *music* or *musick*, *connexion* or *connection*. Not in their form of presentation; for the same word may be either spoken or written; and speech and writing present what we call *the same words*, in two ways totally different. Not in their meaning; for the same word may have different meanings, and different words may signify precisely the same thing. This sameness of words, then, must consist in something which is to be reconciled with great diversity. Yet every word is itself, and not an other: and every word must necessarily have some property peculiar to itself, by which it may be easily distinguished from every other. Were it not so, language would be unintelligible. But it *is* so; and, therefore, to mistake one word for an other, is universally thought to betray great ignorance or great negligence, though such mistakes are by no means of uncommon occurrence. But that the question about the identity of words is not a very easy one, may appear from the fact, that the learned often disagree about it in practice; as when one grammarian will have *an* and *a* to be two words, and an other will affirm them to be only different forms of one and the same word.

OBS. 6.—Let us see, then, if amidst all this diversity we can find that principle of sameness, by which a dispute of this kind ought to be settled. Now, although different words do generally differ in orthography, in pronunciation, and in meaning, so that an entire sameness implies one orthography, one pronunciation, and one meaning; yet some diversity is allowed in each of these respects, so that a sign differing from an other only in one, is not therefore a different word, or a sign agreeing with an other only in one, is not therefore the same word. It follows thence, that the principle of verbal identity, the principle which distinguishes every word from every other, lies in neither extreme: it lies in

a narrower compass than in all three, and yet not singly in any one, but jointly in any two. So that signs differing in any two of these characteristics of a word, are different words; and signs agreeing in any two, are the same word. Consequently, if to any difference either of spelling or of sound we add a difference of signification everybody will immediately say, that we speak or write different words, and not the same: thus *dear*, beloved, and *deer*, an animal, are two such words as no one would think to be the same; and, in like manner, *use*, advantage, and *use*, to employ, will readily be called different words. Upon this principle, *an* and *a* are different words; yet, in conformity to old usage, and because the latter is in fact but an abridgement of the former, I have always treated them as one and the same article, though I have nowhere expressly called them the same word. But, to establish the principle above named, which appears to me the only one on which any such question can be resolved, or the identity of words be fixed at all, we must assume that every word has one right pronunciation, and only one; one just orthography, and only one; and some proper signification, which, though perhaps not always the same, is always a part of its essence. For when two words of different meaning are spelled or pronounced alike, not to maintain the second point of difference, against the double orthography or the double pronunciation of either, is to confound their identity at once, and to prove by the rule that two different words are one and the same, by first absurdly making them so.

OBS. 7.—In no part of grammar is usage more unsettled and variable than in that which relates to the *figure of words*. It is a point of which modern writers have taken but very little notice. Lily, and other ancient Latin grammarians, reckoned both species and figure among the grammatical accidents of nearly all the different parts of speech; and accordingly noticed them, in their Etymology, as things worthy to be thus made distinct topics, like numbers, genders, cases, moods, tenses, &c. But the manner of compounding words in Latin, and also in Greek, is always by consolidation. No use appears to have been made of the *hyphen*, in joining the words of those languages, though the name of the mark is a Greek compound, meaning “*under one*.” The compounding of words is one principal means of increasing their number; and the arbitrariness with which that is done or neglected in English, is sufficient of itself to make the number of our words a matter of great uncertainty. Such terms, however, having the advantage of explaining themselves in a much greater degree than others, have little need of definition; and when new things are formed, it is very natural and proper to give them new names of this sort: as, *steamboat*, *railroad*. The propriety or impropriety of these additions to the language, is not to be determined by dictionaries; for that must be settled by usage before any lexicographer will insert them. And so numerous, after all, are the discrepancies found in our best dictionaries, that many a word may have its day and grow obsolete, before a nation can learn from them the right way of spelling it; and many a fashionable thing may go entirely out of use, before a man can thus determine how to name it. *Railroads* are of so recent invention that I find the word in only one dictionary; and that one is wrong, in giving the word a hyphen, while half our printers are wrong, in keeping the words separate because *Johnson* did not compound them. But is it not more important, to know whether we ought to write *railroad*, or *rail-road*, or *rail road*, which we cannot learn from any of our dictionaries, than to find out whether we ought to write *rocklo*, or *roquelo*, or *roquelaur*, or *roquelaure*, which, in some form or other, is found in them all? The duke of Roquelaure is now forgotten, and his cloak is out of fashion.

OBS. 8.—No regular phrase, as I have taught in the second rule above, should be needlessly converted into a compound word, either by tacking its parts together with the hyphen, or by uniting them without a hyphen; for, in general, a phrase is one thing, and a

word is an other: and they ought to be kept as distinct as possible.\* But, when a whole phrase takes the relation of an *adjective*, the words must be compounded, and the hyphen becomes necessary; as, “An inexpressibly apt *bottle-of-small-beer* comparison.”—*Peter Pindar*. The occasions for the compounding of words, are in general sufficiently plain, to any one who knows what is intended to be said; but, as we compound words, sometimes with the hyphen, and sometimes without, there is no small difficulty in ascertaining when to use this mark, and when to omit it. “Some settled rule for the use of the hyphen on these occasions, is much wanted. Modern printers have a strange predilection for it; using it on almost every possible occasion. Mr. L. Murray, who has only three lines on the subject, seems inclined to countenance this practice; which is, no doubt, convenient enough for those who do not like trouble. His words are: ‘A Hyphen, marked thus - is employed in connecting compounded words: as, Lap-dog, tea-pot, pre-existence, self-love, to-morrow, mother-in-law.’ Of his six examples, Johnson, our only acknowledged standard, gives the first and third without any separation between the syllables, *lapdog*, *preexistence*; his second and fifth as two distinct words each, *tea pot*, *to morrow*; and his sixth as three words, *mother in law*: so that only his fourth has the sanction of the lexicographer. There certainly can be no more reason for putting a hyphen after the common prefixes, than before the common affixes, *ness*, *ly*, and the rest.”—*Churchill's Gram.*, p. 374.

OBS. 9.—Again: “While it would be absurd, to sacrifice the established practice of all good authors to the ignorance of such readers [as could possibly mistake for a diphthong the two contiguous vowels in such words as *preexistence*, *cooperate*, and *reenter*]; it would unquestionably be advantageous, to have some principle to guide us in that labyrinth of words, in which the hyphen appears to have been admitted or rejected arbitrarily, or at hap-hazard. Thus, though we find in Johnson, *alms-basket*, *alms-giver*, with the hyphen; we have *almsdeed*, *alms-house*, *almsman*, without: and many similar examples of an unsettled practice might be adduced, sufficient to fill several pages. In this perplexity, is not the pronunciation of the words the best guide? In the English language, every word of more than one syllable is marked by an accent on some particular syllable. Some very long words indeed admit a secondary accent on *another* syllable; but still this is much inferior, and leaves one leading accent prominent: as in *expos'tulatory*. Accordingly, when a compound has but one accented syllable in pronunciation, as *night'cap*, *bed'stead*, *broad'sword*, the two words have coalesced completely into one, and no hyphen should be admitted. On the other hand, when each of the radical words has an accent, as *Chris'tian-name*, *broad'-shoul'dered*, I think the hyphen should be used. *Good'-na'tured* is a compound epithet with two accents, and therefore requires the hyphen: in *good nature*, *good will*, and similar expressions, *good* is used simply as an adjective, and of course should remain distinct from the noun. Thus, too, when a noun is used adjectively, it should remain separate from the noun it modifies; as, a *gold ring*, a *silver buckle*. When two numerals are employed to express a number, without a conjunction between them, it is usual to connect them by a hyphen; as, *twenty-five*, *eighty-four*: but when the conjunction is inserted, the hyphen is as improper as it would be between other words connected by the conjunction. This, however, is a common abuse; and we often meet with

---

\* According to Aristotle, the compounding of terms, or the writing of them as separate words, must needs be a matter of great importance to the sense. For he will have the parts of a compound noun, or of a compound verb, to be, like other syllables, destitute of any distinct signification in themselves, whatever may be their meaning when written separately. See his definitions of the parts of speech, in his *Poetics*, Chapter 20th of the Greek; or Goulston's Version in Latin, Chapter 12th.

*five-&-twenty*, *six-&-thirty*, and the like.”—*Ib.*, p. 376. Thus far Churchill: who appears to me, however, too hasty about the hyphen in compound numerals. For we write *one hundred*, *two hundred*, *three thousand*, &c., without either hyphen or conjunction; and as *five-and-twenty* is equivalent to *twenty-five*, and virtually but one word, the hyphen, if not absolutely necessary to the sense, is certainly not so very improper as he alleges. “*Christian name*” is as often written without the hyphen as with it, and perhaps as accurately.

### IMPROPRIETIES FOR CORRECTION.

#### ERRORS IN THE FIGURE, OR FORM, OF WORDS.

##### UNDER RULE I.—OF COMPOUNDS.

“Professing to imitate Timon, the man hater.”—*Goldsmith’s Rome*, p. 161.

[FORMULE.—Not proper, because the compound term *manhater* is here made two words. But, according to Rule 1st, “Words regularly or analogically united, and commonly known as forming a compound, should never be needlessly broken apart.” Therefore, *manhater* should be written as one word.]

“Men load hay with a pitch fork.”—*Webster’s New Spelling-Book*, p. 40. “A pear tree grows from the seed of a pear.”—*Ib.*, p. 33. “A tooth brush is good to brush your teeth.”—*Ib.*, p. 85. “The mail is opened at the post office.”—*Ib.*, p. 151. “The error seems to me two fold.”—*Sanborn’s Gram.*, p. 230. “To pre-engage means to engage before hand.”—*Webster’s New Spelling-Book*, p. 82. “It is a mean act to deface the figures on a mile stone.”—*Ib.*, p. 88. “A grange is a farm and farm house.”—*Ib.*, p. 118. “It is no more right to steal apples or water melons, than money.”—*Ib.*, p. 118. “The awl is a tool used by shoemakers, and harness makers.”—*Ib.*, p. 150. “Twenty five cents are equal to one quarter of a dollar.”—*Ib.*, p. 107. “The blowing up of the Fulton at New York was a terrible disaster.”—*Ib.*, p. 54. “The elders also, and the bringers up of the children, sent to Jehu.”—SCOTT: 2 *Kings*, x, 5. “Not with eye service, as men pleasers.”—*Bickersteth, on Prayer*, p. 64. “A good natured and equitable construction of cases.”—*Ash’s Gram.*, p. 138. “And purify your hearts, ye double minded.”—*Gurney’s Portable Evidences*, p. 115. “It is a mean spirited action to steal; i. e. to steal is a mean spirited action.”—*Grammar of Alex. Murray, the schoolmaster*, p. 124. “There is, indeed, one form of orthography which is a kin to the subjunctive mood of the Latin tongue.”—*Booth’s Introd. to Dict.*, p. 71. “To bring him into nearer connexion with real and everyday life.”—*Philological Museum*, Vol. i, p. 459. “The common place, stale declamation of its revilers would be silenced.”—*Ib.*, i, 494. “She formed a very singular and unheard of project.”—*Goldsmith’s Rome*, p. 160. “He had many vigilant, though feeble talented, and mean spirited enemies.”—ROBERTS VAUX: *The Friend*, Vol. vii, p. 74. “These old fashioned people would level our psalmody,” &c.—*Music of Nature*, p. 292. “This slow shifting scenery in the theatre of harmony.”—*Ib.*, p. 398. “So we are assured from Scripture it self.”—*Harris’s Hermes*, p. 300. “The mind, being disheartened, then betakes its self to trifling.”—*R. Johnson’s Pref. to Gram. Com.* “Whose soever sins ye remit, they are remitted unto them.”—*Beacon*, p. 115: SCOTT, ALGER, FRIENDS: *John*, xx, 23. “Tarry we our selves how we will.”—*Walker’s English Particles*, p. 161. “Manage your credit so, that you need neither swear your self, nor want a voucher.”—*Collier’s Antoninus*, p. 33. “Whereas song never conveys any of the above named sentiments.”—*Rush, on the Voice*, p. 424. “I go on horse back.”—*Guy’s Gram.*, p. 54. “This requires *purity*, in opposition to barbarous, obsolete, or new coined words.”—*Adam’s Gram.*, p. 242; *Gould’s*, 234. “May the Plough share shine.”—*White’s Eng. Verb*, p. 161. “Which way ever we consider it.”—*Locke, on Ed.*, p. 83.

“Where e’er the silent (e) a Place obtains,  
The Voice foregoing, Length and softness gains.”—*Brightland’s Gr.*, p. 15.

#### UNDER RULE II.—OF SIMPLES.

“It qualifies any of the four parts of speech abovenamed.”—*Kirkham’s Gram.*, p. 83.

[FORMULE.—Not proper, because *abovenamed* is here unnecessarily made a compound. But, according to Rule 2d, “When the simple words would only form a regular phrase, of the same meaning, the compounding of any of them ought to be avoided.” Therefore, *above* and *named* should here have been written as two words.]

“After awhile they put us out among the rude multitude.”—*Fox’s Journal*. Vol. i, p. 169. “It would be ashame, if your mind should falter and give in.”—*Collier’s Meditations of Antoninus*, p. 94. “They stared awhile in silence one upon another.”—*Rasselas*, p. 73. “After passion has for awhile exercised its tyrannical sway.”—*Murray’s Gram.*, ii, 135 and 267. “Though set within the same general-frame of intonation.”—*Rush, on the Voice*, p. 339. “Which do not carry any of the natural vocal-signs of expression.”—*Ib.*, p. 329. “The measurable constructive-powers of a few associable constituents.”—*Ib.*, p. 343. “Before each accented syllable or emphatic monosyllabic-word.”—*Ib.*, p. 364. “One should not think too favourably of oneself.”—See *Murray’s Gram.*, Vol. i, p. 154. “Know ye not your ownselfes, how that Jesus Christ is in you.”—*Barclay’s Works*, Vol. i, p. 355. “I judge not my ownself, for I know nothing of my ownself.”—*Wayland’s Moral Science*, p. 84. “Though they were in such a rage, I desired them to tarry awhile.”—*Josephus*, Vol. v, p. 179. “*A* instead of *an* is now used before words beginning with *a* long.”—*Murray’s Gram.*, p. 31. “John will have earned his wages the next new-year’s day.”—*Murray’s Gram.*, p. 82. “A new-year’s-gift is a present made on the first day of the year.”—See *Johnson, Walker, Webster, et al.* “When he sat on the throne, distributing new-year’s-gifts.”—STILLINGFLEET, in *Johnson’s Dict.* “St. Paul admonishes Timothy to refuse old-wives’- fables.”—*Author*. “The world, take it altogether, is but one.”—*Collier’s Antoninus*, B. vii, Sec. 9. “In writings of this stamp we must accept of sound instead of sense.”—*Murray’s Gram.*, p. 298. “A male-child, A female-child, Male-descendants, Female-descendants.”—*Goldsbury’s C. S. Gram.*, p. 13; *Rev. T. Smith’s Gram.*, p. 15. “Male-servants, Female-servants. Male-relations, Female-relations.”—*Felton’s Gram.*, p. 15.

“Reserved and cautious, with no partial aim,  
My muse e’er sought to blast another’s fame.”—*Lloyd*, p. 162.

#### UNDER RULE III.—THE SENSE.

“Our discriminations of this matter have been but four footed instincts.”—*Rush, on the Voice*, p. 291.

[FORMULE.—Not proper, because the term *four footed* is made two words, as if the instincts were four and footed. But, according to Rule 3d, “Words otherwise liable to be misunderstood, must be joined together, or written separately, as the sense and construction may happen to require.” Therefore, *four-footed*, as it here means *quadruped*, or *having four feet*, should be one word.]

“He is in the right, (says Clytus,) not to bear free born men at his table.”—*Goldsmith’s Greece*, Vol. ii, p. 128. “To the short seeing eye of man, the progress may appear little.”—*The Friend*, Vol. ix, p. 377. “Knowledge and virtue are, emphatically, the stepping stone to

individual distinction.”—*Town’s Analysis*, p. 5. “A tin peddler will sell tin vessels as he travels.”—*Webster’s New Spelling-Book*, p. 44. “The beams of a wood-house are held up by the posts and joists.”—*Ib.*, p. 39. “What you mean by *future tense adjective*, I can easily understand.”—*Tooke’s Diversions*, Vol. ii, p. 450. “The town has been for several days very well behaved.”—*Spectator*, No. 532. “A *rounce* is the handle of a printing press.”—*Webster’s Dict.*; also *El. Spelling-Book*, p. 118. “The phraseology we call *thee and thouing* is not in so common use with us, as the *tutoyant* among the French.”—*Walker’s Dict.*, *w. Thy*. “Hunting, and other out door sports, are generally pursued.”—*Balbi’s Geog.*, p. 227. “Come unto me, all ye that labour and are heavy laden.”—SCOTT, ALGER, FRIENDS: *Matt.*, xi, 28. “God so loved the world, that he gave his only begotten Son to save it.”—*Barclay’s Works*, i, p. 71. See SCOTT’S BIBLE: *John*, iii, 16. “Jehovah is a prayer hearing God: Nineveh repented, and was spared.”—*N. Y. Observer*, Vol. x, p. 90. “These are well pleasing to God, in all ranks and relations.”—*Barclay’s Works*, Vol. i, p. 73. “Whosoever cometh any thing near unto the tabernacle.”—*Numb.*, xvii, 13. “The words coalesce, when they have a long established association.”—*Murray’s Gram.*, p. 169. “Open to me the gates of righteousness: I will go in to them.”—OLD BIBLE: *Ps.*, cxviii, 19. “He saw an angel of God coming into him.”—See *Acts*, x, 3. “The consequences of any action are to be considered in a two fold light.”—*Wayland’s Moral Science*, p. 108. “We commonly write two fold, three fold, four fold, and so on up to ten fold, without a hyphen; and, after that, we use one.”—*Author*. See *Matt.*, xiii, 8. “When the first mark is going off, he cries *turn!* the glass holder answers *done!*”—*Bowditch’s Nav.*, p. 128. “It is a kind of familiar shaking hands with all the vices.”—*Maturin’s Sermons*, p. 170. “She is a good natured woman;” “James is self opinionated;” “He is broken hearted.”—*Wright’s Gram.*, p. 147. “These three examples apply to the *present tense* construction only.”—*Ib.*, p. 65. “So that it was like a game of hide and go seek.”—*Edward’s First Lessons in Grammar*, p. 90.

“That lowliness is young ambition’s ladder,  
Whereto the climber upward turns his face.”—*Bucke’s Gram.*, p. 97.

#### UNDER RULE IV.—OF ELLIPSES.

“This building serves yet for a school and a meeting-house.”

[FORMULE.—Not proper, because the compound word *schoolhouse* is here divided to avoid a repetition of the last half. But, according to Rule 4th, “When two or more compounds are connected in one sentence, none of them should be split to make an ellipsis of half a word.” Therefore, “*school*” should be “*schoolhouse*,” thus, “This building serves yet for a *schoolhouse* and a meeting-house.”]

“Schoolmasters and mistresses of honest friends [are] to be encouraged.”—*N. E. Discipline*, p. xv. “We never assumed to ourselves a faith or worship-making-power.”—*Barclay’s Works*, Vol. i, p. 83. “Pot and pearl ashes are made from common ashes.”—*Webster’s New Spelling-Book*, p. 69. “Both the ten and eight syllable verses are iambics.”—*Blair’s Gram.*, p. 121. “I say to myself, thou, he says to thy, to his self; &c.”—*Dr. Murray’s Hist. of Europ. Lang.*, Vol. ii p. 121. “Or those who have esteemed themselves skilful, have tried for the mastery in two or four horse chariots.”—*Zenobia*, Vol. i, p. 152. “I remember him barefooted and headed, running through the streets.”—*Castle Rackrent*, p. 68. “Friends have the entire control of the school and dwelling-houses.”—*The Friend*, Vol. vii, p. 231. “The meeting is held at the first mentioned place in the first month, at the last in the second, and so on.”—*Ib.*, p. 167. “Meetings for worship are held at the same hour on first and fourth days.”—*Ib.*, p. 230. “Every part of it, inside and out, is covered with gold

leaf.”—*Ib.*, p. 404. “The Eastern Quarterly Meeting is held on the last seventh day in second, fifth, eighth, and eleventh month.”—*Ib.*, p. 87. “Trenton Preparative Meeting is held on the third fifth day in each month, at ten o’clock; meetings for worship at the same hour on first and fifth days.”—*Ib.*, p. 231. “Ketch, a vessel with two masts, a main and mizzen-mast.”—*Webster’s Dict.*, “I only mean to suggest a doubt, whether nature has enlisted herself as a Cis or Trans-Atlantic partisan?”—*Jefferson’s Notes*, p. 97. “By large hammers, like those used for paper and fullingmills, they beat their hemp.”—MORTIMER: *in Johnson’s Dict.* “Ant-hill, or Hillock, *n. s.* The small protuberances of earth, in which ants make their nests.”—*Ib.* “It became necessary to substitute simple indicative terms called *pro-names* or *nouns*.”—*Enclytica*, p. 16.

“Obscur’d, where highest woods, impenetrable  
To star or sun-light, spread their umbrage broad.”—*Milton*.

#### UNDER RULE V.—THE HYPHEN.

“*Evilthinking*; a noun, compounded of the noun *evil* and the imperfect participle *thinking*; singular number;” &c.—*Churchill’s Gram.*, p. 180.

[FORMULE—Not proper, because the word *evilthinking*, which has more than one accented syllable, is here compounded without the hyphen. But, according to Rule 5th, “When the parts of a compound do not fully coalesce, or when each retains its original accent, so that the compound has more than one, or one that is movable, the hyphen should be inserted between them.” Therefore, the hyphen should be used in this word; thus, *evil-thinking*.]

“*Evilspeaking*; a noun, compounded of the noun *evil* and the imperfect participle *speaking*.”—*Ib.* “I am a tall, broadshouldered, impudent, black fellow.”—SPECTATOR: *in Johnson’s Dict.* “Ingratitude! thou marblehearted fiend.”—SHAK.: *ib.* “A popular licence is indeed the manyheaded tyranny.”—SIDNEY: *ib.* “He from the manypeopled city flies.”—SANDYS: *ib.* “He manylanguage nations has surveyed.”—POPE: *ib.* “The horsecucumber is the large green cucumber, and the best for the table.”—MORTIMER: *ib.* “The bird of night did sit, even at noonday, upon the market-place.”—SHAK.: *ib.* “These make a general gaodelivery of souls, not for punishment.”—SOUTH: *ib.* “Thy air, thou other goldbound brow, is like the first.”—SHAK.: *ib.* “His person was deformed to the highest degree; flatnosed, and blobberlipped.”—L’ESTRANGE: *ib.* “He that defraudeth the labourer of his hire, is a bloodshedder.”—ECCLUS., xxxiv, 22: *ib.* “Bloodyminded, *adj.* from *bloody* and *mind*. Cruel; inclined to blood-shed.”—See *Johnson’s Dict.* “Bluntwitted lord, ignoble in demeanour.”—SHAK.: *ib.* “A young fellow with a bobwig and a black silken bag tied to it.”—SPECTATOR: *ib.* “I have seen enough to confute all the boldfaced atheists of this age.”—BRAMHALL: *ib.* “Before milkwhite, now purple with love’s wound.”—SHAK: *ib.* “For what else is a redhot iron than fire? and what else is a burning coal than redhot wood?”—NEWTON: *ib.* “Pollevil is a large swelling, inflammation, or imposthume in the horse’s poll, or nape of the neck just between the ears.”—FARRIER: *ib.*

“Quick-witted, brazenfac’d, with fluent tongues,  
Patient of labours, and dissembling wrongs.”—DRYDEN: *ib.*

#### UNDER RULE VI.—NO HYPHEN.

“From his fond parent’s eye a tear-drop fell.”—*Snelling’s Gift for Scribblers*, p. 43.

[FORMULE—Not proper, because the word *tear-drop*, which has never any other than a full accent on the first syllable, is here compounded with the hyphen. But, according to Rule 6th, “When a compound has but one accented syllable in pronunciation, and the parts are such as admit of a complete coalescence, no hyphen should be inserted between them.” Therefore, *teardrop* should be made a close compound.]

“How great, poor jack-daw, would thy sufferings be!”—*Ib.*, p. 29. “Placed like a scare-crow in a field of corn.”—*Ib.*, p. 39. “Soup for the alms-house at a cent a quart.”—*Ib.*, p. 23. “Up into the watch-tower get, and see all things despoiled of fallacies.”—DONNE: *Johnson’s Dict.*, *w. Lattice*. “In the day-time she sitteth in a watchtower, and flieth most by night.”—BACON: *ib.*, *w. Watchtower*. “In the daytime Fame sitteth in a watch-tower, and flieth most by night.”—ID.: *ib.*, *w. Daytime*. “The moral is the first business of the poet, as being the ground-work of his instruction.”—DRYDEN: *ib.*, *w. Moral*. “Madam’s own hand the mouse-trap baited.”—PRIOR: *ib.*, *w. Mouse-trap*. “By the sinking of the air-shaft the air hath liberty to circulate.”—RAY: *ib.*, *w. Airshaft*. “The multiform and amazing operations of the air-pump and the loadstone.”—WATTS: *ib.*, *w. Multiform*. “Many of the fire-arms are named from animals.”—*Ib.*, *w. Musket*. “You might have trussed him and all his apparel into an eel-skin.”—SHAK.: *ib.*, *w. Truss*. “They may serve as land-marks to shew what lies in the direct way of truth.”—LOCKE: *ib.*, *w. Landmark*. “A pack-horse is driven constantly in a narrow lane and dirty road.”—*Id. ib.*, *w. Lane*. “A mill-horse, still bound to go in one circle.”—SIDNEY: *ib.*, *w. Mill-horse*. “Of singing birds they have linnets, goldfinches, ruddocks, Canary-birds, black-birds, thrushes, and divers others.”—CAREW: *ib.*, *w. Goldfinch*. “Of singing birds, they have linnets, gold-finches, blackbirds, thrushes, and divers others.”—ID.: *ib.*, *w. Blackbird*. “Of singing birds, they have linnets, gold-finches, ruddocks, canary birds, blackbirds, thrushes, and divers other.”—ID.: *ib.*, *w. Canary bird*. “Cartrage, or Cartridge, a case of paper or parchment filled with gun-powder.”—*Johnson’s Dict.*, 4to.

“Deep night, dark night, the silent of the night,  
The time of night when Troy was set on fire,  
The tune when screech-owls cry, and ban-dogs howl.”

SHAKESPEARE: *ib.*, *w. Silent*.

“The time when screech-owls cry, and bandogs howl.”

IDEM.: *ib.*, *w. Bandog*.

## PROMISCUOUS ERRORS IN THE FIGURE OF WORDS.

### LESSON I.—MIXED.

“They that live in glass-houses, should not throw stones.”—*Old Adage*. “If a man profess Christianity in any manner or form soever.”—*Watts*, p. 5. “For Cassius is a weary of the world.”—SHAKESPEARE: *in Kirkham’s Elocution*, p. 67. “By the coming together of more, the chains were fastened on.”—*Walker’s Particles*, p. 223. “Unto the carrying away of Jerusalem captive in the fifth month.”—*Jer.*, i, 3. “And the goings forth of the border shall be to Zedad.”—*Numbers*, xxxiv, 8. “And the goings out of it shall be at Hazar-enan.”—*Ib.*, ver. 9. “For the taking place of effects, in a certain particular series.”—*Dr. West, on Agency*, p. 39. “The letting go of which was the occasion of all that corruption.”—*Dr. J. Owen*. “A falling off at the end always hurts greatly.”—*Blair’s Lect.*, p. 126. “A falling off at the end is always injurious.”—*Jamieson’s Rhetoric*, p. 127. “As all holdings forth were courteously supposed to be trains of reasoning.”—*Dr. Murray’s Hist. of Europ. Lang.*, Vol. i, p. 333. “Whose goings forth have been from of old, from everlasting.”—*Micah*, v, 2. “Some

times the adjective becomes a substantive.”—*Bradley’s Gram.*, p. 104. “It is very plain, I consider man as visited a new.”—*Barclay’s Works*, Vol. iii, p. 331. “Nor do I any where say, as he falsely insinuates.”—*Ib.*, p. 331. “Every where, any where, some where, no where.”—*Alex. Murray’s Gram.*, p. 55. “The world hurries off a pace, and time is like a rapid river.”—*Collier’s Antoninus*, p. 58. “But to new model the paradoxes of ancient skepticism.”—*Brown’s Estimate*, Vol. i, p. 102. “The south east winds from the ocean invariably produce rain.”—*Webster’s Essays*, p. 369. “North west winds from the high lands produce cold clear weather.”—*Ib.* “The greatest part of such tables would be of little use to English men.”—*Priestley’s Gram.*, p. 155. “The ground floor of the east wing of Mulberry street meeting house was filled.”—*The Friend*, vii, 232. “Prince Rupert’s Drop. This singular production is made at the glass houses.”—*Red Book*, p. 131.

“The lights and shades, whose well accorded strife  
Gives all the strength and colour of our life.”—*Murray’s Gram.*, p. 54; *Fisk’s*, 65.

## LESSON II.—MIXED.

“In the twenty and seventh year of Asa king of Judah did Zimri reign seven days in Tirzah.”—1 *Kings*, xvi, 15. “In the thirty and first year of Asa king of Judah, began Omri to reign over Israel.”—*Ib.*, xvi, 23. “He cannot so deceive himself as to fancy that he is able to do a rule of three sum.”—*Foreign Quarterly Review*. “The best cod are those known under the name of Isle of Shoals dun fish.”—*Balbi’s Geog.*, p. 26. “The soldiers, with down cast eyes, seemed to beg for mercy.”—*Goldsmith’s Greece*, Vol. ii, p. 142. “His head was covered with a coarse worn out piece of cloth.”—*Ib.*, p. 124. “Though they had lately received a reinforcement of a thousand heavy armed Spartans.”—*Ib.*, p. 38. “But he laid them by unopened; and, with a smile, said, ‘Business to morrow.’”—*Ib.*, p. 7. “Chester monthly meeting is held at Moore’s town, the third day following the second second day.”—*The Friend*, Vol. vii, p. 124. “Eggharbour monthly meeting is held the first second day.”—*Ib.*, p. 124. “Little Egg Harbour Monthly Meeting is held at Tuckerton on the second fifth day in each month.”—*Ib.*, p. 231. “At three o’clock, on first day morning the 24th of eleventh month, 1834,” &c.—*Ib.*, p. 64. “In less than one-fourth part of the time usually devoted.”—*Kirkham’s Gram.*, p. 4. “The pupil will not have occasion to use it one-tenth part as much.”—*Ib.*, p. 11. “The painter dips his paint brush in paint, to paint the carriage.”—*Ib.*, p. 28. “In an ancient English version of the New-Testament.”—*Ib.*, p. 74. “The little boy was bare headed.”—*Red Book*, p. 36. “The man, being a little short sighted, did not immediately know him.”—*Ib.*, p. 40. “Picture frames are gilt with gold.”—*Ib.*, p. 44. “The park keeper killed one of the deer.”—*Ib.*, p. 44. “The fox was killed near the brick kiln.”—*Ib.*, p. 46. “Here comes Esther, with her milk pail.”—*Ib.*, p. 50. “The cabinet maker would not tell us.”—*Ib.*, p. 60. “A fine thorn hedge extended along the edge of the hill.”—*Ib.*, p. 65. “If their private interests should be ever so little affected.”—*Ib.*, p. 73. “Unios are fresh water shells, vulgarly called fresh water clams.”—*Ib.*, p. 102.

“Did not each poet mourn his luckless doom,  
Jostled by pedants out of elbow room.”—*Lloyd*, p. 163.

## LESSON III.—MIXED.

“The captive hovers a-while upon the sad remains.”—PRIOR: *in Johnson’s Dict.*, *w. Hover*. “Constantia saw that the hand writing agreed with the contents of the letter.”—ADDISON: *ib.*, *w. Hand*. “They have put me in a silk night-gown, and a gaudy fool’s cap.”—ID.: *ib.*, *w. Nightgown*. “Have you no more manners than to rail at Hocus, that has saved

that clod-pated, numskull'd ninnyhammer of yours from ruin, and all his family?"—ARBUTHNOT: *ib.*, *w.* *Ninnyhammer*. "A noble, that is, six, shillings and eightpence, is, and usually hath been paid."—BACON: *ib.*, *w.* *Noble*. "The king of birds thick feather'd and with full-summed wings, fastened his talons east and west."—HOWELL: *ib.*, *w.* *Full-summed*. "To morrow. This is an idiom of the same kind, supposing *morrow* to mean originally *morning*: as, *to night, to day*."—*Johnson's Dict.*, 4to. "To-day goes away and to-morrow comes."—*Id.*, *ib.*, *w.* *Go*, No. 70. "Young children, who are try'd in Go carts, to keep their steps from sliding."—PRIOR: *ib.*, *w.* *Go-cart*. "Which, followed well, would demonstrate them but goes backward."—SHAK.: *ib.*, *w.* *Goer*. "Heaven's golden winged herald late he saw, to a poor Galilean virgin sent."—CRASHAW: *ib.*, *w.* *Golden*. "My penthouse eye-brows and my shaggy beard offend your sight."—DRYDEN: *ib.*, *w.* *Penthouse*. "The hungry lion would fain have been dealing with good horse-flesh."—L'ESTRANGE: *ib.*, *w.* *Nag*. "A broad brimmed hat ensconced each careful head."—*Snelling's Gift*, p. 63. "With harsh vibrations of his three stringed lute."—*Ib.*, p. 42. "They magnify a hundred fold an author's merit."—*Ib.*, p. 14. "I'll nail them fast to some oft opened door."—*Ib.*, p. 10. "Glossed over only with a saint-like show, still thou art bound to vice."—DRYDEN: in *Johnson's Dict.*, *w.* *Gloss*. "Take of aqua-fortis two ounces, of quick-silver two drachms."—BACON: *ib.*, *w.* *Charge*. "This rainbow never appears but when it rains in the sun-shine."—NEWTON: *ib.*, *w.* *Rainbow*.

"Not but there are, who merit other palms;  
Hopkins and Stern hold glad the heart with Psalms."

*British Poets*, Lond., 1800, Vol. vi, p. 405.

## CHAPTER IV.—OF SPELLING.

*Spelling* is the art of expressing words by their proper letters. This important art is to be acquired rather by means of the spelling-book or dictionary, and by observation in reading, than by the study of written rules; because what is proper or improper, depends chiefly upon usage.

The orthography of our language is attended with much uncertainty and perplexity: many words are variously spelled by the best scholars, and many others are not usually written according to the analogy of similar words. But to be ignorant of the orthography of such words as are spelled with uniformity, and frequently used, is justly considered disgraceful.

The following rules may prevent some embarrassment, and thus be of service to those who wish to be accurate.

### RULES FOR SPELLING.

#### RULE I.—FINAL F, L, OR S.

Monosyllables ending in *f*, *l*, or *s*, preceded by a single vowel, double the final consonant; as *staff*, *mill*, *pass*—*muff*, *knell*, *gloss*—*off*, *hiss*, *puss*.

EXCEPTIONS.—The words *clef*, *if*, and *of*, are written with single *f*; and *as*, *gas*, *has*, *was*, *yes*, *his*, *is*, *this*, *us*, *pus*, and *thus*, with single *s*. So *bul*, for the flounder; *nul*, for *no*, in law; *sol*, for *sou* or *sun*; and *sal*, for *salt*, in chemistry, have but the single *l*.

OBS.—Because *sal*, *salis*, in Latin, doubles not the *l*, the chemists write *salify*, *salifiable*, *salification*, *saliferous*, *saline*, *salinous*, *saliniform*, *salifying*, &c., with single *l*, contrary to Rule 3d. But in *gas* they ought to double the *s*; for this is a word of their own inventing. Neither have they any plea for allowing it to form *gases* and *gaseous* with the *s* still single; for so they make it violate two general rules at once. If the singular cannot now be written *gass*, the plural should nevertheless be *gasses*, and the adjective should be *gasseous*, according to Rule 3d.

#### RULE II.—OTHER FINALS.

Words ending in any other consonant than *f*, *l*, or *s*, do not double the final letter; as, *mob*, *nod*, *dog*, *sum*, *sun*, *cup*, *cur*, *cut*, *fix*, *whiz*.

EXCEPTIONS.—We double the consonant in *abb*, *ebb*, *add*, *odd*, *egg*, *jagg*, *ragg*, *inn*, *err*, *burr*, *purr*, *butt*, *buzz*, *fuzz*, *yarr*, and some proper names. But we have also *ab* (*from*) and *ad* (*to*) for prefixes; and *jag*, *rag*, *in*, *bur*, and *but*, are other words that conform to the rule.

#### RULE III.—DOUBLING.

Monosyllables, and words accented on the last syllable, when they end with a single consonant preceded by a single vowel, or by a vowel after *qu*, double their final consonant before an additional syllable that begins with a vowel: as, *rob*, *robbed*, *robber*; *fop*, *foppish*, *foppery*; *squat*, *squatter*, *squatting*; *thin*, *thinner*, *thinnest*; *swim*, *swimmer*, *swimming*; *commit*, *committeth*, *committing*, *committed*, *committer*, *committees*; *acquit*, *acquittal*, *acquittance*, *acquitted*, *acquitting*, *acquitteth*.

EXCEPTIONS.—1. X final, being equivalent to *ks*, is never doubled: thus, from *mix*, we have *mixed*, *mixing*, and *mixer*. 2. When the derivative retains not the accent of the root, the final consonant is not always doubled: as, *prefer*', *preference*, *preferable*; *refer*', *reference*, *referable*, or *refer*'rible; *infer*', *inference*, *inferable*, or *infer*'rible; *transfer*', a *trans*'fer, *transferable*, or *transfer*'rible. 3. But letters doubled in Latin, are usually doubled in English, without regard to accent, or to any other principle: as, Britain, *Britan*'nic, *Britannia*; appeal, *appel*'lant; argil, *argil*'laus, *argilla*'ceous; cavil, *cav*'illous, *cavilla*'tion; excel', *ex*'cellent, *ex*'cellence; inflame', *inflam*'mable, *inflamma*'tion. See Observations 13 and 14, p. 199.

#### RULE IV.—NO DOUBLING.

A final consonant, when it is not preceded by a single vowel, or when the accent is not on the last syllable, should remain single before an additional syllable: as, *toil*, *toiling*; *oil*, *oily*; *visit*, *visited*; *differ*, *differing*; *peril*, *perilous*; *viol*, *violist*; *real*, *realize*, *realist*; *dial*, *dialing*, *dialist*; *equal*, *equalize*, *equality*; *vitriol*, *vitriolic*, *vitriolate*.

EXCEPTIONS.—1. The final *l* of words ending in *el*, must be doubled before an other vowel, lest the power of the *e* be mistaken, and a syllable be lost: as, *travel*, *traveller*; *duel*, *duellist*; *revel*, *revelling*; *gravel*, *gravelly*; *marvel*, *marvellous*. Yet the word *parallel*, having three Ells already, conforms to the rule in forming its derivatives; as, *paralleling*, *paralleled*, and *unparalleled*. 2. Contrary to the preceding rule, the preterits, participles, and derivative nouns, of the few verbs ending in *al*, *il*, or *ol*, unaccented,—namely, *equal*, *rival*, *vial*, *marshal*, *victual*, *cavil*, *pencil*, *carol*, *gambol*, and *pistol*,—are usually allowed to double the *l*, though some dissent from the practice: as, *equalled*, *equalling*; *rivalled*, *rivalling*; *cavilled*, *cavilling*, *caviller*; *carolled*, *carolling*, *caroller*. 3. When *ly* follows *l*, we

have two Ells of course, but in fact no doubling: as, *real*, *really*; *oral*, *orally*; *cruel*, *cruelly*; *civil*, *civilly*; *cool*, *coolly*; *wool*, *woolly*. 4. Compounds, though they often remove the principal accent from the point of duplication, always retain the double letter: as, *wit'snapper*, *kid'napper*,\* *grass'hopper*, *duck'-legged*, *spur'galled*, *hot'spurred*, *broad'-brimmed*, *hare'-lipped*, *half-witted*. So, *compromitted* and *manumitted*; but *benefited* is different.

#### RULE V.—FINAL CK.

Monosyllables and English verbs end not with *c*, but take *ck* for double *c*; as, *rack*, *wreck*, *rock*, *attack*: but, in general, words derived from the learned languages need not the *k*, and common use discards it; as, *Italic*, *maniac*, *music*, *public*.

EXCEPTIONS.—The words *arc*, part of a circle; *orc*, the name of a fish; *lac*, a gum or resin; and *sac*, or *soc*, a privilege, in old English law, are ended with *c* only. *Zinc* is, perhaps, better spelled *zink*; *marc*, *mark*; *disc*, *disk*; and *talc*, *talck*.

#### RULE VI.—RETAINING.

Words ending with any double letter, preserve it double before any additional termination, not beginning with the same letter;† as in the following derivatives: *wooer*, *seeing*, *blissful*, *oddly*, *gruffly*, *equally*, *shelly*, *hilly*, *stiffness*, *illness*, *stillness*, *shrillness*, *fellness*, *smallness*, *drollness*, *freeness*, *grassless*, *passless*, *carelessness*, *recklessness*, *embarrassment*, *enfeoffment*, *agreement*, *agreeable*.

EXCEPTIONS.—1. Certain irregular derivatives in *d* or *t*, from verbs ending in *ee*, *ll*, or *ss*, (as *fled* from *flee*, *sold* from *sell*, *told* from *tell*, *dwelt* from  *dwell*, *spelt* from *spell*, *spilt* from *spill*, *shalt* from *shall*, *wilt* from *will*, *blest* from  *bless*, *past* from *pass*,) are exceptions to the foregoing rule. 2. If the word *pontiff* is properly spelled with two Effs, its eight derivatives are also exceptions to this rule; for they are severally spelled with one; as, *pontific*, *pontifical*, *pontificate*, &c. 3. The words *skillful*, *skillfully*, *willful*, *willfully*, *chillness*, *tallness*, *dullness*, and *fullness*, have generally been allowed to drop the second

\* Whether *worshipper* should follow this principle, or not, is questionable. If Dr. Webster is right in making *worship* a compound of *worth* and *ship*, he furnishes a reason against his own practice of using a single *p* in *worshiper*, *worshipped*, and *worshipping*. The Saxon word appears to have been *weorthscype*. But words ending in *ship* are *derivatives*, rather than compounds; and therefore they seem to belong to the rule, rather than to the exception: as, "So we *fellowshipped* him."—*Herald of Freedom: Liberator*, Vol. ix, p. 68.

† When *ee* comes before *e*, or may be supposed to do so, or when *ll* comes before *l*, one of the letters is dropped that *three* of the same kind may not meet: as, *free*, *freer*, *freest*, *freeth*, *freed*; *skill*, *skillless*; *full*, *fully*; *droll*, *drolly*. And, as *burgess-ship*, *hostess-ship*, and *mistress-ship* are derivatives, and not compounds, I think they ought to follow the same principle, and be written *burgesship*, *hostesship*, *mistresship*. The proper form of *gall-less* is perhaps more doubtful. It ought not to be *gallless*, as Dr. Webster has it; and *gallless*, the analogical form, is yet, so far as I know without authority. But is it not preferable to the hyphenated form, with three Ells, which has authority? "GALL-LESS, a. Without gall or bitterness. *Cleaveland*."—*Chalmers, Bolles, Worcester*.

"Ah! mild and *gall-less* dove,  
Which dost the pure and candid dwellings love,  
Canst thou in Albion still delight?"—*Cowley's Odes*.

Worcester's Dictionary has also the questionable word *bellless*. *Treen*, for *trees*, or for an adjective meaning *a tree's*, or *made of a tree*, is exhibited in several of our dictionaries, and pronounced as a monosyllable: but Dr. Beattie, in his Poems, p. 84, has made it a dissyllable, with three like letters divided by a hyphen, thus:—

"Plucking from *tree-en* bough her simple food."

*l*, though all of them might well be made to conform to the general rule, agreeably to the orthography of Webster.

#### RULE VII.—RETAINING.

Words ending with any double letter, preserve it double in all derivatives formed from them by means of prefixes: as, *see, foresee; feoff, enfeoff; pass, repass; press, depress; miss, amiss; call, recall; stall, forestall; thrall, inthrall; spell, misspell; tell, foretell; sell, undersell; add, superadd; snuff, besnuff; swell, overswell.*

OBSERVATION.—The words *enroll, unroll, miscall, befall, befell, bethrall, reinstall, disinthrall, fulfill*, and *twibill*, are very commonly written with one *l*, and made exceptions to this rule; but those authors are in the right who retain the double letter.

#### RULE VIII.—FINAL LL.

Final *ll* is peculiar to monosyllables and their compounds, with the few derivatives formed from such roots by prefixes; consequently, all other words that end in *l*, must be terminated with a single *l*: as, *cabal, logical, appal, excel, rebel, refel, dispel, extol, control, mogul, jackal, rascal, damsel, handsel, tinsel, tendril, tranquil, gambol, consul.*

OBSERVATION.—The words *annul, until, distil, extil*, and *instil*, are also properly spelled with one *l*; for the monosyllables *null, till*, and *still* are not really their roots, but rather derivatives, or contractions of later growth. Webster, however, prefers *distill, extill*, and *instill* with *ll*; and some have been disposed to add the other two.

#### RULE IX.—FINAL E.

The final *e* of a primitive word, when this letter is mute or obscure, is generally omitted before an additional termination beginning with a vowel: as, *remove, removal; rate, ratable; force, forcible; true, truism; rave, raving; sue, suing; eye, eying; idle, idling; centre, centring.*

EXCEPTIONS.—1. Words ending in *ce* or *ge*, retain the *e* before *able* or *ous*, to preserve the soft sounds of *c* and *g*: as, *trace, traceable; change, changeable; outrage, outrageous.* 2. So, from *shoe*, we write *shoeing*, to preserve the sound of the root; from *hoe*, *hoeing*, by apparent analogy; and, from *singe*, *singeing*; from *swinge*, *swingeing*; from *tinge*, *tingeing*; that they may not be confounded with *singing, swinging*, and *tinging*. 3. To compounds and prefixes, as *firearms, forearm, anteact, viceagent*, the rule does not apply; and final *ee* remains double, by Rule 6th, as in *disagreeable, disagreeing*.

#### RULE X.—FINAL E.

The final *e* of a primitive word is generally retained before an additional termination beginning with a consonant: as, *pale, paleness; edge, edgeless; judge, judgeship; lodge, lodgement; change, changeful; infringe, infringement.*

EXCEPTIONS.—1. When the *e* is preceded by a vowel, it is sometimes omitted; as in *duly, truly, awful, argument*; but much more frequently retained; as in *dueness, trueness, blueness, bluely, rueful, dueful, shoeless, eyeless*. 2. The word *wholly* is also an exception to the rule, for nobody writes it *wholely*. 3. Some will have *judgment, abridgment*, and *acknowledgment*, to be irreclaimable exceptions; but I write them with the *e*, upon the

authority of Lowth, Beattie, Ainsworth, Walker, Cobb, Chalmers, and others: the French “jugement,” *judgement*, always retains the *e*.

#### RULE XI—FINAL Y.

The final *y* of a primitive word, when preceded by a consonant, is generally changed into *i* before an additional termination: as, *merry*, *merrier*, *merriest*, *merrily*, *merriment*; *pity*, *pitied*, *pities*, *pitiest*, *pitiless*, *pitiful*, *pitiable*; *contrary*, *contrariness*, *contrarily*.

EXCEPTIONS.—1. This rule applies to derivatives, but not to compounds: thus, we write *merciful*, and *mercy-seat*; *penniless*, and *pennyworth*; *scurviness*, and *scurvy-grass*; &c. But *ladyship* and *goodyship*, being unlike *secretariship* and *suretiship*; *handicraft* and *handiwork*,\* unlike *handygripe* and *handystroke*; *babyship* and *babyhood*, unlike *stateliness* and *likelihood*; the distinction between derivatives and compounds, we see, is too nice a point to have been always accurately observed. 2. Before *ing* or *ish*, the *y* is retained to prevent the doubling of *i*: as, *pity*, *pitying*; *baby*, *babyish*. 3. Words ending in *ie*, dropping the *e* by Rule 9th, change the *i* into *y*, for the same reason: as, *die*, *dying*; *vie*, *vying*; *lie*, *lying*.

#### RULE XII—FINAL Y.

The final *y* of a primitive word, when preceded by a vowel, should not be changed into *i* before any additional termination: as, *day*, *days*; *key*, *keys*; *guy*, *guys*; *valley*, *valleys*; *coy*, *coily*; *cloy*, *cloys*, *cloyed*; *boy*, *boyish*, *boyhood*; *annoy*, *annoyer*, *annoyance*; *joy*, *joyless*, *joyful*.

EXCEPTIONS.—1. From *lay*, *pay*, *say*, and *stay*, are formed *laid*, *paid*, *said*, and *staid*; but the regular words, *layed*, *payed*, *stayed*, are sometimes used. 2. *Raiment*, contracted from *arrayment*, is never written with the *y*. 3. *Daily* is more common than the regular form *dayly*; but *gayly*, *gayety*, and *gayness*, are justly superseding *gaily* and *gaiety*.

#### RULE XIII.—IZE AND ISE.

Words ending in *ize* or *ise* sounded alike, as in *wise* and *size*, generally take the *z* in all such as are essentially formed by means of the termination; and the *s* in monosyllables, and all such as are essentially formed by means of prefixes: as, *gormandise*, *apologize*, *brutalize*, *canonize*, *pilgrimize*, *philosophize*, *cauterize*, *anathematize*, *sympathize*, *disorganize*, with *z*;<sup>†</sup> *rise*, *arise*, *disguise*, *advise*, *devise*,

\* *Handiwork*, *handicraft*, and *handicraftsman*, appear to have been corruptly written for *handwork*, *handcraft*, and *handcraftsman*. They were formerly in good use, and consequently obtained a place in our vocabulary, from which no lexicographer, so far as I know, has yet thought fit to discard them; but, being irregular, they are manifestly becoming obsolete, or at least showing a tendency to throw off these questionable forms. *Handcraft* and *handcraftsman* are now exhibited in some dictionaries, and *handiwork* seems likely to be resolved into *handy* and *work*, from which Johnson supposes it to have been formed. See *Psalm* xix, 1. The text is varied thus: “And the firmament *sheweth* his *handiwork*.”—*Johnson’s Dict.* “And the firmament *sheweth* his *handy-work*.”—*Scott’s Bible*; *Bruce’s Bible*; *Harrison’s Gram.*, p. 83. “And the firmament *showeth* his *handy work*.”—*Alger’s Bible*; *Friends’ Bible*; *Harrison’s Gram.*, p. 103.

<sup>†</sup> Here a word, formed from its root by means of the termination *ize*, afterwards assumes a prefix, to make a secondary derivative: thus, *organ*, *organize*, *disorganize*. In such a case, the latter derivative must of course be like the former; and I assume that the essential or primary formation of both from the word *organ* is by the termination *ize*; but it is easy to see that *disguise*, *demise*, *surmise*, and the like, are essentially or primarily formed by means of the prefixes, *dis*, *de*, and *sur*. As to *advertise*, *exercise*, *detonize*, and *recognize*, which I have noted among the exceptions, it is not easy to discover by which method we ought to suppose them to have been formed; but with respect to nearly all others, the distinction is very plain; and

*supervise, circumcise, despise, surmise, surprise, comprise, compromise, enterprise, presumise*, with *s*.

EXCEPTIONS.—1. *Advertise, catechise, chastise, criticise,\* exercise, exorcise*, and *merchandise*, are most commonly written with *s* and *size, assize, capsize, analyze, overprize, detonize*, and *recognize*, with *z*. How many of them are real exceptions to the rule, it is difficult to say. 2. *Prise*, a thing taken, and *prize*, to esteem; *apprise*, to inform, and *apprize*, to *value*, or *appraise*, are often written either way, without this distinction of meaning, which some wish to establish. 3. The want of the foregoing rule has also made many words *variable*, which ought, unquestionably, to conform to the general principle.

#### RULE XIV.—COMPOUNDS.

Compounds generally retain the orthography of the simple words which compose them: as, *wherein, horseman, uphill, shellfish, knee-deep, kneedgrass, kneading-trough, innkeeper, skylight, plumtree, mandrill*.

EXCEPTIONS.—1. In permanent compounds, or in any derivatives of which, they are not the *roots*, the words *full* and *all* drop one *l*; as, *handful, careful, fulfil, always, although, withal*; in temporary compounds, they retain both; as, *full-eyed, chock-full,† all-wise, save-all*. 2. So the prefix *mis*, (if from *miss*, to err,) drops one *s*; but it is wrong to drop them both, as in Johnson's "mispell" and "mispend," for *misspell* and *misspend*. 3. In the names of days, the word *mass* also drops one *s*; as, *Christmas, Candlemas, Lammass*. 4. The possessive case often drops the apostrophe; as in *herdsman, kitesfoot*. 5. One letter is dropped, if three of the same kind come together: as, *Rosshire, chaffinch*; or else a hyphen is used: as, *Ross-shire, ill-looking, still-life*. 6. *Chilblain, welcome, and welfare*, drop one *l*. 7. *Pastime* drops an *s*. 8. *Shepherd, wherever, and whosever*, drop an *e*; and *wherefore* and *therefore* assume one.

#### RULE XV.—USAGE.

Any word for the spelling of which we have no rule but usage, is written wrong if not spelled according to the usage which is most common among the learned: as, "The brewer grinds his malt before he *brues* his beer."—*Red Book*, p. 38.

#### OBSERVATIONS.

OBS. 1.—The foregoing rules aim at no wild and impracticable reformation of our orthography; but, if carefully applied, they will do much to obviate its chief difficulties. Being made variable by the ignorance of some writers and the caprice of others, our

---

though there may be no *natural reason* for founding upon it such a rule as the foregoing, the voice of general custom is as clear in this as in most other points or principles of orthography, and, surely, some rule in this case is greatly needed.

\* *Criticise*, with *s*, is the orthography of Johnson, Walker, Webster, Jones, Scott, Bolles, Chalmers, Cobb, and others; and so did Worcester spell it in his Comprehensive Dictionary of 1831, but, in his Universal and Critical Dictionary of 1846, he wrote it with *z*, as did Bailey in his folio, about a hundred years ago. Here the *z* conforms to the foregoing rule, and the *s* does not.

† Like this, the compound *brim-full* ought to be written with a hyphen and accented on the last syllable; but all our lexicographers have corrupted it into *brim'ful*, and, contrary to the authorities they quote, accented it on the first. Their noun *brim'fulness*, with a like accent, is also a corruption; and the text of Shakspeare, which they quote for it, is nonsense, unless *brim*, be there made a separate adjective:—

"With ample and *brimfulness* of his force."—*Johnson's Dict. et al.* "With *ample* and *brim fullness* of his force," would be better.

spelling is now, and always has been, exceedingly irregular and unsettled. Uniformity and consistency can be attained in no other way, than by the steady application of rules and principles; and these must be made as few and as general as the case will admit, that the memory of the learner may not be overmatched by their number or complexity. Rules founded on the analogy of similar words, and sanctioned by the usage of careful writers, must be taken as our guides; because common practice is often found to be capricious, contradictory, and uncertain. That errors and inconsistencies abound, even in the books which are proposed to the world as *standards* of English orthography, is a position which scarcely needs proof. It is true, to a greater or less extent, of all the spelling-books and dictionaries that I have seen, and probably of all that have ever been published. And as all authors are liable to mistakes, which others may copy, general rules should have more weight than particular examples to the contrary. “The right spelling of a word may be said to be that which agrees the best with its pronunciation, its etymology, and with the analogy of the particular class of words to which it belongs.”—*Philological Museum*, Vol. i, p. 647.

OBS. 2.—I do not deny that great respect is due to the authority of our lexicographers, or that great improvement was made in the orthography of our language when Dr. Johnson put his hand to the work. But sometimes one man’s authority may offset an other’s; and he that is inconsistent with himself, destroys his own: for, surely, his example cannot be paramount to his principles. Much has been idly said, both for and against the adoption of Johnson’s Dictionary, or Webster’s, as *the criterion* of what is right or wrong in spelling; but it would seem that no one man’s learning is sufficiently extensive, or his memory sufficiently accurate, to be solely relied on to furnish *a standard* by which we may in all cases be governed. Johnson was generally right; but, like other men, he was sometimes wrong. He erred sometimes in his *principles*, or in their application; as when he adopted the *k* in such words as *rhetorick*, and *demoniack*; or when he inserted the *u* in such words as *governour*, *warriour*, *superiour*. Neither of these modes of spelling was ever generally adopted, in any thing like the number of words to which he applied them; or ever will be; though some indiscreet compilers are still zealously endeavouring to impose them upon the public, as the true way of spelling. He also erred sometimes *by accident*, or *oversight*; as when he spelled thus: “recall and *miscal*, *inthrall* and *bethral*, *windfall* and *downfal*, *laystall* and *thumbstal*, *waterfall* and *overfal*, *molehill* and *dunghil*, *windmill* and *twibil*, *uphill* and *downhil*.” This occasional excision of the letter *l* is reprehensible, because it is contrary to general analogy, and because both letters are necessary to preserve the sound, and show the derivation of the compound. Walker censures it as a “ridiculous irregularity,” and lays the blame of it on the “*printers*,” and yet does not venture to correct it! See Johnson’s Dictionary, first American edition, quarto; Walker’s Pronouncing Dictionary, under the word *Dunghil*; and his Rhyming Dictionary, Introd., p. xv.

OBS. 3.—“Dr. Johnson’s Dictionary” has been represented by some as having “nearly fixed the external form of our language.” But Murray, who quotes this from Dr. Nares, admits, at the same time, that, “The orthography of a great number of English words, is far from being uniform, even amongst writers of distinction.”—*Gram.*, p. 25. And, after commending this work of Johnson’s, as A STANDARD, from which, “it is earnestly to be hoped, that no author will henceforth, on light grounds, be tempted to innovate,” he adds, “This Dictionary, however, contains some orthographical inconsistencies which ought to be rectified: such as, *immovable*, *moveable*; *chastely*, *chastness*; *fertileness*, *fertily*; *sliness*, *slyly*; *fearlessly*, *fearlesness*; *needlessness*, *needlesly*.”—*Ib.* In respect to the final *ck* and *our*, he also *intentionally departs from* THE STANDARD *which he thus commends*; preferring,

in that, the authority of *Walker's Rhyming Dictionary*, from which he borrowed his rules for spelling. For, against the use of *k* at the end of words from the learned languages, and against the *u* in many words in which Johnson used it, we have the authority, not only of general usage now, but of many grammarians who were contemporary with Johnson, and of more than a dozen lexicographers, ancient or modern, among whom is Walker himself. In this, therefore, Murray's practice is right, and his commended standard dictionary, wrong.

OBS. 4.—Of words ending in *or* or *our*, we have about three hundred and twenty; of which not more than forty can now with any propriety be written with the latter termination. Aiming to write according to the best usage of the present day, I insert the *u* in so many of these words as now seem most familiar to the eye when so written; but I have no partiality for any letters that can well be spared; and if this book should ever, by any good fortune, happen to be reprinted, after *honour*, *labour*, *favour*, *behaviour*, and *endeavour*, shall have become as unfashionable as *authour*, *errour*, *terroure*, and *emperour*, are now, let the proof-reader strike out the useless letter not only from these words, but from all others which shall bear an equally antiquated appearance.

OBS. 5.—I have suggested the above-mentioned imperfections in *Dr. Johnson's* orthography, merely to justify the liberty which I take of spelling otherwise; and not with any view to give a preference to that of *Dr. Webster*, who is now contending for the honour of having furnished a more correct *standard*. For the latter author, though right in some things in which the former was wrong, is, on the whole, still more erroneous and inconsistent. In his various attempts at reformation in our orthography, he has spelled many hundreds of words in such a variety of ways, that he knows not at last which of them is right, and which are wrong. But in respect to *definitions*, he has done good service to our literature; nor have his critics been sufficiently just respecting what they call his "innovations." See Cobb's Critical Review of the Orthography of Webster. To omit the *k* from such words as *publick*, or the *u* from such as *superiour*, is certainly *no innovation*; it is but ignorance that censures the general practice, under that name. The advocates for Johnson and opponents of Webster, who are now so zealously stickling for the *k* and the *u* in these cases, ought to know that they are contending for what was obsolete, or obsolescent, when Dr. Johnson was a boy.

OBS. 6.—I have before observed that some of the grammarians who were contemporary with Johnson, did not adopt his practice respecting the *k* or the *u*, in *publick*, *critick*, *errour*, *superiour*, &c. And indeed I am not sure there were any who did. Dr. Johnson was born in 1709, and he died in 1784. But Brightland's Grammar, which was written during the reign of Queen Anne, who died in 1714, in treating of the letter C, says, "If in any Word the harder Sound precedes (*e*), (*i*), or (*y*), (*k*) is either added or put in its Place; as, *Skill*, *Skin*, *Publick*: And tho' the additional (*k*) in the foregoing Word be an *old Way* of Spelling, yet it is now very justly left off, as being a superfluous Letter; for (*c*) at the End is always hard."—Seventh Edition, Lond., 1746, p. 37.

OBS. 7.—The three grammars of Ash, Priestley, and Lowth, all appeared, in their first editions, about one time; all, if I mistake not, in the year 1763; and none of these learned doctors, it would seem, used the mode of spelling now in question. In Ash, of 1799, we have such orthography as this: "Italics, public, domestic, our traffic, music, quick; error, superior, warrior, authors, honour, humour, favour, behaviour." In Priestley, of 1772: "Iambics, dactyls, dactylic, anapæstic, monosyllabic, electric, public, critic; author,

emperor's, superior; favour, labours, neighbours, laboured, vigour, endeavour; meagre, hillock, bailiwick, bishoprick, control, travelling." In Lowth, of 1799: "Comic, critic, characteristic, domestic; author, *favor, favored, endeavored, alledging*, foretells." Now all these are words in the spelling of which Johnson and Webster contradict each other; and if they are not all right, surely they would not, on the whole, be made more nearly right, by being conformed to either of these authorities exclusively. For THE BEST USAGE is the ultimate rule of grammar.

OBS. 8.—The old British Grammar, written before the American Revolution, and even before "*the learned Mr. Samuel Johnson*" was doctorated, though it thus respectfully quotes that great scholar, does not follow him in the spelling of which I am treating. On the contrary, it abounds with examples of words ending in *ic* and *or*, and not in *ick* and *our*, as he wrote them; and I am confident, that, from that time to this, the former orthography has continued to be *more common than his*. Walker, the orthoëpist, who died in 1807, yielded the point respecting the *k*, and ended about four hundred and fifty words with *c* in his Rhyming Dictionary; but he thought it more of an innovation than it really was. In his Pronouncing Dictionary, he says, "It has been a custom, *within these twenty years*, to omit the *k* at the end of words, when preceded by *c*. This has introduced a *novelty* into the language, which is that of ending a word with an unusual letter," &c. "This omission of *k* is, however, too general to be counteracted, even by the authority of Johnson; but it is to be hoped it will be confined to words from the learned languages."—*Walker's Principles of Pronunciation*, No. 400. The tenth edition of Burn's Grammar, dated 1810, says, "It has become customary to omit *k* after *c* at the end of dissyllables and trisyllables, &c. as *music, arithmetic, logic*; but the *k* is retained in monosyllables; as, *back, deck, rick*, &c."—P. 25. James Buchanan, of whose English Syntax there had been five American editions in 1792, added no *k* to such words as *didactic, critic, classic*, of which he made frequent use; and though he wrote *honour, labour*, and the like, with *u*, as they are perhaps most generally written now, he inserted no *u* in *error, author*, or any of those words in which that letter would now be inconsistent with good taste.

OBS. 9.—Bicknell's Grammar, of 1790, treating of the letter *k*, says, "And for the same reason we have *dropt* it at the end of words after *c*, which is there always hard; as in *publick, logick*, &c. which are more elegantly written *public, logic*."—Part ii, p. 13. Again: "It has heretofore joined with *c* at the end of words; as *publick, logick*; but, as before observed, being there quite superfluous, it is now left out"—*Ib.*, p. 16. Horne Tooke's orthography was also agreeable to the rule which I have given on this subject. So is the usage of David Booth: "Formerly a *k* was added, as, *rustick, politick, Arithmetick*, &c. but this is now in disuse."—*Booth's Introd. to Dict.*, Lond., 1814, p. 80.

OBS. 10.—As the authors of many recent spelling-books—Cobb, Emerson, Burhans, Bolles, Sears, Marshall, Mott, and others—are now contending for this "*superfluous letter*," in spite of all the authority against it, it seems proper briefly to notice their argument, lest the student be misled by it. It is summed up by one of them in the following words: "In regard to *k* after *c* at the end of words, it may be sufficient to say, that its omission has never been attempted, except in a *small portion* of the cases *where* it occurs; and that *it* tends to an erroneous pronunciation of derivatives, as in *mimick, mimicking*, where, if the *k* were omitted, *it* would read mimicing; and as *c* before *i* is always sounded like *s*, *it* must be pronounced *mimising*. Now, since *it* is never omitted in monosyllables, *where it* most frequently occurs, as in *block, clock*, &c., and *can be in a part only* of polysyllables, it is thought better to preserve it in all cases, by *which* we have one general rule, in place of

several irregularities and exceptions that must follow its partial omission.”—*Bolles's Spelling-Book*, p. 2. I need not tell the reader that these two sentences evince great want of care or skill in the art of grammar. But it is proper to inform him, that we have in our language eighty-six monosyllables which end with *ck*, and from them about fifty compounds or derivatives, which of course keep the same termination. To these may be added a dozen or more which seem to be of doubtful formation, such as *huckaback*, *pickapack*, *gimcrack*, *ticktack*, *picknick*, *barrack*, *knapsack*, *hollyhock*, *shamrock*, *hammock*, *hillock*, *hammock*, *bullock*, *roebuck*. But the verbs on which this argument is founded are only six; *attack*, *ransack*, *traffick*, *frolick*, *mimick*, and *physick*; and these, unquestionably, must either be spelled with the *k*, or must assume it in their derivatives. Now that useful class of words which are generally and properly written with final *c*, are about *four hundred and fifty* in number, and are all of them either adjectives or nouns of regular derivation from the learned languages, being words of more than one syllable, which have come to us from Greek or Latin roots. But what has the doubling of *c* by *k*, in our native monosyllables and their derivatives, to do with all these words of foreign origin? For the reason of the matter, we might as well double the *l*, as our ancestors did, in *naturall*, *temporall*, *spirituall*, &c.

OBS. 11.—The learner should observe that some letters incline much to a duplication, while some others are doubled but seldom, and some, never. Thus, among the vowels, *ee* and *oo* occur frequently; *aa* is used sometimes; *ii*, never—except in certain Latin words, (wherein the vowels are separately uttered,) such as *Horatii*, *Veii*, *iidem*, *genii*. Again, the doubling of *u* is precluded by the fact that we have a distinct letter called *Double-u*, which was made by joining two Vees, or two Ues, when the form for *u* was *v*. So, among the consonants, *f*, *l*, and *s*, incline more to duplication, than any others. These letters are double, not only at the end of those monosyllables which have but one vowel, as *staff*, *mill*, *pass*; but also under some other circumstances. According to general usage, final *f* is doubled after a single vowel, in almost all cases; as in *bailiff*, *caitiff*, *plaintiff*, *midriff*, *sheriff*, *tariff*, *mastiff*: yet not in *calif*, which is perhaps better written *caliph*. Final *l*, as may be seen by Rule 8th, admits not now of a duplication like this; but, by the exceptions to Rule 4th, it is frequently doubled when no other consonant would be; as in *travelling*, *grovelling*; unless, (contrary to the opinion of Lowth, Walker, and Webster,) we will have *fillipping*, *gossiping*, and *worshipping*, to be needful exceptions also.

OBS. 12.—Final *s* sometimes occurs single, as in *alas*, *atlas*, *bias*; and especially in Latin words, as *virus*, *impetus*; and when it is added to form plurals, as *verse*, *verses*: but this letter, too, is generally doubled at the end of primitive words of more than one syllable; as in *carcass*, *compass*, *cuirass*, *harass*, *trespass*, *embarrass*. On the contrary, the other consonants are seldom doubled, except when they come under Rule 3d. The letter *p*, however, is commonly doubled, in some words, even when it forms a needless exception to Rule 4th; as in the derivatives from *fillip*, *gossip*, and perhaps also *worship*. This letter, too, was very frequently doubled in Greek; whence we have, from the name of Philip of Macedon, the words *Philippic* and *Philippize*, which, if spelled according to our rule for such derivatives, would, like *galloped* and *galloper*, *siruped* and *sirupy*, have but one *p*. We find them so written in some late dictionaries. But if *fillipped*, *gossipped*, and *worshipped*, with the other derivatives from the same roots, are just and necessary exceptions to Rule 4th, (which I do not admit,) so are these; and for a much stronger reason, as the classical scholar will think. In our language, or in words purely English, the letters *h*, *i*, *j*, *k*, *q*, *v*, *w*, *x*, and *y*, are, properly speaking, never doubled. Yet, in the forming

of *compounds*, it may possibly happen, that two Aitches, two Kays, or even two Double-ues or Wies, shall come together; as in *withhold*, *brickkiln*, *slowworm*, *bayyarn*.

OBS. 13.—There are some words—as those which come from *metal*, *medal*, *coral*, *crystal*, *argil*, *axil*, *cavil*, *tranquil*, *pupil*, *papil*—in which the classical scholar is apt to violate the analogy of English derivation, by doubling the letter *l*, because he remembers the *ll* of their foreign roots, or their foreign correspondents. But let him also remember, that, if a knowledge of etymology may be shown by spelling metallic, metalliferous, metallography, metallurgic, metallurgist, metallurgy, medallic, medallion, crystallize, crystalline, argillous, argillaceous, axillar, axillary, cavillous, cavillation, papillate, papillous, papillary, tranquillity, and pupillary, with double *l*, ignorance of it must needs be implied in spelling metaline, metalist, metaloid, metaloidal, medalist, coralaceous, coraline, coralite, corallinite, coraloid, coraloidal, crystalite, argilite, argilitic, tranquilize, and pupilage, in like manner. But we cannot well double the *l* in the former, and not in the latter words. Here is a choice of difficulties. Etymology must govern orthography. But what etymology? our own, or that which is foreign? If we say, both, they disagree; and the mere English scholar cannot know when, or how far, to be guided by the latter. If a Latin diminutive, as *papilla* from *papula* or *papa*, *pupillus* from *pupus*, or *tranquillus* from *trans* and *quietus*, happen to double an *l*, must we forever cling to the reduplication, and that, in spite of our own rules to the contrary? Why is it more objectionable to change *pupillaris* to *pupillary*, than *pupillus* to *pupil*? or, to change *tranquillitas* to *tranquility*, than *tranquillus* to *tranquil*? And since *papilous*, *pupilage*, and *tranquilize* are formed from the English words, and not directly from the Latin, why is it not as improper to write them with double *l*, as to write *perilous*, *vassalage*, and *civilize*, in the same manner?

OBS. 14.—If the practice of the learned would allow us to follow the English rule here, I should incline to the opinion, that all the words which I have mentioned above, ought to be written with single *l*. Ainsworth exhibits the Latin word for *coral* in four forms, and the Greek word in three. Two of the Latin and two of the Greek have the *l* single; the others double it. He also spells “*coraliticus*” with one *l*, and defines it “A sort of white marble, called *coraline*.”\* The Spaniards, from whose *medalla*, we have *medal*; whose *argil* † is *arcilla*, from the Latin *argilla*; and to whose *cavilar*, Webster traces *cavil*; in all their derivatives from these Latin roots, *metallum*, metal—coralium, corallium, curalium, or *corallum*, coral—*crystallus* or *crystallum*, crystal—*pupillus*, pupil—and *tranquillus*, tranquil—follow their own rules, and write mostly with single *l*: as, *pupilero*, a teacher; *metalico*, metallic; *corolina* (fem.) coraline; *cristalino*, crystalline; *crystalizar*, crystalize; *traquilizar*, tranquilize; and *tranquilidad*, tranquility. And if we follow not ours, when or how shall the English scholar ever know why we spell as we do? For example, what can he make of the orthography of the following words, which I copy from our best dictionaries: equip’, eq’uipage; wor’ship, wor’shipper;—peril, perilous; cavil, cavillous;‡—libel, libellous;

\* According to Littleton, the *coraliticus lapis* was a kind of Phrygian marble, “called *Coralius* or by an other name *Sangarius*.” But this substance seems to be different from all that are described by Webster, under the names of “*coralline*,” “*corallinite*,” and “*corallite*.” See *Webster’s Octavo Dict.*

† The Greek word for *argil* is ἀργίλος, or ἀργίλλος, (from ἀργός, white,) meaning pure white earth; and is as often spelled with one Lamda as with two.

‡ Dr. Webster, with apparent propriety, writes *caviling* and *cavilous* with one *l*, like *dialing* and *perilous*; but he has in general no more uniformity than Johnson, in respect to the doubling of *l* final. He also, in some instances, accents similar words variously: as, *cor’alliform*, upon the first syllable, *meta’liform*, upon the second; *cav’ilous* and *pap’illous*, upon the first, *argil’lous*, upon the second; *ax’illar*, upon the first, *medul’lar*, upon the second. See *Webster’s Octavo Dict.*

quarrel, quarrelous;—opal, opaline; metal, metalline,\*—coral, coralliform; crystal, crystalform;—dial, dialist; medal, medallist;—rascal, rascalion; medal, medallion;—moral, moralist, morality; metal, metallist, metallurgy;—civil, civilize, civility; tranquil, tranquillize, tranquillity;—novel, novelism, novelist, novelize; grovel, grovelling, grovelled, groveller?

OBS. 15.—The second clause of Murray's or Walker's 5th Rule for spelling, gives only a single *l* to each of the derivatives above named.<sup>†</sup> But it also treats in like manner many hundreds of words in which the *l* must certainly be doubled. And, as neither "the Compiler," nor any of his copiers, have paid any regard to their own principle, neither their doctrine nor their practice can be of much weight either way. Yet it is important to know to what words the rule is, or is not, applicable. In considering this vexatious question about the duplication of *l*, I was at first inclined to admit that, whenever final *l* has become single in English by dropping the second *l* of a foreign root, the word shall resume the *ll* in all derivatives formed from it by adding a termination beginning with a vowel; as, *beryllus*, *beryl*, *berylline*. This would, of course, double the *l* in nearly all the derivatives from *metal*, *medal*, &c. But what says Custom? She constantly doubles the *l* in most of them; but wavers in respect to some, and in a few will have it single. Hence the difficulty of drawing a line by which we may abide without censure. *Pu'pillage* and *pu'pillary*, with *ll*, are according to *Walker's Rhyming Dictionary*; but Johnson spells them *pu'pilage* and *pu'pilary*, with single *l*; and Walker, in his Pronouncing Dictionary, has *pupilage* with one *l*, and *pupillary* with two. Again: both Johnson's and the Pronouncing Dictionary, give us *medallist* and *metallist* with *ll*, and are sustained by Webster and others; but Walker, in his Rhyming Dictionary, writes them *medalist* and *metalist*, with single *l*, like *dialist*, *formalist*, *cabalist*, *herbalist*, and twenty other such words. Further: Webster doubles the *l* in all the derivatives of *metal*, *medal*, *coral*, *axil*, *argil*, and *papil*; but writes it single in all those of *crystal*, *cavil*, *pupil*, and *tranquil*—except *tranquillity*.

OBS. 16.—Dr. Webster also attempts, or pretends, to put in practice the hasty proposition of Walker, to spell with single *l* all derivatives from words ending in *l* not under the accent. "No letter," says Walker, "seems to be more frequently doubled improperly than *l*. Why we should write *libelling*, *levelling*, *revelling*, and yet *offering*, *suffering*, *reasoning*, I am totally at a loss to determine; and, unless *l* can give a better plea than any other letter in the alphabet, for being doubled in this situation, I must, in the style of Lucian, in his trial of the letter *T*, declare for an expulsion."—*Rhyming Dict.*, p. x. This rash conception, being adopted by some men of still less caution, has wrought great mischief in our orthography. With respect to words ending in *el*, it is a good and sufficient reason for doubling the *l*, that the *e* may otherwise be supposed servile and silent. I have therefore made this termination a general exception to the rule against doubling. Besides, a large number of these words, being derived from foreign words in which the *l* was doubled, have a second reason for the duplication, as strong as that which has often induced these same authors to double that letter, as noticed above. Such are *bordel*, *chapel*, *duel*, *fardel*, *gabel*, *gospel*, *gravel*, *lamel*, *label*, *libel*, *marvel*, *model*, *novel*, *parcel*, *quarrel*, and *spinel*. Accordingly we find, that, in his work of expulsion, Dr. Webster has

\* Perry wrote *crystalline*, *crystalize*, *crystalization*, *metalline*, *metallist*, *metallurgist*, and *metallurgy*; and these forms, as well as *crystalography*, *metallie*, *metallography*, and *metalliferous*, are noticed and preferred by the authors of the *Red Book*, on pp. 288 and 302.

† "But if a diphthong precedes, or the accent is on the preceding syllable, the consonant remains single: as, to toil, toiling; to offer, an offering."—*Murray's Octavo Gram.*, p. 24; *Walker's Rhym. Dict.*, Introd., p. ix.

not unfrequently contradicted himself, and conformed to usage, by doubling the *l* where he probably intended to write it single. Thus, in the words *bordeller*, *chapellany*, *chapelling*, *gospellary*, *gospeller*, *gravelly*, *lamellate*, *lamellar*, *lamellarly*, *lamelliform*, and *spinellane*, he has written the *l* double, while he has grossly corrupted many other similar words by forbearing the reduplication; as, *traveler*, *groveling*, *duelist*, *marvelous*, and the like. In cases of such difficulty, we can never arrive at uniformity and consistency of practice, unless we resort to *principles*, and such principles as can be made intelligible to the *English* scholar. If any one is dissatisfied with the rules and exceptions which I have laid down, let him study the subject till he can furnish the schools with better.

OBS. 17.—We have in our language a very numerous class of adjectives ending in *able* or *ible*, as *affable*, *arable*, *tolerable*, *admissible*, *credible*, *infallible*, to the number of nine hundred or more. In respect to the proper form and signification of some of these, there occurs no small difficulty. *Able* is a common English word, the meaning of which is much better understood than its origin. Horne Tooke supposes it to have come from the Gothic noun *abal*, signifying *strength*; and consequently avers, that it “has nothing to do with the Latin adjective *habilis*, *fit*, or *able*, from which our etymologists erroneously derive it.”—*Diversions of Purley*, Vol. ii, p. 450. This I suppose the etymologists will dispute with him. But whatever may be its true derivation, no one can well deny that *able*, as a suffix, belongs most properly, if not exclusively, to *verbs*; for most of the words formed by it, are plainly a sort of verbal adjectives. And it is evident that this author is right in supposing that English words of this termination, like the Latin verbals in *bilis*, have, or ought to have, such a signification as may justify the name which he gives them, of “*potential passive adjectives*,” a signification in which the English and the Latin derivatives exactly correspond. Thus *dis’soluble* or *dissolv’able* does not mean *able to dissolve*, but *capable of being dissolved*; and *divisible* or *dividable* does not mean *able to divide*, but *capable of being divided*.

OBS. 18.—As to the application of this suffix to nouns, when we consider the signification of the words thus formed, its propriety may well be doubted. It is true, however, that nouns do sometimes assume something of the nature of verbs, so as to give rise to adjectives that are of a participial character; such, for instance, as *sainted*, *bigoted*, *conceited*, *gifted*, *tufted*. Again, of such as *hard-hearted*, *good-natured*, *cold-blooded*, we have an indefinite number. And perhaps, upon the same principle, the formation of such words as *actionable*, *companionable*, *exceptionable*, *marketable*, *merchantable*, *pasturable*, *treasonable*, and so forth, may be justified, if care be taken to use them in a sense analogous to that of the real verbals. But, surely, the meaning which is commonly attached to the words *amicable*, *changeable*, *fashionable*, *favourable*, *peaceable*, *reasonable*, *pleasurable*, *seasonable*, *suitable*, and some others, would never be guessed from their formation. Thus, *suitable* means *fitting* or *suiting*, and not *able to suit*, or *capable of being suited*.

OBS. 19.—Though all words that terminate in *able*, used as a suffix, are properly reckoned derivatives, rather than compounds, and in the former class the separate meaning of the parts united is much less regarded than in the latter; yet, in the use of words of this formation, it would be well to have some respect to the general analogy of their signification as stated above; and not to make derivatives of the same fashion convey meanings so very different as do some of these. Perhaps it is from some general notion of their impropriety, that several words of this doubtful character have already become obsolete, or are gradually falling into disuse: as, *accustomable*, *chanceable*, *concordable*,

*conusable*, *customable*, *behoovable*, *leisurable*, *medicinable*, *personable*, *powerable*, *razorable*, *shapable*, *semblable*, *vengeable*, *veritable*. Still, there are several others, yet currently employed, which might better perhaps, for the same reason, give place to more regular terms: as, *amicable*, for *friendly* or *kind*; *charitable*, for *benevolent* or *liberal*; *colourable*, for *apparent* or *specious*; *peaceable*, for *peaceful* or *unhostile*; *pleasurable*, for *pleasing* or *delightful*; *profitable*, for *gainful* or *lucrative*; *sociable*, for *social* or *affable*; *reasonable*, for *rational* or *just*.

OBS. 20.—In respect to the orthography of words ending in *able* or *ible*, it is sometimes difficult to determine which of these endings ought to be preferred; as whether we ought to write *tenable* or *tenible*, *reversible* or *reversable*, *addable* or *addible*. In Latin, the termination is *bilis*, and the preceding vowel is determined by the *conjugation* to which the verb belongs. Thus, for verbs of the first conjugation, it is *a*; as, from *arare*, to plough, *arabilis*, *arable*, tillable. For the second conjugation, it is *i*; as, from *docēre*, to teach, *docibilis*, or *docilis*, *docible* or *docile*, teachable. For the third conjugation, it is *i*; as, from *vendēre*, to sell, *vendibilis*, *vendible*, salable. And, for the fourth conjugation, it is *i*; as, from *sepelire*, to bury, *sepelibilis*, *sep'elible*,\* buriarable. But from *solvo* and *volvo*, of the third conjugation, we have *ubilis*, *uble*; as, *solubilis*, *sol'uble*, solvable or solvable; *volubilis*, *vol'uble*, rollable. Hence the English words, *rev'oluble*, *res'oluble*, *irres'oluble*, *dis'soluble*, *indis'soluble*, and *insol'uble*. Thus the Latin verbals in *bilis*, are a sufficient guide to the orthography of all such words as are traceable to them; but the mere English scholar cannot avail himself of this aid; and of this sort of words we have a much greater number than were ever known in Latin. A few we have borrowed from the French: as, *tenable*, *capable*, *preferable*, *convertible*; and these we write as they are written in French. But the difficulty lies chiefly in those which are of English growth. For some of them are formed according to the model of the Latin verbals in *ibilis*; as *forcible*, *coercible*, *reducible*, *discernible*; and others are made by simply adding the suffix *able*; as *traceable*, *pronounceable*, *manageable*, *advisable*, *returnable*. The last are purely English; and yet they correspond in form with such as come from Latin verbals in *abilis*.

OBS. 21.—From these different modes of formation, with the choice of different roots, we have sometimes two or three words, differing in orthography and pronunciation, but conveying the same meaning; as, *divis'ible* and *divi'dable*, *des'picable* and *despi'sable*, *referable* and *refer'rible*, *mis'cible* and *mix'able*, *dis'soluble*, *dissol'vible*, and *dissol'vable*. Hence, too, we have some words which seem to the mere English scholar to be spelled in a very contradictory manner, though each, perhaps, obeys the law of its own derivation; as, *peaceable* and *forcible*, *impierceable* and *coercible*, *marriageable* and *corrigible*, *damageable* and *eligible*, *changeable* and *tangible*, *chargeable* and *frangible*, *fencible* and *defensible*, *preferable* and *referrible*, *conversible* and *reversible*, *defendable* and *descendible*, *amendable* and *extendible*, *bendable* and *vendible*, *dividable* and *corrodible*, *returnable* and *discernible*, *indispensable* and *responsible*, *advisable* and *fusable*, *respectable* and *compatible*, *delectable* and *collectible*, *taxable* and *flexible*.

OBS. 22.—The American editor of the *Red Book*, to whom all these apparent inconsistencies seemed real blunders, has greatly exaggerated this difficulty in our orthography, and charged Johnson and Walker with having written all these words and

\* Johnson, Walker, and Webster, all spell this word *sep'ible*; which is obviously wrong; as is Johnson's derivation of it from *sepio*, to hedge in. *Sepio* would make, not this word, but *sepibilis* and *sepible*, hedgeable.

many more, in this contradictory manner, “*without any apparent reason!*” He boldly avers, that, “The perpetual contradictions of the same or like words, *in all the books*, show that the authors had no distinct ideas of what is right, and what is wrong;” and ignorantly imagines, that, “The use of *ible* rather than *able*, *in any case*, originated in the necessity of keeping the soft sound of *c* and *g*, in the derivatives; and if *ible was confined* to that use, it would be an easy and simple rule.”—*Red Book*, p. 170. Hence, he proposes to write *peacible* for *peaceable*, *tracible* for *traceable*, *changible* for *changeable*, *managible* for *manageable*; and so for all the rest that come from words ending in *ce* or *ge*. But, whatever advantage there might be in this, his “easy and simple rule” would work a revolution for which the world is not yet prepared. It would make *audible audable*, *fallible fallable*, *feasible feasible*, *terrible terrable*, *horrible horrible*, &c. No tyro can spell in a worse manner than this, even if he have no rule at all. And those who do not know enough of Latin grammar to profit by what I have said in the preceding observation, may console themselves with the reflection, that, in spelling these difficult words entirely by guess, they will not miss the way more than some have done who pretended to be critics. The rule given by John Burn, for *able* and *ible*, is less objectionable; but it is rendered useless by the great number of its exceptions.

OBS. 23.—As most of the rules for spelling refer to the final letters of our primitive words, it may be proper for the learner to know and remember, that not all the letters of the alphabet can assume that situation, and that some of them terminate words much more frequently than others. Thus, in Walker’s Rhyming Dictionary, the letter *a* ends about 220 words; *b*, 160; *c*, 450; *d*, 1550; *e*, 7000; *f*, 140; *g*, 280; *h*, 400; *i*, 29; *j*, none; *k*, 550; *l*, 1900; *m*, 550; *n*, 3300; *o*, 200; *p*, 450; *q*, none; *r*, 2750; *s*, 3250; *t*, 3100; *u*, 14; *v*, none; *w*, 200; *x*, 100; *y*, 5000; *z*, 5. We have, then, three consonants, *j*, *q*, and *v*, which never end a word. And why not? With respect to *j* and *v*, the reason is plain from their history. These letters were formerly identified with *i* and *u*, which are not terminational letters. The vowel *i* ends no pure English word, except that which is formed of its own capital *I*; and the few words which end with *u* are all foreign, except *thou* and *you*. And not only so, the letter *j* is what was formerly called *i consonant*; and *v* is what was called *u consonant*. But it was the initial *i* and *u*, or the *i* and *u* which preceded an other vowel, and not those which followed one, that were converted into the consonants *j* and *v*. Hence, neither of these letters ever ends any English word, or is ever doubled. Nor do they unite with other consonants before or after a vowel: except that *v* is joined with *r* in a few words of French origin, as *livre*, *manoeuvre*; or with *l* in some Dutch names, as *Watervleit*. *Q* ends no English word, because it is always followed by *u*. The French termination *que*, which is commonly retained in *pique*, *antique*, *critique*, *opaque*, *oblique*, *burlesque*, and *grotesque*, is equivalent to *k*; hence we write *packet*, *lackey*, *checker*, *risk*, *mask*, and *mosk*, rather than *paquet*, *laquey*, *chequer*, *risque*, *masque*, and *mosque*. And some authors write *burlesk* and *grotesk*, preferring *k* to *que*.

OBS. 24.—Thus we see that *j*, *q*, and *v*, are, for the most part, initial consonants only. Hence there is a harshness, if not an impropriety, in that syllabication which some have recently adopted, wherein they accommodate to the ear the division of such words as *maj-es-ty*, *proj-ect*, *traj-ect*,—*eq-ui-ty*, *liq-ui-date*, *ex-cheq-uer*. But *v*, in a similar situation, has now become familiar; as in *ev-er-y*, *ev-i-dence*: and it may also stand with *l* or *r*, in the division of such words as *solv-ing* and *serv-ing*. Of words ending in *ive*, Walker exhibits four hundred and fifty—exactly the same number that he spells with *ic*. And Horne Tooke, who derives *ive* from the Latin *ivus*, (q. d. *vis*,) and *ic* from the Greek *ικος*, (q. d. *ιokus*,) both implying *power*, has well observed that there is a general correspondence of meaning

between these two classes of adjectives—both being of “a potential active signification; as *purgative*, *vomitive*, *operative*, &c.; *cathartic*, *emetic*, *energetic*, &c.”—*Diversions of Purley*, Vol. ii, p. 445. I have before observed, that Tooke spelled all this latter class of words without the final *k*; but he left it to Dr. Webster to suggest the reformation of striking the final *e* from the former.

OBS. 25.—In Dr. Webster’s “Collection of Essays and *Fugitiv Peeces*,” published in 1790, we find, among other equally ingenious improvements of our orthography, a general omission of the final *e* in all words ending in *ive*, or rather of all words ending in *ve*, preceded by a short vowel; as, “*primitiv*, *derivativ*, *extensiv*, *positiv*, *deserv*, *twelv*, *proof*, *luv*, *hav*, *giv*, *liv*.” This mode of spelling, had it been adopted by other learned men, would not only have made *v* a very frequent final consonant, but would have placed it in an other new and strange predicament, as being subject to reduplication. For he that will write *hav*, *giv*, and *liv*, must also, by a general rule of grammar, write *havving*, *giving*, and *living*. And not only so, there will follow also, in the solemn style of the Bible, a change of *givest*, *livest*, *giveth*, and *liveth*, into *givest*, *livest*, *giveth*, and *liveth*. From all this it may appear, that a silent final *e* is not always quite so useless a thing as some may imagine. With a levity no less remarkable, does the author of the *Red Book* propose at once two different ways of reforming the orthography of such words as *pierceable*, *manageable*, and so forth; in one of which, the letter *j* would be brought into a new position, and subjected sometimes to reduplication. “It would be a useful improvement to change this *c* into *s*, and *g* into *j*,” as, *piersable*, *manajable*, &c. “Or they might assume *i*,” as, *piercibe*, *managible*, &c.—*Red Book*, p. 170. Now would not this “useful improvement” give us such a word as *allejable*? and would not one such monster be more offensive than all our present exceptions to Rule 9th? Out upon all such tampering with orthography!

OBS. 26.—If any thing could arrest the folly of innovators and dabbling reformers, it would be the history of former attempts to effect improvements similar to theirs. With this sort of history every one would do well to acquaint himself, before he proceeds to disfigure words by placing their written elements in any new predicament. If the orthography of the English language is ever reduced to greater regularity than it now exhibits, the reformation must be wrought by those who have no disposition either to exaggerate its present defects, or to undertake too much. Regard must be had to the origin, as well as to the sounds, of words. To many people, all silent letters seem superfluous; and all indirect modes of spelling, absurd. Hence, as the learner may perceive, a very large proportion of the variations and disputed points in spelling, are such as refer to the silent letters, which are retained by some writers and omitted by others. It is desirable that such as are useless and irregular should be always omitted; and such as are useful and regular always retained. The rules which I have laid down as principles of discrimination, are such as almost every reader will know to be generally true, and agreeable to present usage, though several of them have never before been printed in any grammar. Their application will strike out some letters which are often written, and retain some which are often omitted; but, if they err on either hand, I am confident they err less than any other set of rules ever yet formed for the same purpose. Walker, from whom Murray borrowed his rules for spelling, declares for an expulsion of the second *l* from *traveller*, *gambolled*, *grovelling*, *equalling*, *cavilling*, and all similar words; seems more willing to drop an *l* from *illness*, *stillness*, *shrillness*, *fellness*, and *drollness*, than to retain both in *smallness*, *tallness*, *chillness*, *dullness*, and *fullness*; makes it one of his orthographical aphorisms, that, “Words taken into composition often drop those letters which were superfluous in their simples; as, *Christmas*, *dunghil*, *handful*,” and, at the same time, chooses rather to

restore the silent *e* to the ten derivatives from *move* and *prove*, from which Johnson dropped it, than to drop it from the ten similar words in which that author retained it! And not only so, he argues against the principle of his own aphorism; and says, “It is certainly to be feared that, if this pruning of our words of all the superfluous letters, as they are called, should be much farther indulged, we shall quickly antiquate our most respectable authors, and irreparably maim our language.”—*Walker’s Rhyming Dict.*, p. xvii.

OBS. 27.—No attempt to subject our orthography to a system of phonetics, seems likely to meet with general favour, or to be free from objection, if it should. For words are not mere sounds, and in their *orthography* more is implied than in *phonetics*, or *phonography*. Ideographic forms have, in general, the advantage of preserving the identity, history, and lineage of words; and these are important matters in respect to which phonetic writing is very liable to be deficient. Dr. Johnson, about a century ago, observed, “There have been many schemes offered for the emendation and settlement of our orthography, which, like that of other nations, being formed by chance, or according to the fancy of the earliest writers in rude ages, was at first very various and uncertain, and [is] as yet sufficiently irregular. Of these reformers some have endeavoured to accommodate orthography better to the pronunciation, without considering that this is to measure by a shadow, to take that for a model or standard which is changing while they apply it. Others, less absurdly indeed, but with equal unlikelihood of success, have endeavoured to proportion the number of letters to that of sounds, that every sound may have its own character, and every character a single sound. Such would be the orthography of a new language to be formed by a synod of grammarians upon principles of science. But who can hope to prevail on nations to change their practice, and make all their old books useless? or what advantage would a new orthography procure equivalent to the confusion and perplexity of such an alteration?”—*Johnson’s Grammar before Quarto Dict.*, p. 4.

OBS. 28.—Among these reformers of our alphabet and orthography, of whose schemes he gives examples, the Doctor mentions, first, “*Sir Thomas Smith*, secretary of state to Queen Elizabeth, a man of real learning, and much practised in grammatical disquisitions;” who died in 1597;—next, “*Dr. Gill*, the celebrated master of St. Paul’s School in London;” who died in 1635;—then, “*Charles Butler*, a man who did not want an understanding which might have qualified him for better employment;” who died in 1647;—and, lastly, “*Bishop Wilkins*, of Chester, a learned and ingenious critic, who is said to have proposed his scheme, without expecting to be followed;” he died in 1672.

OBS. 29.—From this time, there was, so far as I know, no noticeable renewal of such efforts, till about the year 1790, when, as it is shown above on page 134 of my Introduction, *Dr. Webster*, (who was then only “*Noah Webster, Jun.*, attorney at law,”) attempted to spell all words as they are spoken, without revising the alphabet—a scheme which his subsequent experience before many years led him to abandon. Such a reformation was again attempted, about forty years after, by an other young lawyer, the late lamented *Thomas S. Grimke*, of South Carolina, but with no more success. More recently, phonography, or phonetic writing, has been revived, and to some extent spread, by the publications of *Isaac Pitman*, of Bath, England, and of *Dr. Andrew Comstock*, of Philadelphia. The system of the former has been made known in America chiefly by the lectures and other efforts of *Andrews and Boyle*, of *Dr. Stone*, a citizen of Boston, and of *E. Webster*, a publisher in Philadelphia.

OBS. 30.—The pronunciation of words being evidently as deficient in regularity, in uniformity, and in stability, as is their orthography, if not more so, cannot be conveniently made the measure of their written expression. Concerning the principle of writing and printing by sounds alone, a recent writer delivers his opinion thus: “Let me here observe, as something not remote from our subject, but, on the contrary, directly bearing upon it, that I can conceive no [other] method of so effectually defacing and barbarizing our English tongue, no [other] scheme that would go so far to empty it, practically at least and for us, of all the hoarded wit, wisdom, imagination, and history which it contains, to cut the vital nerve which connects its present with the past, as the introduction of the scheme of ‘phonetic spelling,’ which some have lately been zealously advocating among us; the principle of which is, that all words should be spelt according as they are sounded, that the writing should be, in every case, subordinated to the speaking. The tacit assumption that it ought so to be, is the pervading error running through the whole system.”—*R. C. Trench, on the Study of Words*, p. 177.

OBS. 31.—The phonographic system of stenography, tachygraphy, or short-hand writing, is, I incline to believe, a very great improvement upon the earlier methods. It is perhaps the most reliable mode of taking down speeches, sermons, or arguments, during their delivery, and reporting them for the press; though I cannot pronounce upon this from any experience of my own in the *practice* of the art. And it seems highly probable, if it has not been fully proved, that children may at first be taught to read more readily, and with better articulation, from phonetic print, or *phonotypy*, as it has been called, than from books that exhibit words in their current or established orthography. But still it is questionable whether it is not best for them to learn each word at first by its peculiar or ideographic form—the form in which they must ultimately learn to read it, and which indeed constitutes its only *orthography*.

## IMPROPRIETIES FOR CORRECTION.

### ERRORS IN SPELLING.

#### UNDER RULE I.—OF FINAL F, L, OR S.

“He wil observe the moral law, in hiz conduct.”—*Webster’s Essays*, p. 320.

[FORMULES—1. Not proper, because the word “*wil*” is here spelled with one *l*. But, according to Rule 1st, “Monosyllables ending in *f*, *l*, or *s*, preceded by a single vowel, double the final consonant.” Therefore, this *l* should be doubled; thus, *will*.

2. Not proper again, because the word “*hiz*” is here spelled with *z*. But, according to the exceptions to Rule 1st, “The words *as*, *gas*, *has*, *was*, *yes*, *his*, &c., are written with single *s*.” Therefore, this *z* should be *s*; thus, *his*.]

“A clif is a steep bank, or a precipitous rock.”—See *Rhyming Dict.* “A needy man’s budget is ful of schemes.”—*Old Adage*. “Few large publications in this country wil pay a printer.”—*Noah Webster’s Essays*, p. x. “I shal, with cheerfulness, resign my other papers to oblivion.”—*Ib.*, p. x. “The proposition waz suspended til the next session of the legislature.”—*Ib.*, p. 362. “Tenants for life wil make the most of lands for themselves.”—*Ib.*, p. 366. “While every thing iz left to lazy negroes, a state wil never be wel cultivated.”—*Ib.*, p. 367. “The heirs of the original proprietors stil hold the soil.”—*Ib.*, p. 349. “Say my annual profit on money loaned shal be six per cent.”—*Ib.*, p. 308. “No man would submit to the drudgery of business, if he could make money az fast by lying stil.”—*Ib.*, p. 310. “A man may az wel feed himself with a bodkin, az with a knife of the present fashion.”—*Ib.*, p.

400. “The clothes wil be ill washed, the food wil be badly cooked; and you wil be ashamed of your wife, if she iz not ashamed of herself.”—*Ib.*, p. 404. “He wil submit to the laws of the state, while he iz a member of it.”—*Ib.*, p. 320. “But wil our sage writers on law forever think by tradition?”—*Ib.*, p. 318. “Some stil retain a sovereign power in their territories.”—*Ib.*, p. 298. “They sel images, prayers, the sound of bells, remission of sins, &c.”—*Perkins’s Theology*, p. 401. “And the law had sacrifices offered every day for the sins of al the people.”—*Ib.*, p. 406. “Then it may please the Lord, they shal find it to be a restorative.”—*Ib.*, p. 420. “Perdition is repentance put of til a future day.”—*Old Maxim*. “The angels of God, which wil good and cannot wil evil, have nevertheless perfect liberty of wil.”—*Perkins’s Theology*, p. 716. “Secondly, this doctrine cuts off the excuse of al sin.”—*Ib.*, p. 717. “Knel, the sound of a bell rung at a funeral.”—*Johnson* and *Walker*.

“If gold with dros or grain with chaf you find,  
Select—and leave the chaf and dros behind.”—*Author*.

#### UNDER RULE II.—OF OTHER FINALS.

“The mobb hath many heads, but no brains.”—*Old Maxim*.

[FORMULE.—Not proper, because the word “*mobb*” is here spelled with double *b*. But, according to Rule 2d, “Words ending in any other consonant than *f*, *l*, or *s*, do not double the final letter.” Therefore, this *b* should be single: thus, *mob*.]

“Clamm, to clog with any glutinous or viscous matter.”—*Johnson’s Dict.* “Whurr, to pronounce the letter *r* with too much force.”—*Ib.* “Flipp, a mixed liquor, consisting of beer and spirits sweetened.”—*Ib.* “Glynn, a hollow between two mountains, a glen.”—*Churchill’s Grammar*, p. 22. “Lamm, to beat soundly with a cudgel or bludgeon.”—*Walker’s Dict.* “Bunn, a small cake, a simnel, a kind of sweet bread.”—See *ib.* “Brunett, a woman with a brown complexion.”—*Ib.* and *Johnson’s Dict.* “Wad’sett, an ancient tenure or lease of land in the Highlands of Scotland.”—*Webster’s Dict.* “To *dodd* sheep, is to cut the wool away about their tails.”—*Ib.* “*In aliquem arietare*, CIC. To run full but at one.”—*Walker’s Particles*, p. 95. “Neither your policy nor your temper would permitt you to kill me.”—*Philological Museum*, Vol. i, p. 427. “And admitt none but his own offspring to fulfill them.”—*Ib.*, i, 437. “The summ of all this Dispute is, that some make them Participles,” &c.—*Johnson’s Gram. Com.*, p. 352. “As, the *whistling* of winds, the *buz* and *hum* of insects, the *hiss* of serpents, the *crash* of falling timber.”—*Blair’s Rhet.*, p. 129; *Adam’s Lat. Gram.*, p. 247; *Gould’s*, 238. “Vann, to winnow, or a fan for winnowing.”—*Walker’s Rhyming Dict.* “Creatures that buz, are very commonly such as will sting.”—*Author*. “Begg, buy, or borrow; butt beware how you find.”—*Id.* “It is better to have a house to lett, than a house to gett.”—*Id.* “Let not your tongue cutt your throat.”—*Old Precept*. “A little witt will save a fortunate man.”—*Old Adage*. “There is many a slipp ‘twixt the cup and the lipp.”—*Id.* “Mothers’ darlings make but milksopp heroes.”—*Id.* “One eye-witness is worth tenn hearsays.”—*Id.*

“The judge shall jobb, the bishop bite the town,  
And mighty dukes pack cards for half a crown.”—POPE: *in Joh. Dict.*, *w. Pack*.

#### UNDER RULE III.—OF DOUBLING.

“Friz, to curl; frized, curled; frizing, curling.”—*Webster’s Dict.*, 8vo. Ed. of 1829.

[FORMULE—Not proper, because the words “*frized*” and “*frizing*” are here spelled with the single *z*, of their primitive *friz*. But, according to Rule 3d, “Monosyllables, and words

accented on the last syllable, when they end with a single consonant preceded by a single vowel, double their final consonant before an additional syllable that begins with a vowel.” Therefore, this *z* should be doubled; thus, *frizzed*, *frizzing*.]

“The commercial interests served to foster the principles of Whigism.”—*Payne’s Geog.*, Vol. ii, p. 511. “Their extreme indolence shuned every species of labour.”—*Robertson’s Amer.*, Vol. i, p. 341. “In poverty and stripedness they attend their little meetings.”—*The Friend*, Vol. vii, p. 256. “In guiding and controlling\* the power you have thus obtained.”—*Abbott’s Teacher*, p. 15. “I began, Thou beganest, He began; We began, You began, They began.”—*Alex. Murray’s Gram.*, p. 92. “Why does *began* change its ending; as, I began, Thou beganest?”—*Ib.*, p. 93. “Truth and conscience cannot be controled by any methods of coercion.”—*Hints on Toleration*, p. xvi. “Dr. Webster noded, when he wrote ‘knit, kniter, and knittingneedle’ without doubling the *t*.”—See *El. Spelling-Book*, 1st Ed., p. 136. “A wag should have wit enough to know when other wags are quizing him.”—*G. Brown*. “Bon’y, handsome, beautiful, merry.”—*Walker’s Rhyming Dict.* “Coquetish, practicing coquetry; after the manner of a jilt.”—*Webster’s Dict.* “Potage, a species of food, made of meat and vegetables boiled to softness in water.”—See *ib.* “Potager, from potage, a porringer, a small vessel for children’s food.”—See *ib.*, and *Worcester’s*. “Compromit, compromised, compromising; manumit, manumitted, manumitting.”—*Webster*. “Inferible; that may be inferred or deduced from premises.”—*Red Book*, p. 228. “Acids are either solid, liquid, or gaseous.”—*Gregory’s Dict.*, *art. Chemistry*. “The spark will pass through the interrupted space between the two wires, and explode the gases.”—*Ib.* “Do we sound *gases* and *gaseous* like *cases* and *caseous*? No: they are more like *glasses* and *osseous*.”—*G. Brown*. “I shall not need here to mention *Swiming*, when he is of an age able to learn.”—*Locke, on Ed.*, p. 12. “Why do lexicographers spell *thinnish* and *mannish* with two Ens, and *dimish* and *ramish* with one Em, each?”—See *Johnson* and *Webster*. “*Gas* forms the plural regularly, *gases*.”—*O. B. Peirce’s Gram.*, p. 38. “Singular, Gas; Plural, Gases.”—*S. W. Clark’s Gram.*, p. 47. “These are contractions from *shedded*, *burstied*.”—*Hiley’s Grammar*, p. 45. “The Present Tense denotes what is occuring at the present time.”—*Day’s Gram.*, p. 36, and p. 61. “The verb ending in *eth* is of the solemn or antiquated style; as, he loveth, he walketh, he runeth.”—*P. Davis’s Gram.*, p. 34.

“Thro’ freedom’s sons no more remonstrance rings,  
Degrading nobles and controlling kings.”—*Murray’s Sequel*, p. 292.

#### UNDER RULE IV.—NO DOUBLING.

“A bigotted and tyrannical clergy will be feared.”—*Brown’s Estimate*, Vol. ii, p. 78.

[FORMULE.—Not proper, because the final *t* of *bigot* is here doubled in “*bigotted*.” But, according to Rule 4th, “A final consonant, when it is not preceded by a single vowel, or when the accent is not on the last syllable, should remain single before an additional syllable.” Therefore, this *t* should be single; thus, *bigoted*.]

“Jacob worshipped his Creator, leaning on the top of his staff.”—*Key in Merchant’s Gram.*, p. 185. “For it is all marvelously destitute of interest.”—*Merchant’s Criticisms*. “As, box, boxes; church, churches; lash, lashes; kiss, kisses; rebus, rebusses.”—*Murray’s Gram.*, 12mo, p. 42. “Gossiping and lying go hand in hand.”—*Old Maxim*. “The substance of the Criticisms on the Diversions of Purley was, with singular industry, gossiped by the

\* If the variable word *control*, *controul*, or *controll*, is from *con* and *troul* or *troll*, it should be spelled with *ll*, by Rule 7th, and retain the *ll* by Rule 6th. Dr. Webster has it so, but he gives *control* also.

present precious secretary of war, in Payne the bookseller's shop."—See *Key*. "Worship makes worshipped, worshipper, worshipping; gossip, gossiped, gossipper, gossiping; fillip, fillipped, fillipper, fillipping."—*Nixon's Parser*, p. 72. "I became as fidgetty as a fly in a milk-jug."—*Blackwood's Mag.*, Vol. xl, p. 674. "That enormous error seems to be rivetted in popular opinion."—*Webster's Essays*, p. 364. "Whose mind iz not biassed by personal attachments to a sovereign."—*Ib.*, p. 318. "Laws against usury originated in a bigotted prejudice against the Jews."—*Ib.*, p. 315. "The most criticcal period of life iz usually between thirteen and seventeen."—*Ib.*, p. 388. "Generallissimo, the chief commander of an army or military force."—See *El. Spelling-Book*, p. 93. "Tranquillize, to quiet, to make calm and peaceful."—*Ib.*, p. 133. "Pommeled, beaten, bruised; having pommels, as a sword or dagger."—*Webster* and *Chalmers*. "From what a height does the jeweler look down upon his shoemaker!"—*Red Book*, p. 108. "You will have a verbal account from my friend and fellow traveler."—*Ib.*, p. 155. "I observe that you have written the word *counseled* with one *l* only."—*Ib.*, p. 173. "They were offended at such as combatted these notions."—*Robertson's America*, Vol. ii, p. 437. "From libel, come libeled, libeler, libeling, libelous; from grovel, groveled, groveler, groveling; from gravel, graveled and graveling."—See *Webster's Dict.* "Wooliness, the state of being woolly."—*Ib.* "Yet he has spelled chappelling, bordeller, medallist, metalline, metallist, metallize, clavellated, &c. with *ll*, contrary to his rule."—*Cobb's Review of Webster*, p. 11. "Again, he has spelled cancelation and snively with single *l*, and cupellation, pannellation, wittolly, with *ll*."—*Ib.* "Oilly, fatty, greasy, containing oil, glib."—*Rhyming Dict.* "Medallist, one curious in medals; Metallist, one skilled in metals."—*Johnson, Webster, Worcester, Cobb*, et al. "He is benefitted."—*Town's Spelling-Book*, p. 5. "They traveled for pleasure."—*S. W. Clark's Gram.*, p. 101.

"Without you, what were man? A groveling herd,  
In darkness, wretchedness, and want enchain'd."—*Beattie's Minstrel*, p. 40.

#### UNDER RULE V.—OF FINAL CK.

"He hopes, therefore, to be pardoned by the critick."—*Kirkham's Gram.*, p. 10.

[FORMULE.—Not proper, because the word "*critick*" is here spelled with a final *k*. But, according to Rule 5th, "Monosyllables and English verbs end not with *c*, but take *ck* for double *c*; as, rack, wreck, rock, attack: but, in general, words derived from the learned languages need not the *k*, and common use discards it." Therefore, this *k* should be omitted; thus, *critic*.]

"The leading object of every publick speaker should be to persuade."—*Kirkham's Elocution*, p. 153. "May not four feet be as poetick as five; or fifteen feet, as poetick as fifty?"—*Ib.*, p. 146. "Avoid all theatrical trick and mimicry, and especially all scholastick stiffness."—*Ib.*, p. 154. "No one thinks of becoming skilled in dancing, or in musick, or in mathematicks, or logick, without long and close application to the subject."—*Ib.*, p. 152. "Caspar's sense of feeling, and susceptibility of metallick and magnetick excitement were also very extraordinary."—*Ib.*, p. 238. "Authorship has become a mania, or, perhaps I should say, an epidemick."—*Ib.*, p. 6. "What can prevent this republick from soon raising a literary standard?"—*Ib.*, p. 10. "Courteous reader, you may think me garrulous upon topicks quite foreign to the subject before me."—*Ib.*, p. 11. "Of the Tonick, Subtonick, and Atoniek elements."—*Ib.*, p. 15. "The subtonick elements are inferiour to the tonicks in all the emphatick and elegant purposes of speech."—*Ib.*, p. 32. "The nine atonicks, and the three abrupt subtonicks cause an interruption to the continuity of the syllabick impulse."—*Ib.*, p. 37. "On scientifick principles, conjunctions and prepositions are but one

part of speech.”—*Kirkham’s Gram.*, p. 120. “That some inferior animals should be able to mimic human articulation, will not seem wonderful.”—*Murray’s Gram.*, 8vo, Vol. i, p. 2.

“When young, you led a life monastick,  
And wore a vest ecelesiastick;  
Now, in your age, you grow fantastick.”—*Johnson’s Dict.*

#### UNDER RULE VI.—OF RETAINING.

“Fearlessness, exemption from fear, intrepidity.”—*Johnson’s Dict.*

[FORMULE.—Not proper, because the word “*fearlessness*” is here allowed to drop one *s* of *fearless*. But, according to Rule 6th, “Words ending with any double letter, preserve it double before any additional termination not beginning with the same letter.” Therefore, the other *s* should be inserted; thus, *fearlessness*.]

“Dreadlesness; fearlessness, intrepidity, undauntedness.”—*Johnson’s Dict.* “Regardless, without heed; Regardlessness, heedlessness, inattention.”—*Ib.* “Blamelessly, innocently; Blamlesness, innocence.”—*Ib.* “That is better than to be flattered into pride and carelessness.”—TAYLOR: *Joh. Dict.* “Good fortunes began to breed a proud recklessness in them.”—SIDNEY: *ib.* “See whether he lazily and listlessly dreams away his time.”—LOCKE: *ib.* “It may be, the palate of the soul is indisposed by listlessness or sorrow.”—TAYLOR: *ib.* “Pitilessly, without mercy; Pitilessness, unmercifulness.”—*Johnson.* “What say you to such as these? abominable, accordable, agreeable, &c.”—*Tooke’s Diversions*, Vol. ii, p. 432. “Artlessly; naturally, sincerely, without craft.”—*Johnson.* “A chilness, or shivering of the body, generally precedes a fever.”—*Murray’s Key*, p. 167. “Smalness; littleness, minuteness, weakness.”—*Rhyming Dict.* “Gall-less, a. free from gall or bitterness.”—*Webster’s Dict.* “Talness; height of stature, upright length with comparative slenderness.”—See *Johnson et al.* “Wilful; stubborn, contumacious, perverse, inflexible.”—*Id.* “He guided them by the skilfulness of his hands.”—*Psal.* lxxviii, 72. “The earth is the Lord’s and the fulness thereof.”—*Murray’s Key*, p. 172. “What is now, is but an amasment of imaginary conceptions.”—GLANVILLE: *Joh. Dict.* “Embarrasment; perplexity, entanglement.”—See *Littleton’s Dict.* “The second is slothfulness, whereby they are performed slackly and carelessly.”—*Perkins’s Theology*, p. 729. “Instalment; induction into office; part of a large sum of money, to be paid at a particular time.”—See *Johnson’s Dict.* “Inthralment; servitude, slavery.”—*Ib.*

“I, who at some times spend, at others spare,  
Divided between carelessness and care.”—*Pope.*

#### UNDER RULE VII.—OF RETAINING.

“*Shall*, on the contrary, in the first person, simply foretels.”—*Murray’s Gram.*, p. 88; *Ingersoll’s*, 136; *Fisk’s*, 78; *Jaudon’s*, 59; *A. Flint’s*, 42; *Wright’s*, 90; *Bullions’s*, 32.

[FORMULE.—Not proper, because the word “*foretels*” does not here retain the double *l* of *tell*. But, according to Rule 7th, “Words ending with any double letter, preserve it double in all derivatives formed from them by means of prefixes.” Therefore, the other *l* should be inserted; thus, *foretells*.]

“There are a few compound irregular verbs, as *befal*, *bespeak*, &c.”—*Ash’s Gram.*, p. 46. “That we might frequently recal it to our memory.”—*Calvin’s Institutes*, p. 112. “The angels exercise a constant solicitude that no evil befall us.”—*Ib.*, p. 107. “Inthral; to

enslave, to shackle, to reduce to servitude.”—*Walker’s Dict.* “He makes resolutions, and fulfils them by new ones.”—*Red Book*, p. 138. “To enrol my humble name upon the list of authors on Elocution.”—*Kirkham’s Elocution*, p. 12. “Forestal; to anticipate, to take up beforehand.”—*Walker’s Rhym. Dict.* “Miscal; to call wrong, to name improperly.”—*Johnson*. “Bethral; to enslave, to reduce to bondage.”—See *id.* “Befal; to happen to, to come to pass.”—*Rhym. Dict.* “Unrol; to open what is rolled or convolved.”—*Johnson*. “Counterrol; to keep copies of accounts to prevent frauds.”—See *id.* “As Sisyphus uprols a rock, which constantly overpowers him at the summit.”—*Author*. “Unwel; not well, indisposed, not in good health.”—See *Red Book*, p. 336. “Undersel; to defeat by selling for less, to sell cheaper than an other.”—See *id.*, p. 332. “Inwal; to enclose or fortify with a wall.”—See *id.*, p. 295. “Twibil; an instrument with two bills, or with a point and a blade; a pickaxe, a mattock, a halberd, a battle-axe.”—See *Dict.* “What you miscal their folly, is their care.”—*Dryden*. “My heart will sigh when I miscal it so.”—*Shakspeare*. “But if the arrangement recal one set of ideas more readily than another.”—*Blair’s Rhet.*, p. 130.

“‘Tis done; and since ‘tis done, ‘tis past recal;  
And since ‘tis past recal, must be forgotten.”—*Dryden*.

#### UNDER RULE VIII.—OF FINAL LL.

“The righteous is taken away from the evil to come.”—*Perkins’s Works*, p. 417.

[FORMULE.—Not proper, because the word “*evil*” is here written with final *ll*. But, according to Rule 8th, “Final *ll* is peculiar to monosyllables and their compounds, with the few derivatives formed from such roots by prefixes; consequently, all other words that end in *l*, must be terminated with a single *l*.” Therefore, one *l* should be here omitted; thus, *evil*.]

“Patroll; to go the rounds in a camp or garrison, to march about and observe what passes.”—*Webster’s Amer. Dict.*, 8vo. “Marshall; the chief officer of arms, one who regulates rank and order.”—See *Bailey’s Dict.* “Weevill; a destructive grub that gets among corn.”—See *Rhym. Dict.* “It much excells all other studies and arts.”—*Walker’s Particles*, p. 217. “It is essentiall to all magnitudes, to be in one place.”—*Perkins’s Works*, p. 403. “By nature I was thy vassall, but Christ hath redeemed me.”—*Ib.*, p. 404. “Some, being in want, pray for temporall blessings.”—*Ib.*, p. 412. “And this the Lord doth, either in temporall or spirituall benefits.”—*Ib.*, p. 415. “He makes an idoll of them, by setting his heart on them.”—*Ib.*, p. 416. “This triall by desertion serveth for two purposes.”—*Ib.*, p. 420. “Moreover, this destruction is both perpetuall and terrible.”—*Ib.*, p. 726. “Giving to severall men several gifts, according to his good pleasure.”—*Ib.*, p. 731. “Untill; to some time, place, or degree, mentioned.”—See *Red Book*, p. 330. “Annull; to make void, to nullify, to abrogate, to abolish.” “Nitric acid combined with argill, forms the nitrate of argill.”—*Gregory’s Dict.*, *art. Chemistry*.

“Let modest Foster, if he will, excell  
Ten Metropolitans in preaching well.”—*Pope*, p. 414.

#### UNDER RULE IX.—OF FINAL E.

“Adjectives ending in *able* signify capacity; as, *comfortable*, *tenable*, *improvable*.”—*Priestley’s Gram.*, p. 33.

[FORMULE.—Not proper, because the word “*improveable*” here retains the final *e* of *improve*. But, according to Rule 9th, “The final *e* of a primitive word is generally omitted

before an additional termination beginning with a vowel.” Therefore, this *e* should be omitted; thus, *improvable*.]

“Their mildness and hospitality are ascribeable to a general administration of religious ordinances.”—*Webster’s Essays*, p. 336. “Retrench as much as possible without obscuring the sense.”—*James Brown’s Amer. Gram.*, 1821, p. 11. “Changable, subject to change; Unchangeable, immutable.”—*Walker’s Rhym. Dict.* “Tameable, susceptible of taming; Untameable, not to be tamed.”—*Ib.* “Reconcilable, Unreconcilable, Reconcilableness; Irreconcilable, Irreconcilably, Irreconcilableness.”—*Johnson’s Dict.* “We have thought it most adviseable to pay him some little attention.”—*Merchants Criticisms*. “Proveable, that may be proved; Reprovable. blameable, worthy of reprehension.”—*Walker’s Dict.* “Moveable and Immovable, Moveably and Immovably, Moveables and Removal, Moveableness and Improvableness, Unremoveable and Unimprovable, Unremoveably and Removable, Proveable and Approvable, Irreproveable and Reprovable, Unreproveable and Improvable, Unimproveableness and Improvably.”—*Johnson’s Dict.* “And with this cruelty you are chargable in some measure yourself.”—*Collier’s Antoninus*, p. 94. “Mothers would certainly resent it, as judgeing it proceeded from a low opinion of the genius of their sex.”—*British Gram.*, Pref., p. xxv. “Titheable, subject to the payment of tithes; Saleable, vendible, fit for sale; Loseable, possible to be lost; Sizeable, of reasonable bulk or size.”—*Walker’s Rhyming Dict.* “When he began this custom, he was puleing and very tender.”—*Locke, on Ed.*, p. 8.

“The plate, coin, revenues, and moveables,  
Whereof our uncle Gaunt did stand possess’d.”—*Shak.*

#### UNDER RULE X.—OF FINAL E.

“Diversly; in different ways, differently, variously.”—*Rhym. Dict.*, and *Webster’s*.

[FORMULE.—Not proper, because the word “*Diversly*” here omits the final *e* of its primitive word, *diverse*. But, according to Rule 10th, “The final *e* of a primitive word is generally retained before an additional termination beginning with a consonant.” Therefore, this *e* should be retained; thus, *Diversely*.]

“The event thereof contains a wholesome instruction.”—*Bacon’s Wisdom of the Ancients*, p. 17. “Whence Scaliger falsly concluded that articles were useless.”—*Brightland’s Gram.*, p. 94. “The child that we have just seen is wholesomly fed.”—*Murray’s Key*, 8vo, p. 187. “Indeed, falshood and legerdmain sink the character of a prince.”—*Collier’s Antoninus*, p. 5. “In earnest, at this rate of managment, thou usest thyself very coarsly.”—*Ib.*, p. 19. “To give them an arrangment and diversity, as agreeable as the nature of the subject would admit”—*Murray’s Pref. to Ex.*, p. vi. “Alger’s Grammar is only a trifling enlargment of Murray’s little Abridgment.”—*Author*. “You ask whether you are to retain or omit the mute *e* in the word judgment, abridgment, acknowledgment, lodgment, adjudgment, and prejudgment.”—*Red Book*, p. 172. “Fertileness, fruitfulness; Fertily, fruitfully, abundantly.”—*Johnson’s Dict.* “Chastly, purely, without contamination; Chastness, chastity, purity.”—*Ib.*, and *Walker’s*. “Rhymster, *n.* One who makes rhymes; a versifier; a mean poet.”—*Johnson* and *Webster*. “It is therefore an heroical achievment to dispossess this imaginary monarch.”—*Berkley’s Minute Philos.*, p. 151. “Whereby, is not meant the Present Time, as he imagins, but the Time Past.”—*Johnson’s Gram. Com.*, p. 344 “So far is this word from affecting the noun, in regard to its definitness, that its own character of

definiteness or indefiniteness, depends upon the name to which it is prefixed.”—*Webster’s Philosophical Gram.*, p. 20.

“Satire, by wholesome Lessons, wou’d reclaim,  
And heal their Vices to secure their Fame.”—*Brightland’s Gr.*, p. 171.

#### UNDER RULE XI.—OF FINAL Y.

“Solon’s the veryest fool in all the play.”—*Dryden, from Persius*, p. 475.

[FORMULE.—Not proper, because the word “*veryest*” here retains the final *y* of its primitive *very*. But, according to Rule 13th, “The final *y* of a primitive word, when preceded by a consonant, is generally changed into *i* before an additional termination.” Therefore, this *y* should be changed to *i*; thus, *veriest*.]

“Our author prides himself upon his great slyness and shrewdness.”—*Merchant’s Criticisms*. “This tense, then, implies also the signification of *Debeo*.”—*B. Johnson’s Gram. Com.*, p. 300. “That may be apply’d to a Subject, with respect to something accidental.”—*Ib.*, p. 133. “This latter accompanys his Note with a distinction.”—*Ib.*, p. 196. “This Rule is defective, and none of the Annotators have sufficiently supply’d it.”—*Ib.*, p. 204. “Though the fancy’d Supplement of Sanctius, Scioppius, Vossius, and Mariangelus, may take place.”—*Ib.*, p. 276. “Yet as to the commutableness of these two Tenses, which is deny’d likewise, they are all one.”—*Ib.*, p. 311. “Both these Tenses may represent a Futurity implied by the dependence of the Clause.”—*Ib.*, p. 332. “Cry, cries, crying, cried, crier, decial; Shy, shyer, shyest, shyly, shyness; Fly, flies, flying, flier, high-flier; Sly, slyer, slyest, slyly, slyness; Spy, spies, spying, spied, espial; Dry, drier, driest, dryly, dryness.”—*Cobb’s Dict.* “Cry, cried, crying, crier, cryer, decried, decrier, decial; Shy, shyly, shily, shyness, shiness; Fly, flier, flyer, high-flyer; Sly, slily, slyly, sliness, slyness; Ply, plyer, plying, pliers, complied, compiler; Dry, drier, dryer, dryly, dryness.”—*Webster’s Dict.*, 8vo. “Cry, crier, decrier, decial; Shy, shily, shyly, shiness, shyness; Fly, flier, flyer, high-flier; Sly, slily, slyly, sliness, slyness; Ply, pliers, plyers, plying, complier; Dry, drier, dryer, dryly, dryness.”—*Chalmers’s Abridgement of Todd’s Johnson*. “I would sooner listen to the thrumming of a dandyzette at her piano.”—*Kirkham’s Elocution*, p. 24. “Send her away; for she cryeth after us.”—*Felton’s Gram.*, p. 140. “IVYED, *a.* Overgrown with ivy.”—*Todd’s Dict.*, and *Webster’s*.

“Some dryly plain, without invention’s aid,  
Write dull receipts how poems may be made.”—*Pope*.

#### UNDER RULE XII.—OF FINAL Y.

“The gaiety of youth should be tempered by the precepts of age.”—*Mur. Key*, p. 175.

[FORMULE.—Not proper, because the word “*gaiety*” does not here retain the final *y* of the primitive word *gay*. But, according to Rule 12th, “The final *y* of a primitive word, when preceded by a vowel, should not be changed into *i* before an additional termination.” Therefore, this *y* should be retained; thus, *gayety*.]

“In the storm of 1703, two thousand stacks of chimnies were blown down, in and about London.”—See *Red Book*, p. 112. “And the vexation was not abated by the hacknied plea of haste.”—*Ib.*, p. 142. “The fourth sin of our daies is lukewarmness.”—*Perkins’s Works*, p. 725. “God hates the workers of iniquity, and destroys them that speak lies.”—*Ib.*, p. 723. “For, when he laies his hand upon us, we may not fret.”—*Ib.*, p. 726. “Care not

for it; but if thou maiest be free, choose it rather.”—*Ib.*, p. 736. “Alexander Severus saith, ‘He that buieth, must sell: I will not suffer buyers and sellers of offices.’”—*Ib.*, p. 737. “With these measures fell in all monied men.”—SWIFT: *Johnson’s Dict.* “But rattling nonsense in full vollies breaks.”—POPE: *ib.*, *w. Volley*. “Vallies are the intervals betwixt mountains.”—WOODWARD: *ib.* “The Hebrews had fifty-two journies or marches.”—*Wood’s Dict.* “It was not possible to manage or steer the gallies thus fastened together.”—*Goldsmith’s Greece*, Vol. ii, p. 106. “Turkies were not known to naturalists till after the discovery of America.”—See *Gregory’s Dict.* “I would not have given it for a wilderness of monkies.”—See *Key*. “Men worked at embroidery, especially in abbies.”—*Constable’s Miscellany*, Vol. xxi, p. 101. “By which all purchasers or mortgagees may be secured of all monies they lay out.”—TEMPLE: *Johnson’s Dict.* “He would fly to the mines and the gallies for his recreation.”—SOUTH: *Ib.*

“Here pullies make the pond’rous oak ascend.”—GAY: *ib.*

—————“You need my help, and you say,

Shylock, we would have monies.”—SHAKSPEARE: *ib.*

#### UNDER RULE XIII.—OF IZE AND ISE.

“Will any able writer authorise other men to revise his works?”—*Author*.

[FORMULES.—1. Not proper, because the word “*authorise*” is here written with *s* in the last syllable, in stead of *z*. But, according to Rule 13th, “Words ending in *ize* or *ise* sounded alike, as in *wise* and *size*, generally take the *z* in all such as are essentially formed by means of the termination.” Therefore, this *s* should be *z*; thus, *authorize*.

2. Not proper again, because the word “*revize*” is here written with *z* in the last syllable, in lieu of *s*. But, according to Rule 13th, “Words ending in *ize* or *ise* sounded alike, as in *wise* and *size*, generally take the *s*, in monosyllables, and all such as are essentially formed by means of prefixes.” Therefore, this *z* should be *s*; thus, *revise*.]

“It can be made as strong and expressive as this Latinised English.”—*Murray’s Gram.*, p. 295. “Governed by the success or the failure of an enterprize.”—*Ib.*, Vol. ii, pp. 128 and 259. “Who have patronised the cause of justice against powerful oppressors.”—*Ib.*, pp. 94 and 228; *Merchant*, p. 199. “Yet custom authorises this use of it.”—*Priestley’s Gram.*, p. 148. “They surprize myself, \* \* \* and I even think the writers themselves will be surprized.”—*Ib.*, Pref., p. xi. “Let the interest rize to any sum which can be obtained.”—*Webster’s Essays*, p. 310. “To determin what interest shall arize on the use of money.”—*Ib.*, p. 313. “To direct the popular councils and check a rizing opposition.”—*Ib.*, p. 335. “Five were appointed to the immediate exercize of the office.”—*Ib.*, p. 340. “No man ever offers himself [as] a candidate by advertizing.”—*Ib.*, p. 344. “They are honest and economical, but indolent, and destitute of enterprize.”—*Ib.*, p. 347. “I would however advize you to be cautious.”—*Ib.*, p. 404. “We are accountable for whatever we patronise in others.”—*Murray’s Key*, p. 175. “After he was baptised, and was solemnly admitted into the office.”—*Perkins’s Works*, p. 732. “He will find all, or most of them, comprized in the Exercises.”—*British Gram.*, Pref., p. v. “A quick and ready habit of methodising and regulating their thoughts.”—*Ib.*, p. xviii. “To tyrannise over the time and patience of his reader.”—*Kirkham’s Elocution*, p. iii. “Writers of dull books, however, if patronised at all, are rewarded beyond their deserts.”—*Ib.*, p. v. “A little reflection, will show the reader the propriety and the *reason* for emphasising the words marked.”—*Ib.*, p. 163. “The English Chronicle contains an account of a surprizing cure.”—*Red Book*, p. 61. “Dogmatise, to

assert positively; Dogmatizer, an asserter, a magisterial teacher.”—*Chalmers’s Dict.* “And their inflections might now have been easily analysed.”—*Murray’s Gram.*, 8vo, Vol. i, p. 113. “Authorize, disauthorise, and unauthorized; Temporize, contemporise, and extemporize.”—*Walkers Dict.* “Legalize, equalise, methodise, sluggardize, womanise, humanize, patronise, cantonize, gluttonise, epitomise, anatomize, phlebotomise, sanctuarise, characterize, synonymise, recognise, detonize, colonise.”—*Ibid.*

“This BEAUTY Sweetness always must comprize,  
Which from the Subject, well express’d will rise.”—*Brightland’s Gr.*, p. 164.

#### UNDER RULE XIV.—OF COMPOUNDS.

“The glory of the Lord shall be thy rereward.”—COMMON BIBLES: *Isa.*, lviii, 8.

[FORMULE—Not proper, because the compound word “*rereward*” has not here the orthography of the two simple words *rear* and *ward*, which compose it. But, according to Rule 14th, “Compounds generally retain the orthography of the simple words which compose them.” And, the accent being here unfixed, a hyphen is proper. Therefore, this word should be spelled thus, *rear-ward*.]

“A mere vaunt-courier to announce the coming of his master.”—*Tooke’s Diversions*, Vol. i, p. 49. “The parti-coloured shutter appeared to come close up before him.”—*Kirkham’s Elocution*, p. 233. “When the day broke upon this handfull of forlorn but dauntless spirits.”—*Ib.*, p. 245. “If, upon a plumbtree, peaches and apricots are ingrafted, no body will say they are the natural growth of the plumbtree.”—*Berkley’s Minute Philos.*, p. 45. “The channel between Newfoundland and Labrador is called the Straits of Bellisle.”—*Worcester’s Gaz.* “There being nothing that more exposes to Headach.” \*—*Locke, on Education*, p. 6. “And, by a sleep, to say we end the heartach.”—SHAK.: *in Joh. Dict.* “He that sleeps, feels not the toothach.”—*Id.*, *ibid.* “That the shoe must fit him, because it fitted his father and granfather.”—*Philological Museum*, Vol. i, p. 431. “A single word, misspelt, in a letter, is sufficient to show, that you have received a defective education.”—*Bucke’s Gram.*, p. 3. “Which mistatement the committee attributed to a failure of memory.”—*Professors’ Reasons*, p. 14. “Then he went through the Banqueting-House to the scaffold.”—*Smollett’s England*, Vol. iii, p. 345. “For the purpose of maintaining a clergyman and skoolmaster.”—*Webster’s Essays*, p. 355. “They however knew that the lands were claimed by Pennsylvania.”—*Ib.*, p. 357. “But if you ask a reason, they immediately bid farewell to argument.”—*Red Book*, p. 80. “Whom resist stedfast in the faith.”—SCOTT: 1 *Peter*, v, 9. “And they continued stedfastly in the apostles’ doctrine.”—*Acts*, ii, 42. “Beware lest ye also fall from your own stedfastness.”—2 *Peter*, iii, 17. “*Galiot*, or *galliot*, a Dutch vessel, carrying a main-mast and a mizen-mast.”—*Web. Dict.* “Infinitive, to overflow; Preterit, overflowed; Participle, overflown.”—*Cobbett’s E. Gram.*, (1818,) p. 61. “After they have misspent so much precious Time.”—*British Gram.*, p. xv. “Some say, two *handsfull*; some, two *handfulls*; and others, two *handfull*.”—*Alex. Murray’s Gram.*, p. 106. “Lapfull, as much as the lap can contain.”—*Webster’s Octavo Dict.* “Darefull, full of defiance.”—*Walker’s Rhym. Dict.* “The road to the blissfull regions, is as

\* *Ache*, and its plural, *aches*, appear to have been formerly pronounced like the name of the eighth letter, with its plural, *Aitch*, and *Aitches*; for the old poets made “*aches*” two syllables. But Johnson says of *ache*, a pain, it is “now generally written *ake*, and in the plural *akes*, of one syllable.”—See his *Quarto Dict.* So Walker: “It is now almost universally written *ake* and *akes*.”—See *Walker’s Principles*, No. 355. So Webster: “*Ake*, less properly written *ache*.”—See his *Octavo Dict.* But Worcester seems rather to prefer *ache*.—G. B.

open to the peasant as to the king.”—*Murray’s Key*, 8vo, p. 167. “Mis-spel is *mis-spell* in every Dictionary which I have seen.”—*Barnes’s Red Book*, p. 303. “Downfal; ruin, calamity, fall from rank or state.”—*Johnson’s Dict.* “The whole legislature likewise acts az a court.”—*Webster’s Essays*, p. 340. “It were better a milstone were hanged about his neck.”—*Perkins’s Works*, p. 731. “Plum-tree, a tree that produces plums; Hog-plumbtree, a tree.”—*Webster’s Dict.* “Trisyllables ending in *re* or *le*, accent the first syllable.”—*Murray’s Gram.*, p. 238.

“It happen’d on a summer’s holiday,  
That to the greenwood shade he took his way.”—*Churchill’s Gr.*, p. 135.

#### UNDER RULE XV.—OF USAGE.

“Nor are the modes of the Greek tongue more uniform.”—*Murray’s Gram.*, p. 112.

[FORMULE.—Not proper, because the word “*modes*” is here written for *moods*, which is more common among the learned, and usually preferred by Murray himself. But, according to Rule 15th, “Any word for the spelling of which we have no rule but usage, is written wrong if not spelled according to the usage which is most common among the learned.” Therefore, the latter form should be preferred; thus, *moods*, and not *modes*.]

“If we analyze a conjunctive preterite, the rule will not appear to hold.”—*Priestley’s Gram.*, p. 118. “No landholder would have been at that expence.”—*Ib.*, p. 116. “I went to see the child whilst they were putting on its cloaths.”—*Ib.*, p. 125. “This stile is ostentatious, and doth not suit grave writing.”—*Ib.*, p. 82. “The king of Israel, and Jehosophat the king of Judah, sat each on his throne.”—*Mur. Gram.*, p. 165, *twice*; *Merchant’s*, 89; *Churchill’s*, 300. “The king of Israel, and Jehosaphat the king of Judah, sat each on his throne.”—*Lowth’s Gram.*, p. 90; *Harrison’s*, 99; *Churchill’s*, 138; *Wright’s*, 148. “Lisias, speaking of his friends, promised to his father, never to abandon them.”—*Murray’s Gram.*, Vol. ii, pp. 121 and 253. “Some, to avoid this errour, run into it’s opposite.”—*Churchill’s Gram.*, p. 199. “Hope, the balm of life, soothes us under every misfortune.”—*Merchants Key*, p. 204. “Any judgement or decree might be heerd and reversed by the legislature.”—*Webster’s Essays*, p. 340. “A pathetic harang wil skreen from punishment any knave.”—*Ib.*, p. 341. “For the same reezon, the wimen would be improper judges.”—*Ibid.* “Every person iz indulged in worshiping az he pleezes.”—*Ib.*, p. 345. “Most or all teechers are excluded from genteel company.”—*Ib.*, p. 362. “The Kristian religion, in its purity, iz the best institution on erth.”—*Ib.*, p. 364. “Neether clergymen nor human laws hav the leest authority over the conscience.”—*Ib.*, p. 363. “A gild is a society, fraternity, or corporation.”—*Red Book*, p. 83. “Phillis was not able to unty the knot, and so she cut it.”—*Ib.*, p. 46. “An aker of land is the quantity of one hundred and sixty perches.”—*Ib.*, p. 93. “Oker is a fossil earth combined with the oxid of some metal.”—*Ib.*, p. 96. “*Genii*, when denoting ærial spirits: *Geniuses*, when signifying persons of genius.”—*Mur.’s Gram.*, i, p. 42. “*Genii*, when denoting æriel spirits; *Geniuses*, when signifying persons of genius.”—*Frost’s Gram.*, p. 9. “Genius, Plu. *geniuses*, men of wit; but *genii*, ærial beings.”—*Nutting’s Gram.*, p. 18. “Aerisius, king of Argos, had a beautiful daughter, whose name was Danaë.”—*Classic Tales*, p. 109. “Phæton was the son of Apollo and Clymene.”—*Ib.*, p. 152. “But, after all, I may not have reached the intended Gaol.”—*Buchanan’s Syntax*, Pref., p. xxvii. “‘Pitticus was offered a large sum.’ Better: ‘A large sum was offered to Pitticus.’”—*Kirkham’s Gram.*, p. 187. “King Missipsi charged his sons to respect the senate and people of Rome.”—See *ib.*, p. 161. “For example: Gallileo invented

the telescope.”—*Ib.*, pp. 54 and 67. “Cathmor’s warriors sleep in death.”—*Ib.*, p. 54. “For parsing will enable you to detect and correct errors in composition.”—*Ib.*, p. 50.

“O’er barren mountains, o’er the flow’ry plain,  
Extends thy uncontroul’d and boundless reign.”—*Dryden*.

## PROMISCUOUS ERRORS IN SPELLING.

### LESSON I.—MIXED.

“A bad author deserves better usage than a bad critick.”—POPE: *Johnson’s Dict.*, *w. Former*. “Produce a single passage superiour to the speech of Logan, a Mingo chief, delivered to Lord Dunmore, when governor of Virginia.”—*Kirkham’s Elocution*, p. 247. “We have none synonymous to supply its place.”—*Jamieson’s Rhetoric*, p. 48. “There is a probability that the effect will be accelerated.”—*Ib.*, p. 48. “Nay, a regard to sound hath controuled the public choice.”—*Ib.*, p. 46. “Though learnt from the uninterrupted use of gutterel sounds.”—*Ib.*, p. 5. “It is by carefully filing off all roughness and inequaleties, that languages, like metals, must be polished.”—*Ib.*, p. 48. “That I have not mispent my time in the service of the community.”—*Buchanan’s Syntax*, Pref., p. xxviii. “The leaves of maiz are also called blades.”—*Webster’s El. Spelling-Book*, p. 43. “Who boast that they know what is past, and can foretel what is to come.”—*Robertson’s Amer.*, Vol. i, p. 360. “Its tasteless dullness is interrupted by nothing but its perplexities.”—*Abbott’s Teacher*, p. 18. “Sentences constructed with the Johnsonian fullness and swell.”—*Jamieson’s Rhet.*, p. 130. “The privilege of escaping from his prefatory dullness and prolixity.”—*Kirkham’s Elocution*, p. iv. “But in poetry this characteristick of dulness attains its full growth.”—*Ib.*, p. 72. “The leading characteristick consists in an increase of the force and fullness.”—*Ib.*, p. 71. “The character of this opening fulness and feebler vanish.”—*Ib.*, p. 31. “Who, in the fullness of unequalled power, would not believe himself the favourite of heaven?”—*Ib.*, p. 181. “They marr one another, and distract him.”—*Philological Museum*, Vol. i, p. 433. “Let a deaf worshipper of antiquity and an English prosodist settle this.”—*Rush, on the Voice*, p. 140. “This phillipic gave rise to my satirical reply in self-defence.”—*Merchant’s Criticisms*. “We here saw no inuendoes, no new sophistry, no falsehoods.”—*Ib.* “A witty and humourous vein has often produced enemies.”—*Murray’s Key*, p. 173. “Cry holla! to thy tongue, I prythee: it curvetts unseasonably.”—*Shak.* “I said, in my slyest manner, ‘Your health, sir.’”—*Blackwood’s Mag.*, Vol. xl, p. 679. “And attornies also travel the circuit in pursute of business.”—*Red Book*, p. 83. “Some whole counties in Virginia would hardly sel for the valu of the dets du from the inhabitants.”—*Webster’s Essays*, p. 301. “They were called the court of assistants, and exercized all powers legislativ and judicial.”—*Ib.*, p. 340. “Arithmetic is excellent for the guaging of liquors.”—*Murray’s Gram.*, 8vo, p. 288. “Most of the inflections may be analysed in a way somewhat similar.”—*Ib.*, p. 112.

“To epithets allots emphatic state,  
Whilst principals, ungrac’d, like lacquies wait.”—*C. Churchill’s Ros.*, p. 8.

### LESSON II.—MIXED.

“Hence it [less] is a privative word, denoting destitution; as, fatherless, faithless, pennyless.”—*Webster’s Dict.*, *w. Less*. “*Bay*; red, or reddish, inclining to a chesnut color.”—*Same*. “*To mimick*, to imitate or ape for sport; *a mimic*, one who imitates or mimics.”—*Ib.* “Counterroil, a counterpart or copy of the rolls; Counterrolment, a counter account.”—*Ib.* “Millenium, the thousand years during which Satan shall be bound.”—*Ib.* “Millenial, pertaining to the millenium, or to a thousand years.”—*Ib.* “Thraldom; slavery,

bondage, a state of servitude.”—See *Johnson’s Dict.* “Brier, a prickly bush; Briery, rough, prickly, full of briers; Sweetbriar, a fragrant shrub.”—See *Johnson, Walker, Chalmers, Webster, and others.* “Will, in the second and third Persons, barely foretels.”—*British Gram.*, p. 132. “And therefor there is no Word false, but what is distinguished by Italics.”—*Ib.*, Pref., p. v. “What should be repeted is left to their Discretion.”—*Ib.*, p. iv. “Because they are abstracted or seperated from material Substances.”—*Ib.*, p. ix. “All Motion is in Time, and therefor, where-ever it exists, implies Time as its Concomitant.”—*Ib.*, p. 140. “And illiterate grown persons are guilty of blameable spelling.”—*Ib.*, Pref., p. xiv. “They wil always be ignorant, and of ruf uncivil manners.”—*Webster’s Essays*, p. 346. “This fact wil hardly be beleaved in the northern states.”—*Ib.*, p. 367. “The province however waz harrassed with disputes.”—*Ib.*, p. 352. “So little concern haz the legislature for the interest of lerning.”—*Ib.*, p. 349. “The gentlemen wil not admit that a skoolmaster can be a gentleman.”—*Ib.*, p. 362. “Such absurd qui-pro-quoos cannot be too strenuously avoided.”—*Churchill’s Gram.*, p. 205. “When we say, ‘a man looks *slyly*,’ we signify, that he assumes a *sly look*.”—*Ib.*, p. 339. “*Peep*; to look through a crevice; to look narrowly, closely, or slyly.”—*Webster’s Dict.* “Hence the confession has become a hacknied proverb.”—*Wayland’s Moral Science*, p. 110. “Not to mention the more ornamental parts of guilding, varnish, &c.”—*Tooke’s Diversions*, Vol. i, p. 20. “After this system of self-interest had been rivetted.”—*Brown’s Estimate*, Vol. ii, p. 136. “Prejudice might have prevented the cordial approbation of a bigotted Jew.”—SCOTT: *on Luke*, x.

“All twinkling with the dew-drop sheen,  
The briar-rose fell in streamers green.”—*Lady of the Lake*, p. 16.

### LESSON III.—MIXED.

“The infinitive mode has commonly the sign *to* before it.”—*Harrison’s Gram.*, p. 25. “Thus, it is adviseable to write *singeing*, from the verb to *singe*, by way of distinction from *singing*, the participle of the verb to *sing*.”—*Ib.*, p. 27. “Many verbs form both the preterite tense and the preterite participle irregularly.”—*Ib.*, p. 28. “Much must be left to every one’s taste and judgment.”—*Ib.*, p. 67. “Verses of different lengths intermixed form a Pindarick poem.”—*Priestley’s Gram.*, p. 44. “He’ll surprize you.”—*Frost’s El. of Gram.*, p. 88. “Unequalled archer! why was this concealed?”—KNOWLES: *ib.*, p. 102. “So gaily curl the waves before each dashing prow.”—BYRON: *ib.*, p. 104. “When is a dipthong called a proper dipthong?”—*Infant School Gram.*, p. 11. “How many *ss* would goodness then end with? Three.”—*Ib.*, p. 33. “*Q.* What is a triphthong? *A.* A triphthong is the union of three vowels, pronounced in like manner.”—*Bacon’s Gram.*, p. 7. “The verb, noun, or pronoun, is referred to the preceding terms taken seperately.”—*Ib.*, p. 47. “The cubic foot of matter which occupies the center of the globe.”—*Cardell’s Gram.*, 18mo, p. 47. “The wine imbibes oxigen, or the acidifying principle, from the air.”—*Ib.*, p. 62. “Charcoal, sulphur, and niter, make gun powder.”—*Ib.*, p. 90. “It would be readily understood, that the thing so labeled, was a bottle of Madeira wine.”—*Ib.*, p. 99. “They went their ways, one to his farm, an other to his merchandize.”—*Ib.*, p. 130. “A dipthong is the union of two vowels, sounded by a single impulse of the voice.”—*Russell’s Gram.*, p. 7. “The professors of the Mahommedan religion are called Mussulmans.”—*Maltby’s Gram.*, p. 73. “This shews that *let* is not a sign of the imperative mood, but a real verb.”—*Ib.*, p. 51. “Those preterites and participles, which are first mentioned in the list, seem to be the most eligible.”—*Ib.*, p. 47. “Monosyllables, for the most part, are compared by *er* and *est*; and dyssyllables by *more* and *most*.”—*Ib.*, p. 19. “This termination, added to a noun, or adjective, changes it into a verb: as *modern*, to *modernise*; a *symbol*, to *symbolize*.”—*Churchill’s Gram.*, p. 24. “An

Abridgment of Murray's Grammar, with additions from Webster, Ash, Tooke, and others."—*Maltby's title-page*. "For the sake of occupying the room more advantageously, the subject of Orthography is merely glanced at."—*Nutting's Gram.*, p. 5. "So contended the accusers of Gallileo."—*O. B. Peirce's Gram.*, 12mo, 1839, p. 380. "Murray says, 'They were *traveling past* when *we* met them.'"—*Peirce, ib.*, p. 361. "They fulfil the only purposes for which they are designed."—*Ib.*, p. 359. "On the fulfillment of the event."—*Ib.*, p. 175. "Fullness consists in expressing every idea."—*Ib.*, p. 291. "Consistently with fulness and perspicuity."—*Ib.*, p. 337. "The word *verriest* is a gross corruption; as, 'He is the *verriest* fool on earth.'"—*Wright's Gram.*, p. 202. "The sound will recal the idea of the object."—*Hiley's Gram.*, p. 142. "Formed for great enterprizes."—*Bullions's Prin. of E. Gram.*, p. 153. "The most important rules and definitions are printed in large type, *italicised*."—*Hart's Gram.*, p. 3. "HAMLETTED, *a*. Accustomed to a hamlet; countrified."—*Bolles's Dict.*, and *Chalmers's*. "Singular, *spoonful, cup-full, coach-full, handful*; plural, *spoonfuls, cup-fulls, coach-fulls, handfuls*."—*Bullions's Analyt. and Pract. Gram.*, p. 27.

"Between Superlatives and following Names,  
OF, by Grammatick Right, a Station claims."—*Brightland's Gram.*, p. 146.

## CHAPTER V.—QUESTIONS.

### ORDER OF REHEARSAL, AND METHOD OF EXAMINATION.

☞ [The student ought to be able to answer with readiness, and in the words of the book, all the following questions on grammar. And if he has but lately commenced the study, it may be well to require of him a general rehearsal of this kind, before he proceeds to the correction of any part of the false grammar quoted in the foregoing chapters. At any rate, he should be master of so many of the definitions and rules as precede the part which he attempts to correct; because this knowledge is necessary to a creditable performance of the exercise. But those who are very quick at reading, may perform it *tolerably*, by consulting the book at the time, for what they do not remember. The answers to these questions will embrace all the main text of the work; and, if any further examination be thought necessary, extemporaneous questions may be framed for the purpose.]

### LESSON I.—GRAMMAR.

1. What is the name, or title, of this book? 2. What is Grammar? 3. What is an English Grammar? 4. What is English Grammar, in itself? and what knowledge does it imply? 5. If grammar is the art of reading, writing, and speaking, define these actions. What is it, *to read*? 6. What is it, *to write*? 7. What is it, *to speak*? 8. How is grammar to be taught, and by what means are its principles to be made known? 9. What is a perfect definition? 10. What is an example, as used in teaching? 11. What is a rule of grammar? 12. What is an exercise? 13. What was language at first, and what is it now? 14. Of what two kinds does the composition of language consist? and how do they differ? 15. What are the least parts of language? 16. What has discourse to do with sentences? or sentences, with points? 17. In extended compositions, what is the order of the parts, upwards from a sentence? 18. What, then, is the common order of literary division, downwards, throughout? 19. Are all literary works divided exactly in this way? 20. How is Grammar divided? 21. Of what does Orthography treat? 22. Of what does Etymology treat? 23. Of what does Syntax treat? 24. Of what does Prosody treat?

**PART FIRST, ORTHOGRAPHY.**

## LESSON II.—LETTERS.

1. Of what does Orthography treat? 2. What is a letter? 3. What is an elementary sound of human voice, or speech? 4. What name is given to the sound of a letter? and what epithet, to a letter not sounded? 5. How many letters are there in English? and how many sounds do they represent? 6. In what does a knowledge of the letters consist? 7. What variety is there in the letters? and how are they always the same? 8. What different sorts of types, or styles of letters, are used in English? 9. What are the names of the letters in English? 10. What are their names in both numbers, singular and plural? 11. Into what general classes are the letters divided? 12. What is a vowel? 13. What is a consonant? 14. What letters are vowels? and what, consonants? 15. When are *w* and *y* consonants? and when, vowels? 16. How are the consonants divided? 17. What is a semivowel? 18. What is a mute? 19. What letters are reckoned semivowels? and how many of these are aspirates? 20. What letters are called liquids? and why? 21. What letters are reckoned mutes? and which of them are imperfect mutes?

## LESSON III.—SOUNDS.

1. What is meant, when we speak of the powers of the letters? 2. Are the sounds of a language fewer than its words? 3. How are different vowel sounds produced? 4. What are the vowel sounds in English? 5. How may these sounds be modified in the formation of syllables? 6. Can you form a word upon each by means of an *f*? 7. Will you try the series again with a *p*? 8. How may the vowel sounds be written? and how uttered when they are not words? 9. Which of the vowel sounds form words? and what of the rest? 10. How many and what are the consonant sounds in English? 11. In what series of words may all these sounds be heard? 12. In what series of words may each of them be heard two or three times? 13. What is said of the sounds of *j* and *x*? 14. What is said of the sounds of *c* and *g*? 15. What is said of *sc*, or *s* before *c*? 16. What, of *ce*, *ci*, and *ch*? 17. What sounds has the consonant *g*? 18. In how many different ways can the letters of the alphabet be combined? 19. What do we derive from these combinations of sounds and characters?

## LESSON IV.—CAPITALS.

1. What characters are employed in English? 2. Why should the different sorts of letters be kept distinct? 3. What is said of the slanting strokes in Roman letters? 4. For what purpose are *Italics* chiefly used? 5. In preparing a manuscript, how do we mark these things for the printer? 6. What distinction of form belongs to each of the letters? 7. What is said of small letters? and why are capitals used? 8. What things are commonly exhibited wholly in capitals? 9. How many rules for capitals are given in this book? and what are their titles? 10. What says Rule 1st of *books*? 11. What says Rule 2d of *first words*? 12. What says Rule 3d of *names of Deity*? 13. What says Rule 4th of *proper names*? 14. What says Rule 5th of *titles*? 15. What says Rule 6th of *one capital*? 16. What says Rule 7th of *two capitals*? 17. What says Rule 8th of *compounds*? 18. What says Rule 9th of *apposition*? 19. What says Rule 10th of *personifications*? 20. What says Rule 11th of *derivatives*? 21. What says Rule 12th of *I and O*? 22. What says Rule 13th of *poetry*? 23. What says Rule 14th of *examples*? 24. What says Rule 15th of *chief words*? 25. What says Rule 16th of *needless capitals*?

[Now turn to the first chapter of Orthography, and correct the improprieties there quoted for the practical application of these rules.]

#### LESSON V.—SYLLABLES.

1. What is a syllable? 2. Can the syllables of a word be perceived by the ear? 3. Under what names are words classed according to the number of their syllables? 4. Which of the letters can form syllables of themselves? and which cannot? 5. What is a diphthong? 6. What is a proper diphthong? 7. What is an improper diphthong? 8. What is a triphthong? 9. What is a proper triphthong? 10. What is an improper triphthong? 11. How many and what are the diphthongs in English? 12. How many and which of these are so variable in sound that they may be either proper or improper diphthongs? 13. How many and what are the proper diphthongs? 14. How many and what are the improper diphthongs? 15. Are proper triphthongs numerous in our language? 16. How many and what are the improper triphthongs? 17. What guide have we for dividing words into syllables? 18. How many special rules of syllabication are given in this book? and what are their titles, or subjects? 19. What says Rule 1st of *consonants*? 20. What says Rule 2d of *vowels*? 21. What says Rule 3d of *terminations*? 22. What says Rule 4th of *prefixes*? 23. What says Rule 5th of *compounds*? 24. What says Rule 6th of *lines full*?

[Now turn to the second chapter of Orthography, and correct the improprieties there quoted for the practical application of these rules.]

#### LESSON VI.—WORDS.

1. What is a word? 2. How are words distinguished in regard to *species* and *figure*? 3. What is a primitive word? 4. What is a derivative word? 5. What is a simple word? 6. What is a compound word? 7. How do permanent compounds differ from others? 8. How many rules for the figure of words are given in this book? and what are their titles, or subjects? 9. What says Rule 1st of *compounds*? 10. What says Rule 2d of *simples*? 11. What says Rule 3d of *the sense*? 12. What says Rule 4th of *ellipses*? 13. What says Rule 5th of *the hyphen*? 14. What says Rule 6th of *no hyphen*?

[Now turn to the third chapter of Orthography, and correct the improprieties there quoted for the practical application of these rules.]

#### LESSON VII.—SPELLING.

1. What is spelling? 2. How is this art to be acquired? and why so? 3. Why is it difficult to learn to spell accurately? 4. Is it then any disgrace to spell words erroneously? 5. What benefit may be expected from the rules for spelling? 6. How many rules for spelling are given in this book? and what are their titles, or subjects? 7. What says Rule 1st of *final f, l, or s*? 8. Can you mention the principal exceptions to this rule? 9. What says Rule 2d of *other finals*? 10. Are there any exceptions to this rule? 11. What says Rule 3d of the *doubling* of consonants? 12. Under what three heads are the exceptions to this rule noticed? 13. What says Rule 4th *against the doubling* of consonants? 14. Under what four heads are the apparent exceptions to this Rule noticed? 15. What says Rule 5th of *final ck*? 16. What monosyllables, contrary to this rule, end with *c* only? 17. What says Rule 6th of the *retaining* of double letters before affixes? 18. Under what three heads are the exceptions to this rule noticed? 19. What says Rule 7th of the *retaining* of double letters after prefixes? 20. What observation is made respecting exceptions to this rule?

## LESSON VIII.—SPELLING.

21. What says Rule 8th of *final ll*, and of *final l single*? 22. What words does this rule claim, which might seem to come under Rule 7th? and why? 23. What says Rule 9th of *final e omitted*? 24. Under what three heads are the exceptions, real or apparent, here noticed? 25. What says Rule 10th of *final e retained*? 26. Under what three heads are the exceptions to this rule noticed? 27. What says Rule 11th of *final y changed*? 28. Under what three heads are the limits and exceptions to this rule noticed? 29. What says Rule 12th of *final y unchanged*? 30. Under what three heads are the exceptions to this rule noticed? 31. What says Rule 13th of the terminations *ize* and *ise*? 32. Under what three heads are the apparent exceptions to this rule noticed? 33. What says Rule 14th of *compounds*? 34. Under what seven heads are the exceptions to this rule noticed? 35. What says Rule 15th of *usage*, as a law of spelling?

[Now turn to the fourth chapter of Orthography, and correct the improprieties there quoted for the practical application of these rules and their exceptions.]

## CHAPTER VI.—FOR WRITING.

## EXERCISES IN ORTHOGRAPHY.

☞ [The following examples of false orthography are inserted here, and not explained in the general Key, that they may be corrected by the pupil *in writing*. Some of the examples here quoted are less inaccurate than others, but all of them, except a few shown in contrast, are, in some respect or other, erroneous. It is supposed, that every student who can answer the questions contained in the preceding chapter, will readily discern wherein the errors lie, and be able to make the necessary corrections.]

## EXERCISE I.—CAPITALS.

“Alexander the great killed his friend Clitus.”—*Harrison’s Gram.*, p. 68. “The words in italics are parsed in the same manner.”—*Maltby’s Gram.*, p. 69. “It may be read by those who do not understand latin.”—*Barclay’s Works*, Vol. iii, p. 262. “A roman *s* being added to a word in italics or small capitals.”—*Churchill’s Gram.*, p. 215. “This is not simply a gallicism, but a corruption of the French *on*; itself a corruption.”—*Ib.*, p. 228. “The Gallicism, ‘*it is me*,’ is perpetually striking the ear in London.”—*Ib.*, p. 316. “‘Almost nothing,’ is a common Scotticism, equally improper: it should be, ‘scarcely any thing.’”—*Ib.*, p. 333. “To use *learn* for *teach*, is a common Scotticism, that ought to be carefully avoided.”—See *ib.*, p. 261. “A few observations on the subjunctive mood as it appears in our English bible.”—*Wilcox’s Gram.*, p. 40. “The translators of the bible, have confounded two tenses, which in the original are uniformly kept distinct.”—*Ib.*, p. 40. “More like heaven on earth, than the holy land would have been.”—*Anti-Slavery Mag.*, Vol. i, p. 72. “There is now extant a poetical composition, called the golden verses of Pythagoras.”—*Lempriere’s Dict.* “Exercise of the Mind upon Theorems of Science, like generous and manly Exercise of the Body, tends to call forth and strengthen Nature’s original Vigour.”—*Harris’s Hermes*, p. 295. “O that I could prevail on Christians to melt down, under the warm influence of brotherly love, all the distinctions of methodists, independents, baptists, anabaptists, arians, trinitarians, unitarians, in the glorious name of christians.”—KNOX: *Churchill’s Gram.*, p. 173. “Pythagoras long ago remarked, ‘that ability and necessity dwell near each other.’”—*Student’s Manual*, p. 285.

“The Latin Writers Decency neglect,  
But modern Readers challenge more Respect.”—*Brightland's Gram.*, p. 172.

#### EXERCISE II.—SYLLABLES.

1. Correct *Bolles*, in the division of the following words: “Del-ia, Jul-ia, Lyd-ia, heigh-ten, pat-ron, ad-roit, worth-y, fath-er, fath-er-ly, mar-chi-o-ness, i-dent-ic-al, out-ra-geous, ob-nox-i-ous, pro-di-gi-ous, tre-mend-ous, ob-liv-i-on, pe-cul-i-ar.”—*Revised Spelling-Book*: New London, 1831.

2. Correct *Sears*, in the division of the following words: “A-quil-a, hear-ty, drea-ry, wor-my, hai-ry, thor-ny, phil-os-o-phy, dis-cov-e-ry, re-cov-e-ry, ad-diti-on, am-biti-on, au-spici-ous, fac-titi-ous, fla-giti-ous, fru-iti-on, sol-stiti-al, ab-o-liti-on.”—*Standard Spelling-Book*: “New Haven,” 1826.

3. Correct *Bradley*, in the division of the following words: “Jes-ter, rai-ny, forg-e-ry, fin-e-ry, spic-e-ry, brib-e-ry, groc-e-ry, chi-can-e-ry, fer-riage, line-age, cri-ed, tri-ed, sù-ed, slic-ed, forc-ed, pledg-ed, sav-ed, dup-ed, strip-ed, touch-ed, trounc-ed.”—*Improved Spelling-Book*: Windsor, 1815.

4. Correct *Burhans*, in the division of the following words: “Boar-der, brigh-ten, cei-ling, frigh-ten, glea-ner, lea-kage, suc-ker, mos-sy, fros-ty, twop-ence, pu-pill-ar-y, crit-i-call-y, gen-er-all-y, lit-er-all-y, log-i-call-y, trag-i-call-y, ar-ti-fici-al, po-liti-call-y, sloth-full-y, spite-full-y, re-all-y, sui-ta-ble, ta-mea-ble, flumm-er-y, nesc-i-ence, shep-her-dess, trav-ell-er, re-pea-ter, re-pressi-on, suc-cessi-on, un-lear-ned.”—*Critical Pronouncing Spelling-Book*: \* *Philadelphia*, 1823.

5. Correct *Marshall*, in the division of the following words: “Trench-er, trunch-eon, dros-sy, glos-sy, glas-sy, gras-sy, dres-ses, pres-ses, cal-ling, chan-ging, en-chan-ging, con-ver-sing, mois-ture, join-ture, qua-drant, qua-drate, trans-gres-sor, dis-es-teem.”—*New Spelling-Book*: New York, 1836.

6. Correct *Emerson*, in the division of the following words: “Dus-ty mis-ty, mar-shy, mil-ky, wes-tern, stor-my, nee-dy, spee-dy, drea-ry, fros-ty, pas-sing, roc-ky, bran-chy, bland-ish, pru-dish, eve-ning, a-noth-er.”—*National Spelling-Book*: Boston, 1828.

“Two Vowels meeting, each with its full Sound,  
Always to make Two Syllables are bound.”—*Brightland's Gram.*, p. 64.

#### EXERCISE III.—FIGURE OF WORDS.

“I was surprised by the return of my long lost brother.”—*Parker's Exercises in English Composition*, p. 5. “Such singular and unheard of clemency cannot be passed over by me in silence.”—*Ib.*, p. 10. “I perceive my whole system excited by the potent stimulus of sunshine.”—*Ib.*, p. 11. “To preserve the unity of a sentence, it is sometimes necessary to employ the case absolute, instead of the verb and conjunction.”—*Ib.*, p. 17. “Severity and

---

\* This book has, probably, more *recommenders* than any other of the sort. I have not patience to count them accurately, but it would seem that *more than a thousand* of the great and learned have certified to the world, that they never before had seen so good a spelling-book! With personal knowledge of more than fifty of the signers, G. B. refused to add his poor name, being ashamed of the mischievous facility with which very respectable men had loaned their signatures.

hard hearted opinions accord with the temper of the times.”—*Ib.*, p. 18. “That poor man was put into the mad house.”—*Ib.*, p. 22. “This fellow must be put into the poor house.”—*Ib.*, p. 22. “I have seen the breast works and other defences of earth, that were thrown up.”—*Ib.*, p. 24. “Cloven footed animals are enabled to walk more easily on uneven ground.”—*Ib.*, p. 25. “Self conceit blasts the prospects of many a youth.”—*Ib.*, p. 26. “Not a moment should elapse without bringing some thing to pass.”—*Ib.*, p. 36. “A school master decoyed the children of the principal citizens into the Roman camp.”—*Ib.*, p. 39. “The pupil may now write a description of the following objects. A school room. A steam boat. A writing desk. A dwelling house. A meeting house. A paper mill. A grist mill. A wind mill.”—*Ib.*, p. 45. “Every metaphor should be founded on a resemblance which is clear and striking; not far fetched, nor difficult to be discovered.”—*Ib.*, p. 49. “I was reclining in an harbour overhung with honey suckle and jessamine of the most exquisite fragrance.”—*Ib.*, p. 51. “The author of the following extract is speaking of the slave trade.”—*Ib.*, p. 60. “The all wise and benevolent Author of nature has so framed the soul of man, that he cannot but approve of virtue.”—*Ib.*, p. 74. “There is something of self denial in the very idea of it.”—*Ib.*, p. 75. “Age therefore requires a well spent youth to render it happy.”—*Ib.*, p. 76. “Pearl-ash requires much labour in its extraction from ashes.”—*Ib.*, p. 91. “*Club*, or *crump*, *footed*, Loripes; *Rough*, or *leather*, *footed*, Plumipes.”—*Ainsworth’s Dict.*

“The honey-bags steal from the humble bees,  
And for night-tapers crop their waxen thighs.”—SHAK.: *Joh.’s Dict.*, *w. Glowworm.*  
“The honeybags steal from the bumblebees,  
And for night tapers crop their waxen thighs.”—SHAK.: *Joh.’s Dict.*, *w. Humblebee.*  
“The honey bags steal from the humble-bees,  
And, for night tapers crop their waxen thighs.”—*Dodd’s Beauties of Shak.*, p. 51.

#### EXERCISE IV.—SPELLING.

“His antichamber, and room of audience, are little square chambers wainscoted.”—ADDISON: *Johnson’s Dict.*, *w. Antechamber*. “Nobody will deem the quicksighted amongst them to have very enlarged views of ethicks.”—LOCKE: *Ib.*, *w. Quicksighted*. “At the rate of this thick-skulled blunderhead, every plow-jobber shall take upon him to read upon divinity.”—L’ESTRANGE: *Ib.*, *m. Blunderhead*. “On the topmast, the yards, and boltsprit would I flame distinctly.”—SHAK.: *Ib.*, *w. Bowsprit*. “This is the tune of our catch plaid by the picture of nobody.”—ID.: *Ib.*, *w. Nobody*. “Thy fall hath left a kind of blot to mark the fulfraught man.”—ID.: *Ib.*, *w. Fulfraught*. “Till blinded by some Jack o’Lanthorn sprite.”—*Snelling’s Gift*, p. 62. “The beauties you would have me eulogise.”—*Ib.*, p. 14. “They rail at me—I gaily laugh at them.”—*Ib.*, p. 13. “Which the king and his sister had intrusted to him withall.”—*Josephus*, Vol. v, p. 143. “The terms of these emotions are by no means synonymous.”—*Rush, on the Voice*, p. 336. “Lillied, *adj.* Embellished with lilies.”—*Chalmers’s Dict.* “They seize the compendious blessing without exertion and without reflexion.”—*Philological Museum*, Vol. i, p. 428. “The first cry that rouses them from their torpours, is the cry that demands their blood.”—*Ib.*, p. 433. “It meets the wants of elementary schools and deserves to be patronised.”—*Kirkham’s Gram.*, p. 5. “Whose attempts were paralysed by the hallowed sound.”—*Music of Nature*, p. 270. “It would be an amusing investigation to analyse their language.”—*Ib.*, p. 200. “It is my father’s will that I should take on me the hostess-ship of the day.”—SHAK.: *in Johnson’s Dict.* “To retain the full apprehension of them undiminisht.”—*Phil. Museum.*, Vol. i, p. 458. “The ayes and noes were taken in the House of Commons.”—*Anti-Slavery Mag.*, Vol. i, p. 11. “Derivative words are formed by adding letters or syllables to primitives.”—*Davenport’s Gram.*, p. 7. “The

minister never was thus harrassed himself.”—*Nelson, on Infidelity*, p. 6. “The most vehement politician thinks himself unbiassed in his judgment.”—*Ib.*, p. 17. “Mistress-ship, *n.* Female rule or dominion.”—*Webster’s Dict.*

“Thus forced to kneel, thus groveling to embrace,  
The scourge and ruin of my realm and race.”—POPE: *Ash’s Gram.*, p. 83.

#### EXERCISE V.—MIXED ERRORS.

“The quince tree is of a low stature; the branches are diffused and crooked.”—MILLER: *Johnson’s Dict.* “The greater slow worm, called also the blindworm, is commonly thought to be blind, because of the littleness of his eyes.”—GREW: *ib.* “Oh Hocus! where art thou? It used to go in another guess manner in thy time.”—ARBUTHNOT: *ib.* “One would not make a hotheaded crackbrained coxcomb forward for a scheme of moderation.”—ID.: *ib.* “As for you, colonel huff-cap, we shall try before a civil magistrate who’s the greatest plotter.”—DRYDEN: *ib.*, *w. Huff.* “In like manner, Actions co-alesce with their Agents, and Passions with their Patients.”—*Harris’s Hermes*, p. 263. “These Sentiments are not unusual even with the Philosopher now a days.”—*Ib.*, p. 350. “As if the Marble were to fashion the Chizzle, and not the Chizzle the Marble.”—*Ib.*, p. 353. “I would not be understood, in what I have said, to undervalue Experiment.”—*Ib.*, p. 352. “How therefore is it that they approach nearly to Non-Entity’s?”—*Ib.*, p. 431. “Gluttonise, modernise, epitomise, barbarise, tyrannise.”—*Churchill’s Gram.*, pp. 31 and 42. “Now fair befall thee and thy noble house!”—SHAK.: *ib.*, p. 241. “Nor do I think the error above-mentioned would have been so long indulged,” &c.—*Ash’s Gram.*, p. 4. “The editor of the two editions above mentioned was pleased to give this little manuel to the public,” &c.—*Ib.*, p. 7. “A Note of Admiration denotes a modelation of the voice suited to the expression.”—*Ib.*, p. 16. “It always has some respect to the power of the agent; and is therefore properly stiled the potential mode.”—*Ib.*, p. 29. “Both these are supposed to be synonomous expressions.”—*Ib.*, p. 105. “An expence beyond what my circumstances admit.”—DODDRIDGE: *ib.*, p. 138. “There are four of them: the *Full-Point*, or *Period*; the *Colon*; the *Semi-Colon*; the *Comma*.”—*Cobbett’s E. Gram.*, N. Y., 1818, p. 77. “There are many men, who have been at Latin-Schools for years, and who, at last, cannot write six sentences in English correctly.”—*Ib.*, p. 39. “But, figures of rhetorick are edge tools, and two edge tools too.”—*Ib.*, p. 182. “The horse-chesnut grows into a goodly standard.”—MORTIMER: *Johnson’s Dict.* “Whereever *if* is to be used.”—*O. B. Peirce’s Gram.*, p. 175.

“Peel’d, patch’d, and pyebald, linsey-woolsey brothers.”—POPE: *Joh. Dict.*, *w.*, *Mummer*.  
“Peel’d, patch’d, and piebald, linsey-woolsey brothers.”—ID.: *ib.*, *w. Piebald*.

#### EXERCISE VI.—MIXED ERRORS.

“Pied, *adj.* [from *pie*.] Variegated; partycoloured.”—*Johnson’s Dict.* “Pie, [*pica*, Lat.] A magpie; a party-coloured bird.”—*Ib.* “Gluy, *adj.* [from *glue*.] Viscous; tenacious; glutinous.”—*Ib.* “Gluey, *a.* Viscous, glutinous. Glueyness. *n.* The quality of being gluey.”—*Webster’s Dict.* “Old Euclio, seeing a crow-scrat\* upon the muck-hill, returned in all haste, taking it for an ill sign.”—BURTON: *Johnson’s Dict.* “Wars are begun by hairbrained† dissolute captains.”—ID.: *ib.* “A carot is a well known garden root.”—*Red Book*, p. 60. “Natural philosophy, metaphysicks, ethicks, history, theology, and politicks, were familiar

\* *Scrat*, for *scratch*. The word is now obsolete, and may be altered by taking *ch* in the correction.

† “*Hairbrained*, *adj.* This should rather be written *harebrained*; unconstant, unsettled, wild as a *hare*.”—*Johnson’s Dict.* Webster writes it *harebrained*, as from *hare* and *brain*. Worcester, too, prefers this form.

to him.”—*Kirkham’s Elocution*, p. 209. “The words in Italicks and capitals, are emphatick.”—*Ib.*, p. 210. “It is still more exceptionable; Candles, Cherrys, Figs, and other sorts of Plumbs, being sold by Weight, and being Plurals.”—*Johnson’s Gram. Com.*, p. 135. “If the End of Grammar be not to save that Trouble, and Expence of Time, I know not what it is good for.”—*Ib.*, p. 161. “*Caulce*, Sheep Penns, or the like, has no Singular, according to Charisius.”—*Ib.*, p. 194. “These busibodies are like to such as reade bookes with intent onely to spie out the faults thereof”—*Perkins’s Works*, p. 741. “I think it every man’s indispensable duty, to do all the service he can to his country.”—*Locke, on Ed.*, p. 4. “Either fretting it self into a troublesome Excess, or flaging into a downright want of Appetite.”—*Ib.*, p. 23. “And nobody would have a child cramed at breakfast.”—*Ib.*, p. 23. “Judgeship and judgment, lodgable and alledgeable, alledgement and abridgment, lodgment and infringement, enlargement and acknowledgment.”—*Webster’s Dict.*, 8vo. “Huckster, *n. s.* One who sells goods by retail, or in small quantities; a pedler.”—*Johnson’s Dict.*

“He seeks bye-streets, and saves th’ expensive coach.”—GAY: *ib.*, *w. Mortgage.*

“He seeks by-streets, and saves th’ expensive coach.”—GAY: *ib.*, *w. By-street.*

#### EXERCISE VII.—MIXED ERRORS.

“Boys like a warm fire in a wintry day.”—*Webster’s El. Spelling-Book*, p. 62. “The lilly is a very pretty flower.”—*Ib.*, p. 62. “The potatoe is a native plant of America.”—*Ib.*, p. 60. “An anglicism is a peculiar mode of speech among the English.”—*Ib.*, p. 136. “Black berries and raspberries grow on briars.”—*Ib.*, p. 150. “You can broil a beef steak over the coals of fire.”—*Ib.*, p. 38. “Beef-steak, *n.* A steak or slice of beef for broiling.”—*Webster’s Dict.* “Beefsteak, *s.* a slice of beef for broiling.”—*Treasury of Knowledge*. “As he must suffer in case of the fall of merchandize, he is entitled to the corresponding gain if merchandize rises.”—*Wayland’s Moral Science*, p. 258. “He is the worshipper of an hour, but the worldling for life.”—*Maturin’s Sermons*, p. 424. “Slyly hinting something to the disadvantage of great and honest men.”—*Webster’s Essays*, p. 329. “‘Tis by this therefore that I Define the Verb; namely, that it is a Part of Speech, by which something is apply’d to another, as to its Subject.”—*Johnson’s Gram. Com.*, p. 255. “It may sometimes throw a passing cloud over the bright hour of gaiety.”—*Kirkham’s Elocution*, p. 178. “To criticize, is to discover errors; and to crystalize implies to freeze or congele.”—*Red Book*, p. 68. “The affectation of using the preterite instead of the participle, is peculiarly aukward; as, he has came.”—*Priestley’s Grammar*, p. 125. “They are moraly responsible for their individual conduct.”—*Cardell’s El. Gram.*, p. 21. “An engine of sixty horse power, is deemed of equal force with a team of sixty horses.”—*Red Book*, p. 113. “This, at fourpence per ounce, is two shillings and fourpence a week, or six pounds, one shilling and four pence a year.”—*Ib.*, p. 122. “The tru meening of *parliament* iz a meeting of barons or peers.”—*Webster’s Essays*, p. 276. “Several authorities seem at leest to favor this opinion.”—*Ib.*, p. 277. “That iz, az I hav explained the tru primitiv meening of the word.”—*Ib.*, p. 276. “The lords are peers of the relm; that iz, the ancient prescriptiv judges or barons.”—*Ib.*, p. 274.

“Falshood is folly, and ‘tis just to own

The fault committed; this was mine alone.”—*Pope, Odys.*, B. xxii, l. 168.

#### EXERCISE VIII.—MIXED ERRORS.

“A second verb so nearly synonymous with the first, is at best superfluous.”—*Churchill’s Gram.*, p. 332. “Indicate it, by some mark opposite [to] the word misspelt.”—

*Abbott's Teacher*, p. 74. "And successfully controlling the tendencies of mind."—*Ib.*, p. 24. "It [the Monastick Life] looks very like what we call Childrens-Play."—[LESLIE'S] *Right of Tythes*, p. 236. "It seems rather lik Playing of Booty, to Please those Fools and Knaves."—*Ib.*, Pref., p. vi. "And first I Name Milton, only for his Name, lest the Party should say, that I had not Cousider'd his Performance against Tythes."—*Ib.*, p. iv. "His Fancy was too Predominant for his Judgment. His Talent lay so much in Satyr that he hated Reasoning."—*Ib.*, p. iv. "He has thrown away some of his Railery against Tythes, and the Church then underfoot."—*Ib.*, p. v. "They Vey'd with one another in these things."—*Ib.*, p. 220. "Epamanondas was far the most accomplished of the Thebans."—*Cooper's New Gram.*, p. 27. "*Whoever* and *Whichever*, are thus declined. Sing. and Plur. *nom.* whoever, *poss.* whoseever, *obj.* whomever. Sing. and Plu. *nom.* whichever, *poss.* whoseever, *obj.* whichever."—*Ib.*, p. 38. "WHEREEVER, *adv.* [*where* and *ever.*] At whatever place."—*Webster's Dict.* "They at length took possession of all the country south of the Welch mountains."—*Dobson's Comp. Gram.*, p. 7. "Those Britains, who refused to submit to the foreign yoke, retired into Wales."—*Ib.*, p. 6. "Religion is the most chearful thing in the world."—*Ib.*, p. 43. "*Two* means the number two compleatly, whereas *second* means only the last of two, and so of all the rest."—*Ib.*, p. 44. "Now send men to Joppa, and call for one Simon, whose sirname is Peter."—*Ib.*, p. 96. (See *Acts*, x, 5.) "In French words, we use *enter* instead of *inter*; as, entertain, enterlace, enterprize."—*Ib.*, p. 101. "Amphiology, i. e. a speech of uncertain or doubtful meaning."—*Ib.*, p. 103. "Surprize; as, hah! hey day! what! strange!"—*Ib.*, p. 109. "Names of the letters: ai bee see dee ee ef jee aitch eye jay kay el em en o pee cue ar ess tee you voe double u eks wi zed."—*Rev. W. Allen's Gram.*, p. 3.

"I, O, and U, at th' End of Words require,  
The silent (e), the same do's (va) desire."—*Brightland's Gram.*, p. 15.

#### EXERCISE IX.—MIXED ERRORS.

"*And* is written for *eacend*, adding, ekeing."—*Dr. Murray's Hist. of Europ. Lang.*, Vol. i, p. 222. "The Hindus have changed *ai* into *e*, sounded like *e* in *where*."—*Ib.*, Vol. ii, p. 121. "And therefor I would rather see the cruelest usurper than the mildest despot."—*Philological Museum*, Vol. i, p. 430. "Sufficiently distinct to prevent our marveling."—*Ib.*, i, 477. "Possessed of this preheminance he disregarded the clamours of the people."—*Smollett's England*, Vol. iii, p. 222. "He himself, having communicated, administered the sacrament to some of the bye-standers."—*Ib.*, p. 222. "The high fed astrology which it nurtured, is reduced to a skeleton on the leaf of an almanac."—*Cardell's Gram.*, p. 6. "Fulton was an eminent engineer: he invented steam boats."—*Ib.*, p. 30. "Then, in comes the benign latitude of the doctrine of goodwill."—SOUTH: *in Johnson's Dict.* "Being very lucky in a pair of long lanthorn-jaws, he wrung his face into a hideous grimace."—SPECTATOR: *ib.* "Who had lived almost four-and-twenty years under so politick a king as his father."—BACON: *ib.*, *w. Lowness*. "The children will answer; John's, or William's, or whose ever it may be."—*Infant School Gram.*, p. 32. "It is found tolerably easy to apply them, by practising a little guess work."—*Cardell's Gram.*, p. 91. "For between which two links could speech makers draw the division line?"—*Ib.*, p. 50. "The wonderful activity of the rope dancer who stands on his head."—*Ib.*, p. 56. "The brilliancy which the sun displays on its own disk, is sun shine."—*Ib.*, p. 63. "A word of three syllables is termed a trisyllable."—*Murray's Gram.*, p. 23; *Coar's*, 17; *Jaudon's*, 13; *Comly's*, 8; *Cooper's, New Gr.*, 8; *Kirkham's*, 20; *Picket's*, 10; *Alger's*, 12; *Blair's*, 1; *Guy's*, 2; *Bolles's Spelling-Book*, 161. See *Johnson's Dict.* "A word of three syllables is termed a trissyllable."—*British Gram.*, p. 33; *Comprehensive Gram.*, 23; *Bicknell's*, 17; *Allen's*, 31; *John Peirce's*, 149; *Lennie's*, 5;

*Maltby's*, 8; *Ingersoll's*, 7; *Bradley's*, 66; *Davenport's*, 7; *Bucke's*, 16; *Bolles's Spelling-Book*, 91. See *Littleton's Lat. Dict.* (1.) "*Will*, in the first Persons, promises or threatens: But in the second and third Persons, it barely foretells."—*British Gram.*, p. 132. (2.) "*Will*, in the first Persons, promises or threatens; but in the second and third Persons, it barely foretells."—*Buchanan's Gram.*, p. 41. (3.) "*Will*, in the first person, promises, engages, or threatens. In the second and third persons, it merely foretels."—*Jaudon's Gram.*, p. 59. (4.) "*Will*, in the first person singular and plural, promises or threatens; in the second and third persons, only foretells."—*Lowth's Gram.*, p. 41. (5.) "*Will*, in the first person singular and plural, intimates resolution and promising; in the second and third person, only foretels."—*Murray's Gram.*, p. 88; *Ingersoll's*, 136; *Fisk's*, 78; *A. Flint's*, 42; *Bullions's*, 32; *Hamlin's*, 41; *Cooper's Murray*, 50. ☞ *Murray's Second Edition* has it "*foretells*." (6.) "*Will*, in the first person singular and plural, expresses resolution and promising. In the second and third persons it only foretells."—*Comly's Gram.*, p. 38; *E. Devis's*, 51; *Lennie's*, 22. (7.) "*Will*, in the first person, promises. In the second and third persons, it simply foretels."—*Maltby's Gram.*, p. 24. (8.) "*Will*, in the first person implies resolution and promising; in the second and third, it foretells."—*Cooper's New Gram.*, p. 51. (9.) "*Will*, in the first person singular and plural, promises or threatens; in the second and third persons, only foretels: *shall*, on the contrary, in the first person, simply foretels; in the second and third persons, promises, commands, or threatens."—*Adam's Lat. and Eng. Gram.*, p. 83. (10.) "In the first person *shall foretels*, and *will promises* or *threatens*; but in the second and third persons *will* foretels, and *shall* promises or threatens."—*Blair's Gram.*, p. 65.

"If Mævius scribble in Apollo's spight,  
There are who judge still worse than he can write."—*Pope*.

#### EXERCISE X.—MIXED ERRORS.

"I am liable to be charged that I latinize too much."—DRYDEN: in *Johnson's Dict.* "To mould him platonically to his own idea."—WOTTON: *ib.* "I will marry a wife as beautiful as the houries, and as wise as Zobeide."—*Murray's E. Reader*, p. 148. "I will marry a wife, beautiful as the Houries."—*Wilcox's Gram.*, p. 65. "The words in italics are all in the imperative mood."—*Maltby's Gram.*, p. 71. "Words Italicised, are emphatick, in various degrees."—*Kirkham's Elocution*, p. 173. "Wherever two gg's come together, they are both hard."—*Buchanan's Gram.*, p. 5. "But these are rather silent (o)'s than obscure (u)'s."—*Brightland's Gram.*, p. 19. "That can be Guest at by us, only from the Consequences."—*Right of Tythes*, p. viii. Capable of affording a temporary abode.”—*Webster’s Octavo Dict.*—“Win me into the easy hearted man.”—*Johnson’s Quarto Dict.* “And then to end life, is the same as to dye.”—*Milnes’s Greek Gram.*, p. 176. “Those usurping hectors who pretend to honour without religion, think the charge of a lie a blot not to be washed out but by blood.”—SOUTH: *Joh. Dict.* “His gallies attending him, he pursues the unfortunate.”—*Nixon’s Parser*, p. 91. “This cannot fail to make us shy of yielding our assent.”—*Campbell’s Rhet.*, p. 117. “When he comes to the Italicised word, he should give it such a definition as its connection with the sentence may require.”—*Claggett’s Expositor*, p. vii. “Learn to distil from your lips all the honies of persuasion.”—*Adams’s Rhetoric*, Vol. i, p. 31. “To instill ideas of disgust and abhorrence against the Americans.”—*Ib.*, ii, 300. “Where prejudice has not acquired an uncontroled ascendancy.”—*Ib.*, i, 31. “The uncontrollable propensity of his mind was undoubtedly to oratory.”—*Ib.*, i, 100. “The Brutus is a practical commentary upon the dialogues and the orator.”—*Ib.*, i, 120. “The oratorical partitions are a short elementary compendium.”—*Ib.*, i, 130. “You shall find hundreds of persons able to produce a crowd of good ideas upon any subject, for one that can marshall them to the best advantage.”—*Ib.*, i, 169. “In this lecture, you have the outline of all that the whole course will comprize.”—*Ib.*, i, 182. “He would have been stopped by a hint from the bench, that he was traveling out of the record.”—*Ib.*, i, 289. “To tell them that which should befall them in the last days.”—*Ib.*, ii, 308. “Where all is present, there is nothing past to recal.”—*Ib.*, ii, 358. “Whose due it is to drink the brimfull cup of God’s eternal vengeance.”—*Law and Grace*, p. 36.

“There, from the dead, centurions see him rise,  
See, but struck down with horrible surprize!”—*Savage*.

“With seed of woes my heart brimful is charged.”—SIDNEY: *Joh. Dict.*

“Our legions are brimful, our cause is ripe.”—SHAKSPEARE: *ib.*

## PART II. ETYMOLOGY.

ETYMOLOGY treats of the different parts of speech, with their classes and modifications.

The *Parts of Speech* are the several kinds, or principal classes, into which words are divided by grammarians.

*Classes*, under the parts of speech, are the particular sorts into which the several kinds of words are subdivided.

*Modifications* are inflections, or changes, in the terminations, forms, or senses, of some kinds of words.

### CHAPTER I.—PARTS OF SPEECH.

The Parts of Speech, or sorts of words, in English, are ten; namely, the Article, the Noun, the Adjective, the Pronoun, the Verb, the Participle, the Adverb, the Conjunction, the Preposition, and the Interjection.

#### 1. THE ARTICLE.

An Article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification: as, *The* air, *the* stars; *an* island, *a* ship.

#### 2. THE NOUN.

A Noun is the name of any person, place, or thing, that can be known or mentioned: as, *George*, *York*, *man*, *apple*, *truth*.

#### 3. THE ADJECTIVE.

An Adjective is a word added to a noun or pronoun, and generally expresses quality: as, A *wise* man; a *new* book. You *two* are *diligent*.

#### 4. THE PRONOUN.

A Pronoun is a word used in stead of a noun: as, The boy loves *his* book; *he* has long lessons, and *he* learns *them* well.

#### 5. THE VERB.

A Verb is a word that signifies *to be*, *to act*, or *to be acted upon*: as, I *am*, I *rule*, I *am ruled*; I *love*, thou *lovest*, he *loves*.

#### 6. THE PARTICIPLE.

A Participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb: thus, from the verb *rule*, are formed three participles, two simple and one compound; as, 1. *ruling*, 2. *ruled*, 3. *having ruled*.

## 7. THE ADVERB.

An Adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner: as, They are *now here*, studying *very diligently*.

## 8. THE CONJUNCTION.

A Conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected: as, "Thou *and* he are happy, *because* you are good."—*L. Murray*.

## 9. THE PREPOSITION.

A Preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun; as, The paper lies *before* me *on* the desk.

## 10. THE INTERJECTION.

An Interjection is a word that is uttered merely to indicate some strong or sudden emotion of the mind: as, *Oh! alas! ah! poh! pshaw! avault! aha! hurrah!*

**OBSERVATIONS.**

OBS. 1.—The first thing to be learned in the study of this the second part of grammar, is the distribution of the words of the language into those principal sorts, or classes, which are denominated *the Parts of Speech*. This is a matter of some difficulty. And as no scheme which can be adopted, will be in all cases so plain that young beginners will not occasionally falter in its application, the teacher may sometimes find it expedient to refer his pupils to the following simple explanations, which are designed to aid their first and most difficult steps.

How can we know to what class, or part of speech, any word belongs? By learning the definitions of the ten parts of speech, and then observing how the word is written, and in what sense it is used. It is necessary also to observe, so far as we can, with what other words each particular one is capable of making sense.

1. Is it easy to distinguish an ARTICLE? If not always easy, it is generally so: *the, an, and a*, are the only English words called articles, and these are rarely any thing else. Because *an* and *a* have the same import, and are supposed to have the same origin, the articles are commonly reckoned two, but some count them as three.
2. How can we distinguish a NOUN? By means of the article before it, if there is one; as, *the house, an apple, a book*; or, by adding it to the phrase, "*I mentioned*;" as, "I mentioned *peace*;"—"I mentioned *war*;"—"I mentioned *slumber*." Any word which thus makes complete sense, is, in that sense, a noun; because a noun is the *name* of any thing which can thus be mentioned *by a name*. Of English nouns, there are said to be as many as twenty-five or thirty thousand.
3. How can we distinguish an ADJECTIVE? By putting a noun after it, to see if the phrase will be sense. The noun *thing*, or its plural *things*, will suit almost any adjective; as, A *good* thing—A *bad* thing—A *little* thing—A *great* thing—*Few* things—*Many* things—*Some* things—*Fifty* things. Of adjectives, there are perhaps nine or ten thousand.

4. How can we distinguish a PRONOUN? By observing that its noun repeated makes the same sense. Thus, the example of the pronoun above, “The boy loves *his* book; *he* has long lessons, and *he* learns *them* well,”—very clearly means, “The boy loves *the boy’s* book; *the boy* has long lessons, and *the boy* learns *those lessons* well.” Here then, by a disagreeable repetition of two nouns, we have the same sense without any pronoun; but it is obvious that the pronouns form a better mode of expression, because they prevent this awkward repetition. The different pronouns in English are twenty-four; and their variations in declension are thirty-two: so that the number of *words* of this class, is fifty-six.
5. How can we distinguish a VERB? By observing that it is usually the principal word in the sentence, and that without it there would be no assertion. It is the word which expresses what is affirmed or said of the person or thing mentioned; as, “Jesus *wept*.”—“Felix *trembled*.”—“The just *shall live* by faith.” It will make sense when inflected with the pronouns; as, I *write*, thou *writ’st*, he *writes*; we *write*, you *write*, they *write*.—I *walk*, thou *walkst*, he *walks*; we *walk*, you *walk*, they *walk*. Of English verbs, some recent grammarians compute the number at eight thousand; others formerly reckoned them to be no more than four thousand three hundred.\*
6. How can we distinguish a PARTICIPLE? By observing its derivation from the verb, and then placing it after *to be* or *having*; as, To be *writing*, Having *written*—To be *walking*, Having *walked*—To be *weeping*, Having *wept*—To be *studying*, Having *studied*. Of simple participles, there are twice as many as there are of simple or radical verbs; and the possible compounds are not less numerous than the simples, but they are much less frequently used.
7. How can we distinguish an ADVERB? By observing that it answers to the question, *When? Where? How much?* or *How?*—or serves to ask it; as, “He spoke fluently.” *How* did he speak? *Fluently*. This word *fluently* is therefore an adverb: it tells *how* he spoke. Of adverbs, there are about two thousand six hundred; and four fifths of them end in *ly*.
8. How can we distinguish a CONJUNCTION? By observing what words or terms it joins together, or to what other conjunction it corresponds; as, “*Neither* wealth *nor* honor can heal a wounded conscience.”—*Dillwyn’s Ref.*, p. 16. Or, it may be well to learn the whole list at once: *And, as, both, because, even, for, if, that, then, since, seeing, so: Or, nor, either, neither, than, though, although, yet, but, except, whether, lest, unless, save, provided, notwithstanding, whereas*. Of conjunctions, there are these twenty-nine in common use, and a few others now obsolete.
9. How can we distinguish a PREPOSITION? By observing that it will govern the pronoun *them*, and is not a verb or a participle; as, *About* them—*above* them—*across* them—

---

\* “The whole number of verbs in the English language, regular and irregular, simple and compounded, taken together, is about 4,300. See, in Dr. Ward’s *Essays on the English language*, the catalogue of English verbs. The whole number of irregular verbs, the defective included, is about 176.”—*Lowth’s Gram.*, Philad., 1799, p. 59. Lindley Murray copied the first and the last of these three sentences, but made the latter number “about 177.”—*Octavo Gram.*, p. 109; *Duodecimo*, p. 88. In the latter work, he has this note: “The whole number of *words*, in the English language, is about thirty-five thousand.”—*Ib.* Churchill says, “The whole number of verbs in the English language, according to Dr. Ward, is about 4,300. The irregulars, including the auxiliaries, scarcely exceed 200.”—*New Gram.*, p. 113. An other late author has the following enumeration: “There are in the English language about twenty thousand five hundred nouns, forty pronouns, *eight thousand verbs*, nine thousand two hundred adnouns, two thousand six hundred adverbs, sixty-nine prepositions, nineteen conjunctions, and sixty-eight interjections; in all, above forty thousand words.”—*Rev. David Blair’s Gram.*, p. 10. William Ward, M. A., in an old grammar *undated*, which speaks of Dr. Lowth’s as one with which the public had “*very lately* been favoured,” says: “There are *four Thousand and about Five Hundred Verbs* in the English [language].”—*Ward’s Practical Gram.*, p. 52.

*after* them—*against* them—*amidst* them—*among* them—*around* them—*at* them—*Before* them—*behind* them—*below* them—*beneath* them—*beside* them—*between* them—*beyond* them—*by* them—*For* them—*from* them—*In* them—*into* them, &c. Of the prepositions, there are about sixty now in common use.

10. How can we distinguish an INTERJECTION? By observing that it is an independent word or sound, uttered earnestly, and very often written with the note of exclamation; as *Lo! behold! look! see! hark! hush! hist! mum!* Of interjections, there are sixty or seventy in common use, some of which are seldom found in books.

OBS. 2.—An accurate knowledge of words, and of their changes, is indispensable to a clear discernment of their proper combinations in sentences, according to the usage of the learned. Etymology, therefore, should be taught before syntax; but it should be chiefly taught by a direct analysis of entire sentences, and those so plainly written that the particular effect of every word may be clearly distinguished, and the meaning, whether intrinsic or relative, be discovered with precision. The parts of speech are usually named and defined with reference to the use of words *in sentences*; and, as the same word not unfrequently stands for several different parts of speech, the learner should be early taught to make for himself the proper application of the foregoing distribution, without recurrence to a dictionary, and without aid from his teacher. He who is endeavouring to acquaint himself with the grammar of a language which he can already read and understand, is placed in circumstances very different from those which attend the school-boy who is just beginning to construe some sentences of a foreign tongue. A frequent use of the dictionary may facilitate the progress of the one, while it delays that of the other. English grammar, it is hoped, may be learned directly from this book alone, with better success than can be expected when the attention of the learner is divided among several or many different works.

OBS. 3.—Dr. James P. Wilson, in speaking of the classification of words, observes, “The *names* of the distributive parts should either express, distinctly, the influence, which each class produces on sentences; or some other characteristic trait, by which the respective species of words may be distinguished, without danger of confusion. It is at least probable, that no distribution, sufficiently minute, can ever be made, of the parts of speech, which shall be wholly free from all objection. Hasty innovations, therefore, and crude conjectures, should not be permitted to disturb that course of grammatical instruction, which has been advancing in melioration, by the unremitting labours of thousands, through a series of ages.”—*Wilson’s Essay on Gram.*, p. 66. Again: “The *number* of the parts of speech may be reduced, or enlarged, at pleasure; and the rules of syntax may be accommodated to such new arrangement. The best grammarians find it difficult, in practice, to distinguish, in some instances, adverbs, prepositions, and conjunctions; yet their effects are generally distinct. This inconvenience should be submitted to, since a less comprehensive distribution would be very unfavourable to a rational investigation of the meaning of English sentences.”—*Ib.*, p. 68. Again: “*As* and *so* have been also deemed substitutes, and resolved into other words. But if all abbreviations are to be restored to their primitive parts of speech, there will be a general revolution in the present systems of grammar; and the various improvements, which have sprung from convenience, or necessity, and been sanctioned by the usage of ancient times, must be retrenched, and anarchy in letters universally prevail.”—*Ib.*, p. 114.

OBS. 4.—I have elsewhere sufficiently shown why *ten* parts of speech are to be preferred to any other number, in English; and whatever diversity of opinion there may be,

respecting the class to which some particular words ought to be referred, I trust to make it obvious to good sense, that I have seldom erred from the course which is most expedient.

1. *Articles* are used with appellative nouns, sometimes to denote emphatically the species, but generally to designate individuals. 2. *Nouns* stand in discourse for persons, things, or abstract qualities. 3. *Adjectives* commonly express the concrete qualities of persons or things; but sometimes, their situation or number. 4. *Pronouns* are substitutes for names, or nouns; but they sometimes represent sentences. 5. *Verbs* assert, ask, or say something; and, for the most part, express action or motion. 6. *Participles* contain the essential meaning of their verbs, and commonly denote action, and imply time; but, apart from auxiliaries, they express that meaning either adjectively or substantively, and not with assertion. 7. *Adverbs* express the circumstances of time, of place, of degree, and of manner; the *when*, the *where*, the *how much*, and the *how*. 8. *Conjunctions* connect, sometimes words, and sometimes sentences, rarely phrases; and always show, either the manner in which one sentence or one phrase depends upon an other, or what connexion there is between two words that refer to a third. 9. *Prepositions* express the correspondent relations of things to things, of thoughts to thoughts, or of words to words; for these, if we speak truly, must be all the same in expression. 10. *Interjections* are either natural sounds or exclamatory words, used independently, and serving briefly to indicate the wishes or feelings of the speaker.

OBS. 5.—In the following passage, all the parts of speech are exemplified, and each is pointed out by the figure placed over the word:—

1 2 9 2 5 1 2 3 9 2 1 2 6 9 4 9 4  
 “The power of speech is a faculty peculiar to man; a faculty bestowed on him by his  
 3 2 9 1 3 8 7 3 2 8 10 7 7 5 4  
 beneficent Creator, for the greatest and most excellent uses; but, alas! how often do we  
 5 4 9 1 3 9 2  
 pervert it to the worst of purposes!”—See *Lowth’s Gram.*, p. 1.

In this sentence, which has been adopted by Murray, Churchill, and others, we have the following parts of speech: 1. The words *the*, *a*, and *an*, are articles. 2. The words *power*, *speech*, *faculty*, *man*, *faculty*, *Creator*, *uses*, and *purposes*, are nouns. 3. The words *peculiar*, *beneficent*, *greatest*, *excellent*, and *worst*, are adjectives. 4. The words *him*, *his*, *we*, and *it*, are pronouns. 5. The words *is*, *do*, and *pervert*, are verbs. 6. The word *bestowed* is a participle. 7. The words *most*, *how*, and *often*, are adverbs. 8. The words *and* and *but* are conjunctions. 9. The words *of*, *on*, *to*, *by*, *for*, *to*, and *of*, are prepositions. 10. The word *alas!* is an interjection.

OBS. 6.—In speaking or writing, we of course bring together the different parts of speech just as they happen to be needed. Though a sentence of ordinary length usually embraces more than one half of them, it is not often that we find them *all* in so small a compass. Sentences sometimes abound in words of a particular kind, and are quite destitute of those of some other sort. The following examples will illustrate these remarks. (1) ARTICLES: “*A* square is less beautiful than *a* circle; and *the* reason seems to be, that *the* attention is divided among *the* sides and angles of *a* square, whereas *the* circumference of *a* circle, being *a* single object, makes one entire impression.”—*Kames, Elements of Criticism*, Vol. i, p. 175. (2.) NOUNS: “A *number* of *things* destined for the same *use*, such as *windows*, *chairs*, *spoons*, *buttons*, cannot be too uniform; for, supposing their *figure* to be good, *utility* requires *uniformity*.”—*Ib.*, i, 176. (3.) ADJECTIVES: “Hence nothing *just*, *proper*, *decent*, *beautiful*, *proportioned*, or *grand*, is *risible*.”—*Ib.*, i, 229. (4.) PRONOUNS: “*I* must

entreat the courteous reader to suspend *his* curiosity, and rather to consider *what* is written than *who they* are *that* write it.”—*Addison, Spect.*, No. 556. (5.) VERBS: “The least consideration *will inform* us how easy it *is* to *put* an ill-natured construction upon a word; and what perverse turns and expressions *spring* from an evil temper. Nothing *can be explained* to him who *will* not *understand*, nor *will* any thing *appear* right to the unreasonable.”—*Cecil*. (6.) PARTICIPLES: “The Scriptures are an authoritative voice, *reproving, instructing*, and *warning* the world; and *declaring* the only means *ordained* and *provided for escaping* the awful penalties of sin.”—G. B. (7.) ADVERBS: “The light of Scripture shines *steadily, purely, benignly, certainly, superlatively*.”—*Dr. S. H. Cox*. (8.) CONJUNCTIONS: “Quietness *and* silence *both* become *and* befriend religious exercises. Clamour *and* violence often hinder, *but* never further, the work of God.”—*Henry’s Exposition*. (9.) PREPOSITIONS: “He has kept *among us*, in times of peace, standing armies, *without* the consent of our legislatures.”—*Dec. of Indep*. (10.) INTERJECTIONS: “*Oh*, my dear strong-box! *Oh*, my lost guineas! *Oh*, poor, ruined, beggared old man! *Boo! hoo! hoo!*”—*MOLIERE: Burgh’s Art of Speaking*, p. 266.

### EXAMPLES FOR PARSING.

*Parsing* is the resolving or explaining of a sentence, or of some related word or words, according to the definitions and rules of grammar. Parsing is to grammar what ciphering is to arithmetic.

A *Praxis* is a method of exercise, or a form of grammatical resolution, showing the learner how to proceed. The word is Greek, and literally signifies action, doing, practice, or formal use.

### PRAXIS I—ETYMOLOGICAL.

*In the first Praxis, it is required of the pupil—merely to distinguish and define the different parts of speech.*

*The definitions to be given in the First Praxis, are one, and only one, for each word, or part of speech. Thus:—*

#### EXAMPLE PARSED.

“The patient ox submits to the yoke, and meekly performs the labour required of him.”

*The* is an article. 1.\* An article is the word *the, an, or a*, which we put before nouns to limit their signification.

*Patient* is an adjective. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality.

*Ox* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*Submits* is a verb. 1. A verb is a word that signifies *to be, to act, or to be acted upon*.

---

\* These definitions are numbered here, because each of them is the first of a series now begun. In class rehearsals, the pupils may be required to give the definitions in turn; and, to prevent any from losing the place, it is important that the numbers be mentioned. When all have become sufficiently familiar with the *definitions*, the exercise may be performed *without them*. They are to be read or repeated till faults disappear—or till the teacher is satisfied with the performance. He may then save time, by commanding his class to proceed more briefly; making such distinctions as are required in the praxis, but ceasing to explain the terms employed; that is, *omitting all the definitions, for brevity’s sake*. This remark is applicable likewise to all the subsequent praxes of etymological parsing.

*To* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*The* is an article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification.

*Yoke* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*And* is a conjunction. 1. A conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected.

*Meekly* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Performs* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*The* is an article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification.

*Labour* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*Required* is a participle. 1. A participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb.

*Of* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*Him* is a pronoun. 1. A pronoun is a word used instead of a noun.

#### LESSON I.—PARSING.

“A nimble tongue often trips. The rule of the tongue is a great attainment. The language of truth is direct and plain. Truth is never evasive. Flattery is the food of vanity. A virtuous mind loathes flattery. Vain persons are an easy prey to parasites. Vanity easily mistakes sneers for smiles. The smiles of the world are deceitful. True friendship hath eternal views. A faithful friend is invaluable. Constancy in friendship denotes a generous mind. Adversity is the criterion of friendship. Love and fidelity are inseparable. Few know the value of a friend till they lose him. Justice is the first of all moral virtues. Let justice hold, and mercy turn, the scale. A judge is guilty who connives at guilt. Justice delayed is little better than justice denied. Vice is the deformity of man. Virtue is a source of constant cheerfulness. One vice is more expensive than many virtues. Wisdom, though serious, is never sullen. Youth is the season of improvement.”—*Dillwyn's Reflections*, pp. 4-27.

“Oh! my ill-chang'd condition! oh, my fate!  
Did I lose heaven for this?”—*Cowley's Davideis*.

#### LESSON II.—PARSING.

“So prone is man to society, and so happy in it, that, to relish perpetual solitude, one must be an angel or a brute. In a solitary state, no creature is more timid than man; in society, none more bold. The number of offenders lessens the disgrace of the crime; for a common reproach is no reproach. A man is more unhappy in reproaching himself when guilty, than in being reproached by others when innocent. The pains of the mind are

harder to bear than those of the body. Hope, in this mixed state of good and ill, is a blessing from heaven: the gift of prescience would be a curse. The first step towards vice, is to make a mystery of what is innocent: whoever loves to hide, will soon or late have reason to hide. A man who gives his children a habit of industry, provides for them better than by giving them a stock of money. Our good and evil proceed from ourselves: death appeared terrible to Cicero, indifferent to Socrates, desirable to Cato.”—*Home’s Art of Thinking*, pp. 26-53.

“O thou most high transcendent gift of age!  
Youth from its folly thus to disengage.”—*Denham’s Age*.

### LESSON III.—PARSING.

“Calm was the day, and the scene, delightful. We may expect a calm after a storm. To prevent passion is easier than to calm it.”—*Murray’s Ex.*, p. 5. “Better is a little with content, than a great deal with anxiety. A little attention will rectify some errors. Unthinking persons care little for the future.”—See *ib.* “Still waters are commonly deepest. He laboured to still the tumult. Though he is out of danger, he is still afraid.”—*ib.* “Damp air is unwholesome. Guilt often casts a damp over our sprightliest hours. Soft bodies damp the sound much more than hard ones.”—*ib.* “The hail was very destructive. Hail, virtue! source of every good. We hail you as friends.”—*ib.*, p. 6. “Much money makes no man happy. Think much, and speak little. He has seen much of the world.”—See *ib.* “Every being loves its like. We must make a like space between the lines. Behave like men. We are apt to like pernicious company.”—*ib.* “Give me more love, or more disdain.”—*Carew*. “He loved Rachel more than Leah.”—*Genesis*. “But how much that more is; he hath no distinct notion.”—*Locke*.

“And my more having would be as a sauce  
To make me hunger more.”—*Shakspeare*.

## CHAPTER II.—ARTICLES.

An Article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification: as, *The* air, *the* stars; *an* island, *a* ship.

*An* and *a*, being equivalent in meaning, are commonly reckoned *one and the same* article. *An* is used in preference to *a*, whenever the following word begins with a vowel sound; as, *An* art, *an* end, *an* heir, *an* inch, *an* ounce, *an* hour, *an* urn. *A* is used in preference to *an*, whenever the following word begins with a consonant sound; as, *A* man, *a* house, *a* wonder, *a* one, *a* yew, *a* use, *a* ewer. Thus the consonant sounds of *w* and *y*, even when expressed by other letters, require *a* and not *an* before them.

A common noun, when taken in its *widest sense*, usually admits no article: as, “A candid temper is proper for *man*; that is, for *all mankind*.”—*Murray*.

In English, nouns without any article, or other definitive, are often used in a sense *indefinitely partitive*: as, “He took *bread*, and gave thanks.”—*Acts*. That is, “*some bread*.” “To buy *food* are thy servants come.”—*Genesis*. That is, “*some food*.” “There are *fishes* that have wings, and are not strangers to the airy region.”—*Locke’s Essay*, p. 322. That is, “*some fishes*.”

“Words in which nothing but the *mere being* of any thing is implied, are used without articles: as, ‘This is not *beer*, but *water*,’ ‘This is not *brass*, but *steel*.”—See *Dr. Johnson’s Gram.*, p. 5.

*An* or *a* before the genus, may refer to *a whole species*; and *the* before the species, may denote that whole species emphatically: as, “*A certain bird* is termed *the cuckoo*, from *the sound* which it emits.”—*Blair*.

But *an* or *a* is commonly used to denote individuals as *unknown*, or as not specially distinguished from others: as, “I see *an object* pass by, which I never saw till now; and I say, ‘There goes *a beggar* with *a long beard*.”—*Harris*.

And *the* is commonly used to denote individuals as *known*, or as specially distinguished from others: as, “*The man* departs, and returns a week after; and I say, ‘There goes *the beggar* with *the long beard*.”—*Id.*

The article *the* is applied to nouns of either number: as, “*The man*, *the men*,” “*The good boy*, *the good boys*.”

*The* is commonly required before adjectives that are used by ellipsis as nouns: as, “*The young* are slaves to novelty; *the old*, to custom.”—*Ld. Kames*.

The article *an* or *a* implies *unity*, or *one*, and of course belongs to nouns of the singular number only; as, *A man*,—*An old man*,—*A good boy*.

*An* or *a*, like *one*, sometimes gives a collective meaning to an adjective of number, when the noun following is plural; as, *A few days*,—*A hundred men*,—*One hundred pounds sterling*.

Articles should be *inserted* as often as the sense requires them; as, “Repeat the preterit and [*the*] perfect participle of the verb *to abide*.”—Error in *Merchant’s American School Grammar*, p. 66.

*Needless articles* should be omitted; they seldom fail to pervert the sense: as, “*The Rhine*, *the Danube*, *the Tanais*, *the Po*, *the Wolga*, *the Ganges*, like many hundreds of similar *names*, rose not from any obscure jargon or irrational dialect.”—Error in *Dr. Murray’s Hist. of Europ. Lang.*, Vol. i, p. 327.

The articles can seldom be put *one for the other*, without gross impropriety; and of course either is to be preferred to the other, as it better suits the sense: as, “*The violation of this rule never fails to hurt and displease a reader*.”—Error in *Blair’s Lectures*, p. 107. Say, “*A violation of this rule never fails to displease the reader*.”

## CLASSES.

The articles are distinguished as the *definite* and the *indefinite*.

I. The *definite article* is *the*, which denotes some particular thing or things; as, *The boy*, *the oranges*.

II. The *indefinite article* is *an* or *a*, which denotes one thing of a kind, but not any particular one; as, *A* boy, *an* orange.

### MODIFICATIONS.\*

The English articles have no modifications, except that *an* is shortened into *a* before the sound of a consonant; as, “In *an* epic poem, or *a* poem upon *an* elevated subject, *a* writer ought to avoid raising *a* simile on *a* low image.”—*Ld. Kames*.

### OBSERVATIONS.

OBS. 1.—No other words are so often employed as the articles. And, by reason of the various and very frequent occasions on which these definitives are required, no words are oftener misapplied; none, oftener omitted or inserted erroneously. I shall therefore copiously illustrate both their *uses* and their *abuses*; with the hope that every reader of this volume will think it worth his while to gain that knowledge which is requisite to the true use of these small but important words. Some parts of the explanation, however, must be deferred till we come to Syntax.

OBS. 2.—With the attempts of Tooke, Dalton, Webster, Cardell, Fowle, Wells,<sup>†</sup> Weld, Butler Frazee, Perley, Mulligan, Pinneo, S. S. Greene, and other writers, to *degrade* the

---

\* The *modifications* which belong to the different parts of speech consist chiefly of the *inflections* or *changes* to which certain words are subject. But I use the term sometimes in a rather broader sense, as including not only *variations* of words, but, in certain instances, their *original forms*, and also such of their *relations* as serve to indicate peculiar properties. This is no questionable license in the use of the term; for when the position of a word *modifies* its meaning, or changes its person or case, this effect is clearly a grammatical *modification*, though there be no absolute *inflection*. Lord Kames observes, “*That quality*, which distinguishes one genus, one species, or even one individual, from an other, is termed a *modification*: thus the same particular that is termed a *property* or *quality*, when considered as belonging to an individual, or a class of individuals, is termed a *modification*, when considered as distinguishing the individual or the class from an other.”—*Elements of Criticism*, Vol. ii, p. 392.

<sup>†</sup> Wells, having put the articles into the class of adjectives, produces authority as follows: “The words *a* or *an*, and *the*, are reckoned by *some* grammarians a separate part of speech; but, as they in all respects come under the definition of the adjective, it is unnecessary, as well as *improper*, to rank them as a class by themselves.”—*Cannon*.” To this he adds, “The articles are also ranked with adjectives by Priestley, E. Oliver, Bell, Elphinston, M’Culloch, D’Orsey, Lindsay, Joel, Greenwood. Smetham, Dalton, King, Hort, Buchanan, Crane, J. Russell, Frazee, Cutler, Perley, Swett, Day. Goodenow, Willard, Robbins, Felton, Snyder, Butler, S. Barrett, Badgley, Howe, Whiting, Davenport, Fowle, Weld, and others.”—*Wells’s School Gram.*, p. 69. In this way, he may have made it seem to many, that, after thorough investigation, he had decided the point discreetly, and with preponderance of authority. For it is claimed as a “peculiar merit” of this grammar, that, “Every point of practical importance is *thoroughly investigated*, and reference is carefully made to the *researches* of preceding writers, in all cases which admit of being determined by *weight of authority*.”—WILLIAM RUSSELL, *on the cover*. But, in this instance, as in sundry others, wherein he opposes the more common doctrine, and cites concurrent authors, both he and all his authorities are demonstrably to the wrong. For how can they be right, while reason, usage, and the prevailing opinion, are still against them? If we have forty grammars which reject, the articles as a part of speech, we have more than twice as many which recognize them as such; among which are those of the following authors: viz., Adam, D. Adams, Ainsworth, Alden, Alger, W. Allen, Ash, Bacon, Barnard, Beattie, Beck, Bicknell, Bingham, Blair, J. H. Brown, Bucke, Bullions, Burn, Burr, Chandler, Churchill, Coar, Cobbett, Cobbin, Comly, Cooper, Davis, Dearborn, Ensell, Everett, Farnum, Fisk, A. Flint, Folker, Fowler, Frost, R. G. Greene, Greenleaf, Guy, Hall, Hallock, Hart, Harrison, Matt. Harrison, Hazen, Hendrick, Hiley, Hull, Ingersoll, Jaudon, Johnson, Kirkham, Latham, Lennie, A. Lewis, Lowth, Maltby, Maunder, Mennye, Merchant, T. H. Miller, Murray, Nixon, Nutting, Parker and Fox, John Peirce, Picket, Pond, S. Putnam, Russell, Sanborn, Sanders, R. C. Smith, Rev. T. Smith, Spencer, Tower, Tucker, Walker, Webber, Wilcox, Wilson, Woodworth, J. E. Worcester, S. Worcester, Wright. The articles characterize our language more than some of the other parts of speech, and are worthy of distinction for many reasons, one of which is the very great *frequency* of their use.

article from its ancient rank among the parts of speech, no judicious reader, duly acquainted with the subject, can, I think, be well pleased. An article is not properly an “*adjective*,” as they would have it to be; but it is a word of a peculiar sort—a *customary index* to the sense of nouns. It serves not merely to show the extent of signification, in which nouns are to be taken, but is often the principal, and sometimes the only mark, by which a word is known to have the sense and construction of a noun. There is just as much reason to deny and degrade the Greek or French article, (or that of any other language,) as the English; and, if those who are so zealous to reform our *the*, *an*, and *a* into *adjectives*, cared at all to appear consistent in the view of Comparative or General Grammar, they would either set about a wider reformation or back out soon from the pettiness of this.

OBS. 3.—First let it be understood, that *an* or *a* is nearly equivalent in meaning to the numeral adjective *one*, but less emphatic; and that *the* is nearly equivalent in meaning to the pronominal adjective *that* or *those*, but less emphatic. On *some* occasions, these adjectives may well be substituted for the articles; but *not generally*. If the articles were generally equivalent to adjectives, or even if they were generally *like* them, they would *be* adjectives; but, that adjectives may occasionally supply their places, is no argument at all for confounding the two parts of speech. Distinctions must be made, where differences exist; and, that *a*, *an*, and *the*, do differ considerably from the other words which they most resemble, is shown even by some who judge “the distinctive name of *article* to be useless.” See *Crombie’s Treatise*, Chap. 2. The articles therefore must be distinguished, not only from adjectives, but from each other. For, though both are *articles*, each is an index *sui generis*; the one definite, the other indefinite. And as the words *that* and *one* cannot often be interchanged without a difference of meaning, so the definite article and the indefinite are seldom, if ever, interchangeable. To put one for the other, is therefore, in general, to put one *meaning* for an other: “*A* daughter of *a* poor man”—“*The* daughter of *the* poor man”—“*A* daughter of *the* poor man”—and, “*The* daughter of *a* poor man,” are four phrases which certainly have four different and distinct significations. This difference between the two articles may be further illustrated by the following example: “That Jesus was *a* prophet sent from God, is one proposition; that Jesus was *the* prophet, *the* Messiah, is an other; and, though he certainly was both *a* prophet and *the* prophet, yet *the* foundations of *the* proof of these propositions are separate and distinct.”—*Watson’s Apology*, p. 105.

OBS. 4.—Common nouns are, for the most part, names of large classes of objects; and, though what really constitutes the species must always be found entire in every individual, the several objects thus arranged under one general name or idea, are in most instances susceptible of such a numerical distribution as gives rise to an other form of the noun, expressive of plurality; as, *horse*, *horses*. Proper nouns in their ordinary application, are, for the most part, names of particular individuals; and as there is no plurality to a particular idea, or to an individual person or thing as distinguished from all others, so there is in general none to this class of nouns; and no room for *further restriction by articles*. But we sometimes divert such nouns from their usual signification, and consequently employ them with articles or in the plural form; as, “I endeavoured to retain it nakedly in my mind, without regarding whether I had it from *an Aristotle* or *a Zoilus*, *a Newton* or *a Descartes*.”—*Churchill’s Gram.*, Pref., p. 8. “It is not enough to have *Vitruviuses*, we must also have *Augustuses* to employ them.”—*Bicknell’s Gram.*, Part ii, p. 61.

“*A Daniel* come to judgment! yea, *a Daniel*!”—SHAK. *Shylock*.

“Great Homer, in *th’ Achilles*, whom he drew,  
Sets not that one sole Person in our View.”—*Brightland’s Gram.*, p. 183.

OBS. 5.—The article *an* or *a* usually denotes one out of several or many; one of a sort of which there are more; any one of that name, no matter which. Hence its effect upon a particular name, or proper noun, is *directly the reverse* of that which it has upon a common noun. It varies and fixes the meaning of both; but while it restricts that of the latter, it enlarges that of the former. It reduces the general idea of the common noun to any one individual of the class: as, “*A man*,” that is, “*One man*, or *any man*.” On the contrary, it extends the particular idea of the proper noun, and makes the word significant of a class, by supposing others to whom it will apply: as, “*A Nero*,” that is, “*Any Nero*, or *any cruel tyrant*.” Sometimes, however, this article before a proper name, seems to leave the idea still particular; but, if it really does so, the propriety of using it may be doubted: as, “No, not by *a John the Baptist* risen from the dead.”—*Henry’s Expos.*, *Mark*, vi. “It was not solely owing to the madness and depravity of *a Tiberius*, *a Caligula*, *a Nero*, or *a Caracalla*, that a cruel and sanguinary spirit, in their day, was so universal.”—*M’Ilvaine’s Evid.*, p. 398.

OBS. 6.—With the definite article, the noun is applied, sometimes specifically, sometimes individually, but always *definitely*, always distinctively. This article is demonstrative. It marks either the particular individual, or the particular species,—or, (if the noun be plural,) some particular individuals of the species,—as being distinguished from all others. It sometimes refers to a thing as having been previously mentioned; sometimes presumes upon the hearer’s familiarity with the thing; and sometimes indicates a limitation which is made by subsequent words connected with the noun. Such is the import of this article, that with it the singular number of the noun is often more comprehensive, and at the same time more specific, than the plural. Thus, if I say, “*The horse* is a noble animal,” without otherwise intimating that I speak of some particular horse, the sentence will be understood to embrace collectively *that species* of animal; and I shall be thought to mean, “Horses are noble animals.” But if I say, “*The horses* are noble animals,” I use an expression so much more limited, as to include only a few; it must mean some particular horses, which I distinguish from all the rest of the species. Such limitations should be made, whenever there is occasion for them; but needless restrictions displease the imagination, and ought to be avoided; because the mind naturally delights in terms as comprehensive as they may be, if also specific. Lindley Murray, though not uniform in his practice respecting this, seems to have thought it necessary to use the plural in many sentences in which I should decidedly prefer the singular; as, “That *the learners* may have no doubts.”—*Murray’s Octavo Gram.*, Vol. i, p. 81. “The business will not be tedious to *the scholars*.”—*Ib.*, 81. “For the information of *the learners*.”—*Ib.*, 81. “It may afford instruction to *the learners*.”—*Ib.*, 110. “That this is the case, *the learners* will perceive by the following examples.”—*Ib.*, 326. “Some knowledge of it appears to be indispensable to *the scholars*.”—*Ib.*, 335.

OBS. 7.—Proper names of a plural form and signification, are almost always preceded by the definite article; as, “*The Wesleys*,”—“*The twelve Cæsars*,”—“*All the Howards*.” So the names of particular nations, tribes, and sects; as, *The Romans*, *the Jews*, *the Levites*, *the Stoics*. Likewise the plural names of mountains; as, *The Alps*, *the Apennines*, *the Pyrenees*, *the Andes*. Of plural names like these, and especially of such as designate tribes and sects, there is a very great number. Like other proper names, they must be distinguished from the ordinary words of the language, and accordingly they are always

written with capitals; but they partake so largely of the nature of common nouns, that it seems doubtful to which class they most properly belong. Hence they not only admit, but require the article; while most other proper names are so definite in themselves, that the article, if put before them, would be needless, and therefore improper.

“*Nash, Rutledge, Jefferson*, in council great,  
And *Jay*, and *Laurens* oped the rolls of fate;  
*The Livingstons*, fair freedoms generous band,  
*The Lees, the Houstons*, fathers of the land.”—*Barlow*.

OBS. 8.—In prose, the definite article is always used before names of rivers, unless the word *river*, be added; as, *The Delaware, the Hudson, the Connecticut*. But if the word *river* be added, the article becomes needless; as, *Delaware river, Hudson river, Connecticut river*. Yet there seems to be no impropriety in using both; as, *The Delaware river, the Hudson river, the Connecticut river*. And if the common noun be placed before the proper name, the article is again necessary; as, *The river Delaware, the river Hudson, the river Connecticut*. In the first form of expression, however, the article has not usually been resolved by grammarians as relating to the proper name; but these examples, and others of a similar character, have been supposed elliptical: as, “*The* [river] *Potomac*”—“*The* [ship] *Constitution*,”—“*The* [steamboat] *Fulton*.” Upon this supposition, the words in the first and fourth forms are to be parsed alike; the article relating to the common noun, expressed or understood, and the proper noun being in apposition with the appellative. But in the second form, the apposition is reversed; and, in the third, the proper name appears to be taken adjectively. Without the article, some names of rivers could not be understood; as,

“No more *the Varus* and *the Atax* feel  
The lordly burden of the Latian keel.”—*Rowe’s Lucan*, B. i. l. 722.

OBS. 9.—The definite article is often used by way of eminence, to distinguish some particular individual emphatically, or to apply to him some characteristic name or quality: as, “*The Stagirite*,”—that is, Aristotle; “*The Psalmist*,” that is, David; “*Alexander the Great*,”—that is, (perhaps,) Alexander the Great *Monarch*, or Great *Hero*. So, sometimes, when the phrase relates to a collective body of men: as, “*The Honourable, the Legislature*,”—“*The Honourable, the Senate*,”—that is, “The Honourable *Body*, the Legislature,” &c. A similar application of the article in the following sentences, makes a most beautiful and expressive form of compliment: “These are the sacred feelings of thy heart, O Lyttleton, *the friend*.”—*Thomson*. “The pride of swains Palemon was, *the generous* and *the rich*.”—*Id*. In this last example, the noun *man* is understood after “*generous*,” and again after “*rich*,” for, the article being an index to the noun, I conceive it to be improper ever to construe two articles as having reference to one unrepeatd word. Dr. Priestley says, “We sometimes *repeat the article*, when the epithet precedes the substantive; as He was met by *the* worshipful *the* magistrates.”—*Gram.*, p. 148. It is true, we occasionally meet with such fulsome phraseology as this; but the question is, how is it to be explained? I imagine that the word *personages*, or something equivalent, must be understood after *worshipful*, and that the Doctor ought to have inserted a comma there.

OBS. 10.—In Greek, there is no article corresponding to our *an* or *a*, consequently *man* and *a man* are rendered alike; the word, ἄνθρωπος may mean either. See, in the original, these texts: “There was *a man* sent from God,” (*John*, i, 6,) and, “What is *man*, that thou art mindful of him?”—*Heb.*, ii, 6. So of other nouns. But the *definite* article of that

language, which is exactly equivalent to our *the*, is a declinable word, making no small figure in grammar. It is varied by numbers, genders, and cases; so that it assumes more than twenty different forms, and becomes susceptible of six and thirty different ways of *agreement*. But this article in English is perfectly simple, being entirely destitute of grammatical modifications, and consequently incapable of any form of grammatical agreement or disagreement—a circumstance of which many of our grammarians seem to be ignorant; since they prescribe a rule, wherein they say, it “*agrees*,” “*may agree*,” or “*must agree*,” with its noun. Nor has the indefinite article any variation of form, except the change from *an* to *a*, which has been made for the sake of brevity or euphony.

OBS. 11.—As *an* or *a* conveys the idea of unity, of course it applies to no other than nouns of the singular number. *An eagle* is one eagle, and the plural word *eagles* denotes more than one; but what could possibly be meant by “*ans eagles*,” if such a phrase were invented? Harris very strangely says, “The Greeks have no article correspondent to *an* or *a*, but *supply its place by a* NEGATION *of their article*. And even in English, *where* the article *a* cannot be used, as *in* plurals, *its force is exprest by the same* NEGATION.”—*Harris’s Hermes*, p. 218. What a sample of grammar is this! Besides several minor faults, we have here a *nonentity*, a NEGATION *of the Greek article*, made to occupy a place in language, and to express *force*! The force of what? Of a plural *an* or *a!* of such a word as *ans* or *aes*! The error of the first of these sentences, Dr. Blair has copied entire into his eighth lecture.

OBS. 12.—The following rules of *agreement*, though found in many English grammars, are not only objectionable with respect to the sense intended, but so badly written as to be scarcely intelligible in any sense: 1. “The article *a* or *an* *agrees* with nouns *in* the singular number *only, individually, or collectively*: as, A Christian, an infidel, a score, a thousand.” 2. “The definite article *the* may *agree* with nouns *in the singular* AND\* *plural number*: as, The garden, the houses, the stars.”—*Murray’s Gram.*, 8vo, p. 170; 12mo, 139; *Fish’s Murray*, 98; *a Teacher’s*, 45. For the purpose of preventing any erroneous construction of the articles, these rules are utterly useless; and for the purpose of syntactical parsing, or the grammatical resolution of this part of speech, they are awkward and inconvenient. The syntax of the articles may be much better expressed in this manner: “*Articles relate to the nouns which they limit*,” for, in English, the bearing of the articles upon other words is properly that of simple *relation*, or dependence, according to the sense, and not that of *agreement*, not a similarity of distinctive modifications.

OBS. 13.—Among all the works of earlier grammarians, I have never yet found a book which taught correctly the *application* of the two forms of the indefinite article *an* or *a*. Murray, contrary to Johnson and Webster, considers *a* to be the original word, and *an* the euphonic derivative. He says: “*A* becomes *an* before a vowel, and before a silent *h*. But if *the h* be sounded, *the a* only is to be used.”—*Murray’s Gram.*, p. 31. To this he adds, in a marginal note, “*A* instead of *an* is *now* used before words beginning with *u* long. It is used before *one*. *An* must be used before *words* WHERE *the h* is not silent, if the accent is on the second syllable; as, *an heroic action, an historical account*.”—*Ib.* This explanation, clumsy as it is, in the whole conception; broken, prolix, deficient, and inaccurate as it is, both in style and doctrine; has been copied and copied from grammar to grammar, as if no one

---

\* In Murray’s Abridgement, and in his “Second Edition,” 12mo, the connective in this place is “*or*,” and so is it given by most of his amenders; as in *Alger’s Murray*, p. 68; *Alden’s*, 89; *Bacon’s*, 48; *Cooper’s*, 111; *A. Flint’s*, 65; *Maltby’s*, 60; *Miller’s*, 67; *S. Putnam’s*, 74; *Russell’s*, 52; *T. Smith’s*, 61. All these, and many more, repeat both of these ill-devised rules.

could possibly better it. Besides several other faults, it contains a palpable misuse of the article itself: “*the h*” which is specified in the second and fifth sentences, is the “*silent h*” of the first sentence; and this inaccurate specification gives us the two obvious solecisms of supposing, “*if the [silent] h be sounded,*” and of *locating* “*words WHERE the [silent] h is not silent!*” In the word *humour*, and its derivatives, the *h* is silent, by all authority except Webster’s; and yet these words require *a* and not *an* before them.

OBS. 14.—It is the *sound* only, that governs the form of the article, and not the *letter* itself; as, “Those which admit of the regular form, are marked with *an* R.”—*Murray’s Gram.*, p. 101. “*A* heroic poem, written by Virgil.”—*Webster’s Dict.* “Every poem of the kind has no doubt *a* historical groundwork.”—*Philological Museum*, Vol. i, p. 457. “*A* poet must be *a* naturalist and *a* historian.”—*Coleridge’s Introduction*, p. 111. Before *h* in an unaccented syllable, either form of the article may be used without offence to the ear; and either may be made to appear preferable to the other, by merely aspirating the letter in a greater or less degree. But as the *h*, though ever so feebly aspirated has *something* of a consonant sound, I incline to think the article in this case ought to conform to the general principle: as, “*A historical* introduction has, generally, *a happy* effect to rouse attention.”—*Blair’s Rhet.*, p. 311. “He who would write heroic poems, should make his whole life *a heroic* poem.”—See *Life of Schiller*, p. 56. Within two lines of this quotation, the biographer speaks of “*an heroic* multitude!” The suppression of the sound of *h* being with Englishmen a very common fault in pronunciation, it is not desirable to increase the error, by using a form of the article which naturally leads to it. “How often do we hear *an air* metamorphosed into *a hair*, a *hat* into a *gnat*, and a *hero* into *a Nero!*”—*Churchill’s Gram.*, p. 205. Thus: “Neither of them had that bold and adventurous ambition which makes a conqueror *an hero.*”—*Bolingbroke, On History*, p. 174.

OBS. 15.—Some later grammarians are still more faulty than Murray, in their rules for the application of *an* or *a*. Thus Sanborn: “The vowels are *a, e, i, o,* and *u*. *An* should be used before words beginning with *any of these letters*, or with a silent *h.*”—*Analytical Gram.*, p. 11. “*An* is used before words beginning with *u* long or with *h not silent*, when the accent is on the second syllable; as, *an united* people, *an historical* account, *an heroic* action.”—*Ib.*, p. 85. “*A* is used when the next word begins with a *consonant*; *an*, when it begins with a *vowel* or silent *h.*”—*Ib.*, p. 129. If these rules were believed and followed, they would greatly multiply errors.

OBS. 16.—Whether the word *a* has been formed from *an*, or *an* from *a*, is a disputed point—or rather, a point on which our grammarians dogmatize differently. This, if it be worth the search, must be settled by consulting some genuine writings of the twelfth century. In the pure Saxon of an earlier date, the words *seldom occur*; and in that ancient dialect *an*, I believe, is used only as a declinable numerical adjective, and *a* only as a preposition. In the thirteenth century, both forms were in common use, in the sense now given them, as may be seen in the writings of Robert of Gloucester; though some writers of a much later date—or, at any rate, *one*, the celebrated Gawin Douglas, a Scottish bishop, who died of the plague in London, in 1522—constantly wrote *ane* for both *an* and *a*: as,

“Be not ouer studyous to spy *ane* mote in myn E,  
That in gour awin *ane* ferrye bot can not se.”—*Tooke’s Diversions*, Vol. i, p. 124.  
“*Ane* uthir mache to him was socht and sperit;  
Bot thare was *nane* of all the rout that sterit.”—*Ib.*, Vol. i, p. 160.

OBS. 17.—This, however, was a *Scotticism*; as is also the use of *ae* for *a*: Gower and Chaucer used *an* and *a* as we now use them. The Rev. J. M. M'Culloch, in an English grammar published lately in Edinburgh, says, “*A* and *an* were originally *ae* and *ane*, and were probably used at first simply to convey the idea of unity; as, *ae* man, *ane* ox.”—*Manual of E. Gram.*, p. 30. For this idea, and indeed for a great part of his book, he is indebted to Dr. Crombie; who says, “To signify unity, or one of a class, our forefathers employed *ae* or *ane*; as, *ae* man, *ane* ox.”—*Treatise on Etym. and Synt.*, p. 53. These authors, like Webster, will have *a* and *an* to be *adjectives*. Dr. Johnson says, “*A*, an *article* set before nouns of the singular number; as, *a* man, *a* tree. This article has no plural signification. Before a word beginning with a vowel, it is written *an*; as, *an* ox, *an* egg; of which *a* is the contraction.”—*Quarto Dict.*, *w. A*.

OBS. 18.—Dr. Webster says, “*A* is also an abbreviation of the Saxon *an* or *ane*, *one*, used before words beginning with an articulation; as, *a* table, *instead* of *an* table, or one table. *This is a modern change*; for, in Saxon, *an* was used before articulations as well as vowels; as, *an* tid, a time, *an* gear, a year.”—*Webster's Octavo Dict.*, *w. A*. A modern change, indeed! By his own showing in other works, it was made long before the English language existed! He says, “*An*, therefore, is the original English adjective or ordinal number *one*; and was never written *a* until after the Conquest.”—*Webster's Philos. Gram.*, p. 20; *Improved Gram.*, 14. “*The Conquest*,” means the Norman Conquest, in 1066; but English was not written till the thirteenth century. This author has long been idly contending, that *an* or *a* is not an *article*, but an *adjective*; and that it is not properly distinguished by the term “*indefinite*.” Murray has answered him well enough, but he will not be convinced.\* See *Murray's Gram.*, pp. 34 and 35. If *a* and *one* were equal, we could not say, “*Such a one*,”—“*What a one*,”—“*Many a one*,”—“*This one thing*,” and surely these are all good English, though *a* and *one* here admit no interchange. Nay, *a* is sometimes found before *one* when the latter is used adjectively; as, “There is no record in Holy Writ of the institution of *a one* all-controlling monarchy.”—*Supremacy of the Pope Disproved*, p. 9. “If not to *a one* Sole Arbiter.”—*Ib.*, p. 19.

OBS. 19.—*An* is sometimes a *conjunction*, signifying *if*; as, “Nay, *an* thou'lt mouthe, I'll rant as well as thou.”—*Shak.* “*An* I have not ballads made on you all, and sung to fifty tunes, may a cup of sack be my poison.”—*Id.*, *Falstaff*. “But, *an* it were to do again, I should write again.”—*Lord Byron's Letters*. “But *an* it be a long part, I can't remember it.”—SHAKESPEARE: *Burgh's Speaker*, p. 136.

OBS. 20.—In the New Testament, we meet with several such expressions as the following: “And his disciples were *an hungred*.”—SCOTT'S BIBLE: *Matt*, xii, 1. “When he was *an hungred*.”—*Ib.* xii, 3. “When he had need and was *an hungered*.”—*Ib.* *Mark*, ii, 25. Alger, the improver of Murray's Grammar, and editor of the Pronouncing Bible, taking this *an* to be the indefinite article, and perceiving that the *h* is sounded in *hungered*, changed the particle to *a* in all these passages; as, “And his disciples were *a hungered*.” But what sense he thought he had made of the sacred record, I know not. The Greek text, rendered word for word, is simply this: “*And his disciples hungered*.” And that the sentences above, taken either way, are *not good English*, must be obvious to every intelligent reader. *An*, as I apprehend, is here a mere *prefix*, which has somehow been mistaken in form, and erroneously disjoined from the following word. If so, the correction ought to be made after the fashion of the following passage from Bishop M'Ilvaine: “On a certain occasion, our

\* When this was written, Dr. Webster was living.

Saviour was followed by five thousand men, into a desert place, where they were *enhungered*.”—*Lectures on Christianity*, p. 210.

OBS. 21.—The word *a*, when it does not denote one thing of a kind, is not an article, but a genuine *preposition*; being probably the same as the French *à*, signifying *to*, *at*, *on*, *in*, or *of*: as, “Who hath it? He that died *a* Wednesday.”—*Shak*. That is, *on* Wednesday. So sometimes before plurals; as, “He carves *a* Sundays.”—*Swift*. That is, *on* Sundays. “He is let out *a* nights.”—*Id*. That is, *on* nights—like the following example: “A pack of rascals that walk the streets *on* nights.”—*Id*. “He will knap the spears *a* pieces with his teeth.”—*More’s Antid*. That is, *in* pieces, or *to* pieces. So in the compound word *now-a-days*, where it means *on*; and in the proper names, Thomas *à* Becket, Thomas *à* Kempis, Anthony *à* Wood, where it means *at* or *of*.

“Bot certainly the daisit blude *now on dayis*  
Waxis dolf and dull throw myne unwieldy age.”—*Douglas*.

OBS. 22.—As a preposition, *a* has now most generally become a *prefix*, or what the grammarians call an inseparable preposition; as in *abed*, in bed; *aboard*, on board; *abroad*, at large; *afire*, on fire; *afore*, in front; *afoul*, in contact; *aloft*, on high; *aloud*, with loudness; *amain*, at main strength; *amidst*, in the midst; *akin*, of kin; *ajar*, unfastened; *ahead*, onward; *afield*, to the field; *alee*, to the leeward; *anew*, of new, with renewal. “*A-nights*, he was in the practice of sleeping, &c.; but *a-days* he kept looking on the barren ocean, shedding tears.”—*Dr. Murray’s Hist. of Europ. Lang.*, Vol. ii, p. 162. Compounds of this kind, in most instances, follow verbs, and are consequently reckoned adverbs; as, *To go astray*,—*To turn aside*,—*To soar aloft*,—*To fall asleep*. But sometimes the antecedent term is a noun or a pronoun, and then they are as clearly adjectives; as, “Imagination is like to work better upon sleeping men, than *men awake*.”—*Lord Bacon*. “*Man alive*, did you ever make a *hornet afraid*, or catch a *weasel asleep*?” And sometimes the compound governs a noun or a pronoun after it, and then it is a preposition; as, “A bridge is laid *across* a river.”—*Webster’s Dict.*, “To break his bridge *athwart* the Hellespont.”—*Bacon’s Essays*.

“Where Ufens glides *along* the lowly lands,  
Or the black water of Pomptina stands.”—*Dryden*.

OBS. 23.—In several phrases, not yet to be accounted obsolete, this old preposition *à* still retains its place as a separate word; and none have been more perplexing to superficial grammarians, than those which are formed by using it before participles in *ing*; in which instances, the participles are in fact governed by it: for nothing is more common in our language, than for participles of this form to be governed by prepositions. For example, “You have set the cask *a* leaking,” and, “You have set the cask *to* leaking,” are exactly equivalent, both in meaning and construction. “Forty and six years was this temple *in* building.”—*John*, ii, 20. *Building* is not here a noun, but a participle; and *in* is here better than *a*, only because the phrase, *a building*, might be taken for an article and a noun, meaning *an edifice*.<sup>\*</sup> Yet, in almost all cases, other prepositions are, I think, to be

<sup>\*</sup> In French, the preposition *à*, (*to*,) is always carefully distinguished from the verb *a*, (*has*,) by means of the grave accent, which is placed over the former for that purpose. And in general also the Latin word *à*, (*from*,) is marked in the same way. But, with us, no appropriate sign has hitherto been adopted to distinguish the preposition *a* from the article *a*; though the Saxon *a*, (*to*,) is given by Johnson with an acute, even where no other *a* is found. Hence, in their ignorance, thousands of vulgar readers, and among them the

preferred to *à*, if others equivalent to it can be found. Examples: “Lastly, they go about to apologize for the long time their book hath been *a coming* out:” i.e., *in* coming out.—*Barclay’s Works*, Vol. iii, p. 179. “And, for want of reason, he falls *a railing*:” i.e., *to* railing.—*Ib.*, iii, 357. “That the soul should be this moment busy *a thinking*:” i.e., *at* or *in* thinking.—*Locke’s Essay*, p. 78. “Which, once set *a going*, continue in the same steps:” i.e., *to* going.—*Ib.*, p. 284. “Those who contend for four per cent, have set men’s mouths *a watering* for money:” i.e., *to* watering.—LOCKE: *in Johnson’s Dict.* “An other falls *a ringing* a Pescennius Niger:” i.e., *to* ringing.—ADDISON: *ib.* “At least to set others *a thinking* upon the subject:” i.e., *to* thinking.—*Johnson’s Gram. Com.*, p. 300. “Every one that could reach it, cut off a piece, and fell *a eating*:” i.e., *to* eating.—*Newspaper*. “To go *a mothering*,\* is to visit parents on Midlent Sunday.”—*Webster’s Dict.*, *w. Mothering*. “Which we may find when we come *a fishing* here.”—*Wotton*. “They go *a begging* to a bankrupt’s door.”—*Dryden*. “*A hunting* Chloë went.”—*Prior*. “They burst out *a laughing*.”—*M. Edgeworth*. In the last six sentences, *a* seems more suitable than any other preposition would be: all it needs, is an accent to distinguish it from the article; as, *à*.

OBS. 24.—Dr. Alexander Murray says, “To be *a-seeking*, is the relic of the Saxon to be *on* or *an* seeking. What are you *a-seeking*? is *different* from, What are you seeking? It means more fully *the going on* with the process.”—*Hist. Europ. Lang.*, Vol. ii, p. 149. I disapprove of the hyphen in such terms as “*à seeking*,” because it converts the preposition and participle into I know not what; and it may be observed, in passing, that the want of it, in such as “*the going on*,” leaves us a loose and questionable word, which, by the conversion of the participle into a noun, becomes a nondescript in grammar. I dissent also

authors of sundry grammars, have constantly mistaken this preposition for an article. Examples: “Some adverbs are composed of *the article a* prefixed to nouns; as *a-side*, *a-thirst*, *a-sleep*, *a-shore*, *a-ground*, &c.”—*Comly’s Gram.*, p67. “Repeat some [adverbs] that are composed of *the article a* and nouns.”—*Kirkham’s Gram.*, p. 89. “To go *a fishing*;” “To go *a hunting*;” i.e. “to go *on* a fishing *voyage* or *business*;” “to go *on* a hunting *party*.”—*Murray’s Gram.*, p. 221; *Fisk’s*, 147; *Ingersoll’s*, 157; *Smith’s*, 184; *Bullions’s*, 129; *Merchant’s*, 101; *Weld’s*, 192, *and others*. That this interpretation is false and absurd, may be seen at once by any body who can read Latin; for, *a hunting*, *a fishing*, &c., are expressed by the supine in *um*: as, “*Venatum ire*.”—*Virg. Æn.* I.e., “To go *a hunting*.” “*Abeo piscatum*.”—*Beza*. I.e. “I go *a fishing*.”—*John*, xxi, 3. Every school-boy ought to know better than to call this *a* an article. *A fishing* is equivalent to the infinitive *to fish*. For the Greek of the foregoing text is Ὑπάγω δλιεύειν, which is rendered by Montanus, “*Vado piscari*;” i.e., “*I go to fish*.” One author ignorantly says, “The *article a* seems to have *no particular meaning*, and is *hardly proper* in such expressions as these. ‘He went *a-hunting*,’ She lies *a-bed* all day.”—*Wilcox’s Gram.*, p. 59. No marvel that he could not find the meaning of an *article* in this *a!* With doltish and double inconsistency, Weld first calls this “The *article a* employed *in the sense* of a *preposition*,” (*E. Gram.*, p. 177,) and afterwards adopts Murray’s interpretation as above cited! Some, too, have an absurd practice of joining this preposition to the participle; generally with the hyphen, but sometimes without: thus, “*A-GOING*, In motion; as, to set a mill *agoing*.”—*Webster’s Dict.* The doctor does not tell us what part of speech *agoing* is; but, certainly, “to set the mill *to* going,” expresses just the same meaning, and is about as often heard. In the burial-service of the Common Prayer Book, we read, “They are even as *asleep*,” but, in the ninetieth Psalm, from which this is taken, we find the text thus: “They are as *a sleep*,” that is, as a dream that is fled. Now these are very different readings, and cannot both be right.

\* Here the lexicographer forgets his false etymology of *a* before the participle, and writes the words *separately*, as the generality of authors always have done. *A* was used as a preposition long before the article *a* appeared in the language; and I doubt whether there is any truth at all in the common notions of its origin. Webster says, “In the words *abed*, *ashore*, &c., and before *the* participles *acoming*, *agoing*, *ashooting*, [he should have said, ‘and *before* participles; as, *a coming*, *a going*, *a shooting*,] *a* has been supposed a contraction of *on* or *at*. It may be so *in some cases*; but with the participles, it *is sometimes* a contraction of the Saxon prefix *ge*, and *sometimes* perhaps of the Celtic *ag*.”—*Improved Gram.*, p. 175. See *Philos. Gram.*, p. 244. What admirable learning is this! *A*, forsooth, is a *contraction* of *ge*! And this is the doctor’s reason for *joining* it to the participle!

from Dr. Murray, concerning the use of the preposition or prefix *a*, in examples like that which he has here chosen. After a *neuter verb*, this particle is unnecessary to the sense, and, I think, injurious to the construction. Except in poetry, which is measured by syllables, it may be omitted without any substitute; as, “I am *a walking*.”—*Johnson’s Dict.*, *w. A*. “He had one only daughter, and she lay *a dying*.”—*Luke*, viii, 42. “In the days of Noah, while the ark was *a preparing*.”—1 *Pet.*, iii, 20. “Though his unattentive thoughts be elsewhere *a wandering*.”—*Locke’s Essay*, p. 284. Say—“be wandering elsewhere;” and omit the *a*, in all such cases.

“And—when he thinks, good easy man, full surely  
His greatness is *a ripening*—nips his root.”—*Shak*.

OBS. 25.—“*A* has a peculiar signification, denoting the proportion of one thing to another. Thus we say, The landlord hath a hundred *a year*; the ship’s crew gained a thousand pounds *a man*.”—*Johnson’s Dict.* “After the rate of twenty leagues *a day*.”—*Addison*. “And corn was at two sesterces *a bushel*.”—*Duncan’s Cicero*, p. 82. Whether *a* in this construction is the article or the preposition, seems to be questionable. Merchants are very much in the habit of supplying its place by the Latin preposition *per*, by; as, “Board, at \$2 *per week*.”—*Preston’s Book-Keeping*, p. 44. “Long lawn, at \$12 *per piece*.”—*Dilworth’s*, p. 63. “Cotton, at 2s. 6d. *per pound*.”—*Morrison’s*, p. 75. “Exchange, at 12d. *per livre*.”—*Jackson’s*, p. 73. It is to be observed that *an*, as well as *a*, is used in this manner; as, “The price is one dollar *an ounce*.” Hence, I think, we may infer, that this is not the old preposition *a*, but the article *an* or *a*, used in the distributive sense of *each* or *every*, and that the noun is governed by a preposition understood; as, “He demands a dollar *an hour*,” i. e., a dollar *for each* hour.—“He comes twice *a year*,” i. e., twice *in every* year.—“He sent them to Lebanon, ten thousand *a month* by courses:” (1 *Kings*, v, 14:) i. e., ten thousand, *monthly*; or, as our merchants say, “*per month*.” Some grammarians have also remarked, that, “In mercantile accounts, we frequently see *a* put for *to*, in a very odd sort of way; as, ‘Six bales marked 1 *a* 6.’ The merchant means, ‘marked *from* 1 to 6.’ This is taken to be a relic of the Norman French, which was once the law and mercantile language of England; for, in French, *a*, with an accent, signifies *to* or *at*.”—*Emmons’s Gram.*, p. 73. Modern merchants, in stead of accenting the *a*, commonly turn the end of it back; as, @.

OBS. 26.—Sometimes a numeral word with the indefinite article—as *a few*, *a great many*, *a dozen*, *a hundred*, *a thousand*—denotes an aggregate of several or many taken collectively, and yet is followed by a plural noun, denoting the sort or species of which this particular aggregate is a part: as, “A few small fishes,”—“A great many mistakes,”—“A dozen bottles of wine,”—“A hundred lighted candles,”—“A thousand miles off.” Respecting the proper manner of explaining these phrases, grammarians differ in opinion. That the article relates not to the plural noun, but to the numerical word only, is very evident; but whether, in these instances, the words *few*, *many*, *dozen*, *hundred*, and *thousand*, are to be called nouns or adjectives, is matter of dispute. Lowth, Murray, and many others, call them *adjectives*, and suppose a peculiarity of construction in the article;—like that of the singular adjectives *every* and *one* in the phrases, “*Every* ten days,”—“*One* seven times more.”—*Dan.*, iii, 19. Churchill and others call them *nouns*, and suppose the plurals which follow, to be always in the objective case governed by *of*, understood: as, “A few [of] years,”—“A thousand [of] doors,”—like the phrases, “A *couple of* fowls,”—“A *score of* fat bullocks.”—*Churchill’s Gram.*, p. 279. Neither solution is free from difficulty. For example: “There are a great many adjectives.”—*Dr. Adam*. Now, if *many* is here a singular

nominative, and the only subject of the verb, what shall we do with *are*? and if it is a plural adjective, what shall we do with *a* and *great*? Taken in either of these ways, the construction is anomalous. One can hardly think the word “*adjectives*” to be here in the objective case, because the supposed ellipsis of the word *of* cannot be proved; and if *many* is a noun, the two words are perhaps in apposition, in the nominative. If I say, “*A thousand men* are on their way,” the men *are the thousand*, and the thousand *is nothing but the men*; so that I see not why the relation of the terms may not be that of *apposition*. But if *authorities* are to decide the question, doubtless we must yield it to those who suppose the whole numeral phrase to be taken *adjectively*; as, “Most young Christians have, in the course of *half a dozen* years, time to read *a great many* pages.”—*Young Christian*, p. 6.

“For harbour at *a thousand doors* they knock’d;  
Not one of all *the thousand* but was lock’d.”—*Dryden*.

OBS. 27.—The numeral words considered above, seem to have been originally adjectives, and such may be their most proper construction now; but all of them are susceptible of being construed as nouns, even if they are not such in the examples which have been cited. *Dozen*, or *hundred*, or *thousand*, when taken abstractly, is unquestionably a noun; for we often speak of *dozens*, *hundreds*, and *thousands*. *Few* and *many* never assume the plural form, because they have naturally a plural signification; and *a few* or *a great many* is not a collection so definite that we can well conceive of *fews* and *manies*; but both are sometimes construed substantively, though in modern English\* it seems to be mostly by ellipsis of the noun. Example: “The praise of *the judicious few* is an ample compensation for the neglect of *the illiterate many*.”—*Churchill’s Gram.*, p. 278. Dr. Johnson says, the word *many* is remarkable in Saxon for its frequent use. The following are some of the examples in which he calls it a substantive, or noun: “After him the rascal *many* ran.”—*Spenser*. “O thou fond *many*.”—*Shakspeare*. “A care-craz’d mother of a *many* children.”—*Id.* “And for thy sake have I shed *many* a tear.”—*Id.* “The vulgar and the *many* are fit only to be led or driven.”—*South*. “He is liable to a great *many* inconveniences every moment of his life.”—*Tillotson*. “Seeing a great *many* in rich gowns, he was amazed.”—*Addison*.

“There parting from the king, the chiefs divide,  
And wheeling east and west, before their *many* ride.”—*Dryden*.

OBS. 28.—“On the principle here laid down, we may account for a peculiar use of the article with the adjective *few*, and some other diminutives. In saying, ‘*A few* of his adherents remained with him;’ we insinuate, that they constituted a number sufficiently important to be formed into an aggregate: while, if the article be omitted, as, ‘*Few* of his adherents remained with him;’ this implies, that he was nearly deserted, by representing them as individuals not worth reckoning up. A similar difference occurs between the phrases: ‘He exhibited *a little* regard for his character;’ and ‘He exhibited *little* regard for his character.’”—*Churchill’s Gram.*, p. 279. The word *little*, in its most proper construction, is an adjective, signifying *small*; as, “He was *little* of stature.”—*Luke*. “Is it not a *little* one?”—*Genesis*. And in sentences like the following, it is also reckoned an adjective, though the article seems to relate to it, rather than to the subsequent noun; or perhaps it

\* The following construction may be considered an *archaism*, or a form of expression that is now obsolete: “You have bestowed *a many of* kindnesses upon me.”—*Walker’s English Particles*, p. 278.

may be taken as relating to them both: “Yet *a little* sleep, *a little* slumber, *a little* folding of the hands to sleep.”—*Prov.*, vi, 10; xxiv, 33. But by a common ellipsis, it is used as a noun, both with and without the article; as, “*A little* that a righteous man hath, is better than the riches of many wicked.”—*Psalms*, xxxvii, 16. “Better is *little* with the fear of the Lord, than great treasure and trouble therewith.”—*Prov.*, xv, 16. “He that despiseth little things, shall perish by *little* and *little*.”—*Ecclesiasticus*. It is also used adverbially, both alone and with the article *a*; as, “The poor sleep *little*.”—*Otway*. “Though they are *a little* astringent.”—*Arbuthnot*. “When he had gone *a little* farther thence.”—*Mark*, i, 19. “Let us vary the phrase [in] *a very little*” [degree].—*Kames*, Vol. ii, p. 163.

OBS. 29.—“As it is the nature of the articles to limit the signification of a word, they are applicable only to words expressing ideas capable of being individualized, or conceived of as single things or acts; and nouns implying a general state, condition, or habit, must be used without the article. It is not vaguely therefore, but on fixed principles, that the article is omitted, or inserted, in such phrases as the following: ‘in terror, in fear, in dread, in haste, in sickness, in pain, in trouble; in *a* fright, in *a* hurry, in *a* consumption; *the* pain of his wound was great; her son’s dissipated life was *a* great trouble to her.’”—*Churchill’s Gram.*, p. 127.

OBS. 30.—Though *the*, *an*, and *a*, are the only articles in our language, they are far from being the only definitives. Hence, while some have objected to the peculiar distinction bestowed upon these little words, firmly insisting on throwing them in among the common mass of adjectives; others have taught, that the definitive adjectives—I know not how many—such as, *this*, *that*, *these*, *those*, *any*, *other*, *some*, *all*, *both*, *each*, *every*, *either*, *neither*—“are much more properly articles than any thing else.”—*Hermes*, p. 234. But, in spite of this opinion, it has somehow happened, that these definitive adjectives have very generally, and very absurdly, acquired the name of *pronouns*. Hence, we find Booth, who certainly excelled most other grammarians in learning and acuteness, marvelling that the *articles* “were ever separated from the class of *pronouns*.” To all this I reply, that *the*, *an*, and *a*, are worthy to be distinguished as *the only articles*, because they are not only used with much greater *frequency* than any other definitives, but are specially restricted to the limiting of the signification of nouns. Whereas the other definitives above mentioned are very often used to supply the place of their nouns; that is, to represent them understood. For, in general, it is only by ellipsis of the noun after it, and not as the representative of a noun going before, that any one of these words assumes the appearance of a pronoun. Hence, they are not pronouns, but adjectives. Nor are they “more properly articles than any thing else;” for, “if the essence of an article be to define and ascertain” the meaning of a noun, this very conception of the thing necessarily supposes the noun to be used with it.

OBS. 31.—The following example, or explanation, may show what is meant by definitives. Let the general term be *man*, the plural of which is *men*: *A man*—one unknown or indefinite; *The man*—one known or particular; *The men*—some particular ones; *Any man*—one indefinitely; *A certain man*—one definitely; *This man*—one near; *That man*—one distant; *These men*—several near; *Those men*—several distant; *Such a man*—one like some other; *Such men*—some like others; *Many a man*—a multitude taken singly; *Many men*—an indefinite multitude taken plurally; *A thousand men*—a definite multitude; *Every man*—all or each without exception; *Each man*—both or all taken separately; *Some man*—one, as opposed to none; *Some men*—an indefinite number or part; *All men*—the whole taken plurally; *No men*—none of the sex; *No man*—never one of the race.

**EXAMPLES FOR PARSING.****PRAXIS II—ETYMOLOGICAL.**

*In the Second Praxis, it is required of the pupil—to distinguish and define the different parts of speech, and to explain the ARTICLES as definite or indefinite.*

*The definitions to be given in the Second Praxis, are two for an article, and one for a noun, an adjective, a pronoun, a verb, a participle, an adverb, a conjunction, a preposition, or an interjection. Thus:—*

**EXAMPLE PARSED.**

“The task of a schoolmaster laboriously prompting and urging an indolent class, is worse than his who drives lazy horses along a sandy road.”—*G. Brown.*

*The* is the definite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The definite article is *the*, which denotes some particular thing or things.

*Task* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*Of* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*A* is the indefinite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The indefinite article is *an* or *a*, which denotes one thing of a kind, but not any particular one.

*Schoolmaster* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*Laboriously* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Prompting* is a participle. 1. A participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb.

*And* is a conjunction. 1. A conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected.

*Urging* is a participle. 1. A participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb.

*An* is the indefinite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The indefinite article is *an* or *a*, which denotes one thing of a kind, but not any particular one.

*Indolent* is an adjective. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality.

*Class* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*Is* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Worse* is an adjective. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality.

*Than* is a conjunction. 1. A conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected.

*He* is a pronoun. 1. A pronoun is a word used in stead of a noun.

*Who* is a pronoun. 1. A pronoun is a word used in stead of a noun.

*Drives* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Lazy* is an adjective. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality.

*Horses* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

*Along* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*A* is the indefinite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The indefinite article is *an* or *a*, which denotes one thing of a kind, but not any particular one.

*Sandy* is an adjective. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality.

*Road* is a noun. 1. A noun is the name of any person, place, or thing, that can be known or mentioned.

#### LESSON I.—PARSING.

“The Honourable, the Corporation of the city, granted the use of the common council chamber, for holding the Convention; generously adding the privilege of occupying the rotunda, or the new court-room, if either would better suit the wishes of the committee.”—*Journal of Literary Convention*, N. Y., 1830.

“When the whole is put for a part, or a part for the whole; the genus for a species, or a species for the genus; the singular number for the plural, or the plural for the singular; and, in general, when any thing less, or any thing more, is put for the precise object meant; the figure is called a Synecdoche.”—See *Blair's Rhet.*, p. 141.

“The truth is, a representative, as an individual, is on a footing with other people; but, as a representative of a State, he is invested with a share of the sovereign authority, and is so far a governor of the people.”—See *Webster's Essays*, p. 50.

“Knowledge is the fruit of mental labour—the food and the feast of the mind. In the pursuit of knowledge, the greater the excellence of the subject of inquiry, the deeper ought to be the interest, the more ardent the investigation, and the dearer to the mind the acquisition of the truth.”—*Keith's Evidences*, p. 15.

“Canst thou, O partial Sleep! give thy repose  
To the wet seaboy in an hour so rude?”—*Shakspeare*.

## LESSON II.—PARSING.

“Every family has a master; (or a mistress—I beg the ladies’ pardon;) a ship has a master; when a house is to be built, there is a master; when the highways are repairing, there is a master; every little school has a master: the continent is a great school; the boys are numerous, and full of roguish tricks; and there is no master. The boys in this great school play truant, and there is no person to chastise them.”—See *Webster’s Essays*, p. 128.

“A man who purposely rushes down a precipice and breaks his arm, has no right to say, that surgeons are an evil in society. A legislature may unjustly limit the surgeon’s fee; but the broken arm must be healed, and a surgeon is the only man to restore it.”—See *ib.*, p. 135.

“But what new sympathies sprung up immediately where the gospel prevailed! It was made the duty of the whole Christian community to provide for the stranger, the poor, the sick, the aged, the widow, and the orphan.”—*M’Ilvaine’s Evi.*, p. 408.

“In the English language, the same word is often employed both as a noun and as a verb; and sometimes as an adjective, and even as an adverb and a preposition also. Of this, *round* is an example.”—See *Churchill’s Gram.*, p. 24.

“The old oaken bucket, the iron-bound bucket,  
The moss-covered bucket, arose from the well.”—*Woodworth*.

## LESSON III.—PARSING.

“Most of the objects in a natural landscape are beautiful, and some of them are grand: a flowing river, a spreading oak, a round hill, an extended plain, are delightful; and even a rugged rock, and a barren heath, though in themselves disagreeable, contribute by contrast to the beauty of the whole.”—See *Kames’s El. of Crit.*, i, 185.

“An animal body is still more admirable, in the disposition of its several parts, and in their order and symmetry: there is not a bone, a muscle, a blood-vessel, a nerve, that hath not one corresponding to it on the opposite side; and the same order is carried through the most minute parts.”—See *ib.*, i, 271. “The constituent parts of a plant, the roots, the stem, the branches, the leaves, the fruit, are really different systems, united by a mutual dependence on each other.”—*Ib.*, i, 272.

“With respect to the form of this ornament, I observe, that a circle is a more agreeable figure than a square, a globe than a cube, and a cylinder than a parallelopipédon. A column is a more agreeable figure than a pilaster; and, for that reason, it ought to be preferred, all other circumstances being equal. An other reason concurs, that a column connected with a wall, which is a plain surface, makes a greater variety than a pilaster.”—See *ib.*, ii, 352.

“But ah! what myriads claim the bended knee!  
Go, count the busy drops that swell the sea.”—*Rogers*.

**IMPROPRIETIES FOR CORRECTION.****ERRORS RESPECTING ARTICLES.****LESSON I.—ADAPT THE ARTICLES.**

“Honour is an useful distinction in life.”—*Milnes’s Greek Grammar*, p. vii.

[FORMULE.—Not proper, because the article *an* is used before *useful*, which begins with the sound of *yu*. But, according to a principle expressed on page 225th, “*A* is to be used whenever the following word begins with a consonant sound.” Therefore, *an* should here be changed to *a*; thus, “Honour is *a* useful distinction in life.”]

“No writer, therefore, ought to foment an humour of innovation.”—*Jamieson’s Rhet.*, p. 55. “Conjunctions require a situation between the things of which they form an union.”—*Ib.*, p. 83. “Nothing is more easy than to mistake an *u* for an *a*.”—*Tooke’s Diversions*, i, 130. “From making so ill an use of our innocent expressions.”—*Wm. Penn.* “To grant thee an heavenly and incorruptible crown of glory.”—*Sewel’s Hist.*, Ded., p. iv. “It in no wise follows, that such an one was able to predict.”—*Ib.*, p. viii. “With an harmless patience they have borne most heavy oppressions,”—*Ib.*, p. x. “My attendance was to make me an happier man.”—*Spect.*, No. 480. “On the wonderful nature of an human mind.”—*Ib.*, 554. “I have got an hussy of a maid, who is most craftily given to this.”—*Ib.*, No. 534. “Argus is said to have had an hundred eyes, some of which were always awake.”—*Classic Stories*, p. 148. “Centiped, an hundred feet; centennial, consisting of a hundred years.”—*Town’s Analysis*, p. 19. “No good man, he thought, could be an heretic.”—*Gilpin’s Lives*, p. 72. “As, a Christian, an infidel, an heathen.”—*Ash’s Gram.*, p. 50. “Of two or more words, usually joined by an hyphen.”—*Blair’s Gram.*, p. 7. “We may consider the whole space of an hundred years as time present.”—BEATTIE: *Murray’s Gram.*, p. 69. “In guarding against such an use of meats and drinks.”—*Ash’s Gram.*, p. 138. “Worship is an homage due from man to his Creator.”—*Annual Monitor* for 1836. “Then, an eulogium on the deceased was pronounced.”—*Grimshaw’s U. S.*, p. 92. “But for Adam there was not found an help meet for him.”—*Gen.*, ii, 20. “My days are consumed like smoke, and my bones are burned as an hearth.”—*Psalms*, cii, 3. “A foreigner and an hired servant shall not eat thereof”—*Exod.*, xii, 45. “The hill of God is as the hill of Bashan; an high hill, as the hill of Bashan.”—*Psalms*, lxviii, 15. “But I do declare it to have been an holy offering, and such an one too as was to be once for all.”—*Wm. Penn.* “An hope that does not make ashamed those that have it.”—*Barclay’s Works*, Vol. i, p. 15. “Where there is not an unity, we may exercise true charity.”—*Ib.*, i, 96. “Tell me, if in any of these such an union can be found?”—*Brown’s Estimate*, ii, 16.

“Such holy drops her tresses steeped,  
Though ‘twas an hero’s eye that weeped.”—*Sir W. Scott.*

**LESSON II.—INSERT ARTICLES.**

“This veil of flesh parts the visible and invisible world.”—*Sherlock.*

[FORMULE.—Not proper, because the article *the* is omitted before *invisible*, where the sense requires it. But, according to a suggestion on page 225th, “Articles should be inserted as often as the sense requires them.” Therefore, *the* should be here supplied; thus, “This veil of flesh parts the visible and *the* invisible world.”]

“The copulative and disjunctive conjunctions operate differently on the verb.”—*Murray’s Gram.*, Vol. ii, p. 286. “Every combination of a preposition and article with the noun.”—*Ib.*, i, 44. “*Either* signifies, ‘the one or the other;’ *neither* imports *not either*, that is,

‘not one nor the other.’—*Ib.*, i, 56. “A noun of multitude may have a pronoun, or verb, agreeing with it, either of the singular or plural number.”—*Bucke’s Gram.*, p. 90. “Copulative conjunctions are, principally, and, as, both, because, for, if, that, then, since, &c.”—See *ib.*, 28. “The two real genders are the masculine and feminine.”—*Ib.*, 34. “In which a mute and liquid are represented by the same character, *th*.”—*Music of Nature*, p. 481. “They said, John Baptist hath sent us unto thee.”—*Luke*, vii, 20. “They indeed remember the names of abundance of places.”—*Spect.*, No. 474. “Which created a great dispute between the young and old men.”—*Goldsmith’s Greece*, Vol. ii, p. 127. “Then shall be read the Apostles’ or Nicene Creed.”—*Com. Prayer*, p. 119. “The rules concerning the perfect tenses and supines of verbs are Lily’s.”—*King Henry’s Gram.*, p. iv. “It was read by the high and the low, the learned and illiterate.”—*Johnson’s Life of Swift*. “Most commonly, both the pronoun and verb are understood.”—*Buchanan’s Gram.*, p. viii. “To signify the thick and slender enunciation of tone.”—*Knight, on the Greek Alph.*, p. 9. “The difference between a palatial and guttural aspirate is very small.”—*Ib.*, p. 12. “Leaving it to waver between the figurative and literal sense.”—*Jamieson’s Rhet.*, p. 154. “Whatever verb will not admit of both an active and passive signification.”—*Alex. Murray’s Gram.*, p. 31. “*The* is often set before adverbs in the comparative or superlative degree.”—*Ib.*, p. 15; *Kirkham’s Gram.*, 66. “Lest any should fear the effect of such a change upon the present or succeeding age of writers.”—*Fowle’s Common School Gram.*, p. 5. “In all these measures, the accents are to be placed on even syllables; and every line is, in general, more melodious, as this rule is more strictly observed.”—*L. Murray’s Octavo Gram*, p. 256; *Jamieson’s Rhet.*, 307. “How many numbers do nouns appear to have? Two, the singular and plural.”—*Smith’s New Gram.*, p. 8. “How many persons? Three persons—the first, second, and third.”—*Ib.*, p. 10. “How many cases? Three—the nominative, possessive and objective.”—*Ib.*, p. 12.

“Ah! what avails it me, the flocks to keep,  
Who lost my heart while I preserv’d sheep.”

POPE’S WORKS: *British Poets*, Vol. vi, p. 309: Lond., 1800.

### LESSON III.—OMIT ARTICLES.

“The negroes are all the descendants of Africans.”—*Morse’s Geog.*

[FORMULE.—Not proper, because the article *the* before *descendants*, is useless to the construction, and injurious to the sense. But, according to a principle on page 225th, “Needless articles should be omitted; they seldom fail to pervert the sense.” Therefore, *the* should be here omitted; thus, “The negroes are all *descendants* of Africans.”]

“A Sybarite was applied as a term of reproach to a man of dissolute manners.”—*Morse’s Ancient Geog.*, p. 4. “The original signification of knave was a boy.”—*Webster’s El. Spell.*, p. 136. “The meaning of these will be explained, for the greater clearness and precision.”—*Bucke’s Gram.*, p. 58. “What Sort of a Noun is Man? A Noun Substantive common.”—*Buchanan’s Gram.*, p. 166. “Is *what* ever used as three kinds of a pronoun?”—*Kirkham’s Gram.*, p. 117. “They delighted in the having done it, as well as in the doing of it.”—*Johnson’s Gram. Com.*, p. 344. “Both the parts of this rule are exemplified in the following sentences.”—*Murray’s Gram.*, p. 174. “He has taught them to hope for another and a better world.”—*S. L. Knapp*. “It was itself only preparatory to a future, a better, and perfect revelation.”—*Keith’s Evid.*, p. 23. “*Es* then makes another and a distinct syllable.”—*Brightland’s Gram.*, p. 17. “The eternal clamours of a selfish and a factious people.”—*Brown’s Estimate*, i, 74. “To those whose taste in Elocution is but a little

cultivated.”—*Kirkham’s Eloc.*, p. 65. “They considered they had but a Sort of a Gourd to rejoice in.”—*Bennet’s Memorial*, p. 333. “Now there was but one only such a bough, in a spacious and shady grove.”—*Bacon’s Wisdom*, p. 75. “Now the absurdity of this latter supposition will go a great way towards the making a man easy.”—*Collier’s Antoninus* p. 131. “This is true of the mathematics, where the taste has but little to do.”—*Todd’s Student’s Manual*, p. 331. “To stand prompter to a pausing, yet a ready comprehension.”—*Rush, on the Voice*, p. 251. “Such an obedience as the yoked and the tortured negro is compelled to yield to the whip of the overseer.”—*Chalmers’s Serm.*, p. 90. “For the gratification of a momentary and an unholy desire.”—*Wayland’s Mor. Sci.*, p. 288. “The body is slenderly put together; the mind a rambling sort of a thing.”—*Collier’s Antoninus*, p. 26. “The only nominative to the verb, is, *the officer*.”—*Murray’s Gram.*, ii, 22. “And though in the general it ought to be admitted, &c.”—*Blair’s Rhet.*, p. 376. “Philosophical writing admits of a polished, a neat, and elegant style.”—*Ib.*, p. 367. “But notwithstanding this defect, Thomson is a strong and a beautiful describer.”—*Ib.*, p. 405. “So should he be sure to be ransomed, and a many poor men’s lives saved.”—SHAK.: *Hen.* v.

“Who felt the wrong, or fear’d it, took the alarm,  
Appeal’d to Law, and Justice lent her arm.”—*Pope*, p. 406.

#### LESSON IV.—CHANGE ARTICLES.

“To enable us to avoid the too frequent repetition of the same word.”—*Bucke’s Gr.*, p. 52.

[FORMULE.—Not proper, because the article *the* is used to limit the meaning of “repetition,” or “too frequent repetition,” where *a* would better suit the sense. But, according to a principle on page 225th, “The articles can seldom be put one for the other, without gross impropriety; and either is of course to be preferred to the other, as it better suits the sense.” Therefore, “*the*” should be *a*, which, in this instance, ought to be placed after the adjective; thus, “To enable us to avoid *too frequent a repetition* of the same word.”]

“The former is commonly acquired in the third part of the time.”—*Burn’s Gram.*, p. xi. “Sometimes the adjective becomes a substantive, and has another adjective joined to it: as, ‘The chief good.’”—*L. Murray’s Gram.*, i, 169. “An articulate sound is the sound of the human voice, formed by the organs of speech.”—*Ib.*, i, 2; *Lowth’s Gram.*, 2; *T. Smith’s*, 5. “Tense is the distinction of time: there are six tenses.”—*Maunder’s Gram.*, p. 6. “In this case, the ellipsis of the last article would be improper.”—*L. Murray’s Gram.*, i, p. 218. “Contrast has always the effect to make each of the contrasted objects appear in the stronger light.”—*Ib.*, i, 349; *Blair’s Rhet.*, p. 167. “These remarks may serve to shew the great importance of the proper use of the article.”—*Lowth’s Gram.*, p. 12; *Murray’s*, i, 171. “‘Archbishop Tillotson,’ says an author of the History of England, ‘died in this year.’”—*Blair’s Rhet.*, p. 107. “Pronouns are used instead of substantives, to prevent the too frequent repetition of them.”—*Alex. Murray’s Gram.*, p. 22. “*That*, as a relative, seems to be introduced to save the too frequent repetition of *who* and *which*.”—*Ib.*, p. 23. “A pronoun is a word used instead of a noun to avoid the too frequent repetition of the same word.”—*L. Murray’s Gram.*, i, p. 28. “*That* is often used as a relative, to prevent the too frequent repetition of *who* and *which*.”—*Kirkham’s Gram.*, p. 109; *L. Murray’s*, i, 53; *Hiley’s*, 84. “His knees smote one against an other.”—*Logan’s Sermons*. “They stand now on one foot, then on another.”—*Walker’s Particles*, p. 259. “The Lord watch between me and thee, when we are absent one from another.”—*Gen.*, xxxi, 49. “Some have enumerated ten

[parts of speech], making a participle a distinct part.”—*L. Murray’s Gram*, i, p. 29. “Nemesis rides upon an Hart, because a Hart is a most lively Creature.”—*Bacon’s Wisdom*, p. 50. “The transition of the voice from one vowel of the diphthong to another.”—*Wilson’s Essay on Gram.*, p. 29. “So difficult it is to separate these two things from one another.”—*Blair’s Rhet.*, p. 92. “Without the material breach of any rule.”—*Ib.*, p. 101. “The great source of a loose style, in opposition to precision, is the injudicious use of those words termed synonymous.”—*Ib.*, p. 97. “The great source of a loose style, in opposition to precision, is the injudicious use of the words termed *synonymous*.”—*Murray’s Gram.*, i, p. 302. “Sometimes one article is improperly used for another.”—*Sanborn’s Gram.*, p. 197.

“Satire of sense, alas! can Sporus feel?

Who breaks a butterfly upon a wheel?”—*Pope*, p. 396.

#### LESSON V.—MIXED EXAMPLES.

“He hath no delight in the strength of an horse.”—*Maturin’s Sermons*, p. 311. “The head of it would be an universal monarch.”—*Butler’s Analogy*, p. 98. “Here they confound the material and formal object of faith.”—*Barclay’s Works*, Vol. iii, p. 57. “The Irish and Scottish Celtic are one language; the Welsh, Cornish, and Armorican, are another.”—*Dr. Murray’s Hist.*, Vol. ii, p. 316. “In an uniform and perspicuous manner.”—*Ib.*, i, 49. “SCRIPTURE, *n*. Appropriately, and by way of distinction, the books of the Old and New Testament; the Bible.”—*Webster’s Dict.* “In two separate volumes, entitled the Old and the New Testaments.”—*Wayland’s Mor. Sci.*, p. 139. “The Scriptures of the Old and New Testament contain a revelation.”—*Ib.* “Q has ever an u after it; which is not sounded in words derived from the French.”—*Wilson’s Essay*, p. 32. “What should we say of such an one? That he is regenerate? No.”—*Hopkins’s Prim. Ch.*, p. 22. “Some grammarians subdivide vowels into the simple and the compound.”—*Murray’s Gram.*, i, p. 8. “Emphasis has been further distinguished into the weaker and stronger emphasis.”—*Ib.*, i, 244. “Emphasis has also been divided into superior and the inferior emphasis.”—*Ib.*, i, 245, “Pronouns must agree with their antecedents, or nouns which they represent, in gender, number, and person.”—*Merchant’s Gram.*, pp. 86, 111, and 130. “The adverb *where*, is often improperly used, for the relative pronoun and preposition.”—*Ib.*, 94. “The termination *ish* imports diminution, or lessening the quality.”—*Ib.*, 79. “In this train all their verses proceed: the one half of the line always answering to the other.”—*Blair’s Rhet.*, p. 384. “To an height of prosperity and glory, unknown to any former age.”—*Murray’s Sequel*, p. 352. “HWILC, who, which, such as, such an one, is declined as follows.”—*Gwilt’s Saxon Gram.*, p. 15. “When a vowel precedes *y*, an *s* only is required to form a plural.”—*Bucke’s Gram.*, p. 40. “He is asked what sort of a word each is, whether a primitive, derivative, or compound.”—*British Gram.*, p. vii. “It is obvious, that neither the 2d, 3d, nor 4th chapter of Matthew is the first; consequently, there are not *four first* chapters.”—*Churchill’s Gram.*, p. 306. “Some thought, which a writer wants art to introduce in its proper place.”—*Blair’s Rhet.*, p. 109. “Groves and meadows are most pleasing in the spring.”—*Ib.*, p. 207. “The conflict between the carnal and spiritual mind, is often long.”—*Gurney’s Port. Ev.*, p. 146. “A Philosophical Inquiry into the Origin of our Ideas of the Sublime and Beautiful.”—*Burke’s Title-page*.

“Silence, my muse! make not these jewels cheap,

Exposing to the world too large an heap.”—*Waller*, p. 113.

**CHAPTER III.—NOUNS.**

A Noun is the name of any person, place, or thing, that can be known or mentioned: as, *George, York, man, apple, truth.*

**OBSERVATIONS.**

OBS. 1.—All words and signs taken *technically*, (that is, independently of their meaning, and merely as things spoken of,) are *nouns*; or, rather, are *things* read and construed *as nouns*; because, in such a use, they temporarily assume the *syntax* of nouns: as, “For this reason, I prefer *contemporary* to *cotemporary*.”—*Campbell’s Rhet.*, p. 175; *Murray’s Gram.*, i, p. 368. “I and J were formerly expressed by the same character; as were U and V.”—*W. Allen’s Gram.*, p. 3. “*Us* is a personal pronoun.”—*Murray*. “*Th* has two sounds.”—*Ib.* “The ‘*s* cannot be a contraction of *his*, because ‘*s* is put to *female* [feminine] nouns; as, *Woman’s beauty, the Virgin’s delicacy.*”—*Dr. Johnson’s Gram.* “*Their* and *theirs* are the possessives likewise of *they*, when *they* is the plural of *it*.”—*Ib.* “Let B be a *now* or instant.”—*Harris’s Hermes*, p. 103. “In such case, I say that the instant B is the end of the time A B.”—*Ib.*, 103. “*A* is sometimes a noun: as, a great *A.*”—*Todd’s Johnson*. “Formerly *sp* was cast in a piece, as *st’s* are now.”—*Hist. of Printing*, 1770. “I write to others than he will perhaps include in his *we*.”—*Barclay’s Works*, Vol. iii, p. 455. “Here are no fewer than eight *ands* in one sentence.”—*Blair’s Rhet.*, p. 112; *Murray’s Gram.*, Vol. i, p. 319. “Within this wooden *O*,” i. e., circle.—*Shak.*

OBS. 2.—In parsing, the learner must observe the sense and use of each word, and class it accordingly. Many words commonly belonging to other parts of speech are occasionally used as nouns; and, since it is the manner of its use, that determines any word to be of one part of speech rather than of an other, whatever word is used directly as a noun, must of course be parsed as such.

1. Adjectives made nouns: “The *Ancient* of days did sit.”—*Bible*. “Of the *ancients*.”—*Swift*. “For such *impertinents*.”—*Steele*. “He is an *ignorant* in it.”—*Id.* “In the luxuriance of an unbounded *picturesque*.”—*Jamieson*. “A source of *the sublime*,” i. e., of sublimity.—*Burke*. “The vast *immense* of space:” i. e., immensity.—*Murray*. “There is none his *like*.”—*Job*, xli, 33. “A *little* more than a *little*, is by *much* too *much*.”—*Shakspeare*. “And gladly make *much* of that entertainment.”—*Sidney*. “A covetous man makes *the most* of what he has.”—*L’Estrange*. “It has done *enough* for me.”—*Pope*. “He had *enough* to do.”—*Bacon*.

“*All* withers here; who *most* possess, are losers by their gain,  
Stung by full proof, that bad at best, life’s idle *all* is vain.”—*Young*.

“Nor grudge I thee *the much* the Grecians give,  
Nor murm’ring take *the little* I receive.”—*Dryden*.

2. Pronouns made nouns: “A love of seeing the *what* and *how* of all about him.”—STORY’S LIFE OF FLAXMAN: *Pioneer*, Vol. i, p. 133. “The nameless HE, whose nod is Nature’s birth.”—*Young, Night* iv. “I was wont to load my *she* with knacks.”—*Shak. Winter’s Tale*. “Or any *he*, the proudest of thy sort.”—*Shak.* “I am the happiest *she* in Kent.”—*Steele*. “The *shes* of Italy.”—*Shak.* “The *hes* in birds.”—*Bacon*. “We should soon have as many *hes* and *shes* as the French.”—*Cobbet’s E. Gram.*, Para. 42. “If, for instance, we call a nation a *she*, or the sun a *he*.”—*Ib.*, Para. 198. “When I see many *its* in a

page, I always tremble for the writer.”—*Ib.*, Para. 196. “Let those two questionary petitioners try to do this with their *whos* and their *whiches*.”—SPECT: *Ash’s Gr.*, p. 131.

“Such mortal drugs I have; but Mantua’s law  
Is death to any *he* that utters them.”—*Shak.*

3. Verbs made nouns: “Avaunt all attitude, and *stare*, and *start* theatric.”—*Couper*. “A *may-be* of mercy is sufficient.”—*Bridge*. “Which *cuts* are reckoned among the fractures.”—*Wiseman*. “The officer erred in granting a *permit*.”—“Feel darts and charms, *attracts* and flames.”—*Hudibras*. “You may know by the falling off of the *come*, or sprout.”—*Mortimer*. “And thou hast talk’d of *sallies* and *retires*.”—*Shak.*

“For all that else did come, were sure to fail;  
Yet would he further none, but for *avail*.”—*Spenser*.

4. Participles made nouns: “For the *producing* of real happiness.”—*Crabb*. “For the *crying* of the poor and the *sighing* of the needy, I will arise.”—*Bible*. “Surely the *churning* of milk bringeth forth butter, and the *wringing* of the nose bringeth forth blood; so the *forcing* of wrath bringeth forth strife.”—*Prov.*, xxx, 33. “*Reading*, *writing*, and *ciphering*, are indispensable to civilized man.”—“Hence was invented the distinction between *doing* and *permitting*.”—*Calvin’s Inst.*, p. 131. “Knowledge of the *past* comes next.”—*Hermes*, p. 113. “I am my *beloved’s*, and his desire is toward me.”—*Sol. Song*, vii, 10. “Here’s—a simple *coming-in* for one man.”—*Shak.*

“What are thy rents? What are thy *comings-in*?  
O Ceremony, show me but thy worth.”—*Id.*

5. Adverbs made nouns: “In these cases we examine the *why*, the *what*, and the *how* of things.”—*L’Estrange*. “If a point or *now* were extended, each of them would contain within itself infinite other points or *nows*.”—*Hermes*, p. 101. “The *why* is plain as way to parish church.”—*Shak.* “Tis Heaven itself that points out *an hereafter*.”—*Addison*. “The dread of *a hereafter*.”—*Fuller*. “The murmur of the deep *amen*.”—*Sir W. Scott*. “For their *whereabouts* lieth in a mystery.”—*Book of Thoughts*, p. 14. Better: “Their *whereabout* lieth,” or, “Their *whereabouts lie*,” &c.

“Bid them farewell, Cordelia, though unkind;  
Thou lovest *here*, a better *where* to find.”—*Shak.*

6. Conjunctions made nouns: “The *if*, which is here employed, converts the sentence into a supposition.”—*Blair’s Rhet.* “Your *if* is the only peacemaker; much virtue is in *if*.”—*Shak.*

“So his Lordship decreed with a grave solemn tone,  
Decisive and clear, without one *if* or *but*—  
That whenever the Nose put his spectacles on,  
By daylight or candlelight—Eyes should be shut.”—*Couper*.

7. Prepositions made nouns: “O, not like me; for mine’s beyond *beyond*.”—*Shakspeare: Cymb.*, iii, 2. “I. e., her longing is *further than beyond*; beyond any thing that desire can be said to be beyond.”—*Singer’s Notes*. “You whirled them to the back of *beyont* to look at the auld Roman camp.”—*Antiquary*, i. 37.
8. Interjections or phrases made nouns: “Come away from all the *lo-heres*! and *lo-theres*!”—*Sermon*. “Will cuts him short with a ‘*What then?*’”—*Addison*. “With *hark* and *whoop*, and wild *halloo*.”—*Scott*. “And made a *pish* at chance and sufferance.”—*Shak.*

“A single look more marks th’ internal wo,  
Than all the windings of the lengthen’d *oh*.”—*Lloyd*.

### CLASSES.

Nouns are divided into two general classes; *proper* and *common*.

I. A *proper noun* is the name of some particular individual, or people, or group; as, *Adam*, *Boston*, the *Hudson*, the *Romans*, the *Azores*, the *Alps*.

II. A *common noun* is the name of a sort, kind, or class, of beings or things; as, *Beast*, *bird*, *fish*, *insect*,—*creatures*, *persons*, *children*.

The particular classes, *collective*, *abstract*, and *verbal*, or *participial*, are usually included among common nouns. The name of a thing *sui generis* is also called common.

1. A *collective noun*, or *noun of multitude*, is the name of many individuals together; as, *Council*, *meeting*, *committee*, *flock*.
2. An *abstract noun* is the name of some particular quality considered apart from its substance; as, *Goodness*, *hardness*, *pride*, *frailty*.
3. A *verbal* or *participial noun* is the name of some action, or state of being; and is formed from a verb, like a participle, but employed as a noun: as, “The *triumphing* of the wicked is short.”—*Job*, xx, 5.
4. A thing *sui generis*, (i. e., *of its own peculiar kind*,) is something which is distinguished, not as an individual of a species, but as a sort by itself, without plurality in either the noun or the sort of thing; as, *Galvanism*, *music*, *geometry*.

OBS. 1.—Through the influence of an article, a proper name sometimes acquires the import of a common noun: as, “He is *the Cicero* of his age;” that is, *the great orator*. “Many *a fiery Alp*,” that is, *high volcanic mountain*. “Such is the following application of famous names; a Solomon for a wise man, a Croesus for a rich man, a Judas for a traitor, a Demosthenes for an orator, and a Homer for a poet.”—*Campbell’s Rhet.*, p. 326.

“Consideration, like an angel, came,  
And whipp’d *th’ offending Adam* out of him.”—*Shak*.

OBS. 2.—A common noun, with the definite article before it, sometimes becomes proper: as, *The Park*; *the Strand*; *the Gharmel*; *the Downs*; *the United States*.

OBS. 3.—The common name of a thing or quality personified, often becomes proper; our conception of the object being changed by the figure of speech: as, “My power,” said *Reason*, “is to advise, not to compel.”—*Johnson*. “Fair *Peace* her olive branch extends.” For such a word, the form of parsing should be like this: “*Peace* is a *common noun*, *personified proper*, of the third person, singular number, *feminine gender*, and nominative case.” Here the construction of the word as a *proper noun*, and of the *feminine gender*, is the result of the personification, and contrary to the literal usage.

### MODIFICATIONS.

Nouns have modifications of four kinds; namely, *Persons*, *Numbers*, *Genders*, and *Cases*.

## PERSONS.

Persons, in grammar, are modifications that distinguish the speaker, the hearer, and the person or thing merely spoken of.

There are three persons; the *first*, the *second*, and the *third*.

The *first person* is that which denotes the speaker or writer; as, "*I Paul* have written it."

The *second person* is that which denotes the hearer, or the person addressed; as, "*Robert*, who did this?"

The *third person* is that which denotes the person or thing merely spoken of; as, "*James* loves his *book*."

## OBSERVATIONS.

OBS. 1.—The distinction of persons is founded on the different relations which the objects mentioned in any discourse may bear to the discourse itself. The speaker or writer, being the mover and maker of the communication, of course stands in the nearest or *first* of these relations. The hearer or hearers, being personally present and directly addressed, evidently sustain the next or *second* of these relations; this relation is also that of the reader, when he peruses what is addressed to himself in print or writing. Lastly, whatsoever or whosoever is merely mentioned in the discourse, bears to it that more remote relation which constitutes the *third* person. The distinction of persons belongs to nouns, pronouns, and finite verbs; and to these it is always applied, either by peculiarity of form or construction, or by inference from the principles of concord. Pronouns are like their antecedents, and verbs are like their subjects, in person.

OBS. 2.—Of the persons, numbers, genders, cases, and some other grammatical modifications of words, it should be observed that they belong not exclusively to any one part of speech, but jointly and equally, to two or three. Hence, it is necessary that our *definitions* of these things be such as will apply to each of them in full, or under all circumstances; for the definitions ought to be as general in their application as are the things or properties defined. Any person, number, gender, case, or other grammatical modification, is really but one and the same thing, in whatever part of speech it may be found. This is plainly implied in the very nature of every form of syntactical agreement; and as plainly contradicted in one half, and probably more, of the definitions usually given of these things.

OBS. 3.—Let it be understood, that *persons, in grammar*, are not *words*, but mere forms, relations, or modifications of words; that they are things, thus named by a *figure; things* of the neuter gender, and not living souls. But persons, in common parlance, or in ordinary life, are *intelligent beings*, of one or the other sex. These objects, different as they are in their nature, are continually confounded by the makers of English grammars: as, "The *first* person is *the person who speaks*."—*Comly's Gram.*, p. 17. So Bicknell, of London: "The *first person* speaks of *himself*; as, *I John take thee Elizabeth*. The *second* person has the speech directed to *him*, and is supposed to be present; as, *Thou Harry art a wicked fellow*. The *third* person is spoken of, or described, and supposed to be *absent*; as, *That Thomas is a good man*. And in the same manner the plural pronouns are used, when more than one are spoken of."—*Bicknell's Grammatical Wreath*, p. 50. "The person speaking is the first person; the person spoken to, the second; and the person spoken of,

the third.”—*Russell’s Gram.*, p. 16. “The first person is the speaker.”—*Parker & Fox’s Gram.*, Part i, p. 6. “Person is that, which distinguishes a *noun, that speaks, one spoken to, or one spoken about.*”—*S. B. Hall’s Gram.*, p. 6. “A noun that speaks!” A noun “spoken to!” If ever one of Father Hall’s nouns shall speak for itself, or answer when “spoken to,” will it not reprove him? And how can the *first person* be “the *person* WHO *speaks,*” when every word of this phrase is of the *third* person? Most certainly, *it is not* HE, nor any one of his sort. If any body can boast of being “*the first person in grammar,*” I pray, *Who* is it? Is it not *I*, even *I*? Many grammarians say so. But nay: such authors know not what the first person in grammar is. The Rev. Charles Adams, with infinite absurdity, makes the three persons in grammar to be never any thing but *three nouns*, which hold a confabulation thus: “Person is defined to be *that* which distinguishes a *noun that speaks, one spoken to, or one spoken of.* The *noun* that speaks [,] is the first person; as, *I, James,* was present. The *noun* that is spoken to, is the second person; as, *James,* were you present? The *noun* that is spoken of is the third person; as, *James* was present.”—*Adams’s System of English Gram.*, p. 9. What can be a greater blunder, than to call the first person of a verb, of a pronoun, or even of a noun, “*the noun that speaks?*” What can be more absurd than are the following assertions? “*Nouns* are *in* the first person when *speaking.* Nouns are *of* the second person when *addressed* or *spoken to.*”—*O. C. Felton’s Gram.*, p. 9.

OBS. 4.—An other error, scarcely less gross than that which has just been noticed, is the very common one of identifying the three grammatical persons with certain *words*, called personal pronouns: as, “*I* is the first person, *thou* the second, *he, she* or *it*, the third.”—*Smith’s Productive Gram.*, p. 53. “*I* is the first person, singular. *Thou* is the second person, singular. *He, she,* or *it*, is the third person, singular. *We* is the first person, plural. *Ye* or *you* is the second person, plural. *They* is the third person, plural.”—*L. Murray’s Grammar*, p. 51; *Ingersoll’s*, 54; *D. Adams’s*, 37; *A. Flint’s*, 18; *Kirkham’s*, 98; *Cooper’s*, 34; *T. H. Miller’s*, 26; *Hull’s*, 21; *Frost’s*, 13; *Wilcox’s*, 18; *Bacon’s*, 19; *Alger’s*, 22; *Maltby’s*, 19; *Perley’s*, 15; *S. Putnam’s*, 22. Now there is no more propriety in affirming, that “*I is the first person,*” than in declaring that *me, we, us, am, ourselves, we think, I write*, or any other word or phrase *of* the first person, *is* the first person. Yet Murray has given us no other definitions or explanations of the persons than the foregoing erroneous assertions; and, if I mistake not, all the rest who are here named, have been content to define them only as he did. Some others, however, have done still worse: as, “There are *three* personal pronouns; so called, because they denote the three persons, *who* are the subjects of a discourse, viz. 1st. *I, who is* the person *speaking;* 2d *thou, who is* spoken to; 3d *he, she,* or *it, who* is spoken of, and their plurals, *we, ye* or *you, they.*”—*Bingham’s Accidence*, 20th Ed., p. 7. Here the two kinds of error which I have just pointed out, are jumbled together. It is impossible to write *worse English* than this! Nor is the following much better: “Of the personal pronouns there are five, viz. *I*, in the first person, speaking; *Thou*, in the second person, spoken to; and *He, she, it*, in the third person, spoken of.”—*Nutting’s Gram.*, p. 25.

OBS. 5.—In *written* language, the *first person* denotes the writer or author; and the *second*, the reader or person addressed: except when the writer describes not himself, but some one else, as uttering to an other the words which he records. This exception takes place more particularly in the writing of dialogues and dramas; in which the first and second persons are abundantly used, not as the representatives of the author and his reader, but as denoting the fictitious speakers and hearers that figure in each scene. But, in discourse, the grammatical persons may be changed without a change of the living subject. In the following sentence, the three grammatical persons are all of them used with reference to one and the same individual: “Say ye of *Him whom* the Father hath

sanctified and sent into the world, *Thou blasphemest*, because *I said I am the Son of God?*—*John*, x, 36.

OBS. 6.—The speaker seldom refers to himself *by name*, as the speaker; and, of the objects which there is occasion to name in discourse, but comparatively few are such as can ever be supposed to speak. Consequently, *nouns* are rarely used in the first person; and when they do assume this relation, a pronoun is commonly associated with them: as, “*I John*,”—“*We Britons*.” These words I conceive to agree throughout, in person, number, gender, and case; though it must be confessed, that agreement like this is not always required between words in apposition. But some grammarians deny the first person to nouns altogether; others, with much more consistency, ascribe it;\* while very many are entirely silent on the subject. Yet it is plain that both the doctrine of concords, and the analogy of general grammar, require its admission. The reason of this may be seen in the following examples: “*Themistocles ad te veni*.” “I Themistocles have come to you.”—*Grant’s Latin Gram.*, p. 72. “*Adsum Troius Æneas*.”—*Virgil*. “*Romulus Rex regia arma offero*.”—*Livy*. “*Annibal peto pacem*.”—*Id.* “*Callopius recensui*.”—See *Terence’s Comedies, at the end*. “*Paul*, an apostle, &c., unto Timothy, *my* own son in the faith.”—1 *Tim.*, i, 2. Again, if the word *God* is of the second person, in the text, “*Thou, God*, seest me,” why should any one deny that *Paul* is of the first person, in this one? “*I Paul* have written it.”—*Philemon*, 19. Or this? “The salutation by the hand of *me Paul*.”—*Col.*, iv, 18. And so of the plural: “Of *you builders*.”—*Acts*, iv, 11. “Of *us the apostles*.”—2 *Pet.*, iii, 2. How can it be pretended, that, in the phrase, “*I Paul*,” *I* is of the first person, as denoting the speaker, and *Paul*, of some other person, as denoting something or somebody that is *not* the speaker? Let the admirers of Murray, Kirkham, Ingersoll, R. C. Smith, Comly, Greenleaf, Parkhurst, or of any others who teach this absurdity, answer.

OBS. 7.—As, in the direct application of what are called Christian names, there is a kind of familiarity, which on many occasions would seem to indicate a lack of proper respect; so in a frequent and familiar use of the second person, as it is the placing of an other in the more intimate relation of the hearer, and one’s self in that of the speaker, there is a sort of assumption which may seem less modest and respectful than to use the third person. In the following example, the patriarch Jacob uses both forms; applying the term *servant* to himself, and to his brother Esau the term *lord*: “Let *my lord*, *I* pray *thee*, pass over before *his servant*: and *I* will lead on softly.”—*Gen.*, xxxiii, 14. For when a speaker or writer does not choose to declare himself in the *first* person, or to address his hearer or reader in the *second*, he speaks of both or either in the *third*. Thus Moses relates what *Moses* did, and Cæsar records the achievements of *Cæsar*. So Judah humbly beseeches Joseph: “Let *thy servant* abide in stead of the lad a bondman to *my lord*.”—

\* “If *I* or *we* is set before a name, it [the name] is of the first person: as, *I, N—N—, declare; we, N—and M—do promise*.”—*Ward’s Gram.*, p. 83. “Nouns which relate to the person or persons *speaking*, are said to be of the *first* person; as, *I, William*, speak to you.”—*Fowle’s Common School Gram.*, Part ii, p. 22. The first person of nouns is admitted by Ainsworth, R. W. Bailey, Barnard, Brightland, J. H. Brown, Bullions, Butler, Cardell, Chandler, S. W. Clark, Cooper, Day, Emmons, Farnum, Felton, Fisk, John Flint, Fowle, Frazee, Gilbert, Goldsburly, R. G. Greene, S. S. Greene, Hall, Hallock, Hamlin, Hart, Hendrick, Hiley, Perley, Picket, Pinneo, Russell, Sanborn, Sanders, Smart, R. C. Smith, Spear, Weld, Wells, Wilcox, and others. It is denied, either expressly or virtually, by Alger, Bacon, Comly, Davis, Dilworth, Greenleaf, Guy, Hazen, Ingersoll, Jaudon, Kirkham, Latham, L. Murray, Maltby, Merchant, Miller, Nutting, Parkhurst, S. Putnam, Rev. T. Smith, and others. Among the grammarians who do not appear to have noticed the persons of nouns at all, are Alden, W. Allen, D. C. Allen, Ash, Bicknell, Bingham, Blair, Buchanan, Bucke, Burn, Burr, Churchill, Coar, Cobb, Dalton, Dearborn, Abel Flint, R. W. Green, Harrison, Johnson, Lennie, Lowth, Mennye, Mulligan, Priestley, Staniford, Ware, Webber, and Webster.

*Gen.*, xliv, 33. And Abraham reverently intercedes with God: “Oh! let not *the Lord* be angry, and I will speak.”—*Gen.*, xviii, 30. And the Psalmist prays: “*God* be merciful unto us, and bless us; and cause *his* face to shine upon us.”—*Ps.*, lxvii, 1. So, on more common occasions:—

“As will the rest, so *willeth Winchester*.”—*Shak*.

“Richard of York, how *fares* our dearest *brother*?”—*Id.*\*

OBS. 8.—When inanimate things are spoken to, they are *personified*; and their names are put in the second person, because by the figure the objects are *supposed* to be capable of hearing: as, “What ailed thee, *O thou sea*, that thou fleddest? *thou Jordan*, that thou wast driven back? *Ye mountains*, that ye skipped like rams; and *ye little hills*, like lambs? Tremble, *thou earth*, at the presence of the Lord, at the presence of the God of Jacob.”—*Psalms*, cxiv, 5-7.

## NUMBERS.

Numbers, in grammar, are modifications that distinguish unity and plurality.

There are two numbers; the *singular* and the *plural*.

The *singular number* is that which denotes but one; as, “The *boy learns*.”

The *plural number* is that which denotes more than one; as, “The *boys learn*.”

The plural number *of nouns* is regularly formed by adding *s* or *es* to the singular: as, *book*, *books*; *box*, *boxes*; *sofa*, *sofas*; *hero*, *heroes*.

When the singular ends in a sound which will unite with that of *s*, the plural is generally formed by adding *s only*, and the number of syllables is not increased: as, *pen*, *pens*; *grape*, *grapes*.

But when the sound of *s* cannot be united with that of the primitive word, the regular plural adds *s* to final *e*, and *es* to other terminations, and forms a separate syllable: as, *page*, *pages*; *fox*, *foxes*.

## OBSERVATIONS.

OBS. 1.—The distinction of numbers serves merely to show whether we speak of one object, or of more. In some languages, as the Greek and the Arabic, there is a *dual* number, which denotes *two*, or a *pair*; but in ours, this property of words, or class of modifications, extends no farther than to distinguish unity from plurality, and plurality from unity. It belongs to nouns, pronouns, and finite verbs; and to these it is always applied, either by peculiarity of form, or by inference from the principles of concord. Pronouns are like their antecedents, and verbs are like their subjects, in number.

OBS. 2.—The most common way of forming the plural of English nouns, is that of simply adding to them an *s*; which, when it unites with a sharp consonant, is always

---

\* Prof. S. S. Greene most absurdly and erroneously teaches, that, “When the speaker wishes to represent himself, *he cannot use his name*, but *must* use some other word, as, *I*; [and] when he wishes to represent the hearer, he *must* use *thou* or *you*.”—*Greene’s Elements of E. Gram.*, 1853, p. xxxiv. The examples given above sufficiently show the falsity of all this.

sharp, or hissing; and when it follows a vowel or a flat mute, is generally flat, like *z*: thus, in the words, *ships*, *skiffs*, *pits*, *rocks*, *depths*, *lakes*, *gulfs*, it is sharp; but in *seas*, *lays*, *rivers*, *hills*, *ponds*, *paths*, *rows*, *webs*, *flags*, it is flat. The terminations which always make the regular plural in *es*, with increase of syllables, are twelve; namely, *ce*, *ge*, *ch* soft, *che* soft, *sh*, *ss*, *s*, *se*, *x*, *xe*, *z*, and *ze*: as in *face*, *faces*; *age*, *ages*; *torch*, *torches*; *niche*, *niches*; *dish*, *dishes*; *kiss*, *kisses*; *rebus*, *rebuses*; *lens*, *lenses*; *chaise*, *chaises*; *corpse*, *corpses*; *nurse*, *nurses*; *box*, *boxes*; *axe*, *axes*; *phiz*, *phizzes*; *maze*, *mazes*. All other endings readily unite in sound either with the sharp or with the flat *s*, as they themselves are sharp or flat; and, to avoid an increase of syllables, we allow the final *e* mute to remain mute after that letter is added: thus, we always pronounce as monosyllables the words *babes*, *blades*, *strifes*, *tithes*, *yokes*, *scales*, *names*, *canes*, *ropes*, *shores*, *plates*, *doves*, and the like.

OBS. 3.—Though the irregular plurals of our language appear considerably numerous when brought together, they are in fact very few in comparison with the many thousands that are perfectly simple and regular. In some instances, however, usage is various in writing, though uniform in speech; an unsettlement peculiar to certain words that terminate in vowels: as, *Rabbis*, or *rabbies*; *octavos*, or *octavoës*; *attornies*, or *attorneys*. There are also some other difficulties respecting the plurals of nouns, and especially respecting those of foreign words; of compound terms; of names and titles; and of words redundant or deficient in regard to the numbers. What is most worthy of notice, respecting all these puzzling points of English grammar, is briefly contained in the following observations.

OBS. 4.—It is a general rule of English grammar, that all singular nouns ending with a vowel preceded by an other vowel, shall form the plural by simply assuming an *s*: as, *Plea*, *pleas*; *idea*, *ideas*; *hernia*, *hernias*; *bee*, *bees*; *lie*, *lies*; *foe*, *foes*; *shoe*, *shoes*; *cue*, *cues*; *eye*, *eyes*; *folio*, *folios*; *bamboo*, *bamboos*; *cuckoo*, *cuckoos*; *embryo*, *embryos*; *bureau*, *bureaus*; *purlieu*, *purlieus*; *sou*, *sous*; *view*, *views*; *straw*, *straws*; *play*, *plays*; *key*, *keys*; *medley*, *medleys*; *viceroi*, *viceroys*; *guy*, *guys*. To this rule, the plurals of words ending in *quy*, as *alloquies*, *colloquies*, *obloquies*, *soliloquies*, are commonly made exceptions; because many have conceived that the *u*, in such instances, is a mere appendage to the *q*, or is a consonant having the power of *u*, and not a vowel forming a diphthong with the *y*. All other deviations from the rule, as *monies* for *monies*, *allies* for *alleys*, *vallies* for *valleys*, *chimnies* for *chimneys*, &c., are now usually condemned as errors. See Rule 12th for Spelling.

OBS. 5.—It is also a general principle, that nouns ending in *y* preceded by a consonant, change the *y* into *i*, and add *es* for the plural, without increase of syllables: as, *fly*, *flies*; *ally*, *allies*; *city*, *cities*; *colony*, *colonies*. So nouns in *i*, (so far as we have any that are susceptible of a change of number,) form the plural regularly by assuming *es*: as, *alkali*, *alkalies*; *salmagundi*, *salinagundies*. Common nouns ending in *y* preceded by a consonant, are numerous; and none of them deviate from the foregoing rule of forming the plural: thus, *duty*, *duties*. The termination added is *es*, and the *y* is changed into *i*, according to the general principle expressed in Rule 11th for Spelling. But, to this principle, or rule, some writers have supposed that *proper nouns* were to be accounted exceptions. And accordingly we sometimes find such names made plural by the mere addition of an *s*; as, “How come the *Pythagoras*’, [it should be, *the Pythagorases*,] the *Aristotles*, the *Tullys*, the *Livys*, to appear, even to us at this distance, as stars of the first magnitude in the vast fields of ether?”—*Burgh’s Dignity*, Vol. i, p. 131. This doctrine,

adopted from some of our older grammars, I was myself, at one period, inclined to countenance; (see *Institutes of English Grammar*, p. 33, at the bottom;) but further observation having led me to suspect, there is more *authority* for changing the *y* than for retaining it, I shall by-and-by exhibit some examples of this change, and leave the reader to take his choice of the two forms, or principles.

OBS. 6.—The vowel *a*, at the end of a word, (except in the questionable term *huzza*, or when silent, as in *guinea*,) has always its Italian or middle sound, as heard in the interjection *aha!* a sound which readily unites with that of *s* flat, and which ought, in deliberate speech, to be carefully preserved in plurals from this ending: as, *Canada*, *the Canadas*; *cupola*, *cupolas*; *comma*, *commas*; *anathema*, *anathemas*. To pronounce the final *a* flat, as *Africay* for *Africa*, is a mark of vulgar ignorance.

OBS. 7.—The vowel *e* at the end of a word, is generally silent; and, even when otherwise, it remains single in plurals from this ending; the *es*, whenever the *e* is vocal, being sounded *eez*, or like the word *ease*: as, *apostrophe*, *apostrophes*; *epitome*, *epitomes*; *simile*, *similes*. This class of words being anomalous in respect to pronunciation, some authors have attempted to reform them, by changing the *e* to *y* in the singular, and writing *ies* for the plural: as, *apostrophy*, *apostrophies*; *epitomy*, *epitomies*; *simily*, *similies*. A reformation of some sort seems desirable here, and this has the advantage of being first proposed; but it is not extensively adopted, and perhaps never will be; for the vowel sound in question, is not exactly that of the terminations *y* and *ies*, but one which seems to require *ee*—a stronger sound than that of *y*, though similar to it.

OBS. 8.—For nouns ending in open *o* preceded by a consonant, the regular method of forming the plural seems to be that of adding *es*; as in *bilboes*, *umboes*, *buboes*, *calicoes*, *moriscoes*, *gambadoes*, *barricadoes*, *fumadoes*, *carbonadoes*, *tornadoes*, *bravadoes*, *torpedoes*, *innuendoes*, *viragoes*, *mangoes*, *embargoes*, *cargoes*, *potargoes*, *echoes*, *buffaloes*, *volcanoes*, *heroes*, *negroes*, *potatoes*, *manifestoes*, *mulattoes*, *stilettoes*, *woes*. In words of this class, the *e* appears to be useful as a means of preserving the right sound of the *o*; consequently, such of them as are the most frequently used, have become the most firmly fixed in this orthography. In practice, however, we find many similar nouns very frequently, if not uniformly, written with *s* only; as, *cantos*, *juntos*, *grottos*, *solos*, *quartos*, *octavos*, *duodecimos*, *tyros*. So that even the best scholars seem to have frequently doubted which termination they ought to regard as the *regular* one. The whole class includes more than one hundred words. Some, however, are seldom used in the plural; and others, never. *Wo* and *potato* are sometimes written *woe* and *potatoe*. This may have sprung from a notion, that such as have the *e* in the plural, should have it also in the singular. But this principle has never been carried out; and, being repugnant to derivation, it probably never will be. The only English appellatives that are established in *oe*, are the following fourteen: seven monosyllables, *doe*, *foe*, *roe*, *shoe*, *sloe*, *soe*, *toe*; and seven longer words, *rockdoe*, *aloe*, *felloe*, *canoe*, *misletoe*, *tiptoe*, *diploe*. The last is pronounced *dip'-lo-e* by Worcester; but Webster, Bolles, and some others, give it as a word of two syllables only.\*

---

\* In *shoe* and *shoes*, *canoe* and *canoes*, the *o* is sounded slenderly, like *oo*; but in *doe* or *does*, *foe* or *foes*, and the rest of the fourteen nouns above, whether singular or plural, it retains the full sound of its own name, *O*. Whether the plural of *two* should be "*twoes*" as Churchill writes it, or "*twos*," which is more common, is questionable. According to Dr. Ash and the Spectator, the plural of *who*, taken substantively, is "*whos*."—*Ash's Gram.*, p. 131.

OBS. 9.—Established exceptions ought to be enumerated and treated as exceptions; but it is impossible to remember how to write some scores of words, so nearly alike as *fumadoes* and *grenados*, *stilettoes* and *palmettos*, if they are allowed to differ in termination, as these examples do in Johnson's Dictionary. Nay, for lack of a rule to guide his pen, even Johnson himself could not remember the orthography of the common word *mangoes* well enough to *copy* it twice without inconsistency. This may be seen by his example from King, under the words *mango* and *potargo*. Since, therefore, either termination is preferable to the uncertainty which must attend a division of this class of words between the two; and since *es* has some claim to the preference, as being a better index to the sound; I shall make no exceptions to the principle, that common nouns ending in *o* preceded by a consonant take *es* for the plural. Murray says, "*Nouns which end in o have sometimes es added, to form the plural; as, cargo, echo, hero, negro, manifesto, potato, volcano, wo: and sometimes only s; as, folio, nuncio, punctilio, seraglio.*"—*Octavo Gram.*, p. 40. This amounts to nothing, unless it is to be inferred from his *examples*, that others like them in form are to take *s* or *es* accordingly; and this is what I teach, though it cannot be said that Murray maintains the principle.

OBS. 10.—Proper names of *individuals*, strictly used as such, have no plural. But when several persons of the same name are spoken of, the noun becomes in some degree common, and admits of the plural form and an article; as, "*The Stuarts, the Cæsars.*"—*W. Allen's Gram.*, p. 41. These, however, may still be called *proper nouns*, in parsing; because they are only inflections, peculiarly applied, of certain names which are indisputably such. So likewise when such nouns are used to denote character: as, "*Solomons*, for wise men; *Neros*, for tyrants."—*Ib.* "Here we see it becomes a doubt which of the two *Herculeses*, was the monster-queller."—*Notes to Pope's Dunciad*, iv, 492. The proper names of *nations*, *tribes*, and *societies*, are generally plural; and, except in a direct address, they are usually construed with the definite article: as, "*The Greeks, the Athenians, the Jews, the Jesuits.*" But such words may take the singular form with the indefinite article, as often as we have occasion to speak of an individual of such a people; as, "*A Greek, an Athenian, a Jew, a Jesuit.*" These, too, may be called *proper nouns*; because they are national, patrial, or tribal names, each referring to some place or people, and are not appellatives, which refer to actual sorts or kinds, not considered local.

OBS. 11.—Proper names, when they form the plural, for the most part form it regularly, by assuming *s* or *es* according to the termination: as, *Carolina*, the *Carolinas*; *James*, the *Jameses*. And those which are only or chiefly plural, have, or ought to have, such terminations as are proper to distinguish them as plurals, so that the form for the singular may be inferred: as, "The *Tungooses* occupy nearly a third of Siberia."—*Balbi's Geog.*, p. 379. Here the singular must certainly be *a Tungoose*. "The principal tribes are the *Pawnees*, the *Arrapahoes*, and the *Cumanches*, who roam through the regions of the Platte, the Arkansaw, and the Norte."—*Ib.*, p. 179. Here the singulars may be supposed to be a *Pawnee*, an *Arrapaho*, and a *Cumanche*. "The Southern or Floridian family comprised the *Cherokees*, *Creeks*, *Chickasaws*, *Choctaws*, *Seminoles*, and *Natchez*."—*Ib.*, p. 179. Here all are regular plurals, except the last; and this probably ought to be *Natchezes*, but Jefferson spells it *Natches*, the singular of which I do not know. Sometimes foreign words or foreign terminations have been improperly preferred to our own; which last are more intelligible, and therefore better: as, *Esquimaux*, to *Esquimaus*; *Knistenaux*, to *Knistenaus*, or *Crees*; *Sioux*, to *Sious*, or *Dahcotahs*; *Iroquois*, to *Iroquoys*, or *Hurons*.

OBS. 12.—Respecting the plural of nouns ending in *i*, *o*, *u*, or *y*, preceded by a consonant, there is in present usage much uncertainty. As any vowel sound may be uttered with an *s*, many writers suppose these letters to require for plurals strictly regular, the *s* only; and to take *es* occasionally, by way of exception. Others, (perhaps with more reason,) assume, that the most usual, regular, and proper endings for the plural, in these instances, are *ies*, *oes*, and *ues*: as, *alkali*, *alkalies*; *halo*, *haloes*; *gnu*, *gnues*; *enemy*, *enemies*. This, I think, is right for common nouns. How far proper names are to be made exceptions, because they are proper names, is an other question. It is certain that some of them are not to be excepted: as, for instance, *Alleghany*, the *Alleghanies*; *Sicily*, the Two *Sicilies*; *Ptolemy*, the *Ptolemies*; *Jehu*, the *Jehues*. So the names of tribes; as, The *Missouries*, the *Otoes*, the *Winnebagoes*. Likewise, the *houries* and the *harpies*; which words, though not strictly proper names, are often written with a capital as such. Like these are *rabbies*, *cadies*, *mufties*, *sophies*, from which some writers omit the *e*. Johnson, Walker, and others, write *gipsy* and *gipsies*; Webster, now writes *Gipsey* and *Gipseys*; Worcester prefers *Gypsy*, and probably *Gypsies*: Webster once wrote the plural *gypsies*; (see his *Essays*, p. 333;) and Johnson cites the following line:—

“I, near yon stile, three sallow *gypsies* met.”—*Gay*.

OBS. 13.—Proper names in *o* are commonly made plural by *s* only. Yet there seems to be the same reason for inserting the *e* in these, as in other nouns of the same ending; namely, to prevent the *o* from acquiring a short sound. “I apprehend,” says Churchill, “it has been from an erroneous notion of proper names being unchangeable, that some, feeling the necessity of obviating this mispronunciation, have put an apostrophe between the *o* and the *s* in the plural, *in stead of an e*; writing *Cato’s*, *Nero’s*; and on a similar principle, *Ajax’s*, *Venus’s*; thus using the possessive case singular for the nominative or objective plural. Harris says very properly, ‘We have our *Marks* and our *Antonies*: *Hermes*, B. 2, Ch. 4; for which those would have given us *Mark’s* and *Antony’s*.”—*New Gram.*, p. 206. Whatever may have been the motive for it, such a use of the apostrophe is a gross impropriety. “In this quotation, [‘From the Socrates’s, the Plato’s, and the Confucius’s of the age,’] the proper names should have been pluralized like common nouns; thus, From the *Socrateses*, the *Platoes*, and the *Confuciuses* of the age.”—*Lennie’s Gram.*, p. 126; *Bullions’s*, 142.

OBS. 14.—The following are some examples of the plurals of proper names, which I submit to the judgement of the reader, in connexion with the foregoing observations: “The Romans had their plurals *Marci* and *Antonii*, as we in later days have our *Marks* and our *Anthonies*.”—*Harris’s Hermes*, p. 40. “There seems to be more reason for such plurals, as the *Ptolemies*, *Scipios*, *Catos*: or, to instance in more modern names, the *Howards*, *Pelhams*, and *Montagues*.”—*Ib.*, 40. “Near the family seat of the *Montgomeries* of Coil’s-field.”—*Burns’s Poems*, Note, p. 7. “Tryphon, a surname of one of the *Ptolemies*.”—*Lempriere’s Dict.* “Sixteen of the *Tuberos*, with their wives and children, lived in a small house.”—*Ib.* “What are the *Jupiters* and *Junos* of the heathens to such a God?”—*Burgh’s Dignity*, i, 234. “Also when we speak of more than one person of the same name; as, the *Henries*, the *Edwards*.”—*Cobbetts E. Gram.*, ¶ 40. “She was descended from the *Percies* and the *Stanleys*.”—*Loves of the Poets*, ii, 102. “Naples, or the *Two Sicilies*.”—*Balbi’s Geog.*, p. 273. The word *India*, commonly makes the plural *Indies*, not *Indias*; and, for *Ajaxes*, the poets write *Ajaces*. But Richard Hiley says, “Proper nouns, when pluralized, follow the same rules as common nouns; as, Venus, the *Venuses*; Ajax, the *Ajaxes*; Cato, the *Catoes*; Henry, the *Henries*.”—*Hiley’s E. Gram.*, p. 18.

“He ev’ry day from King to King can walk,  
Of all our *Harries*, all our Edwards talk.”—*Pope’s Satires*, iv.

OBS. 15.—When a name and a title are to be used together in a plural sense, many persons are puzzled to determine whether the name, or the title, or both, should be in the plural form. For example—in speaking of two young ladies whose family name is Bell—whether to call them the *Miss Bells*, the *Misses Bell*, or the *Misses Bells*. To an inquiry on this point, a learned editor, who prefers the last, lately gave his answer thus: “There are two young ladies; of course they are ‘the Misses.’ Their name is Bell; of course there are two ‘Bells.’ Ergo, the correct phrase, in speaking of them, is—‘the Misses Bells.’”—*N. Y. Com. Adv.* This puts the words in apposition; and there is no question, that it is *formally* correct. But still it is less agreeable to the ear, less frequently heard, and less approved by grammarians, than the first phrase; which, if we may be allowed to assume that the two words may be taken together as a sort of compound, is correct also. Dr. Priestley says, “When a name has a title prefixed to it, as *Doctor*, *Miss*, *Master*, &c., the plural termination affects only the latter of the two words; as, ‘The two *Doctor Nettletons*’—‘The two *Miss Thomsons*’; though a strict analogy would plead for the alteration of the former word, and lead us to say, ‘The two *Doctors Nettleton*’—‘The two *Misses Thomson*.’”—*Priestley’s Gram.*, p. 59. The following quotations show the opinions of some other grammarians: “Two or more nouns in concordance, and forming one complex name, or a name and a title, have the plural termination annexed to the last only; as, ‘The *Miss Smiths*’—‘The three *Doctor Simpsons*’—‘The two *Master Wigginses*.’ With a few exceptions, and those not parallel to the examples just given, we almost uniformly, in complex names, confine the inflection to the last or the latter noun.”—*Dr. Crombie*. The foregoing opinion from Crombie, is quoted and seconded by Maunder, who adds the following examples: “Thus, Dr. Watts: ‘May there not be *Sir Isaac Newtons* in every science?’—‘You must not suppose that the world is made up of *Lady Aurora Granvilles*.’”—*Maunder’s Gram.*, p. 2.

OBS. 16.—These writers do not seem to accord with W. L. Stone, the editor above quoted, nor would his reasoning apply well to several of their examples. Yet both opinions are right, if neither be carried too far. For when the words are in apposition, rather than in composition, the first name or title must be made plural, if it refers to more than one: as, “The *Misses Bell and Brown*,”—“*Messrs. Lambert and Son*,”—“The *Lords Calthorpe and Erskine*,”—“The *Lords Bishops* of Durham and St. David’s,”—“The *Knights Hospitalers*,”—“The *Knights Templars*,”—“The *Knights Baronets*.” But this does not prove the other construction, which varies the last word only, to be irregular; and, if it did, there is abundant authority for it. Nor is that which varies the first only, to be altogether condemned, though Dr. Priestley is unquestionably wrong respecting the “*strict analogy*” of which he speaks. The joining of a plural title to one singular noun, as, “*Misses Roy*,”—“*The Misses Bell*,”—“*The two Misses Thomson*,” produces a phrase which is in itself the *least analogous* of the three; but, “*The Misses Jane and Eliza Bell*,” is a phrase which nobody perhaps will undertake to amend. It appears, then, that each of these forms of expression may be right in some cases; and each of them may be wrong, if improperly substituted for either of the others.

OBS. 17.—The following statements, though erroneous in several particulars, will show the opinions of some other grammarians, upon the foregoing point: “Proper nouns have the plural only when they refer to a race or family; as, *The Campbells*; or to several persons of the same name; as, *The eight Henrys*; *the two Mr. Bells*; *the two Miss Browns*;

or, without the numeral, *the Miss Roys*. But in addressing letters in which both or all are equally concerned, and also when the names are different, we pluralize the *title*, (Mr. or Miss,) and write, *Misses* Brown; *Misses* Roy; *Messrs*, (for Messieurs, Fr.) Guthrie and Tait.”—*Lennie’s Gram.*, p. 7. “If we wish to distinguish the *unmarried* from the *married* Howards, we call them *the Miss Howards*. If we wish to distinguish these Misses from other Misses, we call them the *Misses Howard*.”—*Fowle’s Gram.* “To distinguish several persons of the same name and family from others of a different name and family, the *title*, and not the *proper name*, is varied to express the distinction; as, the *Misses* Story, the *Messrs*. Story. The elliptical meaning is, the Misses and Messrs, *who are named* Story. To distinguish *unmarried* from *married* ladies, *the proper name*, and not the *title*, should be varied; as, the *Miss* Clarks. When we mention more than one person of different names, the title should be expressed before each; as, *Miss* Burns, *Miss* Parker, and *Miss* Hopkinson, were present.”—*Sanborn’s Gram.*, p. 79. In the following examples from Pope’s Works, the last word only is varied: “He paragons himself to two *Lord Chancellors* for law.”—*Vol.* iii, p. 61. “Yearly panegyrics upon the *Lord Mayors*.”—*Ib.*, p. 83.

“Whence hapless Monsieur much complains at Paris  
Of wrongs from Duchesses and *Lady Maries*.”—*Dunciad*, B. ii, L 135.

OBS. 18.—The following eleven nouns in *f*, change the *f* into *v* and assume *es* for the plural: *sheaf, sheaves; leaf, leaves; loaf, loaves; leaf, beeves; thief, thieves; calf, calves; half, halves; elf, elves; shelf, shelves; self, selves; wolf, wolves*. Three others in *fe* are similar: *life, lives; knife, knives; wife, wives*. These are specific exceptions to the general rule for plurals, and not a series of examples coming under a particular rule; for, contrary to the instructions of nearly all our grammarians, there are more than twice as many words of the same endings, which take *s* only: as, *chiefs, kerchiefs, handkerchiefs, mischiefs, beliefs, misbeliefs, reliefs, bassreliefs, briefs, feifs, griefs, clefs, semibrefs, oafs, waifs, coifs, gulfs, hoofs, roofs, proofs, reproofs, woofs, califs, turfs, scarfs, dwarfs, wharfs, fifes, strifes, safes*. The plural of *wharf* is sometimes written *wharves*; but perhaps as frequently, and, if so, more accurately, *wharfs*. Examples and authorities: “*Wharf, wharfs*.”—*Brightland’s Gram.*, p. 80; *Ward’s*, 24; *Goar’s*, 26; *Lennie’s*, 7; *Bucke’s*, 39. “There were not in London so many *wharfs*, or *keys*, for the landing of merchants’ goods.”—CHILD: in *Johnson’s Dict.* “The *wharfs* of Boston are also worthy of notice.”—*Balbi’s Geog.*, p. 37. “Between banks thickly clad with dwelling-houses, manufactories, and *wharfs*.”—*London Morn. Chronicle*, 1833. Nouns in *ff* take *s* only; as, *skiffs, stuffs, gaffs*. But the plural of *staff* has hitherto been generally written *staves*; a puzzling and useless anomaly, both in form and sound: for all the compounds of *staff* are regular; as, *distaffs, whipstuffs, tipstuffs, flagstuffs, quarterstuffs*; and *staves* is the regular plural of *stave*, a word now in very common use with a different meaning, as every cooper and every musician knows. *Staffs* is now sometimes used; as, “I saw the husbandmen bending over their *staffs*.”—*Lord Carnarvon*. “With their *staffs* in their hands for very age.”—*Hope of Israel*, p. 16. “To distinguish between the two *staffs*.”—*Comstock’s Elocution*, p. 43. In one instance, I observe, a very excellent scholar has written *selves* for *selves*, but the latter is the established plural of *self*:

“Self-love would cease, or be dilated, when  
We should behold as many *selves* as men.”—*Waller’s Poems*, p. 55.

OBS. 19.—Of nouns purely English, the following thirteen are the only simple words that form distinct plurals not ending in *s* or *es*, and four of these are often regular: *man*,

*men*; *woman*, *women*; *child*, *children*; *brother*, *brethren* or *brothers*; *ox*, *oxen*; *goose*, *geese*; *foot*, *feet*; *tooth*, *teeth*; *louse*, *lice*; *mouse*, *mice*; *die*, *dice* or *dies*; *penny*, *pence* or *pennies*; *pea*, *pease* or *peas*. The word *brethren* is now applied only to fellow-members of the same church or fraternity; for sons of the same parents we always use *brothers*; and this form is sometimes employed in the other sense. *Dice* are spotted cubes for gaming; *dies* are stamps for coining money, or for impressing metals. *Pence*, as *six pence*, refers to the amount of money in value; *pennies* denotes the corns themselves. "We write *peas*, for two or more individual seeds; but *pease*, for an indefinite number in quantity or bulk."—*Webster's Dict.* This last anomaly, I think, might well enough "be spared; the sound of the word being the same, and the distinction to the eye not always regarded." Why is it not as proper, to write an order for "a bushel of *peas*," as for "a bushel of *beans*?" "*Peas* and *beans* may be severed from the ground before they be quite dry."—*Cobbett's E. Gram.*, ¶ 31.

OBS. 20.—When a compound, ending with any of the foregoing irregular words, is made plural, it follows the fashion of the word with which it ends: as, *Gentleman*, *gentlemen*; *bondwoman*, *bondwomen*; *foster-child*, *foster-children*; *solan-goose*, *solan-geese*; *eyetooth*, *eyeteeth*; *woodlouse*, *woodlice*;<sup>\*</sup> *dormouse*, *dormice*; *half-penny*, *halfpence*, *half-pennies*. In this way, these irregularities extend to many words; though some of the metaphorical class, as *kite's-foot*, *colts-foot*, *bear's-foot*, *lion's-foot*, being names of plants, have no plural. The word *man*, which is used the most frequently in this way, makes more than seventy such compounds. But there are some words of this ending, which, not being compounds of *man*, are regular: as, *German*, *Germans*; *Turcoman*, *Turcomans*; *Mussulman*, *Mussulmans*; *talisman*, *talismans*; *leman*, *lemans*; *caiman*, *caimans*.

OBS. 21.—Compounds, in general, admit but one variation to form the plural, and that must be made in the principal word, rather than in the adjunct; but where the terms differ little in importance, the genius of the language obviously inclines to a variation of the last only. Thus we write *fathers-in-law*, *sons-in-law*, *knights-errant*, *courts-martial*, *cousins-german*, *hangers-on*, *comings-in*, *goings-out*, *goings-forth*, varying the first; and *manhaters*, *manstealers*, *manslayers*, *maneaters*, *mandrills*, *handfuls*, *spoonfuls*, *mouthfuls*, *pailfuls*, *outpourings*, *ingatherings*, *downsittings*, *overflowings*, varying the last. So, in many instances, when there is a less intimate connexion of the parts, and the words are written with a hyphen, if not separately, we choose to vary the latter or last: as, *fellow-servants*, *queen-consorts*, *three-per-cents*, *he-goats*, *she-bears*, *jack-a-dandies*, *jack-a-lanterns*, *piano-fortes*. The following mode of writing is irregular in two respects; first, because the words are separated, and secondly, because both are varied: "Is it unreasonable to say with John Wesley, that '*men buyers* are exactly on a level with *men stealers*?'—GOODELL'S LECT. II: *Liberator*, ix, 65. According to analogy, it ought to be: "*Manbuyers* are exactly on a level with *manstealers*." J. W. Wright alleges, that, "The phrase, 'I want two *spoonfuls* or *handfuls*,' though common, is improperly constructed;" and that, "we should say, 'Two *spoons* or *hands full*.'"—*Philos. Gram.*, p. 222. From this opinion, I dissent: both authority and analogy favour the former mode of expressing the plural of such quantities.

<sup>\*</sup> There are some singular compounds of the plural word *pence*, which form their own plurals regularly; as, *sixpence*, *sixpences*. "If you do not all show like gilt *twopences* to me."—SHAKESPEARE. "The *sweepstakes* of which are to be composed of the disputed difference in the value of two doubtful *sixpences*."—GOODELL'S LECT.: *Liberator*. Vol. ix, p. 145.

OBS. 22.—There is neither difficulty nor uncertainty respecting the proper forms for the plurals of compound nouns in general; but the two irregular words *man* and *woman* are often varied at the beginning of the looser kind of compounds, contrary to what appears to be the general analogy of similar words. Of the propriety of this, the reader may judge, when I shall have quoted a few examples: “Besides their *man-servants* and their *maid-servants*.”—*Nehemiah*, vii, 67. “And I have oxen and asses, flocks, and *men-servants*, and *women-servants*.”—*Gen.*, xxxii, 5. “I gat me *men-singers*, and *women-singers*, and the delights of the sons of men.”—*Ecclesiastes*, ii, 8. “And she brought forth a *man-child*, who was to rule all nations with a rod of iron.”—*Rev.*, xii, 5.—“Why have ye done this, and saved the *men-children* alive?”—*Exod.*, i, 18. Such terms as these, if thought objectionable, may easily be avoided, by substituting for the former part of the compound the separate adjective *male* or *female*; as, *male child*, *male children*. Or, for those of the third example, one might say, “*singing men* and *singing women*,” as in *Nehemiah*, vii, 67; for, in the ancient languages, the words are the same. Alger compounds “singing-men and *singing-women*.”

OBS. 23.—Some foreign compound terms, consisting of what are usually, in the language from which they come, distinct words and different parts of speech, are made plural in English, by the addition of *e* or *es* at the end. But, in all such cases, I think the hyphen should be inserted in the compound, though it is the practice of many to omit it. Of this odd sort of words, I quote the following examples from Churchill; taking the liberty to insert the hyphen, which he omits: “*Ave-Maries*, *Te-Deums*, *camera-obscuras*, *agnus-castuses*, *habeas-corpuses*, *scire-faciases*, *hiccius-docchiuses*, *hocus-pocuses*, *ignis-fatuuses*, *chef-d’oeuvres*, *congé-d’élire*s, *flower-de-luces*, *louis-d’-ores*, *tête-à-têtes*.”—*Churchill’s Gram.*, p. 62.

OBS. 24.—Some nouns, from the nature of the things meant, have no plural. For, as there ought to be no word, or inflection of a word, for which we cannot conceive an appropriate meaning or use, it follows that whatever is of such a species that it cannot be taken in any plural sense, must naturally be named by a word which is singular only: as, *perry*, *cider*, *coffee*, *flax*, *hemp*, *fennel*, *tallow*, *pitch*, *gold*, *sloth*, *pride*, *meekness*, *eloquence*. But there are some things, which have in fact neither a comprehensible unity, nor any distinguishable plurality, and which may therefore be spoken of in either number; for the distinction of unity and plurality is, in such instances, merely verbal; and, whichever number we take, the word will be apt to want the other: as, *dregs*, or *sediment*; *riches*, or *wealth*; *pains*, or *toil*; *ethics*, or *moral philosophy*; *politics*, or *the science of government*; *belles-lettres*, or *polite literature*. So *darkness*, which in English appears to have no plural, is expressed in Latin by *tenebræ*, in French by *ténèbres*, which have no singular. It is necessary that every noun should be understood to be of one number or the other; for, in connecting it with a verb, or in supplying its place by a pronoun, we must assume it to be either singular or plural. And it is desirable that singulars and plurals should always abide by their appropriate forms, so that they may be thereby distinguished with readiness. But custom, which regulates this, as every thing else of the like nature, does not always adjust it well; or, at least, not always upon principles uniform in themselves and obvious to every intellect.

OBS. 25.—Nouns of multitude, when taken collectively, generally admit the regular plural form; which of course is understood with reference to the individuality of the whole collection, considered as one thing: but, when taken distributively, they have a plural signification without the form; and, in this case, their plurality refers to the individuals

that compose the assemblage. Thus, a *council*, a *committee*, a *jury*, a *meeting*, a *society*, a *flock*, or a *herd*, is singular; and the regular plurals are *councils*, *committees*, *juries*, *meetings*, *societies*, *flocks*, *herds*. But these, and many similar words, may be taken plurally without the *s*, because a collective noun is the name of many individuals together. Hence we may say, “The *council were* unanimous.”—“The *committee are* in consultation.”—“The *jury were* unable to agree.”—“The *meeting have shown their* discretion.”—“The *society have settled their* dispute.”—“The *flock are* widely scattered.”—“The whole *herd were drowned* in the sea.” The propriety of the last example seems questionable; because *whole* implies unity, and *were drowned* is plural. Where a purer concord can be effected, it may be well to avoid such a construction, though examples like it are not uncommon: as, “Clodius was acquitted by *a corrupt jury*, that had palpably taken shares of money before *they gave their* verdict.”—*Bacon*. “And the *whole multitude* of the people *were praying* without, at the time of incense.”—*Luke*, i, 10.

OBS. 26.—Nouns have, in some instances, a unity or plurality of meaning, which seems to be directly at variance with their form. Thus, *cattle*, for beasts of pasture, and *pulse*, for peas and beans, though in appearance singulars only, are generally, if not always, plural; and *summons*, *gallows*, *chintz*, *series*, *superficies*, *molasses*, *suds*, *hunks*, *jakes*, *trapes*, and *corps*, with the appearance of plurals, are generally, if not always, singular. Dr. Webster says that *cattle* is of both numbers; but wherein the oneness of cattle can consist, I know not. The Bible says, “God made—cattle after their kind.”—*Gen.*, i, 25. Here *kind* is indeed singular, as if *cattle* were a natural genus of which one must be *a cattle*; as *sheep* are a natural genus of which one is *a sheep*: but whether properly expressed so or not, is questionable; perhaps it ought to be, “and cattle after their *kinds*.” Dr. Gillies says, in his History of Greece, “*Cattle was regarded* as the most convenient *measure* of value.” This seems to me to be more inaccurate and unintelligible, than to say, “*Sheep was regarded* as the most convenient *measure* of value.” And what would this mean? *Sheep* is not singular, unless limited to that number by some definitive word; and *cattle* I conceive to be incapable of any such limitation.

OBS. 27.—Of the last class of words above cited, some may assume an additional *es*, when taken plurally; as, *summonses*, *gallowses*, *chintses*: the rest either want the plural, or have it seldom and without change of form. *Corps*, a body of troops, is a French word, which, when singular, is pronounced *cōre*, and when plural, *cōres*. But *corpse*, a dead body, is an English word, pronounced *kōrps*, and making the plural in two syllables, *corpses*. *Summonses* is given in Cobb’s Dictionary as the plural of *summons*; but some authors have used the latter with a plural verb: as, “But Love’s first *summons* seldom *are* obey’d.”—*Waller’s Poems*, p. 8. Dr. Johnson says this noun is from the verb *to summon*; and, if this is its origin, the singular ought to be *a summon*, and then *summons* would be a regular plural. But this “singular noun with a plural termination,” as Webster describes it, more probably originated from the Latin verb *submoneas*, used in the writ, and came to us through the jargon of law, in which we sometimes hear men talk of “*summonsing* witnesses.” The authorities for it, however, are good enough; as, “*This present summons*.”—SHAK.: *Joh. Dict.* “*This summons* he resolved to disobey.”—FELL: *ib.* *Chints* is called by Cobb a “substantive *plural*” and defined as “cotton *cloths*, made in India;” but other lexicographers define it as singular, and Worcester (perhaps more properly) writes it *chintz*. Johnson cites Pope as speaking of “*a charming chints*,” and I have somewhere seen the plural formed by adding *es*. “Of the Construction of single Words, or *Serieses* of Words.”—*Ward’s Gram.*, p. 114. Walker, in his Elements of Elocution, makes frequent use of the word “*serieses*,” and of the phrase “*series of serieses*.” But most writers, I suppose,

would doubt the propriety of this practice; because, in Latin, all nouns of the fifth declension, such as *caries*, *congeries*, *series*, *species*, *superficies*, make their nominative and vocative cases alike in both numbers. This, however, is no rule for writing English. Dr. Blair has used the word *species* in a plural sense; though I think he ought rather to have preferred the regular English word *kinds*: “The higher *species* of poetry seldom admit it.”—*Rhet.*, p. 403. *Specie*, meaning hard money, though derived or corrupted from *species*, is not the singular of that word; nor has it any occasion for a plural form, because we never speak of *a specie*. The plural of *gallows*, according to Dr. Webster, is *gallowses*; nor is that form without other authority, though some say, *gallows* is of both numbers and not to be varied: “Gallowses were occasionally put in order by the side of my windows.”—*Leigh Hunt’s Byron*, p. 369.

“Who would not guess there might be hopes,  
The fear of *gallowses* and ropes,  
Before their eyes, might reconcile  
Their animosities a while?”—*Hudibras*, p. 90.

OBS. 28.—Though the plural number is generally derived from the singular, and of course must as generally imply its existence, we have examples, and those not a few, in which the case is otherwise. Some nouns, because they signify such things as nature or art has made plural or double; some, because they have been formed from other parts of speech by means of the plural ending which belongs to nouns; and some, because they are compounds in which a plural word is principal, and put last, are commonly used in the plural number only, and have, in strict propriety, no singular. Though these three classes of plurals may not be perfectly separable, I shall endeavour to exhibit them in the order of this explanation.

1. Plurals in meaning and form: *analects*, *annals*,\* *archives*, *ashes*, *assets*, *billiards*, *bowels*, *breeches*, *calends*, *cates*, *chops*, *clothes*, *compasses*, *crants*, *eaves*, *embers*, *estovers*, *forceps*, *giblets*, *goggles*, *greaves*, *hards* or *hurds*, *hemorrhoids*, *ides*, *matins*, *nippers*, *nones*, *obsequies*, *orgies*,† *piles*, *pincers* or *pinchers*, *pliers*, *reins*, *scissors*, *shears*, *skittles*, *snuffers*, *spectacles*, *teens*, *tongs*, *trowsers*, *tweezers*, *umbles*, *vespers*, *victuals*.
2. Plurals by formation, derived chiefly from adjectives: *acoustics*, *aeronautics*, *analytics*, *bitters*, *catoptrics*, *commons*, *conics*, *credentials*, *delicates*, *dioptrics*, *economics*, *ethics*, *extraordinaries*, *filings*, *fives*, *freshes*, *glanders*, *gnomonics*, *goods*, *hermeneutics*, *hustings*, *hydrodynamics*, *hydrostatics*, *hydraulics*, *hysterics*, *inwards*, *leavings*, *magnetics*, *mathematics*, *measles*, *mechanics*, *mnemonics*, *merils*, *metaphysics*, *middlings*, *movables*, *mumps*, *nuptials*, *optics*, *phonics*, *phonetics*, *physics*,‡

\* In the third canto of Lord Byron’s *Prophecy of Dante*, this noun is used in the singular number:—

“And ocean written o’er would not afford Space for the *annal*, yet it shall go forth.”

† “They never yet had separated for their daylight beds, without a climax to their *orgy*, something like the present scene.”—*The Crock of Gold*, p. 13. “And straps never called upon to diminish that long whity-brown interval between shoe and *trowser*.”—*Ib.*, p. 24. “And he gave them *victual* in abundance.”—2 *Chron.*, xi, 23. “Store of *victual*.”—*Ib.*, verse 11.

‡ The noun *physic* properly signifies medicine, or the science of medicine: in which sense, it seems to have no plural. But Crombie and the others cite one or two instances in which *physic* and *metaphysic* are used, not very accurately, in the sense of the singular of *physics* and *metaphysics*. Several grammarians also quote some examples in which *physics*, *metaphysics*, *politics*, *optics*, and other similar names of sciences are used with verbs or pronouns of the singular number; but Dr. Crombie justly says the plural construction of such words, “is more common, and more agreeable to analogy.”—*On Etym. and Syntax*, p. 27.

*pneumatics, poetics, politics, riches, rickets, settlings, shatters, skimmings, spherics, staggers, statics, statistics, stays, strangles, sundries, sweepings, tactics, thanks, tidings, trappings, vives, vitals, wages,\* withers, yellows.*

3. Plurals by composition: *backstairs, cocklestairs, firearms,† headquarters, hotcockles, spatterdashes, self-affairs.* To these may be added the Latin words, *aborigines, antipodes, antes, antoeci, amphiscii, anthropophagi, antiscii, ascii, literati, fauces, regalia,* and *credenda,* with the Italian *vermicelli,* and the French *belles-lettres* and *entremets.*

OBS. 29.—There are several nouns which are set down by some writers as wanting the singular, and by others as having it. Of this class are the following: *amends,‡ ancients, awns, bots, catacombs, chives, cloves, cresses, dogsears, downs, dregs,§ entrails, fetters, fireworks, greens, gyves, hatches, intestines, lees,\*\* lungs, malanders, mallows, moderns, oats, orts, pleiads, premises, relics, remains, shackles, shambles,†† stilts, stairs, tares, vetches.* The fact is, that these words have, or ought to have, the singular, as often as there is any occasion to use it; and the same may, in general terms, be said of other nouns, respecting the formation of *the plural.*‡‡ For where the idea of unity or plurality comes clearly before the mind, we are very apt to shape the word accordingly, without thinking much about the authorities we can quote for it.

OBS. 30.—In general, where both numbers exist in common use, there is some palpable oneness or individuality, to which the article *a* or *an* is applicable; the nature of the species is found entire in every individual of it; and a multiplication of the individuals gives rise to plurality in the name. But the nature of a mass, or of an indefinite multitude taken collectively, is not found in individuals as such; nor is the name, whether singular, as *gold,* or plural, as *ashes,* so understood. Hence, though every noun must be of one number or the other, there are many which have little or no need of both. Thus we

\* “Benjamin Franklin, following the occupation of a compositor in a printing-office, at a limited weekly *wage,*” &c.—*Chambers’ Edinburgh Journal*, No. 232. “WAGE, Wages, hire. The singular number is still frequently used, though *Dr. Johnson* thought it obsolete.”—*Glossary of Craven*. 1828.

† Our lexicographers generally treat the word *firearms* as a close compound that has no singular. But some write it with a hyphen, as *fire-arms*. In fact the singular is sometimes used, but the way of writing it is unsettled. *Dr. Johnson*, in his Dictionary, defines a *carbine* as, “a small sort of *fire arm*,” Webster has it, “a short gun, or *fire arm*,” Worcester, “a small *fire-arm*,” Cobb, “a sort of small *firearms*.” Webster uses “*fire-arm*,” in defining “*stock*.”

‡ “But, soon afterwards, he made a glorious *amend* for his fault, at the battle of Plataea.”—*Hist. Reader*, p. 48.

§ “There not *a dreg* of guilt defiles.”—*Watts’s Lyrics*, p. 27.

\*\* In Young’s Night Thoughts, (N. vii, l. 475.) *lee*, the singular of *lees*, is found; Churchill says, (*Gram.*, p. 211,) “Prior has used *lee*, as the singular of *lees*,” Webster and Bolles have also both forms in their dictionaries:—

“Refine, exalt, throw down their poisonous *lee*,  
And make them sparkle in the bowl of bliss.”—*Young*.

†† “The ‘Procrustean bed’ has been a myth heretofore; it promises soon to be *a shamble* and a slaughterhouse in reality.”—*St. Louis Democrat*, 1855.

‡‡ J. W. Wright remarks, “Some nouns admit of no plural distinctions: as, *wine, wood, beer, sugar, tea, timber, fruit, meat*, goodness, happiness, and perhaps all nouns ending in *ness*.”—*Philos. Gram.*, p. 139. If this learned author had been brought up in the *woods*, and had never read of Murray’s “richer *wines*,” or heard of Solomon’s “dainty *meats*,”—never chattered in the market about *sugars* and *teas*, or read in Isaiah that “all our *righteousnesses* are as filthy rags,” or avowed, like Timothy, “a good profession before many *witnesses*,”—he might still have hewed the *timbers* of some rude cabin, and partaken of the wild *fruits* which nature affords. If these nine plurals are right, his assertion is nine times wrong, or misapplied by himself seven times in the ten.

commonly speak of *wheat*, *barley*, or *oats*, collectively; and very seldom find occasion for any other forms of these words. But chafferers at the corn-market, in spite of Cobbett,\* will talk about *wheats* and *barleys*, meaning different kinds† or qualities; and a gardener, if he pleases, will tell of an *oat*, (as does Milton, in his *Lycidas*,) meaning a single seed or plant. But, because *wheat* or *barley* generally means that sort of grain in mass, if he will mention a single kernel, he must call it a *grain of wheat* or a *barleycorn*. And these he may readily make plural, to specify any particular number; as, *five grains of wheat*, or *three barleycorns*.

OBS. 31.—My chief concern is with general principles, but the illustration of these requires many particular examples—even far more than I have room to quote. The word *amends* is represented by Murray and others, as being singular as well as plural; but Webster's late dictionaries exhibit *amend* as singular, and *amends* as plural, with definitions that needlessly differ, though not much. I judge "*an amends*" to be bad English; and prefer the regular singular, *an amend*. The word is of French origin, and is sometimes written in English with a needless final *e*; as, "But only to make a kind of honourable *amende* to God."—*Rollin's Ancient Hist.*, Vol. ii, p. 24. The word *remains* Dr. Webster puts down as plural only, and yet uses it himself in the singular: "The creation of a Dictator, even for a few months, would have buried every *remain* of freedom."—*Webster's Essays*, p. 70. There are also other authorities for this usage, and also for some other nouns that are commonly thought to have no singular; as, "But Duelling is unlawful and murderous, a *remain* of the ancient Gothic barbarity."—*Brown's Divinity*, p. 26. "I grieve with the old, for so many additional inconveniences, more than their small *remain* of life seemed destined to undergo."—POPE: in *Joh. Dict.* "A disjunctive syllogism is one whose major *premise* is disjunctive."—*Hedge's Logic*. "Where should he have this gold? It is some poor fragment, some slender *ort* of his remainder."—SHAK.: *Timon of Athens*.

OBS. 32.—There are several nouns which are usually alike in both numbers. Thus, *deer*, *folk*, *fry*, *gentry*, *grouse*, *hose*, *neat*, *sheep*, *swine*, *vermin*, and *rest*, (i. e. *the rest*, the others, the residue,) are regular singulars, but they are used also as plurals, and that more frequently. Again, *alms*, *aloes*, *bellows*, *means*, *news*, *odds*, *shambles*, and *species*, are proper plurals, but most of them are oftener construed as singulars. *Folk* and *fry* are collective nouns. *Folk* means *people*; *a folk*, *a people*: as, "The ants are *a people* not strong;"—"The conies are but *a feeble folk*."—*Prov.*, xxx, 25, 26. "He laid his hands on a few sick *folk*, and healed *them*."—*Mark*, vi, 5. *Folks*, which ought to be the plural of *folk*, and equivalent to *peoples*, is now used with reference to a plurality of individuals, and the collective word seems liable to be entirely superseded by it. A *fry* is a swarm of young fishes, or of any other little creatures living in water: so called, perhaps, because their motions often make the surface *fry*. Several such swarms might properly be called *fries*; but this form can never be applied to the individuals, without interfering with the other. "So numerous *was the fry*."—*Cowper*. "The *fry betake themselves* to the neighbouring pools."—*Quarterly Review*. "You cannot think more contemptuously of *these gentry* than *they* were thought of by the true prophets."—*Watson's Apology*, p. 93. "*Grouse*, a heathcock."—*Johnson*.

\* "I will not suppose it possible for my dear James to fall into either the company or the language of those persons who talk, and even write, about *barleys*, *wheats*, *clovers*, *flours*, *grasses*, and *malts*."—*Cobbett's E. Gram.*, p. 29.

† "It is a general rule, that all names of things measured or weighed, have no plural; for in *them* not number, but quantity, is regarded: as, *wool*, *wine*, *oil*. When we speak, however, of different kinds, we use the plural: as, the coarser *wools*, the richer *wines*, the finer *oils*."—*Murray's Gram.*, p. 41.

“The ‘squires in scorn will fly the house  
For better game, and look for *grouse*.”—*Swift*.

“Here’s an English tailor, come hither for stealing out of *a* French *hose*.”—*Shak*. “He, being in love, could not see to garter his *hose*.”—*Id*. Formerly, the plural was *hosen*: “Then these men were bound, in their coats, their *hosen*, and their hats.”—*Dan.*, iii, 21. Of *sheep*, Shakspeare has used the regular plural: “Two hot *sheeps*, marry!”—*Love’s Labour Lost*, Act ii, Sc. 1.

“Who both by his calf and his lamb will be known,  
May well kill *a neat* and *a sheep* of his own.”—*Tusser*.

“His droves of asses, camels, herds of *neat*,  
And flocks of *sheep*, grew shortly twice as great.”—*Sandys*.

“As a jewel of gold in *a swine’s* snout.”—*Prov.*, xi, 22. “A herd of *many swine*, feeding.”—*Matt.*, viii, 30. “An idle person only lives to spend his time, and eat the fruits of the earth, like a *vermin* or a wolf.”—*Taylor*. “The head of a wolf, dried and hanged up, will scare away *vermin*.”—*Bacon*. “Cheslip, *a small vermin* that lies under stones or tiles.”—SKINNER: in *Joh. and in Web. Dict.* “This is flour, the *rest is* bran.”—“And the *rest were* blinded.”—*Rom.*, xi, 7. “The poor beggar hath a just demand of *an alms*.”—*Swift*. “Thine *alms are* come up for a memorial before God.”—*Acts*, x, 4. “The draught of air performed the function of *a bellows*.”—*Robertson’s Amer.*, ii, 223. “As the *bellows do*.”—*Bicknell’s Gram.*, ii, 11. “The *bellows are* burned.”—*Jer.*, vi, 29. “Let *a gallows* be made.”—*Esther*, v, 14. “*Mallows* are very useful in medicine.”—*Wood’s Dict.* “*News*,” says Johnson, “is without the singular, unless it be considered as singular.”—*Dict.* “So *is* good *news* from a far country.”—*Prov.*, xxv, 25. “Evil *news rides* fast, while good *news baits*.”—*Milton*. “When Rhea heard *these news*, she fled.”—*Raleigh*. “*News were brought* to the queen.”—*Hume’s Hist.*, iv, 426. “The *news* I bring *are* afflicting, but the consolation with which *they* are attended, ought to moderate your grief.”—*Gil Blas*, Vol. ii, p. 20. “Between these two cases there *are* great *odds*.”—*Hooker*. “Where the *odds is* considerable.”—*Campbell*. “Determining on which side the *odds lie*.”—*Locke*. “The greater *are the odds* that he mistakes his author.”—*Johnson’s Gram. Com.*, p. 1. “Though thus *an odds* unequally they meet.”—*Rowe’s Lucan*, B. iv, l. 789. “Preëminent by so *much odds*.”—*Milton*. “To make a *shambles* of the parliament house.”—*Shak*. “The earth has been, from the beginning, a great Aceldama, *a shambles* of blood.”—*Christian’s Vade-Mecum*, p. 6. “*A shambles* sounds so inconsistent, I should rather say, “*A shamble*.” Johnson says, the etymology of the word is *uncertain*; Webster refers it to the Saxon *scamel*: it means *a butcher’s stall*, *a meat-market*; and there would seem to be no good reason for the *s*, unless more than one such place is intended. “Who sells his subjects to the *shambles* of a foreign power.”—*Pitt*. “A special idea is called by the schools *a species*.”—*Watts*. “He intendeth the care of *species*, or common natures.”—*Brown*. “ALOE, (alō) *n.*; *plu.* ALOES.”—*Webster’s Dict.*, and *Worcester’s*. “But it was *aloe* itself to lose the reward.”—*Tupper’s Crock of Gold*, p. 16.

“But high in amphitheatre above,  
*His* arms the everlasting *aloes* threw.”—*Campbell*, G. of W., ii, 10.

OBS. 33.—There are some nouns, which, though really regular in respect to possessing the two forms for the two numbers, are not free from irregularity in the manner of their application. Thus *means* is the regular plural of *mean*; and, when the word is put for mediocrity, middle point, place, or degree, it takes both forms, each in its proper sense;

but when it signifies things instrumental, or that which is used to effect an object, most writers use *means* for the singular as well as for the plural:\* as, “By *this means*”—“By *those means*,” with reference to one mediating cause; and, “By *these means*,”—“By *those means*,” with reference to more than one. Dr. Johnson says the use of *means* for *mean* is not very grammatical; and, among his examples for the true use of the word, he has the following: “Pamela’s noble heart would needs gratefully make known the valiant *mean* of her safety.”—*Sidney*. “Their virtuous conversation was a *mean* to work the heathens’ conversion.”—*Hooker*. “Whether his wits should by that *mean* have been taken from him.”—*Id.* “I’ll devise a *mean* to draw the Moor out of the way.”—*Shak.* “No place will please me so, no *mean* of death.”—*Id.* “Nature is made better by no *mean*, but nature makes that *mean*.”—*Id.* Dr. Lowth also questioned the propriety of construing *means* as singular, and referred to these same authors as authorities for preferring the regular form. Buchanan insists that *means* is right in the plural only; and that, “The singular should be used as perfectly analogous; by this *mean*, by that *mean*.”—*English Syntax*, p. 103. Lord Kames, likewise, appears by his practice to have been of the same opinion: “Of this the child must be sensible intuitively, for it has no other *mean* of knowledge.”—*Elements of Criticism*, Vol. i, p. 357. “And in both the same *mean* is employed.”—*Ib.* ii, 271. Caleb Alexander, too, declares “*this means*,” “*that means*,” and “*a means*,” to be “ungrammatical.”—*Gram.*, p. 58. But common usage has gone against the suggestions of these critics, and later grammarians have rather confirmed the irregularity, than attempted to reform it.

OBS. 34.—Murray quotes sixteen good authorities to prove that *means* may be singular; but whether it *ought* to be so or not, is still a disputable point. Principle is for the regular word *mean*, and good practice favours the irregularity, but is still divided. Cobbett, to the disgrace of grammar, says, “*Mean*, as a noun, is *never used in the singular*. It, like some other words, has broken loose from all principle and rule. By universal consent, it *is become always a plural*, whether used with *singular or plural* pronouns and articles, *or not*.”—*E. Gram.*, p. 144. This is as ungrammatical, as it is untrue. Both *mean* and *means* are sufficiently authorized in the singular: “The prospect which by this *mean* is opened to you.”—*Melmoth’s Cicero*. “Faith in this doctrine never terminates in itself, but is *a mean*, to holiness as an end.”—*Dr. Chalmers, Sermons*, p. v. “The *mean* of basely affronting him.”—*Brown’s Divinity*, p. 19. “They used every *mean* to prevent the re-establishment of their religion.”—*Dr Jamieson’s Sacred Hist.*, i, p. 20. “As a necessary *mean* to prepare men for the discharge of that duty.”—*Bolingbroke, on Hist.*, p. 153. “Greatest is the power of a *mean*, when its power is least suspected.”—*Tupper’s Book of Thoughts*, p. 37. “To the deliberative orator the reputation of unsullied virtue is not only useful, as a *mean* of promoting his general influence, it is also among his most efficient engines of persuasion, upon every individual occasion.”—*J. Q. Adams’s Lectures on Rhetoric and Oratory*, i, 352.

---

\* So *pains* is the regular plural of *pain*, and, by Johnson, Webster, and other lexicographers, is recognized only as plural; but Worcester inserts it among his stock words, with a comment, thus: “Pains, *n.* Labor; work; toil; care; trouble. ☞ According to the best usage, the word *pains*, though of plural form, is used in these senses as singular, and is joined with a singular verb; as, ‘The pains they had taken *was* very great.’ *Clarendon*. ‘No pains *is* taken.’ *Pope*. ‘Great pains *is* taken.’ *Priestley*. ‘Much pains.’ *Bolingbroke*.”—*Univ. and Crit. Dict.* The multiplication of anomalies of this kind is so undesirable, that nothing short of a very clear decision of Custom, against the use of the regular concord, can well justify the exception. Many such examples may be cited, but are they not examples of false syntax? I incline to think “the best usage” would still make all these verbs plural. Dr. Johnson cites the first example thus: “The *pains* they had taken *were* very great. *Clarendon*.”—*Quarto Dict.*, *u. Pain*. And the following recent example is unquestionably right: “Pains have been taken to collect the information required.”—*President Fillmore’s Message*, 1852.

"I would urge it upon you, as the most effectual *mean* of extending your respectability and usefulness in the world."—*Ib.*, ii, 395. "Exercise will be admitted to be a necessary *mean* of improvement."—*Blair's Rhet.*, p. 343. "And by *that means* we have now an early prepossession in their favour."—*Ib.*, p. 348. "To abolish all sacrifice by revealing a better *mean* of reconciliation."—*Keith's Evidences*, p. 46. "As a *mean* of destroying the distinction."—*Ib.*, p. 3. "Which however is by no *mean* universally the case."—*Religious World Displayed*, Vol. iii, p. 155.

OBS. 35.—Again, there are some nouns, which, though they do not lack the regular plural form, are sometimes used in a plural sense without the plural termination. Thus *manner* makes the plural *manners*, which last is now generally used in the peculiar sense of behaviour, or deportment, but not always: it sometimes means methods, modes, or ways; as, "At sundry times and in divers *manners*."—*Heb.*, i, 1. "In the *manners* above mentioned."—*Butler's Analogy*, p. 100. "There be three *manners* of trials in England."—COWELL: *Joh. Dict.*, *w. Jury*. "These two *manners* of representation."—*Lowth's Gram.*, p. 15. "These are the three primary modes, or *manners*, of expression."—*Lowth's Gram.*, p. 83. "In arrangement, too, various *manners* suit various styles."—*Campbell's Phil. of Rhet.*, p. 172. "Between the two *manners*."—*Bolingbroke, on Hist.*, p. 35. "Here are three different *manners* of asserting."—*Barnard's Gram.*, p. 59. But *manner* has often been put for *sorts*, without the *s*; as, "The tree of life, which bare *twelve manner* of fruits."—*Rev.*, xxii, 2. "*All manner* of men assembled here in arms."—*Shak.* "*All manner* of outward advantages."—*Atterbury*. Milton used *kind* in the same way, but not very properly; as, "*All kind* of living creatures."—*P. Lost*, B. iv, l. 286. This irregularity it would be well to avoid. *Manners* may still, perhaps, be proper for modes or ways; and *all manner*, if allowed, must be taken in the sense of a collective noun; but for sorts, kinds, classes, or species, I would use neither the plural nor the singular of this word. The word *heathen*, too, makes the regular plural *heathens*, and yet is often used in a plural sense without the *s*; as, "Why do the *heathen* rage?"—*Psalms*, ii, 1. "Christianity was formerly propagated among the *heathens*."—*Murray's Key*, 8vo, p. 217. The word *youth*, likewise, has the same peculiarities.

OBS. 36.—Under the present head come names of fishes, birds, or other things, when the application of the singular is extended from the individual to the species, so as to supersede the plural by assuming its construction: as, Sing. "A great *fish*."—*Jonah*, i, 17. Plur. "For the multitude of *fishes*."—*John*, xxi, 6. "A very great multitude of *fish*."—*Ezekiel*, xlvii, 9.\* The name of the genus being liable to this last construction, men seem to have thought that the species should follow; consequently, the regular plurals of some very common names of fishes are scarcely known at all. Hence some grammarians affirm, that *salmon*, *mackerel*, *herring*, *perch*, *tench*, and several others, are alike in both numbers, and ought never to be used in the plural form. I am not so fond of honouring these anomalies. Usage is here as unsettled, as it is arbitrary; and, if the expression of plurality is to be limited to either form exclusively, the regular plural ought certainly to be preferred. But, *for fish taken in bulk*, the singular form seems more appropriate; as,

---

\* "And the *fish* that *is* in the river shall die."—*Exod.*, vii, 18. "And the *fish* that *was* in the river died."—*Ib.*, 21. Here the construction is altogether in the singular, and yet the meaning seems to be plural. This construction appears to be more objectionable, than the use of the word *fish* with a plural verb. The French Bible here corresponds with ours: but the Latin Vulgate, and the Greek Septuagint, have both the noun and the verb in the plural: as, "The *fishes* that *are* in the river,"—"The *fishes* that *were*," &c. In our Bible, *fowl*, as well *fish*, is sometimes plural; and yet both words, in some passages, have the plural form: as, "And *fowl* that may fly," &c.—*Gen.*, i, 20. "I will consume the *fowls* of the heaven, and the *fishes* of the sea."—*Zeph.*, i, 3.

"These vessels take from thirty-eight to forty-five quintals of *cod* and *pollock*, and six thousand barrels of *mackerel*, yearly."—*Balbi's Geog.*, p. 28.

OBS. 37.—The following examples will illustrate the unsettled usage just mentioned, and from them the reader may judge for himself what is right. In quoting, at second-hand, I generally think it proper to make double references; and especially in citing authorities after Johnson, because he so often gives the same passages variously. But he himself is reckoned good authority in things literary. Be it so. I regret the many proofs of his fallibility. "Hear you this Triton of the *minnows*?"—*Shak.* "The shoal of *herrings* was of an immense extent."—*Murray's Key*, p. 185. "Buy my *herring* fresh."—SWIFT: *in Joh. Dict.* "In the fisheries of Maine, *cod*, *herring*, *mackerel* *alewives*, *salmon*, and other *fish*, are taken."—*Balbi's Geog.*, p. 23. "MEASE, *n.* The quantity of 500; as, a *mease* of *herrings*."—*Webster's Dict.* "We shall have plenty of *mackerel* this season."—ADDISON: *in Joh. Dict.* "*Mackareel* is the same in both numbers. Gay has improperly *mackarels*."—*Churchill's Gram.*, p. 208. "They take *salmon* and *trouts* by groping and tickling them under the bellies."—CAREW: *in Joh. Dict.* "The pond will keep *trout* and *salmon* in their seasonable plight."—*Id.*, *ib.*, *w. Trout*. "Some *fish* are preserved fresh in vinegar, as *turbot*."—*Id.*, *ib.*, *w. Turbot*. "Some *fish* are boiled and preserved fresh in vinegar, as *tunny* and *turbot*."—*Id.*, *ib.*, *w. Tunny*. "Of round *fish*, there are *brit*, *sprat*, *barn*, *smelts*."—*Id.*, *ib.*, *w. Smelt*. "For *sprats* and *spurlings* for your house."—TUSSEE: *ib.*, *w. Spurling*. "The coast is plentifully stored with *pilchards*, *herrings*, and *haddock*."—CAREW: *ib.*, *w. Haddock*. "The coast is plentifully stored with round *fish*, *pilchard*, *herring*, *mackerel*, and *cod*."—*Id.*, *ib.*, *w. Herring*. "The coast is plentifully stored with *shellfish*, *sea-hedgehogs*, *scallops*, *pilcherd*, *herring*, and *pollock*."—*Id.*, *ib.*, *w. Pollock*. "A *roach* is a *fish* of no great reputation for his dainty taste. It is noted that *roaches* recover strength and grow a fortnight after spawning."—WALTON: *ib.*, *w. Roach*. "A friend of mine stored a pond of three or four acres with *carps* and *tench*."—HALE: *ib.*, *w. Carp*. "Having stored a very great pond with *carps*, *tench*, and other *pond-fish*, and only put in two small *pikes*, this pair of tyrants in seven years devoured the whole."—*Id.*, *ib.*, *w. Tench*. "Singular, *tench*; plural, *tenches*."—*Brightland's Gram.*, p. 78. "The polar bear preys upon *seals*, *fish*, and the carcasses of *whales*."—*Balbi's Geog.*, p. 172. "*Trouts* and *salmons* swim against the stream."—BACON: *Ward's Gram.*, p. 130.

"Tis true no *turbots* dignify my boards,  
But *gudgeons*, *flounders*, what my Thames affords."—*Pope*.

OBS. 38.—From the foregoing examples it would seem, if fish or fishes are often spoken of without a regular distinction of the grammatical numbers, it is not because the words are not susceptible of the inflection, but because there is some difference of meaning between the mere name of the sort and the distinct modification in regard to number. There are also other nouns in which a like difference may be observed. Some names of building materials, as *brick*, *stone*, *plank*, *joist*, though not destitute of regular plurals, as *bricks*, *stones*, *planks*, *joists*, and not unadapted to ideas distinctly singular, as *a brick*, *a stone*, *a plank*, *a joist*, are nevertheless sometimes used in a plural sense without the *s*, and sometimes in a sense which seems hardly to embrace the idea of either number; as, "Let us make *brick*, and burn *them* thoroughly."—*Gen.*, xi, 3. "And they had *brick* for *stone*."—*Ib.* "The tale of *bricks*."—*Exod.*, v, 8 and 18. "Make *brick*."—*Ib.*, v, 16. "From your *bricks*."—*Ib.*, v, 19. "Upon altars of *brick*."—*Isaiah*. lxxv, 3. "The *bricks* are fallen down."—*Ib.*, ix, 10. The same variety of usage occurs in respect to a few other words, and sometimes perhaps without good reason; as, "Vast numbers of sea *fowl* frequent the rocky

cliffs.”—*Balbi’s Geog.*, p. 231. “Bullocks, sheep, and *fowls*.”—*Ib.*, p. 439. “*Cannon* is used alike in both numbers.”—*Everest’s Gram.*, p. 48. “*Cannon* and *shot* may be used in the singular or plural sense.”—*O. B. Peirce’s Gram.*, p. 37. “The column in the Place Vendome is one hundred and thirty-four feet high, and is made of the brass of the *cannons* taken from the Austrians and Prussians.”—*Balbi’s Geog.*, p. 249. “As his *cannons* roar.”—*Dryden’s Poems*, p. 81. “Twenty *shot* of his greatest cannon.”—CLARENDON: *Joh. Dict.* “Twenty *shots*” would here, I think, be more proper, though the word is not made plural when it means *little balls of lead*. “And *cannons* conquer armies.”—*Hudibras*, Part III, Canto iii, l. 249.

“Healts to both kings, attended with the roar  
Of *cannons* echoed from th’ affrighted shore.”—*Waller*, p. 7.

OBS. 39.—Of foreign nouns, many retain their original plural; a few are defective; and some are redundant, because the English form is also in use. Our writers have laid many languages under contribution, and thus furnished an abundance of irregular words, necessary to be explained, but never to be acknowledged as English till they conform to our own rules.

1. Of nouns in *a*, *saliva*, spittle, and *scoria*, dross, have no occasion for the plural; *lamina*, a thin plate, makes *laminæ*; *macula*, a spot, *maculæ*; *minutia*, a little thing, *minutiæ*; *nebula*, a mist, *nebulæ*; *siliqua*, a pod, *siliquiæ*. *Dogma* makes *dogmas* or *dogmata*; *exanthema*, *exanthemas* or *exanthemata*; *miasm* or *miasma*, *miasms* or *miasmata*; *stigma*, *stigmas* or *stigmata*.
2. Of nouns in *um*, some have no need of the plural; as, *bdellium*, *decorum*, *elysium*, *equilibrium*, *guaiacum*, *laudanum*, *odium*, *opium*, *petroleum*, *serum*, *viaticum*. Some form it regularly; as, *asylums*, *compendiums*, *craniums*, *emporiums*, *encomiums*, *forums*, *frustums*, *lustrums*, *mausoleums*, *museums*, *pendulums*, *nostrums*, *rostrums*, *residuums*, *vacuums*. Others take either the English or the Latin plural; as, *desideratums* or *desiderata*, *mediums* or *media*, *menstruums* or *menstrua*, *memorandums* or *memoranda*, *spectrum*s or *spectra*, *speculum*s or *specula*, *stratum*s or *strata*, *succedaneums* or *succedanea*, *trapeziums* or *trapezia*, *vinculum*s or *vincula*. A few seem to have the Latin plural only: as, *arcanum*, *arcana*; *datum*, *data*; *effluvium*, *effluvia*; *erratum*, *errata*; *scholium*, *scholia*.
3. Of nouns in *us*, a few have no plural; as, *asparagus*, *calamus*, *mucus*. Some have only the Latin plural, which usually changes *us* to *i*; as, *alumnus*, *alumni*; *androgynus*, *androgyni*; *calculus*, *calculi*; *dracunculus*, *dracunculi*; *echinus*, *echini*; *magus*, *magi*. But such as have properly become English words, may form the plural regularly in *es*; as, *chorus*, *choruses*: so, *apparatus*, *bolus*, *callus*, *circus*, *fetus*, *focus*, *fucus*, *fungus*, *hiatus*, *ignoramus*, *impetus*, *incubus*, *isthmus*, *nautilus*, *nucleus*, *prospectus*, *rebus*, *sinus*, *surplus*. Five of these make the Latin plural like the singular; but the mere English scholar has no occasion to be told which they are. *Radius* makes the plural *radii* or *radiuses*. *Genius* has *genii*, for imaginary spirits, and *geniuses*, for men of wit. *Genus*, a sort, becomes *genera* in Latin, and *genuses* in English. *Denarius* makes, in the plural, *denarii* or *denariuses*.
4. Of nouns in *is*, some are regular; as, *trellis*, *trellises*: so, *annolis*, *butteris*, *caddis*, *dervis*, *iris*, *marquis*, *metropolis*, *portcullis*, *proboscis*. Some seem to have no need of the plural; as, *ambergris*, *aqua-fortis*, *arthritis*, *brewis*, *crasis*, *elephantiasis*, *genesis*, *orris*, *siriasis*, *tennis*. But most nouns of this ending follow the Greek or Latin form, which simply changes *is* to *ēs*: as, *amanuensis*, *amanuenses*; *analysis*, *analyses*; *antithesis*,

- antitheses*; *axis*, *axes*; *basis*, *bases*; *crisis*, *crises*; *diæresis*, *diæreses*; *diesis*, *dieses*; *ellipsis*, *ellipses*; *emphasis*, *emphases*; *fascis*, *fascies*; *hypothesis*, *hypotheses*; *metamorphosis*, *metamorphoses*; *oasis*, *oases*; *parenthesis*, *parentheses*; *phasis*, *phases*; *praxis*, *praxes*; *synopsis*, *synopses*; *synthesis*, *syntheses*; *syrtis*, *syrtis*; *thesis*, *theses*. In some, however, the original plural is not so formed; but is made by changing *is* to *ides*; as, *aphis*, *aphides*; *apsis*, *apsides*; *ascaris*, *ascarides*; *bolis*, *bolides*; *cantharis*, *cantharides*; *chrysalis*, *chrysalides*; *ephemeris*, *ephemerides*; *epidermis*, *epidermides*. So *iris* and *proboscis*, which we make regular; and perhaps some of the foregoing may be made so too. Fisher writes *Praxises* for *praxes*, though not very properly. See his *Gram*, p. v. *Equus*, a Roman knight, makes *equites* in the plural.
5. Of nouns in *x*, there are few, if any, which ought not to form the plural regularly, when used as English words; though the Latins changed *x* to *ces*, and *ex* to *ices*, making the *i* sometimes long and sometimes short: as, *apex*, *apices*, for *apexes*; *appendix*, *appendices*, for *appendixes*; *calix*, *calices*, for *calixes*; *calx*, *calces*, for *calxes*; *calyx*, *calyces*, for *calyxes*; *caudex*, *caudices*, for *caudexes*; *cicatrix*, *cicatrices*, for *cicatrixes*; *helix*, *helices*, for *helixes*; *index*, *indices*, for *indexes*; *matrix*, *matrices*, for *matrixes*; *quincunx*, *quincunces*, for *quincunxes*; *radix*, *radices*, for *radixes*; *varix*, *varices*, for *varixes*; *vertex*, *vertices*, for *vertexes*; *vortex*, *vortices*, for *vortexes*. Some Greek words in *x* change that letter to *ges*; as, *larynx*, *larynges*, for *larinxes*; *phalanx*, *phalanges*, for *phalanxes*. *Billet-doux*, from the French, is *billets-doux* in the plural.
6. Of nouns in *on*, derived from Greek, the greater part always form the plural regularly; as, *etymons*, *gnomons*, *ichneumons*, *myrmidons*, *phlegmons*, *trigons*, *tetragons*, *pentagons*, *hexagons*, *heptagons*, *octagons*, *enneagons*, *decagons*, *hendecagons*, *dodecagons*, *polygons*. So *trihedrons*, *tetrahedrons*, *pentahedrons*, &c., though some say, these last may end in *dra*, which I think improper. For a few words of this class, however, there are double plurals in use; as, *automata* or *atomatons*, *criteria* or *criteria*, *parhelia* or *parhelions*; and the plural of *phenomenon* appears to be always *phenomena*.
7. The plural of *legumen* is *legumens* or *legumina*; of *stamen*, *stamens* or *stamina*; of *cherub*, *cherubs* or *cherubim*; of *seraph*, *seraphs* or *seraphim*; of *beau*, *beaus* or *beaux*; of *bandit*, *bandits* or *banditti*. The regular forms are in general preferable. The Hebrew plurals *cherubim* and *seraphim*, being sometimes mistaken for singulars, other plurals have been formed from them; as, “And over it the *cherubims* of glory.”—*Heb.* ix, 5. “Then flow one of the *seraphims* unto me.”—*Isaiah*, vi, 6. Dr. Campbell remarks: “We are authorized, both by use and by analogy, to say either *cherubs* and *seraphs*, according to the English idiom, or *cherubim* and *seraphim*, according to the oriental. The former suits better the familiar, the latter the solemn style. I shall add to this remark,” says he, “that, as the words *cherubim* and *seraphim* are plural, the terms *cherubims* and *seraphims*, as expressing the plural, are quite improper.”—*Phil. of Rhet.*, p. 201.

OBS. 40.—When other parts of speech become nouns, they either want the plural, or form it regularly,\* like common nouns of the same endings; as, “His affairs went on at

\* Some authors, when they give to *mere words* the construction of plural nouns, are in the habit of writing them in the form of possessives singular; as, “They have of late, ‘tis true, reformed, in some measure, the gouty joints and darning work of *whereunto’s*, *whereby’s*, *thereof’s*, *therewith’s*, and the rest of this kind.”—*Shaftesbury*. “Here,” says Dr. Crombie, “the genitive singular is *improperly* used for the objective case plural. It should be, *whereuntos*, *wherebys*, *thereofs*, *therewiths*.”—*Treatise on Etym. and Synt.*, p. 338. According to our rules, these words should rather be, *whereuntoes*, *wherebies*, *thereofs*, *therewiths*. “Any

*sixes* and *sevens*.”—*Arbuthnot*. “Some mathematicians have proposed to compute by *twoes*; *others*, by *fours*; *others*, by *twelves*.”—*Churchill’s Gram.*, p. 81. “Three *fourths*, nine *tenths*.”—*Ib.*, p. 230. “Time’s *takings* and *leavings*.”—*Barton*. “The *yeas* and *nays*.”—*Newspaper*. “The *ays* and *noes*.”—*Ib.* “*Oes* and *spangles*.”—*Bacon*. “The *ins* and the *outs*.”—*Newspaper*.”—We find it more safe against *outs* and *doubles*.”—*Printer’s Gram*. “His *ands* and his *ors*.”—*Mott*. “One of the *buts*.”—*Fowle*. “In raising the mirth of *stupids*.”—*Steele*. “*Eatings*, *drinkings*, *wakings*, *sleepings*, *walkings*, *talkings*, *sayings*, *doings*—all were for the good of the public; there was not such a things as a secret in the town.”—LONDON: *Keepsake*, 1833. “Her innocent *forsooths* and *yesses*.”—*Spect.*, No. 266.

“Henceforth my wooing mind shall be expressed

In russet *yeas* and honest kersey *noes*.”—*Shak*.

See *Johnson’s Dict.*, *w. Kersey*.

## GENDERS.

Genders, in grammar, are modifications that distinguish objects in regard to sex.

There are three genders; the *masculine*, the *feminine*, and the *neuter*.

The *masculine gender* is that which denotes persons or animals of the male kind; as, *man*, *father*, *king*.

The *feminine gender* is that which denotes persons or animals of the female kind; as, *woman*, *mother*, *queen*.

The *neuter gender* is that which denotes things that are neither male nor female; as, *pen*, *ink*, *paper*.

Hence, names of males are masculine; names of females, feminine; and names of things inanimate, literally, neuter.

Masculine nouns make regular feminines, when their termination is changed to *ess*: as, *hunter*, *huntress*; *prince*, *princess*; *lion*, *lioness*.

## OBSERVATIONS.

OBS. 1.—The different genders in grammar are founded on the natural distinction of sex in animals, and on the absence of sex in other things. In English, they belong only to nouns and pronouns; and to these they are usually applied, not arbitrarily, as in some other languages, but agreeably to the order of nature. From this we derive a very striking advantage over those who use the gender differently, or without such rule; which is, that our pronouns are easy of application, and have a fine effect when objects are personified. Pronouns are of the same gender as the nouns for which they stand.

OBS. 2.—Many nouns are equally applicable to both sexes; as, *cousin*, *friend*, *neighbour*, *parent*, *person*, *servant*. The gender of these is usually determined by the

---

word, when used as the name of itself, becomes a noun.”—*Goodenow’s Gram.*, p. 26. But some grammarians say, “The plural of words, considered as words merely, is formed by the apostrophe and *s*; as, ‘Who, that has any taste, can endure the incessant, quick returns of the *also’s*, and the *likewise’s*, and the *moreover’s*, and the *however’s*, and the *notwithstanding’s*?’—CAMPBELL.”—*Wells’s School Gram.*, p. 54. Practice is not altogether in favour of this principle, and perhaps it would be better to decide with Crombie that such a use of the apostrophe is improper.

context; and they are to be called masculine or feminine accordingly. To such words, some grammarians have applied the unnecessary and improper term *common gender*. Murray justly observes, “There is no such gender belonging to the language. The business of parsing can be effectually performed, without having recourse to a *common gender*.”—*Gram.*, 8vo. p. 39. The term is more useful, and less liable to objection, as applied to the learned languages; but with us, whose genders *distinguish objects in regard to sex*, it is plainly a solecism.

OBS. 3.—A great many of our grammars define gender to be “*the distinction of sex*,” and then speak of a *common gender*, in which the two sexes are left *undistinguished*; and of the *neuter gender*, in which objects are treated as being of *neither sex*. These views of the matter are obviously inconsistent. Not genders, or a gender, do the writers undertake to define, but “gender” as a whole; and absurdly enough, too; because this whole of gender they immediately distribute into certain *other genders*, into genders of gender, or kinds of gender, and these not compatible with their definition. Thus Wells: “Gender is *the distinction* of objects, with regard to sex. There are four genders;—the *masculine*, the *feminine*, the *common*, and the *neuter*.”—*School Gram.*, 1st Ed., p. 49. [Those] “Nouns which are applicable *alike to both sexes*, are of the *common* gender.”—*Ib.* This then is manifestly no gender under the foregoing definition, and the term *neuter* is made somewhat less appropriate by the adoption of a third denomination before it. Nor is there less absurdity in the phraseology with which Murray proposes to avoid the recognition of the *common gender*: “Thus we may say, *Parents* is a noun of the *masculine and feminine* gender; *Parent*, if doubtful, is of the *masculine or feminine* gender; and *Parent*, if the gender is known by the construction, is of the gender so ascertained.”—*Gram.*, 8vo, p. 39. According to this, we must have *five genders*, exclusive of that which is called *common*; namely, the *masculine*, the *feminine*, the *neuter*, the *androgynal*, and the *doubtful*.

OBS. 4.—It is plain that many writers on grammar have had but a confused notion of what a gender really is. Some of them, confounding gender with sex, deny that there are more than two genders, because there are only two sexes. Others, under a like mistake, resort occasionally, (as in the foregoing instance,) to an *androgynal*, and also to a *doubtful* gender: both of which are more objectionable than the *common gender* of the old grammarians; though this *common* “distinction with regard to sex,” is, in our language, confessedly, no distinction at all. I assume, that there are in English the three genders, masculine, feminine, and neuter, and no more; and that every noun and every pronoun must needs be of some gender; consequently, of some one of these three. A gender is, literally, a sort, a kind, a sex. But genders, *in grammar*, are attributes of words, rather than of persons, or animals, or things; whereas sexes are attributes, not of words, but of living creatures. He who understands this, will perceive that the absence of sex in some things, is as good a basis for a grammatical distinction, as the presence or the difference of it in others; nor can it be denied, that the neuter, according to my definition, is a gender, is a distinction “in *regard* to sex,” though it does not embrace either of the sexes. There are therefore three genders, and only three.

OBS. 5.—Generic names, even when construed as masculine or feminine, often virtually include both sexes; as, “Hast thou given *the horse* strength? hast thou clothed *his* neck with thunder? Canst thou make *him* afraid as a grasshopper? the glory of *his* nostrils is terrible.”—*Job*, xxxix, 19. “Doth *the hawk* fly by thy wisdom, and stretch *her* wings toward the south? Doth *the eagle* mount up at thy command, and make *her* nest on high?”—*Ib.*, ver. 26. These were called, by the old grammarians, *epicene* nouns—that is,

*supercommon*; but they are to be parsed each according to the gender of the pronoun which is put for it.

OBS. 6.—The gender of words, in many instances, is to be determined by the following principle of universal grammar. Those terms which are equally applicable to both sexes, (if they are not expressly applied to females,) and those plurals which are known to include both sexes, should be called masculine in parsing; for, in all languages, the masculine gender is considered the most worthy,\* and is generally employed when both sexes are included under one common term. Thus *parents* is always masculine, and must be represented by a masculine pronoun, for the gender of a word is a property indivisible, and that which refers to the male sex, always takes the lead in such cases. If one say, “Joseph took *the young child and his mother* by night, and fled with *them* into Egypt,” the pronoun *them* will be masculine; but let “*his*” be changed to *its*, and the plural pronoun that follows, will be feminine. For the feminine gender takes precedence of the neuter, but not of the masculine; and it is not improper to speak of a young child without designating the sex. As for such singulars as *parent, friend, neighbour, thief, slave*, and many others, they are feminine when expressly applied to any of the female sex; but otherwise, masculine.

OBS. 7.—Nouns of multitude, when they convey the idea of unity or take the plural form, are of the neuter gender; but when they convey the idea of plurality without the form, they follow the gender of the individuals which compose the assemblage. Thus a *congress*, a *council*, a *committee*, a *jury*, a *sort*, or a *sex*, if taken collectively, is neuter; being represented in discourse by the neuter pronoun *it*: and the formal plurals, *congresses, councils, committees, juries, sorts, sexes*, of course, are neuter also. But, if I say, “The committee disgraced *themselves*,” the noun and pronoun are presumed to be masculine, unless it be known that I am speaking of a committee of females. Again: “The *fair sex, whose* task is not to mingle in the labours of public life, have *their* own part assigned *them* to act.”—*Comly’s Gram.*, p. 132. Here *sex*, and the three pronouns which have that word for their antecedent, are all feminine. Again: “*Each sex, dressing themselves* in the clothes of the other.”—*Wood’s Dictionary*, v. *Feast of Purim*. Here *sex*, and the pronoun which follows, are masculine; because, the male sex, as well as the female, is here spoken of plurally.

OBS. 8.—To *persons*, of every description, known or unknown, real or imaginary, we uniformly ascribe sex.† But, as personality implies intelligence, and sex supposes some obvious difference, a *young child* may be spoken of with distinction of sex or without, according to the notion of the speaker; as, “I went to see the *child* whilst they were putting on *its cloaths*.”—*Priestley’s Gram.*, p. 125. “Because the *child* has no idea of any nurse besides *his* own.”—*Ib.*, p. 153. To *brute animals* also, the same distinction is generally

---

\* “The Supreme Being (*God, Θεός, Deus, Dieu*, &c.) is, in all languages, masculine; in as much as the masculine sex is the superior and more excellent; and as He is the Creator of all, the Father of gods and men.”—*Harris’s Hermes*, p. 54. This remark applies to all the direct names of the Deity, but the abstract idea of *Deity itself*, Τὸ Θεῖον, *Numen, Godhead, or Divinity*, is not masculine, but neuter. On this point, some notions have been published for grammar, that are too heterodox to be cited or criticised here. See *O. B. Peirce’s Gram.*, p. 208.

† That is, we give them sex, if we mean to represent them *as* persons. In the following example, a character commonly esteemed feminine is represented as neuter, because the author would seem to doubt both the sex and the personality: “I don’t know what a *witch* is, or what *it* was then.”—*N. P. Rogers’s Writings*, p. 154.

applied, though with less uniformity. Some that are very small, have a gender which seems to be merely occasional and figurative; as, “Go to the *ant*, thou sluggard; consider *her* ways, and be wise.”—*Prov.*, vi, 6. “The *spider* taketh hold with *her* hands, and is in kings’ palaces.”—*Prov.*, xxx, 28. So the *bee* is usually made feminine, being a little creature of admirable industry and economy. But, in general, irrational creatures whose sex is unknown, or unnecessary to be regarded, are spoken of as neuter; as, “And it became a *serpent*; and Moses fled from before *it*. And the Lord said unto Moses, Put forth thine hand, and take *it* by the tail. And he put forth his hand and caught *it*, and *it* became a rod in his hand.”—*Exod.*, iv, 3, 4. Here, although the word *serpent* is sometimes masculine, the neuter pronoun seems to be more proper. So of some imaginary creatures: as, “*Phenix*, the fowl which is said to exist single, and to rise again from *its* own ashes.”—*Webster’s Dict.* “So shall the *Phoenix* escape, with no stain on *its* plumage.”—*Dr. Bartlett’s Lect.*, p. 10.

OBS. 9.—But this liberty of representing animals as of no sex, is often carried to a very questionable extent; as, “The *hare* sleeps with *its* eyes open.”—*Barbault*. “The *hedgehog*, as soon as *it* perceives *itself* attacked, rolls *itself* into a kind of ball, and presents nothing but *its* prickles to the foe.”—*Blair’s Reader*, p. 138. “The *panther* is a ferocious creature: like the tiger *it* seizes *its* prey by surprise.”—*Ib.*, p. 102. “The *leopard*, in *its* chace of prey, spares neither man nor beast.”—*Ib.*, p. 103. “If a man shall steal an *ox*, or a *sheep*, and kill *it*, or sell *it*.”—*Exod.*, xxii, 1. “A *dog* resists *its* instinct to run after a hare, because *it* recollects the beating *it* has previously received on that account. The *horse* avoids the stone at which *it* once has stumbled.”—*Spurzheim, on Education*, p. 3. “The *racehorse* is looked upon with pleasure; but it is the *warhorse*, that carries grandeur in *its* idea.”—*Blair’s Rhet.*, p. 30.

OBS. 10.—The sexes are distinguished *by words*, in four different ways. First, by the use of different terminations: as, *Jew*, *Jewess*; *Julius*, *Julia*; *hero*, *heroine*. Secondly, by the use of entirely different names: as, *Henry*, *Mary*; *king*, *queen*. Thirdly, by compounds or phrases including some distinctive term: as, *Mr. Murray*, *Mrs. Murray*; *Englishman*, *Englishwoman*; *grandfather*, *grandmother*; *landlord*, *landlady*; *merman*, *mermaid*; *servingman*, *servingmaid*; *man-servant*, *maid-servant*; *schoolmaster*, *schoolmistress*; *school-boy*, *school-girl*; *peacock*, *peahen*; *cock-sparrow*, *hen-sparrow*; *he-goat*, *she-goat*; *buck-rabbit*, *doe-rabbit*; *male elephant*, *female elephant*; *male convicts*, *female convicts*. Fourthly, by the pronouns *he*, *his*, *him*, put for nouns masculine; and *she*, *her*, *hers*, for nouns feminine: as, “Ask *him* that fleeth, and *her* that escapeth, and say, What is done?”—*Jer.*, xlviii, 19.

“O happy *peasant*! Oh unhappy *bard*!

*His* the mere tinsel, *hers* the rich reward.”—*Cowper*.

OBS. 11.—For feminine nouns formed by inflection, the regular termination is *ess*; but the manner in which this ending is applied to the original or masculine noun, is not uniform:—

1. In some instances the syllable *ess* is simply added: as, *accuser*, *accuseress*; *advocate*, *advocatess*; *archer*, *archeress*; *author*, *authoress*; *avenger*, *avengeress*; *barber*,

*barberess; baron, baroness; canon, canoness; cit, cittess;\* coheir, coheiress; count, countess; deacon, deaconess; demon, demoness; diviner, divineress; doctor, doctress; giant, giantess; god, goddess; guardian, guardianess; Hebrew, Hebrewess; heir, heiress; herd, herdess; hermit, hermitess; host, hostess; Jesuit, Jesuitess; Jew, Jewess; mayor, mayoress; Moabite, Moabites; monarch, monarchess; pape, papess; or, pope, popess; patron, patroness; peer, peeress; poet, poetess; priest, priestess; prior, prioress; prophet, prophetess; regent, regentess; saint, saintess; shepherd, shepherdess; soldier, soldieress; tailor, tailoress; viscount, viscountess; warrior, warrioress.*

2. In other instances, the termination is changed, and there is no increase of syllables: as, *abbot, abbess; actor, actress; adulator, adulatress; adulterer, adulteress; adventurer, adventuress; advouter, advoutress; ambassador, ambassadress; anchorite, anchoress; or, anchoret, anchoress; arbiter, arbitress; auditor, auditress; benefactor, benefactress; caterer, cateress; chanter, chantress; cloisterer, cloisteress; commander, commandress; conductor, conductress; creator, creatress; demander, demandress; detractor, detractress; eagle, eagless; editor, editress; elector, electress; emperor, emperess, or empress; emulator, emulatress; enchanter, enchantriss; exactor, exactress; fautor, fautress; fornicator, fornicatress; fosterer, fosteress, or fostress; founder, foundress; governor, governess; huckster, huckstress; or, hucksterer, hucksteress; idolater, idolatress; inhabiter, inhabitress; instructor, instructress; inventor, inventress; launderer, launderess, or laundress; minister, ministress; monitor, monitress; murderer, murderess; negro, negress; offender, offendress; ogre, ogress; porter, portress; progenitor, progenitress; protector, protectress; proprietor, proprietress; pythonist, pythoness; seamster, seamstress; solicitor, solicitress; songster, songstress; sorcerer, sorceress; suitor, suitress; tiger, tigress; traitor, traitress; victor, victress; votary, votaress.*
3. In a few instances the feminine is formed as in Latin, by changing *or* to *rix*; but some of these have also the regular form, which ought to be preferred: as, *adjutor, adjutrix; administrator, administratrix; arbitrator, arbitrix; coadjutor, coadjutrix; competitor, competitress, or competitrix; creditor, creditrix; director, directress, or directrix; executor, executress, or executrix; inheritor, inheritress, or inheritrix; mediator, mediatress, or mediatrix; orator, oratress, or oratrix; rector, rectress, or rectrix; spectator, spectatress, or spectatrix; testator, testatrix; tutor, tutoress, or tutress, or tutrix; deserter, desertress, or desertrice, or desertrix.*
4. The following are irregular words, in which the distinction of sex is chiefly made by the termination: *amoroſo, amoroſa: archduke, archducheſſ; chamberlain, chambermaid; duke, duchess; gaffer, gammer; goodman, goody; hero, heroine; landgrave, landgravine; margrave, margravine; marquis, marchioness; palsgrave, palsgravine; sakeret, sakerhawk; sewer, ſewſter; ſultan, ſultana; tzar, tzarina; tyrant, tyranness; widower, widow.*

OBS. 12.—The proper names of persons almost always designate their sex; for it has been found convenient to make the names of women different from those of men. We have also some appellatives which correspond to each other, distinguishing the sexes by their distinct application to each: as, *bachelor, maid; beau, belle; boy, girl; bridegroom, bride; brother, sister; buck, doe; boar, sow; bull, cow; cock, hen; colt, filly; dog, bitch; drake, duck;*

\* There is the same reason for doubling the *t* in *cittess*, as for doubling the *d* in *goddess*. See Rule 3d for Spelling. Yet Johnson, Todd, Webster, Bolles, Worcester, and others, spell it *citess*, with one *t*.

“Cits and *citesses* raise a joyful strain.”—DRYDEN: *Joh. Dict.*

*earl, countess; father, mother, friar, nun; gander, goose; grandsire, grandam; hart, roe; horse, mare; husband, wife; king, queen; lad, lass; lord, lady; male, female; man, woman; master, mistress; Mister, Missis; (Mr., Mrs.;) milter, spawner; monk, nun; nephew, niece; papa, mamma; rake, jilt; ram, ewe; ruff, reeve; sire, dam; sir, madam; sloven, slut; son, daughter; stag, hind; steer, heifer; swain, nymph; uncle, aunt; wizard, witch; youth, damsel; young man, maiden.*

OBS. 13.—The people of a particular country are commonly distinguished by some name derived from that of their country; as, *Americans, Africans, Egyptians, Russians, Turks*. Such words are sometimes called *gentile names*. There are also adjectives, of the same origin, if not the same form, which correspond with them. “Gentile names are for the most part considered as masculine, and the feminine is denoted by the gentile adjective and the noun *woman*: as, a *Spaniard*, a *Spanish woman*; a *Pole*, or *Polander*, a *Polish woman*. But, in a few instances, we always use a compound of the adjective with *man* or *woman*: as, an *Englishman*, an *Englishwoman*; a *Welshman*, a *Welshwoman*; an *Irishman*, an *Irishwoman*; a *Frenchman*, a *Frenchwoman*; a *Dutchman*, a *Dutchwoman*: and in these cases the adjective is employed as the collective noun; as, *the Dutch, the French*, &c. A *Scotchman*, and a *Scot*, are both in use; but the latter is not common in prose writers: though some employ it, and these generally adopt the plural, *Scots*, with the definite article, as the collective term.”—*Churchill’s New Gram.*, p. 70.

OBS. 14.—The names of things without life, used literally, are always of the neuter gender: as, “When Cleopatra fled, Antony pursued her in a five-oared galley; and, coming along side of her *ship*, entered *it* without being seen by her.”—*Goldsmith’s Rome*, p. 160. “The *sun*, high as *it* is, has *its* business assigned; and so have the stars.”—*Collier’s Antoninus*, p. 138. But inanimate objects are often represented figuratively as having sex. Things remarkable for power, greatness, or sublimity, are spoken of as masculine; as, the *sun, time, death, sleep, fear, anger, winter, war*. Things beautiful, amiable, or prolific, are spoken of as feminine; as, a *ship*, the *moon*, the *earth, nature, fortune, knowledge, hope, spring, peace*. Figurative gender is indicated only by the personal pronouns of the singular number: as, “When we say of the *sun*, *He* is setting; or of a *ship*, *She* sails well.”—*L. Murray*. For these two objects, the *sun* and a *ship*, this phraseology is so common, that the literal construction quoted above is rarely met with.

OBS. 15.—When any inanimate object or abstract quality is distinctly personified, and presented to the imagination in the character of a living and intelligent being, there is necessarily a change of the gender of the word; for, whenever personality is thus ascribed to what is literally neuter, there must be an assumption of one or the other sex: as, “*The Genius of Liberty* is awakened, and springs up; *she* sheds her divine light and creative powers upon the two hemispheres. A great *nation*, astonished at seeing *herself* free, stretches *her* arms from one extremity of the earth to the other, and embraces the first nation that became so.”—*Abbé Fauchet*. But there is an inferior kind of personification, or of what is called such, in which, so far as appears, the gender remains neuter: as, “The following is an instance of personification and apostrophe united: ‘O *thou sword* of the Lord! how long will it be ere *thou* be quiet? put *thyself* up into *thy* scabbard, rest, and be still! How can *it* be quiet, seeing the Lord hath given *it* a charge against Askelon, and against the sea-shore? there hath he appointed *it*.’”—*Murray’s Gram.*, p. 348. See *Jer.*, xlvii, 6.

OBS. 16.—If what is called personification, does not always imply a change of gender and an ascription of sex, neither does a mere ascription of sex to what is literally of no sex, necessarily imply a personification; for there may be sex without personality, as we see in brute animals. Hence the gender of a brute animal personified in a fable, may be taken literally as before; and the gender which is figuratively ascribed to the *sun*, the *moon*, or a *ship*, is merely metaphorical. In the following sentence, *nature* is animated and made feminine by a metaphor, while a lifeless object bearing the name of *Venus*, is spoken of as neuter: “Like that conceit of old, which declared that the *Venus of Gnidos* was not the work of Praxiteles, since *nature herself* had concreted the boundary surface of *its* beauty.”—*Rush, on the Voice*, p. xxv.

OBS. 17.—“In personifications regard must be had to propriety in determining the gender. Of most of the passions and moral qualities of man the ancients formed deities, as they did of various other things: and, when these are personified, they are usually made male or female, according as they were gods or goddesses in the pagan mythology. The same rule applies in other cases: and thus the planet Jupiter will be masculine; Venus, feminine: the ocean, *Oceānus*, masculine: rivers, months, and winds, the same: the names of places, countries, and islands, feminine.”—*Churchill's Gram.*, p. 71.

OBS. 18.—These suggestions are worthy of consideration, but, for the gender which ought to be adopted in personifications, there seems to be no absolute general rule, or none which English writers have observed with much uniformity. It is well, however, to consider what is most common in each particular case, and abide by it. In the following examples, the sex ascribed is not that under which these several objects are commonly figured; for which reason, the sentences are perhaps erroneous:—

“*Knowledge* is proud that *he* has learn'd so much;  
*Wisdom* is humble that *he* knows no more.”—*Cowper*.

“But hoary *Winter*, unadorned and bare,  
Dwells in the dire retreat, and freezes there;  
There *she* assembles all her blackest storms,  
And the rude hail in rattling tempests forms.”—*Addison*.

“*Her* pow'r extends o'er all things that have breath,  
A cruel tyrant, and *her* name is *Death*.”—*Sheffield*.

### CASES.

Cases, in grammar, are modifications that distinguish the relations of nouns or pronouns to other words.

There are three cases; the *nominative*, the *possessive*, and the *objective*.

The *nominative case* is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb: as, The *boy* runs; *I* run.

The subject of a finite verb is that which answers to *who* or *what* before it; as, “The boy runs.”—*Who* runs? “The *boy*.” *Boy* is therefore here in the *nominative* case.

The *possessive case* is that form or state of a noun or pronoun, which usually denotes the relation of property: as, The *boy's* hat; *my* hat.

The possessive case of nouns is formed, in the singular number, by adding to the nominative *s preceded by an apostrophe*; and, in the plural, when the nominative ends in *s*, by adding *an apostrophe only*: as, singular, *boy's*; plural, *boys'*;—sounded alike, but written differently.

The *objective case* is that form or state of a noun or pronoun which usually denotes the object of a verb, participle, or preposition: as, I know the *boy*, having seen *him* at *school*; and he knows *me*.

The object of a verb, participle, or preposition, is that which answers to *whom* or *what* after it; as, “I know the boy.”—I know *whom*? “The *boy*.” *Boy* is therefore here in the *objective* case.

The nominative and the objective of nouns, are always alike in form, being distinguishable from each other only by their place in a sentence, or by their simple dependence according to the sense.

### OBSERVATIONS.

OBS. 1.—The cases, in grammar, are founded on the different relations under which things are represented in discourse; and from which the words acquire correspondent relations; or connexions and dependences according to the sense. In Latin, there are six cases; and in Greek, five. Consequently, the nouns and pronouns of those languages, and also their adjectives and participles, (which last are still farther inflected by the three genders,) are varied by many different terminations unknown to our tongue. In English, those modifications or relations which we call cases, belong only to nouns and pronouns; nor are there ever more than three. Pronouns are not necessarily like their antecedents in case.

OBS. 2.—Because the infinitive mood, a phrase, or a sentence, may in some instances be made the subject of a verb, so as to stand in that relation in which the nominative case is most commonly found; very many of our grammarians have deliberately represented all terms used in this manner, as being “*in the nominative case*,” as if, to sustain any one of the relations which are usually distinguished by a particular case, must necessarily constitute that modification itself. Many also will have participles, infinitives, phrases, and sentences, to be occasionally “*in the objective case*,” whereas it must be plain to every reader, that they are, all of them, *indeclinable* terms; and that, if used in any relation common to nouns or pronouns, they assume that office, as participles, as infinitives, as phrases, or as sentences, and not as *cases*. They no more take the nature of cases, than they become nouns or pronouns. Yet Nixon, by assuming that *of*, with the word governed by it, constitutes a *possessive case*, contrives to give to participles, and even to the infinitive mood, *all three of the cases*. Of the infinitive, he says, “An examination of the first and second methods of parsing this mood, must naturally lead to the inference that *it is a substantive*; and that, if it has the nominative case, it must also have the possessive and objective cases of a substantive. The fourth method proves its [capacity of] being in the possessive case: thus, ‘A desire *to learn*,’ that is, ‘*of learning*.’ When it follows a participle, or a verb, as by the fifth or [the] seventh method, it is in the objective case. Method sixth is analogous to the Case Absolute of a substantive.”—*Nixon's Parser*, p. 83. If the infinitive mood is really a *declinable substantive*, none of our grammarians have placed it in the right chapter; except that bold contemner of all grammatical and literary authority, Oliver B. Peirce. When will the cause of learning cease to have assailants and

underminers among those who profess to serve it? Thus every new grammarist, has some grand absurdity or other, peculiar to himself; and what can be more gross, than to talk of English infinitives and participles as being in the *possessive case*?

OBS. 3.—It was long a subject of dispute among the grammarians, what number of cases an English noun should be supposed to have. Some, taking the Latin language for their model, and turning certain phrases into cases to fill up the deficits, were for having *six* in each number; namely, the nominative, the genitive, the dative, the accusative, the vocative, and the ablative. Others, contending that a case in grammar could be nothing else than a terminational inflection, and observing that English nouns have but one case that differs from the nominative in form, denied that there were more than two, the nominative and the possessive. This was certainly an important question, touching a fundamental principle of our grammar; and any erroneous opinion concerning it, might well go far to condemn the book that avouched it. Every intelligent teacher must see this. For what sense could be made of parsing, without supposing an objective case to nouns? or what propriety could there be in making the words, *of*, and *to*, and *from*, govern or compose three different cases? Again, with what truth can it be said, that nouns have *no cases* in English? or what reason can be assigned for making more than three?

OBS. 4.—Public opinion is now clear in the decision, that it is *expedient* to assign to English nouns three cases, and no more; and, in a matter of this kind, what is expedient for the purpose of instruction, is right. Yet, from the works of our grammarians, may be quoted every conceivable notion, right or wrong, upon this point. Cardell, with Tooke and Gilchrist on his side, contends that English nouns have *no cases*. Brightland averred that they have neither cases nor genders.\* Buchanan, and the author of the old British Grammar, assigned to them *one* case only, the possessive, or genitive. Dr. Adam also says, “In English, nouns have *only one case*, namely, the genitive, or possessive case.”—*Latin and Eng. Gram.*, p. 7. W. B. Fowle has two cases, but rejects the word *case*: “We use the simple term *agent* for a *noun that acts*, and *object* for the object of an action.”—*Fowle’s True Eng. Gram.*, Part II, p. 68. Spencer too discards the word *case*, preferring “*form*,” that he may merge in one the nominative and the objective, giving to nouns *two* cases, but neither of these. “Nouns have *two Forms*, called the *Simple* and [the] *Possessive*.”—*Spencer’s E. Gram.*, p. 30. Webber’s Grammar, published at Cambridge in 1832, recognizes but *two* cases of nouns, declaring the objective to be “altogether superfluous.”—P. 22. “Our substantives have no more cases than two.”—*Jamieson’s Rhet.*, p. 14. “A Substantive doth not properly admit of more than two cases: the Nominative, and the Genitive.”—*Ellen Devis’s Gram.*, p. 19. Dr. Webster, in his Philosophical Grammar, of 1807, and in his Improved Grammar, of 1831, teaches the same doctrine, but less positively. This assumption has also had the support of Lowth, Johnson, Priestley, Ash, Bicknell, Fisher, Dalton, and our celebrated Lindley Murray.† In Child’s or Latham’s

\* “But in the *English* we have *no Genders*, as has been seen in the foregoing Notes. The same may be said of *Cases*.”—*Brightland’s Gram.*, Seventh Edition, Lond., 1746, p. 85.

† The Rev. David Blair so palpably contradicts himself in respect to this matter, that I know not which he favours most, two cases or three. In his main text, he adopts no objective, but says: “According to the *sense* or *relation* in which nouns are used, they are in the NOMINATIVE or [the] POSSESSIVE CASE, thus, *nom.* man; *poss.* man’s.” To this he adds the following marginal note: “In the English language, the distinction of the objective case is observable only in the pronouns. *Cases* being nothing but *inflections*, where inflections do not exist, there can be no grammatical distinction of cases, for the terms *inflection* and *case* are *perfectly synonymous* and *convertible*. As the English noun has *only one change* of termination, *so no other case* is here adopted. The *objective* case is noticed in the *pronouns*; and *in parsing nouns* it is easy to distinguish

English Grammar, 1852, it is said, “The cases in the present English are three:—1. Nominative; 2. Objective; 3. Possessive.” But this seems to be meant of pronouns only; for the next section affirms, “The *substantives* in English *have only two* out of the three cases.”—See pp. 79 and 80. Reckless of the current usage of grammarians, and even of self-consistency, both author and reviser will have no objective case of nouns, because this is like the nominative; yet, finding an objective set after “the adjective *like*,” they will recognize it as “*a dative* still existing in English!”—See p. 156. Thus do they forsake their own enumeration of cases, as they had before, in all their declensions, forsaken the new order in which they had at first so carefully set them!

OBS. 5.—For the *true* doctrine of *three* cases, we have the authority of Murray, in his later editions; of Webster, in his “Plain and Comp. Grammar, grounded on *True Principles*,” 1790; also in his “Rudiments of English Grammar,” 1811; together with the united authority of Adams, Ainsworth, Alden, Alger, Bacon, Barnard, Bingham, Burr, Bullions, Butler, Churchill, Chandler, Cobbett, Cobbin, Comly, Cooper, Crombie, Davenport, Davis, Fisk, A. Flint, Frost, Guy, Hart, Hiley, Hull, Ingersoll, Jaudon, Kirkham, Lennie, Mack, M’Culloch, Maunder, Merchant, Nixon, Nutting, John Peirce, Perley, Picket, Russell, Smart, R. C. Smith, Rev. T. Smith, Wilcox, and I know not how many others.

OBS. 6.—Dearborn, in 1795, recognized *four* cases: “the nominative, the possessive, the objective, and the absolute.”—*Columbian Gram.*, pp. 16 and 20. Charles Bucke, in his work misnamed “A Classical Grammar of the English Language,” published in London in 1829, asserts, that, “Substantives in English do not vary their terminations;” yet he gives them *four* cases; “the nominative, the genitive, the accusative, and the vocative.” So did Allen, in a grammar much more classical, dated, London, 1813. Hazen, in 1842, adopted “four cases; namely, the nominative, the possessive, the objective, and the independent.”—*Hazen’s Practical Gram.*, p. 35. Mulligan, since, has chosen these four: “Nominative, Genitive, Dative, Accusative.”—*Structure of E. Lang.*, p. 185. And yet his case after *to* or *for* is *not* “*dative*,” but “*accusative*!”—*Ib.*, p. 239. So too, Goodenow, of Maine, makes the cases four: “the *subjective*,\* the *possessive*, the *objective*, and the *absolute*.”—*Text-Book*, p. 31. Goldsbury, of Cambridge, has also four: “the Nominative, the Possessive, the Objective, and the Vocative.”—*Com. S. Gram.*, p. 13. Three other recent grammarians,—Wells, of Andover,—Weld, of Portland,—and Clark, of Bloomfield, N. Y.,—also adopt “*four* cases;—the *nominative*, the *possessive*, the *objective*, and the *independent*.”—*Wells’s Gram.*, p. 57; *Weld’s*, 60; *Clark’s*, 49. The first of these gentlemen argues, that, “Since a noun or

---

*subjects* from *objects*. A noun which *governs the verb* may be described as in the *nominative* case, and one governed by the verb, or following a preposition, as in the *objective* case.”—*Blair’s Practical Gram.*, Seventh Edition, London, 1815, p. 11. The terms *inflection* and *case* are not practically synonymous, and never were so in the grammars of the language from which they are derived. The man who rejects the objective case of English nouns, because it has not a form peculiar to itself alone, must reject the accusative and the vocative of all neuter nouns in Latin, for the same reason; and the ablative, too, must in general be discarded on the same principle. In some other parts of his book, Blair speaks of the objective case of nouns as familiarly as do other authors!

\* This author says, “We choose to use the term *subjective* rather than *nominative*, because it is shorter, and because it conveys its meaning by its sound, whereas the latter word means, indeed, little or nothing in itself.”—*Text-Book*, p. 88. This appears to me a foolish innovation, too much in the spirit of Oliver B. Peirce, who also adopts it. The person who knows not the meaning of the word *nominative*, will not be very likely to find out what is meant by *subjective*; especially as some learned grammarians, even such men as Dr. Crombie and Professor Bullions, often erroneously call the word which is governed by the verb its *subject*. Besides, if we say *subjective* and *objective*, in stead of *nominative* and *objective*, we shall inevitably change the accent of both, and give them a pronunciation hitherto unknown to the words.—G. BROWN.

pronoun, used *independently*, cannot at the same time be employed as ‘the subject of a verb,’ there is a manifest impropriety in regarding it as a *nominative*.” It might as well be urged, that a nominative after a verb, or in apposition with an other, is, for this reason, *not a nominative*. He also cites this argument: “Is there not as much difference between the *nominative* and [the] *independent* case, as there is between the *nominative* and [the] *objective*? If so, why class them together as *one* case?”—*S. R. Hall*.—*Wells’s School Gram.*, p. 51. To this I answer, No. “The nominative is that case which *primely denotes the name* of any person or thing;” (*Burn’s Gram.*, p. 36;) and *this only* it is, that can be absolute, or independent, in English. This scheme of four cases is, in fact, a grave innovation. As authority for it, Wells cites Felton; and bids his readers, “See also Kennion, Parkhurst, Fowle, Flint, Goodenow, Buck, Hazen, Goldsbury, Chapin, S. Alexander, and P. Smith.”—Page 57. But is the fourth case of these authors *the same* as his? Is it a case which “has usually the nominative form,” but admits occasionally of “*me*” and “*him*,” and embraces objective nouns of “*time, measure, distance, direction, or place*?” No. Certainly one half of them, and probably more, give little or no countenance to *such* an independent case as he has adopted. Parkhurst admitted but three cases; though he thought *two others* “might be an improvement.” What Fowle has said in support of Wells’s four cases, I have sought with diligence, and not found. Felton’s “independent case” is only what he absurdly calls, “*The noun or pronoun addressed*.”—Page 91. Bucke and Goldsbury acknowledge “*the nominative case absolute*,” and none of the twelve, so far as I know, admit any objective word, or what others call objective, to be independent or absolute, except perhaps Goldsbury.

OBS. 7.—*S. R. Hall*, formerly principal of the Seminary for Teachers at Andover, (but no great grammarian,) in 1832, published a manual, called “The Grammatical Assistant;” in which he says, “There are *at least five cases*, belonging to English nouns, differing as much from *each* other, as the cases of Latin and Greek nouns. They may be called Nominative, Possessive, Objective, Independent and Absolute.”—P. 7. O. B. Peirce will have both nouns and pronouns to be used in *five cases*, which he thus enumerates: “Four simple cases; the Subjective, Possessive, Objective, and the Independent; and the Twofold case.”—*Gram.*, p. 42. But, on page 56th, he speaks of a “twofold *subjective* case,” “the twofold *objective* case,” and shows how the *possessive* may be twofold also; so that, without taking any of the Latin cases, or even all of Hall’s, he really recognizes as many as seven, if not eight. Among the English grammars which assume all the *six cases* of the Latin Language, are Burn’s, Coar’s, Dilworth’s, Mackintosh’s, Mennye’s, Wm. Ward’s, and the “Comprehensive Grammar,” a respectable little book, published by Dobson of Philadelphia, in 1789, but written by somebody in England.

OBS. 8.—Of the English grammars which can properly be said to be *now in use*, a very great majority agree in ascribing to nouns three cases, and three only. This, I am persuaded, is the best number, and susceptible of the best defence, whether we appeal to authority, or to other argument. The disputes of grammarians make no small part of the *history of grammar*; and in submitting to be guided by their decisions, it is proper for us to consider what *degree of certainty* there is in the rule, and what difference or concurrence there is among them: for, the teaching of any other than the best opinions, is not the teaching of science, come from what quarter it may. On the question respecting the objective case of nouns, Murray and Webster *changed sides with each other*; and that, long after they first appeared as grammarians. Nor was this the only, or the most important instance, in which the different editions of the works of these two gentlemen, present them in opposition, both to themselves and to each other. “What cases are there

in English? The *nominative*, which usually stands before a verb; as, the *boy* writes: The *possessive*, which takes an *s* with a *comma*, and denotes property; as, *John's* hat: The *objective*, which follows a verb or preposition; as, he honors *virtue*, or it is an honor to *him*.”—*Webster's Plain and Comp. Gram.*, *Sixth Edition*, 1800, p. 9. “But for convenience, the two positions of nouns, one *before*, the other *after* the verb, are called *cases*. There are then three cases, the *nominative*, *possessive*, and *objective*.”—*Webster's Rudiments of Gram.*, 1811, p. 12. “In English therefore names have two cases only, the *nominative* or simple name, and the *possessive*.”—*Webster's Philosoph. Gram.*, 1807, p. 32: also his *Improved Gram.*, 1831, p. 24.

OBS. 9.—Murray altered his opinion after the tenth or eleventh edition of his duodecimo Grammar. His instructions stand thus: “In English, substantives have but two cases, the nominative, and [the] possessive or genitive.”—*Murray's Gram.* 12mo, *Second Edition*, 1796, p. 35. “For the assertion, that there are in English but two cases of nouns, and three of pronouns, we have the authority of Lowth, Johnson, Priestley, &c. *names which are sufficient* to decide this point.”—*Ib.*, p. 36. “In English, substantives have three cases, the nominative, the possessive, and the objective.”—*Murray's Gram.*, 12mo, *Twenty-third Edition*, 1816, p. 44. “The author of this work *long doubted* the propriety of assigning to English substantives an *objective case*: but a renewed critical examination of the subject; an examination to which he was prompted by the extensive and increasing demand for the grammar, has produced in his mind *a full persuasion*, that the nouns of our language are entitled to this comprehensive objective case.”—*Ib.*, p. 46. If there is any credit in changing one's opinions, it is, doubtless, in changing them for the better; but, of all authors, a grammarian has the most need critically to examine his subject before he goes to the printer. “This case was adopted in the *twelfth edition* of the Grammar.”—*Murray's Exercises*, 12mo, N. Y., 1818, p. viii.

OBS. 10.—The *possessive case* has occasioned no less dispute than the objective. On this vexed article of our grammar, custom has now become much more uniform than it was a century ago; and public opinion may be said to have settled most of the questions which have been agitated about it. Some individuals, however, are still dissatisfied. In the first place, against those who have thought otherwise, it is determined, by infinite odds of authority, that there *is such a case*, both of nouns and of pronouns. Many a common reader will wonder, who can have been ignorant enough to deny it. “The learned and sagacious Wallis, to whom every English grammarian owes a tribute of reverence, calls this modification of the noun an *adjective possessive*; I think, with no more propriety than he might have applied the same to the Latin genitive.”—*Dr. Johnson's Gram.*, p. 5. Brightland also, who gave to *adjectives* the name of *qualities*, included all possessives among them, calling them “*Possessive Qualities*, or *Qualities of Possession*.”—*Brightland's Gram.*, p. 90.

OBS. 11.—This exploded error, William S. Cardell, a few years ago, republished as a novelty; for which, among other pretended improvements of a like sort, he received the ephemeral praise of some of our modern literati. William B. Fowle also teaches the same thing. See his *Common School Gram.*, Part II, p. 104. In Felch's Grammar, too, published in Boston in 1837, an attempt is made, to revive this old doctrine; but the author takes no notice of any of the above-named authorities, being probably ignorant of them all. His

*reasoning* upon the point, does not appear to me to be worthy of a detailed answer.\* That the possessive case of nouns is not an adjective, is demonstrable; because it may have adjectives of various kinds, relating to it: as, “*This old man’s* daughter.”—*Shak*. It may also govern an other possessive; as, “*Peter’s wife’s* mother.”—*Bible*. Here the former possessive is governed by the latter; but, if both were adjectives, they would both relate to the noun *mother*, and so produce a confusion of ideas. Again, nouns of the possessive case have a distinction of number, which adjectives have not. In gender also, there lies a difference. Adjectives, whenever they are varied by gender or number, *agree with their nouns* in these respects. Not so with possessives; as, “In the *Jews’* religion.”—*Gal.*, i. 13. “The *children’s* bread.”—*Mark*, vii, 27. “Some *men’s* sins.”—1 *Tim.*, v, 24. “Other *men’s* sins.”—*Ib.*, ver. 22.

OBS. 12.—Secondly, general custom has clearly determined that the possessive case of *nouns* is always to be written *with an apostrophe*: except in those few instances in which it is not governed singly by the noun following, but so connected with an other that both are governed jointly; as, “*Cato the Censor’s* doctrine,”—“*Sir Walter Scott’s* Works,”—“*Beaumont and Fletcher’s* Plays.” This custom of using the apostrophe, however, has been opposed by many. Brightland, and Buchanan, and the author of the *British Grammar*, and some late writers in the *Philological Museum*, are among those who have successively taught, that the possessive case should be formed *like the nominative plural*, by adding *s* when the pronunciation admits the sound, and *es* when the word acquires an additional syllable. Some of these approve of the apostrophe, and others do not. Thus Brightland gives some examples, which are contrary to his rule, adopting that strange custom of putting the *s* in Roman, and the name in Italic; “as, King *Charles’s Court*, and St. *James’s Park*.”—*Gram. of the English Tongue*, p. 91.

OBS. 13.—“The genitive case, in my opinion,” says Dr. Ash, “might be much more properly formed by adding *s*, or when the pronunciation requires it, *es*, without an Apostrophe: as, *men, mens; Ox, Oxes; Horse, Horses; Ass, Asses*.”—*Ash’s Gram.*, p. 23. “To write *Ox’s, Ass’s, Fox’s*, and at the same time pronounce it *Oxes, Asses, Foxes*, is such a departure from the original formation, at least in writing, and such an inconsistent use of the Apostrophe, as cannot be equalled perhaps in any other language.”—*Ib.* Lowth, too, gives some countenance to this objection: “It [i.e., ‘*God’s grace*’] was formerly written ‘*Godis grace*,’ we now always shorten it with an apostrophe; often *very improperly*, when we are obliged to pronounce it fully; as, ‘*Thomas’s* book,’ that is, ‘*Thomasis* book,’ not

---

\* The authorities cited by Felch, for his doctrine of “*possessive adnouns*,” amount to nothing. They are ostensibly two. The first is a remark of Dr. Adam’s: “*John’s book* was formerly written *Johnis book*. Some have thought the ‘*s*’ a contraction of *his*, but improperly. Others have imagined, with more justness, that, by the addition of the ‘*s*,’ the substantive is changed into a possessive adjective.”—*Adam’s Latin and English Grammar*, p. 7.”—*Felch’s Comp. Gram.*, p. 26. Here Dr. Adam by no means concurs with what these “*others have imagined*,” for, in the very same place, he declares the possessive case of nouns to be their *only* case. The second is a dogmatical and inconsistent remark of some anonymous writer in some part of the “*American Journal of Education*,” a work respectable indeed, but, on the subject of grammar, too often fantastical and heterodox. Felch thinks it not improper, to use the possessive case before participles; in which situation, it denotes, not the owner of something, but the agent, subject, or recipient, of the action, being, or change. And what a jumble does he make, where he attempts to resolve this ungrammatical construction!—telling us, in almost the same breath, that, “The agent of a *nounal* verb [i. e. participle] is never expressed,” but that, “Sometimes it [the *nounal* or *gerundial* verb] is *qualified*, in its *nounal capacity*, by a possessive *adnoun* indicative *of its agent* as a verb; as, there is *nothing like one’s* BEING useful he doubted *their* HAVING it:” and then concluding, “*Hence it appears*, that the *present participle* may be used *as agent or object*, and yet retain its character as a verb.”—*Felch’s Comprehensive Gram.*, p. 81. Alas for the schools, if the wise men of the East receive for grammar such utter confusion, and palpable self-contradiction, as this!

‘*Thomas* his book,’ as it is commonly supposed.”—*Lowth’s Gram.*, p. 17. Whatever weight there may be in this argument, the objection has been overruled by general custom. The convenience of distinguishing, even to the eye alone, the numbers and cases of the noun, is found too great to be relinquished. If the declension of English nouns is ever to be amended, it cannot be done in this way. It is understood by every reader, that the *apostrophic s* adds a syllable to the noun, whenever it will not unite with the sound in which the nominative ends; as, *torch’s*, pronounced *torchiz*.

“Yet time ennobles or degrades each line;  
It brightened *Craggs’s*, and may darken thine.”—*Pope*.

OBS. 14.—The English possessive case unquestionably originated in that form of the Saxon genitive which terminates in *es*, examples of which may be found in almost any specimen of the Saxon tongue: as, “On *Herodes* dagum,”—“In *Herod’s* days;”—“Of *Aarones* dothrum,”—“Of *Aaron’s* daughters.”—*Luke*, i, 5. This ending was sometimes the same as that of the plural; and both were changed to *is* or *ys*, before they became what we now find them. This termination added a syllable to the word; and Lowth suggests, in the quotation above, that the apostrophe was introduced to shorten it. But some contend, that the use of this mark originated in a mistake. It appears from the testimony of Brightland, Johnson, Lowth, Priestley, and others, who have noticed the error in order to correct it, that an opinion was long entertained, that the termination ‘*s* was a contraction of the word *his*. It is certain that Addison thought so; for he expressly says it, in the 135th number of the *Spectator*. Accordingly he wrote, in lieu of the regular possessive, “My paper is *Ulysses his* bow.”—*Guardian*, No. 98. “Of *Socrates his* rules of prayer.”—*Spect.*, No. 207. So Lowth quotes Pope: “By *young Telemachus his* blooming years.”—*Lowth’s Gram.*, p. 17.\* There is also one late author who says, “The ‘*s* is a contraction of *his*, and was formerly written in full; as, William Russell *his* book.”—*Goodenow’s Gram.*, p. 32. This is undoubtedly bad English; and always was so, however common may have been the erroneous notion which gave rise to it. But the apostrophe, whatever may have been its origin, is now the acknowledged distinctive mark of the possessive case of English nouns. The application of the ‘*s*, frequently to feminines, and sometimes to plurals, is proof positive that it is *not a contraction* of the pronoun *his*; as,

“Now Jove suspends his golden scales in air,  
Weighs the *men’s* wits against the *Lady’s* hair.”—*Pope*, R. of L., C. v, l. 72.

OBS. 15.—Many of the old grammarians, and Guy, Pinneo, and Spencer, among the moderns, represent the regular formation of the possessive case as being the same in both numbers, supposing generally in the plural an abbreviation of the word by the omission of the second or syllabic *s*. That is, they suppose that such terms as *eagles’ wings*, *angels’ visits*, were written for *eagles’s wings*, *angels’s visits*, &c. This odd view of the matter accounts well enough for the fashion of such plurals as *men’s*, *women’s*, *children’s*, and makes them regular. But I find no evidence at all of the fact on which these authors presume; nor do I believe that the regular possessive plural was ever, in general, a syllable longer than the nominative. If it ever had been so, it would still be easy to prove the point,

\* A critic’s accuracy is sometimes liable to be brought into doubt, by subsequent alterations of the texts which, he quotes. Many an error cited in this volume of criticism, may possibly not be found in some future edition of the book referred to; as several of those which were pointed out by Lowth, have disappeared from the places named for them. Churchill also cites this line as above; (*New Gram.*, p. 214;) but, in my edition of the *Odyssey*, by Pope, the reading is this: “By *lov’d Telemachus’s* blooming years!”—Book xi, L 84.

by citations from ancient books. The general principle then is, that *the apostrophe forms the possessive case, with an s in the singular, and without it in the plural*; but there are some exceptions to this rule, on either hand; and these must be duly noticed.

OBS. 16.—The chief exceptions, or irregularities, in the formation of the possessive *singular*, are, I think, to be accounted mere poetic licenses; and seldom, if ever, to be allowed in prose. Churchill, (closely copying Lowth,) speaks of them thus: “In poetry the *s* is frequently omitted after proper names ending in *s* or *x* as, ‘The wrath of *Peleus*’ son.’ *Pope*. This is scarcely allowable in prose, though instances of it occur: as, ‘*Moses*’ minister.’ *Josh.*, i, 1. ‘*Phinehas*’ wife.’ 1 *Sam.*, iv, 19. ‘Festus came into *Felix*’ room.’ *Acts*, xxiv, 27. It was done in prose evidently to avoid the recurrence of a sibilant sound at the end of two following syllables; but this may as readily be obviated by using the preposition *of*, which is now commonly substituted for the possessive case in most instances.”—*Churchill’s New Gram.*, p. 215. In Scott’s Bible, Philadelphia, 1814, the texts here quoted are all of them corrected, thus: “*Moses’s* minister,”—“*Phinehas’s* wife,”—“*Felix’s* room.” But the phrase, “for *conscience* sake,” (*Rom.*, xiii, 5,) is there given without the apostrophe. Alger prints it, “for *conscience*’ sake,” which is better; and though not regular, it is a common form for this particular expression. Our common Bibles have this text: “And the weaned child shall put his hand on the *cockatrice*’ den.”—*Isaiah*, xi, 8. Alger, seeing this to be wrong, wrote it, “on the *cockatrice-den*.”—*Pronouncing Bible*. Dr. Scott, in his Reference Bible, makes this possessive regular, “on the *cockatrice’s* den.” This is right. The Vulgate has it, “*in caverna reguli*,” which, however, is not classic Latin. After *z* also, the poets sometimes drop the *s*: as,

“Sad was the hour, and luckless was the day,  
When first from *Shiraz*’ walls I bent my way.”—*Collins*.

OBS. 17.—A recent critic, who, I think, has not yet learned to speak or write the possessive case of *his own name* properly, assumes that the foregoing occasional or poetical forms are the only true ones for the possessive singular of such words. He says, “When the name *does end* with the sound of *s* or *z*, (no matter what letter represents the sound,) the possessive form *is made* by annexing only an apostrophe.”—*O. B. Peirce’s Gram.*, p. 44. Agreeably to this rule, he letters his work, “*Peirce*’ *Grammar*,” and condemns, as bad English, the following examples and all others like them: “James *Otis*’s letters, General *Gates*’s command, General *Knox*’s appointment, Gov. *Meigs*’s promptness, Mr. *Williams*’s oration, The *witness*’s deposition.”—*Ib.*, p. 60. It is obvious that this gentleman’s doctrine and criticism are as contrary to the common practice of all good authors, as they are to the common grammars, which he ridicules. Surely, such expressions as, “*Harris*’s Hermes, *Philips*’s Poems, *Prince*’s Bay, *Prince*’s Island, *Fox*’s *Journal*, King *James*’s edict, a *justice*’s warrant, *Sphinx*’s riddle, the *lynx*’s beam, the *lass*’s beauty,” have authority enough to refute the cavil of this writer; who, being himself wrong, falsely charges the older grammarians, that, “their theories vary from the principles of the language correctly spoken or written.”—*Ib.*, p. 60. A much more judicious author treats this point of grammar as follows: “When the possessive noun is singular, and terminates with an *s*, another *s* is requisite after it, and the apostrophe must be placed between the two; as, ‘*Dickens*’s works,’—‘*Harris*’s wit.’”—*Day’s Punctuation, Third London Edition*, p. 136. The following example, too, is right: “I would not yield to be your *house*’s guest.”—*Shakespeare*.

OBS. 18.—All *plural* nouns that differ from the singular without ending in *s*, form the possessive case in the same manner as the singular: as, *man's*, *men's*; *woman's*, *women's* *j child's*, *children's*; *brother's*, *brothers' or brethren's*; *ox's*, *oxen's*; *goose*, *geese's*. In two or three words which are otherwise alike in both numbers, the apostrophe ought to follow the *s* in the plural, to distinguish it from the singular: as, the *sheep's* fleece, the *sheeps'* fleeces; a *neat's* tongue, *neats'* tongues; a *deer's* horns, a load of *deers'* horns.

OBS. 19.—Dr. Ash says, “Nouns of the plural number that end in *s*, will not very properly admit of the genitive case.”—*Ash's Gram.*, p. 54. And Dr. Priestley appears to have been of the same opinion. See his *Gram.*, p. 69. Lowth too avers, that the sign of the possessive case is “never added to the plural number ending in *s*.”—*Gram.*, p. 18. Perhaps he thought the plural sign must involve an other *s*, like the singular. This however is not true, neither is Dr. Ash's assertion true; for the New Testament speaks as properly of “the *soldiers'* counsel,” as of the “*centurion's* servant;” of “the scribes that were of the *Pharisees'* part,” as of “*Paul's sister's* son.” It would appear, however, that the possessive plural is less frequently used than the possessive singular; its place being much oftener supplied by the preposition *of* and the objective. We cannot say that either of them is absolutely necessary to the language; but they are both worthy to be commended, as furnishing an agreeable variety of expression.

“Then shall *man's* pride and dulness comprehend  
His *actions'*, *passions'*, *being's* use and end.”—*Pope*.

OBS. 20.—The apostrophe was introduced into the possessive case, at least for the singular number, in some part of the seventeenth century. Its adoption for the plural, appears to have been later: it is not much used in books a hundred years old. In Buchanan's “Regular English Syntax,” which was written, I know not exactly when, but near the middle of the eighteenth century, I find the following paragraph: “We have certainly a Genitive Plural, though there has been no Mark to distinguish it. The Warriors Arms, i. e. the Arms of the Warriors, is as much a Genitive Plural, as the Warrior's Arms, for the Arms of the Warrior is a Genitive Singular. To distinguish this Genitive Plural, especially to Foreigners, we might use the Apostrophe reversed, thus, the Warrior`s Arms, the Stone`s End, for the End of the Stones, the Grocer`s, Taylor`s, Haberdasher`s, &c. Company; for the Company of Grocers, Taylors, &c. The Surgeon`s Hall, for the Hall of the Surgeons; the Rider`s Names, for the Names of the Riders; and so of all Plural Possessives.”—See *Buchan. Synt.*, p. 111. Our present form of the possessive plural, being unknown to this grammarian, must have had a later origin; nor can it have been, as some imagine it was, an abbreviation of a longer and more ancient form.

OBS. 21.—The apostrophic *s* has often been added to nouns *improperly*; the words formed by it not being intended for the possessive singular, but for the nominative or objective plural. Thus we find such authors as Addison and Swift, writing *Jacobus's* and *genius's*, for *Jacobuses* and *geniuses*; *idea's*, *toga's*, and *tunica's*, for *ideas*, *togas*, and *tunicas*; *enamorado's* and *virtuoso's*, for *enamoratoes* and *virtuosoos*. Errors of this kind, should be carefully avoided.

OBS. 22.—The apostrophe and *s* are sometimes added to mere characters, to denote plurality, and not the possessive case; as, two *a's*, three *b's*, four *9's*. These we cannot avoid, except by using the *names* of the things: as, two *Aes*, three *Bees*, four *Nines*. “Laced down the sides with little *c's*.”—*Steele*. “Whenever two *gg's* come together, they are both

hard.”—*Buchanan*. The names of *c* and *g*, plural, are *Cees* and *Gees*. Did these authors *know* the words, or did they not? To have learned the *names* of the letters, will be found on many occasions a great convenience, especially to critics. For example: “The pronunciation of these two consecutive *s’s* is hard.”—*Webber’s Gram.*, p. 21. Better: “*Esses*.” “*S* and *x*, however, are exceptions. They are pluralized by adding *es* preceded by a hyphen [-], as the *s-es*; the *x-es*.”—*O. B. Peirce’s Gram.*, p. 40. Better, use the *names*, *Ess* and *Ex*, and pluralize thus: “the *Esses*; the *Exes*.”

“Make Q’s of answers, to waylay

What th’ other party’s like to say.”—*Hudibras*, P. III, C. ii, l. 951.

Here the cipher is to be read *Kues*, but it has not the meaning of this name merely. It is put either for the plural of *Q.*, a *Question*, like D. D.’s, (read *Dee-Dees*,) for *Doctors of Divinity*; or else, more erroneously, for *cues*, the plural of *cue*, a turn which the next speaker catches.

OBS. 23.—In the following example, the apostrophe and *s* are used to give the sound of a *verb’s* termination, to words which the writer supposed were not properly verbs: “When a man in a soliloquy reasons with himself, and *pro’s* and *con’s*, and weighs all his designs.”—*Congreve*. But here, “*proes* and *cons*,” would have been more accurate. “We put the ordered number of *m’s* into our composing-stick.”—*Printer’s Gram.* Here “*Ems*” would have done as well. “All measures for *folio’s* and *quarto’s*, should be made to *m’s* of the English body; all measures for *octavo’s*, to Pica *m’s*.”—*Ibid*. Here regularity requires, “*folios*, *quartoos*, *octavoos*,” and “*pica Ems*.” The verb *is*, when contracted, sometimes gives to its nominative the same form as that of the possessive case, it not being always spaced off for distinction, as it may be; as,

“A *wit’s* a feather, and a chief a rod;

An honest *man’s* the noblest work of God.”—*Pope*, *on Man*, Ep. iv, l. 247.

OBS. 24.—As the *objective case of nouns* is to be distinguished from the nominative, only by the sense, relation, and position, of words in a sentence, the learner must acquire a habit of attending to these several things. Nor ought it to be a hardship to any reader to understand that which he thinks worth reading. It is seldom possible to mistake one of these cases for the other, without a total misconception of the author’s meaning. The nominative denotes the agent, actor, or doer; the person or thing that is made the subject of an affirmation, negation, question, or supposition: its place, except in a question, is commonly *before* the verb. The objective, when governed by a verb or a participle, denotes the person on whom, or the thing on which, the action falls and terminates: it is commonly placed *after* the verb, participle, or preposition, which governs it. Nouns, then, by changing places, may change cases: as, “*Jonathan* loved *David*,” “*David* loved *Jonathan*.” Yet the case depends not entirely upon position; for any order in which the words cannot be misunderstood, is allowable: as, “Such tricks hath strong imagination.”—*Shak*. Here the cases are known, because the meaning is plainly this: “Strong imagination hath such tricks.” “To him give all the prophets witness.”—*Acts*, x, 43. This is intelligible enough, and more forcible than the same meaning expressed thus: “All the prophets give witness to him.” The *order* of the words never can affect the explanation to be given of them in parsing, unless it change the sense, and form them into a different sentence.

## THE DECLENSION OF NOUNS.

The declension of a noun is a regular arrangement of its numbers and cases. Thus:—

## EXAMPLE I.—FRIEND.

|       |       |           |       |       |           |
|-------|-------|-----------|-------|-------|-----------|
| Sing. | Nom.  | friend,   | Plur. | Nom.  | friends,  |
|       | Poss. | friend's, |       | Poss. | friends', |
|       | Obj.  | friend;   |       | Obj.  | friends.  |

## EXAMPLE II.—MAN.

|       |       |        |       |       |        |
|-------|-------|--------|-------|-------|--------|
| Sing. | Nom.  | man,   | Plur. | Nom.  | men,   |
|       | Poss. | man's, |       | Poss. | men's, |
|       | Obj.  | man;   |       | Obj.  | men.   |

## EXAMPLE III.—FOX.

|       |       |        |       |       |         |
|-------|-------|--------|-------|-------|---------|
| Sing. | Nom.  | fox,   | Plur. | Nom.  | foxes,  |
|       | Poss. | fox's, |       | Poss. | foxes', |
|       | Obj.  | ox;    |       | Obj.  | foxes.  |

## EXAMPLE IV.—FLY.

|       |       |        |       |       |         |
|-------|-------|--------|-------|-------|---------|
| Sing. | Nom.  | fly,   | Plur. | Nom.  | flies,  |
|       | Poss. | fly's, |       | Poss. | flies', |
|       | Obj.  | fly;   |       | Obj.  | flies.  |

## EXAMPLES FOR PARSING.

## PRAXIS III.—ETYMOLOGICAL.

*In the Third Praxis, it is required of the pupil—to distinguish and define the different parts of speech, and the classes and modifications of the ARTICLES and NOUNS.*

*The definitions to be given in the Third Praxis, are two for an article, six for a noun, and one for an adjective, a pronoun, a verb, a participle, an adverb, a conjunction, a preposition, or an interjection. Thus:—*

## EXAMPLE PARSED.

“The writings of Hannah More appear to me more praiseworthy than Scott’s.”

*The* is the definite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The definite article is *the*, which denotes some particular thing or things.

*Writings* is a common noun, of the third person, plural number, neuter gender, and nominative case. 1. A noun is the name of any person, place, or thing, that can be known or mentioned. 2. A common noun is the name of a sort, kind, or class, of beings or things. 3. The third person is that which denotes the person or thing merely spoken of. 4. The plural number is that which denotes more than one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Of* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*Hannah More* is a proper noun, of the third person, singular number, feminine gender, and objective case. 1. A noun is the name of any person, place, or thing, that can be known or mentioned. 2. A proper noun is the name of some particular individual, or people, or group. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The feminine gender is that which denotes persons or animals of the female kind. 6. The objective case is that form or state of a noun or pronoun, which usually denotes the object of a verb, participle, or preposition.

*Appear* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*To* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*Me* is a pronoun. 1. A pronoun is a word used in stead of a noun.

*More* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Praiseworthy* is an adjective. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality.

*Than* is a conjunction. 1. A conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected.

*Scott's* is a proper noun, of the third person, singular number, masculine gender, and possessive case. 1. A noun is the name of any person, place, or thing, that can be known or mentioned. 2. A proper noun is the name of some particular individual, or people, or group. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The possessive case is that form or state of a noun or pronoun, which usually denotes the relation of property.

#### LESSON I.—PARSING.

“The virtue of Alexander appears to me less vigorous than that of Socrates. Socrates in Alexander’s place I can readily conceive: Alexander in that of Socrates I cannot. Alexander will tell you, he can subdue the world: it was a greater work in Socrates to fulfill the duties of life. Worth consists most, not in great, but in good actions.”—*Kames’s Art of Thinking*, p. 70.

“No one should ever rise to speak in public, without forming to himself a just and strict idea of what suits his own age and character; what suits the subject, the hearers, the place, the occasion.”—*Blair’s Rhetoric*, p. 260.

“In the short space of little more than a century, the Greeks became such statesmen, warriors, orators, historians, physicians, poets, critics, painters, sculptors, architects, and, last of all, philosophers, that one can hardly help considering that golden period, as a providential event in honour of human nature, to show to what perfection the species might ascend.”—*Harris’s Hermes*, p. 417.

“Is genius yours? Be yours a glorious end,  
Be your king’s, country’s, truth’s, religion’s friend.”—*Young*.

## LESSON II.—PARSING.

“He that is called in the Lord, being a servant, is the Lord’s freeman: likewise also, he that is called, being free, is Christ’s servant.”—1 *Cor.*, vii, 22.

“What will remain to the Alexanders, and the Cæsars, and the Jenghizes, and the Louises, and the Charleses, and the Napoleons, with whose ‘glories’ the idle voice of fame is filled?”—*J. Dymond*.

“Good sense, clear ideas, perspicuity of language, and proper arrangement of words and thoughts, will always command attention.”—*Blair’s Rhet.*, p. 174.

“A mother’s tenderness and a father’s care are nature’s gifts for man’s advantage.—Wisdom’s precepts form the good man’s interest and happiness.”—*Murray’s Key*, p. 194.

“A dancing-school among the Tuscaroras, is not a greater absurdity than a masquerade in America. A theatre, under the best regulations, is not essential to our happiness. It may afford entertainment to individuals; but it is at the expense of private taste and public morals.”—*Webster’s Essays*, p. 86.

“Where dancing sunbeams on the waters played,  
And verdant alders form’d a quivering shade.”—*Pope*.

## LESSON III.—PARSING.

“I have ever thought that advice to the young, unaccompanied by the routine of honest employments, is like an attempt to make a shrub grow in a certain direction, by blowing it with a bellows.”—*Webster’s Essays*, p. 247.

“The Arabic characters for the writing of numbers, were introduced into Europe by Pope Sylvester II, in the eleventh century.”—*Constable’s Miscellany*.

“Emotions raised by inanimate objects, trees, rivers, buildings, pictures, arrive at perfection almost instantaneously; and they have a long endurance, a second view producing nearly the same pleasure with the first.”—*Kames’s Elements*, i, 108.

“There is great variety in the same plant, by the different appearances of its stem, branches, leaves, blossoms, fruit, size, and colour; and yet, when we trace that variety through different plants, especially of the same kind, there is discovered a surprising uniformity.”—*Ib.*, i, 273.

“Attitude, action, air, pause, start, sigh, groan,  
He borrow’d, and made use of as his own.”—*Churchill*.

“I dread thee, fate, relentless and severe,  
With all a poet’s, husband’s, father’s fear!”—*Burns*.

## IMPROPRIETIES FOR CORRECTION.

## ERRORS OF NOUNS.

## LESSON I.—NUMBERS.

“All the ablest of the Jewish Rabbis acknowledge it.”—*Wilson’s Heb. Gram.*, p. 7.

[FORMULE.—Not proper, because the word *Rabbi* is here made plural by the addition of *s* only. But, according to Observation 12th on the Numbers, nouns in *i* ought rather to form the plural in *ies*. The capital *R*, too, is not necessary. Therefore, *Rabbis* should be *rabbies*, with *ies* and a small *r*.]

“Who has thoroughly imbibed the system of one or other of our Christian rabbis.”—*Campbell's Rhet.*, p. 378. “The seeming singularities of reason soon wear off.”—*Collier's Antoninus*, p. 47. “The chiefs and arikis or priests have the power of declaring a place or object taboo.”—*Balbi's Geog.*, p. 460. “Among the various tribes of this family, are the Pottawatomies, the Sacs and Foxes, or Saukis and Ottogamis.”—*Ib.*, p. 178. “The Shawnees, Kickapoos, Menomonies, Miamis and Delawares, are of the same region.”—*Ib.*, p. 178. “The Mohegans and Abenakis belonged also to this family.”—*Ib.*, p. 178. “One tribe of this family, the Winnebagos, formerly resided near lake Michigan.”—*Ib.*, p. 179. “The other tribes are the Ioways, the Otoes, the Missouris, the Quapaws.”—*Ib.*, p. 179. “The great Mexican family comprises the Aztecs, Toltecs, and Tarascos.”—*Ib.*, p. 179. “The Mulattoes are born of negro and white parents; the Zambos, of Indians and negroes.”—*Ib.*, p. 165. “To have a place among the Alexanders, the Cæsars, the Lewis', or the Charles', the scourges and butchers of their fellow-creatures.”—*Burgh's Dignity*, i, 132. “Which was the notion of the Platonic Philosophers and Jewish rabbii.”—*Ib.*, p. 248. “That they should relate to the whole body of virtuosos.”—*Gobbett's E. Gram.*, ¶ 212. “What thank have ye? for sinners also love those that love them.”—*Luke*, vi, 32. “There are five ranks of nobility; dukes, marquesses, earls, viscounts, and barons.”—*Balbi's Geog.*, p. 228. “Acts, which were so well known to the two Charles's.”—*Payne's Geog.*, ii, 511. “Court Martials are held in all parts, for the trial of the blacks.”—*Observer*, No. 458. “It becomes a common noun, and may have a plural number; as, the two *Davids*; the two *Scipios*, the two *Pompies*.”—*Staniford's Gram.*, p. 8. “The food of the rattlesnake is birds, squirrels, hare, rats, and reptiles.”—*Balbi's Geog.*, p. 177. “And let fowl multiply in the earth.”—*Genesis*, i, 22. “Then we reached the hill-side where eight buffalo were grazing.”—*Martineau's Amer.*, i, 202. “*Corset*, n. a pair of bodice for a woman.”—*Worcester's Dict.*, 12mo. “As the *be's*; the *ce's*, the *doubleyu's*.”—*O. B. Peirce's Gram.*, p. 40. “Simplicity is the means between ostentation and rusticity.”—*Pope's Pref. to Homer*. “You have disguised yourselves like tipstaves.”—*Gil Blas*, i, 111. “But who, that hath any taste, can endure the incessant quick returns of the *also's*, and the *likewise's*, and the *moreover's*, and the *however's*, and the *notwithstanding's*?”—*Campbell's Rhet.*, p. 439.

“Sometimes, in mutual sly disguise,  
Let Aye's seem No's, and No's seem Aye's.”—*Gay*, p. 431.

## LESSON II.—CASES.

“For whose name sake, I have been made willing.”—*Wm. Penn.*

[FORMULE.—Not proper, because the noun *name*, which is here meant for the possessive case singular, has not the true form of that case. But, according to a principle on page 258th, “The possessive case of nouns is formed, in the singular number, by adding to the nominative *s preceded by an apostrophe*; and, in the plural, when the nominative ends in *s*, by adding *an apostrophe only*.” Therefore, name should be *name's*; thus, “For whose *name's* sake, I have been made willing.”]

“Be governed by your conscience, and never ask anybodies leave to be honest.”—*Collier's Antoninus*, p. 105. “To overlook nobodies merit or misbehaviour.”—*Ib.*, p. 9. “And

Hector at last fights his way to the stern of Ajax' ship."—*Coleridge's Introd.*, p. 91. "Nothing is lazier, than to keep ones eye upon words without heeding their meaning."—*Philological Museum*, i, 645. "Sir William Joneses division of the day."—*Ib.*, Contents. "I need only refer here to Vosses excellent account of it."—*Ib.*, i, 465. "The beginning of Stesichoruses palinode has been preserved."—*Ib.*, i, 442. "Though we have Tibulluses elegies, there is not a word in them about Glycera."—*Ib.*, p. 446. "That Horace was at Thaliarchuses country-house."—*Ib.*, i, 451. "That Sisypuses foot-tub should have been still in existence."—*Ib.*, i, 468. "How every thing went on in Horace's closet, and in Mecenases antechamber."—*Ib.*, i, 458. "Who, for elegant brevities sake, put a participle for a verb."—*Walker's Particles*, p. 42. "The countries liberty being oppressed, we have no more to hope."—*Ib.*, p. 73. "A brief but true account of this peoples' principles."—*Barclay's Pref.* "As, the Church's Peace, or the Peace of the Church; Virgil's Eneid, or the Eneid of Virgil"—*British Gram.*, p. 93. "As, Virgil's Æneid, for the Æneid of Virgil; the Church's Peace, for the Peace of the Church."—*Buchanan's Syntax*, p. 18. "Which, with Hubner's Compend, and Wells' Geographia Classica, will be sufficient."—*Burgh's Dignity*, i, 155. "Witness Homer's speaking horses, scolding goddesses, and Jupiter enchanted with Venus' girdle."—*Ib.*, i, 184. "Dr. Watts' Logic may with success be read and commented on to them."—*Ib.*, p. 156. "Potter's Greek, and Kennet's Roman Antiquities, Strauchius' and Helvicus' Chronology."—*Ib.*, p. 161. "*Sing.* Alice' friends, Felix' property; *Plur.* The Alices' friends, The Felixes' property."—*O. B. Peirce's Gram.*, p. 46. "Such as Bacchus'es company,"—"at Bacchus'es festivals."—*Ainsworth's Dict.*, *w. Thyrsus*. "Burn's inimitable *Tam o'Shanter* turns entirely upon such a circumstance."—*Scott's Lay, Notes*, p. 201. "Nominative, Men. Genitive, Mens. Objective, Men."—*Cutler's Gram.*, p. 20. "Mens Happiness or Misery is most part of their own making."—*Locke, on Education*, p. 1. "That your Sons Cloths be never made strait, especially about the Breast."—*Ib.*, p. 15. "Childrens Minds are narrow and weak."—*Ib.*, p. 297. "I would not have little Children much tormented about Punctilio's, or Niceties of Breeding."—*Ib.*, p. 90. "To fill his Head with suitable Idea's."—*Ib.*, p. 113. "The Burgusdiscius's and the Scheiblers did not swarm in those Days, as they do now."—*Ib.*, p. 163. "To see the various ways of dressing—a calve's head!"—*Shenstone*, *Brit. Poets*, Vol. vii, p. 143.

"He puts it on, and for decorum sake  
Can wear it e'en as gracefully as she."—*Couper's Task*.

### LESSON III.—MIXED.

"Simon the witch was of this religion too."—*Bunyan's P. P.*, p. 123.

[FORMULE.—Not proper, because the feminine name *witch* is here applied to a man. But, according to the doctrine of genders, on page 254th, "Names of males are masculine; names of females, feminine;" &c. Therefore, *witch* should be *wizard*; thus, "Simon the *wizard*," &c.]

"Mammodis, n. Coarse, plain India muslins."—*Webster's Dict.* "Go on from single persons to families, that of the Pompeyes for instance."—*Collier's Antoninus*, p. 142. "By which the ancients were not able to account for phænomenas."—*Bailey's Ovid*, p. vi. "After this I married a wife who had lived at Crete, but a Jew by birth."—*Josephus's Life*, p. 194. "The very heathen are inexcusable for not worshipping him."—*Student's Manual*, p. 328. "Such poems as Camoen's Lusiad, Voltaire's Henriade, &c."—*Blair's Rhet.*, p. 422. "My learned correspondent writes a word in defence of large scarves."—*SPECT.*: in *Joh. Dict.* "The forerunners of an apoplexy are dulness, vertigos, tremblings."—*ARBUTHNOT*: *ib.*

"*Vertigo* changes the *o* into *inēs*, making the plural *vertiginēs*."—*Churchill's Gram.*, p. 59. "*Noctambulo* changes the *o* into *ōnēs*, making the plural *noctambulōnēs*."—*Ib.*, p. 59. "What shall we say of noctambulos?"—ARBUTHNOT: *in Joh. Dict.* "In the curious fretwork of rocks and grottos."—*Blair's Rhet.*, p. 220. "*Wharf* makes the plural *wharves*."—*Smith's Gram.*, p. 45; *Merchant's*, 29; *Picket's*, 21; *Frost's*, 8. "A few cent's worth of macaroni supplies all their wants."—*Balbi's Geog.*, p. 275. "C sounds hard, like *k*, at the end of a word or syllables."—*Blair's Gram.*, p. 4. "By which the virtuosi try The magnitude of every lie."—*Hudibras*. "Quartos, octavos, shape the lessening pyre."—*Pope's Dunciad*, B. i, l. 162. "Perching within square royal rooves."—SIDNEY: *in Joh. Dict.* "Similies should, even in poetry, be used with moderation."—*Blair's Rhet.*, p. 166. "Similies should never be taken from low or mean objects."—*Ib.*, p. 167. "It were certainly better to say, 'The house of lords,' than 'the Lord's house.'"—*Murray's Gram.*, 8vo, p. 177. "Read your answers. Unit figure? 'Five.' Ten's? 'Six.' Hundreds? 'Seven.'"—*Abbott's Teacher*, p. 79. "Alexander conquered Darius' army."—*Kirkham's Gram.*, p. 58. "Three days time was requisite, to prepare matters."—*Brown's Estimate*, ii, 156. "So we say that Ciceros stile and Sallusts, were not one, nor Cesars and Livies, nor Homers and Hesiodus, nor Herodotus and Theucidides, nor Euripides and Aristophanes, nor Erasmus and Budeus stiles."—*Puttenham's Arte of English Poesie*, iii, 5. "*Lex* (i.e. *legs*) is no other than our ancestors past participle *læg*, *laid down*."—*Tooke's Diversions*, ii, 7. "Achaia's sons at Ilium slain for the Atridæ' sake."—*Cowper's Iliad*. "The corpse\* of half her senate manure the fields of Thessaly."—*Addison's Cato*.

"Poisoning, without regard of fame or fear:  
And spotted corpse are frequent on the bier."—*Dryden*.

## CHAPTER IV.—ADJECTIVES.

An Adjective is a word added to a noun or pronoun, and generally expresses quality: as, A *wise* man; a *new* book. You *two* are *diligent*.

### OBSERVATIONS.

OBS. 1.—Adjectives have been otherwise called attributes, attributives, qualities, adnouns; but none of these names is any better than the common one. Some writers have classed adjectives with verbs; because, with a neuter verb for the copula, they often form logical predicates: as, "Vices *are contagious*." The Latin grammarians usually class them with nouns; consequently their nouns are divided into nouns substantive and nouns adjective. With us, substantives are nouns; and adjectives form a part of speech by themselves. This is generally acknowledged to be a much better distribution. Adjectives cannot with propriety be called *nouns*, in any language; because they are not *the names* of the qualities which they signify. They must be *added* to nouns or pronouns in order to make sense. But if, in a just distribution of words, the term "*adjective nouns*" is needless and improper, the term "adjective pronouns" is, certainly, not less so: most of the words which Murray and others call by this name, are not pronouns, but adjectives.

OBS. 2.—The noun, or substantive, is a *name*, which makes sense of itself. The adjective is an adjunct to the noun or pronoun. It is a word added to denote quality,

---

\* *Corpse* forms the plural regularly, *corpses*; as in 2 *Kings*, xix, 35: "In the morning, behold, they were all dead *corpses*."

situation, quantity, number, form, tendency, or whatever else may characterize and distinguish the thing or things spoken of. Adjectives, therefore, are distinguished *from* nouns by their *relation to* them; a relation corresponding to that which qualities bear to things: so that no part of speech is more easily discriminated than the adjective. Again: English adjectives, as such, are all indeclinable. When, therefore, any words usually belonging to this class, are found to take either the plural or the possessive form, like substantive nouns, they are to be parsed as nouns. To abbreviate expression, we not unfrequently, in this manner, convert adjectives into nouns. Thus, in grammar, we often speak of *nominatives*, *possessives*, or *objectives*, meaning nouns or pronouns of the nominative, the possessive, or the objective case; of *positives*, *comparatives*, or *superlatives*, meaning adjectives of the positive, the comparative, or the superlative degree; of *infinitives*, *subjunctives*, or *imperatives*, meaning verbs of the infinitive, the subjunctive, or the imperative mood; and of *singulars*, *plurals*, and many other such things, in the same way. So a man's *superiors* or *inferiors* are persons superior or inferior to himself. His *bettors* are persons better than he. *Others* are any persons or things distinguished from some that are named or referred to; as, "If you want enemies, excel *others*; if you want friends, let *others* excel you."—*Lacon*. All adjectives thus taken substantively, become *nouns*, and ought to be parsed as such, unless this word *others* is to be made an exception, and called a "*pronoun*."

"Th' event is fear'd; should we again provoke

Our *stronger*, some worse way his wrath may find."—*Milton*, P. L., B. ii, l. 82.

OBS. 3.—Murray says, "Perhaps the words *former* and *latter* may be properly ranked amongst the demonstrative pronouns, *especially in many of their applications*. The following sentence may serve as an example: 'It was happy for the state, that Fabius continued in the command with Minutius: the *former's* phlegm was a check upon the *latter's* vivacity.'"—*Gram.*, 8vo, p. 57. This I take to be bad English. *Former* and *latter* ought to be adjectives only; except when *former* means *maker*. And, if not so, it is too easy a way of multiplying pronouns, to manufacture two out of one single anonymous sentence. If it were said, "The deliberation of *the former* was a seasonable chock upon the fiery temper of *the latter*" the words *former* and *latter* would seem to me not to be pronouns, but adjectives, each relating to the noun *commander* understood after it.

OBS. 4.—The sense and relation of words in sentences, as well as their particular form and meaning, must be considered in parsing, before the learner can say, with certainty, to what class they belong. Other parts of speech, and especially nouns and participles, by a change in their construction, may become adjectives. Thus, to denote the material of which a thing is formed, we very commonly make the name of the substantive an adjective to that of the thing: as, A *gold chain*, a *silver spoon*, a *glass pitcher*, a *tin basin*, an *oak plank*, a *basswood slab*, a *whalebone rod*. This construction is in general correct, whenever the former word may be predicated of the latter; as, "The chain is gold."—"The spoon is silver." But we do not write *gold beater* for *goldbeater*, or *silver smith* for *silversmith*; because the beater is not gold, nor is the smith silver. This principle, however, is not universally observed; for we write *snowball*, *whitewash*, and many similar compounds, though the ball is snow and the wash is white; and *linseed oil*, or *Newark cider*, may be a good phrase, though the former word cannot well be predicated of the latter. So in the following examples: "Let these *conversation* tones be the foundation of public pronunciation."—*Blair's Rhet.*, p. 334. "A *muslin* flounce, made very full, would give a very agreeable *flirtation* air."—POPE: *Priestley's Gram.*, p. 79.

“Come, calm Content, serene and sweet,  
O gently guide my *pilgrim* feet  
To find thy *hermit* cell.”—*Barbault*.

OBS. 5.—Murray says, “Various nouns placed before other nouns assume the nature of adjectives: as, sea fish, wine vessel, corn field, meadow ground, &c.”—*Octavo Gram.*, p. 48. This is, certainly, very lame instruction. If there is not palpable error in all his examples, the propriety of them all is at least questionable; and, to adopt and follow out their principle, would be, to tear apart some thousands of our most familiar compounds. “*Meadow ground*” may perhaps be a correct phrase, since the ground is meadow; it seems therefore preferable to the compound word meadow-ground. What he meant by “*wine vessel*” is doubtful: that is, whether a ship or a cask, a flagon or a decanter. If we turn to our dictionaries, Webster has *sea-fish* and *wine-cask* with a hyphen, and *cornfield* without; while Johnson and others have *corn-field* with a hyphen, and *seafish* without. According to the rules for the figure of words, we ought to write them *seafish*, *winecask*, *cornfield*. What then becomes of the thousands of “adjectives” embraced in the “&c.” quoted above?

OBS. 6.—The pronouns *he* and *she*, when placed before or prefixed to nouns merely to denote their gender, appear to be used adjectively; as, “The male or *he* animals offered in sacrifice.”—*Wood’s Dict.*, *w. Males*. “The most usual term is *he* or *she*, *male* or *female*, employed as an adjective: as, a *he bear*, a *she bear*, a *male elephant*, a *female elephant*.”—*Churchill’s Gram.*, p. 69. Most writers, however, think proper to insert a hyphen in the terms here referred to: as, *he-bear*, *she-bear*, the plurals of which are *he-bears* and *she-bears*. And, judging by the foregoing rule of predication, we must assume that this practice only is right. In the first example, the word *he* is useless; for the term “*male animals*” is sufficiently clear without it. It has been shown in the third chapter, that *he* and *she* are sometimes used as nouns; and that, as such, they may take the regular declension of nouns, making the plurals *hes* and *shes*. But whenever these words are used adjectively to denote gender, whether we choose to insert the hyphen or not, they are, without question, indeclinable, like other adjectives. In the following example, Sanborn will have *he* to be a noun in the *objective* case; but I consider it rather, to be an adjective, signifying *masculine*:

“(*Philosophy*, I say, and call *it He*;  
For, whatsoe’er the painter’s fancy be,  
It a male-virtue seems to me.”)—*Cowley*, *Brit. Poets*, Vol. ii, p. 54.

OBS. 7.—Though verbs give rise to many adjectives, they seldom, if ever, become such by a mere change of construction. It is mostly by assuming an additional termination, that any verb is formed into an adjective: as in *teachable*, *moveable*, *oppressive*, *diffusive*, *prohibitory*. There are, however, about forty words ending in *ate*, which, without difference of form, are either verbs or adjectives; as, *aggregate*, *animate*, *appropriate*, *articulate*, *aspirate*, *associate*, *complicate*, *confederate*, *consummate*, *deliberate*, *desolate*, *effeminate*, *elate*, *incarnate*, *intimate*, *legitimate*, *moderate*, *ordinate*, *precipitate*, *prostrate*, *regenerate*, *reprobate*, *separate*, *sophisticate*, *subordinate*. This class of adjectives seems to be lessening. The participials in *ed*, are superseding some of them, at least in popular practice: as, *contaminated*, for *contaminate*, defiled; *reiterated*, for *reiterate*, repeated; *situated*, for *situate*, placed; *attenuated*, for *attenuate*, made thin or slender. *Devote*,

*exhaust*, and some other verbal forms, are occasionally used by the poets, in lieu of the participial forms, *devoted*, *exhausted*, &c.

OBS. 8.—Participles, which have naturally much resemblance to this part of speech, often drop their distinctive character, and become adjectives. This is usually the case whenever they stand immediately *before* the nouns to which they relate; as, A *pleasing* countenance, a *piercing* eye, an *accomplished* scholar, an *exalted* station. Many participial adjectives are derivatives formed from participles by the negative prefix *un*, which reverses the meaning of the primitive word; as, *undisturbed*, *undivided*, *unenlightened*. Most words of this kind differ of course from participles, because there are no such verbs as *to undisturb*, *to undivide*, &c. Yet they may be called participial adjectives, because they have the termination, and embrace the form, of participles. Nor should any participial adjective be needlessly varied from the true orthography of the participle: a distinction is, however, observed by some writers, between *past* and *passed*, *staid* and *stayed*; and some old words, as *drunken*, *stricken*, *shotten*, *rotten*, now obsolete as participles, are still retained as adjectives. This sort of words will be further noticed in the chapter on participles.

OBS. 9.—Adverbs are generally distinguished from adjectives, by the form, as well as by the construction, of the words. Yet, in instances not a few, the same word is capable of being used both adjectively and adverbially. In these cases, the scholar must determine the part of speech, by the construction alone; remembering that adjectives belong to nouns or pronouns only; and adverbs, to verbs, participles, adjectives, or other adverbs, only. The following examples from Scripture, will partially illustrate this point, which will be noticed again under the head of syntax: “Is your father *well*?”—*Gen.*, xliii, 27. “Thou hast *well* said.”—*John*, iv, 17. “He separateth *very* friends.”—*Prov.*, xvii, 9. “Esaias is *very* bold.”—*Rom.*, x, 20. “For a pretence, ye make *long* prayer.”—*Matt.*, xxiii, 14. “They that tarry *long* at the wine.”—*Prov.*, xxiii, 30. “It had not *much* earth.”—*Mark*, iv, 5. “For she loved *much*.”—*Luke*, vii, 47.

OBS. 10.—Prepositions, in regard to their *construction*, differ from adjectives, almost exactly as active-transitive participles differ syntactically from adjectives: that is, in stead of being mere adjuncts to the words which follow them, they govern those words, and refer back to some other term; which, in the usual order of speech, stands before them. Thus, if I say, “A spreading oak,” *spreading* is an adjective relating to oak; if, “A boy spreading hay,” *spreading* is a participle, governing *hay*, and relating to *boy*, because the boy is the agent of the action. So, when Dr. Webster says, “The *off* horse in a team,” *off* is an adjective, relating to the noun *horse*; but, in the phrase, “A man *off* his guard,” *off* is a preposition, showing the relation between *man* and *guard*, and governing the latter. The following are other examples: “From the *above* speculations.”—*Harris’s Hermes*, p. 194. “An *after* period of life.”—MARSHALL: *in Web. Dict.* “With some other of the *after* Judaical rites.”—*Right of Tythes*, p. 86. “Whom this *beneath* world doth embrace and hug.”—*Shak.* “Especially is *over* exertion made.”—*Journal of Lit. Conv.*, p. 119. “To both the *under* worlds.”—*Hudibras*. “Please to pay to A. B. the amount of the *within* bill.” Whether properly used or not, the words *above*, *after*, *beneath*, *over*, *under*, and *within*, are here unquestionably made *adjectives*; yet every scholar knows, that they are generally prepositions, though sometimes adverbs.

## CLASSES.

Adjectives may be divided into six classes; namely, *common*, *proper*, *numeral*, *pronominal*, *participial*, and *compound*.

I. A *common adjective* is any ordinary epithet, or adjective denoting quality or situation; as, *Good*, *bad*, *peaceful*, *warlike*—*eastern*, *western*, *outer*, *inner*.

II. A *proper adjective* is an adjective formed from a proper name; as, *American*, *English*, *Platonic*, *Genoese*.

III. A *numeral adjective* is an adjective that expresses a definite number; as, *One*, *two*, *three*, *four*, *five*, *six*, &c.

IV. A *pronominal adjective* is a definitive word which may either accompany its noun, or represent it understood; as, “*All* join to guard what *each* desires to gain.”—*Pope*. That is, “*All men* join to guard what *each man* desires to gain.”

V. A *participial adjective* is one that has the form of a participle, but differs from it by rejecting the idea of time; as, “An *amusing* story,”—“A *lying* divination.”

VI. A *compound adjective* is one that consists of two or more words joined together, either by the hyphen or solidly: as, *Nut-brown*, *laughter-loving*, *four-footed*; *threefold*, *lordlike*, *lovesick*.

## OBSERVATIONS.

OBS. 1.—This distribution of the adjectives is no less easy to be applied, than necessary to a proper explanation in parsing. How many adjectives there are in the language, it is difficult to say; none of our dictionaries profess to exhibit all that are embraced in some of the foregoing classes. Of the Common Adjectives, there are probably not fewer than six thousand, exclusive of the common nouns which we refer to this class when they are used adjectively. Walker’s Rhyming Dictionary contains five thousand or more, the greater part of which may be readily distinguished by their peculiar endings. Of those which end in *ous*, as *generous*, there are about 850. Of those in *y* or *ly*, as *shaggy*, *homely*, there are about 550. Of those in *ive*, as *deceptive*, there are about 400. Of those in *al*, as *autumnal*, there are about 550. Of those in *ical*, as *mechanical*, there are about 350. Of those in *able*, as *valuable*, there are about 600. Of those in *ible*, as *credible*, there are about 200. Of those in *ent*, as *different*, there are about 300. Of those in *ant*, as *abundant*, there are about 170. Of those in *less*, as *ceaseless*, there are about 220. Of those in *ful*, as *useful*, there are about 130. Of those in *ory*, as *explanatory*, there are about 200. Of those in *ish*, as *childish*, there are about 100. Of those in *ine*, as *masculine*, there are about 70. Of those in *en*, as *wooden*, there are about 50. Of those in *some*, as *quarrelsome*, there are about 30. These sixteen numbers added together, make 4770.

OBS. 2.—The Proper Adjectives are, in many instances, capable of being converted into declinable nouns: as, *European*, *a European*, *the Europeans*; *Greek*, *a Greek*, *the Greeks*; *Asiatic*, *an Asiatic*, *the Asiatics*. But with the words *English*, *French*, *Dutch*, *Scotch*, *Welsh*, *Irish*, and in general all such as would acquire an additional syllable in their declension, the case is otherwise. The gentile noun has frequently fewer syllables than the adjective, but seldom more, unless derived from some different root. Examples: *Arabic*, *an Arab*, *the Arabs*; *Gallic*, *a Gaul*, *the Gauls*; *Danish*, *a Dane*, *the Danes*; *Moorish*, *a Moor*, *the Moors*; *Polish*, *a Pole*, or *Polander*, *the Poles*; *Swedish*, *a Swede*, *the Swedes*; *Turkish*, *a Turk*, *the Turks*. When we say, *the English*, *the French*, *the Dutch*, *the Scotch*, *the Welsh*, *the Irish*,—meaning, *the English people*, *the French people*, &c., many grammarians conceive that *English*, *French*, &c., are *indeclinable nouns*. But in my opinion, it is better to reckon them

*adjectives*, relating to the noun *men* or *people* understood. For if these words are nouns, so are a thousand others, after which there is the same ellipsis; as when we say, *the good*, *the great*, *the wise*, *the learned*.<sup>\*</sup> The principle would involve the inconvenience of multiplying our nouns of the singular form and a plural meaning, indefinitely. If they are nouns, they are, in this sense, plural only; and, in an other, they are singular only. For we can no more say, *an English*, *an Irish*, or *a French*, for *an Englishman*, *an Irishman*, or *a Frenchman*; than we can say, *an old*, *a selfish*, or *a rich*, for *an old man*, *a selfish man*, or *a rich man*. Yet, in distinguishing the *languages*, we call them *English*, *French*, *Dutch*, *Scotch*, *Welsh*, *Irish*; using the words, certainly, in no plural sense; and preferring always the line of adjectives, where the gentile noun is different: as, *Arabic*, and not *Arab*; *Danish*, and not *Dane*; *Swedish*, and not *Swede*. In this sense, as well as in the former, Webster, Chalmers, and other modern lexicographers, call the words *nouns*; and the reader will perceive, that the objections offered before do not apply here. But Johnson, in his two quarto volumes, gives only two words of this sort, *English* and *Latin*; and both of these he calls *adjectives*: “ENGLISH, *adj.* Belonging to England; hence English<sup>†</sup> is the language of England.” The word *Latin*, however, he makes a noun, when it means a schoolboy’s exercise; for which usage he quotes, the following inaccurate example from Ascham: “He shall not use the common order in schools for making of *Latins*.”

OBS. 3.—Dr. Webster gives us explanations like these: “CHINESE, *n. sing.* and *plu.* A native of China; also the language of China.”—“JAPANESE, *n.* A native of Japan; or the language of the inhabitants.”—“GENOESE, *n. pl.* the people of Genoa in Italy. *Addison*.”—“DANISH, *n.* The language of the Danes.”—“IRISH, *n.* 1. A native of Ireland. 2. The language of the Irish; the Hiberno-Celtic.” According to him, then, it is proper to say, *a Chinese*, *a Japanese*, or *an Irish*; but not, *a Genoese*, because he will have this word to be plural only! Again, if with him we call a native of Ireland *an Irish*, will not more than one be *Irishes*?<sup>‡</sup> If a native of Japan be *a Japanese*, will not more than one be *Japaneuses*? In short, is it not plain, that the words, *Chinese*, *Japanese*, *Portuguese*, *Maltese*, *Genoese*, *Milanese*, and all others of like formation, should follow one and the same rule? And if so,

---

<sup>\*</sup> Murray says, “An *adjective* put without a substantive, with the definite article before it, *becomes a substantive in sense and meaning*, and is *written as a substantive*: as, ‘Providence rewards *the good*, and punishes *the bad*.” If I understand this, it is very erroneous, and plainly contrary to the fact. I suppose the author to speak of *good persons* and *bad persons*; and, if he does, is there not an ellipsis in his language? How can it be said, that *good* and *bad* are here substantives, since they have a plural meaning and refuse the plural form? A word “*written as a substantive*,” unquestionably *is* a substantive; but neither of these is here entitled to that name. Yet Smith, and other satellites of Murray, endorse his doctrine; and say, that *good* and *bad* in this example, and all adjectives similarly circumstanced, “may be considered *nouns* in parsing.”—*Smith’s New Gram.*, p. 52. “An adjective with the definite article before it, becomes a *noun*, (of the third person, plural number,) and *must be parsed* as such.”—*R. G. Greene’s Grammatical Text-Book*, p. 55.

<sup>†</sup> Here the word *English* appears to be used substantively, not by reason of the article, but rather because *it has no article*; for, when the definite article is used before such a word taken in the singular number, it seems to show that the noun *language* is understood. And it is remarkable, that before the names or epithets by which we distinguish the languages, this article may, in many instances, be either used or not used, repeated or not repeated, without any apparent impropriety: as, “This is the case with *the Hebrew*, *French*, *Italian*, and *Spanish*.”—*Murray’s Gram.*, i, p. 38. Better, perhaps: “This is the case with *the Hebrew*, *the French*, *the Italian*, and *the Spanish*.” But we may say: “This is the case with Hebrew, French, Italian, and Spanish.” In the first of these forms, there appears to be an ellipsis of the plural noun *languages*, at the end of the sentence; in the second, an ellipsis of the singular noun *language*, after each of the national epithets; in the last, no ellipsis, but rather a substantive use of the words in question.

<sup>‡</sup> The Doctor may, for aught I know, have taken his notion of this “*noun*,” from the language “of Dugald Dalgetty, boasting of his ‘5000 *Irishes*’ in the prison of Argyle.” See *Letter of Wendell Phillips, in the Liberator*, Vol. xi, p. 211.

what is that rule? Is it not this;—that, like *English*, *French*, &c., they are always *adjectives*; except, perhaps, when they denote *languages*? There may possibly be some real authority from usage, for calling a native of China *a Chinese*,—of Japan *a Japanese*,—&c.; as there is also for the regular plurals, *Chineses*, *Japaneses*, &c.; but is it, in either case, good and sufficient authority? The like forms, it is acknowledged, are, on some occasions, mere adjectives; and, in modern usage, we do not find these words inflected, as they were formerly. Examples: “The *Chinese* are by no means a cleanly people, either in person or dress.”—*Balbi’s Geog.*, p. 415. “The *Japanese* excel in working in copper, iron, and steel.”—*Ib.*, p. 419. “The *Portuguese* are of the same origin with the Spaniards.”—*Ib.*, p. 272. “By whom the undaunted *Tyrolese* are led.”—*Wordsworth’s Poems*, p. 122. Again: “Amongst the *Portugueses*, ‘tis so much a Fashion, and Emulation, amongst their Children, to *learn to Read*, and Write, that they cannot hinder them from it.”—*Locke, on Education*, p. 271. “The *Malteses* do so, who harden the Bodies of their Children, and reconcile them to the Heat, by making them go stark Naked.”—*Idem, Edition of 1669*, p. 5. “CHINESE, *n. s.* Used elliptically for the language and people of China: plural, *Chineses*. *Sir T. Herbert*.”—*Abridgement of Todd’s Johnson*. This is certainly absurd. For if *Chinese* is used *elliptically* for the people of China, it is an *adjective*, and does not form the plural, *Chineses*: which is precisely what I urge concerning the whole class. These plural forms ought not to be imitated. Horne Tooke quotes some friend of his, as saying, “No, I will never descend with him beneath even *a Japanese*: and I remember what Voltaire remarks of *that country*.”—*Diversions of Purley*, i, 187. In this case, he ought, unquestionably, to have said—“beneath even *a native of Japan*,” because, whether *Japanese* be a noun or not, it is absurd to call *a Japanese*, “*that country*.” Butler, in his *Hudibras*, somewhere uses the word *Chineses*; and it was, perhaps, in his day, common; but still, I say, it is contrary to analogy, and therefore wrong. Milton, too, has it:

“But in his way lights on the barren plains  
Of Sericana, where Chineses\* drive  
With sails and wind their cany *waggon* light.”—*Paradise Lost*, B. iii, l. 437.

OBS. 4.—The Numeral Adjectives are of three kinds, namely, *cardinal*, *ordinal*, and *multiplicative*: each kind running on in a series indefinitely. Thus:—

1. *Cardinal*; One, two, three, four, five, six, seven, eight, nine, ten, eleven, twelve, thirteen, fourteen, fifteen, sixteen, seventeen, eighteen, nineteen, twenty, twenty-one, twenty-two, &c.
2. *Ordinal*; First, second, third, fourth, fifth, sixth, seventh, eighth, ninth, tenth, eleventh, twelfth, thirteenth, fourteenth, fifteenth, sixteenth, seventeenth, eighteenth, nineteenth, twentieth, twenty-first, twenty-second, &c.
3. *Multiplicative*; Single or alone, double or twofold, triple or threefold, quadruple or fourfold, quintuple or fivefold, sextuple or sixfold, septuple or sevenfold, octuple or

\* Lindley Murray, or some ignorant printer of his octavo Grammar, has omitted this *s*; and thereby spoiled the prosody, if not the sense, of the line:

“Of Sericana, where *Chinese* drive,” &c.—*Fourth American Ed.*, p. 345.

If there was a design to correct the error of Milton’s word, something should have been inserted. The common phrase, “*the Chinese*,” would give the sense, and the right number of syllables, but not the right accent. It would be sufficiently analogous with our mode of forming the words, *Englishmen*, *Frenchmen*, *Scotchmen*, *Dutchmen*, and *Irishmen*, and perhaps not unpoetical, to say:

“Of Sericana, where *Chinese-men* drive,  
With sails and wind, their cany *wagons* light.”

eightfold, &c. But high terms of this series are seldom used. All that occur above decuple or tenfold, are written with a hyphen, and are usually of round numbers only; as, thirty-fold, sixty-fold, hundred-fold.

OBS. 5.—A cardinal numeral denotes the whole number, but the corresponding ordinal denotes only the last one of that number, or, at the beginning of a series, the first of several or many. Thus: “*One* denotes simply the number *one*, without any regard to more; but *first* has respect to more, and so denotes only the first one of a greater number; and *two* means the number *two* completely; but *second*, the last one of *two*: and so of all the rest.”—*Burn’s Gram.*, p. 54. A cardinal number answers to the question, “*How many?*” An ordinal number answers to the question, “*Which one?*” or, “*What one?*” All the ordinal numbers, except *first*, *second*, *third*, and the compounds of these, as *twenty-first*, *twenty-second*, *twenty-third*, are formed directly from the cardinal numbers by means of the termination *th*. And as the primitives, in this case, are many of them either compound words, or phrases consisting of several words, it is to be observed, that the addition is made to the last term only. That is, of every compound ordinal number, the last term only is ordinal in form. Thus we say, *forty-ninth*, and not *fortieth-ninth*; nor could the meaning of the phrase, *four hundred and fiftieth*, be expressed by saying, *fourth hundredth and fiftieth*; for this, if it means any thing, speaks of three different numbers.

OBS. 6.—Some of the numerals are often used as *nouns*; and, as such, are regularly declined: as, *Ones*, *twos*, *threes*, *fours*, *fives*, &c. So, *Fifths*, *sixths*, *sevenths*, *eighths*, *ninths*, *tenths*, &c. “The *seventy’s* translation.”—*Wilson’s Hebrew Gram.*, p. 32. “I will not do it for *forty’s* sake.”—*Gen.*, xviii, 29. “I will not destroy it for *twenty’s* sake.”—*Ib.*, ver. 31. “For *ten’s* sake.”—*Ib.*, ver. 32. “They sat down in ranks, by *hundreds*, and by *fifties*.”—*Mark*, vi, 40. “There are *millions* of truths that a man is not concerned to know.”—*Locke*. With the compound numerals, such a construction is less common; yet the denominator of a fraction may be a number of this sort: as, seven *twenty-fifths*. And here it may be observed, that, in stead of the ancient phraseology, as in 1 Chron., xxiv, 17th, “The *one and twentieth* to Jachin, the *two and twentieth* to Gamul, the *three and twentieth* to Delaiah, the *four and twentieth* to Maaziah,” we now generally say, *the twenty-first*, *the twenty-second*, &c.; using the hyphen in all compounds till we arrive at *one hundred*, or *one hundredth*, and then first introducing the word *and*; as, *one hundred and one*, or *one hundred and first*, &c.

OBS. 7.—The Pronominal Adjectives are comparatively very few; but frequency of use gives them great importance in grammar. The following words are perhaps all that properly belong to this class, and several of these are much oftener something else: *All*, *any*, *both*, *certain*, *divers*, *each*, *either*, *else*, *enough*, *every*, *few*, *fewer*, *fewest*, *former*, *first*, *latter*, *last*, *little*, *less*, *least*, *many*, *more*, *most*, *much*, *neither*, *no* or *none*, *one*, *other*, *own*, *only*, *same*, *several*, *some*, *such*, *sundry*, *that*, *this*, *these*, *those*, *what*, *whatever*, *whatsoever*, *which*, *whichever*, *whichever*.\* Of these forty-six words, seven are always

---

\* The last six words are perhaps more frequently pronouns; and some writers will have well-nigh all the rest to be pronouns also. “In like manner, in *the* English, there have been *rescued* from the adjectives, and classed with the pronouns, any, aught, each, every, many, none, one, other, some, such, that, those, this, these; and by other writers, all, another, both, either, few, first, last, neither, and several.”—*Wilson’s Essay on Gram.*, p. 106. Had the author said *wrested*, in stead of “*rescued*,” he would have taught a much better doctrine. These words are what Dr. Lowth correctly called “*Pronominal Adjectives*.”—*Lowth’s Gram.*, p. 24. This class of adjectives includes most of the words which Murray, Lennie, Bullions, Kirkham, and others, so absurdly denominate “*Adjective Pronouns*.” Their “Distributive Adjective Pronouns, *each*, *every*, *either*,

singular, if the word *one* is not an exception; namely, *each*, *either*, *every*, *neither*, *one*, *that*, *this*: and nine or ten others are always plural, if the word *many* is not an exception; namely, *both*, *divers*, *few*, *fewer*, *fewest*, *many*, *several*, *sundry*, *these*, *those*. All the rest, like our common adjectives, are applicable to nouns of either number. *Else*, *every*, *only*, *no*, and *none*, are definitive words, which I have thought proper to call pronominal adjectives, though only the last can now with propriety be made to represent its noun understood. “Nor has Vossius, or *any else* that I know of, observed it.”—*Johnson’s Gram. Com.*, p. 279. Say, “or any *one* else.” Dr. Webster explains this word *else* thus: “ELSE, *a.* or *pron.* [Sax. *elles*] Other; one or something *beside*; as, Who *else* is coming?”—*Octavo Dict.* “Each and *every* of them,” is an old phrase in which *every* is used pronominally, or with ellipsis of the word to which it refers; but, in common discourse, we now say, *every one*, *every man*, &c., never using the word *every* alone to suggest its noun. *Only* is perhaps most commonly an adverb; but it is still in frequent use as an adjective; and in old books we sometimes find an ellipsis of the noun to which it belongs; as, “Neither are they the *only* [verbs] in which it is read.”—*Johnson’s Grammatical Commentaries*, p. 373. “But I think he is the *only* [one] of these Authors.”—*Ib.*, p. 193. *No* and *none* seem to be only different forms of the same adjective; the former being used before a noun expressed, and the latter when the noun is understood, or not placed after the adjective; as, “For *none* of us liveth to himself, and *no* man dieth to himself.”—*Romans*, xiv, 7. *None* was anciently used for *no* before all words beginning with a vowel sound; as, “They are sottish children; and they have *none* understanding.”—*Jeremiah*, iv, 22. This practice is now obsolete. *None* is still used, when its noun precedes it; as,

“Fools! who from hence into the notion fall,  
That *vice* or *virtue* there is *none* at all.”—*Pope*.

OBS. 8.—Of the words given in the foregoing list as pronominal adjectives, about one third are sometimes used *adverbially*. They are the following: *All*, when it means *totally*; *any*, for *in any degree*; *else*, meaning *otherwise*; *enough*, signifying *sufficiently*; *first*, for *in the first place*; *last*, for *in the last place*; *little*, for *in a small degree*; *less*, for *in a smaller*

---

*neither*,” their “Demonstrative Adjective Pronouns, *this*, *that*, *these*, *those*,” and their “Indefinite Adjective Pronouns, *some*, *other*, *any*, *one*, *all*, *such*, &c.,” are every one of them here; for they all are *Adjectives*, and not *Pronouns*. And it is obvious, that the corresponding words in Latin, Greek, or French, are adjectives likewise, and are, for the most part, so called; so that, from General Grammar, or “the usages of other languages,” arises an argument for ranking them as adjectives, rather than as pronouns. But the learned Dr. Bullions, after improperly assuming that every adjective must “express *the quality of a noun*,” and thence arguing that no such definitives can rightly be called *adjectives*, most absurdly suggests, that “*other languages*,” or “*the usages of other languages*,” generally assign to these *English words* the place of *substitutes*! But so remarkable for self-contradiction, as well as other errors, is this gentleman’s short note upon the classification of these words, that I shall present the whole of it for the reader’s consideration.

“NOTE. The distributives, demonstratives, and indefinites, cannot strictly be called *pronouns*; since they never stand *instead* of nouns, but always *agree* with *a noun* expressed or understood: *Neither can they be properly* called *adjectives*, since they never express *the quality of a noun*. They are here classed *with pronouns*, in accordance with *the usages of other languages*, which *generally assign them this place*. All these, together with the *possessives*, in parsing, may *with sufficient propriety* be termed *adjectives*, being *uniformly regarded as such* in syntax.”—*Bullions’s Principles of English Gram.*, p. 27. (See also his *Appendix III*, E. Gram., p. 199.)

What a sample of grammatical instruction is here! The pronominal adjectives “cannot properly *be called adjectives*,” but “they may with sufficient propriety be *termed adjectives*!” And so may “*the possessives*,” or *the personal pronouns in the possessive case*! “Here,” i.e., in *Etymology*, they are all “*classed with pronouns*,” but, “in *Syntax*,” they are “*uniformly regarded as adjectives*!” Precious MODEL for the “Series of Grammars, English, Latin, and Greek, all on THE SAME PLAN!”

*degree*; *least*, for *in the smallest degree*; *much*, for *in a great degree*; *more*, for *in a greater degree*; *most*, for *in the greatest degree*; *no*, or *none*, for *in no degree*; *only*, for *singly*, *merely*, *barely*; *what*, for *in what degree*, or *in how great a degree*.<sup>\*</sup> To these may perhaps be added the word *other*, when used as an alternative to *somehow*; as, “*Somehow or other* he will be favoured.”—*Butler’s Analogy*, p. 89. Here *other* seems to be put for *otherwise*; and yet the latter word would not be agreeable in such a sentence. “*Somewhere or other*,” is a kindred phrase equally common, and equally good; or, rather, equally irregular and puzzling. Would it not be better, always to avoid both, by saying, in their stead, “*In some way or other*,”—“*In someplace or other*?” In the following examples, however, *other* seems to be used for *otherwise*, without such a connection: “How is THAT used, *other* than as a Conjunction?”—*Ainsworth’s Gram.*, p. 88.

“Will it not be receiv’d that they have done ‘t  
—Who dares receive it *other*?”—SHAK.: *Joh. Dict.*, *w. Other*.

OBS. 9.—*All* and *enough*, *little* and *much*, *more* and *less*, sometimes suggest the idea of quantity so abstractly, that we can hardly consider them as adjuncts to any other words; for which reason, they are, in this absolute sense, put down in our dictionaries as *nouns*. If nouns, however, they are never inflected by cases or numbers; nor do they in general admit the usual adjuncts or definitives of nouns.<sup>†</sup> Thus, we can neither say, *the all*, for *the whole*, nor *an enough*, for *a sufficiency*. And though *a little*, *the more*, and *the less*, are common phrases, the article does not here prove the following word to be a noun; because the expression may either be elliptical, or have the construction of an adverb: as, “Though *the more* abundantly I love you, *the less* I be loved.”—2 *Cor.*, xii, 15. Dr. Johnson seems to suppose that the partitive use of these words makes them nouns; as, “They have *much of the poetry* of Mæcenas, but *little of his liberality*.”—DRYDEN: *in Joh. Dict.* Upon this principle, however, adjectives innumerable would be made nouns; for we can just as well say, “*Some of the poetry*,”—“*Any of the poetry*,”—“*The best of Poetry*,” &c. In all such expressions, the name of the thing divided, is understood in the partitive word; for a part of any thing must needs be of the same species as the whole. Nor was this great grammarian sufficiently attentive to adjuncts, in determining the parts of speech. *Nearly all*, *quite enough*, *so little*, *too much*, *vastly more*, *rather less*, and an abundance of similar phrases, are familiar to every body; in none of which, can any of these words of quantity, however abstract, be very properly reckoned nouns; because the preceding word is an adverb, and adverbs do not relate to any words that are literally nouns. All these may also be used partitively; as, “*Nearly all of us*.”

<sup>\*</sup> *Some*, for *somewhat*, or *in some degree*, appears to me a vulgarism; as, “This pause is generally *some* longer than that of a period.”—*Sanborn’s Gram.*, p. 271. The word *what* seems to have been used adverbially in several different senses; in none of which is it much to be commended: as, “Though I forbear, *what* am I eased?”—*Job*, xvi, 6. “*What* advantageth it me?”—1 *Cor.*, xv, 32. Here *what*, means *in what degree*? *how much*? or *wherein*? “For *what* knowest thou, O wife, whether thou shalt save thy husband?”—1 *Cor.*, vii, 16. Here *how* would have been better. “The enemy, having his country wasted, *what* by himself and *what* by the soldiers, findeth succour in no place.”—*Spenser*. Here *what* means *partly*;—“wasted *partly* by himself and *partly* by the soldiers.” This use of *what* was formerly very common, but is now, I think, obsolete. *What* before an adjective seems sometimes to denote with admiration the degree of the quality; and is called, by some, an adverb; as, “*What partial* judges are our love and hate!”—*Dryden*. But here I take *what* to be an *adjective*; as when we say, *such* partial judges, *some* partial judges, &c. “*What* need I be forward with Death, that calls not on me?”—*Shakspeare*. Here *what* seems to be improperly put in place of *why*.

<sup>†</sup> Dr. Blair, in his Lectures on Rhetoric and Belles-Lettres, often uses the phrase “*this much*,” but it is, I think, more common to say “*thus much*,” even when the term is used substantively.

OBS. 10.—The following are some of Dr. Johnson's "*nouns*;" which, in connexion with the foregoing remarks, I would submit to the judgement of the reader: "Then shall we be news-crammed."—*All* the better; we shall be the more remarkable."—SHAK.: *in Joh. Dict.* "*All* the fitter, Lentulus; our coming is not for salutation; we have business."—BEN JONSON: *ib.* "'Tis *enough* for me to have endeavoured the union of my country."—TEMPLE: *ib.* "Ye take too *much* upon you."—NUMBERS: *ib.* "The fate of love is such, that still it sees too *little* or too *much*."—DRYDEN: *ib.* "He thought not *much* to clothe his enemies."—MILTON: *ib.* "There remained not so *much* as one of them."—*ib.*, *Exod.*, xiv, 28. "We will cut wood out of Lebanon, as *much* as thou shalt need."—*ib.*, 2 *Chronicles*. "The matter of the universe was created before the flood; if any *more* was created, then there must be as *much* annihilated to make room for it."—BURNET: *ib.* "The Lord do so, and much *more*, to Jonathan."—1 SAMUEL: *ib.* "They that would have *more* and *more*, can never have *enough*; no, not if a miracle should interpose to gratify their avarice."—L'ESTRANGE: *ib.* "They gathered some *more*, some *less*."—EXODUS: *ib.* "Thy servant knew nothing of this, *less* or *more*."—1 SAMUEL: *ib.* The first two examples above, Johnson explains thus: "That is, '*Every thing is the better*.'—*Every thing is the fitter*."—*Quarto Dict.* The propriety of this solution may well be doubted; because the similar phrases, "*So much* the better,"—"None the fitter," would certainly be perverted, if resolved in the same way: *much* and *none* are here, very clearly, adverbs.

OBS. 11.—Whatever disposition may be made of the terms cited above, there are instances in which some of the same words can hardly be any thing else than nouns. Thus *all*, when it signifies *the whole*, or *every thing*, may be reckoned a noun; as, "Our *all* is at stake, and irretrievably lost, if we fail of success."—*Addison*. "A torch, snuff and *all*, goes out in a moment, when dipped in the vapour."—*Id.* "The first blast of wind laid it flat on the ground; nest, eagles, and *all*."—*L'Estrange*.

"Finding, the wretched *all* they here can have,  
But present food, and but a future grave."—*Prior*.

"And will she yet debase her eyes on me;  
On me, whose *all* not equals Edward's moiety?"—*Shak.*

"Thou shalt be *all* in *all*, and I in thee,  
Forever; and in me all whom thou lov'st."—*Milton*.

OBS. 12.—There are yet some other words, which, by their construction alone, are to be distinguished from the pronominal adjectives. *Both*, when it stands as a correspondent to *and*, is reckoned a conjunction; as, "For *both* he that sanctifieth, *and* they who are sanctified, are all of one."—*Heb.*, ii, 11. But, in sentences like the following, it seems to be an adjective, referring to the nouns which precede: "Language and manners are *both* established by the usage of people of fashion."—*Amer. Chesterfield*, p. 83. So *either*, corresponding to *or*, and *neither*, referring to *nor*, are conjunctions, and not adjectives. *Which* and *what*, with their compounds, *whichever* or *whicheversoever*, *whatever* or *whatsoever*, though sometimes put before nouns as adjectives, are, for the most part, relative or interrogative pronouns. When the noun is used after them, they are adjectives; when it is omitted, they are pronouns: as, "There is a witness of God, *which* *witness* gives true judgement."—I. *Penington*. Here the word *witness* might be omitted, and *which* would become a relative pronoun. Dr. Lowth says, "*Thy, my, her, our, your, their*, are pronominal adjectives."—*Gram.*, p. 23. This I deny; and the reader may see my reasons, in the observations upon the declension of pronouns.

OBS. 13.—The words *one* and *other*, besides their primitive uses as adjectives, in which they still remain without inflection, are frequently employed as nouns, or as substitutes for nouns; and, in this substantive or pronominal character, they commonly have the regular declension of nouns, and are reckoned such by some grammarians; though others call them indefinite pronouns, and some, (among whom are Lowth and Comly,) leave them with the pronominal adjectives, even when they are declined in both numbers. Each of them may be preceded by either of the articles; and so general is the signification of the former, that almost any adjective may likewise come before it: as, *Any one, some one, such a one, many a one, a new one, an old one, an other one, the same one, the young ones, the little ones, the mighty ones, the wicked one, the Holy One, the Everlasting One*. So, like the French *on*, or *l'on*, the word *one*, without any adjective, is now very frequently used as a general or indefinite term for any man, or any person. In this sense, it is sometimes, unquestionably, to be preferred to a personal pronoun applied indefinitely: as, “Pure religion, and undefiled before God and the Father, is this, To visit the fatherless and widows in their affliction, and to keep *himself* [better, *one’s self*] unspotted from the world.”—*James*, i, 27. But, as its generality of meaning seems to afford a sort of covering for egotism, some writers are tempted to make too frequent a use of it. Churchill ridicules this practice, by framing, or anonymously citing, the following sentence: “If *one* did but dare to abide by *one’s* own judgement, *one’s* language would be much more refined; but *one* fancies *one’s* self obliged to follow, wherever the many choose to lead *one*.”—See *Churchill’s Gram.*, p. 229. Here every scholar will concur with the critic in thinking, it would be better to say: “If *we* did but dare to abide by *our* own judgement, *our* language would be much more refined; but *we* fancy *ourselves* obliged to follow wherever the many choose to lead *us*.”—See *ib.*

OBS. 14.—Of the pronominal adjectives the following distribution has been made: “*Each*, every, and *either*, are called *distributives*; because, though they imply all the persons or things that make up a number, they consider them, not as one whole, but as taken separately. *This*, *that*, *former*, *latter*, *both*, *neither*, are termed *demonstratives*; because they point out precisely the subjects to which they relate. *This* has *these* for its plural; *that* has *those*. *This* and *that* are frequently put in opposition to each other; *this*, to express what is nearer in place or time; *that*, what is more remote. *All*, *any*, *one*, *other*, *some*, *such*, are termed *indefinite*. *Another* is merely *other* in the singular, with the indefinite article not kept separate from it.\* *Other*, when not joined with a noun, is occasionally used both in the possessive case, and in the plural number: as,

---

\* There seems to be no good reason for joining *an* and *other*. on the contrary, the phrase *an other* is always as properly two words, as the phrase *the other*, and more so. The latter, being long ago vulgarly contracted into *t’other*, probably gave rise to the apparent contraction *another*; which many people nowadays are ignorant enough to divide wrong, and mispronounce. See “*a-no-ther*” in *Murray’s Spelling-Book*, p. 71; and “*a-noth-er*” in *Emerson’s*, p. 76. *An* here excludes any other article; and both analogy and consistency require that the words be separated. Their union, like that of the words *the* and *other*, has led sometimes to an improper repetition of the article: as, “*Another* such *a* man,” for, “An other such man.”—“Bind my hair up. An ‘twas yesterday? No, nor *the t’other* day.”—BEN JONSON: in *Joh. Dict.* “He can not tell when he should take *the tone*, and when *the tother*.”—SIR T. MOORE: Tooke’s D. P., Vol. 15, p. 448. That is—“when he should take *the one* and when *the other*.” Besides, the word *other* is declined, like a noun, and has the plural *others*; but the compounding of *another* constrains our grammarians to say, that this word “has no plural.” All these difficulties will be removed by writing *an other* as two words. The printers chiefly rule this matter. To them, therefore, I refer it; with directions, not to unite these words for me, except where it has been done in the manuscript, for the sake of exactness in quotation.—G. BROWN.

Teach me to feel *an other's* wo, to hide the fault I see;  
That mercy I to *others* show, that mercy show to me.'—*Pope*.

*Each other* and *one another*, when used in conjunction, may be termed *reciprocals*; as they are employed to express a reciprocal action; the former, between two persons or things; the latter, *between*\* more than two. The possessive cases of the personal pronouns have been also ranked under the head of pronominal adjectives, and styled possessives; but for this I see no good reason."—*Churchill's Gram.*, p. 76.

OBS. 15.—The reciprocal terms *each other* and *one an other* divide, according to some mutual act or interchangeable relation, the persons or things spoken of, and are commonly of the singular number only. *Each other*, if rightly used, supposes two, and only two, to be acting and acted upon reciprocally; *one an other*, if not misapplied, supposes more than two, under like circumstances, and has an indefinite reference to all taken distributively: as, "Brutus and Aruns killed *each other*." That is, *Each combatant* killed *the other*. "The disciples were commanded to love *one an other*, and to be willing to wash *one an other's* feet." That is, *All* the disciples were commanded to love *mutually*; for both terms, *one* and *other*, or *one disciple* and *an other disciple*, must be here understood as taken indefinitely. The reader will observe, that the two terms thus brought together, if taken substantively or pronominally in parsing, must be represented as being of *different cases*; or, if we take them adjectively the noun, which is twice to be supplied, will necessarily be so.

OBS. 16.—Misapplications of the foregoing reciprocal terms are very frequent in books, though it is strange that phrases so very common should not be rightly understood. Dr. Webster, among his explanations of the word *other*, has the following: "Correlative to *each*, and applicable to *any number* of individuals."—*Octavo Dict.* "*Other* is used as a substitute for a noun, and in this use has the plural number and the sign of the possessive case."—*Ib.* Now it is plain, that the word *other*, as a "correlative to *each*," may be so far "a substitute for a noun" as to take the form of the possessive case singular, and perhaps also the plural; as, "Lock'd in *each other's* arms they lay." But, that the objective *other*, in any such relation, can convey a plural idea, or be so loosely applicable—"to *any number* of individuals," I must here deny. If it were so, there would be occasion, by the foregoing rule, to make it plural in form; as, "The ambitious strive to excel *each others*." But this is not English. Nor can it be correct to say of more than two, "They all strive to excel *each other*." Because the explanation must be, "*Each* strives to excel *other*," and such a construction of the word *other* is not agreeable to modern usage. *Each other* is therefore not equivalent to *one an other*, but nearer perhaps to *the one the other*: as, "The two generals are independent *the one of the other*."—*Voltaire's Charles XII*, p. 67. "And these are contrary *the one to the other*."—*Gal.*, v, 17. "The necessary connexion *of the one with the other*."—*Blair's Rhet.*, p. 304. The latter phraseology, being definite and formal, is now seldom used, except the terms be separated by a verb or a preposition. It is a literal version of the French *l'un l'autre*, and in some instances to be preferred to *each other*; as,

"So fellest foes, whose plots have broke their sleep,  
To take *the one the other*, by some chance."—*Shak.*

\* This is a misapplication of the word *between*, which cannot have reference to more than two things or parties: the term should have been *among*.—G. BROWN.

OBS. 17.—The Greek term for the reciprocals *each other* and *one an other*, is a certain plural derivative from ἄλλος, *other*; and is used in three cases, the genitive, ἀλλήλων, the dative, ἀλλήλοις, the accusative, ἀλλήλους: these being all the cases which the nature of the expression admits; and for all these we commonly use the *objective*;—that is, we put *each* or *one* before the objective *other*. Now these English terms, taken in a reciprocal sense, seldom, if ever, have any plural form; because the article in *one an other* admits of none; and *each other*, when applied to two persons or things, (as it almost always is,) does not require any. I have indeed seen, in some narrative, such an example as this: “The two men were ready to cut *each others’ throats*.” But the meaning could not be, that each was ready to cut “*others’ throats*,” and since, between the two, there was but one throat for *each* to cut, it would doubtless be more correct to say, “*each other’s throat*.” So Burns, in touching a gentler passion, has an inaccurate elliptical expression:

“’Tis when a youthful, loving, modest pair,  
In *others’* arms, breathe out the tender tale.”—*Cotter’s Sat. Night*.

He meant, “In *each other’s* arms;” the apostrophe being misplaced, and the metre improperly allowed to exclude a word which the sense requires. Now, as to the plural of *each other*, although we do not use the objective, and say of many, “They love *each others*,” there appear to be some instances in which the possessive plural, *each others’*, would not be improper; as, “Sixteen ministers, who meet weekly at *each other’s* houses.”—*Johnson’s Life of Swift*. Here the singular is wrong, because the governing noun implies a plurality of owners. “The citizens of different states should know *each others characters*.”—*Webster’s Essays*, p. 35. This also is wrong, because no possessive sign is used. Either write, “*each others’ characters*,” or say, “*one an other’s character*.”

OBS. 18.—*One* and *other* are, in many instances, terms relative and partitive, rather than reciprocal; and, in this use, there seems to be an occasional demand for the plural form. In French, two parties are contrasted by *les uns—les autres*; a mode of expression seldom, if ever imitated in English. Thus: “Il les séparera *les uns* d’avec *les autres*.” That is, “He shall separate them *some* from *others*,”—or, literally, “*the ones* from *the others*.” Our version is: “He shall separate them *one from an other*.”—*Matt.*, xxv, 32. Beza has it: “Separabit eos *alteros ab alteris*.” The Vulgate: “Separabit eos *ab invicem*.” The Greek: “Ἀφοριεῖ αὐτοὺς ἀπ’ ἀλλήλων.” To separate many “*one from an other*,” seems, literally, to leave none of them together; and this is not, “as a shepherd divideth his sheep from the goats.” To express such an idea with perfect propriety, in our language, therefore, we must resort to some other phraseology. In Campbell’s version, we read: “And *out of them* he will separate *the good from the bad*, as a shepherd separateth *the* sheep from the goats.” Better, perhaps, thus: “And he shall separate them, *the righteous from the wicked*, as a shepherd divideth his sheep from the goats.”

OBS. 19.—Dr. Bullions says, “*One* and *other* refer to *the singular only*.”—*Eng. Gram.*, p. 98. Of *ones* and *others* he takes no notice; nor is he sufficiently attentive to usage in respect to the roots. If there is any absurdity in giving a *plural* meaning to the singulars *one* and *other*, the following sentences need amendment: “*The one* preach Christ of contention; but *the other*, of love.”—*Philippians*, i, 16. Here “*the one*” is put for “the one *class*,” and “*the other*” for “the other *class*,” the ellipsis in the first instance not being a very proper one. “The confusion arises, when *the one* will put *their* sickle into *the other’s* harvest.”—LESLEY: in *Joh. Dict*. This may be corrected by saying, “*the one party*,” or, “*the one nation*,” in stead of “*the one*.” “It is clear from Scripture, that Antichrist shall be

permitted to work false miracles, and that they shall so counterfeit the true, that it will be hard to discern *the one* from *the other*.”—*Barclay’s Works*, iii, 93. If in any ease we may adopt the French construction above, “*the ones* from the *others*,” it will be proper here. Again: “I have seen *children* at a table, who, whatever was there, never asked for any thing, but contentedly took what was given them: and, at an other place, I have seen *others* cry for every thing they saw; they must be served out of every dish, and that first too. What made this vast difference, but this: That *one was* accustomed to have what *they* called or cried for; *the other* to go without it?”—*Locke, on Education*, p. 55. Here, (with *were* for *was*,) the terms of contrast ought rather to have been, *the ones—the others; the latter—the former*; or, *the importunate—the modest*. “Those nice shades, by which *virtues and vices* approach *each one another*.”—*Murray’s Gram.*, i, p. 350. This expression should be any thing, rather than what it is. Say, “By which *virtue* and *vice* approach *each other*.” Or: “By which certain virtues and vices *approximate—blend—become difficult of distinction*.”

OBS. 20.—“Most authors have given the name of *pronoun adjectives*, [‘pronouns adjective,’ or ‘pronominal adjectives,’] to *my, mine; our, ours; thy, thine; your, yours; his, her, hers; their, theirs*: perhaps because they are followed by, or refer to, some substantive [expressed or understood after them]. But, were they adjectives, they must either express the quality of their substantive, or limit its extent: adjectives properly so called, do the first; definitive pronouns do the last. All adjectives [that are either singular or plural,] agree with their substantives in *number*; but I can say, ‘They are *my books*’: *my* is singular, and *books* plural; therefore *my* is not an adjective. Besides, *my* does not express the *quality* of the books, but only ascertains the possessor, the same as the genitive or substantive does, to which it is similar. Examples: ‘They are *my books*’;—‘They are *John’s books*’; &c.”—*Alex. Murray’s Gram.*, p. 108.

OBS. 21.—To the class of Participial Adjectives, should be referred all such words as the following: (1.) The simple participles made adjectives by position; as, “A *roaring* lion,”—“A *raging* bear,”—“A *brawling* woman,”—“A *flattering* mouth,”—“An *understanding* heart,”—“*Burning* coals,”—“The *hearing* ear, and the *seeing* eye.”—*Bible*. “A *troubled* fountain,”—“A *wounded* spirit,”—“An *appointed* time.”—*Ib.* (2.) Words of a participial appearance, formed from nouns by adding *ed*; as, “The eve thy *sainted* mother died.”—*W. Scott*. “What you write of me, would make me more *conceited*, than what I scribble myself.”—*Pope*. (3.) Participles, or participial adjectives, reversed in sense by the prefix *un*; as, *unaspiring, unavailing, unbelieving, unbattered, uninjured, unbefriended*. (4.) Words of a participial form construed elliptically, as if they were nouns; as, “Among the *dying* and the dead.”—“The *called* of Jesus Christ.”—*Rom.*, i, 6. “Dearly *beloved*, I beseech you.”—1 *Pet.*, ii, 11. “The *redeemed* of the Lord shall return.”—*Isaiah*, li, 11. “They talk, to the grief of thy *wounded*.”—*Psalms*, lxix, 26: *Margin*.

OBS. 22.—In the text, Prov., vii, 26, “She hath cast down many wounded,” *wounded* is a participle; because the meaning is, “*many men wounded*,” and not, “*many wounded men*.” Our Participial Adjectives are exceedingly numerous. It is not easy to ascertain how many there are of them; because almost any simple participle may be set before a noun, and thus become an adjective: as,

“Where *smiling* spring its earliest visit paid,  
And *parting* summer’s *ling’ring* blooms delay’d.”—*Goldsmith*.

OBS. 23.—Compound Adjectives, being formed at pleasure, are both numerous and various. In their formation, however, certain analogies may be traced: (1.) Many of them are formed by joining an adjective to its noun, and giving to the latter the participial termination *ed*; as, *able-bodied*, *sharp-sighted*, *left-handed*, *full-faced*, *flat-nosed*, *thick-lipped*, *cloven-footed*, *high-heeled*. (2.) In some, two nouns are joined, the latter assuming *ed*, as above; as, *bell-shaped*, *hawk-nosed*, *eagle-sighted*, *lion-hearted*, *web-footed*. (3.) In some, the object of an active participle is placed before it; as, *money-getting*, *time-serving*, *self-consuming*, *cloud-compelling*, *fortune-hunting*, *sleep-disturbing*. (4.) Some, embracing numerals, form a series, though it is seldom carried far; as, *one-legged*, *two-legged*, *three-legged*, *four-legged*. So, *one-leaved*, *two-leaved*, *three-leaved*, *four-leaved*: or, perhaps better as Webster will have them, *one-leafed*, *two-leafed*, &c. But, upon the same principle, *short-lived*, should be *short-lifed*, and *long-lived*, *long-lifed*. (5.) In some, there is a combination of an adjective and a participle; as, *noble-looking*, *high-sounding*, *slow-moving*, *thorough-going*, *hard-finished*, *free-born*, *heavy-laden*, *only-begotten*. (6.) In some, we find an adverb and a participle united; as, *ever-living*, *ill-judging*, *well-pleasing*, *far-shooting*, *forth-issuing*, *back-sliding*, *ill-trained*, *down-trodden*, *above-mentioned*. (7.) Some consist of a noun and a participle which might be reversed with a preposition between them; as, *church-going*, *care-crazed*, *travel-soiled*, *blood-bespotted*, *dew-sprinkled*. (8.) A few, and those inelegant, terminate with a preposition; as, *unlooked-for*, *long-looked-for*, *unthought-of*, *unheard-of*. (9.) Some are phrases of many words, converted into one part of speech by the hyphen; as, “Where is the *ever-to-be-honoured* Chaucer?”—*Wordsworth*.

“And, with *God-only-knows-how-gotten* light,  
Informs the nation what is wrong or right.”—*Snelling’s Gift for Scribblers*, p. 49.

OBS. 24.—Nouns derived from compound adjectives, are generally disapproved by good writers; yet we sometimes meet with them: as, *hard-heartedness*, for hardness of heart, or cruelty; *quick-sightedness*, for quickness of sight, or perspicacity; *worldly-mindedness*, for devotion to the world, or love of gain; *heavenly-mindedness*, for the love of God, or true piety. In speaking of ancestors or descendants, we take the noun, *father*, *mother*, *son*, *daughter*, or *child*; prefix the adjective *grand*; for the second generation; *great*, for the third; and then, sometimes, repeat the same, for degrees more remote: as, *father*, *grandfather*, *great-grandfather*, *great-great-grandfather*. “What would my *great-grandmother* say, thought I, could she know that thou art to be chopped up for fuel to warm the frigid fingers of her *great-great-great-granddaughters*!”—*T. H. Bayley*.

#### MODIFICATIONS.

Adjectives have, commonly, no modifications but the forms of *comparison*. Comparison is a variation of the adjective, to express quality in different degrees: as, *hard*, *harder*, *hardest*; *soft*, *softer*, *softest*.

There are three degrees of comparison; the *positive*, the *comparative*, and the *superlative*.

The *positive degree* is that which is expressed by the adjective in its simple form: as, “An elephant is *large*; a mouse, *small*; a lion, *fierce*, *active*, *bold*, and *strong*.”

The *comparative degree* is that which is *more* or *less* than something contrasted with it: as, “A whale is *larger* than an elephant; a mouse is a much *smaller* animal than a rat.”

The *superlative degree* is that which is *most* or *least* of all included with it: as, “The whale is the *largest* of the animals that inhabit this globe; the mouse is the *smallest* of all beasts.”—*Dr. Johnson*.

Those adjectives whose signification does not admit of different degrees, cannot be compared; as, *two*, *second*, *all*, *every*, *immortal*, *infinite*.

Those adjectives which may be varied in sense, but not in form, are compared by means of adverbs; as, fruitful, *more* fruitful, *most* fruitful—fruitful, *less* fruitful, *least* fruitful.

### OBSERVATIONS.

OBS. 1.—“Some scruple to call the positive a degree of comparison; on the ground, that it does not imply either comparison, or degree. But no quality can exist, without existing in some degree: and, though the positive is very frequently used without reference to any other degree; as it is *the standard*, with which other degrees of the quality are compared, it is certainly an essential object of the comparison. While these critics allow only two degrees, we might in fact with more propriety say, that there are five: 1, the quality in its standard state, or positive degree; as *wise*: 2, in a higher state, or the comparative ascending; *more wise*: 3, in a lower, or the comparative descending; *less wise*: 4, in the highest state, or superlative ascending; *most wise*: 5, in the lowest state, or superlative descending; *least wise*. All grammarians, however, agree about the things themselves, and the forms used to express them; though they differ about the names, by which these forms should be called: and as those names are practically best, which tend least to perplex the learner, I see no good reason here for deviating from what has been established by long custom.”—*Churchill's Gram.*, p. 231.

OBS. 2.—Churchill here writes plausibly enough, but it will be seen, both from his explanation, and from the foregoing definitions of the degrees of comparison, that there are but three. The comparative and the superlative may each be distinguishable into the ascending and the descending, as often as we prefer the adverbial form to the regular variation of the adjective itself; but this imposes no necessity of classing and defining them otherwise than simply as the comparative and the superlative. The assumption of two comparatives and two superlatives, is not only contrary to the universal practice of the teachers of grammar; but there is this conclusive argument against it—that the regular method of comparison has no degrees of diminution, and the form which has such degrees, is *no inflection* of the adjective. If there is any exception, it is in the words, *small*, *smaller*, *smallest*, and *little*, *less*, *least*. But of the smallness or littleness, considered abstractly, these, like all others, are degrees of increase, and not of diminution. *Smaller* is as completely opposite to *less small*, as *wiser* is to *less wise*. *Less* itself is a comparative descending, only when it diminishes some *other* quality: *less little*, if the phrase were proper, must needs be nearly equivalent to *greater* or *more*. Churchill, however, may be quite right in the following remark: “The comparative ascending of an adjective, and the comparative descending of an adjective expressing the opposite quality, are often considered synonymous, by those who do not discriminate nicely between ideas. But *less imprudent* does not imply precisely the same thing as *more prudent*; or *more brave*, the same as *less cowardly*.”—*New Gram.*, p. 231.

OBS. 3.—The definitions which I have given of the three degrees of comparison, are new. In short, I know not whether any other grammarian has ever given what may justly be called a *definition*, of any one of them. Here, as in most other parts of grammar, loose *remarks*, ill-written and untrue assertions, have sufficed. The explanations found in many English grammars are the following: “The positive state expresses the quality of an object, without any increase or diminution; as, good, wise, great. The comparative degree increases or lessens the positive in signification; as, wiser, greater, less wise. The superlative degree increases or lessens the positive to the highest or [the] lowest degree; as, wisest, greatest, least wise. The simple word, or positive, becomes [the] comparative by adding *r* or *er*; and the superlative by adding *st* or *est*, to the end of it. And the adverbs *more* and *most*, placed before the adjective, have the same effect; as, wise, *more* wise, *most* wise.”—*Murray’s Grammar*, 2d Ed., 1796, p. 47. If a man wished to select some striking example of bad writing—of thoughts ill conceived, and not well expressed—he could not do better than take the foregoing: provided his auditors knew enough of grammar to answer the four simple questions here involved; namely, What is the positive degree? What is the comparative degree? What is the superlative degree? How are adjectives regularly compared? To these questions I shall furnish *direct answers*, which the reader may compare with such as he can derive from the foregoing citation: the last two sentences of which Murray ought to have credited to Dr. Lowth; for he copied them literally, except that he says, “the adverbs *more* AND *most*,” for the Doctor’s phrase, “the adverbs *more* OR *most*.” See the whole also in *Kirkham’s Grammar*, p. 72; in *Ingersoll’s*, p. 35; in *Alger’s*, p. 21; in *Bacon’s*, p. 18; in *Russell’s*, p. 14; in *Hamlin’s*, p. 22; in *J. M. Putnam’s*, p. 33; in *S. Putnam’s*, p. 20; in *R. C. Smith’s*, p. 51; in *Rev. T. Smith’s*, p. 20.

OBS. 4.—In the five short sentences quoted above, there are more errors, than can possibly be enumerated in ten times the space. For example: (1.) If one should say of a piece of iron, “It grows cold or hot very rapidly,” *cold* and *hot* could not be in the “*positive state*,” as they define it: because, either the “quality” or the “object,” (I know not which,) is represented by them as “without any increase or diminution;” and this would not, in the present case, be true of either; for iron changes in bulk, by a change of temperature. (2.) What, in the first sentence, is erroneously called “the positive *state*,” in the second and the third, is called, “the positive *degree*,” and this again, in the fourth, is falsely identified with “the simple *word*.” Now, if we suppose the meaning to be, that “the positive state,” “the positive degree,” or “the simple word,” is “without any increase or diminution;” this is expressly contradicted by three sentences out of the five, and implicitly, by one of the others. (3.) Not one of these sentences is *true*, in the most obvious sense of the words, if in any other; and yet the doctrines they were designed to teach, may have been, in general, correctly gathered from the examples. (4.) The phrase, “*positive in signification*,” is not intelligible in the sense intended, without a comma after *positive*; and yet, in an armful of different English grammars which contain the passage, I find not one that has a point in that place. (5.) It is not more correct to say, that the comparative or the superlative degree, “increases or lessens the positive,” than it would be to aver, that the plural number increases or lessens the singular, or the feminine gender, the masculine. Nor does the superlative mean, what a certain learned Doctor understands by it—namely, “*the greatest or least possible degree*.” If it did, “the *thickest* parts of his skull,” for example, would imply small room for brains; “the *thinnest*,” protect them ill, if there were any. (6.) It is improper to say, “*The simple word becomes* [the] *comparative by adding r or er*; and *the superlative by adding st or est*.” The thought is wrong; and nearly all the words are misapplied; as, *simple* for *primitive*, *adding* for *assuming*, &c. (7.) Nor is it very wise to say, “the adverbs *more* and *most*, placed before the adjective, *have the same effect*,” because it

ought to be known, that the effect of the one is very different from that of the other! “*The same effect*,” cannot here be taken for any effect previously described; unless we will have it to be, that these words, *more* and *most*, “become comparative by adding *r* or *er*, and the superlative by adding *st* or *est*, to the end of them:” all of which is grossly absurd. (8.) The repetition of the word *degree*, in saying, “The superlative *degree* increases or lessens the positive to the highest or lowest *degree*,” is a disagreeable tautology. Besides, unless it involves the additional error of presenting the same word in different senses, it makes one degree swell or diminish an other *to itself*; whereas, in the very next sentence, this singular agency is forgotten, and a second equally strange takes its place: “The positive *becomes* the superlative by adding *st* or *est*, to the end of it;” i. e., to the end of *itself*. Nothing can be more ungrammatical, than is much of the language by which grammar itself is now professedly taught!

OBS. 5.—It has been almost universally assumed by grammarians, that the positive degree is *the only standard* to which the other degrees can refer; though many seem to think, that the superlative always implies or includes the comparative, and is consequently inapplicable when only two things are spoken of. Neither of these positions is involved in any of the definitions which I have given above. The reader may think what he will about these points, after observing the several ways in which each form may be used. In the phrases, “*greater* than Solomon,”—“*more* than a bushel,”—“*later* than one o’clock,” it is not immediately obvious that the positives *great*, *much*, and *late*, are the real terms of contrast. And how is it in the Latin phrases, “*Dulcior melle*, sweeter than honey,”—“*Præstantior auro*, better than gold?” These authors will resolve all such phrases thus: “*greater*, than Solomon *was great*,”—“*more*, than a bushel *is much*,” &c. As the conjunction *than* never governs the objective case, it seems necessary to suppose an ellipsis of some verb after the noun which follows it as above; and possibly the foregoing solution, uncouth as it seems, may, for the English idiom, be the true one: as, “My Father is *greater than I*.”—*John*, xiv, 28. That is, “My Father is greater *than I am*,”—or, perhaps, “than I am *great*.” But if it appear that *some* degree of the same quality must always be contrasted with the comparative, there is still room to question whether this degree must always be that which we call the positive. Cicero, in exile, wrote to his wife: “Ego autem hoc *miserior* sum, quam tu, quæ es *miserrima*, quod ipsa calamitas communis est utriusque nostrum, sed culpa mea propria est.”—*Epist. ad Fam.*, xiv, 3. “But in this I am *more wretched*, than thou, who art *most wretched*, that the calamity itself is common to us both, but the fault is all my own.”

OBS. 6.—In my Institutes and First Lines of English Grammar, I used the following brief definitions: “The *comparative degree* is that which exceeds the positive; as, *harder*, *softer*, *better*.” “The *superlative degree* is that which is not exceeded; as, *hardest*, *softest*, *best*.” And it is rather for the sake of suggesting to the learner the peculiar *application* of each of these degrees, than from any decided dissatisfaction with these expressions, that I now present others. The first, however, proceeds upon the common supposition, that the comparative degree of a quality, ascribed to any object, must needs be contrasted with the positive in some other, or with the positive in the same at an other time. This idea may be plausibly maintained, though it is certain that the positive term referred to, is seldom, if ever, allowed to appear. Besides, the comparative or the superlative *may* appear, and in such a manner as to be, or seem to be, in the point of contrast. Thus: “Objects near our view are apt to be thought *greater than those of a larger size*, that are more remote.”—*Locke’s Essay*, p. 186. Upon the principle above, the explanation here must be, that the meaning is—“*greater* than those of a larger size *are thought great*.” “The *poor* man that

loveth Christ, is *richer than the richest man* in the world, that hates him.”—*Bunyan’s Pilgrim’s Progress*, p. 86. This must be “*richer* than the richest man *is rich*.” The riches contemplated here, are of different sorts; and the comparative or the superlative of one sort, may be exceeded by either of these degrees of an other sort, though the same epithet be used for both. So in the following instances: “He that is *higher than the highest* regardeth; and there be *higher than they*.”—*Eccl.*, v, 8. That is, “He that is higher than the highest *earthly dignitaries*, regardeth; and there are higher *authorities* than *these*.” “*Fairer* than aught imagined else *fairest*.”—*Pollok*. “*Sadder than saddest* night.”—*Byron*. It is evident that the superlative degree is not, in general, that which *cannot be* exceeded, but that which, in the actual state of the things included, “*is* not exceeded.” Again, as soon as any given comparative or superlative is, by a further elevation or intension of the quality, surpassed and exceeded, that particular degree, whatever it was, becomes merely positive; for the positive degree of a quality, though it commonly includes the very lowest measure, and is understood to exceed nothing, may at any time *equal* the very highest. There is no paradox in all this, which is not also in the following simple examples: “*Easier*, indeed, I was, but far from *easy*.”—*Cowper’s Life*, p. 50.

“Who canst the *wisest wiser* make,  
And babes *as wise* as they.”—*Cowper’s Poems*.

OBS. 7.—The relative nature of these degrees deserves to be further illustrated. (1.) It is plain, that the greatest degree of a quality in one thing, may be less than the least in an other; and, consequently, that the least degree in one thing, may be greater than the greatest in an other. Thus, the *heaviest* wood is *less heavy* than the *lightest* of the metals; and the *least valuable* of the metals is perhaps of *more value* than the *choicest* wood. (2.) The comparative degree may increase upon itself, and be repeated to show the gradation. Thus, a man may ascend into the air with a balloon, and rise *higher*, and *higher*, and *higher*, and *higher*, till he is out of sight. This is no uncommon form of expression, and the intension is from comparative to comparative. (3.) If a ladder be set up for use, one of its rounds will be *the highest*, and one other will be *the lowest*, or *least high*. And as that which is *highest*, is *higher* than all the rest, so every one will be *higher* than all below it. *The higher rounds*, if spoken of generally, and without definite contrast, will be those in the upper half; *the lower rounds*, referred to in like manner, will be those in the lower half, or those not far from the ground. *The highest rounds*, or *the lowest*, if we indulge such latitude of speech, will be those near the top or the bottom; there being, absolutely, or in *strictness* of language, but *one* of each. (4.) If *the highest* round be removed, or left uncounted, the next becomes the *highest*, though not *so high* as the former. For every one is *the highest* of the number which it completes. All admit this, till we come to *three*. And, as the third is *the highest of the three*, I see not why the second is not properly *the highest of the two*. Yet nearly all our grammarians condemn this phrase, and prefer “*the higher of the two*.” But can they give a *reason* for their preference? That the comparative degree is implied between the positive and the superlative, so that there must needs be three terms before the latter is applicable, is a doctrine which I deny. And if the second is *the higher of the two*, because it is *higher than the first*; is it not also *the highest of the two*, because it *completes the number*? (5.) It is to be observed, too, that as our ordinal numeral *first*, denoting the one which begins a series, and having reference of course to more, is an adjective of the superlative degree, equivalent to *foremost*, of which it is perhaps a contraction; so *last* likewise, though no numeral, is a superlative also. (6.) These, like other superlatives, admit of a looser application, and may possibly include more than one thing at the beginning or at the end of a series: as, “*The last years* of man are often

helpless, like *the first*.” (7.) With undoubted propriety, we may speak of *the first two*, *the last two*, *the first three*, *the last three*, &c.; but to say, *the two first*, *the two last*, &c., with this meaning, is obviously and needlessly inaccurate. “*The two first men* in the nation,” may, I admit, be good English; but it can properly be meant only of *the two most eminent*. In specifying any part of a *series*, we ought rather to place the cardinal number after the ordinal. (8.) Many of the foregoing positions apply generally, to almost all adjectives that are susceptible of comparison. Thus, it is a common saying, “Take *the best first*, and *all* will be *best*.” That is, remove that degree which is now superlative, and the epithet will descend to an other, “*the next best*.”

OBS. 8.—It is a common assumption, maintained by almost all our grammarians, that the degrees which add to the adjective the terminations *er* and *est*, as well as those which are expressed by *more* and *most*, indicate an *increase*, or heightening, of the quality expressed by the positive. If such must needs be their import, it is certainly very improper, to apply them, as many do, to what can be only an approximation to the positive. Thus Dr. Blair: “Nothing that belongs to human nature, is *more universal* than the relish of beauty of one kind or other.”—*Lectures*, p. 16. “In architecture, the Grecian models were long esteemed *the most perfect*.”—*Ib.*, p. 20. Again: In his reprehension of Capernaum, the Saviour said, “It shall be *more tolerable* for the land of Sodom, in the day of judgement, than for thee.”—*Matt.*, xi, 24. Now, although ἀνεκτοτερον, *more tolerable*, is in itself a good comparative, who would dare infer from this text, that in the day of judgement Capernaum shall fare *tolerably*, and Sodom, *still better*? There is much reason to think, that the essential nature of these grammatical degrees has not been well understood by those who have heretofore pretended to explain them. If we except those few approximations to sensible qualities, which are signified by such words as *whitish*, *greenish*, &c., there will be found no actual measure, or inherent degree of any quality, to which the simple form of the adjective is not applicable; or which, by the help of intensive adverbs of a positive character, it may not be made to express; and that, too, without becoming either comparative or superlative, in the technical sense of those terms. Thus *very white*, *exceedingly white*, *perfectly white*, are terms quite as significant as *whiter* and *whitest*, if not more so. Some grammarians, observing this, and knowing that the Romans often used their superlative in a sense merely intensive, as *altissimus* for *very high*, have needlessly divided our English superlative into two, “*the definite*, and the *indefinite*,” giving the latter name to that degree which we mark by the adverb *very*, and the former to that which alone is properly called the superlative. Churchill does this: while, (as we have seen above,) in naming the degrees, he pretends to prefer “what has been established by long custom.”—*New Gram.*, p. 231. By a strange oversight also, he failed to notice, that this doctrine interferes with his scheme of *five* degrees, and would clearly furnish him with *six*: to which if he had chosen to add the “*imperfect degree*” of Dr. Webster, (as *whitish*, *greenish*, &c.,) which is recognized by Johnson, Murray, and others, he might have had *seven*. But I hope my readers will by-and-by believe there is *no need* of more than *three*.

OBS. 9.—The true nature of the Comparative degree is this: it denotes either some *excess* or some *relative deficiency* of the quality, when one thing or party is compared with an other, in respect to what is in both: as, “Because the foolishness of God is *wiser* than men; and the weakness of God is *stronger* than men.”—1 *Cor.*, i, 25. “Few languages are, in fact, *more copious* than the English.”—*Blair’s Rhet.*, p. 87. “Our style is *less compact* than that of the ancients.”—*Ib.*, p. 88. “They are counted to him *less* than nothing and vanity.”—*Isaiah*, xl, 17. As the comparatives in a long *series* are necessarily many, and

some of them *higher* than others, it may be asked, “How can the comparative degree, in this case, be merely ‘that which exceeds *the positive*?’” Or, as our common grammarians prompt me here to say, “May not the comparative degree increase or lessen *the comparative*, in signification?” The latter form of the question they may answer for themselves; remembering that the comparative *may advance from the comparative*, step by step, from the second article in the series to the utmost. Thus, three is a higher or greater number than two; but four is higher than three; five, than four; and so on, *ad infinitum*. My own form of the question I answer thus: “The *highest* of the *higher* is not *higher* than the rest are *higher*, but simply *higher* than they are *high*.”

OBS. 10.—The true nature of the Superlative degree is this: it denotes, in a quality, *some extreme* or *unsurpassed extent*. It may be used either absolutely, as being without bounds; or relatively, as being confined within any limits we choose to give it. It is equally applicable to that which is naturally unsurpassable, and to that which stands within the narrowest limits of comparison. The *heaviest* of *three feathers* would scarcely be thought a *heavy* thing, and yet the expression is proper; because the weight, whatever it is, is relatively *the greatest*. The *youngest* of three persons, may not be *very young*; nor need we suppose the *oldest* in a whole college to have arrived at *the greatest conceivable age*. What then shall be thought of the explanations which our grammarians have given of this degree of comparison? That of Murray I have already criticised. It is ascribed to him, not upon the supposition that he invented it; but because common sense continues to give place to the authority of his name in support of it. Comly, Russell, Alger, Ingersoll, Greenleaf, Fisk, Merchant, Kirkham, T. Smith, R. C. Smith, Hall, Hiley, and many others, have copied it into their grammars, as being better than any definition they could devise. Murray himself unquestionably took it from some obscure pedagogue among the old grammarians. Buchanan, who long preceded him, has nearly the same words: “The Superlative increases or diminishes the Positive in Signification, to the highest or [the] lowest Degree of all.”—*English Syntax*, p. 28. If this is to be taken for a grammatical definition, what definition shall grammar itself bear?

OBS. 11.—Let us see whether our later authors have done better. “The *superlative* expresses a quality in the greatest or [the] least *possible* degree; as, *wisest*, *coldest*, *least wise*.”—*Webster’s Old Gram.*, p. 13. In his later speculations, this author conceives that the termination *ish* forms the *first* degree of comparison; as, “Imperfect, *dankish*,” Pos. *dank*, Comp. *danker*, Superl. *dankest*. “There are therefore *four* degrees of comparison.”—*Webster’s Philosophical Gram.* p. 65. “The *fourth* denotes the utmost or [the] least degree of a quality; as, *bravest*, *wisest*, *poorest*, *smallest*. This is called the *superlative* degree.”—*Ib.*; also his *Improved Gram.*, 1831, p. 47. “This degree is called the Superlative degree, from its raising the amount of the quality above that of all others.”—*Webber’s Gram.*, 1832, p. 26. It is not easy to quote, from any source, a worse sentence than this; if, indeed, so strange a jumble of words can be called a sentence. “*From its raising the amount*,” is in itself a vicious and untranslatable phrase, here put for “*because it raises the amount*,” and who can conceive of the superlative degree, as “*raising the amount of the quality* above that of *all other qualities*?” Or, if it be supposed to mean, “above the amount of all other *degrees*,” what is this amount? Is it that of one and one, the *positive* and the *comparative* added numerically? or is it the sum of all the quantities which these may indicate? Perhaps the author meant, “above the amount of all other *amounts*.” If none of these absurdities is here taught, nothing is taught, and the words are nonsense. Again: “The *superlative degree* increases or diminishes the positive to the highest or [the] lowest degree of *which it is susceptible*.”—*Bucke’s Classical Gram.*, p. 49. “The superlative degree is

generally formed by adding *st* or *est* to the positive; and denotes *the greatest excess*.”—*Nutting’s Gram.*, p. 33. “The Superlative increases or diminishes the Signification of the Positive or Adjective, to a *very high* or a *very low* Degree.”—*British Gram.*, p. 97. What *excess* of skill, or what *very high degree* of acuteness, have the *brightest* and *best* of these grammarians exhibited? There must be some, if their definitions are *true*.

OBS. 12.—The common assertion of the grammarians, that the superlative degree is not applicable to *two* objects,\* is not only unsupported by any reason in the nature of things, but it is contradicted in practice by almost every man who affirms it. Thus Maunder: “When only two persons or things are spoken of comparatively, to use the superlative is improper: as, ‘Deborah, my dear, give those two boys a lump of sugar each; and let Dick’s be the largest, because he spoke first.’ This,” says the critic, “should have been ‘larger.’”—*Maunder’s Gram.*, p. 4. It is true, the comparative *might* here have been used; but the superlative is clearer, and more agreeable to custom. And how can “*largest*” be wrong, if “*first*” is right? “Let Dick’s be the *larger*, because he spoke *sooner*,” borders too much upon a different idea, that of *proportion*; as when we say, “*The sooner the better*,”—“*The more the merrier*.” So Blair: “When only two things are compared, the comparative degree should be used, and not the superlative.”—*Practical Gram.*, p. 81. “A Trochee has the *first* syllable accented, and the *last* unaccented.”—*Ib.*, p. 118. “An Iambus has the *first* syllable unaccented, and the *last* accented.”—*Ibid.* These two examples are found also in *Jamieson’s Rhetoric*, p. 305; *Murray’s Gram.*, p. 253; *Kirkham’s*, 219; *Bullions’s*, 169; *Guy’s*, 120; *Merchant’s*, 166. So Hiley: “When *two* persons or things are compared, the *comparative* degree must be employed. When *three or more* persons or things are compared, the *superlative* must be used.”—*Treatise on English Gram.*, p. 78. Contradiction in practice: “Thomas is *wiser* than his brothers.”—*Ib.*, p. 79. Are not “*three or more persons*” here compared by “the comparative” *wiser*? “In an *Iambus* the *first* syllable is unaccented.”—*Ib.*, p. 123. An iambus has but *two* syllables; and this author expressly teaches that “*first*” is “superlative.”—*Ib.*, p. 21. So Sanborn: “The *positive* degree denotes the *simple* form of an adjective *without* any variation of meaning. The *comparative* degree increases or lessens the meaning *of the positive*, and denotes a comparison *between two* persons or things. The *superlative* degree increases or lessens the positive *to the greatest extent*, and denotes a comparison *between more than two* persons or things.”—*Analytical Gram.*, p. 30 and p. 86. These pretended definitions of the degrees of comparison embrace not only the absurdities which I have already censured in those of our common grammars, but several new ones peculiar to this author. Of the inconsistency of his doctrine and practice, take the following examples: “Which of two bodies, that move with the same velocity, will exercise the *greatest* power?”—*Ib.*, p. 93; and again, p. 203, “‘*I* was offered a *dollar*,’—‘A *dollar* was offered (to) *me*.’ The *first* form should always be avoided.”—*Ib.*, p. 127. “Nouns in apposition generally annex the sign of the possessive case to the *last*; as, ‘For David my *servant’s* sake.’—‘John the *Baptist’s* head.’ *Bible*.”—*Ib.*, p. 197.

---

\* I suppose that, in a comparison of *two*, any of the degrees may be accurately employed. The common usage is, to construe the positive with *as*, the comparative with *than*, and the superlative with *of*. But here custom allows us also to use the comparative with *of*, after the manner of the superlative; as, “This is *the better of* the two.” It was but an odd whim of some old pedant, to find in this a reason for declaring it ungrammatical to say “This is *the best of* the two.” In one grammar, I find the former construction *condemned*, and the latter approved, thus: “This is the better book of the two. Not correct, because the comparative state of the adjective, (*better*,) can not correspond with the preposition, *of*. The definite article, *the*, is likewise improperly applied to the comparative state; the sentence should stand thus, This is the *best* book of the two.”—*Chandler’s Gram.*, Ed. of 1821, p. 130; Ed. of 1847, p. 151.

OBS. 13.—So Murray: “We commonly say, ‘This is the *weaker of the two*,’ or, ‘The *weakest of the two*;’ but the former is the regular mode of expression, because there are *only two* things compared.”—*Octavo Gram.*, i, 167. What then of the following example: “Which of *those two persons* has *most* distinguished himself?”—*Ib.*, Key, ii, 187. Again, in treating of the adjectives *this* and *that*, the same hand writes thus: “*This* refers to the *nearest* person or thing, and *that* to the *most distant*: as, ‘*This* man is *more intelligent* than *that*.’ *This* indicates the *latter*, or *last* mentioned; *that*, the *former*, or *first* mentioned: as, ‘Both wealth and poverty are temptations; *that* tends to excite pride, *this*, discontent.’”—*Murray’s Gram.*, i, 56. In the former part of this example, the superlative is twice applied where only two things are spoken of; and, in the latter, it is twice made equivalent to the comparative, with a like reference. The following example shows the same equivalence: “*This* refers to the *last* mentioned or *nearer* thing, *that* to the *first* mentioned or *more distant* thing.”—*Webber’s Gram.*, p. 31. So Churchill: “The superlative should not be used, when only two persons or things are compared.”—*New Gram.*, p. 80. “In the *first* of these two sentences.”—*Ib.*, p. 162; *Lowth*, p. 120. According to the rule, it should have been, “In the *former* of these two sentences;” but this would be here ambiguous, because *former* might mean *maker*. “When our sentence consists of two members, the *longest* should, generally, be the concluding one.”—*Blair’s Rhet.*, p. 117: and *Jamieson’s*, p. 99. “The *shortest* member being placed *first*, we carry it *more readily* in our memory as we proceed to the second.”—*Ib.*, & *Ib.* “Pray consider us, in this respect, as the *weakest* sex.”—*Spect.*, No. 533. In this last sentence, the comparative, *weaker*, would perhaps have been better; because, not an absolute, but merely a comparative weakness is meant. So Latham and Child: “It is better, in speaking of only two objects, to use the comparative degree rather than the superlative, even, where we use the article *the*. *This is the better of the two*, is preferable to *this is the best of the two*.”—*Elementary Gram.*, p. 155. Such is their rule; but very soon they forget it, and write thus: “In this case the relative refers to the *last* of the two.”—*Ib.*, p. 163.

OBS. 14.—Hyperboles are very commonly expressed by comparatives or superlatives; as, “My *little finger* shall be *thicker* than my *father’s loins*.”—1 *Kings*, xii, 10. “Unto me, who am *less than the least* of all saints, is this grace given.”—*Ephesians*, iii, 8. Sometimes, in thus heightening or lowering the object of his conception, the writer falls into a catachresis, solecism, or abuse of the grammatical degrees; as, “Mustard-seed—which is *less than all the seeds* that be in the earth.”—*Mark*, iv, 31. This expression is objectionable, because mustard-seed is a seed, and cannot be less than itself; though that which is here spoken of, may perhaps have been “*the least of all seeds*,” and it is the same Greek phrase, that is thus rendered in Matt, xiii, 32. Murray has inserted in his Exercises, among “unintelligible and inconsistent words and phrases,” the following example from Milton:

---

\* This example appears to have been borrowed from Campbell; who, however, teaches a different doctrine from Murray, and clearly sustains my position; “Both degrees are in such cases used *indiscriminately*. We say *rightly*, either ‘This is the weaker of the two,’ or—‘the weakest of the two.’”—*Philosophy of Rhetoric*, p. 202. How positively do some other men contradict this! “In comparing *two* persons or things, by means of an adjective, care must be taken, that the superlative state be not employed: We properly say, ‘John is the *taller* of the two;’ but we *should not say*, ‘John is the *tallest* of the two.’ The reason is plain: we compare but *two* persons, and must *therefore* use the comparative state.”—*Wright’s Philosophical Gram.*, p. 143. Rev. Matt. Harrison, too, insists on it, that the superlative must “have reference to more than two,” and censures *Dr. Johnson* for not observing the rule. See *Harrison’s English Language*, p. 255.

“And, in the lowest deep, a lower deep  
Still threat’ning to devour me, opens wide.”—*Exercises*, p. 122.

For this supposed inconsistency, he proposes in his *Key* the following amendment:

“And, in the *lower* deep, *another* deep  
Still threat’ning to devour me, opens wide.”—*Key*, p. 254.

But, in an other part of his book, he copies from Dr. Blair the same passage, with commendation: saying, “The following sentiments of *Satan in Milton*, as strongly as they are described, *contain nothing* but what is *natural and proper*:

‘Me miserable! which way shall I fly  
Infinite wrath, and infinite despair?  
Which way I fly is Hell; myself am Hell;  
And in the lowest *depth*, a lower deep,  
Still threat’ning to devour me, opens wide,  
To which the Hell I suffer seems a Heaven.’ *P. Lost*, B. iv, l. 73.”

*Blair’s Lectures*, p. 153; *Murray’s Grammar*, p. 352.

OBS. 15.—Milton’s word, in the fourth line above, is *deep*, and not *depth*, as these authors here give it: nor was it very polite in them, to use a phraseology which comes so near to saying, the devil was in the poet. Alas for grammar! accuracy in its teachers has become the most rare of all qualifications. As for Murray’s correction above, I see not how it can please any one who chooses to think Hell a place of great depth. A descent into his “*lower* deep” and “*other* deep,” might be a plunge less horrible than two or three successive slides in one of our western caverns! But Milton supposes the arch-fiend might descend to the lowest *imaginable* depth of Hell, and there be liable to a still further fall of more tremendous extent. Fall whither? Into the horrid and inconceivable profundity of the *bottomless pit*! What signifies it, to object to his language as “*unintelligible*” if it conveys his idea better than any other could? In no human conception of what is infinite, can there be any real exaggeration. To amplify beyond the truth, is here impossible. Nor is there any superlatation which can fix a limit to the idea of more and more in infinitude. Whatever literal absurdity there may be in it, the duplication seems greatly to augment what was even our greatest conception of the thing. Homer, with a like figure, though expressed in the positive degree, makes Jupiter threaten any rebel god, that he shall be thrown down from Olympus, to suffer the burning pains of the Tartarean gulf; not in the centre, but,

“As *deep* beneath th’ infernal centre hurl’d,  
As from that centre to th’ ethereal world.”—*Pope’s Iliad*, B. viii, l. 19.

#### REGULAR COMPARISON.

Adjectives are regularly compared, when the comparative degree is expressed by adding *er*, and the superlative, by adding *est* to them: as, Pos., *great*, Comp., *greater*, Superl., *greatest*; Pos., *mild*, Comp., *milder*, Superl., *mildest*.

In the variation of adjectives, final consonants are doubled, final *e* is omitted, and final *y* is changed to *i*, agreeably to the rules for spelling: as, *hot*, *hotter*, *hottest*; *wide*, *wider*, *widest*; *happy*, *happier*, *happiest*.

The regular method of comparison belongs almost exclusively to monosyllables, with dissyllables ending in *w* or *y*, and such others as receive it and still have but one syllable

after the accent: as, *fierce, fiercer, fiercest*; *narrow, narrower, narrowest*; *gloomy, gloomier, gloomiest*; *serene, serener, serenest*; *noble, nobler, noblest*; *gentle, gentler, gentlest*.

### COMPARISON BY ADVERBS.

The two degrees of superiority may also be expressed with precisely the same import as above, by prefixing to the adjective the adverbs *more* and *most*: as, *wise, more wise, most wise*; *famous, more famous, most famous*; *amiable, more amiable, most amiable*.

The degrees of inferiority are expressed, in like manner, by the adverbs *less* and *least*: as, *wise, less wise, least wise*; *famous, less famous, least famous*; *amiable, less amiable, least amiable*. The regular method of comparison has, properly speaking, no degrees of this kind.

Nearly all adjectives that admit of different degrees, may be compared by means of the adverbs; but, for short words, the regular method is generally preferable: as, *quick, quicker, quickest*; rather than, *quick, more quick, most quick*.

### OBSERVATIONS.

OBS. 1.—The genius of our language is particularly averse to the lengthening of long words by additional syllables; and, in the comparison of adjectives, *er* and *est* always add a syllable to the word, except it end in *le* after a mute. Thus, *free, freer, freest*, increases syllabically; but *ample, ampler, amplest*, does not. Whether any particular adjective admits of comparison or not, is a matter of reasoning from the sense of the term; by which method it shall be compared, is in some degree a matter of taste; though custom has decided that long words shall not be inflected, and for the shorter, there is generally an obvious bias in favour of one form rather than the other. Dr. Johnson says, “The comparison of adjectives is very *uncertain*; and being much regulated by commodiousness of utterance, or agreeableness of sound, is not easily reduced to rules. Monosyllables are commonly compared. Polysyllables, or words of more than two syllables, are seldom compared otherwise than by *more* and *most*. Dissyllables are seldom compared if they terminate in *full, less, ing, ous, ed, id, at, ent, ain, or ive*.”—*Gram. of the English Tongue*, p. 6. “When the positive contains but one syllable, the degrees are usually formed by adding *er* or *est*. When the positive contains two syllables, it is matter of taste which method you shall use in forming the degrees. The ear is, in this case, the best guide. But, when the positive contains more than two syllables, the degrees must be formed by the use of *more* and *most*. We may say, *tenderer* and *tenderest*, *pleasanter* and *pleasantest*, *prettier* and *prettiest*; but who could endure *delicater* and *delicatest*?”—*Cobbett’s E. Gram.*, p. 81. *Quiet, bitter, clever, sober*, and perhaps some others like them, are still regularly compared; but such words as *secretest, famousest, virtuosest, powerfulest*, which were used by Milton, have gone out of fashion. The following, though not very commonly used, are perhaps allowable. “Yet these are the two *commonest* occupations of mankind.”—*Philological Museum*, i, 431. “Their *pleasantest* walks throughout life must be guarded by armed men.”—*Ib.*, i, 437. “Franklin possessed the rare talent of drawing useful lessons from the *commonest* occurrences.”—*Murray’s Sequel*, p. 323. “Unbidden guests are often *welcomest* when they are gone.”—SHAK.: *in Joh. Dict.*

“There was a lad, th’ *unluckiest* of his crew,  
Was still contriving something bad, but new.”—KING: *ib.*

OBS. 2.—I make a distinction between the regular comparison by *er* and *est*, and the comparison by adverbs; because, in a grammatical point of view, these two methods are totally different: the meaning, though the same, being expressed in the one case, by an inflection of the adjective; and in the other, by a phrase consisting of two different parts of speech. If the placing of an adverb before an adjective is to be called a grammatical modification or variation of the latter word, we shall have many other degrees than those which are enumerated above. The words may with much more propriety be parsed separately, the *degree* being ascribed to the *adverb*—or, if you please, to both words, for both are varied in *sense* by the inflection of the former. The degrees in which qualities may exist in nature, are infinitely various; but the only degrees with which the grammarian is concerned, are those which our *variation* of the adjective or adverb enables us to express—including, as of course we must, the state or sense of the primitive word, as one. The reasoning which would make the positive degree to be *no degree*, would also make the nominative case, or the *casus rectus* of the Latins, to be *no case*.

OBS. 3.—Whenever the *adjective itself* denotes these degrees, and is duly varied in form to express them, they properly belong to it; as, *worthy*, *worthier*, *worthiest*. (Though no apology can be made for the frequent error of confounding the *degree of a quality*, with the *verbal sign* which expresses it.) If an *adverb* is employed for this purpose, that also is compared, and the two degrees thus formed or expressed, are properly its own; as, *worthy*, *more worthy*, *most worthy*. But these same degrees may be yet otherwise expressed; as, *worthy*, *in a higher degree worthy*, *in the highest degree worthy*. Here also the adjective *worthy* is virtually compared, as before; but only the adjective *high* is grammatically modified. Again, we may form three degrees with several adverbs to each, thus: Pos., *very truly worthy*; Comp., *much more truly worthy*; Sup., *much the most truly worthy*. There are also other adverbs, which, though not varied in themselves like *much*, *more*, *most*, may nevertheless have nearly the same effect upon the adjective; as, *worthy*, *comparatively worthy*, *superlatively worthy*. I make these remarks, because many grammarians have erroneously parsed the adverbs *more* and *most*, *less* and *least*, as parts of the adjective.

OBS. 4.—Harris, in his *Hermes*, or Philosophical Inquiry concerning Universal Grammar, has very unceremoniously pronounced the doctrine of three degrees of comparison, to be *absurd*; and the author of the *British Grammar*, as he emotes the whole passage without offering any defence of that doctrine, seems to second the allegation. “Mr. Harris observes, that, ‘There cannot well be more than two degrees; one to denote simple excess, and one to denote superlative. Were we indeed to introduce more degrees, we ought perhaps to introduce infinite, which is absurd. For why stop at a limited number, when in all subjects, susceptible of intension, the intermediate excesses are in a manner infinite? There are infinite degrees of *more white* between the first simple *white* and the superlative *whitest*; the same may be said of *more great*, *more strong*, *more minute*, &c. The doctrine of grammarians about *three* such degrees, which they call the Positive, the Comparative, and the Superlative, must needs be absurd; both because in their Positive there is no comparison at all, and because their Superlative is a Comparative as much as their Comparative itself.’ *Hermes*, p. 197.”—*Brit. Gram.*, p. 98. This objection is rashly urged. No comparison can be imagined without bringing together as many as two terms, and if the positive is one of these, it is a degree of comparison; though neither this nor the superlative is, for that reason, “*a Comparative*.” Why we stop at three degrees, I have already shown: we have three *forms*, and only three.

OBS. 5.—“The termination *ish* may be accounted in some sort a degree of comparison, by which the signification is diminished below the positive, as *black*, *blackish*, or tending to blackness; *salt*, *saltish*, or having a little taste of salt:” they therefore admit of no comparison. This termination is seldom added but to words expressing sensible qualities, nor often to words of above one syllable, and is scarcely used in the solemn or sublime style.”—*Dr. Johnson’s Gram.* “The *first* [degree] denotes a slight degree of the quality, and is expressed by the termination *ish*; as, *reddish*, *brownish*, *yellowish*. This may be denominated the *imperfect* degree of the attribute.”—*Dr. Webster’s Improved Gram.*, p. 47. I doubt the correctness of the view taken above by Johnson, and dissent entirely from Webster, about his “*first degree* of comparison.” Of adjectives in *ish* we have perhaps a hundred; but nine out of ten of them are derived clearly from *nouns*, as, *boyish*, *girlish*; and who can prove that *blackish*, *saltish*, *reddish*, *brownish*, and *yellowish*, are not also from the *nouns*, *black*, *salt*, *red*, *brown*, and *yellow*? or that “a *more reddish* tinge,”—“a *more saltish* taste,” are not correct phrases? There is, I am persuaded, no good reason for noticing this termination as constituting a degree of comparison. All “double comparisons” are said to be ungrammatical; but, if *ish* forms a degree, it is such a degree as may be compared again: as,

“And seem *more learnedish* than those  
That at a greater charge compose.”—*Butler*.

OBS. 6.—Among the degrees of comparison, some have enumerated that of *equality*; as when we say, “It is *as sweet as* honey.” Here is indeed a comparison, but it is altogether in the *positive* degree, and needs no other name. This again refutes Harris; who says, that in the positive there is no comparison at all. But further: it is plain, that in this degree there may be comparisons of *inequality* also; as, “Molasses is *not so sweet* as honey.”—“Civility is *not so slight* a matter as it is commonly thought.”—*Art of Thinking*, p. 92. Nay, such comparisons may equal any superlative. Thus it is said, I think, in the Life of Robert Hall: “Probably no human being ever before suffered *so much* bodily pain.” What a preëminence is here! and yet the form of the adjective is only that of the positive degree. “Nothing *so uncertain* as general reputation.”—*Art of Thinking*, p. 50. “Nothing *so nauseous* as undistinguishing civility.”—*Ib.*, p. 88. These, likewise, would be strong expressions, if they were correct English. But, to my apprehension, every such comparison of equality involves a solecism, when, as it here happens, the former term includes the latter. The word *nothing* is a general negative, and *reputation* is a particular affirmative. The comparison of equality between them, is therefore certainly improper: because *nothing* cannot be equal to *something*; and, reputation being something, and of course equal to itself, the proposition is evidently untrue. It ought to be, “Nothing *is more uncertain than* general reputation.” This is the same as to say, “General reputation is *as uncertain as any thing* that can be

---

\* L. Murray copied this passage literally, (though anonymously,) as far as the colon; and of course his book teaches us to account “the termination *ish*, in some sort, a degree of comparison.”—*Octavo Gram.*, p. 47. But what is more absurd, than to think of accounting this, or any other suffix, “a degree of comparison?” The inaccuracy of the language is a sufficient proof of the haste with which Johnson adopted this notion, and of the blindness with which he has been followed. The passage is now found in most of our English grammars. Sanborn expresses the doctrine thus: “Adjectives terminating with *ish*, denote a degree of comparison less than the positive; as, *saltish*, *whitish*, *blackish*.”—*Analytical Gram.*, p. 87. But who does not know, that most adjectives of this ending are derived from *nouns*, and are compared only by adverbs, as *childish*, *foolish*, and so forth? Wilcox says, “Words ending in *ish*, generally express a slight degree; as, *reddish*, *bookish*.”—*Practical Gram.*, p. 17. But who will suppose that *foolish* denotes but a slight degree of folly, or *bookish* but a slight fondness for books? And, with such an interpretation, what must be the meaning of *more bookish* or *most foolish*?

named.” Or else the former term should exempt the latter; as, “*Nothing else*”—or, “No *other* thing, is *so uncertain* as” *this popular honour, public esteem, or general reputation.*” And so of all similar examples.

OBS. 7.—In all comparisons, care must be taken to adapt the terms to the *degree* which is expressed by the adjective or adverb. The superlative degree requires that the object to which it relates, be one of those with which it is compared; as, “*Eve* was *the fairest* of *women.*” The comparative degree, on the contrary, requires that the object spoken of be not included among those with which it is compared; as, “*Eve* was *fairer* than any of *her daughters.*” To take the inclusive term here, and say, “*Eve* was *fairer* than any *woman,*” would be no less absurd, than Milton’s assertion, that “*Eve* was *the fairest* of *her daughters:*” the former supposes that she was *not a woman*; the latter, that she was *one of her own daughters.* But Milton’s solecism is double; he makes Adam *one of his own sons:*—

“Adam the goodliest man of men since born  
His sons, the fairest of her daughters Eve.”—*P. Lost*, B. iv, l. 324.

OBS. 8.—“Such adjectives,” says Churchill, “as have in themselves a superlative signification, or express qualities not susceptible of degrees, do not properly admit either the comparative or [the] superlative form. Under this rule may be included *all adjectives with a negative prefix.*”—*New Gram.*, p. 80. Again: “As *immediate* signifies instant, present with regard to time, Prior should not have written ‘*more immediate.*’ *Dr. Johnson.*”—*Ib.*, p. 233. “Hooker has *unaptest*; *Locke, more uncorrupted*; Holder, *more undeceivable*: for these the proper expressions would have been the opposite signs without the negation: *least apt, less corrupted, less deceivable.* Watts speaks of ‘a *most unpassable* barrier.’ If he had simply said ‘an unpassable barrier,’ we should have understood it at once in the strongest sense, as a barrier impossible to be surmounted: but, by attempting to express something more, he gives an idea of something less; we perceive, that his *unpassable* means *difficult to pass.* This is the mischief of the propensity to exaggeration; which, striving after strength, sinks into weakness.”—*Ib.*, p. 234.

OBS. 9.—The foregoing remarks from Churchill appear *in general* to have been dictated by good sense; but, if his own practice is right, there must be some exceptions to his rule respecting the comparison of adjectives with a negative prefix; for, in the phrase “*less imprudent,*” which, according to a passage quoted before, he will have to be different from “*more prudent,*” he himself furnishes an example of such comparison. In fact, very many words of that class are compared by good writers: as, “Nothing is *more unnecessary.*”—*Lowth’s Gram.*, Pref., p. v. “What is yet *more unaccountable.*”—ROGERS: *in Joh. Dict.* “It is hard to determine which is *most uneligible.*”—*Id.*, *ib.* “Where it appears the *most unbecoming* and *unnatural.*”—ADDISON: *ib.* “Men of the best sense and of the *most unblemished* lives.”—*Id.*, *ib.* “March and September are the *most unsettled* and *unequable* of seasons.”—BENTLEY: *ib.* “Barcelona was taken by a *most unexpected* accident.”—SWIFT: *ib.* “The *most barren* and *unpleasant.*”—WOODWARD: *ib.* “O good, but *most unwise* patricians!”—SHAK.: *ib.* “*More unconstant* than the wind.”—*Id.*, *ib.* “We may say *more or less imperfect.*”—*Murray’s Gram.*, p. 168. “Some of those [passions] which act with the *most irresistible* energy upon the hearts of mankind, are altogether omitted in the catalogue of Aristotle.”—*Adams’s Rhet.*, i, 380. “The wrong of him who presumes to talk of owning me, is *too unmeasured* to be softened by kindness.”—*Channing, on Emancipation*, p. 52. “Which, we are sensible, are *more inconclusive* than the rest.”—*Blair’s Rhet.*, p. 319.

“Ere yet the salt of *most unrighteous* tears  
Had left the flushing in her galled eyes.”—*Shak.*

OBS. 10.—Comparison must not be considered a general property of adjectives. It belongs chiefly to the class which I call common adjectives, and is by no means applicable to all of these. *Common adjectives*, or epithets denoting quality, are perhaps more numerous than all the other classes put together. Many of these, and a few that are *pronominal*, may be varied by comparison; and some *participial* adjectives may be compared by means of the adverbs. But adjectives formed from *proper names*, all the *numerals*, and most of the *compounds*, are in no way susceptible of comparison. All nouns used adjectively, as an *iron* bar, an *evening* school, a *mahogany* chair, a *South-Sea* dream, are also incapable of comparison. In the title of “His *Most Christian* Majesty,” the superlative adverb is applied to a *proper adjective*; but who will pretend that we ought to understand by it “*the highest degree*” of Christian attainment? It might seem uncourtly to suggest that this is “an abuse of the king’s English,” I shall therefore say no such thing. Pope compares the word *Christian*, in the following couplet:—

“Go, purified by flames ascend the sky,  
My better and *more Christian* progeny.”—*Dunciad*, B. i, l. 227.

### IRREGULAR COMPARISON.

The following adjectives are compared irregularly: *good, better, best; bad, evil, or ill, worse, worst; little, less, least; much, more, most; many, more, most.*

### OBSERVATIONS.

OBS. 1.—In *English*, and also in *Latin*, most adjectives that denote *place* or *situation*, not only form the superlative irregularly, but are also either defective or redundant in comparison. Thus:

I. The following nine have more than one superlative: *far, farther, farthest, farmost, or farthermost; near, nearer, nearest or next; fore, former, foremost or first; hind, hinder, hindmost or hindermost; in, inner, inmost or innermost; out, outer, or utter, outmost or utmost, outermost or uttermost; up, upper, upmost or uppermost; low, lower, lowest or lowermost; late, later or latter, latest or last.*

II. The following five want the positive: [*aft*, adv.,] *after, aftmost or aftermost; [forth, adv., formerly furth,\*] further, furthest or furthermost; hither, hithermost; nether, nethermost; under, undermost.*

III. The following want the comparative: *front, frontmost; rear, rearmost; head, headmost; end, endmost; top, topmost; bottom, bottommost; mid or middle, midst,† midstmost or middlemost; north, northmost; south, southmost; east, eastmost; west, westmost; northern, northernmost; southern, southernmost; eastern, easternmost; western, westernmost.*

\* “A rodde shall come *furth* of the stocke of Jesse.’ *Primer, Hen. VIII.*”—*Craven Glossary.*

† *Midst* is a contraction of the regular superlative *middest*, used by Spenser, but now obsolete. *Midst*, also, seems to be obsolete as an adjective, though still frequently used as a noun; as, “In the *midst*.”—*Webster.* It is often a poetic contraction for the preposition *amidst*. In some cases it appears to be an adverb. In the following example it is equivalent to *middlemost*, and therefore an adjective: “Still greatest he *the midst*, Now dragon grown.”—*Paradise Lost*, B. x, l. 528.

OBS. 2.—Many of these irregular words are not always used as adjectives, but oftener as nouns, adverbs, or prepositions. The sense in which they are employed, will show to what class they belong. The terms *fore* and *hind*, *front* and *rear*, *right* and *left*, *in* and *out*, *high* and *low*, *top* and *bottom*, *up* and *down*, *upper* and *under*, *mid* and *after*, all but the last pair, are in direct contrast with each other. Many of them are often joined in composition with other words; and some, when used as adjectives of place, are rarely separated from their nouns: as, *inland*, *outhouse*, *mid-sea*, *after-ages*. Practice is here so capricious, I find it difficult to determine whether the compounding of these terms is proper or not. It is a case about which he that inquires most, may perhaps be most in doubt. If the joining of the words prevents the possibility of mistaking the adjective for a preposition, it prevents also the separate classification of the adjective and the noun, and thus in some sense destroys the former by making the whole a noun. Dr. Webster writes thus: “FRONTROOM, *n.* A room or apartment in the *forepart* of a house. BACKROOM, *n.* A room behind the *front room*, or in the *back part* of the house.”—*Octavo Dict.* So of many phrases by which people tell of turning things, or changing the position of their parts; as, *inside out*, *outside in*; *upside down*, *downside up*; *wrong end foremost*, *but-end foremost*; *fore-part back*, *fore-end aft*; *hind side before*, *backside before*. Here all these contrasted particles seem to be adjectives of place or situation. What grammarians in general would choose to call them, it is hard to say; probably, many would satisfy themselves with calling the whole “*an adverbial phrase*,”—the common way of disposing of every thing which it is difficult to analyze. These, and the following examples from Scott, are a fair specimen of the uncertainty of present usage:

“The herds without a keeper strayed,  
The plough was in *mid-furrow* staid.”—*Lady of the Lake*.

“The eager huntsman knew his bound,  
And in *mid chase* called off his hound.”—*Ibidem*.

OBS. 3.—For the chief points of the compass, we have so many adjectives, and so many modes of varying or comparing them, that it is difficult to tell their number, or to know which to choose in practice. (1.) *North*, *south*, *east*, and *west*, are familiarly used both as nouns and as adjectives. From these it seems not improper to form superlatives, as above, by adding *most*; as, “From Aroar to Nebo, and the wild of *southmost* Abarim.”—*Milton*. “There are no rivulets or springs in the island of Feror, the *westmost* of the Canaries.”—*White’s Nat. Hist.* (2.) These primitive terms may also be compared, in all three of the degrees, by the adverbs *farther* and *farthest*, or *further* and *furthest*; as, “Which is yet *farther west*.”—*Bacon*. (3.) Though we never employ as separate words the comparatives *norther*, *souther*, *easter*, *wester*, we have *northerly*, *southerly*, *easterly*, and *westerly*, which seem to have been formed from such comparatives, by adding *ly*; and these four may be compared by the adverbs *more* and *most*, or *less* and *least*: as, “These hills give us a view of the *most easterly*, *southerly*, and *westerly* parts of England.”—*GRAUNT: in Joh. Dict.* (4.) From these supposed comparatives likewise, some authors form the superlatives *northermost*, *southermost*, *eastermost*, and *westermost*; as, “From the *westermost* part of Oyster bay.”—*Dr. Webster’s Hist. U. S.*, p. 126. “And three miles southward of the *southermost* part of said bay.”—*Trumbull’s Hist. of Amer.*, Vol. i, p. 88. “Pockanocket was on the *westermost* line of Plymouth Colony.”—*Ib.*, p. 44. “As far as the *northermost* branch of the said bay or river.”—*Ib.*, p. 127. The propriety of these is at least questionable; and, as they are neither very necessary to the language, nor recognized by any of our lexicographers, I forbear to approve them. (5.) From the four primitives we have

also a third series of positives, ending in *ern*; as, *northern*, *southern*, *eastern*, *western*. These, though they have no comparatives of their own, not only form superlatives by assuming the termination *most*, but are sometimes compared, perhaps in both degrees, by a separate use of the adverbs: as, “*Southernmost*, a. Furthest towards the south.”—*Webster’s Dict.* “Until it shall intersect the *northernmost* part of the thirty-first degree of north latitude.”—*Articles of Peace*. “To the *north-westernmost* head of Connecticut river.”—*Ib.* “Thence through the said lake to the *most north-western* point thereof.”—*Ib.*

OBS. 4.—It may be remarked of the comparatives *former* and *latter* or *hinder*, *upper* and *under* or *nether*, *inner* and *outer* or *utter*, *after* and *hither*, as well as of the Latin *superior* and *inferior*, *anterior* and *posterior*, *interior* and *exterior*, *prior* and *ulterior*, *senior* and *junior*, *major* and *minor*; that they cannot, like other comparatives, be construed with the conjunction *than*. After all genuine English comparatives, this conjunction may occur, because it is the only fit word for introducing the latter term of comparison; but we never say one thing is *former* or *latter*, *superior* or *inferior*, *than* an other. And so of all the rest here named. Again, no real comparative or superlative can ever need an other superadded to it; but *inferior* and *superior* convey ideas that do not always preclude the additional conception of *more* or *less*: as, “With respect to high and low notes, pronunciation is still *more inferior* to singing.”—*Kames, Elements of Criticism*, Vol. ii, p. 73. “The mistakes which the *most superior* understanding is apt to fall into.”—*West’s Letters to a Young Lady*, p. 117.

OBS. 5.—Double comparatives and double superlatives, being in general awkward and unfashionable, as well as tautological, ought to be avoided. Examples: “The Duke of Milan, and his *more braver* daughter, could control thee.”—*Shak., Tempest*. Say, “his *more gallant* daughter.” “What in me was purchased, falls upon thee in a *more fairer* sort.”—*Id., Henry IV.* Say, “*fairer*,” or, “*more honest*,” for “*purchased*” here means *stolen*. “Changed to a *worser* shape thou canst not be.”—*Id., Hen. VI.* Say, “a *worse* shape”—or, “an *uglier* shape.” “After the *most straitest* sect of our religion, I lived a Pharisee.”—*Acts*, xxvi, 5. Say, “the *strictest* sect.” “Some say he’s mad; others, that *lesser* hate him, do call it valiant fury.”—*Shak.* Say, “others, that hate him *less*.” In this last example, *lesser* is used adverbially; in which construction it is certainly incorrect. But against *lesser* as an adjective, some grammarians have spoken with more severity, than comports with a proper respect for authority. Dr. Johnson says, “LESSER, *adj.* A barbarous corruption of *less*, formed by the vulgar from the habit of terminating comparatives in *er*; *afterward adopted by poets, and then by writers of prose, till it has all the authority which a mode originally erroneous can derive from custom.*”—*Quarto Dict.* With no great fairness, Churchill quotes this passage as far as the semicolon, and there stops. The position thus taken, he further endeavours to strengthen, by saying, “*Worser*, though *not more barbarous*, offends the ear in a much greater degree, because it has not been so frequently used.”—*New Gram.*, p. 232. Example: “And God made two great lights; the greater light to rule the day, and the *lesser* light to rule the night.”—*Gen.*, i, 16. Kirkham, after making an *imitation* of this passage, remarks upon it: “*Lesser* is *as incorrect* as *badder*, *gooder*, *worser*.”—*Gram.*, p. 77. The judgement of any critic who is ignorant enough to say this, is worthy only of contempt. *Lesser* is still frequently used by the most tasteful authors, both in verse and prose: as, “It is the glowing style of a man who is negligent of *lesser* graces.”—*Blair’s Rhet.*, p. 189.

“Athos, Olympus, Ætna, Atlas, made  
These hills seem things of *lesser* dignity.”—*Byron.*

OBS. 6.—The adjective *little* is used in different senses; for it contrasts sometimes with *great*, and sometimes with *much*. *Lesser* appears to refer only to size. Hence *less* and *lesser* are not always equivalent terms. *Lesser* means *smaller*, and contrasts only with *greater*. *Less* contrasts sometimes with *greater*, but oftener with *more*, the comparative of *much*; for, though it may mean *not so large*, its most common meaning is *not so much*. It ought to be observed, likewise, that *less* is not an adjective of *number*,\* though not unfrequently used as such. It does not mean *fewer*, and is therefore not properly employed in sentences like the following: “In all verbs, there are no *less* than three things implied at once.”—*Blair’s Rhet.*, p. 81. “*Smaller* things than three,” is nonsense; and so, in reality, is what the Doctor here says. *Less* is not the proper opposite to *more*, when *more* is the comparative of *many*: *few*, *fewer*, *fewest*, are the only words which contrast regularly with *many*, *more*, *most*. In the following text, these comparatives are rightly employed: “And to the *more* ye shall give the *more* inheritance, and to the *fewer* ye shall give the *less* inheritance.”—*Numbers*, xxxiii, 54. But if writers will continue to use *less* for *fewer*, so that “*less cattle*,” for instance, may mean “*fewer cattle*,” we shall be under a sort of *necessity* to retain *lesser*, in order to speak intelligibly: as, “It shall be for the sending-forth of oxen, and for the treading of *lesser* cattle.”—*Isaiah*, vii, 25. I have no partiality for the word *lesser*, neither will I make myself ridiculous by flouting at its rudeness. “This word,” says Webster, “is a corruption, but [it is] too well established to be discarded. Authors always write the *Lesser* Asia.”—*Octavo Dict.* “By the same reason, may a man punish the *lesser* breaches of that law.”—*Locke*. “When we speak of the *lesser* differences among the tastes of men.”—*Blair’s Rhet.*, p. 20. “In greater or *lesser* degrees of complexity.”—*Burke, on Sublime*, p. 94. “The greater ought not to succumb to the *lesser*.”—*Dillwyn’s Reflections*, p. 128. “To such productions, *lesser* composers must resort for ideas.”—*Gardiner’s Music of Nature*, p. 413.

“The larger here, and there the *lesser* lambs,  
The new-fall’n young herd bleating for their dams.”—*Pope*.

OBS. 7.—Our grammarians deny the comparison of many adjectives, from a false notion that they are already superlatives. Thus W. Allen: “Adjectives compounded with the Latin preposition *per*, are already superlative: as, *perfect*, *perennial*, *permanent*, &c.”—*Elements of E. Gram.*, p. 52. In reply to this, I would say, that nothing is *really superlative*, in English, but what has the form and construction of the superlative; as, “The *most permanent* of all dyes.” No word beginning with *per*, is superlative by virtue of this Latin prefix. “Separate spirits, which are beings that have *perfecter* knowledge and greater happiness than we, must needs have also a *perfecter* way of communicating their thoughts than we have.”—*Locke’s Essay*, B. ii, Ch. 24, §36. This mode of comparison is not now good, but it shows that *perfect* is no superlative. Thus Kirkham: “The *following*

---

\* What I here say, accords with the teaching of all our lexicographers and grammarians, except one dauntless critic, who has taken particular pains to put me, and some three or four others, on the defensive. This gentleman not only supposes *less* and *fewer*, *least* and *fewest*, to be sometimes equivalent in meaning, but actually exhibits them as being also etymologically of the same stock. *Less* and *least*, however, he refers to three different positives, and *more* and *most*, to four. And since, in once instance, he traces *less* and *more*, *least* and *most*, to the same primitive word, it follows of course, if he is right, that *more* is there equivalent to *less* and *most* is equivalent to *least*! The following is a copy of this remarkable “DECLENSION ON INDEFINITE SPECIFYING ADNAMES,” and just one half of the table is wrong: “*Some, more, most; Some, less, least; Little, less, least; Few, fewer or less, fewest or least; Several, more, most; Much, more, most; Many, more most.*”—*Oliver B Peirce’s Gram.*, p. 144.

adjectives, and *many others*, are *always in the superlative degree*; because, by expressing a quality *in the highest degree*, they carry in themselves a superlative signification: *chief, extreme, perfect, right, wrong, honest, just, true, correct, sincere, vast, immense, ceaseless, infinite, endless, unparalleled, universal, supreme, unlimited, omnipotent, all-wise, eternal.*" \*—*Gram.*, p. 73. So the Rev. David Blair: "The words *perfect, certain, infinite, universal, chief, supreme, right, true, extreme, superior*, and some others, which express a perfect and superlative sense in themselves, do not admit of comparison."—*English Gram.*, p. 81. Now, according to Murray's definition, which Kirkham adopts, none of these words can be at all in the superlative degree. On the contrary, there are several among them, from which true superlatives are frequently and correctly formed. Where are the positives which are here supposed to be "*increased to the highest degree*?" Every real superlative in our language, except *best* and *worst, most* and *least, first* and *last*, with the still more irregular word *next*, is a derivative, formed from some other English word, by adding *est* or *most*; as, *truest, hindmost*. The propriety or impropriety of comparing the foregoing words, or any of the "*many others*" of which this author speaks, is to be determined according to their meaning, and according to the *usage of good writers*, and not by the dictation of a feeble pedant, or upon the supposition that if compared they would form "*double superlatives*."

OBS. 8.—*Chief* is from the French word *chef*, the *head*: *chiefest* is therefore no more a double superlative than *headmost*: "But when the *headmost* foes appeared."—*Scott*. Nor are *chief* and *chiefest* equivalent terms: "Doeg an Edomite, the *chiefest* of the herdsmen."—1 *Samuel*, xxi, 7. "The *chief* of the herdsmen," would convey a different meaning; it would be either the *leader* of the herdsmen, or the *principal part* of them. *Chiefest*, however, has often been used where *chief* would have been better; as, "He sometimes denied admission to the *chiefest* officers of the army."—*Clarendon*, let us look further at Kirkham's list of *absolute "superlatives."*

OBS. 9.—*Extreme* is from the Latin superlative *extremus*, and of course its literal signification is not really susceptible of increase. Yet *extremest* has been used, and is still

---

\* Murray himself had the same false notion concerning six of these adjectives, and perhaps all the rest; for his indefinite *andsoforth* may embrace just what the reader pleases to imagine. Let the following paragraph be compared with the observations and proofs which I shall offer: "Adjectives that have in themselves a superlative signification, do not properly admit of the superlative or [the] comparative form superadded: such as, 'Chief, extreme, perfect, right, universal, supreme,' &c.; which are sometimes improperly written, 'Chiefest, extremest, perfectest, rightest, most universal, most supreme,' &c. The following expressions are therefore improper. 'He sometimes claims admission to the *chiefest* offices;' 'The quarrel became *so universal* and national;' 'A method of attaining the *rightest* and greatest happiness.' The phrases, so perfect, so right, so extreme, so universal, &c., are incorrect; because they imply that one thing is less perfect, less extreme, &c. than another, which is not possible."—*Murray's Gram.*, 8vo, Vol. i, p. 167. For himself, a man may do as he pleases about comparing these adjectives; but whoever corrects others, on such principles as the foregoing, will have work enough on his hands. But the writer who seems to exceed all others, in error on this point, is *Joseph W. Wright*. In his "Philosophical Grammar," p. 51st, this author gives a list of seventy-two adjectives, which, he says, "admit of *no variation of state*;" i. e., are not compared. Among them are *round, flat, wet, dry, clear, pure, odd, free, plain, fair, chaste, blind*, and more than forty others, which are compared about as often as any words in the language. Dr. Blair is hypercritically censured by him, for saying "*most excellent*," "*more false*," "the *chastest* kind," "*more perfect*" "*fuller, more full, fullest, most full, truest* and *most true*;" Murray, for using "*quite wrong*;" and Cobbett, for the phrase, "*perfect correctness*." "Correctness," says the critic, "does not admit of *degrees of perfection*."—*Ib.*, pp. 143 and 151. But what does such a thinker know about correctness? If this excellent quality cannot be *perfect*, surely nothing can. The words which Dr. Bullions thinks it "improper to compare," because he judges them to have "an absolute or superlative signification," are "*true, perfect, universal, chief, extreme, supreme*, &c."—no body knows how many. See *Principles of E. Gram.*, p. 19 and p. 115.

used, by some of the very best writers; as, “They thought it the *extremest* of evils.”—*Bacon*. “That on the sea’s *extremest* border stood.”—*Addison*. “How, to *extremest* thrill of agony.”—*Pollok*, B. viii, l. 270. “I go th’ *extremest* remedy to prove.”—*Dryden*. “In *extremest* poverty.”—*Swift*. “The hairy fool stood on th’ *extremest* verge of the swift brook, augmenting it with tears.”—*Shak*. “While the *extremest* parts of the earth were meditating submission.”—*Atterbury*. “His writings are poetical to the *extremest* boundaries of poetry.”—*Adams’s Rhetoric*, i, 87. In prose, this superlative is not now very common; but the poets still occasionally use it, for the sake of their measure; and it ought to be noticed that the simple adjective is *not partitive*. If we say, for the first example, “the *extreme* of evils,” we make the word a *noun*, and do not convey exactly the same idea that is there expressed.

OBS. 10.—*Perfect*, if taken in its strictest sense, must not be compared; but this word, like many others which mean most in the positive, is often used with a certain latitude of meaning, which renders its comparison by the adverbs not altogether inadmissible; nor is it destitute of authority, as I have already shown. (See Obs. 8th, p. 280.) “From the first rough sketches, to the *more perfect* draughts.”—*Bolingbroke, on Hist.*, p. 152. “The *most perfect*.”—*Adams’s Lect. on Rhet.*, i, 99 and 136; ii, 17 and 57: *Blair’s Lect.*, pp. 20 and 399. “The most *beautiful and perfect* example of analysis.”—*Lowth’s Gram.*, Pref., p. 10. “The plainest, *most perfect*, and most useful manual.”—*Bullions’s E. Gram.*, Rev., p. 7. “Our sight is the *most perfect*, and the most delightful, of all our senses.”—*Addison, Spect.*, No. 411; *Blair’s Lect.*, pp. 115 and 194; *Murray’s Gram.*, i, 322. Here Murray anonymously copied Blair. “And to render natives *more perfect* in the knowledge of it.”—*Campbell’s Rhet.*, p. 171; *Murray’s Gram.*, p. 366. Here Murray copied Campbell, the most accurate of all his masters. Whom did he copy when he said, “The phrases, *more perfect*, and *most perfect*, are improper?”—*Octavo Gram.*, p. 168. But if these are wrong, so is the following sentence: “No poet has ever attained a *greater perfection* than Horace.”—*Blair’s Lect.*, p. 398. And also this: “Why are we brought into the world *less perfect* in respect to our nature?”—*West’s Letters to a Young Lady*, p. 220.

OBS. 11.—*Right* and *wrong* are not often compared by good writers; though we sometimes see such phrases as *more right* and *more wrong*, and such words as *rightest* and *wrongest*: “Tis always in the *wrongest* sense.”—*Butler*. “A method of attaining the *rightest* and greatest happiness.”—PRICE: *Priestley’s Gram.*, p. 78. “It is no *more right* to steal apples, than it is to steal money.”—*Webster’s New Spelling-Book*, p. 118. There are equivalent expressions which seem preferable; as, *more proper*, *more erroneous*, *most proper*, *most erroneous*.

OBS. 12.—*Honest*, *just*, *true*, *correct*, *sincere*, and *vast*, may all be compared at pleasure. Pope’s Essay on Criticism is *more correct* than any thing this modest pretender can write; and in it, he may find the comparative *juster*, the superlatives *justest*, *truest*, *sincerest*, and the phrases, “*So vast* a throng,”—“*So vast* is art:” all of which are contrary to his teaching. “*Unjuster* dealing is used in buying than in selling.”—*Butler’s Poems*, p. 163. “*Iniquissimam* pacem *justissimo* bello antefero.”—*Cicero*. “I prefer the *unjustest* peace before the *justest* war.”—*Walker’s English Particles*, p. 68. The poet *Cowley* used the word *honestest*; which is not now very common. So *Swift*: “What *honester* folks never durst for their ears.”—*The Yahoo’s Overthrow*. So *Jucius*: “The *honestest* and ablest men.”—*Letter XVIII*. “The sentence would be *more correct* in the following form.”—*Murray’s Gram.*, i, p. 223. “Elegance is chiefly gained by studying the *correctest* writers.”—*Holmes’s Rhetoric*, p. 27. *Honest* and *correct*, for the sake of euphony, require the adverbs; as, *more honest*,

“*most correct.*”—*Lowth’s Gram.*, Pref., p. iv. *Vast, vaster, vastest*, are words as smooth, as *fast, faster, fastest*; and *more vast* is certainly as good English as *more just*: “Shall mortal man be *more just* than God?”—*Job*, iv, 17. “Wilt thou condemn him that is *most just*?”—*Ib.*, xxxiv, 17. “More wise, more learn’d, *more just*, more-everything.”—*Pope. Universal* is often compared by the adverbs, but certainly with no reënforcement of meaning: as, “One of the *most universal* precepts, is, that the orator himself should feel the passion.”—*Adams’s Rhet.*, i, 379. “Though not *so universal.*”—*Ib.*, ii, 311. “This experience is general, though not *so universal*, as the absence of memory in childhood.”—*Ib.*, ii, 362. “We can suppose no motive which would *more universally* operate.”—*Dr. Blair’s Rhet.*, p. 55. “Music is known to have been *more universally* studied.”—*Ib.*, p. 123. “We shall not wonder, that his grammar has been *so universally* applauded.”—*Walker’s Recommendation in Murray’s Gram.*, ii, 306. “The pronoun *it* is the *most universal* of all the pronouns.”—*Cutler’s Gram.*, p. 66. Thus much for one half of this critic’s twenty-two “*superlatives.*” The rest are simply adjectives that are not susceptible of comparison: they are not “superlatives” at all. A man might just as well teach, that *good* is a superlative, and not susceptible of comparison, because “*there is none good but one.*”

OBS. 13.—Pronominal adjectives, when their nouns are expressed, simply relate to them, and have no modifications: except *this* and *that*, which form the plurals *these* and *those*; and *much, many*, and a few others, which are compared. Examples: “Whence hath *this* man *this* wisdom, and *these* mighty works?”—*Matt.*, xiii, 54. “But *some* man will say, How are the dead raised up? and with *what* body do they come?”—1 *Cor.*, xv, 35. “The *first* man Adam was made a living soul; the *last* Adam was made a quickening spirit.”—*Ib.*, 45. So, when one pronominal adjective “precedes an other, the former *must be taken* simply as an adjective;” as,

“Those suns are set. O rise *some other* such!”—*Couper’s Task*, B. ii, l. 252.

OBS. 14.—Pronominal adjectives, when their nouns are not expressed, may be parsed as representing them in *person, number, gender*, and *case*; but those who prefer it, may supply the ellipsis, and parse the adjective, *simply as an adjective*. Example: “He threatens *many*, who injures *one.*”—*Kames*. Here it may be said, “*Many* is a pronominal adjective, meaning *many persons*; of the third person, plural number, masculine gender, and objective case.” Or those who will take the word simply as an adjective, may say, “*Many* is a pronominal adjective, of the positive degree, compared *many, more, most*, and relating to *persons* understood.” And so of “*one*,” which represents, or relates to, *person* understood. Either say, “*One* is a pronominal adjective, not compared,” and give the *three definitions* accordingly; or else say, “*One* is a pronominal adjective, relating to *person* understood; of the third person, singular number, masculine gender, and objective case,” and give the *six definitions* accordingly.

OBS. 15.—*Elder* for *older*, and *eldest* for *oldest*, are still frequently used; though the ancient positive, *eld* for *old*, is now obsolete. Hence some have represented *old* as having a two-fold comparison; and have placed it, not very properly, among the irregular adjectives. The comparatives *elder* and *better*, are often used as *nouns*; so are the Latin comparatives *superior* and *inferior, interior* and *exterior, senior* and *junior, major* and *minor*: as, The *elder’s* advice,—One of the *elders*,—His *betters*,—Our *superiors*,—The *interior* of the country,—A handsome *exterior*,—Your *seniors*,—My *juniors*,—A *major* in the army,—He is yet a *minor*. The word *other*, which has something of the nature of a comparative, likewise takes the form of a noun, as before suggested; and, in that form, the reader, if he will, may

call it a noun: as, “What do ye more than *others*?”—*Bible*. “God in thus much is bounded, that the evil hath he left unto *an other*; and *that Dark Other* hath usurped the evil which Omnipotence laid down.”—*Tupper’s Book of Thoughts*, p. 45. Some call it a pronoun. But it seems to be pronominal, merely by ellipsis of the noun after it; although, unlike a mere adjective, it assumes the ending of the noun, to mark that ellipsis. Perhaps therefore, the best explanation of it would be this: “*Others* is a pronominal adjective, having the form of a noun, and put for *other men*; in the third person, plural number, masculine gender, and nominative case.” The gender of this word varies, according to that of the contrasted term; and the case, according to the relation it bears to other words. In the following example, it is neuter and objective: “The fibres of this muscle act as those of *others*.”—*Cheyne*. Here, “as *those of others*,” means, “as *the fibres* of *other muscles*.”

OBS. 16.—“Comparatives and superlatives seem sometimes to part with their relative nature, and only to retain their *intensive*, especially those which are formed by the superlative adverb *most*; as, ‘A *most learned* man,’—‘A *most brave* man:’ i. e. not the bravest or the most learned man that ever was, but a man possessing bravery or learning in a very eminent degree.”—See *Alexander Murray’s Gram.*, p. 110. This use of the terms of comparison is thought by some not to be very grammatical.

OBS. 17.—Contractions of the superlative termination *est*, as *high’st* for *highest*, *bigg’st* for *biggest*, though sometimes used by the poets, are always inelegant, and may justly be considered grammatically improper. They occur most frequently in doggerel verse, like that of *Hudibras*; the author of which work, wrote, in his droll fashion, not only the foregoing monosyllables, but *learned’st* for *most learned*, *activ’st* for *most active*, *desperat’st* for *most desperate*, *epidemicall’st* for *most epidemical*, &c.

“And *th’ activ’st* fancies share as loose alloys,  
For want of equal weight to counterpoise.”—*Butler’s Poems*.

“Who therefore finds the *artificial’st* fools  
Have not been chang’d *i th’* cradle, but the schools.”—*Ib.*, p. 143.

OBS. 18.—Nouns used adjectively are not varied in number to agree with the nouns to which they relate, but what is singular or plural when used substantively, is without number when taken as an adjective: as, “One of the nine *sister* goddesses.”—*Webster’s Dict.*, *w. Muse*. “He has money in a *savings* bank.” The latter mode of expression is uncommon, and the term *savings-bank* is sometimes compounded, but the hyphen does not really affect the nature of the former word. It is doubtful, however, whether a plural noun can ever properly assume the character of an adjective; because, if it is not then really the same as the possessive case, it will always be liable to be thought a false form of that case. What Johnson wrote “*fullers earth*” and “*fullers thistle*,” Chalmers has “*fullers earth*” and “*fuller’s thistle*,” Webster, “*fuller’s-earth*” and “*fuller’s-thistle*,” Ainsworth, “*fuller’s earth*” and “*fuller’s thistle*,” Walker has only “*fullers-earth*,” Worcester, “*fuller’s-earth*,” Cobb, “*fullers earth*,” the *Treasury of Knowledge*, “*fullers’-earth*.” So unsettled is this part of our grammar, that in many such cases it is difficult cult to say whether we ought to use the apostrophe, or the hyphen, or both, or neither. To insert neither, unless we make a close compound, is to use a plural noun adjectively; which form, I think, is the most objectionable of all. See “*All souls day*,”—“*All-fools-day*,”—“*All-saints’-day*,” &c., in the dictionaries. These may well be written “*All Souls’ Day*” &c.

## EXAMPLES FOR PARSING.

## PRAXIS IV.—ETYMOLOGICAL.

*In the Fourth Praxis, it is required of the pupil—to distinguish and define the different parts of speech, and the classes and modifications of the ARTICLES, NOUNS, and ADJECTIVES.*

*The definitions to be given in the Fourth Praxis, are two for an article, six for a noun, three for an adjective, and one for a pronoun, a verb, a participle, an adverb, a conjunction, a preposition, or an interjection. Thus:—*

## EXAMPLE PARSED.

“The best and most effectual method of teaching grammar, is precisely that of which the careless are least fond: teach learnedly, rebuking whatsoever is false, blundering, or unmannerly.”—*G. Brown.*

*The* is the definite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The definite article is *the*, which denotes some particular thing or things.

*Best* is a common adjective, of the superlative degree; compared irregularly, *good*, *better*, *best*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A common adjective is any ordinary epithet, or adjective denoting quality or situation. 3. The superlative degree is that which is *most* or *least* of all included with it.

*And*, is a conjunction. 1. A conjunction is a word used to connect words or sentences in constructing, and to show the dependence of the terms so connected.

*Most* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Effectual* is a common adjective, compared by means of the adverbs; *effectual*, *more effectual*, *most effectual*; or, *effectual*, *less effectual*, *least effectual*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A common adjective is any ordinary epithet, or adjective denoting quality or situation. 3. Those adjectives which may be varied in sense, but not in form, are compared by means of adverbs.

*Method* is a common noun, of the third person, singular number, neuter gender, and nominative case. 1. A noun is the name of any person, place, or thing, that can be known or mentioned. 2. A common noun is the name of a sort, kind, or class, of beings or things. 3. The third person, is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Of* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*Teaching* is a participle. 1. A participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb.

*Grammar* is a common noun, of the third person, singular number, neuter gender, and objective case. 1. A noun is the name of any person, place or thing, that can be known or mentioned. 2. A common noun is the name of a sort, kind, or class, of beings or things. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The objective case is that form or state of a noun or pronoun, which usually denotes the object of a verb, participle, or preposition.

*Is* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Precisely* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*That* is a pronominal adjective, not compared; standing for *that method*, in the third person, singular number, neuter gender, and nominative case. [See OBS. 14th,] 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A pronominal adjective is a definitive word which may either accompany its noun or represent it understood. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Of* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*Which* is a pronoun. 1. A pronoun is a word used in stead of a noun.

*The* is the definite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The definite article is *the*, which denotes some particular thing or things.

*Careless* is a common adjective, compared by means of the adverbs; *careless*, *more careless*, *most careless*; or, *careless*, *less careless*, *least careless*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A common adjective is any ordinary epithet, or adjective denoting quality or situation. 3. Those adjectives which may be varied in sense, but not in form, are compared by means of adverbs.

*Are* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Least* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Fond* is a common adjective, compared regularly, *fond*, *fonder*, *fondest*; but here made superlative by the adverb *least*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A common adjective is any ordinary epithet, or adjective denoting quality or situation. 8. The superlative degree is that which is *most* or *least* of all included with it.

*Teach* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Learnedly* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Rebuking* is a participle. 1. A participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb.

*Whatsoever* is a pronoun. 1. A pronoun is a word used in stead of a noun.

*Is* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*False* is a common adjective, of the positive degree; compared regularly, *false*, *false*, *falsest*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A common adjective is any ordinary epithet, or adjective denoting quality or situation. 3. The positive degree is that which is expressed by the adjective in its simple form.

*Blundering* is a participial adjective, compared by means of the adverbs; *blundering*, *more blundering*, *most blundering*; or, *blundering*, *less blundering*, *least blundering*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A participial adjective is one that has the form of a participle, but differs from it by rejecting the idea of time. 3. Those adjectives which may be varied in sense, but not in form, are compared by means of adverbs.

*Or* is a conjunction. 1. A conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected.

*Unmannerly* is a common adjective, compared by means of the adverbs; *unmannerly*, *more unmannerly*, *most unmannerly*; or, *unmannerly*, *less unmannerly*, *least unmannerly*. 1. An adjective is a word added to a noun or pronoun, and generally expresses quality. 2. A common adjective is any ordinary epithet, or adjective denoting quality or situation. 3. Those adjectives which may be varied in sense, but not in form, are compared by means of adverbs.

#### LESSON I.—PARSING.

“The noblest and most beneficial invention of which human ingenuity can boast, is that of writing.”—*Robertson’s America*, Vol. II, p. 193.

“Charlemagne was the tallest, the handsomest, and the strongest man of his time; his appearance was truly majestic, and he had surprising agility in all sorts of manly exercises.”—*Stories of France*, p. 19.

“Money, like other things, is more or less valuable, as it is less or more plentiful.”—*Beanie’s Moral Science*, p. 378.

“The right way of acting, is, in a moral sense, as much a reality, in the mind of an ordinary man, as the straight or the right road.”—*Dr. Murray’s Hist.* Lang., i, 118.

“The full period of several members possesses most dignity and modulation, and conveys also the greatest degree of force, by admitting the closest compression of thought.”—*Jamieson’s Rhet.*, p. 79.

“His great master, Demosthenes, in addressing popular audiences, never had recourse to a similar expedient. He avoided redundancies, as equivocal and feeble. He aimed only to make the deepest and most efficient impression; and he employed for this purpose, the plainest, the fewest, and the most emphatic words.”—*Ib.*, p. 68.

“The high eloquence which I have last mentioned, is always the offspring of passion. A man actuated by a strong passion, becomes much greater than he is at other times. He is conscious of more strength and force; he utters greater sentiments, conceives higher

designs, and executes them with a boldness and felicity, of which, on other occasions, he could not think himself capable.”—*Blair’s Rhet.*, p. 236.

“His words bore sterling weight, nervous and strong,  
In manly tides of sense they roll’d along.”—*Churchill*.

“To make the humble proud, the proud submiss,  
Wiser the wisest, and the brave more brave.”—*W. S. Landor*.

## LESSON II.—PARSING.

“I am satisfied that in this, as in all cases, it is best, safest, as well as most right and honorable, to speak freely and plainly.”—*Channing’s Letter to Clay*, p. 4.

“The gospel, when preached with the Holy Ghost sent down from heaven, through the wonder-working power of God, can make the proud humble, the selfish disinterested, the worldly heavenly, the sensual pure.”—*Christian Experience*, p. 399.

“I am so much the better, as I am the liker\* the best; and so much the holier, as I am more conformable to the holiest, or rather to Him who is holiness itself.”—*Bp. Beneridge*.

“Whether any thing in Christianity appears to them probable, or improbable; consistent, or inconsistent; agreeable to what they should have expected, or the contrary; wise and good, or ridiculous and useless; is perfectly irrelevant.”—*M’Ilvaine’s Evidences*, p. 523.

“God’s providence is higher, and deeper, and larger, and stronger, than all the skill of his adversaries; and his pleasure shall be accomplished in their overthrow, except they repent and become his friends.”—*Cox, on Christianity*, p. 445.

“A just relish of what is beautiful, proper, elegant, and ornamental, in writing or painting, in architecture or gardening, is a fine preparation for the same just relish of these qualities in character and behaviour. To the man who has acquired a taste so acute and accomplished, every action wrong or improper must be highly disgusting: if, in any instance, the overbearing power of passion sway him from his duty, he returns to it with redoubled resolution never to be swayed a second time.”—*Kames, Elements of Criticism*, Vol. i, p. 25.

“In grave Quintilian’s copious work, we find  
The justest rules and clearest method join’d.”—*Pope, on Crit.*

## LESSON III.—PARSING.

“There are several sorts of scandalous tempers; some malicious, and some effeminate; others obstinate, brutish, and savage. Some humours are childish and silly; some, false, and others, scurrilous; some, mercenary, and some, tyrannical.”—*Collier’s Antoninus*, p. 52.

---

\* The regular comparison of this word, (*like*, *liker*, *likest*,) seems to be obsolete, or nearly so. It is seldom met with, except in old books: yet we say, *more like*, or *most like*, *less like*, or *least like*. “To say the flock with whom he is, is *likest* to Christ.”—*Barclay’s Works*, Vol. i, p. 180. “Of Godlike pow’r? for *likest* Gods they seem’d.”—*Milton, P. L.* B. vi, l. 301.

“Words are obviously voluntary signs: and they are also arbitrary; excepting a few simple sounds expressive of certain internal emotions, which sounds being the same in all languages, must be the work of nature: thus the unpremeditated tones of admiration are the same in all men.”—*Kames, Elements of Crit.*, i, 347.

“A stately and majestic air requires sumptuous apparel, which ought not to be gaudy, nor crowded with little ornaments. A woman of consummate beauty can bear to be highly adorned, and yet shows best in a plain dress.”—*Ib.*, p. 279.

“Of all external objects a graceful person is the most agreeable. But in vain will a person attempt to be graceful, who is deficient in amiable qualities.”—*Ib.*, p. 299.

“The faults of a writer of acknowledged excellence are more dangerous, because the influence of his example is more extensive; and the interest of learning requires that they should be discovered and stigmatized, before they have the sanction of antiquity bestowed upon them, and become precedents of indisputable authority.”—*Dr. Johnson, Rambler*, Vol. ii, No. 93.

“Judges ought to be more learned than witty, more reverend than plausible, and more advised than confident; above all things, integrity is their portion and proper virtue.”—*Bacon’s Essays*, p. 145.

“The wisest nations, having the most and best ideas, will consequently have the best and most copious languages.”—*Harris’s Hermes*, p. 408.

“Here we trace the operation of powerful causes, while we remain ignorant of their nature; but everything goes on with such regularity and harmony, as to give a striking and convincing proof of a combining directing intelligence.”—*Life of W. Allen*, Vol. i, p. 170.

“The wisest, unexperienced, will be ever  
Timorous and loth, with novice modesty,  
Irresolute, unhardy, unadventurous.”—*Milton*.

## IMPROPRIETIES FOR CORRECTION.

### ERRORS OF ADJECTIVES.

#### LESSON I.—DEGREES.

“I have the real excuse of the honestest sort of bankrupts.”—*Cowley’s Preface*, p. viii.

[FORMULE.—Not proper, because the adjective *honestest* is harshly compared by *est*. But, according to a principle stated on page 283d concerning the regular degrees, “This method of comparison is to be applied only to monosyllables, and to dissyllables of a smooth termination, or such as receive it and still have but one syllable after the accent.” Therefore, *honestest* should be *most honest*; thus, “I have real excuse of the *most honest* sort of bankrupts.”]

“The honourablest part of talk, is, to give the occasion.”—*Bacon’s Essays*, p. 90. “To give him one of his own modestest proverbs.”—*Barclay’s Works*, iii, 340. “Our language is now certainly properer and more natural, than it was formerly.”—*Bp. Burnet*. “Which will be of most and frequentest use to him in the world.”—*Locke, on Education*, p. 163. “The same is notified in the notablest places in the diocese.”—*Whitgift*. “But it was the

dreadfullest sight that ever I saw.”—*Pilgrim’s Progress*, p. 70. “Four of the ancientest, soberest, and discreetest of the brethren, chosen for the occasion, shall regulate it.”—*Locke, on Church Gov.* “Nor can there be any clear understanding of any Roman author, especially of ancients of time, without this skill.”—*Walker’s Particles*, p. x. “Far the learnedest of the Greeks.”—*Ib.*, p. 120. “The learner thou art, the humbler be thou.”—*Ib.*, p. 228. “He is none of the best or honestest.”—*Ib.*, p. 274. “The properest methods of communicating it to others.”—*Burn’s Gram.*, Prof, p. viii. “What heaven’s great King hath powerfulest to send against us.”—*Paradise Lost*. “Benedict is not the unhopfullest husband that I know.”—SHAK.: *in Joh. Dict.* “That he should immediately do all the meanest and triflingest things himself.”—RAY: *in Johnson’s Gram.*, p. 6. “I shall be named among the famoussest of women.”—MILTON’S *Samson Agonistes*: *ib.* “Those have the inventivest heads for all purposes.”—ASCHAM: *ib.* “The wretcheder are the contemners of all helps.”—BEN JONSON: *ib.* “I will now deliver a few of the properest and naturallst considerations that belong to this piece.”—WOTTON: *ib.* “The mortalest poisons practised by the West Indians, have some mixture of the blood, fat, or flesh of man.”—BACON: *ib.* “He so won upon him, that he rendered him one of the faithfulest and most affectionate allies the Medes ever had.”—*Rollin*, ii, 71. “‘You see before you,’ says he to him, ‘the most devoted servant, and the faithfulest ally, you ever had.’”—*Ib.*, ii, 79. “I chose the flourishing’st tree in all the park.”—*Cowley*. “Which he placed, I think, some centuries backwarder than Julius Africanus thought fit to place it afterwards.”—*Bolingbroke, on History*, p. 53. “The Tiber, the notedest river of Italy.”—*Littleton’s Dict.*

“To fartherest shores the ambrosial spirit flies.”—*Cutler’s Gram.*, p. 140.

—“That what she wills to do or say,

Seems wisest, virtuousest, discreetest, best.”—*Milton*, B. viii, l. 550.

## LESSON II.—MIXED.

“During the three or four first years of its existence.”—*Taylor’s District School*, p. 27.

[FORMULE.—Not proper, because the cardinal numbers, *three* and *four* are put before the ordinal *first*. But, according to the 7th part of Obs. 7th, page 280th, “In specifying any part of a series, we ought to place the cardinal number after the ordinal.” Therefore the words *three* and *four* should be placed after *first*; thus, “During the *first three* or *four* years of its existence.”]

“To the first of these divisions, my ten last lectures have been devoted.”—*Adams’s Rhet.*, Vol. i, p. 391. “There are in the twenty-four states not less than sixty thousand common schools.”—*Taylor’s District School*, p. 38. “I know of nothing which gives teachers so much trouble as this want of firmness.”—*Ib.*, p. 57. “I know of nothing that throws such darkness over the line which separates right from wrong.”—*Ib.*, p. 58. “None need this purity and simplicity of language and thought so much as the common school instructor.”—*Ib.*, p. 64. “I know of no periodical that is so valuable to the teacher as the *Annals of Education*.”—*Ib.*, p. 67. “Are not these schools of the highest importance? Should not every individual feel the deepest interest in their character and condition?”—*Ib.*, p. 78. “If instruction were made a profession, teachers would feel a sympathy for each other.”—*Ib.*, p. 93. “Nothing is so likely to interest children as novelty and change.”—*Ib.*, p. 131. “I know of no labour which affords so much happiness as that of the teacher’s.”—*Ib.*, p. 136. “Their school exercises are the most pleasant and agreeable of any that they engage in.”—*Ib.*, p. 136. “I know of no exercise so beneficial to the pupil as that of drawing maps.”—*Ib.*, p. 176. “I know of nothing in which our district schools are so defective as

they are in the art of teaching grammar.”—*Ib.*, p. 196. “I know of nothing so easily acquired as history.”—*Ib.* p. 206. “I know of nothing for which scholars usually have such an abhorrence, as composition.”—*Ib.*, p. 210. “There is nothing in our fellow-men that we should respect with so much sacredness as their good name.”—*Ib.*, p. 307. “Sure never any thing was so unbred as that odious man.”—CONGREVE: *in Joh. Dict.* “In the dialogue between the mariner and the shade of the deceased.”—*Philological Museum*, i, 466. “These master-works would still be less excellent and finisht”—*Ib.*, i, 469. “Every attempt to staylace the language of polisht conversation, renders our phraseology inelegant and clumsy.”—*Ib.*, i, 678. “Here are a few of the unpleasant’st words that ever blotted paper.”—SHAK.: *in Joh. Dict.* “With the most easy, undisobling transitions.”—BROOME: *ib.* “Fear is, of all affections, the unaptest to admit any conference with reason.”—HOOKER: *ib.* “Most chymists think glass a body more undestroyable than gold itself.”—BOYLE: *ib.* “To part with unhackt edges, and bear back our barge undinted.”—SHAK.: *ib.* “Erasmus, who was an unbogotted Roman Catholic, was transported with this passage.”—ADDISON: *ib.* “There are no less than five words, with any of which the sentence might have terminated.”—*Campbell’s Rhet.*, p. 397. “The one preach Christ of contention; but the other, of love.”—*Philippians*, i, 16. “Hence we find less discontent and heart-burnings, than where the subjects are unequally burdened.”—*Art of Thinking*, p. 56.

“The serpent, subtil’st beast of all the field,  
I knew; but not with human voice indu’d.”—MILTON: *Joh. Dict.*, *w. Human*.  
“How much more grievous would our lives appear,  
To reach th’ eighth hundred, than the eightieth year?”—DENHAM: *B. P.*, ii, 244.

### LESSON III.—MIXED.

“Brutus engaged with Aruns; and so fierce was the attack, that they pierced one another at the same time.”—*Lempriere’s Dict.*

[FORMULE.—Not proper, because the phrase *one another* is here applied to two persons only, the words *an* and *other* being needlessly compounded. But, according to Observation 15th, on the Classes of Adjectives, *each other* must be applied to two persons or things, and *one an other* to more than two. Therefore *one another* should here be *each other*; thus, “Brutus engaged with Aruns; and so fierce was the attack, that they pierced *each other* at the same time.”]

“Her two brothers were one after another turned into stone.”—*Art of Thinking*, p. 194. “Nouns are often used as adjectives; as, A *gold*-ring, a *silver*-cup.”—*Lennie’s Gram.*, p. 14. “Fire and water destroy one another.”—*Wanostrocht’s Gram.*, p. 82. “Two negatives in English destroy one another, or are equivalent to an affirmative.”—*Lowth’s Gram.*, p. 94; *E. Devis’s*, 111; *Mack’s*, 147; *Murray’s*, 198; *Churchill’s*, 148; *Putnam’s*, 135; *C. Adams’s*, 102; *Hamlin’s*, 79; *Alger’s*, 66; *Fisk’s*, 140; *Ingersoll’s*, 207; and *many others*. “Two negatives destroy one another, and are generally equivalent to an affirmative.”—*Kirkham’s Gram.*, p. 191; *Felton’s*, 85. “Two negatives destroy one another and make an affirmative.”—*J. Flint’s Gram.*, p. 79. “Two negatives destroy one another, being equivalent to an affirmative.”—*Frost’s El. of E. Gram.*, p. 48. “Two objects, resembling one another, are presented to the imagination.”—*Parker’s Exercises in Comp.*, p. 47. “Mankind, in order to hold converse with each other, found it necessary to give names to objects.”—*Kirkham’s Gram.*, p. 42. “Words are derived from each other\* in various ways.”—*Cooper’s Gram.*, p.

\* This example, and several others that follow it, are no ordinary solecisms; they are downright Irish bulls, making actions or relations reciprocal, where reciprocity is *utterly* unimaginable. Two words can no

108. "There are many other ways of deriving words from one another."—*Murray's Gram.*, p. 131. "When several verbs connected by conjunctions, succeed each other in a sentence, the auxiliary is usually omitted except with the first."—*Frost's Gram.*, p. 91. "Two or more verbs, having the same nominative case, and immediately following one another, are also separated by commas." \*—*Murray's Gram.*, p. 270; *C. Adams's*, 126; *Russell's*, 113; and others. "Two or more adverbs immediately succeeding each other, must be separated by commas."—*Same Grammars*. "If, however, the members succeeding each other, are very closely connected, the comma is unnecessary."—*Murray's Gram.*, p. 273; *Comly's*, 152; *and others*. "Gratitude, when exerted towards one another, naturally produces a very pleasing sensation in the mind of a grateful man."—*Mur.*, p. 287. "Several verbs in the infinitive mood, having a common dependence, and succeeding one another, are also divided by commas."—*Comly's Gram.*, p. 153. "The several words of which it consists, have so near a relation to each other."—*Murray's Gram.*, p. 268; *Comly's*, 144; *Russell's*, 111; *and others*. "When two or more verbs have the same nominative, and immediately follow one another, or two or more adverbs immediately succeed one another, they must be separated by commas."—*Comly's Gram.*, p. 145. "Nouns frequently succeed each other, meaning the same thing."—*Sanborn's Gram.*, p. 63. "And these two tenses may thus answer one another."—*Johnson's Gram. Com.*, p. 322. "Or some other relation which two objects bear to one another."—*Jamieson's Rhet.*, p. 149. "That the heathens tolerated each other, is allowed."—*Gospel its own Witness*, p. 76. "And yet these two persons love one another tenderly."—*Murray's E. Reader*, p. 112. "In the six hundredth and first year."—*Gen.*, viii, 13. "Nor is this arguing of his but a reiterate clamour."—*Barclay's Works*, i, 250. "In severals of them the inward life of Christianity is to be found."—*Ib.*, iii, 272. "Though Alvarez, Despauterius, and other, allow it not to be Plural."—*Johnson's Gram. Com.*, p. 169. "Even the most dissipate and shameless blushed at the sight."—*Lemp. Dict.*, *w. Antiochus*. "We feel a superior satisfaction in surveying the life of animals, than that of vegetables."—*Jamieson's Rhet.*, 172. "But this man is so full fraughted with malice."—*Barclay's Works*, i11, 205. "That I suggest some things concerning the properest means."—*Blair's Rhet.*, p. 337.

"So hand in hand they pass'd, the loveliest pair  
That ever since in love's embraces met."—*Milton*, P. L., B., iv, l. 321.

"Aim at the high'est, without the high'est attain'd  
Will be for thee no sitting, or not long."—*Id.*, P. R., B. iv, l. 106.

## CHAPTER V.—PRONOUNS.

A Pronoun is a word used in stead of a noun: as, The boy loves *his* book; *he* has long lessons, and *he* learns *them* well.

---

more be "*derived from each other*," than two living creatures can have received their existence from each other. So, two things can never "*succeed each other*," except they alternate or move in a circle; and a greater number in train can "*follow one another*" only in some imperfect sense, not at all reciprocal. In some instances, therefore, the best form of correction will be, to reject the reciprocal terms altogether—G. BROWN.

\* This doctrine of punctuation, if not absolutely false in itself, is here very badly taught. When *only two words*, of any sort, occur in the same construction, they seldom require the comma; and never can they need *more than one*, whereas these grammarians, by their plural word "*commas*," suggest a constant demand for two or more.—G. BROWN.

The pronouns in our language are twenty-four; and their variations are thirty-two: so that the number of *words* of this class, is fifty-six.

### OBSERVATIONS.

OBS. 1.—The word for which a pronoun stands, is called its *antecedent*, because it usually precedes the pronoun. But some have limited the term *antecedent* to the word represented by a *relative* pronoun. There can be no propriety in this, unless we will have every pronoun to be a relative, when it stands for a noun which precedes it; and, if so, it should be called something else, when the noun is to be found elsewhere. In the example above, *his* and *he* represent *boy*, and *them* represents *lessons*; and these nouns are as truly the antecedents to the pronouns, as any can be. Yet *his*, *he*, and *them*, in our most approved grammars, are not called relative pronouns, but personal.

OBS. 2.—Every pronoun may be explained as standing for the *name* of something, for the *thing itself* unnamed, or for a *former pronoun*; and, with the noun, pronoun, or thing, for which it stands, every pronoun must agree in person, number, and gender. The exceptions to this, whether apparent or real, are very few; and, as their occurrence is unfrequent, there will be little occasion to notice them till we come to syntax. But if the student will observe the use and import of pronouns, he may easily see, that some of them are put *substantively*, for nouns not previously introduced; some, *relatively*, for nouns or pronouns going before; some, *adjectively*, for nouns that must follow them in any explanation which can be made of the sense. These three modes of substitution, are very different, each from the others. Yet they do not serve for an accurate division of the pronouns; because it often happens, that a substitute which commonly represents the noun in one of these ways, will sometimes represent it in an other.

OBS. 3.—The pronouns *I* and *thou*, in their different modifications, stand immediately for persons that are, in general, sufficiently known without being named; (*I* meaning *the speaker*, and *thou*, *the hearer*;) their antecedents, or nouns, are therefore generally *understood*. The other personal pronouns, also, are sometimes taken in a general and demonstrative sense, to denote persons or things not previously mentioned; as, “*He* that hath knowledge, spareth his words.”—*Bible*. Here *he* is equivalent to *the man*, or *the person*. “The care of posterity is most in *them* that have no posterity.”—*Bacon*. Here *them* is equivalent to *those persons*. “How far do you call *it* to such a place?”—*Priestley’s Gram.*, p. 85. Here *it*, according to Priestley, is put for *the distance*. “For the priest’s lips should keep knowledge, and *they* should seek the law at his mouth.”—*Malachi*, ii, 7. Here *they* is put indefinitely for *men* or *people*. So *who* and *which*, though called relatives, do not always relate to a noun or pronoun going before them; for *who* may be a direct substitute for *what person*; and *which* may mean *which person*, or *which thing*: as, “And he that was healed, wist not *who* it was.”—*John*, v, 13. That is, “*The man who* was healed, knew not *what person* it was.” “I care not *which* you take; they are so much alike, one cannot tell *which* is *which*.”

OBS. 4.—A pronoun with which a question is asked, usually stands for some person or thing unknown to the speaker; the noun, therefore, cannot occur before it, but may be used after it or in place of it. Examples: “In the grave, *who* shall give thee thanks?”—*Ps.*, vi, 5. Here the word *who* is equivalent to *what person*, taken interrogatively. “Which of you convinceth me of sin?”—*John*, viii, 46. That is, “*Which man* of you?” “Master, *what* shall we do?”—*Luke*, iii, 12. That is, “*What act*, or *thing*?” These solutions, however, convert

*which* and *what* into *adjectives*: and, in fact, as they have no inflections for the numbers and cases, there is reason to think them at all times essentially such. We call them pronouns, to avoid the inconvenience of supposing and supplying an infinite multitude of ellipses. But *who*, though often equivalent (as above) to an adjective and a noun, is never itself used adjectively; it is always a pronoun.

OBS. 5.—In respect to *who* or *whom*, it sometimes makes little or no difference to the sense, whether we take it as a demonstrative pronoun equivalent to *what person*, or suppose it to relate to an antecedent understood before it: as, “Even so the Son quickeneth *whom* he will.”—*John*, v, 21. That is—“*what persons* he will,” or, “*those persons* whom he will,” for the Greek word for *whom*, is, in this instance, plural. The former is a shorter explanation of the meaning, but the latter I take to be the true account of the construction; for, by the other, we make *whom* a double relative, and the object of two governing words at once. So, perhaps, of the following example, which Dr. Johnson cites under the word *who*, to show what he calls its “*disjunctive* sense:”—

“There thou tellst *of* kings, and *who* aspire;  
*Who* fall, *who* rise, *who* triumph, *who* do moan.”—*Daniel*.

OBS. 6.—It sometimes happens that the real antecedent, or the term which in the order of the sense must stand before the pronoun, is not placed antecedently to it, in the order given to the words: as, “It is written, To *whom* he was not spoken of, *they* shall see; and they that have not heard, shall understand.”—*Romans*, xv, 21. Here the sense is, “*They* to *whom* he was not spoken of, shall see.” Whoever takes the passage otherwise, totally misunderstands it. And yet the same order of the words might be used to signify, “They shall see *to whom* (that is, *to what persons*) he was not spoken of.” Transpositions of this kind, as well as of every other, occur most frequently in poetry. The following example is from an Essay on Satire, printed with Pope’s Works, but written by one of his friends:—

“*Whose* is the crime, the scandal too be *theirs*;  
 The knave and fool are their own libellers.”—*J. Brown*.

OBS. 7.—The personal and the interrogative pronouns often stand in construction as the antecedents to other pronouns: as, “*He* also *that* is slothful in his work, is brother to *him that* is a great waster.”—*Prov.*, xviii. 9. Here *he* and *him* are each equivalent to *the man*, and each is taken as the antecedent to the relative which follows it. “For both *he that* sanctifieth, and *they who* are sanctified, are all of one: for which cause, *he* is not ashamed to call *them* brethren.”—*Heb.*, ii, 11. Here *he* and *they* may be considered the antecedents to *that* and *who*, of the first clause, and also to *he* and *them*, of the second. So the interrogative *who* may be the antecedent to the relative *that*; as, “*Who that* has any moral sense, dares tell lies?” Here *who*, being equivalent to *what person*, is the term with which the other pronoun agrees. Nay, an interrogative pronoun, (or the noun which is implied in it,) may be the antecedent to a *personal* pronoun; as, “*Who* hath first given to Him, and it shall be recompensed to *him* again?”—*Romans*, xi, 35. Here the idea is, “*What person* hath first given *any thing* to *the Lord*, so that it ought to be repaid *him*?” that is, “so that *the gift* ought to be recompensed from Heaven to *the giver*?” In the following example, the first pronoun is the antecedent to all the rest:—

“And *he that* never doubted of *his* state,  
*He* may perhaps—perhaps *he* may—too late.”—*Cowper*.

OBS. 8.—So the personal pronouns of the *possessive* case, (which some call adjectives,) are sometimes represented by relatives, though less frequently than their primitives: as, “How different, O Ortogrul, is *thy* condition, *who* art doomed to the perpetual torments of unsatisfied desire!”—*Dr. Johnson*. Here *who* is of the second person, singular, masculine; and represents the antecedent pronoun *thy*: for *thy* is a pronoun, and not (as some writers will have it) an adjective. Examples like this, disprove the doctrine of those grammarians who say that *my*, *thy*, *his*, *her*, *its*, and their plurals, *our*, *your*, *their*, are adjectives. For, if they were mere adjectives, they could not thus be made antecedents. Examples of this construction are sufficiently common, and sufficiently clear, to settle that point, unless they can be better explained in some other way. Take an instance or two more: “And they are written for *our* admonition, upon *whom* the ends of the world are come.”—1 *Cor.*, x, 11.

“Be thou the first true merit to befriend;  
*His* praise is lost, *who* stays till all commend.”—*Pope*.

### CLASSES.

Pronouns are divided into three classes; *personal*, *relative*, and *interrogative*.

I. A *personal pronoun* is a pronoun that shows, by its form, of what person it is; as, “Whether *it* \* were *I* or *they*, so *we* preach, and so *ye* believed.”—1 *Cor.*, xv, 11.

The simple personal pronouns are five: namely, *I*, of the first person; *thou*, of the second person; *he*, *she*, and *it*, of the third person.

The compound personal pronouns are also five: namely, *myself*, of the first person; *thyself*, of the second person; *himself*, *herself*, and *itself*, of the third person.

II. A *relative pronoun* is a pronoun that represents an antecedent word or phrase, and connects different clauses of a sentence; as, “No people can be great, *who* have ceased to be virtuous.”—*Dr. Johnson*.

The relative pronouns are *who*, *which*, *what*, *that*, *as*, and the compounds *whoever* or *whosoever*, *whichever* or *whichsoever*, *whatever* or *whatsoever*.†

*What* is a kind of *double relative*, equivalent to *that which* or *those which*; and is to be parsed, first as antecedent, and then as relative: as, “This is *what* I wanted; that is to say, *the thing which* I wanted.”—*L. Murray*. III. An *interrogative pronoun* is a pronoun with which a question is asked; as, “*Who* touched my clothes?”—*Mark*, v, 30.

\* Some grammarians exclude the word *it* from the list of personal pronouns, because it does not convey the idea of that personality which consists in *individual intelligence*. On the other hand, they will have *who* to be a personal pronoun, because it is literally applied to *persons only*, or intelligent beings. But I judge them to be wrong in respect to both; and, had they given *definitions* of their several classes of pronouns, they might perhaps have found out that the word *it* is always personal, in a grammatical sense, and *who*, either relative or interrogative.

† “*Whoso* and *whatso* are found in old authors, but are now out of use.”—*Churchill's Gram.*, p. 76. These antiquated words are equivalent in import to *whosoever* and *whatsoever*. The former, *whoso*, being used many times in the Bible, and occasionally also by the poets, as by Cowper, Whittier, and others, can hardly be said to be obsolete; though Wells, like Churchill, pronounced it so, in his first edition.

The interrogative pronouns are *who*, *which*, and *what*; being the same in form as relatives.

*Who* demands a person's name; *which*, that a person or thing be distinguished from others; *what*, the name of a thing, or a person's occupation and character.

### OBSERVATIONS.

OBS. 1.—The pronouns *I* and *myself*, *thou* and *thyself*, with their inflections, are literally applicable to persons only; but, *figuratively*, they represent brutes, or whatever else the human imagination invests with speech and reason. The latter use of them, though literal perhaps in every thing *but person*, constitutes the purest kind of personification. For example: "The *trees* went forth on a time to anoint a king over them: and they said unto the *olive-tree*, 'Reign *thou* over *us*.' But the *olive-tree* said unto them, 'Should *I* leave *my* fatness, wherewith by *me* they honour God and man, and go to be promoted over the trees?' See *Judges*, ix, from 8 to 16.

OBS. 2.—The pronouns *he* and *himself*, *she* and *herself*, with their inflections, are literally applicable to persons and to brutes, and to these only; if applied to lifeless objects, they animate them, and are figurative *in gender*, though literal perhaps in every other respect. For example: "A *diamond* of beauty and lustre, observing at *his* side in the same cabinet, not only many other gems, but even a *loadstone*, began to question the latter how *he* came there—*he*, *who* appeared to be no better than a mere flint, a sorry rusty-looking pebble, without the least shining quality to advance *him* to such honour; and concluded with desiring *him* to keep *his* distance, and to pay a proper respect to *his* superiors."—*Kames's Art of Thinking*, p. 226.

OBS. 3.—The pronoun *it*, as it carries in itself no such idea as that of personality, or sex, or life, is chiefly used with reference to things inanimate; yet the word is, in a certain way, applicable to animals, or even to persons; though it does not, in itself, present them as such. Thus we say, "*It* is *I*,"—"It was *they*,"—"It was *you*,"—"It was your *agent*,"—"It is your *bull* that has killed one of my oxen." In examples of this kind, the word *it* is simply demonstrative; meaning, *the thing or subject spoken of*. That subject, whatever it be in itself, may be introduced again after the verb, in any person, number, or gender, that suits it. But, as the verb agrees with the pronoun *it*, the word which follows, can in no sense be made, as Dr. Priestley will have it to be, the *antecedent* to that pronoun. Besides, it is contrary to the nature of what is primarily demonstrative, to represent a preceding word of any kind. The Doctor absurdly says, "Not only things, but persons, may be the *antecedent* to this pronoun; as, *Who is it? Is it not Thomas?* i. e. *Who is the person? Is not he Thomas?*"—*Priestley's Gram.*, p. 85. In these examples, the terms are transposed by interrogation; but that circumstance, though it may have helped to deceive this author and his copiers, affects not my assertion.

OBS. 4.—The pronoun *who* is usually applied only to persons. Its application to brutes or to things is improper, unless we mean to personify them. But *whose*, the possessive case of this relative, is sometimes used to supply the place of the possessive case, otherwise wanting, to the relative *which*. Examples: "The mutes are those consonants *whose* sounds cannot be protracted."—*Murray's Gram.*, p. 9. "Philosophy, *whose* end is, to instruct us in the knowledge of nature."—*Ib.*, p. 54; *Campbell's Rhet.*, 421. "Those adverbs

are compared *whose* primitives are obsolete.”—*Adam’s Latin Gram.*, p. 150. “After a sentence *whose* sense is complete in itself, a period is used.”—*Nutting’s Gram.*, p. 124. “We remember best those things *whose* parts are methodically disposed, and mutually connected.”—*Beattie’s Moral Science*, i, 59. “Is there any other doctrine *whose* followers are punished?”—ADDISON: *Murray’s Gram.*, p. 54; *Lowth’s*, p. 25.

“The question, *whose* solution I require,  
Is, what the sex of women most desire.”—DRYDEN: *Lowth*, p. 25.

OBS. 5.—Buchanan, as well as Lowth, condemns the foregoing use of *whose*, except in grave poetry: saying, “This manner of *personification* adds an air of dignity to the higher and more solemn kind of poetry, but it is highly improper in the lower kind, or in prose.”—*Buchanan’s English Syntax*, p. 73. And, of the last two examples above quoted, he says, “It ought to be *of which*, in both places: i. e. The followers *of which*; the solution *of which*.”—*Ib.*, p. 73. The truth is, that no personification is here intended. Hence it may be better to avoid, if we can, this use of *whose*, as seeming to imply what we do not mean. But Buchanan himself (stealing the text of an older author) has furnished at least one example as objectionable as any of the foregoing: “Prepositions are naturally placed betwixt the Words *whose* Relation and Dependence each of them is to express.”—*English Syntax*, p. 90; *British Gram.*, p. 201. I dislike this construction, and yet sometimes adopt it, for want of another as good. It is too much, to say with Churchill, that “this practice is now discountenanced by all correct writers.”—*New Gram.*, p. 226. Grammarians would perhaps differ less, if they would read more. Dr. Campbell commends the use of *whose* for *of which*, as an improvement suggested by good taste, and established by abundant authority. See *Philosophy of Rhetoric*, p. 420. “WHOSE, the possessive or genitive case of *who* or *which*; applied to persons or things.”—*Webster’s Octavo Dict.* “*Whose* is well authorized by good usage, as the possessive of *which*.”—*Sanborn’s Gram.*, p. 69. “Nor is any language complete, *whose* verbs have not tenses.”—*Harris’s Hermes*.

“—————Past and future, are the wings  
On *whose* support, harmoniously conjoined,  
Moves the great spirit of human knowledge.’—MS.”

*Wordsworth’s Preface to his Poems*, p. xviii.

OBS. 6.—The relative *which*, though formerly applied to persons and made equivalent to *who*, is now confined to brute animals and inanimate things. Thus, “Our Father *which* art in heaven,” is not now reckoned good English; it should be, “Our Father *who* art in heaven.” In this, as well as in many other things, the custom of speech has changed; so that what was once right, is now ungrammatical. The use of *which* for *who* is very common in the Bible, and in other books of the seventeenth century; but all good writers now avoid the construction. It occurs seventy-five times in the third chapter of Luke; as, “Joseph, *which* was the son of Heli, *which* was the son of Matthat,” etc. etc. After a personal term taken by metonymy for a thing, *which* is not improper; as, “Of the particular *author which* he is studying.”—*Gallaudet*. And as an interrogative or a demonstrative pronoun or adjective, the word *which* is still applicable to persons, as formerly; as, “*Which* of you all?”—“*Which man* of you all?”—“There arose a reasoning among them, *which* of them should be the greatest.”—*Luke*, ix, 46. “Two fair twins—the puzzled Strangers, *which* is *which*, inquire.”—*Tickell*.

OBS. 7.—If *which*, as a direct relative, is inapplicable to persons, *who* ought to be preferred to it in all personifications: as,

“The seal is set. Now welcome thou dread power,  
Nameless, yet thus omnipotent, *which* here  
Walk’st in the shadow of the midnight hour.”

BYRON: *Childe Harold’s Pilgrimage*, Cant, iv, st. 138.

What sort of personage is here imagined and addressed, I will not pretend to say; but it should seem, that *who* would be more proper than *which*, though less agreeable in sound before the word *here*. In one of his notes on this word, Churchill has fallen into a strange error. He will have *who* to represent a *horse!* and that, in such a sense, as would require *which* and not *who*, even for a person. As he prints the masculine pronoun in Italics, perhaps he thought, with Murray and Webster, that *which* must needs be “of the *neuter gender*.” \* He says, “In the following passage, *which* seems to be used *instead* of *who*:—

‘Between two horses, *which* doth bear him best;  
I have, perhaps, some shallow spirit of judgment’

SHAKS., 1 Hen. VI.”—*Churchill’s Gram.*, p. 226.

OBS. 8.—The pronoun *what* is usually applied to things only. It has a twofold relation, and is often used (by ellipsis of the noun) both as antecedent and as relative, in the form of a single word; being equivalent to *that which*, or *the thing which*,—*those which*, or *the things which*. In this double relation, *what* represents two cases at the same time: as, “He is ashamed of *what* he has done;” that is, “of what [*thing* or *action*] he has done;”—or, “of *that* [*thing* or *action*] *which* he has done.” Here are two objectives. The two cases are sometimes alike, sometimes different; for either of them may be the nominative, and either, the objective. Examples: “The dread of censure ought not to prevail *over what* is proper.”—*Kames, El. of Crit.*, Vol. i, p. 252. “The public ear will not easily *bear what* is slovenly and incorrect.”—*Blair’s Rhet.*, p. 12. “He who buys *what* he does not need, will often need *what* he cannot buy.”—*Student’s Manual*, p. 290. “*What* is just, is honest; and again, *what* is honest, is just.”—*Cicero*. “He that hath an ear, let him hear *what* the Spirit saith unto the churches.”—*Rev.*, ii, 7, 11, 17, 29; iii, 6, 13, 22.

OBS. 9.—This pronoun, *what*, is usually of the singular number, though sometimes plural: as, “I must turn to the faults, or *what appear* such to me.”—*Byron*. “All distortions and mimicries, as such, are *what raise* aversion instead of pleasure.”—*Steele*. “Purified indeed from *what appear* to be its real defects.”—*Wordsworth’s Pref.*, p. xix. “Every single impression, made even by the same object, is distinguishable from *what* have gone before, and from *what* succeed.”—*Kames, El. of Crit.*, Vol. i, p. 107. “Sensible people express no thoughts but *what* make some figure.”—*Ib.*, Vol. i, p. 399. The following example, which makes *what* both singular and plural at once, is a manifest solecism: “*What has* since followed *are* but natural consequences.”—J. C. CALHOUN, *Speech in U. S. Senate*, March 4,

\* “The man is prudent *which* speaks little.’ This sentence is incorrect, because *which* is a pronoun of the neuter gender.”—*Murray’s Exercises*, p. 18. “*Which* is also a relative, but it is of [the] neuter gender. It is also interrogative.”—*Webster’s Improved Gram.*, p. 26. For oversights like these, I cannot account. The relative *which* is of all the genders, as every body ought to know, who has ever heard of the *horse which* Alexander rode, of the *ass which* spoke to Balaam, or of any of the *animals* and *things* which Noah had with him in the ark.

1850. Here *has* should be *have*; or else the form should be this: “What has since followed, *is* but *a* natural *consequence*.”

OBS. 10.—The common import of this remarkable pronoun, *what*, is, as we see in the foregoing examples, twofold; but some instances occur, in which it does not appear to have this double construction, but to be simply declaratory; and many, in which the word is simply an adjective: as, “*What* a strange run of luck I have had to-day!”—*Columbian Orator*, p. 293. Here *what* is a mere adjective; and, in the following examples, a pronoun indefinite:—

“I tell thee *what*, corporal, I could tear her.”—*Shak*.

“He knows *what’s what*, and that’s as high  
As metaphysic wit can fly.”—*Hudibras*.

OBS. 11.—*What* is sometimes used both as an adjective and as a relative at the same time, and is placed before the noun which it represents; being equivalent to the adjective *any* or *all*, and the simple relative *who*, *which* \* or *that*: as, “*What* money we had, was taken away.” That is, “*All the* money *that* we had, was taken away.” “*What* man but enters, dies.” That is, “*Any* man *who* enters, dies.” “It was agreed that *what* goods were aboard his vessels, should be landed.”—*Mickle’s India*, p. 89. “*What* appearances of worth afterwards succeeded, were drawn from thence.”—*Internal Policy of Great Britain*, p. 196. That is, “*All the* appearances of worth, *which* afterwards succeeded.”—*Priestley’s Gram.*, p. 93. Indeed, this pronoun does not admit of being construed after a noun, as a simple relative: none but the most illiterate ever seriously use it so. *What* put for *who* or *which*, is therefore a ludicrous vulgarism; as, “The aspiring youth *what* fired the Ephesian dome.”—*Jester*. The word used as above, however, does not always preclude the introduction of a personal pronoun before the subsequent verb; as,†

“*What* god but enters yon forbidden field,  
Who yields assistance, or but wills to yield,  
Back to the skies with shame *he* shall be driven,  
Gash’d with dishonest wounds, the scorn of heaven.”—*Pope’s Homer*.

OBS. 12.—The compound *whatever* or *whatsoever* has the same peculiarities of construction as has the simpler word *what*: as, “*Whatever* word expresses an affirmation, or assertion, is a verb; or thus, *Whatever* word, with a noun or pronoun before or after it, makes full sense, is a verb.”—*Adam’s Latin Gram.*, p. 78. That is, “*Any* word *which*

\* The word *which* also, when taken in its *discriminative* sense (i.e. to distinguish some persons or things from others) may have a construction of this sort; and, by ellipsis of the noun after it, it may likewise bear a resemblance to the double relative *what*: as, “I shall now give you two passages; and request you to point out *which* words are mono-syllables, *which* dis-syllables, *which* tris-syllables, and *which* poly-syllables.”—*Bucke’s Gram.*, p. 16. Here, indeed, the word *what* might be substituted for *which*; because that also has a discriminative sense. Either would be right; but the author might have presented the same words and thoughts rather more accurately, thus: “I shall now give you two passages; and request you to point out which words are monosyllables; which, dissyllables; which, trissyllables; and which, polysyllables.”

† The relative *what*, being equivalent to *that which*, sometimes has the demonstrative word *that* set after it, by way of pleonasm; as, “*What* I tell you in darkness, *that* speak ye in light, and *what* ye hear in the ear, *that* preach ye upon the house-tops.”—*Matt.*, x, 27. In *Covell’s Digest*, this text is presented as “*false syntax*,” under the new and needless rule, “Double relatives always supply two cases.”—*Digest of E. Gram.*, p. 143. In my opinion, to strike out the word *that*, would greatly weaken the expression: and so thought our translators; for no equivalent term is used in the original.

expresses,” &c. “We will certainly do *whatsoever* thing goeth forth out of our own mouth.”—*Jeremiah*, xlv, 17. That is—“*any* thing, or *every* thing, *which*.” “*Whatever* sounds are difficult in pronunciation, are, in the same proportion, harsh and painful to the ear.”—*Blair’s Rhet.*, p. 121; *Murray’s Gram.*, p. 325. “*Whatsoever* things were written aforetime, were written for our learning.”—*Romans*, xv, 4. In all these examples, the word *whatever* or *whatsoever* appears to be used both adjectively and relatively. There are instances, however, in which the relation of this term is not twofold, but simple: as, “*Whatever* useful or engaging endowments we possess, virtue is requisite in order to their shining with proper lustre.”—*English Reader*, p. 23. Here *whatever* is simply an adjective. “The declarations contained in them [the Scriptures] rest on the authority of God *himself*; and there can be no appeal from them to any other authority *whatsoever*.”—*London Epistle*, 1836. Here *whatsoever* may be parsed either as an adjective relating to *authority*, or as an emphatic pronoun in apposition with its noun, like *himself* in the preceding clause. In this general explanatory sense, *whatsoever* may be applied to persons as well as to things; as, “I should be sorry if it entered into the imagination of *any person whatsoever*, that I was preferred to all other patrons.”—*Duncan’s Cicero*, p. 11. Here the word *whomsoever* might have been used.

OBS. 13.—But there is an other construction to be here explained, in which *whatever* or *whatsoever* appears to be a *double relative*, or a term which includes both antecedent and relative; as, “*Whatever* purifies, fortifies also the heart.”—*English Reader*, p. 23. That is. “*All that* purifies—or, *Everything which* purifies—fortifies also the heart.” “*Whatsoever* he doeth, shall prosper.”—*Psal.*, i, 3. That is, “*All that* he doeth—or, *All the things which he doeth*—shall prosper.” This construction, however, may be supposed elliptical. The Latin expression is, “*Omnia quaecumque faciet prosperabuntur*.”—*Vulgate*. The Greek is similar: Καὶ πάντα ὅσα ἂν ποιῇ κατευοδωθήσεται.—*Septuagint*. It is doubtless by some sort of ellipsis which familiarity of use inclines us to overlook, that *what*, *whatever*, and *whatsoever*, which are essentially adjectives, have become susceptible of this double construction as pronouns. But it is questionable what particular ellipsis we ought here to suppose, or whether any; and certainly, we ought always to avoid the supposing of an ellipsis, if we can.\* Now if we say the meaning is, “*Whatsoever things* he doeth, shall

---

\* As for Butler’s method of parsing these words by *always recognizing a noun as being* “UNDERSTOOD” *before them*,—a method by which, according to his publishers notice, “The ordinary unphilosophical explanation of this class of words is discarded, and a simple, intelligible, common-sense view of the matter now *for the first time* substituted,”—I know not what novelty there is in it, that is not also just so much *error*. “Compare,” says he, “these two sentences: ‘I saw *whom* I wanted to see;’ ‘I saw what I wanted to see. If *what* in the latter is equivalent to *that which* or *the thing which*, *whom*, in the former is equivalent to *him whom*, or *the person whom*.”—*Butler’s Practical Gram.*, p. 51. The former example being simply elliptical of the antecedent, he judges the latter to be so too; and infers, “that *what* is nothing more than a relative pronoun, and includes nothing else.”—*Ib*. This conclusion is not well drawn, because the two examples are *not analogous*; and whoever thus finds “that *what* is nothing more than a relative,” ought also to find it is something less,—a mere adjective. “I saw *the person whom* I wanted to see,” is a sentence that *can scarcely spare* the antecedent and retain the sense; “I saw *what* I wanted to see,” is one which *cannot receive* an antecedent, without changing both the sense and the construction. One may say, “I saw what *things* I wanted to see;” but this, in stead of giving *what* an *antecedent*, makes it an *adjective*, while it *retains the force of a relative*. Or he *may insert* a noun before *what*, agreeably to the solution of Butler; as, “I saw *the things*, what I wanted to see;” or, if he please, both before and after; as, “I saw *the things*, what *things* I wanted to see.” But still, in either case, *what* is no “simple relative;” for it here seems equivalent to the phrase, *so many as*. Or, again, he may omit the comma, and say, “I saw *the thing* what I wanted to see;” but this, if it be not a vulgarism, will only mean, “I saw *the thing to be* what I wanted to see.” So that this method of parsing the pronoun *what*, is manifestly no improvement, but rather a perversion and misinterpretation.

prosper;" this, though analogous to other expressions, does not simplify the construction. If we will have it to be, "Whatsoever *things* he doeth, *they* shall prosper;" the pronoun *they* appears to be pleonastic. So is the word *it*, in the text, "*Whatsoever* he saith unto you, do *it*."—*John*, ii, 5. If we say the full phrase is, "*All things* whatsoever he doeth, shall prosper;" this presents, to an English ear, a still more obvious pleonasm. It may be, too, *a borrowed idiom*, found nowhere but in translations; as, "*All things whatsoever* ye shall ask in prayer, believing, ye shall receive."—*Matt.*, xxi, 22. From these views, there seems to be some objection to any and every method of parsing the above-mentioned construction as *elliptical*. The learner may therefore say, in such instances, that *whatever* or *whatsoever* is a double relative, including both antecedent and relative; and parse it, first as antecedent, in connexion with the latter verb, and then as relative, in connexion with the former. But let him observe that the order of the verbs may be the reverse of the foregoing; as, "Ye are my friends, if ye *do* whatsoever I *command* you."—*John*, xv, 14. That is, according to the Greek, "If ye do whatsoever I command *to* you;" Though it would be better English to say, "If ye do whatsoever I command you *to do*." In the following example, however, it seems proper to recognize an ellipsis; nay, the omissions in the construction of the last line, are as many as three or four;—

"Expatriate with glad step, and choose at will  
*Whate'er bright spoils* the florid earth contains,  
*Whate'er the waters*, or the liquid air."—*Akenside*.

OBS. 14.—As the simple word *who* differs from *which* and *what*, in being always a declinable pronoun; so its compounds differ from theirs, in being incapable of either of the double constructions above described. Yet *whoever* and *whoso* or *whosoever*, as well as *whichever* and *whichsoever*, *whatever* and *whatsoever*, derive, from the affix which is added, or from the peculiarity of their syntax, an unlimited signification—or a signification which is limited only by the following verb; and, as some general term, such as *any person*, or *all persons*, is implied as the antecedent, they are commonly connected with

---

But, for further proof of his position, Butler adduces instances of what he calls "the relative *THAT* *with the antecedent omitted*. A few examples of this," he says, "will help us to ascertain the nature of *what*. 'We speak *that* we do know,' *Bible*. [*John*, iii, 11.] 'I am *that* I am.' *Bible*. [*Exod.*, iii, 14.] 'Eschewe *that* wicked is.' *Gower*. 'Is it possible he should know what he is, and be *that* he is?' Shakespeare. 'Gather the sequel by *that* went before.' *Id*. In these examples," continues he, "*that* is a relative; and is *exactly synonymous* with *what*. No one would contend that *that* stands for itself and its antecedent at the same time. The antecedent is omitted, *because it is indefinite*, OR EASILY SUPPLIED."—*Butler's Practical Gram.*, p. 52; *Bullions's Analytical and Practical Gram.*, p. 233. Converted at his wisest age, by these false arguments, so as to renounce and gainsay the doctrine taught almost universally, and hitherto spread industriously by himself, in the words of Lennie, that, "*What* is a compound relative, including both the relative and the antecedent," Dr. Bullions now most absurdly urges, that, "The truth is, *what* is a *simple* relative, having, wherever used, *like all other relatives*, BUT ONE CASE; but \* \* \* that it always refers to a *general antecedent, omitted*, BUT EASILY SUPPLIED *by the mind*," though "not UNDERSTOOD, *in the ordinary sense* of that expression."—*Analyt. and Pract. Gram.* of 1849, p. 51. Accordingly, though he differs from Butler about this matter of "*the ordinary sense*," he cites the foregoing suggestions of this author, with the following compliment: "These remarks appear to me *just*, and *conclusive on this point*."—*Ib.*, p. 233. But there must, I think, be many to whom they will appear far otherwise. These elliptical uses of *that* are all of them bad or questionable English; because, the ellipsis being such as may be supplied in two or three different ways, the true construction is doubtful, the true meaning not exactly determined by the words. It is quite as easy and natural to take "*that*" to be here a demonstrative term, having the relative *which* understood after it, as to suppose it "a relative," with an antecedent to be supplied before it. Since there would not be the same uncertainty, if *what* were in these cases substituted for *that*, it is evident that the terms are *not "exactly synonymous;"* but, even if they were so, exact synonymy would not evince a sameness of construction.

other words as if they stood for two cases at once: as, “*Whoever* seeks, shall find.” That is, “*Any person who* seeks, shall find.” But as the case of this compound, like that of the simple word *who*, *whose*, or *whom*, is known and determined by its form, it is necessary, in parsing, to treat this phraseology as being elliptical. The compounds of *who* do not, therefore, actually stand for two cases, though some grammarians affirm that they do.\* Example: “The soldiers made proclamation, that they would sell the empire to *whoever* would purchase it at the highest price.”—*Goldsmith’s Rome*, p. 231. That is—“to *any man who* would purchase it.” The affix *ever* or *soever* becomes unnecessary when the ellipsis is supplied; and this fact, it must be confessed, is a plausible argument against the supposition of an ellipsis. But the supposing of an antecedent understood, is here unavoidable; because the preposition *to* cannot govern the nominative case, and the word *whoever* cannot be an objective. And so in all other instances in which the two cases are different: as, “He bids *whoever* is athirst, to come.”—*Jenks’s Devotions*, p. 151. “Elizabeth publicly threatened, that she would have the head of *whoever* had advised it.”—HUME: *in Priestley’s Gram.*, p. 104.

OBS. 15.—If it is necessary in parsing to supply the antecedent to *whoever* or *whosoever*, when two *different* cases are represented, it is but analogous and reasonable to supply it also when two *similar* cases occur: as, “*Whoever* borrows money, *is bound* in conscience to repay it.”—*Paley*. “*Whoever* is eager to find excuses for vice and folly, *will find* his own backwardness to practise them much diminished.”—*Chapone*. “*Whoever* examines his own imperfections, *will cease* to be fastidious; *whoever* restrains humour and caprice, *will cease* to be squeamish.”—*Crabb’s Synonymes*. In all these examples, we have the word in the third person, singular number, masculine gender, and nominative case. And here it is most commonly found. It is always of the third person; and, though its number *may* be plural; its gender, feminine; its case, possessive or objective; we do not often use it in any of these ways. In some instances, the latter verb is attended with an other pronoun, which represents the same person or persons; as, “And *whosoever* will, let *him* take of the water of life freely.”—*Rev.*, xxii, 17. The case of this compound relative always depends upon what follows it, and not upon what precedes; as, “Or ask of *whomsoever* he has taught.”—*Cowper*. That is—“of *any person whom* he has taught.” In the following text, we have the possessive plural: “*Whosesoever* sins ye remit, they are remitted unto *them*.”—*John*, xx, 23. That is, “*Whatever persons’* sins.”

OBS. 16.—In such phraseology as the following, there is a stiffness which ought to be avoided: “For *whomever* God loves, he loves *them* in Christ, and no otherways.”—*Barclay’s Works*, Vol. iii, p. 215. Better: “For *all whom* God loves, he loves in Christ, and no *otherwise*.” “When the Father draws, *whomever* he draws, may come.”—*Penington*. Better: “When the Father draws, *all whom* he draws, (or, *every one whom* he draws.) may come.” A modern critic of immense promise cites the following clause as being found in the Bible: “But he loveth *whomsoever* followeth after righteousness.”—*O. B. Peirce’s Gram.*, p. 72. It

---

\* See this erroneous doctrine in Kirkham’s Grammar, p. 112; in Wells’s, p. 74; in Sanborn’s, p. 71, p. 96, and p. 177; in Cooper’s, p. 38; in O. B. Peirce’s, p. 70. These writers show a great fondness for this complex mode of parsing. But, in fact, no pronoun, not even the word *what*, has any double construction of cases from a real or absolute necessity; but merely because, the noun being suppressed, yet having a representative, we choose rather to understand and parse its representative doubly, than to supply the ellipsis. No pronoun includes “both the antecedent and the relative,” by virtue of its own *composition*, or of its own derivation, as a word. No pronoun can properly be called “*compound*” merely because it has a double construction, and is equivalent to two other words. These positions, if true, as I am sure they are, will refute sundry assertions that are contained in the above-named grammars.

is lamentable to see the unfaithfulness of this gentleman's quotations. About half of them are spurious; and I am confident that this one is neither Scripture nor good English. The compound relative, being the subject of *followeth*, should be in the nominative case; for the object of the verb *loveth* is the antecedent *every one*, understood. But the idea may be better expressed, without any ellipsis, thus: "He loveth *every one who* followeth after righteousness." The following example from the same hand is also wrong, and the author's rule and reasoning connected with it, are utterly fallacious: "I will give the reward to *whomsoever* will apprehend the rogue."—*Ib.*, p. 256. Much better say, "*to any one who*," but, if you choose the compound word, by all analogy, and all good authority, it must here be *whoever* or *whosoever*. The shorter compound *whoso*, which occurs very frequently in the Bible, is now almost obsolete in prose, but still sometimes used by the poets. It has the same meaning as *whosoever*, but appears to have been confined to the nominative singular; and *whatso* is still more rare: as, "*Whoso* diggeth a pit, shall fall therein."—*Prov.*, xxvi, 27.

"Which *whoso* tastes, can be enslaved no more."—*Cowper*.

"On their intended journey to proceed,

And over night *whatso* thereto did need."—*Hubbard*.

OBS. 17.—The relative *that* is applied indifferently to persons, to brute animals, and to inanimate things. But the word *that* is not always a relative pronoun. It is sometimes a pronoun, sometimes an adjective, and sometimes a conjunction. I call it not a demonstrative pronoun and also a relative; because, in the sense in which Murray and others have styled it a "demonstrative adjective *pronoun*," it is a pronominal *adjective*, and it is better to call it so. (1.) It is a *relative pronoun* whenever it is equivalent to *who*, *whom*, or *which*: as, "There is not a *just man* upon earth, *that* doeth good, and sinneth not"—*Eccl.*, vii, 20. "It was diverse from all the *beasts that* were before it."—*Dan.*, vii, 7. "And he had a *name* written, *that* no man knew but he himself."—*Rev.*, xix, 12. (2.) It is a *pronominal adjective* whenever it relates to a noun expressed or understood after it: as, "Thus with violence shall *that* great *city*, Babylon, be thrown down."—*Rev.*, xviii, 21. "Behold *that* [thing] which I have seen."—*Eccl.*, v, 18. "And they said, 'What is *that* \* [matter] to us? See thou to *that*' [matter]."—*Matt.*, xxvii, 4. (3.) In its other uses, it is a *conjunction*, and, as such, it most commonly makes what follows it, the purpose, object, or final cause, of what precedes it: as, "I read *that* I may learn."—*Dr. Adam*. "Ye men of Athens, I perceive *that* in all things ye are too superstitious."—*St. Paul*. "Live well, *that* you may die well."—*Anon*. "Take heed *that* thou speak not to Jacob."—*Genesis*. "Judge not, *that* ye be not judged."—*Matthew*.

OBS. 18.—The word *that*, or indeed any other word, should never be so used as to leave the part of speech uncertain; as, "For in the day *that* thou eatest thereof, thou shalt surely die."—*Gen.*, ii, 17. Here *that* seems to be a relative *pronoun*, representing *day*, in the third person, singular, neuter; yet, in other respects, it seems to be a *conjunction*,

\* Here the demonstrative word *that*, as well as the phrase *that matter*, which I form to explain its construction, unquestionably refers back to Judas's confession, that he had sinned; but still, as the word has not the connecting power of a relative pronoun, its true character is *that* of an adjective, and not *that* of a pronoun. This pronominal adjective is very often mixed with some such ellipsis, and *that* to repeat the import of various kinds of words and phrases: as, "God shall help her, and *that* right early."—*Psal.*, xlvi, 5. "Nay, ye do wrong, and defraud, and *that* your brethren."—1 *Cor.*, vi, 8. "I'll know your business, *that* I will."—*Shakespeare*.

because there is nothing to determine its case. Better: "For in the day *on which* thou eatest thereof, thou shalt surely die." This mongrel construction of the word *that*, were its justification possible, is common enough in our language to be made good English. But it must needs be condemned, because it renders the character of the term ambiguous, and is such a grammatical difficulty as puts the parser at a dead nonplus. Examples: (1.) "But *at the same time* *that* men are giving their orders, God on his part is likewise giving his."—*Rollin's Hist.*, ii, 106. Here the phrase, "*at the same time that*," is only equivalent to the adverb *while*; and yet it is incomplete, because it means, "*at the same time at which*," or, "*at the very time at which*." (2.) "The author of this work, *at the same time* *that* he has endeavoured to avoid a plan, *which may be* too concise or too extensive, defective in its parts or irregular in the disposition of them, has studied to render his *subject* sufficiently easy, intelligible, and *comprehensive*."—*Murray's Gram.*, Introd., p. 1. This sentence, which is no unfair specimen of its author's original style, needs three corrections: 1. For "*at the same time that*," say *while*: 2. Drop the phrase, "*which may be*," because it is at least useless: 3. For "*subject*," read *treatise*, or *compilation*. You will thus have tolerable diction. Again: (3.) "The participles of active verbs *act upon objects* and govern them in the objective case, in the same manner *that* the verbs *do*, from which they are derived. *A participle* in the nature of an adjective, belongs or refers to *nouns* or *pronouns* in the same manner *that* adjectives do; and *when it will admit* the degrees of comparison, *it is called* a participial *adjective*."—*Sanborn's Gram.*, p. 38. This is the style of a gentleman of no ordinary pretensions, one who thinks he has produced the best grammar that has ever appeared in our language. To me, however, his work suggests an abundance of questions like these; each of which would palpably involve him in a dilemma: What is here meant by "*objects*," the *words*, or the *things*? if the former, how are they acted upon? if the latter, how are they governed? If "*a participle is called an adjective*," which is it, an adjective, or a participle? If "*a participle refers to nouns or pronouns*," *how many* of these are required by the relation? When does a *participle* "*admit the degrees of comparison*?" How shall we parse the word *that* in the foregoing sentences?

OBS. 19.—The word *as*, though usually a conjunction or an adverb, has sometimes the construction of a relative pronoun, especially after *such*, *so many*, or *as many*; and, whatever the antecedent *noun* may be, this is the *only fit relative* to follow any of these terms in a restrictive sense. Examples: "We have been accustomed to repose on its veracity with *such* humble confidence *as* suppresses curiosity."—*Johnson's Life of Cowley*. "The malcontents made *such* demands *as* none but a tyrant could refuse."—*Bolingbroke, on Hist.*, Let. 7. "The Lord added to the church daily *such* [persons] *as* should be saved."—*Acts*, ii, 47. "And *as many as* were ordained to eternal life, believed."—*Acts*, xiii, 48. "*As many as* I love, I rebuke and chasten."—*Rev.*, iii, 19. "Know ye not, that *so many* of us *as* were baptized into Jesus Christ, were baptized into his death?"—*Rom.*, vi, 3. "For *as many* of you *as* have been baptized into Christ, have put on Christ."—*Gal.*, iii, 27. "A syllable is *so many* letters *as* are spoken with one motion of the voice."—*Perley's Gram.*, p. 8. "The compound tenses are *such as* cannot be formed without an auxiliary verb."—*Murray's Gram.*, p. 91. "Send him *such* books *as* will please him."—*Webster's Improved Gram.*, p. 37. "In referring to *such* a division of the day *as* is past, we use the imperfect."—*Murray's Gram.*, p. 70. "Participles have *the same* government *as* the verbs from which they are derived."—*Ib.*, Rule xiv. "Participles have *the same* government *as* the verbs *have* from which they are derived."—*Sanborn's Gram.*, p. 94. In some of these examples, *as* is in the nominative case, and in others, in the objective; in some, it is of the masculine gender, and in others, it is neuter; in some, it is of the plural number, and in others, it is singular:

but in all, it is of the third person; and in all, its person, number, gender, and case, are as obvious as those of any invariable pronoun can be.

OBS. 20.—Some writers—(the most popular are Webster, Bullions, Wells, and Chandler—) imagine that *as*, in such sentences as the foregoing, can be made a conjunction, and not a pronoun, if we will allow them to consider the phraseology elliptical. Of the example for which I am indebted to him, Dr. Webster says, “*As* must be considered as the nominative to *will please*, or we must suppose an ellipsis of several words: as, ‘Send him such books as *the books which* will please him, or as *those which* will please him.’”—*Improved Gram.*, p. 37. This pretended explanation must be rejected as an absurdity. In either form of it, *two* nominatives are idly imagined between *as* and its verb; and, I ask, of what is the first one the subject? If you say, “Of *are* understood,” making the phrase, “such books *as the books are*,” does not *as* bear the same relation to this new verb *are*, that is found in the pronoun *who*, when one says, “Tell him *who* you *are*?” If so, *as* is a pronoun still; so that, thus far, you gain nothing. And if you will have the whole explanation to be, “Send him such books *as the books are books which* will please him;” you multiply words, and finally arrive at nothing, but tautology and nonsense. Wells, not condescending to show his pupils what he would supply after this *as*, thinks it sufficient to say, the word is “followed by an ellipsis of one or more words required to complete the construction; as, ‘He was the father of all such as [ ] handle the harp and organ.’—*Gen.* 4: 21.”—*Wells’s School Gram.*, 1st Ed., p. 164; 3d Ed., p. 172.

OBS. 21.—Chandler exhibits the sentence, “*These are not such as are worn*,” and, in parsing it, expounds the words *as* and *are*, thus; the crotchets being his, not mine: “*as*.... is an *adverb, connecting* the two sentences in comparing them, [*It is a fault* of some, that they make *as* a pronoun, when, in a comparative sentence, it corresponds with *such*, and is immediately followed by a verb, as in the sentence now given. This is probably done *from an ignorance* of the real nominative to the verb. The sentence *should stand thus*: ‘These (*perhaps* bonnets) are not such (bonnets) *as* (those bonnets) are (which are) worn.’ Then] *are* .... is the substantive verb, third person, plural number, indicative mood, present tense, and agrees with the noun *bonnets*, understood.”—*Chandler’s Common School Gram.*, p. 162. All this bears the marks of shallow flippancy. No part of it is accurate. “*Are worn*,” which the critic unwarrantably divides by his misplaced curves and uncouth impletions, is a passive verb, agreeing with the pronoun *as*. But the text itself is faulty, being unintelligible through lack of a noun; for, of things that *may be* “*worn*,” there are a thousand different sorts. Is it not ridiculous, for a great grammarian to offer, as a model for parsing, what he himself, “*from an ignorance* of the real nominative,” can only interpret with a “*perhaps*?” But the noun which this author supplies, the meaning which he guesses that he had, he here very improperly stows away within a pair of *crotchets*. Nor is it true, that “the sentence *should stand*” as above exhibited; for the tautological correction not only has the very extreme of awkwardness, but still makes *as* a pronoun, a nominative, belonging after *are*: so that the phrase, “*as are worn*,” is only encumbered and perverted by the verbose addition made. So of an other example given by this expounder, in which *as* is an objective: “He is exactly such a man *as* I saw.”—*Chandler’s Com. Sch. Gram.*, p. 163. Here *as* is the object of *saw*. But the author says, “The sentence, however, *should stand* thus: ‘He is exactly such a man *as* that person *was* whom I saw.’”—*Ibid.* This inelegant alteration makes *as* a nominative dependent on *was*.

OBS. 22.—The use of *as* for a relative pronoun, is almost entirely confined to those connexions in which no other relative would be proper; hence few instances occur, of its

absolute equivalence to *who*, *which*, or *that*, by which to establish its claim to the same rank. Examples like the following, however, go far to prove it, if proof be necessary; because *who* and *which* are here employed, where *as* is certainly now required by all good usage: “It is not only convenient, but absolutely needful, that there be certain meetings at certain places and times, *as* may best suit the convenience of *such*, *who* may be most particularly concerned in them.”—*Barclay’s Works*, Vol. i, p. 495. “Which, no doubt, will be found obligatory upon all *such*, *who* have a sense and feeling of the mind of the Spirit.”—*Ib.*, i, p. 578. “Condemning or removing *such* things, *which* in themselves are evil.”—*Ib.*, i, p. 511. In these citations, not only are *who* and *which* improperly used for *as*, but the *commas* before them are also improper, because the relatives are intended to be taken in a restrictive sense. “If there be *such that* walk disorderly now.”—*Ib.*, i, p. 488. Here *that* ought to be *as*; or else *such* ought to be *persons*, or *those*. “When such virtues, *as which* still accompany the truth, are necessarily supposed to be wanting.”—*Ib.*, i, p. 502. Here *which*, and the comma before *as*, should both be expunged. “I shall raise in their minds the same course of thought *as* has taken possession of my own.”—*Duncan’s Logic*, p. 61. “The pronoun must be in the same case *as* the antecedent would be *in*, if substituted for it.”—*Murray’s Gram.*, p. 181. “The verb must therefore have the same construction *as* it has in the following sentence.”—*Murray’s Key*, p. 190. Here *as* is exactly equivalent to the relative *that*, and either may be used with equal propriety. We cannot avoid the conclusion, therefore, that, as the latter word is sometimes a conjunction and sometimes a pronoun, so is the former.

OBS. 23.—The relatives *that* and *as* have this peculiarity; that, unlike *whom* and *which*, they never follow the word on which their case depends; nor indeed can any simple relative be so placed, except it be governed by a preposition or an infinitive. Thus, it is said, (John, xiii, 29th,) “Buy those things *that* we have need *of*,” so we may say, “Buy such things *as* we have need *of*.” But we cannot say, “Buy those things *of that* we have need;” or, “Buy such things *of as* we have need.” Though we may say, “Buy those things *of which* we have need,” as well as, “Buy those things *which* we have need *of*,” or, “Admit those persons of whom we have need,” as well as, “Admit those persons *whom* we have need *of*.” By this it appears that *that* and *as* have a closer connexion with their antecedents than the other relatives require: a circumstance worthy to have been better remembered by some critics. “Again, *that* and *as* are used rather differently. When *that* is used, the verb must be repeated; as, ‘Participles *require* the same government, *that* their verbs *require*.’—‘James *showed* the same credulity, *that* his minister *showed*.’ But when *as* is used, the verb generally may, or may not be repeated; as, ‘Participles *require* the same government *as* their verbs;’ or, ‘*as* their verbs *require*.’—‘James *showed* the same credulity as his minister;’ or, ‘*as* his minister *showed*.’ the second nominative *minister* being parsed as the nominative to the same verb *showed* understood.”—*Nixon’s Parser*, p. 140.\*

OBS. 24.—The terminating of a sentence with a preposition, or other small particle, is in general undignified, though perhaps not otherwise improper. Hence the above-named inflexibility in the construction of *that* and *as*, sometimes induces an ellipsis of the governing word designed; and is occasionally attended with some difficulty respecting the

---

\* Dr. Bullions has undertaken to prove, “That the word AS should not be considered a relative in any circumstances.” The force of his five great arguments to this end, the reader may well conceive of, when he has compared the following one with what is shown in the 22d and 23d observations above: “3. *As can never be used as a substitute for another relative pronoun, nor another relative pronoun as a substitute for it*. If, then, it is a relative pronoun, it is, to say the least, a very unaccommodating one.”—*Bullions’s Analytical and Practical Gram.* of 1849, p. 233.

choice of our terms. Examples: “The answer is always in the same case *that* the interrogative word *is*.”—*Sanborn’s Gram.*, p. 70. Here is a faulty termination; and with it a more faulty ellipsis. In stead of ending the sentence with *is in*, say, “The answer always *agrees in case with* the interrogative word.” Again: “The relative is of the same person *with* the antecedent.”—*Lowth’s Gram.*, p. 101. This sentence is wrong, because the person of the relative is not really *identical with* the antecedent. “The relative is of the same person *as* the antecedent.”—*Murray’s Gram.*, p. 154. Here the writer means—“*as* the antecedent *is of*.” “A neuter verb becomes active, when followed by a noun of the same signification *with* its own.”—*Sanborn’s Gram.*, p. 127. Here *same* is wrong, or else the last three words are useless. It would therefore be improper to say—“of *the same* signification *as* its own.” The expression ought to be—“of a signification *similar to* its own.” “Ode is, *in Greek*, the same *with* song or hymn.”—*Blair’s Rhet.*, p. 396. *Song* being no Greek word, I cannot think the foregoing expression accurate, though one might say, “Ode is *identical with* song or hymn.” Would it not be better to say, “Ode is the same *as* song or hymn?” That is, “Ode is, *literally*, the same *thing that* song or hymn *is*?” “Treatises of philosophy, ought not to be composed in the same style *with* orations.”—*Blair’s Rhet.*, p. 175. Here neither *with* nor *as* can be proper; because *orations* are not *a style*. Expunge *same*; and say—“in the style *of* orations.”

OBS. 25.—Few writers are sufficiently careful in their choice and management of relatives. In the following instance, Murray and others violate a special rule of their own grammars, by using *whom* for *that* “after an adjective of the superlative degree:” “Modifying them according to the genius of that tongue, and the established practice of *the best* speakers and writers *by whom* it is used.”—*Octavo Gram.*, p. 1; *Fisk’s*, p. 11; *et al.* According to Priestley and himself, the great Compiler is here in an error. The rule is perhaps too stringent; but whoever teaches it, should keep it. If he did not like to say, “*the best* speakers and writers *that* it is used *by*,” he ought to have said, “*the best* speakers and writers *that use it*.” Or, rather, he ought to have said *nothing* after the word “writers;” because the whole relative clause is here weak and useless. Yet how many of the amenders of this grammar have not had perspicacity enough, either to omit the expression, or to correct it according to the author’s own rule!

OBS. 26.—Relative pronouns are capable of being taken in two very different senses: the one, *restrictive* of the general idea suggested by the antecedent; the other, *resumptive* of that idea, in the full import of the term—or, in whatever extent the previous definitives allow. The distinction between these two senses, important as it is, is frequently made to depend solely upon the insertion or the omission of *a comma*. Thus, if I say, “Men who grasp after riches, are never satisfied;” the relative *who* is taken restrictively, and I am understood to speak *only of the avaricious*. But, if I say, “Men, who grasp after riches, are never satisfied;” by separating the terms *men* and *who*, I declare *all men* to be covetous and unsatisfied. For the former sense, the relative *that* is preferable to *who*; and I shall presently show why. This example, in the latter form, is found in Sanborn’s Grammar, page 142d; but whether the author meant what he says, or not, I doubt. Like many other unskillful writers, he has paid little regard to the above-mentioned distinction; and, in some instances, his meaning cannot have been what his words declare: as, “A prism is a solid, whose sides are all parallelograms.”—*Analytical Gram.*, p. 142. This, as it stands, is no definition of a prism, but an assertion of two things; that a prism is a solid, and that all the sides of a solid are parallelograms. Erase the comma, and the words will describe the prism as a peculiar kind of solid; because *whose* will then be taken in the restrictive sense. This sense, however, may be conveyed even with a comma before the relative; as,

“Some fictitious histories yet remain, *that* were composed during the decline of the Roman empire.”—*Blair’s Rhet.*, p. 374. This does not suggest that there are no other fictitious histories now extant, than such as were composed during the decline of the Roman empire; but I submit it to the reader, whether the word *which*, if here put for *that*, would not convey this idea.

OBS. 27.—Upon this point, many philologists are open to criticism; and none more so, than the recent author above cited. By his own plain showing, this grammarian has no conception of the difference of meaning, upon which the foregoing distinction is founded. What marvel, then, that he falls into errors, both of doctrine and of practice? But, if no such difference exists, or none that is worthy of a critic’s notice; then the error is mine, and it is vain to distinguish between the restrictive and the resumptive sense of relative pronouns. For example: “The boy that desires to assist his companions, deserves respect.”—*G. Brown*. “That boy, who desires to assist his companions, deserves respect.”—*D. H. Sanborn*. According to my notion, these two sentences clearly convey two very different meanings; the relative, in the former, being restrictive, but, in the latter, resumptive of the sense of the antecedent. But of the latter example this author says, “The clause, ‘who desires to assist his companions,’ with the relative who at its head, *explains or tells what boy deserves respect*; and, like a conjunction, connects this clause to the noun *boy*.”—*Analytical Gram.*, p. 69. He therefore takes it in a restrictive sense, as if this sentence were exactly equivalent to the former. But he adds, “A relative pronoun is resolvable into a personal pronoun and a conjunction. The sentence would then read, ‘That boy desires to assist his companions, *and* he deserves respect.’ The relative pronoun governs the nearer verb, and the antecedent the more distant one.”—*Ib.*, p. 69. Now, concerning the restrictive relative, this doctrine of equivalence does not hold good; and, besides, the explanation here given, not only contradicts his former declaration of the sense he intended, but, with other seeming contradiction, joins the antecedent to the nearer verb, and the substituted pronoun to the more distant.

OBS. 28.—Again, the following principles of this author’s punctuation are no less indicative of his false views of this matter: “RULE xiv.—Relative pronouns in the nominative or [*the*] objective case, are preceded by commas, when the clause which the relative *connects* [,] ends a sentence; as, ‘Sweetness of temper is a quality, which reflects a lustre on every accomplishment’—*B. Greenleaf*.’ Self [-] denial is the sacrifice [,] which virtue must make.’ [—*L. Murray*.] The comma is omitted before the relative, when the verb which the antecedent governs, follows the relative clause; as, ‘He that suffers by imposture, has too often his virtue more impaired than his fortune.’—*Johnson*.” See *Sanborn’s Analytical Gram.*, p. 269. Such are some of our author’s principles—“the essence of modern improvements.” His practice, though often wrong, is none the worse for contradicting these doctrines. Nay, his proudest boast is ungrammatical, though peradventure not the less believed: “*No* [other] *grammar in the language* probably contains so great a quantity of *condensed and* useful matter with so little superfluity.”—*Sanborn’s Preface*, p. v.

OBS. 29.—Murray’s rule for the punctuation of relatives, (a rule which he chiefly copied from Lowth,) recognizes virtually the distinction which I have made above; but, in assuming that relatives “*generally*” require a comma before them, it erroneously suggests that the resumptive sense is more common than the restrictive. Churchill, on the contrary, as wrongly makes it an essential characteristic of *all* relatives, “to limit or explain the words to which they refer.” See his *New Gram.*, p. 74. The fact is, that relatives are so generally restrictive, that not one half of them are thus pointed; though some that

do restrict their antecedent, nevertheless admit the point. This may be seen by the first example given us by Murray: "Relative pronouns are connective words, and *generally admit* a comma before them: as, 'He preaches sublimely, who lives a sober, righteous, and pious life.' But when two members, or *phrases*, [say *clauses*,] are closely connected by a relative, restraining the general notion of the antecedent to a particular sense, *the comma should be omitted*: as, '*Self-denial* is the *sacrifice which* virtue must make;' 'A *man who* is of a detracting spirit, will misconstrue the most innocent *words that* can be put together.' In the latter example, the assertion is not of 'a man in general,' but of 'a man who is of a detracting spirit;' and therefore *they* [say *the pronoun and its antecedent*] should not be separated."—*Murray's Gram.*, *Octavo*, p. 273; *Ingersoll's*, 285; *Comly's*, 152. This reasoning, strictly applied, would exclude the comma before *who* in the first example above; but, as the pronoun does not "closely" or immediately follow its antecedent, the comma is allowed, though it is not much needed. Not so, when the sense is resumptive: as, "The *additions, which* are very considerable, are chiefly *such as* are calculated to obviate objections." See *Murray's Gram.*, p. ix. Here the comma is essential to the meaning. Without it, *which* would be equivalent to *that*; with it, which is equivalent to *and they*. But this latter meaning, as I imagine, cannot be expressed by the relative *that*.

OBS. 30.—Into the unfortunate example which Sanborn took from Murray, I have inserted the comma for him; not because it is necessary or right, but because his rule requires it: "*Self-denial* is the *sacrifice*," &c. The author of "a complete system of grammar," might better contradict even Murray, than himself. But why was this text admired? and why have *Greene*, *Bullions*, *Hiley*, *Hart*, and others, also copied it? A *sacrifice* is something devoted and lost, for the sake of a greater good; and, *if Virtue sacrifice self-denial*, what will she do, but run into indulgence? The great sacrifice which she demands of men, is rather that of their *self-love*. Wm. E. Russell has it, "*Self defence* is the sacrifice which virtue must make!"—*Russell's Abridgement of Murray's Gram.*, p. 116. Bishop Butler tells us, "It is indeed *ridiculous* to assert, that *self-denial is essential to virtue and piety*; but it would have been nearer the truth, though not strictly the truth itself, to have said, that it is essential to discipline and improvement."—*Analogy of Religion*, p. 123.

OBS. 31.—The relative *that*, though usually reckoned equivalent to *who* or *which*, evidently differs from both, in being more generally, and perhaps more appropriately, taken in the restrictive sense. It ought therefore, for distinction's sake, to be preferred to *who* or *which*, whenever an antecedent not otherwise limited, is to be restricted by the relative clause; as, "*Men that* grasp after riches, are never satisfied."—"I love *wisdom that* is gay and civilized."—*Art of Thinking*, p. 34. This phraseology leaves not the limitation of the meaning to depend solely upon the absence of a pause after the antecedent; because the relative *that* is seldom, if ever, used by good writers in any other than a restrictive sense. Again: "A man of a polite imagination is let into a great many pleasures *that* the vulgar are not capable of receiving."—*Addison, Spect.*, No. 411. Here, too, according to my notion, *that* is obviously preferable to *which*; though a great critic, very widely known, has taken some pains to establish a different opinion. The "many pleasures" here spoken of, are no otherwise defined, than as being such as "the vulgar are not capable of receiving." The writer did not mean to deny that the vulgar are capable of receiving a great many pleasures; but, certainly, if *that* were changed to *which*, this would be the meaning conveyed, unless the reader were very careful to avoid a pause where he would be apt to make one. I therefore prefer Addison's expression to that which Dr. Blair would substitute.

OBS. 32.—The style of Addison is more than once censured by Dr. Blair, for the frequency with which the relative *that* occurs in it, where the learned lecturer would have used *which*. The reasons assigned by the critic are these: “*Which* is a much more definitive word than *that*, being never employed in any other way than as a relative; whereas *that* is a word of many senses; sometimes a demonstrative pronoun, often a conjunction. In some cases we are indeed obliged to use *that* for a relative, in order to avoid the ungraceful repetition of *which* in the same sentence. But when we are laid under no necessity of this kind, *which* is always the preferable word, and certainly was so in this sentence: ‘*Pleasures which* the vulgar are not capable of receiving,’ is much better than ‘*pleasures that* the vulgar are not capable of receiving.’”—*Blair’s Rhetoric*, Lect. xx, p. 200. Now the facts are these: (1.) That *that* is the more definitive or restrictive word of the two. (2.) That the word *which* has as many different senses and uses as the word *that*. (3.) That not the repetition of *which* or *who* in a series of clauses, but a *needless change* of the relative, is ungraceful. (4.) That the necessity of using *that* rather than *which* or *who*, depends, not upon what is here supposed, but upon the different senses which these words usually convey. (5.) That as there is always some reason of choice, *that* is sometimes to be preferred; *which*, sometimes; and *who*, sometimes: as, “It is not the man *who* has merely taught, or *who* has taught long, or *who* is able to point out defects in authors, *that* is capable of enlightening the world in the respective sciences *which* have engaged his attention; but the man *who* has taught well.”—*Kirkham’s Elocution*, p. 7.

OBS. 33.—Blair’s *Rhetoric* consists of forty-seven lectures; four of which are devoted to a critical examination of the style of Addison, as exhibited in four successive papers of the *Spectator*. The remarks of the professor are in general judicious; but, seeing his work is made a common textbook for students of “*Belles Lettres*,” it is a pity to find it so liable to reprehension on the score of inaccuracy. Among the passages which are criticised in the twenty-first lecture, there is one in which the essayist speaks of the effects of *novelty* as follows:

‘It is this *which* bestows charms on a monster, and makes even the imperfections of nature please us. It is this *that* recommends variety, where the mind is every instant called off to something new, and the attention not suffered to dwell too long and waste itself on any particular object. It is this, likewise, *that* improves what is great or beautiful, and makes it afford the mind a double entertainment.’—*Spectator*, No. 412.

This passage is deservedly praised by the critic, for its “perspicuity, grace, and harmony;” but, in using different relatives under like circumstances, the writer has hardly done justice to his own good taste. Blair’s remark is this: “His frequent use of *that*, instead of *which*, is another peculiarity of his style; but, on this occasion in particular, [it] cannot be much commended, as, ‘It is this *which*,’ seems, in every view, to be better than, ‘It is this *that*,’ three times repeated.”—*Lect.* xxi, p. 207. What is here meant by “*every view*,” may, I suppose, be seen in the corresponding criticism which is noticed in my last observation above; and I am greatly deceived, if, in this instance also, the relative *that* is not better than *which*, and more agreeable to polite usage. The direct relative which corresponds to the introductory pronoun *it* and *an other antecedent*, should, I think, be *that*, and not *who* or *which*: as, “It is not ye *that* speak.”—*Matt.*, x, 20. “It is thou, Lord, *who* hast the hearts of all men in thy hands, *that* turnest the hearts of any to show me favour.”—*Jenks’s Prayers*, p. 278. Here *who* has reference to *thou* or *Lord* only; but *that* has some respect to the pronoun *it*, though it agrees in person and gender with *thou*. A similar example is cited at the close of the preceding observation; and I submit it to the

reader, whether the word *that*, as it there occurs, is not the *only fit* word for the place it occupies. So in the following examples: “There are *Words, which* are *not Verbs, that* signify actions and passions, and even things transient.”—*Brightland’s Gram.*, p. 100. “It is the universal taste of mankind, which is subject to no such changing modes, *that* alone is entitled to possess any authority.”—*Blair’s Rhetoric*, p. 286.

OBS. 34.—Sometimes the broad import of an antecedent is *doubly restricted*, first by one relative clause, and then by another; as, “And all *that dwell upon the earth*, shall worship him, *whose names are not written in the book of life*.”—*Rev.*, xiii, 8. “And then, like true Thames-Watermen, they abuse every man *that* passes by, *who* is better dressed than themselves.”—*Brown’s Estimate*, Vol. ii, p. 10. Here *and*, or *if he*, would be as good as “*who*,” for the connective only serves to carry the restriction into narrower limits. Sometimes the limit fixed by one clause is *extended* by another; as, “There is no evil *that you may suffer*, or *that you may expect to suffer, which* prayer is not the appointed means to alleviate.”—*Bickersteth, on Prayer*, p. 16. Here *which* resumes the idea of “*evil*,” in the extent last determined; or rather, in that which is fixed by either clause, since the limits of both are embraced in the assertion. And, in the two limiting clauses, the same pronoun was requisite, on account of their joint relation; but the clause which assumes a different relation, is rightly introduced by a different pronoun. This is also the case in the following examples: “For there is no condemnation to those *that* are in Christ Jesus, *who* walk not after the flesh, but after the Spirit.”—*Barclay’s Works*, Vol. i, p. 432. “I will tell thee the mystery of the woman, and of the beast *that* carrieth her, *which* hath the seven heads and ten horns.”—*Rev.*, xvii, 7. Here the restrictive sense is well expressed by one relative, and the resumptive by another. When neither of these senses is intended by the writer, *any* form of the relative must needs be improper: as, “The greatest genius *which runs* through the arts and sciences, takes a kind of tincture from them, and falls unavoidably into imitation.”—*Addison, Spect.*, No. 160. Here, as I suppose, *which runs* should be *in running*. What else can the author have meant?

OBS. 35.—Having now, as I imagine, clearly shown the difference between the restrictive and the resumptive sense of a relative pronoun, and the absolute necessity of making such a choice of words as will express that sense only which we intend; I hope the learner will see, by these observations, not merely that clearness requires the occasional use of each of our five relatives, *who, which, what, that*, and *as*; but that this distinction in the meaning, is a very common principle by which to determine what is, and what is not, good English. Thus *that* and *as* are appropriately our *restrictive* relatives, though *who* and *which* are sometimes used restrictively; but, in a *resumptive* sense, *who* or *which* is required, and required even after those terms which usually demand *that* or *as*: thus, “We are vexed at the unlucky chance, and go away dissatisfied. *Such* impressions, *which* ought not to be cherished, are a sufficient reason for excluding stories of that kind from the theatre.”—*Kames, El. of Crit.*, ii, 279. Here *which* is proper to the sense intended; but *such* requires *as*, when the latter term limits the meaning of the former. In sentences like the following, *who* or *which* may be used in lieu of *that*; whether with any advantage or not, the reader may judge: “You seize the critical moment *that* is favorable to emotion.”—*Bair’s Rhet.*, p. 321. “An historian *that* would instruct us, must know when to be concise.”—*Ib.*, p. 359. “Seneca has been censured for the affectation *that* appears in his style.”—*Ib.*, p. 367. “Such as the prodigies *that* attended the death of Julius Cæsar.”—*Ib.*, p. 401. “By unfolding those principles *that* ought to govern the taste of every individual.”—*Kames’s Dedication to El. of Crit.* “But I am sure he has that *that* is better than an estate.”—*Spect.*, No. 475. “There are two properties, *that* characterize and essentially distinguish relative

pronouns.”—*Churchill's Gram.*, p. 74. By these examples, it may be seen, that Dr. Blair often forgot or disregarded his own doctrine respecting the use of this relative; though he was oftener led, by the error of that doctrine, to substitute *which* for *that* improperly.

OBS. 36.—*Whether* was formerly used as an interrogative pronoun, in which sense it always referred to one of two things; as, “Ye fools and blind! for *whether* is greater, the gold, or the temple that sanctifieth the gold?”—*Matt.*, xxiii, 17. This usage is now obsolete; and, in stead of it, we say, “*Which* is greater?” But as a disjunctive conjunction, corresponding to *or*, the word *whether* is still in good repute; as, “Resolve *whether* you will go *or* not.”—*Webster's Dict.* In this sense of the term, some choose to call *whether* an *adverb*.

OBS. 37.—In the view of some writers, interrogative pronouns differ from relatives chiefly in this; that, as the subject referred to is unknown to the speaker, they do not relate to a *preceding* noun, but to something which is to be expressed in the answer to the question. It is certain that their *person*, *number*, and *gender*, are not regulated by an antecedent noun; but by what the speaker supposes or knows of a subject which may, or may not, agree with them in these respects: as, “*What* lies there?” Answer, “Two *men* asleep.” Here *what*, standing for *what thing*, is of the third person, singular number, and neuter gender; but *men*, which is the term that answers to it, is of the third person, plural, masculine. There is therefore no necessary agreement between the question and the answer, in any of those properties in which a pronoun usually agrees with its noun. Yet some grammarians will have interrogatives to agree with these “*subsequents*,” as relatives agree with their *antecedents*. The answer, it must be granted, commonly contains a noun, corresponding in some respects to the interrogative pronoun, and agreeing with it *in case*; but this noun cannot be supposed to control the interrogation, nor is it, in any sense, the word for which the pronoun stands. For every pronoun must needs stand for something that is uttered or conceived by the same speaker; nor can any question be answered, until its meaning is understood. Interrogative pronouns must therefore be explained as direct substitutes for such other terms as one might use in stead of them. Thus *who* means *what person*?

“*Who* taught that heav'n-directed spire to rise?  
*The Man of Ross*, each lisping babe replies.”—*Pope*.

OBS. 38.—In the classification of the pronouns, and indeed in the whole treatment of them, almost all our English grammars are miserably faulty, as well as greatly at variance. In some forty or fifty, which I have examined on this point, the few words which constitute this part of speech, have more than twenty different modes of distribution. (1.) Cardell says, “There is but one kind of pronouns”—*Elements of Gram.*, p. 30. (2.) D. Adam's, Greenleaf, Nutting, and Weld, will have two kinds; “*personal* and *relative*.” (3.) Dr. Webster's “Substitutes, or pronouns, are of two kinds:” the one, “called *personal*,” the other, without name or number. See his *Improved Gram.*, p. 24. (4.) Many have fixed upon three sorts; “*personal*, *relative*, and *adjective*,” with a subdivision of the last. Of these is Lindley Murray, in his late editions, with his amenders, Ainsworth, Alger, Bacon, Bullions, Fisk, A. Flint, Frost, Guy, Hall, Kirkham, Lennie, Merchant, Picket, Pond, and S. Putnam. (5.) Kirkham, however, changes the order of the classes; thus, “*personal*, *adjective*, and *relative*,” and, with ridiculous absurdity, makes *mine*, *thine*, *hers*, *ours*, *yours*, and *theirs* to be “*compounds*.” (6.) Churchill adopts the plan of “*personal*, *relative*, and *adjective* pronouns;” and then destroys it by a valid argument. (7.) Comly, Wilcox, Wells, and Perley,

have these three classes; “*personal, relative, and interrogative*.” and this division is right. (8.) Sanborn makes the following bull: “The *general* divisions of pronouns are *into personal, relative, interrogative, and several sub-divisions*.”—*Analytical Gram.*, p. 91. (9.) Jaudon has these three kinds; “*personal, relative, and distributive*.” (10.) Robbins, these; “*simple, conjunctive, and interrogative*.” (11.) Lindley Murray, in his early editions, had these four; “*personal, possessive, relative, and adjective*.” (12.) Bucke has these; “*personal, relative, interrogative, and adjective*.” (13.) Ingersoll, these; “*personal, adjective, relative, and interrogative*.” (14.) Buchanan; “*personal, demonstrative, relative, and interrogative*.” (15.) Coar; “*personal, possessive or pronominal adjectives, demonstrative, and relative*.” (16.) Bicknell; “*personal, possessive, relative, and demonstrative*.” (17.) Cobbett; “*personal, relative, demonstrative, and indefinite*.” (18.) M'Culloch; “*personal, possessive, relative, and reciprocal*.” (19.) Staniford has five; “*personal, relative, interrogative, definitive, and distributive*.” (20.) Alexander, six; “*personal, relative, demonstrative, interrogative, definitive, and adjective*.” (21.) Cooper, in 1828, had five; “*personal, relative, possessive, definite, and indefinite*.” (22.) Cooper, in 1831, six; “*personal, relative, definite, indefinite, possessive, and possessive pronominal adjectives*.” (23.) Dr. Crombie says: “Pronouns may be divided into *Substantive*, and *Adjective*; *Personal*, and *Impersonal*; *Relative*, and *Interrogative*.” (24.) Alden has seven sorts; “*personal, possessive, relative, interrogative, distributive, demonstrative, and indefinite*.” (25.) R. C. Smith has many kinds, and treats them so badly that nobody can count them. In respect to definitions, too, most of these writers are shamefully inaccurate, or deficient. Hence the filling up of their classes is often as bad as the arrangement. For instance, four and twenty of them will have interrogative pronouns to be relatives; but who that knows what a relative pronoun is, can coincide with them in opinion? Dr. Crombie thinks, “that interrogatives are strictly relatives;” and yet divides the two classes with his own hand!

### MODIFICATIONS.

Pronouns have the same modifications as nouns; namely, *Persons, Numbers, Genders*, and *Cases*. Definitions universally applicable have already been given of all these things; it is therefore unnecessary to define them again in this place.

### OBSERVATIONS.

OBS. 1.—In the personal pronouns, most of these properties are distinguished by the words themselves; in the relative and the interrogative pronouns, they are ascertained chiefly by means of the antecedent and the verb. Interrogative pronouns, however, as well as the relatives *which, what, as*, and all the compounds of *who, which*, and *what*, are always of the third person. Even in etymological parsing, some regard must be had to the syntactical relations of words. By *modifications*, we commonly mean actual changes in the forms of words, by which their grammatical properties are inherently distinguished; but, in all languages, the distinguishable properties of words are somewhat more numerous than their actual variations of form; there being certain principles of universal grammar, which cause the person, number, gender, or case, of some words, to be inferred from their relation to others; or, what is nearly the same thing, from the sense which is conveyed by the sentence. Hence, if in a particular instance it happen, that some, or even all, of these properties, are without any index in the form of the pronoun itself, they are still to be ascribed in parsing, because they may be easily and certainly discovered from the construction. For example: in the following text, it is just as easy to discern the *genders* of the pronouns, as the *cases* of the nouns; and both are known and asserted to be what they are, upon principles of mere inference: “For what knowest *thou*, O *wife*, whether *thou*

shalt save *thy husband*? or how knowest *thou*, O *man*, whether *thou* shalt save *thy wife*?—1 *Cor.*, vii, 16. Again: “*Who* betrayed *her* companion? Not *I*.”—*Murray’s Key*, p. 211. Here *her* being of the feminine gender, it is the inference of every reader, that *who* and *I* are so too; but whether the word *companion* is masculine or feminine, is not so obvious.

OBS. 2.—The personal pronouns of the first and second persons, are equally applicable to both sexes; and should be considered masculine or feminine, according to the known application of them. [See *Levizac’s French Gram.*, p. 73.] The speaker and the hearer, being present to each other, of course know the sex to which they respectively belong; and, whenever they appear in narrative or dialogue, we are told who they are. In *Latin*, an adjective or a participle relating to these pronouns, is varied *to agree* with them in *number*, *gender*, and *case*. This is a sufficient proof that *ego*, *I*, and *tu*, *thou*, are not destitute of gender, though neither the Latin words nor the English are themselves varied to express it:—

“*Miseræ* hoc tamen unum  
Exequere, Anna, *mihi*: *solam* nam perfidus ille  
*Te* colere, arcanos etiam tibi credere sensus;  
*Sola* viri molles aditus et tempora nôras.”—*Virgil*.

OBS. 3.—Many English grammarians, and Murray at their head, deny the first person of nouns, and the gender of pronouns of the first and second persons; and at the same time teach, that, “Pronouns must always agree with their antecedents, *and* the nouns for which they stand, in *gender*, *number*, and *person*.” (*Murray’s Gr.*, 2d Ed., p. 111; *Rev. T. Smith’s*, p. 60:) and further, with redundancy of expression, that, “The relative is of the same person *with* the antecedent, and the verb agrees with it accordingly.”—*Same*. These quotations form Murray’s fifth rule of syntax, as it stands in his early editions.\* In some of his revisings, the author erased the word *person* from the former sentence, and changed *with* to *as* in the latter. But other pronouns than relatives, agree with their nouns in person; so that his first alteration was not for the better, though Ingersoll, Kirkham, Alger, Bacon, J. Greenleaf, and some others, have been very careful to follow him in it. And why did he never discern, that the above-named principles of his etymology are both of them contradicted by this rule of his syntax, and one of them by his rule as it now stands? It is manifest, that no two words can possibly *agree* in any property which belongs not to both. Else what *is* agreement? Nay, no two things in nature, can in any wise agree, accord, or be alike, but by having some quality or accident in common. How strange a contradiction then is this! And what a compliment to learning, that it is still found in well-nigh all our grammars!

---

\* The latter part of this awkward and complex rule was copied from Lowth’s Grammar, p. 101. Dr. Ash’s rule is, “*Pronouns* must *always agree* with the *nouns* for which they *stand*, or to which they *refer*, in *Number*, *person*, and *gender*.”—*Grammatical Institutes*, p. 54. I quote this *exactly as it stands* in the book: the Italics are his, not mine. Roswell C. Smith appears to be ignorant of the change which Murray made in his fifth rule: for he still publishes as Murray’s a principle of concord which the latter rejected as early as 1806: “RULE V. Corresponding with Murray’s Grammar, RULE V. *Pronouns must agree with the nouns for which they stand, in gender, number, AND PERSON.*”—*Smith’s New Gram.*, p. 130. So *Allen Fisk*, in his “Murray’s English Grammar Simplified,” p. 111; *Aaron M. Merchant*, in his “*Abridgment* of Murray’s English Grammar, Revised, *Enlarged* and Improved,” p. 79; and the *Rev. J. G. Cooper*, in his “Abridgment of Murray’s English Grammar,” p. 113; where, from the titles, every reader would expect to find the latest doctrines of Murray, and not what he had so long ago renounced or changed.

OBS. 4.—If there were truth in what Murray and others affirm, that “Gender has respect only to the third person singular of the pronouns, *he, she, it*,” \* no two words could ever agree in gender; because there can be no such agreement between any two of the words here mentioned, and the assertion is, that gender has respect to no others. But, admitting that neither the author nor the numerous copiers of this false sentence ever meant to deny that gender has respect to *nouns*, they do deny that it has respect to any other *pronouns* than these; whereas I affirm that it ought to be recognized as a property of *all* pronouns, as well as of all nouns. Not that the gender of either is in all instances invariably fixed by the *forms* of the particular words; but there is in general, if not in every possible case, some principle of grammar, on which the gender of any noun or pronoun in a sentence may be readily ascertained. Is it not plain, that if we know who speaks or writes, who hears or is addressed, we know also the gender of the pronouns which are applied to these persons? The poet of The Task looked upon his mother’s picture, and expressed his tender recollections of a deceased parent by way of *address*; and will any one pretend, that the pronouns which he applied to himself and to her, are either of the same gender, or of no gender? If we take neither of these assumptions, must we not say, they are of different genders? In this instance, then, let the parser call those of the first person, masculine; and those of the second, feminine:—

“*My* mother! when *I* learned that *thou* wast dead,  
Say, wast *thou* conscious of the tears *I* shed?”—*Cowper*.

OBS. 5.—That the pronouns of the first and second persons are sometimes masculine and sometimes feminine, is perfectly certain; but whether they can or cannot be neuter, is a question difficult to be decided. To things inanimate they are applied only *figuratively*; and the question is, whether the figure always necessarily changes the gender of the antecedent noun. We assume the general principle, that the noun and its pronoun are always of the same gender; and we know that when inanimate objects are personified in the third person, they are usually represented as masculine or feminine, the gender being changed by the figure. But when a lifeless object is spoken to in the second person, or represented as speaking in the first, as the pronouns here employed are in themselves without distinction of gender, no such change can be proved by the mere words; and, if we allow that it would be needless to *imagine* it where the words do not prove it, the gender of these pronouns must in such cases be neuter, because we have no ground to think it otherwise. Examples: “And Jesus answered and said unto *it*, [the barren *figtree*,] No man eat fruit of *thee* hereafter forever.”—*Mark*, xi, 14. “O *earth*, cover not *thou* my blood.”—*Job*, xvi, 18. “O *thou sword* of the Lord, how long will it be ere *thou* be quiet?”—*Jeremiah*, xlvii, 6. In these instances, the objects addressed do not appear to be figuratively invested with the attribute of sex. So likewise with respect to the first person. If, in the following example, *gold* and *diamond* are neuter, so is the pronoun *me*; and, if not neuter, of what gender are they? The personification indicates or discriminates no other.

“Where thy true treasure? Gold says, ‘Not in *me*;  
And, ‘Not in *me*,’ the diamond. Gold is poor.”—*Young*.

## THE DECLENSION OF PRONOUNS.

The declension of a pronoun is a regular arrangement of its numbers and cases.

## I. SIMPLE PERSONALS.

The simple personal pronouns are thus declined:—

I, *OF THE FIRST PERSON, ANY OF THE GENDERS.*\*

|       |       |                                  |       |       |                      |
|-------|-------|----------------------------------|-------|-------|----------------------|
| Sing. | Nom.  | I,                               | Plur. | Nom.  | we,                  |
|       | Poss. | my, <i>or</i> mine, <sup>†</sup> |       | Poss. | our, <i>or</i> ours, |
|       | Obj.  | me; Obj. us.                     |       |       |                      |

THOU, *OF THE SECOND PERSON, ANY OF THE GENDERS.*

|       |       |                       |       |       |                                 |
|-------|-------|-----------------------|-------|-------|---------------------------------|
| Sing. | Nom.  | thou, <sup>‡</sup>    | Plur. | Nom.  | ye, <i>or</i> you,              |
|       | Poss. | thy, <i>or</i> thine, |       | Poss. | your, <i>or</i> yours,          |
|       | Obj.  | thee;                 |       | Obj.  | you, <i>or</i> ye. <sup>§</sup> |

HE, *OF THE THIRD PERSON, MASCULINE GENDER.*

|       |       |      |       |       |                          |
|-------|-------|------|-------|-------|--------------------------|
| Sing. | Nom.  | he,  | Plur. | Nom.  | they,                    |
|       | Poss. | his, |       | Poss. | their, <i>or</i> theirs, |
|       | Obj.  | him; |       | Obj.  | them.                    |

\* Dr. Crombie, and some others, represent I and thou, with their inflections, as being “masculine and feminine.” Lennie, M’Culloch, and others, represent them as being “masculine or feminine.” But, if either of them can have an antecedent that is *neuter*, neither of these views is strictly correct. (See Obs. 5th, above.) Mackintosh says, “We use *our*, *your*, *their*, in speaking of a thing or things belonging to plural nouns of any gender.”—*Essay on English Gram.*, p. 149. So William Barnes says, “*I*, *thou*, *we*, *ye* or *you*, and *they*, are of *all* genders,”—*Philosophical Gram.*, p. 196.

† “It is perfectly plain, then, that *my* and *mine* are but different forms of the same word, as are *a* and *an*. *Mine*, for the sake of euphony, or from custom, stands for the possessive case without a noun; but must be changed for *my* when the noun is expressed: and *my*, for a similar reason, stands before a noun, but must be changed for *mine* when the noun is dropped. \* \* \* *Mine* and *my*, *thine* and *thy*, will, therefore, be considered in this book, as different forms of the possessive case from *I* and *Thou*. And the same rule will be extended to *her* and *hers*, *our* and *ours*, *your* and *yours*, *their* and *theirs*.”—*Barnard’s Analytic Grammar*, p. 142.

‡ It has long been fashionable, in the ordinary intercourse of the world, to substitute the plural form of this pronoun for the singular through all the cases. Thus, by the figure ENALLAGE, “*you are*,” for instance, is commonly put for “*thou art*.” See Observations 20th and 21st, below; also Figures of Syntax, in Part IV.

§ The original nominative was *ye*, which is still the only nominative of the solemn style; and the original objective was *you*, which is still the only objective that our grammarians in general acknowledge. But, whether grammatical or not, *ye* is now very often used, in a familiar way, for the objective case. (See Observations 22d and 23d, upon the declensions of pronouns.) T. Dilworth gave both cases alike: “*Nom.* Ye *or* you;” “*Acc.* [or *Obj.*] Ye *or* you.”—His *New Guide*, p. 98. Latham gives these forms: “*Nom.* ye *or* you; *Obj.* you or ye.”—*Elementary Gram.*, p. 90. Dr. Campbell says, “I am inclined to prefer that use which makes *ye* invariably the nominative plural of the personal pronoun *thou*, and *you* the accusative, when applied to an actual plurality.”—*Philosophy of Rhetoric*, p. 174. Professor Fowler touches the case, rather blindly, thus: “Instead of the true nominative YE, we use, with few exceptions, *the objective case*; as, ‘YOU *speak*,’ ‘YOU *two are speaking*.’ In this we *substitute* one case *for* another.”—*Fowler’s E. Gram.*, 8vo, 1850, §478. No other grammarian, however, discards *you* as a nominative of “actual plurality;” and the present casual practice of putting *ye* in the objective, has prevailed to some extent for at least two centuries: as,

“Your change approaches, when all these delights

Will vanish and deliver *ye* to woe.”—*Milton, P. L.*, B. iv, l. 367.

SHE, *OF THE* THIRD PERSON, *FEMININE GENDER*.

|       |       |                      |       |       |                          |
|-------|-------|----------------------|-------|-------|--------------------------|
| Sing. | Nom.  | she,                 | Plur. | Nom.  | they,                    |
|       | Poss. | her, <i>or</i> hers, |       | Poss. | their, <i>or</i> theirs, |
|       | Obj.  | her;                 |       | Obj.  | them.                    |

IT, *OF THE* THIRD PERSON, *NEUTER GENDER*.

|       |       |      |       |       |                          |
|-------|-------|------|-------|-------|--------------------------|
| Sing. | Nom.  | it,  | Plur. | Nom.  | they,                    |
|       | Poss. | its, |       | Poss. | their, <i>or</i> theirs, |
|       | Obj.  | it;  |       | Obj.  | them.                    |

## II. COMPOUND PERSONALS.

The word *self*, added to the simple personal pronouns, forms the class of *compound personal pronouns*; which are used when an action reverts upon the agent, and also when some persons are to be distinguished from others: as, sing, *myself*, plur. *ourselves*; sing, *thyself*, plur. *yourselves*; sing, *himself*, plur. *themselves*; sing, *herself*, plur. *themselves*; sing, *itself*, plur. *themselves*. They all want the possessive case, and are alike in the nominative and objective. Thus:—

MYSELF, *OF THE* FIRST PERSON, \* *ANY OF THE GENDERS*.

|       |       |         |       |       |            |
|-------|-------|---------|-------|-------|------------|
| Sing. | Nom.  | myself, | Plur. | Nom.  | ourselves, |
|       | Poss. | ———,    |       | Poss. | ———,       |
|       | Obj.  | myself; |       | Obj.  | ourselves. |

THYSELF, *OF THE* SECOND PERSON, *ANY OF THE GENDERS*.

|       |      |                       |       |      |             |
|-------|------|-----------------------|-------|------|-------------|
| Sing. | Nom. | thyself, <sup>†</sup> | Plur. | Nom. | yourselves, |
|-------|------|-----------------------|-------|------|-------------|

\* Dr. Young has, in one instance, and with very doubtful propriety, converted this pronoun into the *second person*, by addressing himself thus:—

“O *thou, myself* I abroad our counsels roam

And, like ill husbands, take no care at home.”—*Love of Fame*, Sat. II, l. 271.

† The fashion of using the plural number for the singular, or *you* for *thou*, has also substituted *yourself* for *thyself*, in common discourse. In poetry, in prayer, in Scripture, and in the familiar language of the Friends, the original compound is still retained; but the poets use either term, according to the gravity or the lightness of their style. But *yourself*, like the regal compound *ourself*, though apparently of the singular number, and always applied to one person only, is, in its very nature, an anomalous and ungrammatical word; for it can neither mean more than one, nor agree with a pronoun or a verb that is singular. Swift indeed wrote: “Conversation is but carving; carve for all, *yourself is starving*.” But he wrote erroneously, and his meaning is doubtful: probably he meant, “To carve for all, is, *to starve yourself*.” The compound personals, when they are nominatives before the verb, are commonly associated with the simple; as, “I *myself* also *am* a man.”—*Acts*, x, 16. “That *thou thyself art* a guide.”—*Rom.*, ii, 19. “If it stand, as *you yourself still do*”—*Shakspeare*. “That *you yourself* are much condemned.”—*Id.* And, if the simple pronoun be omitted, the compound still requires the same form of the verb; as, “Which way I fly is Hell; *myself am* Hell.”—*Milton*. The following example is different: “I love mankind; and in a monarchy myself *is* all that I *can* love.”—*Life of Schiller, Follen's Pref.*, p. x. Dr. Follen objects to the British version, “Myself *were* all that I *could* love;” and, if his own is good English, the verb *is* agrees with *all*, and not with *myself*. *Is* is of the third person: hence, “*myself is*” or, “*yourself is*,” cannot be good syntax; nor does any one say, “*yourself art*,” or, “*ourself am*,” but rather, “*yourself are*,” as, “Captain, *yourself are* the fittest.”—*Dryden*. But to call this a “*concord*,” is to turn a third part of the language upsidedown; because, by analogy, it confounds, to such extent at least, the plural number with the singular through all our verbs; that is, if *ourself* and *yourself* are singulars, and not rather plurals put for singulars by a figure of syntax. But the words are, in some few instances, written separately; and then both the meaning and the construction are different; as, “Your *self* is sacred, profane *it* not.”—*The Dial*, Vol. i, p. 86. Perhaps the word *myself* above ought rather to have been two words; thus, “And, in a monarchy, *my self is* all that I can love.” The two words here differ in person and

Poss. \_\_\_\_\_,  
Obj. thyself;

Poss. \_\_\_\_\_,  
Obj. yourselves.

HIMSELF, *OF THE THIRD PERSON, MASCULINE GENDER.*

|       |       |          |       |       |             |
|-------|-------|----------|-------|-------|-------------|
| Sing. | Nom.  | himself, | Plur. | Nom.  | themselves, |
|       | Poss. | _____,   |       | Poss. | _____,      |
|       | Obj.  | himself; |       | Obj.  | themselves. |

HERSELF, *OF THE THIRD PERSON, FEMININE GENDER.*

|       |       |          |       |       |             |
|-------|-------|----------|-------|-------|-------------|
| Sing. | Nom.  | herself, | Plur. | Nom.  | themselves, |
|       | Poss. | _____,   |       | Poss. | _____,      |
|       | Obj.  | herself; |       | Obj.  | themselves. |

ITSELF, *OF THE THIRD PERSON, NEUTER GENDER.*

|       |       |         |       |       |             |
|-------|-------|---------|-------|-------|-------------|
| Sing. | Nom.  | itself, | Plur. | Nom.  | themselves, |
|       | Poss. | _____,  |       | Poss. | _____,      |
|       | Obj.  | itself; |       | Obj.  | themselves. |

### III. RELATIVES AND INTERROGATIVES.

The relative and the interrogative pronouns are thus declined:—

WHO, *LITERALLY APPLIED TO PERSONS ONLY.*

|       |       |        |       |       |        |
|-------|-------|--------|-------|-------|--------|
| Sing. | Nom.  | who,   | Plur. | Nom.  | who,   |
|       | Poss. | whose, |       | Poss. | whose, |
|       | Obj.  | whom;  |       | Obj.  | whom.  |

WHICH, *APPLIED TO ANIMALS AND THINGS.*

|       |       |        |       |        |        |
|-------|-------|--------|-------|--------|--------|
| Sing. | Nom.  | which, | Plur. | Nom.   | which, |
|       | Poss. | _____, |       | Poss.* | _____, |
|       | Obj.  | which; |       | Obj.   | which. |

WHAT, *APPLIED ORDINARILY TO THINGS ONLY.*<sup>†</sup>

|       |       |        |       |       |        |
|-------|-------|--------|-------|-------|--------|
| Sing. | Nom.  | what,  | Plur. | Nom.  | what,  |
|       | Poss. | _____, |       | Poss. | _____, |
|       | Obj.  | what;  |       | Obj.  | what.  |

case, perhaps also in gender; and, in the preceding instance, they differ in person, number, gender, and case. But the compound always follows the person, number, and gender of its first part, and only the case of its last. The notion of some grammarians, (to wit, of Wells, and the sixty-eight others whom he cites for it,) that *you* and *your* are actually made singular by usage, is demonstrably untrue. Do *we*, *our*, and *us*, become actually singular, as often as a king or a critic applies them to himself? No: for nothing can be worse syntax than, *we am*, *we was*, or *you was*, though some contend for this last construction.

\* *Whose* is sometimes used as the possessive case of *which*; as, "A religion *whose* origin is divine."—*Blair*. See Observations 4th and 5th, on the Classes of Pronouns.

† After *but*, as in the following sentence, the double relative *what* is sometimes applied to persons; and it is here equivalent to *the friend who*:—

"Lorenzo, pride repress; nor hope to find

A friend, but *what* has found a friend in thee."—*Young*.

THAT, *APPLIED TO PERSONS, ANIMALS, AND THINGS.*

|       |       |       |       |       |       |
|-------|-------|-------|-------|-------|-------|
| Sing. | Nom.  | that, | Plur. | Nom.  | that, |
|       | Poss. | —,    |       | Poss. | —,    |
|       | Obj.  | that; |       | Obj.  | that. |

AS, *APPLIED TO PERSONS, ANIMALS, AND THINGS.*

|       |       |     |       |       |     |
|-------|-------|-----|-------|-------|-----|
| Sing. | Nom.  | as, | Plur. | Nom.  | as, |
|       | Poss. | —,  |       | Poss. | —,  |
|       | Obj.  | as; |       | Obj.  | as. |

## IV. COMPOUND RELATIVES.

The compound relative pronouns, *whoever* or *whosoever*, *whichever* or *whichever*, and *whatever* or *whatsoever* \* are declined in the same manner as the simples, *who* *which*, *what*. Thus:—

WHOEVER OR WHOSOEVER, *APPLIED ONLY TO PERSONS.*

|       |       |              |       |       |              |
|-------|-------|--------------|-------|-------|--------------|
| Sing. | Nom.  | whoever,     | Plur. | Nom.  | whoever,     |
|       | Poss. | whosever,    |       | Poss. | whosever,    |
|       | Obj.  | whomever;    |       | Obj.  | whomever.    |
| Sing. | Nom.  | whosoever,   | Plur. | Nom.  | whosoever,   |
|       | Poss. | whosoesover, |       | Poss. | whosoesover, |
|       | Obj.  | whomsoever;  |       | Obj.  | whomsoever.  |

WHICHEVER OR WHICHSOEVER, *APPLIED TO PERSONS, ANIMALS, AND THINGS.*

|       |       |              |       |       |              |
|-------|-------|--------------|-------|-------|--------------|
| Sing. | Nom.  | whichever,   | Plur. | Nom.  | whichever,   |
|       | Poss. | —,           |       | Poss. | —,           |
|       | Obj.  | whichever;   |       | Obj.  | whichever.   |
| Sing. | Nom.  | whichsoever, | Plur. | Nom.  | whichsoever, |
|       | Poss. | —,           |       | Poss. | —,           |
|       | Obj.  | whichsoever; |       | Obj.  | whichsoever. |

WHATEVER OR WHATSOEVER, *APPLIED ORDINARILY TO THINGS ONLY.*

|       |       |             |       |       |             |
|-------|-------|-------------|-------|-------|-------------|
| Sing. | Nom.  | whatever,   | Plur. | Nom.  | whatever,   |
|       | Poss. | —,          |       | Poss. | —,          |
|       | Obj.  | whatever;   |       | Obj.  | whatever.   |
| Sing. | Nom.  | whatsoever, | Plur. | Nom.  | whatsoever, |
|       | Poss. | —,          |       | Poss. | —,          |
|       | Obj.  | whatsoever; |       | Obj.  | whatsoever. |

\* Of all these compounds. L. Murray very improperly says, "They are *seldom used*, in modern style."—*Octavo Gram.*, p. 54; also *Fisk's*, p. 65. None of them are yet obsolete, though the shorter forms seem to be now generally preferred. The following suggestion of Cobbett's is erroneous; because it implies that the shorter forms are innovations and faults; and because the author carelessly speaks of them as *one thing only*: "We *sometimes* omit the *so*, and say, *whoever*, *whomever*, *whatever*, and even *whosever*. *It is* a mere *abbreviation*. The *so* is understood: and, it is best not to omit to write it."—*Eng. Gram.*, ¶ 209. R. C. Smith dismisses the compound relatives with three lines; and these he closes with the following notion: "They are not often used!"—*New Gram.*, p. 61.

**OBSERVATIONS.**

OBS. 1.—Most of the personal pronouns have two forms of the possessive case, in each number: as, *my* or *mine*, *our* or *ours*; *thy* or *thine*, *your* or *yours*; *her* or *hers*, *their* or *theirs*. The former is used before a noun expressed, or when nothing but an adjective intervenes; the latter, when the governing noun is understood, or is so placed that a repetition of it is implied in or after the pronoun: as, “*My* powers are *thine*; be *thine* alone The glory of my song.”—*Montgomery*. “State what *mine* and *your* principles are.”—*Legh Richmond, to his Daughters*. Better, perhaps: “State what *my* principles and *yours* are;”—“State what *your* principles and *mine* are;”—or, “State what are *my* principles and *your own*.”

“Resign’d he fell; superior to the dart  
That quench’d its rage in *yours* and *Britain’s* heart.”—*J. Brown*.

“Behold! to *yours* and *my* surprise,  
These trifles to a volume rise.”—*Lloyd*, p. 186.

OBS. 2.—Possibly, when the same persons or things stand in a joint relation of this kind to different individuals or parties, it may be proper to connect two of the simple possessives to express it; though this construction can seldom, if ever, be necessary, because any such expression as *thy and her sister*, *my and his duty*, if not erroneous, can mean nothing but *your sister*, *our duty*, &c. But some examples occur, the propriety of which it is worth while to consider: as, “I am sure it will be a pleasure to you to hear that she proves worthy of her father, worthy of you, and of *your and her* ancestors.”—*Spectator*, No. 525. This sentence is from a version of Pliny’s letter to his wife’s aunt; and, as the ancestors of the two individuals are here the same, the phraseology may be allowable. But had the aunt commended her niece to Pliny, she should have said, “worthy of you and of *your* ancestors and *hers*.” “Is it *her* or *his* honour that is tarnished? It is not *hers*, but *his*.”—*Murray’s Gram.*, p. 175. This question I take to be bad English. It ought to be, “Is it *her* honour or *his*, that is tarnished?” Her honour and his honour cannot be one and the same thing. This example was framed by Murray to illustrate that idle and puzzling distinction which he and some others make between “possessive adjective pronouns” and “the genitive case of the personal pronouns;” and, if I understand him, the author will here have *her* and *his* to be of the former class, and *hers* and *his* of the latter. It were a better use of time, to learn how to employ such words correctly. Unquestionably, they are of the same class and the same case, and would be every way equivalent, if the first form were fit to be used elliptically. For example: “The same phrenzy had hindered the Dutch from improving to *their* and to the common advantage the public misfortunes of France.”—*Bolingbroke, on Hist.*, p. 309. Here the possessive case *their* appears to be governed by *advantage* understood, and therefore it would perhaps be better to say, *theirs*, or *their own*. But in the following instance, *our* may be proper, because both possessives appear to be governed by one and the same noun:—

“Although ‘twas *our* and *their* opinion  
Each other’s church was but a Rimmon.”—*Hudibras*.

OBS. 3.—*Mine* and *thine* were formerly preferred to *my* and *thy*, before all words beginning with a vowel sound; or rather, *mine* and *thine* were the original forms,\* and *my* and *thy* were first substituted for them before consonants, and afterwards before vowels: as, “But it was thou, a man *mine* equal, *my* guide, and *mine* acquaintance.”—*Psalms*, lv, 13. “*Thy* prayers and *thine* alms are come up for a memorial before God.”—*Acts*, x, 4. When the Bible was translated, either form appears to have been used before the letter *h*; as, “Hath not *my hand* made all these things?”—*Acts*, vii, 50. “By stretching forth *thine hand* to heal.”—*Acts*, iv, 30. According to present practice, *my* and *thy* are in general to be preferred before all nouns, without regard to the sounds of letters. The use of the other forms, in the manner here noticed, has now become obsolete; or, at least, antiquated, and peculiar to the poets. We occasionally meet with it in modern verse, though not very frequently, and only where the melody of the line seems to require it: as,

“Time writes no wrinkle on *thine* azure brow.”—*Byron*.

“Deign on the passing world to turn *thine* eyes.”—*Johnson*.

“*Mine* eyes beheld the messenger divine.”—*Lusiad*.

“*Thine* ardent symphony sublime and high.”—*Sir W. Scott*.

OBS. 4.—The possessives *mine*, *thine*, *hers*, *ours*, *yours*, *theirs*, usually denote possession, or the relation of property, with an *ellipsis* of the name of the thing possessed; as, “My sword and *yours* are kin.”—*Shakspeare*. Here *yours* means *your sword*. “You may imagine what kind of faith *theirs* was.”—*Bacon*. Here *theirs* means *their faith*. “He ran headlong into his own ruin whilst he endeavoured to precipitate *ours*.”—*Bolingbroke*. Here *ours* means *our ruin*. “Every one that heareth these saying of *mine*.”—*Matt.*, vii, 26. Here *mine* means *my sayings*. “Sing unto the Lord, O ye saints of *his*.”—*Psalms*, xxx, 4. Here *his* means *his saints*. The noun which governs the possessive, is here *understood* after it, being inferred from that which precedes, as it is in all the foregoing instances. “And the man of *thine*, whom I shall not cut off from *mine* altar, shall be to consume *thine* eyes, and to grieve *thine* heart.”—1 *Samuel*, ii, 33. Here *thine*, in the first phrase, means *thy men*; but, in the subsequent parts of the sentence, both *mine* and *thine* mean neither more nor less than *thy* and *my*, because there is no *ellipsis*. *Of* before the possessive case, governs the noun which is understood after this case; and is always taken in a *partitive* sense, and not as the sign of the possessive relation: as, “When we say, ‘a soldier *of the king’s*’, we mean, ‘*one of the king’s soldiers*.’”—*Webster’s Improved Gram.*, p. 29. There is therefore an *ellipsis* of the word *soldiers*, in the former phrase. So, in the following example, *mine* is used elliptically for *my feet*; or rather, *feet* is understood after *mine*, though *mine feet* is no longer good English, for reasons before stated:—

“Ere I absolve thee, stoop I that on thy neck  
Levelled with earth tins *foot of mine* may tread.”—*Wordsworth*.

OBS. 5.—Respecting the *possessive case* of the simple personal pronouns, there appears among our grammarians a strange diversity of sentiment. Yet is there but one

---

\* Sanborn, with strange ignorance of the history of those words, teaches thus: “*Mine* and *thine* appear to have been formed from *my* and *thy* by changing *y* into *i* and adding *n*, and then subjoining *e* to retain the long sound of the vowel.”—*Analytical Gram.*, p. 92. This false notion, as we learn from his guillemets and a remark in his preface, he borrowed from “Parkhurst’s Systematic Introduction.” Dr. Lowth says, “The Saxon *ic* hath the possessive case *Min*; *Thu*, possessive *Thin*; *He*, possessive *His*: From which our possessive cases of the same pronouns are taken *without alteration*.”—*Lowth’s Gram.*, p. 23.

view of the matter, that has in it either truth or reason, consistency or plausibility. And, in the opinion of any judicious teacher, an erroneous classification of words so common and so important as these, may well go far to condemn any system of grammar in which it is found. A pronoun agrees in person, number, and gender, with the noun *for which it is a substitute*; and, if it is in the possessive case, it is usually governed by *an other noun* expressed or implied after it. That is, if it denotes possession, it stands for the name of the possessor, and is governed by the name of the thing possessed. Now do not *my, thy, his, her, our, your, their*, and *mine, thine, hers, its, ours, yours, theirs*, all equally denote possession? and do they not severally show by their forms the person, the number, and sometimes also the gender, of whomever or whatever they make to be the possessor? If they do, they are all of them *pronouns*, and nothing else; all found in the *possessive case*, and nowhere else. It is true, that in Latin, Greek, and some other languages, there are not only genitive cases corresponding to these possessives, but also certain declinable adjectives which we render in English by these same words: that is, by *my* or *mine*, *our* or *ours*; *thy* or *thine*, *your* or *yours*; &c. But this circumstance affords no valid argument for considering any of these English terms to be mere adjectives; and, say what we will, it is plain that they have not the signification of adjectives, nor can we ascribe to them the construction of adjectives, without making their grammatical agreement to be what it very manifestly is not. They never agree, in any respect, with the nouns which *follow* them, unless it be by mere accident. This view of the matter is sustained by the authority of many of our English grammars; as may be seen by the declensions given by Ash, C. Adams, Ainsworth, R. W. Bailey, Barnard, Buchanan, Bicknell, Blair, Burn, Butler, Comly, Churchill, Cobbett, Dalton, Davenport, Dearborn, Farnum, A. Flint, Fowler, Frost, Gilbert, S. S. Green, Greenleaf, Hamlin, Hiley, Kirkham, Merchant, Murray the schoolmaster, Parkhurst, Picket, Russell, Sanborn, Sanders, R. C. Smith, Wilcox.

OBS. 6.—In opposition to the classification and doctrine adopted above, many of our grammarians teach, that *my, thy, this, her, our, your, their*, are adjectives or “adjective pronouns;” and that *mine, thine, hers, its, ours, yours, theirs*, are personal pronouns in the possessive case. Among the supporters of this notion, are D. Adams, Alden, Alger, Allen, Bacon, Barrett, Bingham, Bucke, Bullions, Cutler, Fisk, Frost, (in his small Grammar,) Guy, Hall, Hart, Harrison, Ingersoll, Jaudon, Lennie, Lowth, Miller, L. Murray, Pond, T. Smith, Spear, Spencer, Staniford, Webber, Woodworth. The authority of all these names, however, amounts to little more than that of one man; for Murray pretended to follow Lowth, and nearly all the rest copied Murray. Dr. Lowth says, “*Thy, my, her, our, your, their*, are pronominal adjectives; but *his*, (that is, *he’s*), *her’s, our’s, your’s, their’s*, have evidently the form of the possessive case: And, by analogy, *mine, thine*, may be esteemed of the same rank.”—*Lowth’s Gram.*, p. 23.\* But why did he not see, that by the

---

\* Latham, with a singularity quite remarkable, reverses this doctrine in respect to the two classes, and says, “*My, thy, our, your, her*, and *their* signify possession, because they are possessive cases. \* \* \* *Mine, thine, ours, yours, hers, theirs*, signify possession for a different reason. They partake of the nature of *adjectives*, and in all the allied languages are declined as such.”—*Latham’s Elementary E. Gram.*, p. 94. Weld, like Wells, with a few more whose doctrine will be criticised by-and-by, adopting here an other odd opinion, takes the former class only for forms of the possessive case; the latter he disposes of thus: “*Ours, yours, theirs, hers*, and generally *mine* and *thine*, are POSSESSIVE PRONOUNS, used in either the *nominative or objective* case,”—*Weld’s Gram.*, Improved Ed., p. 68. Not only denying the possessives with ellipsis to be instances of the possessive case, but stupidly mistaking at once two dissimilar things for a third which is totally unlike to either,—i. e., assuming together for *substitution* both an *ellipsis* of one word and an *equivalence* to two—(as some others more learned have very strangely done—) he supposes all this class of pronouns to have forsaken every property of their legitimate roots,—their person, their number, their gender, their case,—and to have assumed other properties, such as belong to “the thing possessed!” In the

same analogy, and also by the sense and meaning of the words, as well as by their distinctions of person, number, and gender, all the other six are entitled to “the same rank?” Are not the forms of *my*, *thy*, *her*, *our*, *your*, *their*, as fit to denote the relation of property, and to be called the possessive case, as *mine*, *thine*, *his*, or any others? In grammar, all needless distinctions are reprehensible. And where shall we find a more blamable one than this? It seems to have been based merely upon the false notion, that the possessive case of pronouns ought to be formed like that of nouns; whereas custom has clearly decided that they shall always be different: the former must never be written with an apostrophe; and the latter, never without it. Contrary to all good usage, however, the Doctor here writes “*her’s*, *our’s*, *your’s*, *their’s*,” each with a needless apostrophe. Perhaps he thought it would serve to strengthen his position; and help to refute what some affirmed, that all these words are adjectives.

OBS. 7.—Respecting *mine*, *thine*, and *his*, Lowth and L. Murray disagree. The latter will have them to be sometimes “*possessive pronouns*,” and sometimes “*possessive cases*.” An admirable distinction this for a great author to make! too slippery for even the inventor’s own hold, and utterly unintelligible to those who do not know its history! In short, these authors disagree also concerning *my*, *thy*, *her*, *our*, *your*, *their*; and where two leaders of a party are at odds with each other, and each is in the wrong, what is to be expected from their followers? Perceiving that Lowth was wrong in calling these words “*pronominal adjectives*,” Murray changed the term to “*possessive pronouns*,” still retaining the class entire; and accordingly taught, in his early editions, that, “There are *four kinds* of pronouns, viz., the personal, *the possessive*, *the relative*, and *the adjective pronouns*.”—*Murray’s Gram.*, 2d Edition, p. 37. “The Possessive Pronouns are such as principally relate to possession or property. There are seven of them; viz. *my*, *thy*, *his*, *her*, *our*, *your*, *their*. The possessives *his*, *mine*, *thine*, may be accounted either *possessive pronouns*, or the *possessive cases* of their respective personal pronouns.”—*Ib.*, p. 40. He next idly demonstrates that these seven words may come before nouns of any number or case, without variation; then, forgetting his own distinction, adds, “When they are separated from the noun, all of them, except *his*, vary *their terminations*; as, this hat is *mine*, and the other is *thine*; those trinkets are *hers*; this house is *ours*, and that is *yours*; *theirs* is more commodious than *ours*”—*Ib.*, p. 40. Thus all his personal pronouns of the possessive case, he then made to be inflections of pronouns of *a different class*! What are they now? Seek the answer under the head of that gross solecism, “*Adjective Pronouns*.” You may find it in one half of our English grammars.

OBS. 8.—Any considerable error in the classing of words, does not stand alone; it naturally brings others in its train. Murray’s “*Adjective Pronouns*,” (which he now subdivides into four little classes, *possessive*, *distributive*, *demonstrative*, and *indefinite*,) being all of them misnamed and misplaced in his etymology, have led both him and many others into strange errors in syntax. The *possessives only* are “pronouns;” and these are pronouns of the possessive *case*. As such, they agree with the *antecedent* nouns for which they stand, in *person*, *number*, and *gender*; and are governed, like all other possessives, by the nouns which follow them. The rest are *not pronouns*, but pronominal *adjectives*; and, as such, they relate to nouns expressed or understood *after them*. Accordingly, they have

---

example, “*Your* house is on the plain, *ours* is on the hill,” he supposes *ours* to be of the third person, singular number, neuter gender, and nominative case; and not, as it plainly is, of the first person, plural number, masculine gender, and possessive case. Such parsing should condemn forever any book that teaches it.

none of the above-mentioned qualities, except that the words *this* and *that* form the plurals *these* and *those*. Or, if we choose to ascribe to a pronominal adjective all the properties of the noun understood, it is merely for the sake of brevity in parsing. The difference, then, between a “pronominal adjective” and an “adjective pronoun,” should seem to be this; that the one is *an adjective*, and the other *a pronoun*: it is like the difference between a *horserace* and a *racehorse*. What can be hoped from the grammarian who cannot discern it? And what can be made of rules and examples like the following? “Adjective *pronouns* must agree, in number, with *their substantives*: as, ‘*This* book, *these* books; *that* sort, *those* sorts; *another* road, *other* roads.’”—*Murray’s Gram.*, Rule viii, *Late Editions*; *Alger’s Murray*, p. 56; *Alden’s*, 85; *Bacon’s*, 48; *Maltby’s*, 59; *Miller’s*, 66; *Merchant’s*, 81; *S. Putnam’s*, 10; *and others*. “Pronominal *adjectives* must agree with *their nouns* in gender, number, and person; thus, ‘*My son*, hear the instructions of *thy* father.’ ‘Call the *labourers*, and give them *their* hire.’”—*Maunder’s Gram.*, Rule xvii. Here Murray gives a rule for *pronouns*, and illustrates it by *adjectives*; and Maunder, as ingeniously blunders in reverse: he gives a rule for *adjectives*, and illustrates it by *pronouns*. But what do they mean by “*their substantives*,” or “*their nouns*?” As applicable to *pronouns*, the phrase should mean *nouns antecedent*; as applicable to *adjectives*, it should mean *nouns subsequent*. Both these rules are therefore false, and fit only to bewilder; and the examples to both are totally inapplicable. Murray’s was once essentially right, but he afterwards corrupted it, and a multitude of his admirers have since copied the perversion. It formerly stood thus: “The pronominal adjectives *this* and *that*, &c. and the numbers\* *one*, *two*, &c., must agree in number with their substantives: as, ‘*This* book, *these* books; *that* sort, *those* sorts; *one* girl, *ten* girls; *another* road, *other* roads.’”—*Murray’s Gram.*, Rule viii, 2d Ed., 1796.

OBS. 9.—Among our grammarians, some of considerable note have contended, that the personal pronouns have but *two cases*, the nominative and the objective. Of this class, may be reckoned Brightland, Dr. Johnson, Fisher, Mennye, Cardell, Cooper, Dr. Jas. P. Wilson, W. B. Fowle. and, according to his late grammars, Dr. Webster. But, in contriving what to make of *my* or *mine*, *our* or *ours*, *thy* or *thine*, *your* or *yours*, *his*, *her* or *hers*, *its*, and *their* or *theirs*, they are as far from any agreement, or even from self-consistency, as the cleverest of them could ever imagine. To the person, the number, the gender, and the case, of each of these words, they either profess themselves to be total strangers, or else prove themselves so, by the absurdities they teach. Brightland calls them “Possessive Qualities, or Qualities of Possession;” in which class he also embraces all *nouns* of the possessive case. Johnson calls them pronouns; and then says of them, “The possessive *pronouns*, like *other adjectives*, are without *cases* or change of termination.”—*Gram.*, p. 6. Fisher calls them “Personal Possessive Qualities;” admits the person of *my*, *our*, &c.; but supposes *mine*, *ours*, &c. to supply the place of the *nouns which govern them!* Mennye makes them one of his three classes of pronouns, “*personal*, *possessive*, and *relative*;” giving to both forms the rank which Murray once gave, and which Allen now gives, to the first form only. Cardell places them among his “defining adjectives.” With Fowle, these, and all other possessives, are “possessive adjectives.” Cooper, in his grammar of 1828. copies the last scheme of Murray: in that of 1831, he avers that the personal pronouns “want the possessive case.” Now, like Webster and Wilson, he will have *mine*, *thine*, *hers*, *ours*, *yours*, and *theirs*, to be pronouns of the nominative or the objective case. Dividing

---

\* This word should have been *numerals*, for two or three reasons. The author speaks of the *numeral adjectives*; and to say “the *numbers* must agree in *number* with their substantives,” is tautological—G. BROWN.

the pronouns into six general classes, he makes these the fifth; calling them “Possessive Pronouns,” but preferring in a note the monstrous name, “*Possessive Pronouns Substitute*.” His sixth class are what he calls, “The Possessive Pronominal *Adjectives*,” namely, “*my, thy, his, her, our, your, their, its, own*, and sometimes *mine* and *thine*.”—*Cooper’s Pl. and Pr. Gram.*, p. 43. But all these he has, unquestionably, either misplaced or misnamed; while he tells us, that, “Simplicity of arrangement should be the object of every compiler.”—*Ib.*, p. 33. Dr. Perley, (in whose scheme of grammar all the pronouns are *nouns*,) will have *my, thy, his, her, its, our, your*, and *their*, to be in the possessive case; but of *mine, thine, hers, ours, yours*, and *theirs*, he says, “These may be called *Desiderative Personal Pronouns*.”—*Perley’s Gram.*, p. 15.

OBS. 10.—Kirkham, though he professes to follow Murray, declines the simple personal pronouns as I have declined them; and argues admirably, that *my, thy, his, &c.*, are pronouns of the possessive case, because, “They always *stand for nouns in the possessive case*.” But he afterwards contradicts both himself and the common opinion of all former grammarians, in referring *mine, thine, hers, &c.*, to the class of “*Compound Personal Pronouns*.” Nay, as if to outdo even himself in absurdity, he first makes *mine, thine, hers, ours, &c.*, to be compounds, by assuming that, “These *pluralizing adjuncts, ne* and *s*, were, no doubt, formerly detached from the pronouns with which they now coalesce;” and then, because he finds in each of his supposed compounds the signification of a pronoun and its governing noun, reassumes, in parsing them, the very principle of error, on which he condemns their common classification. He says, “They should be parsed *as two words*.” He also supposes them to represent the nouns *which govern them*—nouns with which they do not agree in any respect! Thus is he wrong in almost every thing he says about them. See *Kirkham’s Gram.*, p. 99, p. 101, and p. 104. Goodenow, too, a still later writer, adopts the major part of all this absurdity. He will have *my, thy, his, her, its, our, your, their*, for the possessive case of his personal pronouns; but *mine, thine, hers, ours, yours, theirs*, he calls “*compound possessive pronouns*, in the subjective or [the] objective case.”—*Text-Book of E. Gram.*, p. 33. Thus he introduces a new class, unknown to his primary division of the pronouns, and not included in his scheme of their declension. Fuller, too, in a grammar produced at Plymouth, Mass., in 1822, did nearly the same thing. He called *I, thou, he, she*, and *it*, with their plurals, “*antecedent pronouns*,” took *my, thy, his, her, &c.*, for their *only* possessive forms in his declension; and, having passed from them by the space of just half his book, added: “Sometimes, to prevent the repetition of the same word, an *antecedent pronoun in the possessive case*, is made to represent, both the pronoun and a noun; as, ‘That book is *mine*’—i. e. ‘*my book*.’ MINE is a *compound antecedent pronoun*, and is equivalent to *my book*. Then parse *my*, and *book*, as though they were both expressed.”—*Fuller’s Gram.*, p. 71.

OBS. 11.—Amidst all this diversity of doctrine at the very centre of grammar, who shall so fix its principles that our schoolmasters and schoolmistresses may know *what to believe and teach*? Not he that speculates without regard to other men’s views; nor yet he that makes it a merit to follow implicitly “the footsteps of” *one only*. The true principles of grammar are with the learned; and that man is in the wrong, with whom the *most* learned will not, in general, coincide. Contradiction of falsities, is necessary to the maintenance of truth; correction of errors, to the success of science. But not every man’s errors can be so considerable as to deserve correction from other hands than his own. Misinstruction in grammar has for this reason generally escaped censure. I do not wish any one to coincide with me merely through ignorance of what others inculcate. If doctors of divinity and

doctors of laws will contradict themselves in teaching grammar, so far as they do so, the lovers of consistency will find it necessary to deviate from their track. Respecting these pronouns, I learned in childhood, from Webster, a doctrine which he now declares to be false. This was nearly the same as Lowth's, which is quoted in the sixth observation above. But, in stead of correcting its faults, this zealous reformer has but run into others still greater. Now, with equal reproach to his etymology, his syntax, and his logic, he denies that our pronouns have any form of the possessive case at all. But grant the obvious fact, that *substitution* is one thing, and *ellipsis* an other, and his whole argument is easily overthrown; for it is only by confounding these, that he reaches his absurd conclusion.

OBS. 12.—Dr. Webster's doctrine now is, that none of the English pronouns have more than two cases. He says, "*mine, thine, his, hers, yours, and theirs*, are *usually considered* as [being of] the possessive case. But the *three first* are either attributes, and used with nouns, or they are substitutes. The *three last* are always substitutes, used in the place of names WHICH ARE UNDERSTOOD."—"That *mine, thine, his, [ours,] yours, hers, and theirs*, do not constitute a possessive case, is demonstrable; for they are constantly used as the nominatives to verbs and as the objectives after verbs and prepositions, as in the following passages. 'Whether it could perform its operations of thinking and memory out of a body organized as *ours is*.'—*Locke*. 'The reason is, that his subject is generally things; *theirs*, on the contrary, *is* persons.'—*Camp. Rhet*. 'Therefore leave your forest of beasts for *ours* of brutes, called men.'—*Wycherley to Pope*. It is needless to multiply proofs. We observe these *pretended possessives* uniformly used as nominatives or objectives.\* Should it be

---

\* Cardell assails the common doctrine of the grammarians on this point, with similar assertions, and still more earnestness. See his *Essay on Language*, p. 80. The notion that "these *pretended possessives* [are] uniformly used as *nominatives* or *objectives*"—though demonstrably absurd, and confessedly repugnant to what is "*usually considered*" to be their true explanation—was adopted by Jaudon, in 1812; and has recently found several new advocates; among whom are Davis, Felch, Goodenow, Hazen, Smart, Weld, and Wells. There is, however, much diversity, as well as much inaccuracy, in their several expositions of the matter. Smart inserts in his declensions, as the only forms of the possessive case, the words of which he afterwards speaks thus: "The following *possessive cases* of the personal pronouns, (See page vii,) *must be called* PERSONAL PRONOUNS POSSESSIVE: *mine, thine, his, hers, ours, yours, theirs*. For these words are always used *substantively*, so as to include the meaning of some noun in the third person singular or plural, in the nominative or the objective ease. Thus, if *we are speaking* of books, and say [,] '*Mine* are here,' *mine* means *my books*, ☞ and it must be deemed a personal pronoun *possessive* in the *third* person *plural*, and *nominative* to the verb *are*."—*Smart's Accidence*, p. xxii. If to say, these "*possessive cases* must be called a *class* of *pronouns*, used *substantively*, and deemed *nominatives* or *objectives*," is not absurd, then nothing can be. Nor is any thing in grammar more certain, than that the pronoun "*mine*" can only be used by the speaker or writer, to denote himself or herself as the owner of something. It is therefore of the *first* person, *singular* number, *masculine* (or feminine) gender, and *possessive case*; being governed by the name of the thing or things possessed. This name is, of course, always *known*; and, if known and not expressed, it is "understood." For sometimes a word is repeated to the mind, and clearly understood, where "it cannot properly be" expressed; as, "And he came and sought *fruit* thereon, and found *none*."—*Luke*, xiii, 6. Wells opposes this doctrine, citing a passage from Webster, as above, and also imitating his argument. This author acknowledges three classes of pronouns—"personal, relative, and interrogative;" and then, excluding these words from their true place among personals of the possessive case, absurdly makes them a *supernumerary class of possessive nominatives* or *objectives*! "*Mine, thine, his, ours, yours, and theirs*, are POSSESSIVE PRONOUNS, used in construction either as *nominatives* or *objectives*; as, 'Your pleasures are past, *mine* are to come.' Here the word *mine*, which is used as a substitute for *my pleasures*, is *the subject* of the verb *are*."—*Wells's School Gram.*, p. 71; 113 Ed., p. 78. Now the question to find the subject of the verb *are*, is, "My *what* are to come?" Ans. "*pleasures*." But the author proceeds to argue in a note thus: "*Mine, thine*, etc. are often parsed as pronouns in the possessive case, *and governed by nouns understood*. Thus, in the sentence, 'This book is mine,' the *word mine* is said to *possess book*. That the word *book* is *not here understood*, is obvious

said that *a noun is understood*; I reply, *this cannot be true*,” &c.—*Philosophical Gram.*, p. 35; *Improved Gram.*, p. 26. Now, whether it be true or not, this very position is expressly affirmed by the Doctor himself, in the citation above; though he is, unquestionably, wrong in suggesting that the pronouns are “used *in the place* of [those] names WHICH ARE UNDERSTOOD.” They are used in the place of other names—the names of *the possessors*; and are governed by those which he here both admits and denies to be “understood.”

OBS. 13.—The other arguments of Dr. Webster against the possessive case of pronouns, may perhaps be more easily answered than some readers imagine. The first is drawn from the fact that conjunctions connect like cases. “Besides, in three passages just quoted, the word *yours* is joined by a connective *to a name* in the same case; ‘To ensure *yours* and *their immortality*.’ ‘The easiest part of *yours* and *my design*.’ ‘*My sword* and *yours* are kin.’ Will any person pretend that the connective here joins different cases?”—*Improved Gram.*, p. 28; *Philosophical Gram.*, p. 36. I answer, No. But it is falsely assumed that *yours* is here connected by *and* to *immortality*, to *design*, or to *sword*; because these words are again severally understood after *yours*: or, if otherwise, the two pronouns alone are connected by *and*, so that the proof is rather, that *their* and *my* are in the possessive case. The second argument is drawn from the use of the preposition *of* before the possessive. “For we say correctly, ‘an acquaintance *of yours, ours, or theirs*’—*of* being the sign of the possessive; but if the words in themselves are possessives, then there must be two signs of the same case, which is absurd.”—*Improved Gram.*, p. 28; *Phil. Gr.*, 36. I deny that *of* is here the sign of the possessive, and affirm that it is taken partitively, in all examples of this sort. “I know my sheep, and am known *of mine*,” is not of this kind; because *of* here means *by*—a sense in which the word is antiquated. In recurring afterwards to this argument, the Doctor misquotes the following texts, and avers that they “are evidently meant to include the *whole number*: ‘Sing *to* the Lord, *all ye saints of his*.’—*Ps.* 30, 4. ‘*He* that heareth these sayings *of mine*.’—*Matt.* 7.”—*Improved Gram.*, p. 29; *Phil. Gr.*, 38. If he is right about the meaning, however, the passages are mistranslated, as well as misquoted: they ought to be, “Sing *unto* the Lord, *O ye his Saints*.”—“*Every one* that heareth *these my sayings*.” But when a definitive particle precedes the noun, it is very

---

from the fact, that, when it is supplied, the phrase becomes not ‘*mine* book,’ but ‘*my* book,’ the pronoun being changed from *mine* to *my*; so that we are made, by this practice, to parse *mine* as *possessing a word* understood, before which it cannot properly be used. The word *mine* is here evidently employed as a substitute for the two words, *my* and *book*.”—*Wells*, *ibid.* This note appears to me to be, in many respects, faulty. In the first place, its whole design was, to disprove what is true. For, bating the mere difference of *person*, the author’s example above is equal to this: “Your pleasures are past, *W. H. Wells’s* are to come.” The ellipsis of “*pleasures*”, is evident in both. But *ellipsis* is not *substitution*; no, nor is *equivalence*. *Mine*, when it suggests an ellipsis of the governing noun, is *equivalent* to *my and that noun*; but certainly, not “*a substitute for the two words*.” It is a substitute, or pronoun, for the *name of the speaker or writer*; and so is *my*; both forms representing, and always agreeing with, that name or person only. No possessive agrees with what governs it; but every pronoun ought to agree with that for which it stands. Secondly, if the note above cited does not aver, in its first sentence, that the pronouns in question *are* “*governed by nouns understood*,” it comes much nearer to saying this, than a writer should who meant to deny it. In the third place, the example, “This book is mine,” is not a good one for its purpose. The word “*mine*” may be regularly parsed as a possessive, without supposing any ellipsis; for “book,” the name of the thing possessed, is given, and in obvious connexion with it. And further, the matter affirmed is *ownership*, requiring *different cases*; and not the *identity* of something under different names, which must be put in the *same case*. In the fourth place, to mistake regimen for possession, and thence speak of *one word* “*as possessing*” *an other*, a mode of expression occurring twice in the foregoing note, is not only unscholarlike, but positively absurd. But, possibly, the author may have meant by it, to ridicule the choice phraseology of the following Rule: “A noun or pronoun in the possessive case, is governed by *the noun it possesses*.”—*Kirkham’s Gram.*, p. 181; *Frazee’s*, 1844, p. 25.

common with us, to introduce the possessive elliptically after it; and what Dr. Wilson means by suggesting that it is erroneous, I know not: “When the preposition *of* precedes *mine*, *ours*, *yours*, &c. the *error* lies, not in this, that there are double possessive cases, but in forming an implication of a noun, which the substitute already denotes, together with the persons.”—*Essay on Gram.*, p. 110.

OBS. 14.—In his Syllabus of English Grammar, Dr. Wilson teaches thus: “*My*, *our*, *thy*, *your*, *his*, *her*, *its*, *their*, *whose*, and *whosoever* are possessive pronominal *adjectives*. *Ours*, *yours*, *hers*, and *theirs* are *pronoun substantives*, used either as subjects, or [as] objects; as singulars, or [as] plurals; and are substituted both for [the names of] the possessors, and [for those of the] things possessed. *His*, *its*, *whose*, *mine*, and *thine*, are sometimes used as *such substantives*; but also are at other times *pronominal possessive adjectives*.”—*Wilson’s Syllabus*, p. X. Now compare with these three positions, the following three from the same learned author. “In Hebrew, the *adjective* generally agrees with its noun in gender and number, but *pronouns* follow the gender of their antecedents, and not of the nouns with which they stand. So in English, *my*, *thy*, *his*, *her*, *its*, *our*, *your*, and *their*, agree with the nouns they represent, in number, gender, and person. But *adjectives*, having no change expressive of number, gender, or case, cannot accord with their nouns.”—*Wilson’s Essay on Gram.*, p. 192. “*Ours*, *yours*, *hers*, and *theirs*, are most usually considered possessive cases of personal pronouns; but they are, more probably, possessive substitutes, not adjectives, but *nouns*.”—*Ib.*, p. 109. “Nor can *mine* or *thine*, with any more propriety than *ours*, *yours*, &c. be joined to any noun, as possessive adjectives and possessive cases may.”—*Ib.*, p. 110. Whoever understands these instructions, cannot but see their inconsistency.

OBS. 15.—Murray argues at some length, without naming his opponents, that the words which he assumes to be such, are really personal pronouns standing rightfully in the possessive case; and that, “they should not, on the slight pretence of their differing from nouns, be dispossessed of the right and privilege, which, from time immemorial they have enjoyed.”—*Octavo Gram.*, p. 53. Churchill as ably shows, that the corresponding terms, which Lowth calls *pronominal adjectives*, and which Murray and others will have to be *pronouns of no case*, are justly entitled to the same rank. “If *mine*, *thine*, *hers*, *ours*, *yours*, *theirs*, be the possessive case; *my*, *thy*, *her*, *our*, *your*, *their*, must be the same. Whether we say, ‘It is *John’s* book,’ or, ‘The book is *John’s*,’ *John’s* is not less the possessive case in one instance, than it is in the other. If we say, ‘It is *his* book,’ or, ‘The book is *his*,’ ‘It is *her* book,’ or, ‘The book is *hers*,’ ‘It is *my* book,’ or, ‘The book is *mine*,’ ‘It is *your* book,’ or, ‘The book is *yours*,’ are not these parallel instances? Custom has established it as a law, that this case of the pronoun shall drop its original termination, for the sake of euphony, when it precedes the noun that governs it; retaining it only where the noun is understood: but this certainly makes no alteration in the nature of the word; so that either *my* is as much a possessive case as *mine*; or *mine* and *my* are equally pronominal adjectives.”—*Churchill’s New Gram.*, p. 221. “Mr. Murray considers the phrases, ‘*our desire*,’ ‘*your intention*,’ ‘*their resignation*,’ as instances of plural adjectives *agreeing* with singular nouns; and consequently exceptions to the general (may we not say *universal*?) rule: but if they [the words *our*, *your*, *their*,] be, as is attempted to be proved above, the possessive cases of pronouns, no rule is here violated.”—*Ib.*, p. 224.

OBS. 16.—One strong argument, touching this much-disputed point of grammar, was incidentally noticed in the observations upon antecedents: an adjective cannot give person, number, and gender, to a relative pronoun; because, in our language, adjectives

do not possess these qualities; nor indeed in any other, except as they take them by immediate agreement with nouns or pronouns in the same clause. But it is undeniable, that *my, thy, his, her, our, your, their*, do sometimes stand as antecedents, and give person, number, and gender to relatives, which head other clauses. For the learner should remember, that, “When a relative pronoun is used, the sentence is divided into two parts; viz. the *antecedent* sentence, or that which contains the *antecedent*; and the *relative* sentence, containing the *relative*.”—*Nixon’s Parser*, p. 123. We need not here deny, that Terence’s Latin, as quoted in the grammars, “Omnes laudare fortunas *meas, qui* haberem gnatum tali ingenio præditum,” is quite as intelligible syntax, as can literally be made of it in English—“That all would praise *my* fortunes, *who had* a son endued with such a genius.” For, whether the Latin be good or not, it affords no argument against us, except that of a supposed analogy; nor does the literality of the version prove, at all points, either the accuracy or the sameness of the construction.

OBS. 17.—Surely, without some imperative reason, we ought not, in English, to resort to such an assumption as is contained in the following Rule: “Sometimes the relative agrees in person with that pronoun substantive, from which the possessive pronoun adjective is derived; as, Pity *my* condition, *who am* so destitute. I rejoice at *thy* lot, *who art* so fortunate. We lament *his* fate, *who is* so unwary. Beware of *her* cunning, *who is* so deceitful. Commiserate *our* condition, *who are* so poor. Tremble at *your* negligence, *who are* so careless. It shall be *their* property, *who are* so diligent. We are rejoicing at *thy* lot, *who hast* been so fortunate.”—*Nixon’s Parser*, p. 142. In his explanation of the last of these sentences, the author says, “*Who* is a relative pronoun; in the masculine gender, singular number, second person, and agrees with *thee*, implied in the adjective *thy*. RULE.—Sometimes the relative agrees in person, &c. And it is the nominative to the verb *hast been*. RULE.—When no nominative comes between the relative and the verb, the relative is the nominative to the verb.”—*Ib.*, p. 143. A pupil of *G. Brown’s* would have said, “*Who* is a relative pronoun, representing ‘*thy*,’ or the person addressed, in the second person, singular number, and masculine gender; according to the rule which says, ‘A pronoun must agree with its antecedent, or the noun or pronoun which it represents, in person, number, and gender:’ and is in the nominative case, being the subject of *hast been*; according to the rule which says, ‘A noun or a pronoun which is the subject of a finite verb, must be in the nominative case.’ Because the meaning is—*who hast been*; that is, *thy lot*, or the lot *of thee, who hast been*.”

OBS. 18.—Because the possessive case of a noun or pronoun is usually equivalent in meaning to the preposition *of* and the objective case, some grammarians, mistaking this equivalence of meaning for sameness of case, have asserted that all our possessives have a double form. Thus Nixon: “When the particle *of* comes between two substantives signifying different things, it is not to be considered a preposition, but *the sign of the substantive’s being in the possessive case*, equally as if the apostrophic *s* had been affixed to it; as, ‘The skill *of Cæsar*,’ or *Cæsar’s* skill.”—*English Parser*, p. 38. “When the apostrophic *s* is used, the genitive is the former of the two substantives; as, ‘*John’s* house:’ but when the particle *of* is used, it is the latter; as, ‘The house *of John*.’”—*Ib.*, p. 46. The work here quoted is adapted to two different grammars; namely, Murray’s and Allen’s. These the author doubtless conceived to be the best English grammars extant. And it is not a little remarkable, that both of these authors, as well as many others, teach in such a faulty manner, that their intentions upon this point may be matter of dispute. “When Murray, Allen, and others, say, ‘we make use of the particle *of* to express the *relation* of the genitive,’ the ambiguity of their assertion leaves it in doubt whether or not

they considered the substantive which is preceded by *of* and an other substantive, as in the *genitive* case.”—*Nixon’s English Parser*, p. 38. Resolving this doubt according to his own fancy, Nixon makes the possessive case of our personal pronouns to be as follows: “*mine* or *of me*, *ours* or *of us*; *thine* or *of thee*, *yours* or *of you*; *his* or *of him*, *theirs* or *of them*; *hers* or *of her*, *theirs* or *of them*; *its* or *of it*, *theirs* or *of them*.”—*English Parser*, p. 43. This doctrine gives us a form of declension that is both complex and deficient. It is therefore more objectionable than almost any of those which are criticised above. The arguments and authorities on which the author rests his position, are not thought likely to gain many converts; for which reason, I dismiss the subject, without citing or answering them.

OBS. 19.—In old books, we sometimes find the word *I* written for the adverb *ay*, yes: as, “To dye, to sleepe; To sleepe, perchance to dreame; *I*, there’s the rub.”—*Shakspeare*, *Old Copies*. The *British Grammar*, printed in 1784, and the Grammar of Murray the schoolmaster, published some years earlier than Lindley Murray’s, say: “We use *I* as an Answer, in a familiar, careless, or merry Way; as, ‘I, I, Sir, I, I;’ but to use *ay*, is accounted rude, especially to our Betters.” See *Brit. Gram.*, p. 198. The age of this rudeness, or incivility, if it ever existed, has long passed away; and the fashion seems to be so changed, that to write or utter *I* for *ay*, would now in its turn be “accounted *rude*”—the rudeness of ignorance—a false orthography, or a false pronunciation. In the word *ay*, the two sounds of *ah-ee* are plainly heard; in the sound of *I*, the same elements are more quickly blended. (See a note at the foot of page 162.) When this sound is suddenly repeated, some writers make a new word of it, which must be called an *interjection*: as, “Pray, answer me a question or two.’ ‘*Ey, ey*, as many as you please, cousin Bridget, an they be not too hard.”—*Burgh’s Speaker*, p. 99. “*Ey, ey*, ‘tis so; she’s out of her head, poor thing.”—*Ib.*, p. 100. This is probably a corruption of *ay*, which is often doubled in the same manner: thus,

“*Ay, ay*, Antipholus, look strange, and frown.”—*Shakspeare*.

OBS. 20.—The common fashion of address being nowadays altogether in the plural form, the pronouns *thou*, *thy*, *thine*, *thee*, and *thyself*, have become unfamiliar to most people, especially to the vulgar and uneducated. These words are now confined almost exclusively to the writings of the poets, to the language of the Friends, to the Holy Scriptures, and to the solemn services of religion. They are, however, the *only genuine* representatives of the second person singular, in English; and to displace them from that rank in grammar, or to present *you*, *your*, and *yours*, as being literally singular, though countenanced by several late writers, is a useless and pernicious innovation. It is sufficient for the information of the learner, and far more consistent with learning and taste, to say, that the plural is fashionably used *for the singular*, by a figure of syntax; for, in all correct usage of this sort, the *verb* is plural, as well as the pronoun—Dr. Webster’s fourteen authorities to the contrary notwithstanding. For, surely, “*You was*” cannot be considered good English, merely because that number of respectable writers have happened, on some particular occasions, to adopt the phrase; and even if we must needs concede this point, and grant to the Doctor and his converts, that “*You was* is *primitive* and *correct*,” the example no more proves that *you* is singular, than that *was* is plural. And what is one singular irregular preterit, compared with all the verbs in the language?

OBS. 21.—In our present authorized version of the Bible, the numbers and cases of the second person are kept remarkably distinct,\* the pronouns being always used in the following manner: *thou* for the nominative, *thy* or *thine* for the possessive, and *thee* for the objective, singular; *ye* for the nominative, *your* or *yours* for the possessive, and *you* for the objective, plural. Yet, before that version was made, fashionable usage had commonly substituted *you* for *ye*, making the former word nominative as well as objective, and applying it to one hearer as well as to more. And subsequently, as it appears, the religious sect that entertained a scruple about applying *you* to an individual, fell for the most part into an ungrammatical practice of putting *thee* for *thou*; making, in like manner, the objective pronoun to be both nominative and objective; or, at least, using it very commonly so in their conversation. Their manner of speaking, however, was not—or, certainly, with the present generation of their successors, *is* not—as some grammarians represent it to be, that formal and antique phraseology which we call *the solemn style*.† They make no more use of the pronoun *ye*, or of the verbal termination *eth*, than do people of fashion; nor do they, in using the pronoun *thou*, or their improper nominative *thee*, ordinarily inflect with *st* or *est* the preterits or the auxiliaries of the accompanying verbs, as is done in the solemn style. Indeed, to use the solemn style familiarly, would be, to turn it into burlesque; as when Peter Pindar “*telleth what he troweth*.” ‡ And let those who think with Murray, that our present version of the Scriptures *is the best standard* of English grammar,§ remember that in it they have no warrant for substituting *s* or *es* for the old termination *eth*, any more than for ceasing to use the solemn style of the second person familiarly. That version was good in its day, yet it shows but very imperfectly what the English language now is. Can we consistently take for our present standard, a style which does not allow us to use *you* in the nominative case, or *its* for the possessive? And again, is not a simplification of the verb as necessary and proper in the familiar use of the second person singular, as in that of the third? This latter question I shall discuss in a future chapter.

---

\* In respect to the *numbers*, the following text is an uncouth exception: “Pass *ye* away, *thou* inhabitant of Saphir.”—*Micah*, i, 11. The singular and the plural are here strangely confounded. Perhaps the reading should be, “Pass *thou* away, *O* inhabitant of Saphir.” Nor is the Bible free from *abrupt transitions* from one number to the other, or from one person to another, which are neither agreeable nor strictly grammatical; as, “Brethren, if a man be overtaken in a fault, *ye which [who]* are spiritual, restore such *an [a]* one in the spirit of meekness; considering *thyself*, lest *thou* also be tempted.”—*Gal.*, vi, 1. “*Ye* that put far away the evil day, and cause the seat of violence to come near; that lie upon beds of ivory, and stretch *themselves* upon *their* couches,” &c—*Amos*, vi, 9.

† “The solemn style is used, chiefly, in the Bible and in prayer. The Society of Friends *retain it in common parlance*. It consists in using *thou* in the singular number, and *ye* in the plural, instead of using *you* in both numbers as in the familiar style. \* \* \* The third person singular [of verbs] ends with *th* or *eth*, which affects only the present indicative, and *hath* of the perfect. The second person, singular, ends with *st*, *est*, or *t* only.”—*Sanborn’s Gram.*, p. 58. “In [the] solemn and poetic styles, *mine*, *thine*, and *thy*, are used; and *THIS is the style adopted by the Friends’ society*. In common discourse it appears very stiff and affected.”—*Bartlett’s C. S. Man’s*, Part II, p. 72.

‡ “And of the History of his being *tost* in a Blanket, *he saith*, ‘Here, Scriblerus, *thou lessest* in what *thou assertest* concerning the blanket: it was not a blanket, but a rug.—*Curliad*, p. 25.”—*Notes to Pope’s Dunciad*, B. ii, verse 3. A vulgar idea solemnly expressed, is ludicrous. Uttered in familiar terms, it is simply vulgar: as, “*You lie*, Scriblerus, in what *you say* about the blanket.”

§ “Notwithstanding these verbal mistakes, the Bible, for the size of it, is the most accurate grammatical composition that we have in the English language. The authority of several eminent grammarians might be adduced in support of this assertion, but it may be sufficient to mention only that of Dr. Lowth, who says, ‘The present translation of the Bible, is *the best standard* of the English language.’”—*Murray’s Gram.*, 8vo, p. 166. I revere the Bible vastly too much to be pleased with an imitation of its peculiar style, in any man’s ordinary speech or writing.—G. BROWN.

OBS. 22.—The use of the pronoun *ye* in the nominative case, is now mostly confined to the solemn style;\* but the use of it in the objective, which is disallowed in the solemn style, and nowhere approved by our grammarians, is nevertheless *common* when no emphasis falls upon the word: as,

“When you’re unmarried, never load *ye*  
With jewels; they may incommode *ye*.”—*Dr. King*, p. 384.

Upon this point, Dr. Lowth observes, “Some writers have used *ye* as the objective case plural of the pronoun of the second person, very improperly and ungrammatically; [as,]

‘The more shame for *ye*; holy men I thought *ye*.’ Shak. Hen. VIII.

‘But tyrants dread *ye*, lest your just decree  
Transfer the pow’r, and set the people free.’ Prior.

‘His wrath, which one day will destroy *ye* both.’ Milt. P. L. ii. 734.

Milton uses the same manner of expression in a few other places of his *Paradise Lost*, and more frequently in his [smaller] poems, *It may, perhaps, be allowed in the comic and burlesque style*, which often imitates a vulgar and incorrect pronunciation; but in the serious and solemn style, *no authority is sufficient* to justify so manifest a solecism.”—*Lowth’s Gram.*, p. 22. Churchill copies this remark, and adds; “Dryden has *you* as the nominative, and *ye* as the objective, in the same passage:†

‘What gain *you*, by forbidding it to tease *ye*?  
It now can neither trouble *ye*, nor please *ye*.’

Was this from a notion, that *you* and *ye*, thus employed, were more analogous to *thou* and *thee* in the singular number?”—*Churchill’s Gram.*, p. 25. I answer, No; but, more probably, from a notion, that the two words, being now confessedly equivalent in the one case, might as well be made so in the other: just as the Friends, in using *thee* for *you*, are carelessly converting the former word into a nominative, to the exclusion of *thou*; because the latter has generally been made so, to the exclusion of *ye*. When the confounding of such distinctions is begun, who knows where it will end? With like ignorance, some writers suppose, that the fashion of using the plural for the singular is a sufficient warrant for putting the singular for the plural: as,

“The joys of love, are they not doubly *thine*,  
*Ye poor!* whose health, whose spirits ne’er decline?”  
—*Southwick’s Pleas. of Poverty*.

“But, *Neatherds*, go look to the kine,  
Their cribs with fresh fodder supply;  
The task of compassion be *thine*,  
For herbage the pastures deny.”—*Perfect’s Poems*, p. 5.

\* “*Ye*, except in the solemn style, is *obsolete*; but it is used in the language of tragedy, to express contempt: as, ‘When *ye* shall know what Margaret knows, *ye* may not be so thankful.’ Franklin.”—*W. Allen’s Gram.*, p. 57. “The second person plural had *formerly* YE *both in the nominative and the objective*. This form is *now obsolete in the objective*, and nearly obsolete in the nominative.”—*Hart’s Gram.*, p. 55.

† So has Milton:—

“To waste it all myself, and leave *ye* none!  
So disinherited how would *you* bless me!”—*Par. Lost*, B. x, l. 820.

OBS. 23.—When used in a burlesque or ludicrous manner, the pronoun *ye* is sometimes a mere expletive; or, perhaps, intended rather as an objective governed by a preposition understood. But, in such a construction, I see no reason to prefer it to the regular objective *you*; as,

“He’ll laugh *ye*, dance *ye*, sing *ye*, vault, look gay,  
And ruffle all the ladies in his play.”—*King*, p. 574.

Some grammarians, who will have *you* to be singular as well as plural, ignorantly tell us, that “*ye* always means more than one.” But the fact is, that when *ye* was in common use, it was as frequently applied to one person as *you*: thus,

“Farewell my doughter lady Margarete,  
God wotte full oft it griued hath my mynde,  
That *ye* should go where we should seldome mete:  
Now am I gone, and haue left *you* behynde.”—*Sir T. More*, 1503.

In the following example, *ye* is used for *thee*, the objective singular; and that by one whose knowledge of the English language, is said to have been unsurpassed:—

“Proud Baronet of Nova Scotia!  
The Dean and Spaniard must reproach *ye*.”—*Swift*.

So in the story of the Chameleon:—

“’Tis green, ’tis green, Sir, I assure *ye*.”—*Merrick*.

Thus we have *ye* not only for the nominative in both numbers, but at length for the objective in both; *ye* and *you* being made everywhere equivalent, by very many writers. Indeed this pronoun has been so frequently used for the objective case, that one may well doubt any grammarian’s authority to condemn it in that construction. Yet I cannot but think it ill-chosen in the third line below, though right in the first:—

“*Ye*! who have traced the Pilgrim to the scene  
Which is his last, if in your memories dwell  
A thought which once was his, if on *ye* swell  
A single recollection, not in vain  
He wore his sandal-shoon, and scallop-shell.”—*Byron*.

OBS. 24.—The three pronouns of the third person, *he*, *she*, and *it*, have always formed their plural number after one and the same manner, *they*, *their* or *theirs*, *them*. Or, rather, these plural words, which appear not to be regular derivatives from any of the singulars, have ever been applied alike to them all. But *it*, the neuter pronoun singular, had formerly no variation of cases, and is still alike in the nominative and the objective. The possessive *its* is of comparatively recent origin. In our common Bible, the word is not found, except by misprint; nor do other writings of the same age contain it. The phrase, *of it*, was often used as an equivalent; as, “And it had three ribs in the mouth *of it* between the teeth *of it*.”—*Dan.*, vii, 5. That is—“in *its* mouth, between *its* teeth.” But, as a possessive case was sometimes necessary, our ancestors used to borrow one; commonly from the masculine, though sometimes from the feminine. This produced what now appears a strange confusion of the genders: as, “*Learning* hath *his* infancy, when *it* is but beginning, and almost childish; then *his* youth, when *it* is luxuriant and juvenile; then *his* strength of years, when *it* is solid and reduced; and lastly *his* old age, when *it* waxeth dry and exhaust.”—*Bacon’s Essays*, p. 58. “Of beaten work shall the *candlestick* be made: *his*

shaft, and *his* branches, *his* bowls, *his* knops, and *his* flowers, shall be of the same.”—*Exodus*, xxv, 31. “They came and emptied the *chest*, and took *it* and carried *it* to *his* place again.”—2 *Chron.*, xxiv, 11. “Look not thou upon the *wine*, *when* it is red, when *it* giveth *his* colour in the cup, when *it* moveth *itself* aright.”—*Prov.*, xxiii, 31. “The *tree* is known by *his* fruit.”—*Matt.*, xii, 33. “When thou tillest the ground, *it* shall not henceforth yield unto thee *her* strength.”—*Gen.*, iv, 12. “He that pricketh the heart, maketh *it* to show *her* knowledge.”—*Eccl.*, xxii, 19. Shakspeare rarely, if ever, used *its*; and his style is sometimes obscure for the want of it: as,

“There is no *vice* so simple, but assumes  
Some mark of virtue on *his* outward parts.”—*Merch. of Venice*.

“The name of Cassius honours this corruption,  
And *chastisement* doth therefore hide *his* head.”—*Jul. Cæs.*, Act iv.

OBS. 25.—The possessive case of pronouns should never be written with an apostrophe. A few pronominal adjectives taken substantively receive it; but the construction which it gives them, seems to make them nouns: as, *one's*, *other's*, and, according to Murray, *former's* and *latter's*. The real pronouns that end in *s*, as *his*, *hers*, *its*, *ours*, *yours*, *theirs*, though true possessives after their kind, have no occasion for this mark, nor does good usage admit it. Churchill, with equal disregard of consistency and authority, gives it to one of them, and denies it to the rest. Referring to the classification of these words as possessives, and of *my*, *thy*, *her*, *our*, *your*, *their*, as adjectives, he says: “It seems as if the termination in *s* had led to the distinction: but no one will contend, that *ours* is the possessive case of *our*, or *theirs* of *their*; though *ours*, *yours*, *hers*, and *theirs*, are often very improperly spelt with an apostrophe, a fault not always imputable to the printer; while in *it's*, which is unquestionably the possessive case of *it*, the apostrophe, by a strange perverseness, is almost always omitted.”—*Churchill Gram.*, p. 222. The charge of strange perverseness may, in this instance, I think, be retorted upon the critic; and that, to the fair exculpation of those who choose to conform to the general usage which offends him.

OBS. 26.—Of the compound personal pronouns, this author gives the following account: “*Self*, in the plural *selves*, a noun, is often combined with the personal pronouns, in order to express emphasis, or opposition, or the identity of the subject and [the] object of a verb; and thus forms a pronoun *relative*: as, ‘I did it *myself*,’ ‘he was not *himself*, when he said so;’ ‘the envious torment *themselves* more than others.’ Formerly *self* and *selves* were used simply as nouns, and governed the pronoun, which was kept distinct from *it* [them] in the possessive case: but since *they* [the pronoun and the noun] have coalesced into one word, *they* [the compounds] are used only in the following forms: for the first person, *myself*, *ourselves*; for the second, *thyself*, or *yourself*, *yourselves*; for the third, *himself*, *herself*, *itself*, *themselves*: except in the regal style, in which, as generally in the second person, the singular noun is added to the plural pronoun, [making] *ourself*. Each of these is *the same in all three cases*.”—*Churchill's Gram.*, p. 75. In a note referring to the close of this explanation, he adds: “*Own* also is often employed with the possessive cases of the personal pronouns by way of emphasis, or opposition; but separately, as an adjective, and not combining with them to form a *relative*: as, ‘I did it of *my own* free will:’ ‘Did he do it with *his own* hand?’”—*Ib.*, p. 227.

OBS. 27.—The preceding instructions, faulty and ungrammatical as they are, seem to be the best that our writers have furnished upon this point. To detect falsities and blunders, is half the grammarian's duty. The pronouns of which the term *self* or *selves* forms a part, are used, not for the connecting of different clauses of a sentence, but for the purpose of emphatic distinction in the sense. In calling them "*relatives*," Churchill is wrong, even by his own showing. They have not the characteristics which he himself ascribes to relatives; but are compound personal pronouns, and nothing else. He is also manifestly wrong in asserting, that they are severally "the same in all three cases." From the very nature of their composition, the possessive case is alike impossible to them all. To express ownership with emphasis or distinction, we employ neither these compounds nor any others; but always use the simple possessives with the separate adjective *own*: as, "With *my own* eyes,"—"By *thy own* confession,"—"To *his own* house,"—"For *her own* father,"—"By *its own* weight,"—"To save *our own* lives,"—"For *your own* sake,"—"In *their own* cause."

OBS. 28.—The phrases, *my own*, *thy own*, *his own*, and so forth, Dr. Perley, in his little Grammar, has improperly converted by the hyphen into compound words: calling them the possessive forms of *myself*, *thyself*, *himself*, and so forth; as if one set of compounds could constitute the possessive case of an other! And again, as if the making of eight new pronouns for two great nations, were as slight a feat, as the inserting of so many hyphens! The word *own*, anciently written *owen*, is an *adjective*; from an old form of the perfect participle of the verb *to owe*; which verb, according to Lowth and others, once signified *to possess*. It is equivalent to *due*, *proper*, or *peculiar*; and, in its present use as an adjective, it stands nowhere else than between the possessive case and the name of the thing possessed; as, "The Boy's *Own* Book,"—"Christ's *own* words,"—"Solomon's *own* and only son." Dr. Johnson, while he acknowledges the abovementioned derivation, very strangely calls *own* a noun substantive; and, with not more accuracy, says: "This is a word of no other use than as it is added to the possessive pronouns, *my*, *thy*, *his*, *our*, *your*, *their*."—*Quarto Dict.*, *w. Own*. O. B. Peirce, with obvious untruth, says, "*Own* is used in combination with a name or substitute, and as a part of it, to constitute it emphatic."—*Gram.*, p. 63. He writes it separately, but parses it as a part of the possessive noun or pronoun which precedes it!

OBS. 29.—The word *self* was originally an *adjective*, signifying *same*, *very*, or *particular*; but, when used alone, it is now generally a *noun*. This may have occasioned the diversity which appears in the formation of the compound personal pronouns. Dr. Johnson, in his great Dictionary, calls *self* a pronoun; but he explains it as being both adjective and substantive, admitting that, "Its primary signification seems to be that of an adjective."—Again he observes, "*Myself*, *himself*, *themselves*, and the rest, may, contrary to the analogy of *my*, *him*, *them*, be used as nominatives." *Hissself*, *itsself*, and *theirselves*, would be more analogical than *himself*, *itself*, *themselves*; but custom has rejected the former, and established the latter. When an adjective qualifies the term *self*, the pronouns are written separately in the possessive case; as, *My single self*,—*My own self*,—*His own self*,—*Their own selves*. So, anciently, without an adjective: as, "A man shall have diffused his life, *his self*, and his whole concernments so far, that he can weep his sorrows with an other's eyes."—*South*. "Something valuable for *its self* without view to anything farther."—*Harris's Hermes*, p. 293. "That they would willingly, and of *their selves* endeavour to keep a perpetual chastity."—*Stat. Ed.* VI. in *Lowth's Gram.*, p. 26. "Why I should either *imploy my self* in that study or put others upon it."—*Walker's English Particles*, p. xiv. "It is no matter whether you do it by your proctor, or by *your self*."—*Ib.*, p. 96. The compound

*oneself* is sometimes written in stead of the phrase *one's self*; but the latter is preferable, and more common. Even *his self*, when written as two words, may possibly be right in some instances; as,

“Scorn’d be the wretch that quits his genial bowl,  
His loves, his friendships, ev’n *his self*, resigns;  
Perverts the sacred instinct of his soul,  
And to a ducat’s dirty sphere confines.”

—SHENSTONE: *Brit. Poets*, Vol. vii, p. 107.

OBS. 30.—In poetry, and even in some compositions not woven into regular numbers, the simple personal pronouns are not unfrequently used, for brevity’s sake, in a reciprocal sense; that is, in stead of the compound personal pronouns, which are the proper reciprocals: as, “Wash *you*, make *you* clean.”—*Isaiah*, i, 16. “I made *me* great works; I builded *me* houses; I planted *me* vineyards; I made *me* gardens and orchards.”—*Ecclesiastes*, ii, 4. “Thou shalt surely clothe *thee* with them all as with an ornament, and bind them on *thee* as a bride doeth.”—*Isaiah*, xlix, 18. Compare with these the more regular expression: “As a bridegroom decketh *himself* with ornaments, and as a bride adorneth *herself* with jewels.”—*Isaiah*, lxi, 10. This phraseology is almost always preferable in prose; the other is a poetical license, or peculiarity: as,

“I turn *me* from the martial roar.”—*Scott’s L. L.*, p. 97.

“Hush *thee*, poor maiden, and be still.”—*Ib.*, p. 110.

“Firmer he roots *him* the ruder it blow.”—*Ib.*, p. 49.

OBS. 31.—To accommodate the writers of verse, the word *ever* is frequently contracted into *e’er*, pronounced like the monosyllable *air*. An easy extension of this license, gives us similar contractions of all the compound relative pronouns; as, *whoe’er* or *whosoe’er*, *whose’er* or *whosesoe’er*, *whome’er* or *whomsoe’er*, *whiche’er* or *whichsoe’er*, *whate’er* or *whatsoe’er*. The character and properties of these compounds are explained, perhaps sufficiently, in the observations upon the *classes* of pronouns. Some of them are commonly parsed as representing two cases at once; there being, in fact, an ellipsis of the noun, before or after them: as,

“Each art he prompts, each charm he can create,  
*Whate’er* he gives, *are given* for you to hate.”—*Pope’s Dunciad*.

OBS. 32.—For a form of parsing the double relative *what*, or its compound *whatever* or *whatsoever*, it is the custom of some teachers, to suggest equivalent words, and then proceed to explain these, in lieu of the word in question. This is the method of *Russell’s Gram.*, p. 99; of *Merchants*, p. 110; of *Kirkham’s*, p. 111; of *Gilbert’s*, p. 92. But it should be remembered that equivalence of meaning is not sameness of grammatical construction; and, even if the construction be the same, to parse other equivalent words, is not really to parse the text that is given. A good parser, with the liberty to supply obvious ellipses, should know how to explain all good English *as it stands*; and for a teacher to pervert good English into false doctrine, must needs seem the very worst kind of ignorance. What can be more fantastical than the following etymology, or more absurd than the following directions for parsing? “*What* is compounded of *which that*. These words have been contracted and made to coalesce, a part of the orthography of both being still retained:

*what*—*wh[ich—t]hat*; (*which-that*.) Anciently it appeared in the varying forms, *tha qua*, *qua tha*, *qu'tha*, *quthat*, *quhat*, *hwat*, and finally *what*.”—*Kirkham's Gram.*, p. 111. This bald pedantry of “*tha qua*, *qua tha*,” was secretly borrowed from the grammatical speculations of William S. Cardell:\* the “*which-that*” notion contradicts it, and is partly of the borrower’s own invention. If *what* is a compound, it was compounded more than a thousand years ago; and, of course, long before any part of the English language existed as such. King Alfred used it, as he found it, in the Saxon form of *hwæt*. The Scotch afterwards spelled it *quhat*. Our English grammarians have *improperly* called it a compound; and *Kirkham*, still more absurdly, calls the word *others* a compound, and *mine*, *thine*, *ours*, *yours*, &c. compounds.†

OBS. 33.—According to this gentleman’s notion of things, there is, within the little circle of the word *what*, a very curious play of antecedent parts and parts relative—a dodging contra-dance of *which that* and *that which*, with *things which*, and so forth. Thus: “When *what* is a *compound relative* you must always parse it as *two words*; that is, you must parse the antecedent part *as a noun*, and give it case; the relative part you may *analyze* like any other relative, giving it a case likewise. Example: ‘I will try *what* (that which) can be found in female delicacy.’ Here *that*, the antecedent part of *what*, is in the obj. case, governed by the verb ‘will try;’ *which*, the relative part, is in the nom. case to ‘can be found.’ ‘I have heard *what* (i.e. *that which*, or *the thing which*) has been alleged.’—*Kirkham's Gram.*, p. 111. Here, we sec, the author’s “*which-that*” becomes *that which*, or something else. But this is not a full view of his method. The following vile rigmarole is a further sample of that “*New Systematick Order of Parsing*,” by virtue of which he so very complacently and successfully sets himself above all other grammarians: “From *what* is recorded, he appears, &c.’ *What* is a comp. rel. pron. including both the antecedent and the relative, and is equivalent to *that which*, or the *thing which*.—*Thing*, the antecedent part of *what*, is a noun, the name of a thing—com. the name of a species—neuter gender,

\* “The word *what* is a *compound of two specifying adjectives*, each, of course, referring to a noun, expressed or understood. It is equivalent to *the which*; *that which*; *which that*; or *that that*; used also in the plural. At different periods, and in different authors, it appears in the varying forms, *tha qua*, *qua tha*, *qu'tha*, *quthat*, *quhat*, *hwat*, and *what*. This word is found in other forms; but it is needless to multiply them.”—*Cardell's Essay on Language*, p. 86.

† This author’s distribution of the pronouns, of which I have taken some notice in Obs. 10th above, is remarkable for its inconsistencies and absurdities. First he avers, “Pronouns are *generally* divided into three kinds, the *Personal*, the *Adjective*, and the *Relative* pronouns. *They are all known by the lists*.”—*Kirkham's Gram.*, p. 96. These short sentences are far from being accurate, clear, or true. He should have made the several kinds known, by a good definition of each. But this was work to which he did not find himself adequate. And if we look to his *lists* for the particular words of each kind, we shall get little satisfaction. Of the *Personal* pronouns, he says, “There are *five* of them; *I*, *thou*, *he*, *she*, *it*.”—*Ib.*, p. 97. These are *simple* words, and in their declension they are properly multiplied to forty. (See *Ib.*, p. 99.) Next he seems to double the number, thus: “When *self* is added to the personal pronouns, as himself, myself, itself, themselves, &c. *they* are called *Compound Personal Pronouns*.”—*Ib.*, p. 99. Then he asserts that *mine*, *thine*, *his*, *hers*, *ours*, *yours*, and *theirs*, are compounds of *ne* or *s* with *mi*, *thi*, *hi*, &c.: that their application invariably “gives them a compound character.” and that, “They may, therefore, be properly denominated *Compound Personal Pronouns*.”—*Ib.*, p. 101. Next he comes to his *Adjective* pronouns; and, after proving that he has grossly misplaced and misnamed every one of them, he gives his lists of the three kinds of these. His *Relative* pronouns are *who*, *which*, and *that*. “*What* is generally a *compound relative*.”—*Ib.*, p. 111. The compounds of *who*, *which*, and *what*, with *ever* or *soever*, he calls “compound *pronouns*, but not compound relatives.”—*Ib.*, pp. 110 and 112. Lastly he discovers, that, “Truth and simplicity” have been shamefully neglected in this his third section of pronouns; that, “Of the words called ‘*relatives*,’ *who* only is a pronoun, and this is strictly *personal*,” that, “It ought to be classed with the personal pronouns;” and that, “*Which*, *that*, and *what*, are always adjectives. They *never stand for*, but always *belong to* nouns, either expressed or implied.”—*Ib.*, p. 114. What admirable teachings are these!

it has no sex—third person, spoken of—sing. number, it implies but one—and in the obj. case, it is the object of the relation expressed by the prep. ‘from,’ and gov. by it: RULE 31. (Repeat the Rule, and *every other Rule* to which I refer.) *Which*, the relative part of *what*, is a pronoun, a word used instead of a noun—relative, it relates to ‘thing’ for its antecedent—neut. gender, third person, sing. number, because the antecedent is with which it agrees, according to RULE 14. *Rel. pron.* &c. *Which* is *in* the nom. case to the verb ‘is recorded,’ agreeably to RULE 15. *The relative is the nominative case to the verb, when no nominative comes between it and the verb.*—*Kirkham’s Gram.*, p. 113.

OBS. 34.—The distinction which has been made by Murray and others, between etymological parsing and syntactical—or, between that exercise which simply classifies and describes the words of a sentence, and that which adds to this the principles of their construction—is rejected by Kirkham, and also by Ingersoll, Fuller, Smith, Sanborn, Mack, and some others, it being altogether irreconcilable with their several modes of confounding the two main parts of grammar. If such a distinction is serviceable, the want of it is one of the inherent faults of the schemes which they have adopted. But, since “grammar is the art of speaking and writing with *propriety*” who that really values clearness and accuracy of expression, can think the want of them excusable in *models* prescribed for the exercise of parsing? And is it not better to maintain the distinction above named, than to interlace our syntactical parsing with broken allusions to the definitions which pertain to etymology? If it is, this new mode of parsing, which Kirkham claims to have invented, and Smith pretends to have got from Germany, whatever boast may be made of it, is essentially defective and very immethodical.\* This remark applies not merely to the forms above cited, respecting the pronoun *what*, but to the whole method of parsing adopted by the author of “*English Grammar in Familiar Lectures.*”

OBS. 35.—The forms of etymological parsing which I have adopted, being designed to train the pupil, in the first place, by a succession of easy steps, to a rapid and accurate description of the several species of words, and a ready habit of fully defining the technical terms employed in such descriptions, will be found to differ more from the forms of syntactical parsing, than do those of perhaps any other grammarian. The definitions, which constitute so large a portion of the former, being omitted as soon as they are

---

\* “It is now proper to give some *examples of the manner* in which the learners should be exercised, in order to improve their knowledge, and to render it familiar to them. This is called *parsing*. The nature of the subject, as well as the adaptation of it to learners, requires *that it should be divided* into two parts: viz. parsing, as it respects etymology alone; and parsing, as it respects both etymology and syntax.”—*Murray’s Gram.*, Octavo, Vol. 1, p. 225. How very little real respect for the opinions of Murray, has been entertained by these self-seeking magnifiers and modifiers of his work!

What Murray calls “*Syntactical Parsing*” is sometimes called “*Construing*,” especially by those who will have *Parsing* to be nothing more than an etymological exercise. A late author says, “The practice of *Construing* differs from that of parsing, in the extension of its objects. Parsing merely indicates the parts of speech and their accidents, but construing searches for and points out their syntactical relations.”—*D. Blair’s Gram.*, p. 49.

Here the distinction which Murray judged to be necessary, is still more strongly marked and insisted on. And though I see no utility in restricting the word *Parsing* to a mere description of the parts of speech with their accidents, and no impropriety in calling the latter branch of the exercise “*Syntactical Parsing*,” I cannot but think there is such a necessity for the division, as forms a very grave argument against those tangled schemes of grammar which do not admit of it. Blair is grossly inconsistent with himself. For, after drawing his distinction between Parsing and Construing, as above, he takes no further notice of the latter; but, having filled up seven pages with his most wretched mode of “PARSING,” adds, in an emphatic note: “*The Teacher should direct the Pupil to CONSTRUE, IN THE SAME MANNER, any passage from MY CLASS-BOOK, or other Work, at the rate of three or four lines per day.*”—*D. Blair’s Gram.*, p. 56.

thoroughly learned, give place in the latter, to the facts and principles of syntax. Thus have we fullness in the one part, conciseness in the other, order and distinctness in both. The separation of etymology from syntax, however, though judiciously adopted by almost all grammarians, is in itself a mere matter of convenience. No one will pretend that these two parts of grammar are in their nature *totally* distinct and independent. Hence, though a due regard to method demands the maintenance of this ancient and still usual division of the subject, we not unfrequently, in treating of the classes and modifications of words, exhibit contingently some of the principles of their construction. This, however, is very different from a purposed blending of the two parts, than which nothing can be more unwise.

OBS. 36.—The great peculiarity of the pronoun *what*, or of its compound *whatever* or *whatsoever*, is a peculiarity of construction, rather than of etymology. Hence, in etymological parsing, it may be sufficient to notice it only as a relative, though the construction be double. It is in fact a relative; but it is one that reverses the order of the antecedent, whenever the noun is inserted with it. But as the noun is usually suppressed, and as the supplying of it is attended with an obvious difficulty, arising from the transposition, we cut the matter short, by declaring the word to have, as it appears to have, a double syntactical relation. Of the foregoing example, therefore—viz., “From *what* is recorded,” &c.,—a pupil of mine, in parsing *etymologically*, would say thus: “*What* is a relative pronoun, of the third person, singular number, neuter gender, and nominative case. 1. A pronoun is a word used in stead of a noun. 2. A relative pronoun is a pronoun that represents an antecedent word or phrase, and connects different clauses of a sentence. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The nominative case is that form or state of a noun or pronoun, which denotes the subject of a verb.” In parsing *syntactically*, he would say thus: “*What* is a double relative, including both antecedent and relative, being equivalent to *that which*. As *antecedent*, it is of the third person, singular number, neuter gender, and objective case; being governed by *from*; according to the rule which says, ‘A Noun or a Pronoun made the object of a preposition, is governed by it in the objective case.’ Because the meaning is—*from what*. As *relative*, it is of the third person, singular number, neuter gender, and nominative case; being the subject of *is recorded*; according to the rule which says, ‘A Noun or a Pronoun which is the subject of a finite verb, must be in the nominative case.’ Because the meaning is—*what is recorded*.”

OBS. 37.—The word *what*, when uttered independently as a mark of surprise, or as the prelude to an emphatic question which it does not ask, becomes an interjection; and, as such, is to be parsed merely as other interjections are parsed: as, “*What!* came the word of God out from you? or came it unto you only?”—1 *Cor.*, xiv, 36. “*What!* know ye not that your body is the temple of the Holy Ghost which is in you, which ye have of God?”—1 *Cor.*, vi, 19. “But *what!* is thy servant a dog, that he should do this great thing?”—2 *Kings*, viii, 13. “*What!* are you so ambitious of a man’s good word, who perhaps in an hour’s time shall curse himself to the pit of hell?”—*Collier’s Antoninus*, p. 152.

“*What!* up and down, carv’d like an apple-tart?”—*Shakspeare*.

“*What!* can you lull the winged winds asleep?”—*Campbell*.

## EXAMPLES FOR PARSING.

## PRAXIS V.—ETYMOLOGICAL.

*In the Fifth Praxis, it is required of the pupil—to distinguish and define the different parts of speech, and the classes and modifications of the* ARTICLES, NOUNS, ADJECTIVES, *and* PRONOUNS.

*The definitions to be given in the Fifth Praxis, are two for an article, six for a noun, three for an adjective, six for a pronoun, and one for a verb, a participle, an adverb, a conjunction, a preposition, or an interjection. Thus:—*

## EXAMPLE PARSED.

“Nay but, O man, who art thou that repliest against God? Shall the thing formed say to him that formed it, Why hast thou made me thus.”—*Rom.*, ix, 20.

*Nay* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*But* is a conjunction. 1. A conjunction is a word used to connect words or sentences in construction, and to show the dependence of the terms so connected.

*O* is an interjection. 1. An interjection is a word that is uttered merely to indicate some strong or sudden emotion of the mind.

*Man* is a common noun, of the second person, singular number, masculine gender, and nominative case. 1. A noun is the name of any person, place, or thing, that can be known or mentioned. 2. A common noun is the name of a sort, kind, or class, of beings or things. 3. The second person is that which denotes the hearer, or the person addressed. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Who* is an interrogative pronoun, of the third person, singular number, masculine gender, and nominative case. 1. A pronoun is a word used in stead of a noun. 2. An interrogative pronoun is a pronoun with which a question is asked. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The nominative case is that form or state of a noun or pronoun which usually denotes the subject of a finite verb.

*Art* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Thou* is a personal pronoun, of the second person, singular number, masculine gender, and nominative case. 1. A pronoun is a word used in stead of a noun. 2. A personal pronoun is a pronoun that shows, by its form, of what person it is. 3. The second person is that which denotes the hearer, or the person addressed. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The nominative case is that form or state of a noun or pronoun which usually denotes the subject of a finite verb.

*That* is a relative pronoun, of the second person, singular number, masculine gender, and nominative case. 1. A pronoun is a word used in stead of a noun. 2. A relative pronoun is a pronoun that represents an antecedent word or phrase, and connects different clauses of a sentence. 3. The second person is that which denotes the

hearer, or the person addressed. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Repliest* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Against* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*God* is a proper noun, of the third person, singular number, masculine gender, and objective case. 1. A noun is the name of any person, place, or thing, that can be known, or mentioned. 2. A proper noun is the name of some particular individual, or people, or group. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The objective case is that form or state of a noun or pronoun, which usually denotes the object of a verb, participle, or preposition.

*Shall* is a verb, auxiliary to *say*, and may be taken with it.

*The* is the definite article. 1. An article is the word *the*, *an*, or *a*, which we put before nouns to limit their signification. 2. The definite article is *the*, which denotes some particular thing or things.

*Thing* is a common noun of the third person, singular number, neuter gender, and nominative case. 1. A noun is the name of any person, place, or thing, that can be known or mentioned. 2. A common noun is the name of a sort, kind, or class, of beings or things. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Formed* is a participle. 1. A participle is a word derived from a verb, participating the properties of a verb, and of an adjective or a noun; and is generally formed by adding *ing*, *d*, or *ed*, to the verb.

*Say*, or *shall say*, is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*To* is a preposition. 1. A preposition is a word used to express some relation of different things or thoughts to each other, and is generally placed before a noun or a pronoun.

*Him* is a personal pronoun, of the third person, singular number, masculine gender, and objective case. 1. A pronoun is a word used in stead of a noun. 2. A personal pronoun is a pronoun that shows, by its form, of what person it is. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The objective case is that form or state of a noun or pronoun which usually denotes the object of a verb, participle, or preposition.

*That* is a relative pronoun, of the third person, singular number, masculine gender, and nominative case. 1. A pronoun is a word used in stead of a noun. 2. A relative pronoun is a pronoun that represents an antecedent word or phrase, and connects

different clauses of a sentence. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Formed* is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*. *It* is a personal pronoun, of the third person, singular number, neuter gender, and objective case. 1. A pronoun is a word used in stead of a noun. 2. A personal pronoun is a pronoun that shows, by its form, of what person it is. 3. The third person is that which denotes the person or thing merely spoken of. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The objective case is that form or state of a noun or pronoun, which usually denotes the object of a verb, participle, or preposition.

*Why* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

*Hast* is a verb, auxiliary to *made*, and may be taken with it.

*Thou* is a personal pronoun, of the second person, singular number, masculine gender, and nominative case. 1. A pronoun is a word used in stead of a noun. 2. A personal pronoun is a pronoun that shows, by its form, of what person it is. 3. The second person is that which denotes the hearer, or the person addressed. 4. The singular number is that which denotes but one. 5. The masculine gender is that which denotes persons or animals of the male kind. 6. The nominative case is that form or state of a noun or pronoun, which usually denotes the subject of a finite verb.

*Made*, or *hast made*, is a verb. 1. A verb is a word that signifies *to be*, *to act*, or *to be acted upon*.

*Me* is a personal pronoun, of the first person, singular number, neuter gender, and objective case. 1. A pronoun is a word used in stead of a noun. 2. A personal pronoun is a pronoun that shows, by its form, of what person it is. 3. The first person is that which denotes the speaker or writer. 4. The singular number is that which denotes but one. 5. The neuter gender is that which denotes things that are neither male nor female. 6. The objective case is that form or state of a noun or pronoun which usually denotes the object of a verb, participle, or preposition.

*Thus* is an adverb. 1. An adverb is a word added to a verb, a participle, an adjective, or an other adverb; and generally expresses time, place, degree, or manner.

#### LESSON I.—PARSING.

“Every man has undoubtedly an inward perception of the celestial goodness by which he is quickened. But, if to obtain some ideas of God, it be not necessary for us to go beyond ourselves, what an unpardonable indolence it is in those who will not descend into themselves that they may find him?”—*Calvin’s Institutes*, B. i, Ch. 5.

“Jesus answered, If I honour myself, my honour is nothing: it is my Father that honoureth me; of whom ye say, that he is your God: yet ye have not known him; but I know him.”—*John*, viii, 54.

“What! have ye not houses to eat and to drink in? or despise ye the church of God, and shame them that have not? What shall I say to you? shall I praise you in this? I praise you not.”—1 *Cor.*, xi, 22.

“We know not what we ought to wish for, but He who made us, knows.”—*Burgh’s Dignity*, Vol. ii, p. 20.

“And who is he that will harm you, if ye be followers of that which is good?”—1 *Peter*, iii, 13.

“For we dare not make ourselves of the number, or compare ourselves with some that commend themselves: but they, measuring themselves by themselves, and comparing themselves among themselves, are not wise.”—2 *Cor.*, x, 12.

“Whatever is humane, is wise; whatever is wise, is just; whatever is wise, just, and humane, will be found the true interest of states.”—*Dr. Rush, on Punishments*, p. 19.

“But, methinks, we cannot answer it to ourselves, as-well-as to our Maker, that we should live and die ignorant of ourselves, and thereby of him, and of the obligations which we are under to him for ourselves.”—*William Penn*.

“But where shall wisdom be found? and where is the place of understanding? The depth saith, ‘It is not in me;’ and the sea saith, ‘It is not with me.’ Destruction and death say, ‘We have heard the fame thereof with our ears.’”—See *Job*, xxviii, 12, 14, 22; and *Blair’s Lect.*, p. 417.

“I still had hopes, my latest hours to crown,  
Amidst these humble bow’rs to lay me down.”—*Goldsmith*.

“Why dost thou then suggest to me distrust,  
Knowing who I am, as I know who thou art?”—*Milton*, P. R.

## LESSON II.—PARSING.

“I would, methinks, have so much to say for myself, that if I fell into the hands of him who treated me ill, he should be sensible when he did so: his conscience should be on my side, whatever became of his inclination.”—*Steele, Spect.*, No. 522.

“A boy should understand his mother tongue well before he enters upon the study of a dead language; or, at any rate, he should be made perfect master of the meaning of all the words which are necessary to furnish him with a translation of the particular author which he is studying.”—*Gallaudet, Lit. Conv.*, p. 206.

“No discipline is more suitable to man, or more congruous to the dignity of his nature, than that which refines his taste, and leads him to distinguish, in every subject, what is regular, what is orderly, what is suitable, and what is fit and proper.”—*Kames’s El. of Crit.*, i, 275.

“Simple thoughts are what arise naturally; what the occasion or the subject suggests unsought; and what, when once suggested, are easily apprehended by all. Refinement in

writing, expresses a less natural and [less] obvious train of thought.”—*Blair’s Rhet.*, p. 184.

“Where the story of an epic poem is founded on truth, no circumstances must be added, but such as connect naturally with what are known to be true: history may be supplied, but it must not be contradicted.”—See *Kames’s El. of Crit.*, ii, 280.

“Others, I am told, pretend to have been once his friends. Surely they are their enemies, who say so; for nothing can be more odious than to treat a friend as they have treated him. But of this I cannot persuade myself, when I consider the constant and eternal aversion of all bad writers to a good one.”—*Cleland, in Defence of Pope*.

“From side to side, he struts, he smiles, he prates,  
And seems to wonder what’s become of Yates.”—*Churchill*.

“Alas! what sorrows gloom’d that parting day,  
That call’d them from their native walks away!”—*Goldsmith*.

### LESSON III.—PARSING.

“It is involved in the nature of man, that he cannot be indifferent to an event that concerns him or any of his connexions: if it be fortunate, it gives him joy; if unfortunate, it gives him sorrow.”—*Kames’s El. of Crit.*, i, 62.

“I knew a man who had relinquished the sea for a country life: in the corner of his garden he reared an artificial mount with a level summit, resembling most accurately a quarter-deck, not only in shape, but in size; and here he generally walked.”—*Ib.*, p. 328.

“I mean, when we are angry with our Maker. For against whom else is it that our displeasure is pointed, when we murmur at the distribution of things here, either because our own condition is less agreeable than we would have it, or because that of others is more prosperous than we imagine they deserve?”—*Archbishop Seeker*.

“Things cannot charge into the soul, or force us upon any opinions about them; they stand aloof and are quiet. It is our fancy that makes them operate and gall us; it is we that rate them, and give them their bulk and value.”—*Collier’s Antoninus*, p. 212.

“What is your opinion of truth, good-nature, and sobriety? Do any of these virtues stand in need of a good word; or are they the worse for a bad one? I hope a diamond will shine ne’er the less for a man’s silence about the worth of it.”—*Ib.*, p. 49.

“Those words which were formerly current and proper, have now become obsolete and barbarous. Alas! this is not all: fame tarnishes in time too; and men grow out of fashion, as well as languages.”—*Ib.*, p. 55.

“O Luxury! thou curs’d by Heaven’s decree,  
How ill exchang’d are things like these for thee.”—*Goldsmith*.

“O, then, how blind to all that truth requires,  
Who think it freedom when a part aspires!”—*Id.*

## IMPROPRIETIES FOR CORRECTION.

## ERRORS OF PRONOUNS.

## LESSON I.—RELATIVES.

“At the same time that we attend to this pause, every appearance of sing-song and tone must be carefully guarded against.”—*Murray’s English Reader*, p. xx.

[FORMULE.—Not proper, because the word *that* had not clearly the construction either of a pronoun or of a conjunction. But, according to Observation 18th, on the Classes of Pronouns, “The word *that*, or indeed any other word, should never be so used as to leave the part of speech uncertain.” Therefore, the expression should be altered: thus, “*While* we attend to this pause, every appearance of *singsong* must be carefully *avoided*.”]

“For thou shalt go to all that I shall send thee.”—*Jeremiah*, i, 7; *Gurney’s Obs.*, p. 223. “Ah! how happy would it have been for me, had I spent in retirement these twenty-three years that I have possessed my kingdom.”—See *Sanborn’s Gram.*, p. 242. “In the same manner that relative pronouns and their antecedents are usually parsed.”—*Ib.*, p. 71. “Parse or mention all the other nouns in the parsing examples, in the same manner that you do the word in the form of parsing.”—*Ib.*, p. 8. “The passive verb will always be of the person and number that the verb *be* is, of which it is in part composed.”—*Ib.*, p. 53. “You have been taught that a verb must always be of the same person and number that its nominative is.”—*Ib.*, p. 68. “A relative pronoun, also, must always be of the same person, number, and even gender that its antecedent is.”—*Ib.*, p. 68. “The subsequent is always in the same case that the word is, which asks the question.”—*Ib.*, p. 95. “*One* sometimes represents an antecedent noun in the same definite manner that personal pronouns do.”—*Ib.*, p. 98. “The mind being carried forward to the time that an event happens, easily conceives it to be present.”—*Ib.*, p. 107. “*Save* and *saving* are parsed in the same manner that *except* and *excepting* are.”—*Ib.*, p. 123. “Adverbs describe, qualify, or modify the meaning of a verb in the same manner that adjectives do nouns.”—*Ib.*, p. 16. “The third person singular of verbs, is formed in the same manner, that the plural number of nouns is.”—*Ib.*, p. 41. “He saith further: ‘that the apostles did not anew baptize such persons, that had been baptized with the baptism of John.’”—*Barclay’s Works*, i, 292. “For we which live, are always delivered unto death for Jesus’ sake.”—2 *Cor.*, iv, 11. “For they, which believe in God, must be careful to maintain good works.”—*Barclay’s Works*, i, 431. “Nor yet of those which teach things which they ought not, for filthy lucre’s sake.”—*Ib.*, i, 435. “So as to hold such bound in heaven, whom they bind on earth, and such loosed in heaven, whom they loose on earth.”—*Ib.*, i, 478. “Now, if it be an evil to do any thing out of strife; then such things that are seen so to be done, are they not to be avoided and forsaken?”—*Ib.*, i, 522. “All such who satisfy themselves not with the superficies of religion.”—*Ib.*, ii, 23. “And he is the same in substance, what he was upon earth, both in spirit, soul and body.”—*Ib.*, iii, 98. “And those that do not thus, are such, to whom the Church of Rome can have no charity.”—*Ib.*, iii, 204. “Before his book he placeth a great list of that he accounts the blasphemous assertions of the Quakers.”—*Ib.*, iii, 257. “And this is that he should have proved.”—*Ib.*, iii, 322. “Three of which were at that time actual students of philosophy in the university.”—*Ib.*, iii, 180. “Therefore it is not lawful for any whatsoever \* \* \* to force the consciences of others.”—*Ib.*, ii, 13. “What is the cause that the former days were better than these?”—*Eccl.*, vii, 10. “In the same manner that the term *my* depends on the name *books*.”—*O. B. Peirce’s Gram.*, p. 54. “In the same manner as the term *house* depends on the relative *near*.”—*Ib.*, p. 58. “James died on the day that Henry returned.”—*Ib.*, p. 177.

## LESSON II.—DECLENSIONS.

“*Other* makes the plural *others*, when it is found without it’s substantive.”—*Priestley’s Gram.*, p. 12.

[FORMULE.—Not proper, because the pronoun *it’s* is written with an apostrophe. But, according to Observation 25th, on the Declensions of Pronouns, “The possessive case of pronouns should never be written with an apostrophe.” Therefore, this apostrophe should be omitted; thus, “*Other* makes the plural *others*, when it is found without its substantive.”]

“But *his*, *her’s*, *our’s*, *your’s*, *their’s*, have evidently the form of the possessive case.”—*Lowth’s Gram.*, p. 23. “To the Saxon possessive cases, *hire*, *ure*, *eower*, *hira*, (that is, *her’s*, *our’s*, *your’s*, *their’s*,) we have added the *s*, the characteristic of the possessive case of nouns.”—*Ib.*, p. 23. “Upon the name of Jesus Christ our Lord, both their’s and our’s.”—FRIENDS’ BIBLE: 1 *Cor.*, i, 2. “In this Place *His* Hand is clearly preferable either to Her’s or It’s.” \*—*Harris’s Hermes*, p. 59. “That roguish leer of your’s makes a pretty woman’s heart ache.”—ADDISON: in *Joh. Dict.* “Lest by any means this liberty of your’s become a stumbling-block.”—FRIENDS’ BIBLE: 1 *Cor.*, viii, 9. “First person: Sing. I, mine, me; Plur. we, our’s, us.”—*Wilbur and Livingston’s Gram.*, p. 16. “Second person: Sing. thou, thine, thee; Plur. ye or you, your’s, you.”—*Ib.* “Third person: Sing. she, her’s, her; Plur. they, their’s, them.”—*Ib.* “So shall ye serve strangers in a land that is not your’s.”—SCOTT ET AL.: *Jer.*, v, 19. “Second person, Singular: Nom. thou or you, Poss. thine or yours, Obj. thee or you.”—*Frost’s El. of E. Gram.*, p. 13. “Second person, Dual: Nom. Gyt, ye two; Gen. Incer, of ye two; Dat. Inc, incrum, to ye two; Acc. Inc, ye two; Voc. Eala inc, O ye two; Abl. Inc, incrum, from ye two.”—*Gwill’s Saxon Gram.*, p. 12. “Second person, Plural; Nom. Ge, ye; Gen. Eower, of ye; Dat. Eow, to ye; Acc. Eow, ye; Voc. Eala ge, O ye; Abl. Eow, from ye.”—*Ib.* (written in 1829.) “These words are, *mine*, *thine*, *his*, *her’s*, *our’s*, *your’s*, *their’s*, and *whose*.”—*Cardell’s Essay*, p. 88. “This house is *our’s*, and that is *your’s*. *Their’s* is very commodious.”—*Ib.*, p. 90. “And they shall eat up thine harvest, and thy bread: they shall eat up thy flocks and thine herds.”—*Jeremiah*, v, 17. “*Whoever* and *Whichever* are thus declined. *Sing.* and *Plu. nom.* whoever, *poss.* whoseever, *obj.* whomever. *Sing.* and *Plu. nom.* whichever, *poss.* whoseever, *obj.* whichever.”—*Cooper’s Plain and Practical Gram.*, p. 38. “The compound personal pronouns are thus declined; *Sing. N.* Myself, *P.* my-own, *O.* myself; *Plur. N.* ourselves, *P.* our-own, *O.* ourselves. *Sing. N.* Thyself or yourself, *P.* thy-own or your-own, *O.* thyself or yourself;” &c.—*Perley’s Gram.*, p. 16. “Every one of us, each for hisself, laboured how to recover him.”—SIDNEY: in *Priestley’s Gram.*, p. 96. “Unless when ideas of their opposites manifestly suggest their selves.”—*Wright’s Gram.*, p. 49. “It not only exists in time, but is time its self.”—*Ib.*, p. 75. “A position which the action its self will palpably deny.”—*Ib.*, p. 102. “A difficulty sometimes presents its self.”—*Ib.*, p. 165. “They are sometimes explanations in their selves.”—*Ib.*, p. 249. “Our’s, Your’s, Their’s, Her’s, It’s.”—*S. Barrett’s Gram.*, p. 24.

“Their’s the wild chace of false felicities:

His, the compos’d possession of the true.”—*Murray’s E. Reader*, p. 216.

---

\* This is a comment upon the following quotation from Milton, where *Hers* for *His* would be a gross barbarism:—

“Should intermitted vengeance arm again  
*His* red right hand to plague us.”—*Par. Lost*, B. ii, l. 174.

## LESSON III.—MIXED.

“It is the boast of Americans, without distinction of parties, that their government is the most free and perfect, which exists on the earth.”—*Dr. Allen’s Lectures*, p. 18.

[FORMULE.—Not proper, because the relative *which* is here intended to be taken in a restrictive sense. But, according to Observation 26th, on the Classes of Pronouns, (and others that follow it,) the word *who* or *which*, with a comma before it, does not usually limit the preceding term. Therefore, *which* should be *that*, and the comma should be omitted; thus,—“that their government is the most free and perfect *that* exists on the earth.”]

“Children, who are dutiful to their parents, enjoy great prosperity.”—*Sanborn’s Gram.*, p. 69. “The scholar, who improves his time, sets an example worthy of imitation.”—*Ib.*, p. 69. “Nouns and pronouns, which signify the same person, place, or thing, agree in case.”—*Cooper’s Gram.*, p. 115. “An interrogative sentence is one, which asks a question.”—*Ib.*, p. 114. “In the use of words and phrases, which in point of time relate to each other, a *due regard* to *that relation* should be *observed*.”—*Ib.*, p. 146; see *L. Murray’s* Rule xiii. “The same observations, which have been made respecting the effect of the article and participle, appear to be applicable to the pronoun and participle.”—*Murray’s Gram.*, p. 193. “The reason that they have not the same use of them in reading, may be traced to the very defective and erroneous method, in which the art of reading is taught.”—*Ib.*, p. 252. “Since the time that reason began to exert her powers, thought, during our waking hours, has been active in every breast, without a moment’s suspension or pause.”—*Murray’s Key*, p. 271; *Merchant’s Gram.*, p. 212. “In speaking of such who greatly delight in the same.”—*Notes to Dunciad*, 177. “Except such to whom the king shall hold out the golden sceptre, that he may live.”—*Esther*, iv, 11.—“But the same day that Lot went out of Sodom, it rained fire and brimstone from heaven, and destroyed them all.”—*Luke*, xvii, 29. “In the next place I will explain several cases of nouns and pronouns which have not yet come under our notice.”—*Kirkham’s Gram.*, p. 129. “Three natural distinctions of time are all which can exist.”—*Rail’s Gram.*, p. 15. “We have exhibited such only as are obviously distinct; and which seem to be sufficient, and not more than sufficient.”—*Murray’s Gram.*, p. 68; *Hall’s*, 14. “This point encloses a part of a sentence which may be omitted without materially injuring the connexion of the other members.”—*Hall’s Gram.*, p. 39. “Consonants are letters, which cannot be sounded without the aid of a Vowel.”—*Bucke’s Gram.*, p. 9. “Words are not simple sounds, but sounds, which convey a meaning to the mind.”—*Ib.*, p. 16. “Nature’s postures are always easy; and which is more, nothing but your own will can put you out of them.”—*Collier’s Antoninus*, p. 197. “Therefore ought we to examine our own selves, and prove our own selves.”—*Barclay’s Works*, i, 426. “Certainly it had been much more natural, to have divided Active Verbs into *Immanent*, or such whose Action is terminated in it self, and *Transient*, or such whose Action is terminated in something without it self.”—*Johnson’s Gram. Com.*, p. 273. “This is such an advantage which no other lexicon will afford.”—DR. TAYLOR: *in Pike’s Lex.*, p. iv. “For these reasons, such liberties are taken in the Hebrew tongue with those words as are of the most general and frequent use.”—*Pike’s Heb. Lexicon*, p. 184. “At the same time that we object to the laws, which the antiquarian in language would impose upon us, we must enter our protest against those authors, who are too fond of innovations.”—*Murray’s Gram.*, Vol. i, p. 136.

**CHAPTER VI.—VERBS.**

A Verb is a word that signifies *to be*, *to act*, or *to be acted upon*: as, I *am*, I *rule*, I *am ruled*; I *love*, thou *lovest*, he *loves*.

VERBS are so called, from the Latin *Verbum*, a *Word*; because the verb is that word which most essentially contains what is said in any clause or sentence.

An English verb has four CHIEF TERMS, or PRINCIPAL PARTS, ever needful to be ascertained in the first place; namely, the *Present*, the *Preterit*, the *Imperfect Participle*, and the *Perfect Participle*. The *Present* is that form of the verb, which is the root of all the rest; the verb itself; or that simple term which we should look for in a dictionary: as, *be*, *act*, *rule*, *love*, *defend*, *terminate*.

The *Preterit* is that simple form of the verb, which denotes time past; and which is always connected with some noun or pronoun, denoting the subject of the assertion: as, *I was*, *I acted*, *I ruled*, *I loved*, *I defended*.

The *Imperfect Participle* is that which ends commonly\* in *ing*, and implies a *continuance* of the being, action, or passion: as, *being*, *acting*, *ruling*, *loving*, *defending*, *terminating*.

The *Perfect Participle* is that which ends commonly in *ed* or *en*, and implies a *completion* of the being, action, or passion: as, *been*, *acted*, *ruled*, *loved*.

**CLASSES.**

Verbs are divided, with respect to their *form*, into four classes; *regular* and *irregular*, *redundant* and *defective*.

I. A *regular verb* is a verb that forms the preterit and the perfect participle by assuming *d* or *ed*; as, *love*, *loved*, *loving*, *loved*.

II. An *irregular verb* is a verb that does not form the preterit and the perfect participle by assuming *d* or *ed*; as, *see*, *saw*, *seeing*, *seen*.

III. A *redundant verb* is a verb that forms the preterit or the perfect participle in two or more ways, and so as to be both regular and irregular; as, *thrive*, *thrived* or *throve*, *thriving*, *thrived* or *thriven*.

IV. A *defective verb* is a verb that forms no participles, and is used in but few of the moods and tenses; as, *beware*, *ought*, *quoth*.

---

\* The Imperfect Participle, *when simple*, or when taken as one of the four principal terms constituting the verb or springing from it, ends *always* in *ing*. But, in a subsequent chapter, I include under this name the first participle of the passive verb; and this, in our language, is always a compound, and the latter term of it does not end in *ing*: as, "In all languages, indeed, examples are to be found of adjectives *being compared* whose signification admits neither intension nor remission."—CROMBIE, *on Etym. and Syntax*, p. 106. According to most of our writers on English grammar, the Present or Imperfect Participle Passive is *always* a compound of *being* and the form of the perfect participle: as, *being loved*, *being seen*. But some represent it to have *two* forms, one of which is always simple; as, "PERFECT PASSIVE, obeyed *or* being obeyed."—*Sanborn's Analytical Gram.*, p. 55. "Loved *or* being loved."—*Parkhurst's Grammar for Beginners*, p. 11; *Greene's Analysis*, p. 225. "Loved, or, *being* loved."—*Clark's Practical Gram.*, p. 83. I here concur with the majority, who in no instance take the participle in *ed* or *en*, alone, for the Present or Imperfect.

Verbs are divided again, with respect to their *signification*, into four classes; *active-transitive*, *active-intransitive*, *passive*, and *neuter*.

I. An *active-transitive* verb is a verb that expresses an action which has some person or thing for its object; as, "Cain *slew Abel*."—"Cassius *loved Brutus*."

II. An *active-intransitive* verb is a verb that expresses an action which has no person or thing for its object; as, "John *walks*."—"Jesus *wept*."

III. A. *passive verb* is a verb that represents its subject, or what the nominative expresses, as being acted upon; as, "I *am compelled*."—"Cæsar *was slain*."

IV. A *neuter verb* is a verb that expresses neither action nor passion, but simply being, or a state of being; as, "There *was* light."—"The babe *sleeps*."

### OBSERVATIONS.

OBS. 1.—So various have been the views of our grammarians, respecting this complex and most important part of speech, that almost every thing that is contained in any theory or distribution of the English verbs, may be considered a matter of opinion and of dispute. Nay, the essential nature of a verb, in Universal Grammar, has never yet been determined by any received definition that can be considered unobjectionable. The greatest and most acute philologists confess that a faultless definition of this part of speech, is difficult, if not impossible, to be formed. Horne Tooke, at the close of his *Diversions of Purley*, cites with contempt nearly a dozen different attempts at a definition, some Latin, some English, some French; then, with the abruptness of affected disgust, breaks off the catalogue and the conversation together, leaving his readers to guess, if they can, what he conceived a verb to be. He might have added some scores of others, and probably would have been as little satisfied with any one of them. A definition like that which is given above, may answer in some degree the purpose of distinction; but, after all, we must judge what is, and what is not a verb, chiefly from our own observation of the sense and use of words.\*

OBS. 2.—Whether *participles* ought to be called verbs or not, is a question that has been much disputed, and is still variously decided; nor is it possible to settle it in any way

---

\* In the following example, "*he*" and "*she*" are converted into verbs; as "*thou*" sometimes is, in the writings of Shakspeare, and others: "Is it not an impulse of selfishness or of a depraved nature to *he* and *she* inanimate objects?"—*Cutler's English Gram.*, p. 16. Dr. Bullions, who has heretofore published several of the worst definitions of the verb anywhere extant, has now perhaps one of the best: "A VERB is a word used to express the *act, being, or state* of its subject."—*Analyt. & Pract. Gram.*, p. 59. Yet it is not very obvious, that "*he*" and "*she*" are here verbs under this definition. Dr. Mandeville, perceiving that "the usual definitions of the verb are extremely defective," not long ago helped the schools to the following: "A verb is a word which describes *the state or condition* of a *noun or pronoun* in relation to *time*,"—*Course of Reading*, p. 24. Now it is plain, that under this definition too, Cutler's infinitives, "to *he* and *she*" cannot be verbs; and, in my opinion, very small is the number of words that can be. No verb "describes the state or condition of a *noun or pronoun*," except in some form of *parsing*; nor, even in this sort of exercise, do I find any verb "which describes the state or condition" of such a word "*in relation to time*." Hence, I can make of this definition nothing but nonsense. Against my definition of a verb, this author urges, that it "excludes neuter verbs, expresses *no relation* to subject or time, and uses terms in a vague or contradictory sense."—*Ib.*, p. 25. The first and the last of these three allegations do not appear to be well founded; and the second, if infinitives are verbs, indicates an excellence rather than a fault. The definition assumes that the mind as well as the body may "*act*" or "*be acted upon*." For this cause, Dr. Mandeville, who cannot conceive that "*to be loved*" is in any wise "*to be acted upon*," pronounces it "fatally defective!" His argument is a little web of sophistry, not worth unweaving here. One of the best scholars cited in the reverend Doctor's book says, "Of mental powers we have *no conception*, but as certain capacities of *intellectual action*." And again, he asks, "Who can be conscious of *judgment, memory, and reflection*, and doubt that man was made *to act*?"—EVERETT: *Course of Reading*, p. 320.

not liable to some serious objections. The same may perhaps be said of all the forms called *infinitives*. If the essence of a verb be made to consist in affirmation, predication, or assertion, (as it is in many grammars,) neither infinitives nor participles can be reckoned verbs, without a manifest breach of the definition. Yet are the former almost universally treated as verbs, and by some as the only pure verbs; nor do all deny them this rank, who say that affirmation is *essential* to a verb. Participles, when unconnected with auxiliaries, are most commonly considered a separate part of speech; but in the formation of many of our moods and tenses, we take them as *constituent parts of the verb*. If there is absurdity in this, there is more in undertaking to avoid it; and the inconvenience should be submitted to, since it amounts to little or nothing in practice. With auxiliaries, then, participles *are verbs*: without auxiliaries, they are *not verbs*, but form a separate part of speech.

OBS. 3.—The number of verbs in our language, amounts unquestionably to four or five thousand; some say, (perhaps truly,) to eight thousand. All these, whatever be the number, are confessedly *regular* in their formation, except about two hundred. For, though the catalogues in our grammars give the number somewhat variously, all the irregular, redundant, and defective verbs, put together, are *commonly* reckoned fewer than two hundred. I admit, in all, two hundred and nineteen. The regular verbs, therefore, are vastly more numerous than those which deviate from the stated form. But, since many of the latter are words of very frequent occurrence, the irregular verbs appear exceedingly numerous in practice, and consequently require a great deal of attention. The defective verbs being very few, and most of these few being mere auxiliaries, which are never parsed separately, there is little occasion to treat them as a distinct class; though Murray and others have ranked them so, and perhaps it is best to follow their example. The redundant verbs, which are regular in one form and irregular in an other, being of course always found written either one way or the other, as each author chooses, may be, and commonly have been, referred in parsing to the class of regular or irregular verbs accordingly. But, as their number is considerable, and their character peculiar, there may be some advantage in making them a separate class. Besides, the definition of an irregular verb, as given in any of our grammars, seems to exclude all such as *may* form the preterit and the perfect participle by assuming *d* or *ed*.

OBS. 4.—In most grammars and dictionaries, verbs are divided, with respect to their signification, into three classes only; *active*, *passive*, and *neuter*. In such a division, the class of *active* verbs includes those only which are *active-transitive*, and all the *active-intransitive* verbs are called *neuter*. But, in the division adopted above, *active-intransitive* verbs are made a distinct class; and those only are regarded as neuter, which imply a state of existence without action. When, therefore, we speak of verbs without reference to their regimen, we may, if we please, apply the simple term active to all those which express *action*, whether *transitive* or *intransitive*. “We *act* whenever we *do* any thing; but we *may act* without *doing* any thing.”—*Crabb’s Synonymes*.

OBS. 5.—Among the many English grammars in which verbs are divided, as above mentioned, into *active*, *passive*, and *neuter*, only, are those of the following writers: Lowth, Murray, Ainsworth, Alden, Allen, Alger, Bacon, Bicknell, Blair, Bullions, (at first,) Charles Adams, Bucke, Cobbett, Cobbin, Dilworth, A. Flint, Frost, (at first,) Greenleaf, Hall,

Johnson,\* Lennie, Picket, Pond, Sanborn, R. C. Smith, Rev. T. Smith, and Wright. These authors, and many more, agree, that, “A *verb neuter* expresses neither action nor passion, but being, or a state of being.”—*L. Murray*. Yet, according to their scheme, such words as *walk, run, fly, strive, struggle, wrestle, contend*, are verbs *neuter*. In view of this palpable absurdity, I cannot but think it was a useful improvement upon the once popular scheme of English grammar, to make active-intransitive verbs a distinct class, and to apply the term *neuter* to those few only which accord with the foregoing definition. This had been done before the days of Lindley Murray, as may be seen in Buchanan’s English Syntax, p. 56, and in the old British Grammar, p. 153, each published many years before the appearance of his work;† and it has often been done since, and is preferred even by many of the professed admirers and followers of Murray; as may be seen in the grammars of Comly, Fisk, Merchant, Kirkham, and others.

OBS. 6.—Murray himself quotes this improved distribution, and with some appearance of approbation; but strangely imagines it must needs be *inconvenient* in practice. Had he been a schoolmaster, he could hardly have so judged. He says, “Verbs have been distinguished by some writers, into the following kinds:—

“1st. *Active-transitive*, or those which denote an action that passes from the agent to some object: as, Cæsar conquered Pompey.

“2d. *Active-intransitive*, or those which express that kind of action, which has no effect upon any thing beyond itself: as, Cæsar walked.

“3d. *Passive*, or those which express, not action, but passion, whether pleasing or painful: as, Portia was loved; Pompey was conquered.

“4th. *Neuter*, or those which express an attribute that consists neither in action nor passion: as, Cæsar stood.

“This appears to be an orderly arrangement. But if the class of *active-intransitive* verbs were admitted, *it would rather perplex* than assist the learner: for the difference between verbs active and neuter, as transitive and intransitive is easy and obvious: but the difference between verbs absolutely neuter and [those which are] intransitively active, is not always clear. It is, indeed, often *very difficult*, if not impossible to be ascertained.”—*Murray’s Gram.*, 8vo, p. 60.‡

\* Dr. Johnson says, “English verbs are active, as *I love*; or neuter, as *I languish*. The neuters are formed like the actives. The passive voice is formed by joining the participle preterit to the substantive verb, as *I am loved*.” He also observes, “Most verbs signifying *action* may likewise signify *condition* or *habit*, and become *neuters*; as, *I love*, I am in love; *I strike*, I am now striking.”—*Gram.* with his *Quarto Dict.*, p. 7.

† The doctrine here referred to, appears in both works in the very same words: to wit, “English Verbs are either Active, Passive, or Neuter. There are two sorts of Active Verbs, viz. *active-transitive* and *active-intransitive* Verbs.”—*British Gram.*, p. 153; *Buchanan’s*, 56. Buchanan was in this case the copyist.

‡ “The distinction between verbs absolutely neuter, as *to sleep*, and verbs active intransitive, as *to walk*, though *founded* in NATURE and TRUTH, is of little use in grammar. Indeed it would rather perplex than assist the learner; for the difference between verbs active and [verbs] neuter, as transitive and intransitive, is easy and obvious; but the difference between verbs absolutely neuter and [those which are] intransitively active is not always clear. But however these latter may differ in nature, the construction of them both is the same; and grammar is not so much concerned with their *real*, as with their *grammatical* properties.”—*Lowth’s Gram.*; p. 30. But are not “TRUTH, NATURE, and REALITY,” worthy to be preferred to any instructions that contradict them? If they are, the good doctor and his worthy copyist have here made an ill choice. It is not only for the sake of these properties, that I retain a distinction which these grammarians, and others above named, reject; but for the sake of avoiding the untruth, confusion, and absurdity, into which one must fall by calling all active-intransitive verbs *neuter*. The distinction of active verbs, as being either transitive or intransitive, is also necessarily retained. But the suggestion, that this distinction is more “*easy and obvious*”

OBS. 7.—The following note, from a book written on purpose to apply the principles of Murray's Grammar, and of Allen's, (the two best of the foregoing two dozen,) may serve as an offset to the reason above assigned for rejecting the class of active-intransitive verbs: "It is possible that some teachers may look upon the nice distinction here made, between the active *transitive* and the active *intransitive verbs*, as totally unnecessary. They may, perhaps, rank the latter with the neuter verbs. The author had his choice of difficulties: on the one hand, he was aware that his arrangement might not suit the views of the above-mentioned persons; and, on the other, he was so sensible of the inaccuracy of their system, and of its clashing with the definitions, as well as rules, laid down in almost every grammar, that he was unwilling to bring before the public a work containing so well-known and manifest an error. Of what use can Murray's definition of the *active* verb be, to one who endeavours to prove the propriety of thus assigning an epithet to the various parts of speech, in the course of parsing? He says, 'A verb active expresses an action, and necessarily implies an agent, and an object acted upon.' In the sentence, 'William hastens away,' the active intransitive verb *hastens* has indeed an *agent*, 'William,' but where is the *object*? Again, he says, 'Active verbs govern the objective case,' although it is clear it is not the *active* meaning of the verb which requires the objective case, but the *transitive*, and that only. He adds, 'A verb neuter expresses *neither action, nor passion*, but being, or a state of being;' and the accuracy of this definition is borne out by the assent of perhaps every other grammarian. If, with this clear and forcible definition before our eyes, we proceed to class *active* intransitive verbs with neuter verbs, and direct our pupils to prove such a classification by reciting Murray's definition of the *neuter* verb, we may indeed expect from a thinking pupil the remonstrance which was actually made to a teacher on that system, while parsing the verb '*to run*.' 'Sir,' asks the boy, 'does not *to run* imply action, for it always makes me perspire?'—*Nixon's English Parser*, p. 9.

---

than the other, is altogether an error. The really neuter verbs, being very few, occasion little or no difficulty. But very many active verbs, perhaps a large majority, are sometimes used intransitively; and of those which our lexicographers record as being always transitive, not a few are occasionally found without any object, either expressed or clearly suggested: as, "He *convinces*, but he does not *elevate nor animate*,"—*Blair's Rhet.*, p. 242. "The child *imitates*, and *commits* to memory; whilst the riper age *digests*, and thinks independently."—*Dr. Lieber, Lit. Conv.*, p. 313. Of examples like these, three different views maybe taken; and it is *very questionable* which is the right one: *First*, that these verbs are here *intransitive*, though they are not commonly so; *Second*, that they are *transitive*, and have objects understood; *Third*, that they are used *improperly*, because no determinate objects are given them. If we assume the second opinion or the last, the full or the correct expressions may be these: "He convinces *the judgement*, but he does not elevate *the imagination*, or animate *the feelings*."—"The child imitates *others*, and commits *words* to memory; whilst the riper age digests *facts or truths*, and thinks independently." These verbs are here transitive, but are they so above? Those grammarians who, supposing no other distinction important, make of verbs but two classes, transitive and intransitive, are still as much at variance, and as much at fault, as others, (and often more so,) when they come to draw the line of this distinction. To "*require*" an objective, to "*govern*" an objective, to "*admit*" an objective, and to "*have*" an objective, are criterions considerably different. Then it is questionable, whether infinitives, participles, or sentences, must or can have the effect of objectives. One author says, "If a verb has any objective case *expressed*, it is transitive: if it has none, it is intransitive. *Verbs which* appear transitive in their nature, may frequently be used intransitively."—*Chandler's Old Gram.*, p. 32; his *Common School Gram.*, p. 48. An other says, "A transitive verb *asserts* action which does or can, terminate on some object."—*Frazer's Gram.*, p. 29. An other avers, "There are two classes of verbs *perfectly distinct* from each other, viz: Those which *do*, and those which *do not*, govern an objective case." And his definition is, "A *Transitive Verb* is one which *requires* an *objective case* after it."—*Hart's E. Gram.*, p. 63. Both Frazer and Hart reckon the *passive* verb *transitive*! And the latter teaches, that, "*Transitive* verbs in English, are sometimes used *without an objective case*; as, The apple *tastes* sweet!"—*Hart's Gram.*, p. 73.

OBS. 8.—For the consideration of those classical scholars who may think we are bound by the authority of *general usage*, to adhere to the old division of verbs into active, passive, and neuter, it may be proper to say, that the distribution of the verbs in Latin, has been as much a matter of dispute among the great grammarians of that language, as has the distribution of English verbs, more recently, among ourselves; and often the points at issue were precisely the same.\* To explain here the different views of the very old grammarians, as Charisius, Donatus, Servius, Priscian; or even to notice the opinions of later critics, as Sanctius, Scioppius, Vossius, Perizonius; might seem perhaps a needless departure from what the student of mere English grammar is concerned to know. The curious, however, may find interesting citations from all these authors, under the corresponding head, in some of our Latin grammars. See *Prat's Grammatica Latina*, 8vo, London, 1722. It is certain that the division of *active* verbs, into *transitive* and *intransitive*—or, (what is the same thing,) into “*absolute* and *transitive*”—or, into “*immanent* and *transient*”—is of a very ancient date. The notion of calling *passive* verbs *transitive*, when used in their ordinary and proper construction, as some now do, is, I think, a *modern* one, and no small error.

OBS. 9.—Dr. Adam's distribution of verbs, is apparently the same as the first part of Murray's; and his definitions are also in nearly the same words. But he adds, “The verb *Active* is also called *Transitive*, when the action *passeth over* to the object, or hath an effect on some other thing; as, *scribo literas*, I write letters: but when the action is confined within the agent, and *passeth not over* to any object, it is called *Intransitive*; as, *ambulo*, I walk; *curro*, I run: ☞ which are likewise called *Neuter Verbs*.”—*Adam's Latin and English Gram.*, p. 79. But he had just before said, “A *Neuter* verb properly expresses neither action nor passion, but *simply the being, state, or condition* of things; as, *dormio*, I sleep; *sedeo*, I sit.”—*Ibid.* Verbs of motion or action, then, must needs be as improperly called neuter, in Latin, as in English. Nor is this author's arrangement orderly in other respects; for he treats of “*Deponent* and *Common Verbs*,” of “*Irregular Verbs*,” of “*Defective Verbs*,” and of “*Impersonal Verbs*,” none of which had he mentioned in his distribution. Nor are the late revisers of his grammar any more methodical.

OBS. 10.—The division of our verbs into *active-transitive*, *active-intransitive*, *passive*, and *neuter*, must be understood to have reference not only to their *signification* as of

---

\* In the hands of some gentlemen, “the Principles of Latin Grammar,” and “the Principles of English Grammar,”—are equally pliable, or changeable; and, what is very remarkable, a comparison of different editions will show, that the fundamental doctrines of a whole “Series of Grammars, English, Latin, and Greek,” may so change in a single lustrum, as to rest upon authorities altogether different. Dr. Bullions's grammars, a few years ago, like those of his great oracles, Adam, Murray, and Lennie, divided verbs into “three kinds, *Active*, *Passive*, and *Neuter*.” Now they divide them into two only, “*Transitive* and *Intransitive*,” and absurdly aver, that “*Verbs in the passive form are really transitive as in the active form*.”—*Prin. of E. Gram.*, 1843, p. 200. Now, as if no verb could be plural, and no transitive act could be future, conditional, in progress, or left undone, they define thus: “A *Transitive* verb expresses an *act done* by one person or thing to another.”—*Ib.*, p. 29; *Analyt. and Pract. Gram.*, 60; *Latin Gram.*, 77. Now, the division which so lately as 1842 was pronounced by the Doctor to be “more useful than any other,” and advantageously accordant with “most dictionaries of the English language,” (see his *Fourth Edition*, p. 30,) is wholly rejected from this notable “*Series*.” Now, the “*vexed question*” about “the classification of verbs,” which, at some revision still later, drew from this author whole pages of weak arguments for his faulty *changes*, is complacently supposed to have been *well settled* in his favour! Of this matter, now, in 1849, he speaks thus: “The division of verbs into transitive and intransitive has been so generally adopted and approved by the best grammarians, that any discussion of the subject is now unnecessary.”—*Bullions's Analyt. and Pract. Gram.*, p. 59.

themselves, but also to their *construction* with respect to the government of an objective word after them. The latter is in fact their most important distinction, though made *with reference* to a different part of speech. The classical scholar, too, being familiar with the forms of Latin and Greek verbs, will doubtless think it a convenience, to have the arrangement as nearly correspondent to those ancient forms, as the nature of our language will admit. This is perhaps the strongest argument for the recognition of the class of *passive verbs* in English. Some grammarians, choosing to parse the passive participle separately, reject this class of verbs altogether; and, forming their division of the rest with reference to the construction alone, make but two classes, *transitive* and *intransitive*. Such is the distribution adopted by C. Alexander, D. Adams, Bingham, Chandler, E. Cobb, Harrison, Nutting, and John Peirce; and supported also by some British writers, among whom are McCulloch and Grant. Such too was the distribution of Webster, in his Plain and Comprehensive Grammar, as published in 1800. He then taught: “We have no *passive* verb in the language; and those which are called *neuter* are mostly *active*.”—Page 14. But subsequently, in his Philosophical, Abridged, and Improved Grammars, he recognized “a more natural and comprehensive division” of verbs, “*transitive, intransitive, and passive*.”—*Webster’s Rudiments*, p. 20. This, in reality, differs but little from the old division into *active, passive, and neuter*. In some grammars of recent date, as Churchill’s, R. W. Bailey’s, J. R. Brown’s, Butler’s, S. W. Clark’s, Frazee’s, Hart’s, Hendrick’s, Perley’s, Pinneo’s, Weld’s, Wells’s, Mulligan’s, and the *improved* treatises of Bullions and Frost, verbs are said to be of *two* kinds only, *transitive* and *intransitive*; but these authors allow to transitive verbs a “passive form,” or “passive voice,”—absurdly making all passive verbs transitive, and all neuters intransitive, as if *action* were expressed by both. For this most faulty classification, Dr. Bullions pretends the authority of “Mr. Webster;” and Frazee, that of “Webster, Bullions, and others.”—*Frazee’s Gram.*, Ster. Ed., p. 30. But if Dr. Webster ever taught the absurd doctrine *that passive verbs are transitive*, he has contradicted it far too much to have any weight in its favour.

OBS. 11.—Dalton makes only two classes; and these he will have to be *active* and *passive*: an arrangement for which he might have quoted Scaliger, Sanctius, and Scioppius. Ash and Coar recognize but two, which they call *active* and *neuter*. This was also the scheme of Bullions, in his Principles of E. Gram., 4th Edition, 1842. Priestley and Maunder have two, which they call *transitive* and *neuter*; but Maunder, like some named above, will have transitive verbs to be susceptible of an active and a passive voice, and Priestley virtually asserts the same. Cooper, Day, Davis, Hazen, Hiley, Webster, Wells, (in his 1st Edition,) and Wilcox. have three classes; *transitive, intransitive, and passive*. Sanders’s Grammar has *three*; “*Transitive, Intransitive, and Neuter*,” and two voices, both *transitive*! Jaudon has four: *transitive, intransitive, auxiliary, and passive*. Burn has four; *active, passive, neuter, and substantive*. Cardell labours hard to prove that all verbs are *both active and transitive*; and for this, had he desired their aid, he might have cited several ancient authorities.\* Cutler avers, “*All verbs are active*,” yet he divides them “into *active transitive, active intransitive, and participial verbs*.”—*Grammar and Parser*, p. 31. Some grammarians, appearing to think all the foregoing modes of division useless,

---

\* This late writer seems to have published his doctrine on this point as a *novelty*; and several teachers ignorantly received and admired it as such: I have briefly shown, in the Introduction to this work, how easily they were deceived. “By this, that Question may be resolv’d, whether every Verb not Passive governs always an Accusative, at least understood: ‘Tis the Opinion of some very able GRAMMARIANS, but for *our* Parts *we* don’t think it.”—*Grammar published by John Brightland*, 7th Ed., London, 1746, p. 115.

attempt nothing of the kind. William Ward, in 1765, rejected all such classification, but recognized three voices; “Active, Passive, and Middle; as, *I call, I am called, I am calling.*” Farnum, in 1842, acknowledged the first two of these voices, but made no division of verbs into classes.

OBS. 12.—If we admit the class of *active-intransitive* verbs, that of verbs *neuter* will unquestionably be very small. And this refutes Murray’s objection, that the learner will “often” be puzzled to know which is which. Nor can it be of any consequence, if he happen in some instances to decide wrong. To *be*, to *exist*, to *remain*, to *seem*, to *lie*, to *sleep*, to *rest*, to *belong*, to *appertain*, and perhaps a few more, may best be called *neuter*; though some grammarians, as may be inferred from what is said above, deny that there are any neuter verbs in any language. “Verba Neutra, ait Sanctius, nullo pacto esse possunt; quia, teste Aristotele, omnis motus, actio, vel passio, nihil medium est.”—*Prat’s Latin Gram.*, p. 117. John Grant, in his Institutes of Latin Grammar, recognizes in the verbs of that language the distinction which Murray supposes to be so “very difficult” in those of our own; and, without falling into the error of Sanctius, or of Lily,\* respecting neuter verbs, judiciously confines the term to such as are neuter in reality.

OBS. 13.—Active-transitive verbs, in English, generally require, that the agent or doer of the action be expressed *before* them in the nominative case, and the object or receiver of the action, *after* them in the objective; as, “Cæsar *conquered* Pompey.” Passive verbs, which are never primitives, but always derived from active-transitive verbs, (in order to form sentences of like import from natural opposites in voice and sense,) reverse this order, change the cases of the nouns, and denote that the subject, named before them, is affected by the action; while the agent follows, being introduced by the preposition *by*: as, “Pompey *was conquered* by Cæsar.” But, as our passive verb always consists of two or more separable parts, this order is liable to be varied, especially in poetry; as,

“How many things *by season seasoned are*  
To their right praise and true perfection!”—*Shakspeare*.

“Experience *is by industry achieved*,  
And *perfected by* the swift *course* of time.”—*Id.*

OBS. 14.—Most active verbs may be used either transitively or intransitively. Active verbs are transitive whenever there is any person or thing expressed or clearly implied on which the action terminates; as, “I *knew* him well, and every truant *knew*.”—*Goldsmith*. When they do not govern such an object, they are intransitive, whatever may be their power on other occasions; as, “The grand elementary principles of pleasure, by which he *knows*, and *feels*, and *lives*, and *moves*.”—*Wordsworth’s Pref.*, p. xxiii. “The Father *originates* and *elects*. The Son *mediates* and *atones*. The Holy Spirit *regenerates* and *sanctifies*.”—*Gurney’s Portable Evidences*, p. 66. “Spectators *remark*, judges *decide*, parties

---

\* Upon this point, Richard Johnson cites and criticises Lily’s system thus: “A Verb Neuter endeth in *o* or *m*, and cannot take *r* to make *him* a Passive; as, *Curro*, I run; *Sum*, I am.”—*Grammar, Eng.* p. 13. This Definition, is founded upon the Notion abovementioned, viz. That none but Transitives are Verbs Active, which is contrary to the reason of Things, and the common sense of Mankind. And what can shock a Child more, of any Ingenuity, than to be told, That *Ambuto* and *Curro* are Verbs Neuter; that is, to speak according to the common Apprehensions of Mankind, that they signifie neither to do, nor suffer.”—*Johnson’s Grammatical Commentaries*, 8vo, London, 1706, p. 273.

*watch*.”—*Blair’s Rhet.*, p. 271. “In a sermon, a preacher *may explain, demonstrate, infer, exhort, admonish, comfort*.”—*Alexander’s E. Gram.*, p. 91.

OBS. 15.—Some verbs may be used in either an active or a neuter sense. In the sentence, “Here I rest,” *rest* is a neuter verb; but in the sentence, “Here I rest my hopes,” *rest* is an active-transitive verb, and governs *hopes*. And a few that are always active in a grammatical sense, as necessarily requiring an object after them, do not always indicate such an exertion of force as we commonly call *action*. Such perhaps are the verbs to *have*, to *possess*, to *owe*, to *cost*; as, “They *have* no wine.”—“The house *has* a portico.”—“The man *possesses* no real estate.”—“A son *owes* help and honour to his father.”—*Holyday*. “The picture *cost* a crown.”—*Wright*, p. 181. Yet possibly even these may be sometimes rather active-intransitive; as, “I can bear my part; ‘tis my occupation: *have* at it with you.”—*Shakspeare*. “Kings *have* to deal with their neighbours.”—*Bacon*. “She will let her instructions enter where folly now *possesses*.”—*Shakspeare*.

“Thou hast deserv’d more love than I can show;  
But ‘tis thy fate to give, and mine to *owe*.”—*Dryden*.

OBS. 16.—An active-intransitive verb, followed by a preposition and its object, will sometimes admit of being put into the passive form: the object of the preposition being assumed for the nominative, and the preposition itself being retained with the verb, as an adverb: as, (*Active*,) “They *laughed* at him.”—(*Passive*,) “He *was laughed at*.” “For some time the nonconformists *were connived at*.”—*Robertson’s America*, Vol. ii, p. 414. “Every man *shall be dealt* equitably with.”—*Butler’s Analogy*, p. 212. “If a church *would be looked up to*, it must stand high.”—*Parker’s Idea*, p. 15.

OBS. 17.—In some instances, what is commonly considered the active form of the verb, is used in a passive sense; and, still oftener, as we have no other passive form that so well denotes continuance, we employ the participle in *ing* in that sense also: as, “I’ll teach you all what’s *owing* to your Queen.”—*Dryden*. That is—what is *due*, or *owed*. “The books continue *selling*; i.e. *upon the sale*, or *to be sold*.”—*Priestley’s Gram.*, p. 111. “So we say the brass is *forging*; i.e. *at the forging*, or *in [being forged]*.”—*Ib.* “They are to *blame*; i.e. to *be blamed*.”—*Ib.* Hence some grammarians seem to think, that in our language the distinction between active and passive verbs is of little consequence: “Mr. Grant, however, observes, p. 65, ‘The component parts of the English verb, or name of action, are few, simple, and natural; they, consist of three words, as *plough, ploughing, ploughed*. Now these words, and their inflections, may be employed either actively or passively. Actively, ‘They *plough* the fields; they *are ploughing* the fields; they *ploughed*, or *have ploughed*, the fields.’ Passively, ‘The fields *plough* well; the fields *are ploughing*; the fields *are ploughed*.’ This passive use of the present tense and participle is, however, restricted to what he denominates ‘verbs of *external, material, or mechanical action*;’ and not to be extended to verbs of *sensation* and *perception*; e.g. *love, feel, see, &c.*”—*Nutting’s Gram.*, p. 40.

#### MODIFICATIONS.

Verbs have modifications of four kinds; namely, *Moods, Tenses, Persons* and *Numbers*.

## MOODS.

Moods \* are different forms of the verb, each of which expresses the being, action, or passion, in some particular manner.

There are five moods; the *Infinitive*, the *Indicative*, the *Potential*, the *Subjunctive*, and the *Imperative*.

The *Infinitive mood* is that form of the verb, which expresses the being, action, or passion, in an unlimited manner, and without person or number: as, “To *die*,—to *sleep*;—To *sleep*!—perchance, to *dream*!”

The *Indicative mood* is that form of the verb, which simply indicates or declares a thing: as, I *write*; you *know*: or asks a question; as, “Do you *know*?”—“*Know* ye not?”

The *Potential mood* is that form of the verb which expresses the power, liberty, possibility, or necessity, of the being, action, or passion: as, “I *can walk*; he *may ride*; we *must go*.”

The *Subjunctive mood* is that form of the verb, which represents the being, action, or passion, as conditional, doubtful, and contingent: as, “If thou *go*, see that thou *offend* not.”—“See thou *do* it not.”—*Rev.*, xix, 10.

The *Imperative mood* is that form of the verb which is used in commanding, exhorting, entreating, or permitting: as, “*Depart* thou.”—“*Be comforted*.”—“*Forgive* me.”—“*Go* in peace.”

## OBSERVATIONS.

OBS. 1.—The *Infinitive* mood is so called in opposition to the other moods, in which the verb is said to be *finite*. In all the other moods, the verb has a strict connexion, and necessary agreement in person and number, with some subject or nominative, expressed or understood; but the infinitive is the mere verb, without any such agreement, and has no power of completing sense with a noun. In the nature of things, however, all being, action, or passion, not contemplated abstractly as a *thing*, belongs to something that is, or acts, or is acted upon. Accordingly infinitives have, in most instances, a *reference* to some subject of this kind; though their grammatical dependence connects them more frequently with some other term. The infinitive mood, in English, is distinguished by the preposition to; which, with a few exceptions, immediately precedes it, and may be said to govern it. In dictionaries, and grammars, *to* is often used as a mere *index*, to distinguish verbs from the other parts of speech. But this little word has no more claim to be ranked as a part of the verb, than has the conjunction *if*, which is the sign of the subjunctive. It is the nature of a preposition, to show the relation of different things, thoughts, or words, to each other; and

---

\* Murray says, “*Mood* or *Mode* is a particular form of the verb, showing the manner in which the being, action, or passion is represented.”—*Octavo Gram.*, p. 63. By many grammarians, the term *Mode* is preferred to *Mood*; but the latter is, for this use, the more distinctive, and by far the more common word. In some treatises on grammar, as well as in books of logic, certain *parts of speech*, as *adjectives* and *adverbs*, are called *Modes*, because they qualify or modify other terms. E.g., “Thus all the parts of speech are reducible to four; viz., *Names, Verbs, Modes, Connectives*.”—*Enclytica*, or *Universal Gram.*, p. 8. “*Modes* are naturally divided, by their attribution to names or verbs, into *adnames* and *adverbs*.”—*Ibid.*, p. 24. After making this application of the name *modes*, was it not improper for the learned author to call the moods also “modes?”

this “sign of the infinitive” may well be pursued separately as a preposition, since in most instances it manifestly shows the relation between the infinitive verb and some other term. Besides, by most of our grammarians, the present tense of the infinitive mood is declared to be the *radical form* of the verb; but this doctrine must be plainly untrue, upon the supposition that this tense is a compound.

OBS. 2.—The *Indicative* mood is so called because its chief use is, to *indicate*, or declare positively, whatever one wishes to say. It is that form of the verb, which we always employ when we affirm or deny any thing in a direct and independent manner. It is more frequently used, and has a greater number of tenses, than any other mood; and is also, in our language, the only one in which the principal verb is varied in termination. It is not, however, on all occasions, confined to its primary use; else it would be simply and only declarative. But we use it sometimes interrogatively, sometimes conditionally; and each of these uses is different from a simple declaration. Indeed, the difference between a question and an assertion is practically very great. Hence some of the old grammarians made the form of inquiry a separate mood, which they called the *Interrogative Mood*. But, as these different expressions are distinguished, not by any difference of form in the verb itself, but merely by a different order, choice, or delivery of the words, it has been found most convenient in practice, to treat them as one mood susceptible of different senses. So, in every conditional sentence, the *prot’asis*, or condition, differs considerably from the *apod’osis*, or principal clause, even where both are expressed as facts. Hence some of our modern grammarians, by the help of a few connectives, absurdly merge a great multitude of Indicative or Potential expressions in what they call the *Subjunctive Mood*. But here again it is better to refer still to the Indicative or Potential mood whatsoever has any proper sign of such mood, even though it occur in a dependent clause.

OBS. 3.—The *Potential* mood is so called because the leading idea expressed by it, is that of the *power* of performing some action. This mood is known by the signs *may*, *can*, *must*, *might*, *could*, *would*, and *should*. Some of these auxiliaries convey other ideas than that of power in the agent; but there is no occasion to explain them severally here. The potential mood, like the indicative, may be used in asking a question; as, “*Must I budge? must I observe you? must I stand and crouch under your testy humour?*”—*Shakspeare*. No question can be asked in any other mood than these two. By some grammarians, the potential mood has been included in the subjunctive, because its meaning is often expressed in Latin by what in that language is called the subjunctive. By others, it has been entirely rejected, because all its tenses are compound, and it has been thought the words could as well be parsed separately. Neither of these opinions is sufficiently prevalent, or sufficiently plausible, to deserve a laboured refutation. On the other hand, James White, in his *Essay on the English Verb*, (London, 1761,) divided this mood into the following five: “the *Elective*,” denoted by *may* or *might*; “the *Potential*,” by *can* or *could*; “the *Determinative*” by *would*; “the *Obligative*,” by *should*; and “the *Compulsive*,” by *must*. Such a distribution is needlessly minute. Most of these can as well be spared as those other “moods, *Interrogative*, *Optative*, *Promissive*, *Hortative*, *Precative*, &c.”, which Murray mentions only to reject. See his *Octavo Gram.*, p. 68.

OBS. 4.—The *Subjunctive* mood is so called because it is always *subjoined* to an other verb. It usually denotes some doubtful contingency, or some supposition contrary to fact. The manner of its dependence is commonly denoted by one of the following conjunctions; *if*, *that*, *though*, *lest*, *unless*. The indicative and potential moods, in all their tenses, may be used in the same dependent manner, to express any positive or potential condition; but

this seems not to be a sufficient reason for considering them as parts of the subjunctive mood. In short, the idea of a “subjunctive mood in the indicative form,” (which is adopted by Chandler, Frazee, Fisk, S. S. Greene, Comly, Ingersoll, R. C. Smith, Sanborn, Mack, Butler, Hart, Weld, Pinneo, and others,) is utterly inconsistent with any just notion of what a mood is; and the suggestion, which we frequently meet with, that the regular indicative or potential mood may be *thrown into the subjunctive* by merely prefixing a conjunction, is something worse than nonsense. Indeed, no mood can ever be made *a part of an other*, without the grossest confusion and absurdity. Yet, strange as it is, some celebrated authors, misled by an *if*, have tangled together three of them, producing such a snarl of tenses as never yet can have been understood without being thought ridiculous. See *Murray’s Grammar*, and others that agree with his late editions.

OBS. 5.—In regard to the number and form of the tenses which should constitute the *subjunctive mood* in English, our grammarians are greatly at variance; and some, supposing its distinctive parts to be but elliptical forms of the indicative or the potential,\* even deny the existence of such a mood altogether. On this point, the instructions published by Lindley Murray, however commended and copied, are most remarkably vague and inconsistent.† The early editions of his Grammar gave to this mood *six tenses*, none of which had any of the personal inflections; consequently there was, in all the tenses, *some difference* between it and the indicative. His later editions, on the contrary, make the subjunctive exactly like the indicative, except in the present tense, and in the choice of auxiliaries for the second-future. Both ways, he goes too far. And while at last he restricts the *distinctive form* of the subjunctive to narrower bounds than he ought, and argues against, “If thou *loved*, If thou *knew*,” &c., he gives to this mood not only the last five tenses of the indicative, but also all those of the potential, with its multiplied auxiliaries; alleging, “that as the indicative mood *is converted* into the subjunctive, by the expression of a condition, motive, wish, supposition, &c.‡ being superadded to it, so the potential mood may, in like manner, *be turned into* the subjunctive.”—*Octavo Gram.*, p. 82. According to this, the subjunctive mood of every regular verb embraces, in one voice, as many as one hundred and thirty-eight different expressions; and it may happen, that in one single tense a verb shall have no fewer than fifteen different forms in each person and

\* “We have, in English, no genuine subjunctive mood, except the preterimperfect, if I *were*, if thou *wert*, &c. of the verb *to be*. [See Notes and Observations on the Third Example of Conjugation, in this chapter.] The phrase termed *the subjunctive mood*, is elliptical; *shall*, *may*, &c. being understood: as, ‘Though hand (shall) join in hand, the wicked shall not be unpunished.’ ‘If it (may) be possible, live peaceably with all.’ Scriptures.”—*Rev. W. Allen’s Gram.*, p. 61. Such expressions as, “If thou *do love*, If he *do love*,” appear to disprove this doctrine. [See Notes and Remarks on the Subjunctive of the First Example conjugated below.]

† “Mr. Murray has changed his opinion, as often as Laban changed Jacob’s wages. In the edition we print from, we find *shall* and *will* used in each person of the *first* and *second* future tenses of the subjunctive, but he now states that in the second future tense, *shalt*, *shall*, should be used instead of *wilt*, *will*. Perhaps this is *the only improvement* he has made in his Grammar since 1796.”—*Rev. T. Smith’s Edition of Lindley Murray’s English Grammar*, p. 67.

‡ Notwithstanding this expression, Murray did not teach, as do many modern grammarians, that *inflected* forms of the present tense, such as, “If he *thinks* so,” “Unless he *deceives* me,” “If thou *lov’st* me,” are of the subjunctive mood; though, when he rejected his changeless forms of the other tenses of this mood, he *improperly* put as many indicatives in their places. With him, and his numerous followers, the ending determines the mood in one tense, while the conjunction controls it in the other five! In his syntax, he argues, “that in cases wherein contingency and futurity do not occur, it is not proper to turn the verb from its signification of present time, *nor to vary* [he means, *or to forbear to change*] its form or termination.

☞ *The verb would then be in the indicative mood, whatever conjunctions might attend it.*—*L. Murray’s Gram.*, 8vo, p. 208: 12mo, p. 167.

number. Six times fifteen are ninety; and so many are the several phrases which now compose Murray's pluperfect tense of the subjunctive mood of the verb *to strow*—a tense which most grammarians very properly reject as needless! But this is not all. The scheme not only confounds the moods, and utterly overwhelms the learner with its multiplicity, but condemns as bad English what the author himself once adopted and taught for the imperfect tense of the subjunctive mood, "If thou *loved*, If thou *knew*," &c., wherein he was sustained by Dr. Priestley, by Harrison, by Caleb Alexander, by John Burn, by Alexander Murray, the schoolmaster, and by others of high authority. Dr. Johnson, indeed, made the preterit subjunctive like the indicative; and this may have induced the author to change his plan, and inflect this part of the verb with *st*. But Dr. Alexander Murray, a greater linguist than either of them, very positively declares this to be wrong: "When such words as *if*, *though*, *unless*, *except*, *whether*, and the like, are used before verbs, they lose their terminations of *est*, *eth*, and *s*, in those persons which commonly have them. No speaker of good English, expressing himself conditionally, says, Though thou *fallest*, or Though he *falls*, but, Though thou *fall*, and Though he *fall*; nor, Though thou *camest*, but, Though, or although, thou *came*."—*History of European Languages*, Vol. i, p. 55.

OBS. 6.—Nothing is more important in the grammar of any language, than a knowledge of the *true forms* of its verbs. Nothing is more difficult in the grammar of our own, than to learn, in this instance and some others, what forms we ought to prefer. Yet some authors tell us, and Dr. Lowth among the rest, that our language is wonderfully simple and easy. Perhaps it is so. But do not its "simplicity and facility" appear greatest to those who know least about it?—i.e., least of its grammar, and least of its history? In citing a passage from the eighteenth chapter of Ezekiel, Lord Kames has taken the liberty to change the word *hath* to *have* seven times in one sentence. This he did, upon the supposition that the subjunctive mood has a perfect tense which differs from that of the indicative; and for such an idea he had the authority of Dr. Johnson's Grammar, and others. The sentence is this: "But if he *be* a robber, a shedder of blood; if he *have* eaten upon the mountains, and defiled his neighbour's wife; if he *have* oppressed the poor and needy, *have* spoiled by violence, *have* not restored the pledge, *have lift* up his eyes to idols, *have* given forth upon usury, and *have* taken increase: shall he live? he shall not live."—*Elements of Criticism*, Vol. ii, p. 261. Now, is this good English, or is it not? One might cite about half of our grammarians in favour of this reading, and the other half against it; with Murray, the most noted of all, first on one side, and then on the other. Similar puzzles may be presented concerning three or four other tenses, which are sometimes ascribed, and sometimes denied, to this mood. It seems to me, after much examination, that the subjunctive mood in English should have *two tenses*, and no more; the *present* and the *imperfect*. The present tense of this mood naturally implies contingency and futurity, while the imperfect here becomes an *aorist*, and serves to suppose a case as a mere supposition, a case contrary to fact. Consequently the foregoing sentence, if expressed by the subjunctive at all, ought to be written thus: "But if he *be* a robber, a shedder of blood; if he *eat* upon the mountains, and *defile* his neighbour's wife; if he *oppress* the poor and needy, *spoil* by violence, *restore* not the pledge, *lift* up his eyes to idols, *give* forth upon usury, and *take* increase; shall he live? he shall not live."

OBS. 7.—"Grammarians *generally* make a present and a past time under the subjunctive mode."—*Cobbett's E. Gram.*, ¶ 100. These are the tenses which are given to the subjunctive by *Blair*, in his "*Practical Grammar*." If any one will give to this mood *more* tenses than these, the five which are adopted by *Staniford*, are perhaps the least

objectionable: namely, "*Present*, If thou love, or do love; *Imperfect*, If thou loved, or did love; *Perfect*, If thou have loved; *Pluperfect*, If thou had loved; *Future*, If thou should or would love."—*Staniford's Gram.*, p. 22. But there are no sufficient reasons for even this extension of its tenses.—Fisk, speaking of this mood, says: "Lowth restricts it entirely to the present tense."—"Uniformity on this point is highly desirable."—"On this subject, we adopt the opinion of Dr. Lowth."—*English Grammar Simplified*, p. 70. His desire of uniformity he has both heralded and backed by a palpable misstatement. The learned Doctor's subjunctive mood, in the second person singular, is this: "*Present time*. THOU love; AND, Thou *mayest* love. *Past time*. Thou *mightest* love; AND, Thou *couldst*, &c. love; and have loved."—*Lowth's Gram.*, p. 38. But Fisk's subjunctive runs thus: "*Indic. form*, If thou lovest; *varied form*, If thou love." And again: "*Present tense*, If thou art, If thou be; *Imperfect tense*, If thou wast, If thou wert."—*Fisk's Grammar Simplified*, p. 70. His very definition of the subjunctive mood is illustrated *only by the indicative*; as, "If thou *walkest*."—"I will perform the operation, if he *desires* it."—*Ib.*, p. 69. Comly's subjunctive mood, except in some of his early editions, stands thus: "*Present tense*, If thou lovest; *Imperfect tense*, If thou lovedst or loved; *First future tense*, If thou (shalt) love."—*Eleventh Ed.*, p. 41. This author teaches, that the indicative or potential, when preceded by an *if*, "should be *parsed* in the subjunctive mood."—*Ib.*, p. 42. Of what is in fact the true subjunctive, he says: "*Some writers* use the singular number in the present tense of the subjunctive mood, without any variation; as, 'if I *love*, if thou *love*, if he *love*.' But this usage *must be ranked amongst the anomalies* of our language."—*Ib.*, p. 41. Cooper, in his pretended "*Abridgment of Murray's Grammar, Philad.*, 1828," gave to the subjunctive mood the following form, which contains all six of the tenses: "2d pers. If thou love, If thou do love, If thou loved, If thou did love, If thou have loved, If thou had loved, If thou shall (or will) love, If thou shall (or will) have loved." This is almost exactly what Murray at first adopted, and afterwards rejected; though it is probable, from the abridger's preface, that the latter was ignorant of this fact. Soon afterwards, a perusal of Dr. Wilson's Essay on Grammar dashed from the reverend gentleman's mind the whole of this fabric; and in his "Plain and Practical Grammar, Philad., 1831," he acknowledges but four moods, and concludes some pages of argument thus: "From the above considerations, it will appear *to every sound grammarian*, that our language does not admit a subjunctive mode, at least, separate and distinct from the indicative and potential."—*Cooper's New Gram.*, p. 63.

OBS. 8.—The true *Subjunctive* mood, in English, is virtually rejected by some later grammarians, who nevertheless acknowledge under that name a greater number and variety of forms than have ever been claimed for it in any other tongue. All that is peculiar to the Subjunctive, all that should constitute it a distinct mood, they represent as an archaism, an obsolete or antiquated mode of expression, while they willingly give to it every form of both the indicative and the potential, the two other moods which sometimes follow an *if*. Thus Wells, in his strange entanglement of the moods, not only gives to the subjunctive, as well as to the indicative, a "Simple" or "Common Form," and a "Potential Form;" not only recognizes in each an "Auxiliary Form," and a "Progressive Form;" but encumbers the whole with distinctions of style,—with what he calls the "Common Style," and the "Ancient Style;" or the "Solemn Style," and the "Familiar Style;" yet, after all, his own example of the Subjunctive, "Take heed, lest any man *deceive* you," is obviously different from all these, and not explainable under any of his paradigms! Nor is it truly consonant with any part of his theory, which is this: "The subjunctive of all verbs except *be*, takes *the same form as the indicative*. Good writers were formerly much accustomed to *drop* the personal termination in the *subjunctive present*, and write 'If he *have*,' 'If he *deny*,' etc., for 'If he *has*,' 'If he *denies*,' etc.; but this termination is now *generally*

*retained*, unless *an auxiliary is understood*. Thus, 'If he *hear*,' may properly be used for 'If he *shall hear*' or 'If he *should hear*,' but not for 'If he *hears*.'"—*Wells's School Gram.*, 1st Ed., p. 83; 3d Ed., p. 87. Now every position here taken is demonstrably absurd. How could "good writers" indite "much" bad English by *dropping* from the subjunctive an indicative ending which never belonged to it? And how can a needless "auxiliary" be "*understood*," on the principle of equivalence, where, by awkwardly changing a mood or tense, it only helps some grammatical theorist to convert good English into bad, or to pervert a text? The phrases above may all be right, or all be wrong, according to the correctness or incorrectness of their application: when each is used as best it may be, there is no exact equivalence. And this is true of half a dozen more of the same sort; as, "If he *does hear*,"—"If he *do hear*,"—"If he is *hearing*,"—"If he *be hearing*,"—"If he *shall be hearing*,"—"If he *should be hearing*."

OBS. 9.—Similar to Wells's, are the subjunctive forms of Allen H. Weld. Mistaking *annex* to signify *prefix*, this author teaches thus: "ANNEX *if, though, unless, suppose, admit, grant, allow*, or any word implying a *condition*, to each tense of the *Indicative and Potential modes*, to form the subjunctive; as, If thou lovest or love. If he loves, or love. Formerly it was customary to *omit the terminations* in the second and third persons of the present tense of the Subjunctive mode. But now the terminations are *generally retained*, except when the ellipsis of *shall* or *should* is implied; as, If he obey, i. e., if he *shall*, or *should* obey."—*Weld's Grammar, Abridged Edition*, p. 71. Again: "*In general*, the form of the verb in the Subjunctive, *is the same as that of the Indicative*; but an *elliptical form* in the second and third *person* [persona] singular, is used in the following instances: (1.) *Future contingency* is expressed by the *omission of the Indicative termination*; as, If he go, for, if he *shall* go. Though he slay me, i.e., though he *should* slay me. (2.) *Lest* and *that* annexed to a command are followed by the *elliptical form* of the Subjunctive; as, Love not sleep [,] lest thou *come* to poverty. (3.) *If* with *but* following it, when futurity is denoted, requires the *elliptical form*; as, If he *do* but *touch* the hills, they shall smoke."—*Ib.*, p. 126. As for this scheme, errors and inconsistencies mark every part of it. First, the rule for forming the subjunctive is false, and is plainly contradicted *by all that is true* in the examples: "*If thou love*," or, "*If he love*" contains not the form of the indicative. Secondly, no terminations have ever been "generally" omitted from, or retained in, the form of the subjunctive present; because that part of the mood, as commonly exhibited, is well known to be made of the *radical verb*, without inflection. One might as well talk of suffixes for the imperative, "*Love* thou," or "*Do* thou love." Thirdly, *shall* or *should* can never be really implied in the subjunctive present; because the supposed ellipsis, needless and unexampled, would change the tense, the mood, and commonly also the meaning. "If he *shall*," properly implies a condition of *future certainty*; "If he *should*," a supposition of *duty*: the true subjunctive suggests neither of these. Fourthly, "the ellipsis of *shall*, or *should*," is most absurdly called above, "the omission of the *Indicative termination*." Fifthly, it is very strangely supposed, that to omit what pertains to the *indicative* or the *potential* mood, will produce an "elliptical form of *the Subjunctive*." Sixthly, such examples as the last, "If he *do* but *touch* the hills," having the auxiliary *do* not inflected as in the indicative, disprove the whole theory.

OBS. 10.—In J. B. Chandler's grammars, are taken nearly the same views of the "Subjunctive or Conditional Mood," that have just been noticed. "This mood," we are told, "is *only* the indicative *or* potential mood, with the word *if* placed before the nominative case."—*Gram.* of 1821, p. 48; *Gram.* of 1847, p. 73. Yet, of even *this*, the author has said, in the former edition, "It would, perhaps, be *better to abolish the use* of the subjunctive

mood entirely. *Its use* is a continual source of dispute among grammarians, and of perplexity to scholars.”—Page 33. The suppositive verb *were*,—(as, “*Were* I a king,”—“If I *were* a king,”—) which this author formerly rejected, preferring *was*, is now, after six and twenty years, replaced in his own examples; and yet he still attempts to *disgrace it*, by falsely representing it as being only “the indicative *plural*” very grossly misapplied! See *Chandler’s Common School Gram.*, p. 77.

OBS. 11.—The *Imperative* mood is so called because it is chiefly used in *commanding*. It is that brief form of the verb, by which we directly urge upon others our claims and wishes. But the nature of this urging varies according to the relation of the parties. We command inferiors; exhort equals; entreat superiors; permit whom we will;—and all by this same imperative form of the verb. In answer to a request, the imperative implies nothing more than permission. The will of a superior may also be urged imperatively by the indicative, future. This form is particularly common in solemn prohibitions; as, “Thou *shalt not kill*. \* \* \* Thou *shalt not steal*.”—*Exodus*, xx, 13 and 15. Of the ten commandments, eight are negative, and all these are indicative in form. The other two are in the imperative mood: “*Remember* the sabbath day to keep it holy. *Honour* thy father and thy mother.”—*Ib*. But the imperative form may also be negative: as, “*Touch not; taste not; handle not*.”—*Colossians*, ii, 21.

### TENSES.

Tenses are those modifications of the verb, which distinguish time. There are six tenses; the *Present*, the *Imperfect*, the *Perfect*, the *Pluperfect*, the *First-future*, and the *Second-future*.

The *Present tense* is that which expresses what *now exists*, or *is taking* place: as, “I *hear* a noise; somebody *is coming*.”

The *Imperfect tense* is that which expresses what *took place*, or *was occurring*, in time fully past: as, “I *saw* him yesterday, and *hailed* him as he *was passing*.”

The *Perfect tense* is that which expresses what *has taken* place, within some period of time not yet fully past: as, “I *have seen* him to-day; something *must have detained* him.”

The *Pluperfect tense* is that which expresses what *had taken* place, at some past time mentioned: as, “I *had seen* him, when I met you.”

The *First-future tense* is that which expresses what *will take* place hereafter: as, “I *shall see* him again, and I *will inform* him.”

The *Second-future tense* is that which expresses what *will have taken* place, at some future time mentioned: as, “I *shall have seen* him by tomorrow noon.”

### OBSERVATIONS.

OBS. 1.—The terms here defined are the names usually given to those parts of the verb to which they are in this work applied; and though some of them are not so strictly appropriate as scientific names ought to be, it is thought inexpedient to change them. In many old grammars, and even in the early editions of Murray, the three past tenses are called the *Preterimperfect*, *Preterperfect*, and *Preterpluperfect*. From these names, the term

*Preter*, (which is from the Latin preposition *præter*, meaning *beside*, *beyond*, or *past*,) has been well dropped for the sake of brevity.\*

OBS. 2.—The distinctive epithet *Imperfect*, or *Preterimperfect*, appears to have been much less accurately employed by the explainers of our language, than it was by the Latin grammarians from whom it was borrowed. That tense which passes in our schools for the *Imperfect*, (as, I *slept*, *did sleep*, or *was sleeping*,) is in fact, so far as the indicative mood is concerned, *more completely past*, than that which we call the *Perfect*. Murray indeed has attempted to show that the name is right; and, for the sake of consistency, one could wish he had succeeded. But every scholar must observe, that the simple preterit, which is the first form of this tense, and is never found in any other, as often as the sentence is declarative, tells what *happened* within some period of time *fully past*, as *last week*, *last year*; whereas the perfect tense is used to express what *has happened* within some period of time *not yet fully past*, as *this week*, *this year*. As to the completeness of the action, there is no difference; for what *has been done* to-day, is as *completely done*, as what *was achieved* a year ago. Hence it is obvious that the term *Imperfect* has no other applicability to the English tense so called, than what it may have derived from the participle in *ing*, which we use in translating the Latin imperfect tense: as, *Dormiebam*, *I was sleeping*; *Legebam*, *I was reading*; *Docebam*, *I was teaching*. And if for this reason the whole English

---

\* Some grammarians—(among whom are Lowth, Dalton, Cobbett, and Cardell—) recognize only three tenses, or “*times*,” of English verbs; namely, *the present*, *the past*, and *the future*. A few, like Latham and Child, denying all the compound tenses to be tenses, acknowledge only the first two, *the present* and *the past*; and these they will have to consist only of the simple or radical verb and the simple preterit. Some others, who acknowledge six tenses, such as are above described, have endeavoured of late to *change the names* of a majority of them; though with too little agreement among themselves, as may be seen by the following citations: (1.) “We have six tenses; three, the *Present*, *Past*, and *Future*, to represent time in a general way; and three, the *Present Perfect*, *Past Perfect*, and *Future Perfect*, to represent the precise time of *finishing* the action.”—*Perley’s Gram.*, 1834, p. 25. (2.) “There are six tenses; the *present*, the *past*, the *present-perfect*, the *past-perfect*, the *future*, and the *future-perfect*.”—*Hiley’s Gram.*, 1840, p. 28. (3.) “There are six tenses; the *Present* and *Present Perfect*, the *Past* and *Past Perfect*, and the *Future* and *Future Perfect*.”—*Farnum’s Gram.*, 1842, p. 34. (4.) “The names of the tenses will then be, *Present*, *Present Perfect*; *Past*, *Past Perfect*; *Future*, *Future Perfect*. They are *usually* named as follows: *Present*, *Perfect*, *Imperfect*, *Pluperfect*, *Future*, *Second Future*.”—*N. Butler’s Gram.*, 1845, p. 69. (5.) “We have six tenses;—the *present*, the *past*, the *future*, the *present perfect*, the *past perfect*, and the *future perfect*.”—*Wells’s School Gram.*, 1846, p. 82. (6.) “The tenses in English are six—the *Present*, the *Present-perfect*, the *Past*, the *Past-perfect*, the *Future*, and the *Future-perfect*.”—*Bullions’s Gram.*, 1849, p. 71. (7.) “Verbs have *Six Tenses*, called the *Present*, the *Perfect-Present*, the *Past*, the *Perfect-Past*, the *Future*, and the *Perfect-Future*.”—*Spencer’s Gram.*, 1852, p. 53. (8.) “There are six tenses: the *present*, *past*, *future*, *present perfect*, *past perfect*, and *future perfect*.”—*Covell’s Gram.*, 1853, p. 62. (9.) “The tenses are—the *present*, the *present perfect*; the *past*, the *past perfect*; the *future*, the *future perfect*.”—*S. S. Greene’s Gram.*, 1853, p. 65. (10.) “There are six tenses; *one present*, and *but one, three past*, and *two future*.” They are named thus: “*The Present, the First Past, the Second Past, the Third Past, the First Future, the Second Future*.”—“For the sake of symmetry, to call *two* of them *present*, and *two* only *past*, while *one* only is *present*, and *three* are *past* tenses, is to sacrifice truth to beauty.”—*Pinneo’s Gram.*, 1853, pp. 69 and 70. “The old names, *imperfect*, *perfect*, and *pluperfect*,” which, in 1845, Butler justly admitted to be the *usual* names of the three past tenses. Dr. Pinneo, who dates his copy-right from 1850, most unwarrantably declares to be “*now generally discarded*!”—*Analytical Gram.*, p. 76; *Same Revised*, p. 81. These terms, still predominant in use, he strangely supposes to have been suddenly superseded by others which are no better, if so good: imagining that the scheme which Perley or Hiley introduced, of “*two present, two past*, and *two future* tenses,”—a scheme which, he says, “has no foundation in truth, and is therefore to be rejected,”—had prepared the way for the above-cited innovation of his own, which merely presents the old ideas under new terms, or terms partly new, and wholly unlikely to prevail. William Ward, one of the ablest of our old grammarians, rejecting in 1765 the two terms *imperfect* and *perfect*, adopted others which resemble Pinneo’s; but few, if any, have since named the tenses as he did, thus: “*The Present, the First Preterite, the Second Preterite, the Pluperfect, the First Future, the Second Future*.”—*Ward’s Gram.*, p. 47.

tense, with all its variety of forms in the different moods, “may, with propriety, be denominated *imperfect*,” surely, the participle itself should be so denominated *a fortiori*: for it always conveys this same idea, of “*action not finished*,” be the tense of its accompanying auxiliary what it may.

OBS. 3.—The tenses do not all express time with equal precision; nor can the whole number in any language supersede the necessity of adverbs of time, much less of dates, and of nouns that express periods of duration. The tenses of the indicative mood, are the most definite; and, for this reason, as well as for some others, the explanations of all these modifications of the verb, are made with particular reference to that mood. Some suppose the compound or participial form, as *I am writing*, to be more definite in time, than the simple form, as *I write*, or the emphatic form, as *I do write*; and accordingly they divide all the tenses into *Indefinite* and *Definite*. Of this division Dr. Webster seems to claim the invention; for he gravely accuses Murray of copying it unjustly from him, though the latter acknowledges in a note upon his text, it “is, *in part*, taken from Webster’s Grammar.”—*Murray’s Octavo Gram.*, p. 73. The distribution, as it stands in either work, is not worth quarrelling about: it is evidently more cumbersome than useful. Nor, after all, is it true that the compound form is more definite in time than the other. For example; “Dionysius, tyrant of Syracuse, *was always betraying* his unhappiness.”—*Art of Thinking*, p. 123. Now, if *was betraying* were a more definite tense than *betrayed*, surely the adverb “*always*” would require the latter, rather than the former.

OBS. 4.—The present tense, of the indicative mood, expresses not only what is now actually going on, but general truths, and customary actions: as, “Vice *produces* misery.”—“He *hastens* to repent, who *gives* sentence quickly.”—*Grant’s Lat. Gram.*, p. 71. “Among the Parthians, the signal *is given* by the drum, and not by the trumpet.”—*Justin*. Deceased authors may be spoken of in the present tense, because they seem to live in their works; as, “Seneca *reasons* and *moralizes* well.”—*Murray*. “Women *talk* better than men, from the superior shape of their tongues: an ancient writer *speaks* of their loquacity three thousand years ago.”—*Gardiner’s Music of Nature*, p. 27.

OBS. 5.—The text, John, viii, 58, “Before Abraham *was*, I *am*,” is a literal Grecism, and not to be cited as an example of pure English: our idiom would seem to require, “Before Abraham *was*, I *existed*.” In animated narrative, however, the present tense is often substituted for the past, by the figure *enallage*. In such cases, past tenses and present may occur together; because the latter are used merely to bring past events more vividly before us: as, “Ulysses *wakes*, not knowing where he *was*.”—*Pope*. “The dictator *flies* forward to the cavalry, beseeching them to dismount from their horses. They *obeyed*; they *dismount*, *rush* onward, and for vancouriers *show* their bucklers.”—*Livy*. On this principle, perhaps, the following couplet, which Murray condemns as bad English, may be justified:—

“Him portion’d maids, apprentic’d orphans blest,  
The young who *labour*, and the old who *rest*.” See *Murray’s Key*, R. 13.

OBS. 6.—The present tense of the subjunctive mood, and that of the indicative when preceded by *as soon as*, *after*, *before*, *till*, or *when*, is generally used with reference to future time; as, “If he *ask* a fish, will he give him a serpent?”—*Matt.*, vii, 10. “If I *will* that he *tarry* till I *come*, what is that to thee? Follow thou me.”—*John*, xxi, 22. “When he *arrives*, I will send for you.” The imperative mood has but one tense, and that is always

present with regard to the giving of the command; though what is commanded, must be done in the future, if done at all. So the subjunctive may convey a present supposition of what the will of an other may make uncertain: as, “If thou *count* me therefore a partner, *receive* him as myself.”—*St. Paul to Philemon*, 17. The perfect indicative, like the present, is sometimes used with reference to time that is relatively future; as, “He will be fatigued before he *has walked* a mile.”—“My lips shall utter praise, when thou *hast taught* me thy statutes.”—*Psalms*, cxix, 171. “Marvel not at this: for the hour is coming, in the which all that *are* in the graves, shall hear his voice, and shall come forth; they that *have done* good, unto the resurrection of life; and they that *have done* evil, unto the resurrection of damnation.”—*John*, v, 28.

OBS. 7.—What is called the *present* infinitive, can scarcely be said to express any particular time.\* It is usually dependent on an other verb, and therefore relative in time. It may be connected with any tense of any mood: as, “I *intend to do* it; I *intended to do* it; I *have intended to do* it; I *had intended to do* it;” &c. For want of a better mode of expression, we often use the infinitive to denote futurity, especially when it seems to be taken adjectively; as, “The time *to come*,”—“The world *to come*,”—“Rapture yet *to be*.” This, sometimes with the awkward addition of *about*, is the only substitute we have for the Latin future participle in *rus*, as *venturus*, *to come*, or *about to come*. This phraseology, according to Horne Tooke, (see *Diversions of Purley*, Vol. ii, p. 457,) is no fitter than that of our ancestors, who for this purpose used the same preposition, but put the participle in *ing* after it, in lieu of the radical verb, which we choose to employ: as, “Generacions of eddris, who shewide to you to fle fro wraththe *to comynge*?”—*Matt.*, iii, 7. Common Version: “O generation of vipers! who hath warned you to flee from the wrath *to come*?” “Art thou that art *to comynge*, ether abiden we another?”—*Matt.*, xi, 3. Common Version: “Art thou he that *should come*, or do we look for another?” “Sotheli there the ship was *to puttyng out* the charge.”—*Dedis*, xxi, 3. Common Version: “For there the ship was *to unlade* her burden.”—*Acts*, xxi, 3. Churchill, after changing the names of the two infinitive tenses to “*Future imperfect*” and “*Future perfect*,” adds the following note: “The tenses of the infinitive mood are usually termed *present* and *preterperfect*: but this is certainly improper; for they are so completely future, that what is called the present tense of the infinitive mood is often employed simply to express futurity; as, ‘The life *to come*.’”—*New Gram.*, p. 249.

OBS. 8.—The pluperfect tense, when used conditionally, in stead of expressing what actually *had taken place* at a past time, almost always implies that the action thus supposed *never was performed*; on the contrary, if the supposition be made in a *negative form*, it suggests that the event *had occurred*: as, “Lord, if thou *hadst been here*, my brother *had not died*.”—*John*, xi, 32. “If I *had not come* and spoken unto them, they *had not had* sin; but now they have no cloak for their sin.”—*John*, xv, 22. “If thou *hadst known*, even thou, at least in this thy day, the things which belong unto thy peace! But now they are hid from thine eyes.”—*Luke*, xix, 42. The supposition is sometimes indicated by a mere transposition of the verb and its subject; in which case, the conjunction *if* is omitted; as, “*Had ye believed* Moses, ye would have believed me.”—*John*, v, 46.

\* “The infinitive mood, as ‘*to shine*,’ may be called the name of the verb; it carries *neither time nor affirmation*; but simply expresses that attribute, action, or state of things, which is to be the subject of the other moods and tenses.”—*Blair’s Lectures*, p. 81. By the word “*subject*” the Doctor does not here mean the *nominative to* the other moods and tenses, but the *material of* them, or that which is formed into them.

*“Had I but fought as wont, one thrust  
Had laid De Wilton in the dust.”—Scott*

OBS. 9.—In the language of prophecy we find the past tenses very often substituted for the future, especially when the prediction is remarkably clear and specific. Man is a creature of present knowledge only; but it is certain, that He who sees the end from the beginning, has sometimes revealed to him, and by him, things deep in futurity. Thus the sacred seer who is esteemed the most eloquent of the ancient prophets, more than *seven hundred years* before the events occurred, spoke of the vicarious sufferings of Christ as of things already past, and even then described them in the phraseology of historical facts: “Surely he *hath borne* our griefs, *and carried* our sorrows: yet we *did esteem* him stricken, smitten of God, and afflicted. But he *was wounded* for our transgressions; he *was bruised* for our iniquities: the chastisement of our peace *was* upon him; and by his stripes we are healed.”—*Isaiah*, liii, 4 and 5. Multiplied instances of a similar application of the past tenses to future events, occur in the Bible, especially in the writings of this prophet.

### PERSONS AND NUMBERS.

The person and number of a verb are those modifications in which it agrees with its subject or nominative.

In each number, there are three persons; and in each person, two numbers: thus,

| <i>Singular.</i> |      |         | <i>Plural.</i> |      |       |
|------------------|------|---------|----------------|------|-------|
| 1st per.         | I    | love,   | 1st per.       | We   | love, |
| 2d per.          | Thou | lovest, | 2d per.        | You  | love, |
| 3d per.          | He   | loves;  | 3d per.        | They | love. |

Definitions universally applicable have already been given of all these things; it is therefore unnecessary to define them again in this place.

Where the verb is varied, the second person singular is regularly formed by adding *st* or *est* to the first person; and the third person singular, in like manner, by adding *s* or *es*: as, I *see*, thou *seest*, he *sees*; I *give*, thou *givest*, he *gives*; I *go*, thou *goest*, he *goes*; I *fly*, thou *fliest*, he *flies*; I *vex*, thou *vexest*, he *vexes*; I *lose*, thou *losest*, he *loses*.

Where the verb is not varied to denote its person and number, these properties are inferred from its subject or nominative: as, If I *love*, if thou *love*, if he *love*; if we *love*, if you *love*, if they *love*.

### OBSERVATIONS.

OBS. 1.—It is considered a principle of Universal Grammar, that a finite verb must agree with its subject or nominative in person and number. Upon this principle, we ascribe to every such verb the person and number of the nominative word, whether the verb itself be literally modified by the relation or not. The doctrine must be constantly taught and observed, in every language in which the verbs have *any variations* of this kind. But suppose an instance, of a language in which all the verbs were entirely destitute of such inflections; the principle, as regards that language, must drop. Finite verbs, in such a case, would still relate to their subjects, or nominatives, agreeably to the sense;

but they would certainly be rendered incapable of adding to this relation any agreement or disagreement. So the concords which belong to adjectives and participles in Latin and Greek, are rejected in English, and there remains to these parts of speech nothing but a simple relation to their nouns according to the sense. And by the fashionable substitution of *you* for *thou*, the concord of English verbs with their nominatives, is made to depend, in common practice, on little more than one single terminational *s*, which is used to mark one person of one number of one tense of one mood of each verb. So near does this practice bring us to the dropping of what is yet called a universal principle of grammar.\*

OBS. 2.—In most languages, there are in each tense, through all the moods of every verb, six different terminations to distinguish the different persons and numbers. This will be well understood by every one who has ever glanced at the verbs as exhibited in any Latin, Greek, French, Spanish, or Italian grammar. To explain it to others, a brief example shall be given: (with the remark, that the Latin pronouns, here inserted, are seldom expressed, except for emphasis:) “*Ego amo*, I love; *Tu amas*, Thou lovest; *Ille amat*, He loves; *Nos amamus*, We love; *Vos amatis*, You love; *Illi amant*, They love.” Hence it may be perceived, that the paucity of variations in the English verb, is a very striking peculiarity of our language. Whether we are gainers or losers by this simplicity, is a question for learned idleness to discuss. The common people who speak English, have far less inclination to add new endings to our verbs, than to drop or avoid all the remains of the old. Lowth and Murray tell us, “This scanty provision of terminations *is sufficient* for all the purposes of discourse;” and that, “*For this reason*, the plural termination *en*, (they *loven*, they *weren*,) formerly in use, was laid aside as *unnecessary*, and has long been obsolete.”—*Lowth’s Gram.*, p. 31; *Murray’s*, 63.

\* Some grammarians absurdly deny that persons and numbers are properties of verbs at all: not indeed because our verbs have so few inflections, or because these authors wish to discard the little distinction that remains; but because they have some fanciful conception, that these properties cannot pertain to a verb. Yet, when they come to their syntax, they all forget, that if a verb has no person and number, it cannot agree with a nominative in these respects. Thus KIRKHAM: “*Person*, strictly speaking, is a quality that belongs *not to verbs*, but to nouns and pronouns. We say, however, that the verb *must agree* with its nominative in *person*, as well as in number.”—*Gram. in Familiar Lect.*, p. 46. So J. W. WRIGHT: “In truth, number and person *are not properties of verbs*. Mr. Murray grants that, ‘in philosophical strictness, both number and person might (say, *may*) be excluded from every verb, as they are, in fact, the properties of substantives, not a part of the essence of the verb.’”—*Philosophical Gram.*, p. 68. This author’s rule of syntax for verbs, makes them agree with their nominatives, not in person and number, but in *termination*, or else in *nobody knows what*: “A verb *must vary its terminations*, so as to agree with the nominative to which it is connected.”—*Ib.*, p. 168. But Murray’s rule is, “A verb must agree with its nominative case in *number and person*.” and this doctrine is directly repugnant to that interpretation of his words above, by which these gentlemen have so egregiously misled themselves and others. Undoubtedly, both the numbers and the persons of all English verbs might be abolished, and the language would still be intelligible. But while any such distinctions remain, and the verb is actually modified to form them, they belong as properly to this part of speech as they can to any other. De Sacy says, “The distinction of number *occurs* in the verb;” and then adds, “yet this distinction does not properly *belong to* the verb, as it signifies nothing which can be numbered.”—*Fosdick’s Version*, p. 64. This deceptive reason is only a new form of the blunder which I have once exposed, of confounding the numbers in grammar with numbers in arithmetic. J. M. Putnam, after repeating what is above cited from Murray, adds: “The terms *number* and *person*, as applied to the verb are *figurative*. The properties which belong to one thing, for convenience’ sake are ascribed to another.”—*Gram.*, p. 49. Kirkham imagines, if ten men *build* a house, or *navigate* a ship round the world, they perform just “*ten actions*,” and no more. “Common sense teaches you,” says he, “that *there must be as many actions as there are actors*; and that the verb when it has no form or ending to show it, is as strictly plural, as when it has. So, in the phrase, ‘We *walk*,’ the verb *walk* is [of the] first person, because it expresses the *actions* performed by the *speakers*. The verb, then, when correctly written, always agrees, *in sense*, with its nominative in number and person.”—*Kirkham’s Gram.*, p. 47. It seems to me, that these authors do not very well know what persons or numbers, in grammar, are.

OBS. 3.—Though modern usage, especially in common conversation, evidently inclines to drop or shun all unnecessary suffixes and inflections, still it is true, that the English verb in some of its parts, varies its termination, to distinguish, or agree with, the different persons and numbers. The change is, however, principally confined to the second and third persons singular of the present tense of the indicative mood, and to the auxiliaries *hast* and *has* of the perfect. In the ancient biblical style, now used only on solemn occasions, the second person singular is distinguished through all the tenses of the indicative and potential moods. And as the use of the pronoun *thou* is now mostly confined to the solemn style, the terminations of that style are retained in connexion with it, through all the following examples of the conjugation of verbs. In the plural number, there is no variation of ending, to denote the different persons; and the verb in the three persons plural, (with the two exceptions *are* and *were*, from *am* and *was*,) is the same as in the first person singular. Nor does the use of *you* for the singular, warrant its connexion with any other than the plural form of the verb. This strange and needless confusion of the numbers, is, in all languages that indulge it, a practical inconvenience. It would doubtless have been much better, had *thou* and *you* still kept their respective places—the one, nominative singular—the other, objective plural—as they appear in the Bible. But as the English verb is always attended by a noun or a pronoun, expressing the subject of the affirmation, no ambiguity arises from the want of particular terminations in the verb, to distinguish the different persons and numbers.

OBS. 4.—Although our language, in its ordinary use, exhibits the verbs in such forms only, as will make, when put together, but a very simple conjugation; there is probably no other language on earth, in which it would be so difficult for a learned grammarian to fix, settle, and exhibit, to the satisfaction of himself and others, the principles, paradigms, rules, and exceptions, which are necessary for a full and just exhibition of this part of speech. This difficulty is owing, partly to incompatibilities or unsettled boundaries between the solemn and the familiar style; partly to differences in the same style between ancient usage and modern; partly to interfering claims of new and old forms of the preterit and the perfect participle; partly to the conflicting notions of different grammarians respecting the subjunctive mood; and partly to the blind tenacity with which many writers adhere to rugged derivatives, and prefer unutterable contractions to smooth and easy abbreviations. For example: a clergyman says to a lucky gamester, (1.) “*You dwell* in a house which *you* neither *planned* nor *built*.” A member of the Society of Friends would say, (2.) “*Thou dwellest* in a house which *thou* neither *planned* nor *built*.” Or, if not a scholar, as likely as not, (3.) “*Thee dwells* in a house which *thee* neither *planned* nor *built*.” The old or solemn style would be, (4.) “*Thou dwellest* in a house which *thou* neither *plannedst* nor *buildest*.” Some untasteful and overgrammatical poet will have it, (5.) “*Thou dwell’st* in halls *thou* neither *plann’dst* nor *build’dst*.” The doctrine of Murray’s Grammar, and of most others, would require, (6.) “*Thou dwellest* in a house which *thou* neither *plannedst* nor *builtest*.” Or, (according to this author’s method of avoiding unpleasant sounds,) the more complex form, (7.) “*Thou dost dwell* in a house which *thou* neither *didst plan* nor *didst build*.” Out of these an other poet will make the line, (8.) “*Dost dwell* in halls which *thou* nor *plann’dst* nor *built’st*.” An other, more tastefully, would drop the *st* of the preterit, and contract the present, as in the second instance above: thus,

- (9.) “*Thou dwellest* in halls *thou* neither *planned* nor *built*,  
And *revelst* there in riches won by guilt.”

OBS. 5.—Now let all these nine different forms of saying the same thing, by the same verbs, in the same mood, and the same two tenses, be considered. Let it also be noticed, that for these same verbs within these limits, there are yet other forms, of a complex kind; as, “*You do dwell*,” or, “*You are dwelling*,” used in lieu of, “*Thou dost dwell*,” or, “*Thou art dwelling*,” so, “*You did plan*,” or, “*You were planning*,” used in lieu of, “*Thou didst plan*,” or, “*Thou wast planning*.” Take into the account the opinion of Dr. Webster and others, that, “*You was planning*,” or, “*You was building*,” is a still better form for the singular number; and well “established by national usage, both here and in England.”—*Improved Gram.*, p. 25. Add the less inaccurate practice of some, who use *was* and *did* familiarly with *thou*; as, “*Thou was planning, did thou build?*” Multiply all this variety tenfold, with a view to the other moods and tenses of these three verbs, *dwell*, *plan*, and *build*; then extend the product, whatever it is, from these three common words, to *all* the verbs in the English language. You will thus begin to have some idea of the difficulty mentioned in the preceding observation. But this is only a part of it; for all these things relate only to the second person singular of the verb. The double question is, Which of these forms ought to be approved and taught for that person and number? and which of them ought to be censured and rejected as bad English? This question is perhaps as important, as any that can arise in English grammar. With a few candid observations by way of illustration, it will be left to the judgement of the reader.

OBS. 6.—The history of *youyouing* and *thoutheeing* appears to be this. Persons in high stations, being usually surrounded by attendants, it became, many centuries ago, a species of court flattery, to address individuals of this class, in the plural number, as if a great man were something more than one person. In this way, the notion of greatness was agreeably *multiplied*, and those who laid claim to such honour, soon began to think themselves insulted whenever they were addressed with any other than the plural pronoun.\* Humbler people yielded through fear of offence; and the practice extended, in time, to all ranks of society: so that at present the customary mode of familiar as well as complimentary address, is altogether plural; both the verb and the pronoun being used in that form.† This practice, which confounds one of the most important distinctions of the language, affords a striking instance of the power of fashion. It has made propriety itself *seem* improper. But shall it be allowed, in the present state of things, to confound our conjugations and overturn our grammar? Is it right to introduce it into our paradigms, as the only form of the second person singular, that modern usage acknowledges? Or is it expedient to augment by it that multiplicity of other forms, which must either take this same place or be utterly rejected? With due deference to those grammarians who have adopted one or the other of these methods, the author of this work answers all these questions decidedly in the negative. It is not to be denied, that the use of the plural *for the*

---

\* John Despauter, whose ample Grammar of the Latin language appeared in its third edition in 1517, represents this practice as a corruption originating in false pride, and maintained by the wickedness of hungry flatterers. On the twentieth leaf of his Syntax, he says, “Videntur hodie Christiani superbiores, quam olim ethnici imperatores, qui dii haberi voluerunt; nam hi nunquam inviti audierunt pronomina *tu, tibi, tuus*. Quæ si hodie alicui monachorum antistiti, aut decano, aut pontifici dicantur aut scribantur, videbitur ita loquens aut scribens blasphemasse, et anathemate dignus: nec tamen Abbas, aut pontifex, tam ægrè feret, quam Malchi, aut famelici gnathones, his assistentes, et vociferantes, *Sic loqueris, aut scribis, pontifici?* Quintilianus et Donatus dicunt barbarismum, aut soloecismum esse, siquis uni dicat. *Salvete*.” The learned Erasmus also ridiculed this practice, calling those who adopted it, “*voscitatores*,” or *youyouers*.

† “By a *perversion of language* the pronoun *you* is almost invariably used for the second person singular, as well as plural; always, however, retaining the plural verb; as, ‘My friend, *you write* a good hand.’ *Thou* is confined to a solemn style, or [to] poetical compositions.”—*Chandler’s Grammar*, Edition of 1821, p. 41; Ed. of 1847, p. 66.

*singular* is now so common as to form the *customary mode* of address to individuals of every rank. The Society of Friends, or Quakers, however, continue to employ the singular number in familiar discourse; and custom, which has now destroyed the compliment of the plural, has removed also the supposed opprobrium of the singular, and placed it on an equality with the plural in point of respect. The singular is universally employed in reference to the Supreme Being; and is generally preferred in poetry. It is the language of Scripture, and of the Prayer-Book; and is consistently retained in nearly all our grammars; though not always, perhaps, consistently treated.

OBS. 7.—Whatever is fashionable in speech, the mere disciples of fashion will always approve; and, probably, they will think it justifiable to despise or neglect all that is otherwise. These may be contented with the sole use of such forms of address as, “*You, you, sir*,”—“*You, you, madam*.” But the literati who so neglect all the services of religion, as to forget that these are yet conducted in English independently of all this fashionable youyouing, must needs be poor judges of what belongs to their own justification, either as grammarians or as moral agents. A fashion by virtue of which millions of youths are now growing up in ignorance of that form of address which, in their own tongue, is most appropriate to poetry, and alone adapted to prayer, is perhaps not quite so light a matter as some people imagine. It is at least so far from being a good reason for displacing that form from the paradigms of our verbs in a grammar, that indeed no better needs be offered for tenaciously retaining it. Many children may thus learn at school what all should know, and what there is little chance for them to learn elsewhere. Not all that presume to minister in religion, are well acquainted with what is called the solemn style. Not all that presume to explain it in grammars, do know what it is. A late work, which boasted the patronage of De Witt Clinton, and through the influence of false praise came nigh to be imposed by a law of New York on all the common schools of that State; and which, being subsequently sold in Philadelphia for a great price, was there republished under the name of the “National School Manual;” gives the following account of this part of grammar: “In the solemn and poetic styles, the second person singular, in both the above tenses, is thou; and the second person plural, is ye, *or you*. The verb, to agree with the second person singular, changes its termination. Thus: 2d person, sing. Pres. Tense, Thou walkest, *or Thou walketh*. Imperfect Tense, Thou walkedst. In the third person singular, *in the above styles*, the verb has sometimes *a different* termination; as, Present Tense, He, she, or *it walks* or walketh. The *above form of inflection* may be applied *to all verbs* used in the solemn *or* poetic *styles*; but for ordinary purposes, I have supposed it proper to employ the form of the verb, adopted in common conversation, as least perplexing to young minds.”—*Bartlett’s Common School Manual*, Part ii, p. 114. What can be hoped from an author who is ignorant enough to think “*Thou walketh*” is good English? or from one who tells us, that “*It walks*” is of the solemn style? or from one who does not know that *you* is never a *nominative* in the style of the Bible?

OBS. 8.—Nowhere on earth is fashion more completely mistress of all the tastes and usages of society, than in France. Though the common French Bible still retains the form of the second person singular, which in that language is shorter and perhaps smoother than the plural; yet even that sacred book, or at least the New Testament, and that by different persons, has been translated into more fashionable French, and printed at Paris, and also at New York, with the form of address everywhere plural; as, “Jesus anticipated him, saying, ‘What *do you think*, Simon? of whom do the kings of the earth take taxes and tribute?’”—*Matt.*, xvii, 24. “And, going to prayers, they said, ‘O Lord, *you who know* the hearts of all men, show which of these two *you have chosen*.’”—*Acts*, i, 24. This is one step

further in the progress of politeness, than has yet been taken in English. The French grammarians, however, as far as I can perceive, have never yet disturbed the ancient order of their conjugations and declensions, by inserting the plural verb and pronoun in place of the singular; and, in the familiarity of friendship, or of domestic life, the practice which is denominated *tutoyant*, or *thoutheeing*, is far more prevalent in France than in England. Also, in the prayers of the French, the second person singular appears to be yet generally preserved, as it is in those of the English and the Americans. The less frequent use of it in the familiar conversation of the latter, is very probably owing to the general impression, that it cannot be used with propriety, except in the solemn style. Of this matter, those who have laid it aside themselves, cannot with much modesty pretend to judge for those who have not; or, if they may, there is still a question how far it is right to lay it aside. The following lines are a sort of translation from Horace; and I submit it to the reader, whether it is comely for a Christian divine to be less reverent toward God, than a heathen poet; and whether the plural language here used, does not lack the reverence of the original, which is singular:—

“Preserve, Almighty Providence!  
Just what *you gave* me, competence.”—*Swift*.

OBS. 9.—The terms, *solemn style*, *familiar style*, *modern style*, *ancient style*, *legal style*, *regal style*, *nautic style*, *common style*, and the like, as used in grammar, imply no certain divisions of the language; but are designed merely to distinguish, in a general way, the *occasions* on which some particular forms of expression may be considered proper, or the *times* to which they belong. For what is grammatical sometimes, may not be so always. It would not be easy to tell, definitely, in what any one of these styles consists; because they all belong to one language, and the number or nature of the peculiarities of each is not precisely fixed. But whatever is acknowledged to be peculiar to any one, is consequently understood to be improper for any other: or, at least, the same phraseology cannot belong to styles of an opposite character; and words of general use belong to no particular style.\* For example: “So then it is not of him that *willeth*, nor of him that *runneth*, but of God that *showeth* mercy.”—*Rom.*, ix, 16. If the termination *eth* is not obsolete, as some say it is, all verbs to which this ending is added, are of the solemn style; for the common or familiar expression would here be this; “So then it is not of him that *wills*, nor of him that *runs*, but of God that *shows* mercy.” Ben Jonson, in his grammar, endeavoured to arrest this change of *eth* to *s*; and, according to Lindley Murray, (*Octavo Gram.*, p. 90,) Addison also injudiciously disapproved it. In spite of all such objections, however, some future

---

\* In regard to the inflection of our verbs, William B. Fowle, who is something of an antiquarian in grammar, and who professes now to be “conservative” of the popular system, makes a threefold distinction of style, thus: “English verbs have three *Styles*[,] or *Modes*[,] called [the] *Familiar*, [the] *Solemn*[,] and [the] *Ancient*. The *familiar style*, or mode, is that used in common conversation; as, you *see*, he *fears*. The *solemn style*, or mode, is that used in the Bible, and in prayer; as, Thou *seest*, he *feareth*. The *ancient style*, or mode, now little used, *allows no change* in the second and third person, [*persons*,] singular, of the verb, and generally follows the word *if*, *though*, *lest*, or *whether*; as, if thou *see*; though he *fear*; lest he *be* angry; whether he *go* or *stay*.”—*Fowle’s Common School Grammar*, Part Second, p. 44. Among his subsequent examples of the *Solemn style*, he gives the following: “Thou *lovest*, Thou *lovedst*, Thou *art*, Thou *wast*, Thou *hast*, Thou *hadst*, Thou *doest* or *dost*, Thou *didst*.” And, as corresponding examples of the *Ancient style*, he has these forms: “Thou *love*, Thou *loved*, Thou *or you be*, Thou *wert*, Thou *have*, Thou *had*, Thou *do*, Thou *did*.”—*Ib.*, pp. 44-50. This distinction and this arrangement do not appear to me to be altogether warranted by facts. The necessary distinction of *moods*, this author rejects; confounding the *Subjunctive* with the *Indicative*, in order to furnish out this useless and fanciful contrast of his *Solemn* and *Ancient styles*.

grammarian will probably have to say of the singular ending *eth*, as Lowth and Murray have already said of the plural *en*: “It was laid aside as unnecessary.”

OBS. 10.—Of the origin of the personal terminations of English verbs, that eminent etymologist Dr. Alexander Murray, gives the following account: “The readers of our modern tongue may be reminded, that the terminations, *est*, *eth*, and *s*, in our verbs, as in *layest*, *layeth*, and *laid’st*, or *laidest*; are the faded *remains of the pronouns* which were formerly joined to the verb itself, and placed the language, in respect of concise expression, on a level with the Greek, Latin, and Sanscrit, its sister dialects.”—*History of European Languages*, Vol. i, p. 52. According to this, since other signs of the persons and numbers are now employed with the verb, it is not strange that there should appear a tendency to lay aside such of these endings as are least agreeable and least necessary. Any change of this kind will of course occur first in the familiar style. For example: “Thou *wentest* in to men uncircumcised, and *didst eat* with them.”—*Acts*, xi, 3. “These things write I unto thee, that thou *mayst* know how thou *oughtest* to behave thyself in the house of God.”—1 *Tim.*, iii, 15. These forms, by universal consent, are now of the solemn style; and, consequently, are really good English in no other. For nobody, I suppose, will yet pretend that the inflection of our preterits and auxiliaries by *st* or *est*, is entirely *obsolete*;<sup>\*</sup> and surely no person of any literary taste ever uses the foregoing forms familiarly. The termination *est*, however, has *in some instances* become obsolete; or has faded into *st* or *t*, even in the solemn style. Thus, (if indeed, such forms ever were in good use,) *diddest* has become *didst*; *havest*, *hast*; *haddest*, *hadst*; *shallest*, *shalt*; *willest*, *wilt*; and *cannest*, *canst*. *Mayest*, *mightest*, *couldest*, *wouldest*, and *shouldest*, are occasionally found in books not ancient; but *mayst*, *mightst*, *couldst*, *wouldst*, and *shouldst*, are abundantly more common, and all are peculiar to the solemn style. *Must*, *burst*, *durst*, *thrust*, *blest*, *curst*, *past*, *lost*, *list*, *crept*, *kept*, *girt*, *built*, *felt*, *dwelt*, *left*, *bereft*, and many other verbs of similar endings, are seldom, if ever, found encumbered with an additional *est*. For the rule which requires this ending, has always had many exceptions that have not been noticed by grammarians.<sup>†</sup> Thus Shakspeare wrote even in the present tense, “Do as thou *list*,” and

<sup>\*</sup> In that monstrous jumble and perversion of Murray’s doctrines, entitled, “English Grammar on the Productive System, by Roswell C. Smith,” *you* is everywhere preferred to *thou*, and the verbs are conjugated *without the latter pronoun*. At the close of his paradigms, however, the author inserts a few lines respecting “*these obsolete conjugations*,” with the pronoun *thou*; for a further account of which, he refers the learner, *with a sneer*, to the common grammars in the schools. See the work, p. 79. He must needs be a remarkable grammarian, with whom Scripture, poetry, and prayer, are all “*obsolete*!” Again: “*Thou* in the singular *is obsolete*, except among the Society of Friends; and *ye* is an *obsolete plural*!”—*Guy’s School Gram.*, p. 25. In an other late grammar, professedly “constructed upon the *basis of Murray’s*,” by the *Rev. Charles Adams*, A. M., Principal of Newbury Seminary, “the second person singular is everywhere superseded by the plural; the former being silently dropped from all his twenty pages of conjugations, without so much as a hint, or a saving clause, respecting it; and the latter, which is put in its stead, is falsely called *singular*. By his pupils, all forms of the verb that agree only with *thou*, will of course be conceived to be either obsolete or barbarous, and consequently ungrammatical. Whether or not the reverend gentleman makes any account of the Bible or of prayer, does not appear; he cites some poetry, in which there are examples that cannot be reconciled with his “System of English Grammar.” Parkhurst, in his late “Grammar for Beginners,” tells us that, “Such words as are used in the Bible, and not used in common books, are called *obsolete*!”—P. 146. Among these, he reckons all the distinctive forms of the second person singular, and all the “peculiarities” which “constitute what is commonly called the *Solemn Style*.”—*Ib.*, p. 148. Yet, with no great consistency, he adds: “This style *is always used* in prayer, and *is frequently used* in poetry.”—*Ibid.* Joab Brace, Jnr., may be supposed to have the same notion of what is obsolete: for he too has perverted all Lennie’s examples of the verb, as Smith and Adams did Murray’s.

<sup>†</sup> Coar gives *durst* in the “Indicative mood,” thus: “I durst, *thou durst*, he durst;” &c.—*Coar’s E. Gram.*, p. 115. But when he comes to *wist*, he does not know what the second person singular should be, and so he leaves it out: “I wist,——, he wist; we wist, ye wist, they wist.”—*Coar’s E. Gram.*, p. 116.

not “Do as thou *listest*.” Possibly, however, *list* may here be reckoned of the subjunctive mood; but the following example from Byron is certainly in the indicative:—

“And thou, who never yet of human wrong  
*Lost* the unbalanced scale, great Nemesis!”—*Harold*, C. iv, st. 132.

OBS. 11.—Any phraseology that is really obsolete, is no longer fit to be imitated even in the solemn style; and what was never good English, is no more to be respected in that style, than in any other. Thus: “Art not thou that Egyptian, *which* before these days *madest* an uproar, and *leddest* out into the wilderness four thousand men that were murderers?”—*Acts*, xxi, 38. Here, (I think,) the version ought to be, “Art not thou that Egyptian, *who* a while ago *made* an uproar, and *led* out into the wilderness four thousand men, that were murderers?” If so, there is in this no occasion to make a difference between the solemn and the familiar style. But what is the familiar form of expression for the texts cited before? The fashionable will say, it is this: “*You went* in to men uncircumcised, and *did eat* with them.”—“I write these things to *you*, that *you may know* how *you ought* to behave *yourself* in the house of God.” But this is not *literally* of the singular number: it is no more singular, than *vos* in Latin, or *vous* in French, or *we* used for *I* in English, is singular. And if there remains to us any other form, that is both singular and grammatical, it is unquestionably the following: “*Thou went* in to men uncircumcised, and *did eat* with them.”—“I write these things to *thee*, that thou *may know* how *thou ought* to behave *thyself* in the house of God.” The acknowledged doctrine of all the teachers of English grammar, that the inflection of our auxiliaries and preterits by *st* or *est* is peculiar to “the solemn style,” leaves us no other alternative, than either to grant the propriety of here dropping the suffix for the familiar style, or to rob our language of any familiar use of the pronoun *thou* forever. Who, then, are here the neologists, the innovators, the impairers of the language? And which is the greater *innovation*, merely to drop, on familiar occasions, or *when it suits our style*, one obsolescent verbal termination,—a termination often dropped *of old* as well as now,—or to strike from the conjugations of all our verbs one sixth part of their entire scheme?\*

“O mother myn, that cleaped *were* Argyue,  
 Wo worth that day that thou me *bare* on lyue.”—*Chaucer*.

OBS. 12.—The grammatical propriety of distinguishing from the solemn style both of the forms presented above, must be evident to every one who considers with candour the reasons, analogies, and authorities, for this distinction. The support of the latter is very far from resting solely on the practice of a particular sect; though this, if they would forbear to corrupt the pronoun while they simplify the verb, would deserve much more

---

\* Dr. Latham, who, oftener perhaps than any other modern writer, corrupts the grammar of our language by efforts to revive in it things really and deservedly obsolete, most strangely avers that “The words *thou* and *thee* are, except in the mouths of Quakers, obsolete. The plural forms, *ye* and *you*, have replaced them.”—*Hand-Book*, p. 284. Ignoring also any current or “vital” process of forming English verbs in the second person singular, he gravely tells us that the old form, as “*callest*” (which is still the true form for the solemn style,) “is becoming obsolete.”—*Ib.*, p. 210. “In phrases like *you are speaking*, &c.,” says he rightlier, “even when applied to a single individual, *the idea is really plural*; in other words, the courtesy consists in treating *one* person as *more than one*, and addressing him as such, rather than in using a plural form in a singular sense. It is certain that, grammatically considered, *you=thou* is a plural, since the verb with which it agrees is plural.”—*Ib.*, p. 163. If these things be so, the English Language owes much to the scrupulous conservatism of the Quakers; for, had their courtesy consented to the grammar of the fashionables, the singular number would now have had but two persons!

consideration than has ever been allowed it. Which of these modes of address is the more grammatical, it is useless to dispute; since fashion rules the one, and a scruple of conscience is sometimes alleged for the other. A candid critic will consequently allow all to take their choice. It is enough for him, if he can demonstrate to the candid inquirer, what phraseology is in any view allowable, and what is for any good reason reprehensible. That the use of the plural for the singular is ungrammatical, it is neither discreet nor available to affirm; yet, surely, it did not originate in any regard to grammar rules. Murray the schoolmaster, whose *English Grammar* appeared some years before that of Lindley Murray, speaks of it as follows: “*Thou*, the second person singular, though *strictly grammatical*, is seldom used, except in addresses to God, in poetry, and by the people called Quakers. In all other cases, a *fondness for foreign manners*,\* and the power of custom, have given a sanction to the use of *you*, for the second person singular, though *contrary to grammar*,† and attended with this particular inconveniency, that a plural verb must be used to agree with the pronoun in number, and both applied to a *single person*; as, *you are*, or *you were*,—not *you wast*, or *you was*.”—*Third Edition*, Lond., 1793, p. 34. This author everywhere exhibits the auxiliaries, *mayst*, *mightst*, *couldst*, *wouldst*, and *shouldst*, as words of one syllable; and also observes, in a marginal note, “Some writers begin to say, ‘*Thou may*, *thou might*,’ &c.”—*Ib.*, p. 36. Examples of this are not very uncommon: “*Thou shall* want ere I want.”—*Old Motto*; *Scott’s Lay*, Note 1st to Canto 3. “*Thyself the mournful tale shall* tell.”—*Felton’s Gram.*, p. 20.

“One sole condition would I dare suggest,  
That *thou would save* me from my own request.”—*Jane Taylor*.

OBS. 13.—In respect to the second person singular, the grammar of Lindley Murray makes no distinction between the solemn and the familiar style; recognizes in no way the fashionable substitution of *you* for *thou*; and, so far as I perceive, takes it for granted, that every one who pretends to speak or write grammatically, must always, in addressing an individual, employ the singular pronoun, and inflect the verb with *st* or *est*, except in the imperative mood and the subjunctive present. This is the more remarkable, because the author was a valued member of the Society of Friends; and doubtless his own daily practice contradicted his doctrine, as palpably as does that of every other member of the Society. And many a schoolmaster, taking that work for his text-book, or some other as

\* For the substitution of *you* for *thou*, our grammarians assign various causes. That which is most commonly given in modern books, is certainly not the original one, because it concerns no other language than ours: “In order to avoid the unpleasant formality which accompanies the use of *thou* with a correspondent verb, its plural *you*, is usually adopted to familiar conversation; as, Charles, *will you* walk? instead of—*wilt thou* walk? *You read* too fast, instead of—*thou readest* too fast.”—*Jaudon’s Gram.*, p. 33.

† This position, as may be seen above, I do not suppose it competent for any critic to maintain. The use of *you* for *thou* is no more “contrary to grammar,” than the use of *we* for *I*; which, it seems, is grammatical enough for all editors, compilers, and crowned heads, if not for others. But both are *figures of syntax*; and, as such, they stand upon the same footing. Their only contrariety to grammar consists in this, that the words are not the *literal representatives* of the number for which they are put. But in what a posture does the grammarian place himself, who condemns, as *bad English*, that phraseology which he constantly and purposely uses? The author of the following remark, as well as all who have praised his work, ought immediately to adopt the style of the Friends, or Quakers: “The word *thou*, in grammatical construction, is preferable to *you*, in the second person singular: however, custom has familiarized the latter, and consequently made it more general, though BAD GRAMMAR. To say, ‘*You are a man*.’ is NOT GRAMMATICAL LANGUAGE; the word *you* having reference to a plural noun only. It should be, ‘*Thou art a man*.’”—*Wright’s Philosoph. Gram.*, p. 55. This author, like Lindley Murray and many others, continually calls *himself* *we*; and it is probable, that neither he, nor any one of his sixty reverend commenders, *dares address* any man otherwise than by the above-mentioned “BAD GRAMMAR!”

faulty, is now doing precisely the same thing. But what a teacher is he, who dares not justify as a grammarian that which he constantly practices as a man! What a scholar is he, who can be led by a false criticism or a false custom, to condemn his own usage and that of every body else! What a casuist is he, who dares pretend conscience for practising that which he knows and acknowledges to be wrong! If to speak in the second person singular without inflecting our preterits and auxiliaries, is a censurable corruption of the language, the Friends have no alternative but to relinquish their scruple about the application of *you* to one person; for none but the adult and learned can ever speak after the manner of ancient books: children and common people can no more be brought to speak agreeably to any antiquated forms of the English language, than according to the imperishable models of Greek and Latin. He who traces the history of our vernacular tongue, will find it has either simplified or entirely dropped several of its ancient terminations; and that the *st* or *est* of the second person singular, *never was adopted* in any thing like the extent to which our modern grammarians have attempted to impose it. “Thus becoming unused to inflections, we lost the perception of their meaning and nature.”—*Philological Museum*, i, 669. “You cannot make a whole people all at once talk in a different tongue from that which it has been used to talk in: you cannot force it to unlearn the words it has learnt from its fathers, in order to learn a set of newfangled words out of [a grammar or] a dictionary.”—*Ib.*, i, 650. Nor can you, in this instance, restrain our poets from transgressing the doctrine of Lowth and Murray:—

“Come, thou pure Light,—which first in Eden *glowed*.  
And *threw* thy splendor round man’s calm abode.”—*Alonzo Lewis*.

OBS. 14.—That which has passed away from familiar practice, may still be right in the solemn style, and may there remain till it becomes obsolete. But no obsolescent termination has ever yet been recalled into the popular service. This is as true in other languages as in our own: “In almost every word of the Greek,” says a learned author, “we meet with contractions and abbreviations; but, I believe, the flexions of no language allow of extension or amplification. In our own we may write *sleeped* or *slept*, as the metre of a line or the rhythm of a period may require; but by no license may we write *sleepeed*.”—*Knight, on the Greek Alphabet*, 4to, p. 107. But, if after contracting *sleeped* into *slept*, we add an *est* and make *sleptest*, is there not here an extension of the word from one syllable to two? Is there not an amplification that is at once novel, disagreeable, unauthorized, and unnecessary? Nay, even in the regular and established change, as of *loved* to *lovedst*, is there not a syllabic increase, which is unpleasant to the ear, and unsuited to familiar speech? Now, to what extent do these questions apply to the verbs in our language? Lindley Murray, it is presumed, had no conception of that extent; or of the weight of the objection which is implied in the second. With respect to a vast number of our most common verbs, he himself never knew, nor does the greatest grammarian now living know, in what way he ought to form the simple past tense in the second person singular, otherwise than by the mere uninflected preterit with the pronoun *thou*. Is *thou sleepedst* or *thou sleptest*, *thou leavedst* or *thou leftest*, *thou feeledst* or *thou feltest*, *thou dealedst* or *thou dealtest*, *thou tossedst* or *thou tostest*, *thou losedst* or *thou lostest*, *thou payedst* or *thou paidest*, *thou layedst* or *thou laidedst*, better English than *thou slept*, *thou left*, *thou felt*, *thou dealt*, *thou tossed*, *thou lost*, *thou paid*, *thou laid*? And, if so, of the two forms in each instance, which is the right one? and why? The Bible has “*saidst*” and “*layedst*,” Dr. Alexander Murray, “*laid’st*” and “*laidest*!” Since the inflection of our preterits has never been orderly, and is now decaying and waxing old, shall we labour to recall what is so nearly ready to vanish away?

“Tremendous Sea! what time *thou lifted* up  
 Thy waves on high, and with thy winds and storms  
 Strange pastime *took*, and *shook* thy mighty sides  
 Indignantly, the pride of navies fell.”—*Pollok*, B. vii, l. 611.

OBS. 15.—Whatever difficulty there is in ascertaining the true form of the preterit itself, not only remains, but is augmented, when *st* or *est* is to be added for the second person of it. For, since we use sometimes one and sometimes the other of these endings; (as, said*st*, saw*est*, bid*st*, knew*est*, loved*st*, went*est*;) there is yet need of some rule to show which we ought to prefer. The variable formation or orthography of verbs in the simple past tense, has always been one of the greatest difficulties that the learners of our language have had to encounter. At present, there is a strong tendency to terminate as many as we can of them in *ed*, which is the only regular ending. The pronunciation of this ending, however, is at least threefold; as in *remembered*, *repented*, *relinquished*. Here the added sounds are, first *d*, then *ed*, then *t*; and the effect of adding *st*, whenever the *ed* is sounded like *t*, will certainly be a perversion of what is established as the true pronunciation of the language. For the solemn and the familiar pronunciation of *ed* unquestionably differ. The present tendency to a regular orthography, ought rather to be encouraged than thwarted; but the preferring of *mixed* to *mixt*, *whipped* to *whipt*, *worked* to *wrought*, *kneeled* to *knel*, and so forth, does not make *mixedst*, *whippedst*, *workedst*, *kneeledst*, and the like, any more fit for modern English, than are *mixtest*, *whiptest*, *wroughtest*, *kneltest*, *burntest*, *dweltest*, *heldest*, *gilst*, and many more of the like stamp. And what can be more absurd than for a grammarian to insist upon forming a great parcel of these strange and crabbed words for which he can quote no good authority? Nothing; except it be for a poet or a rhetorician to huddle together great parcels of consonants which no mortal man can utter,\* (as *lov'dst*, *lurk'dst*, *shrugg'dst*;) and call them “*words*.” Example: “The clump of *subtonick* and *atonick* elements at the termination of *such words* as the following, is frequently, to the no small injury of articulation, particularly slighted: couldst, wouldst, hadst, prob'st, *prob'dst*, hurl'st, *hurl'dst*, arm'st, *arm'dst*, want'st, *want'dst*, burn'st, *burn'dst*, bark'st, *bark'dst*, bubbl'st, *bubbl'dst*, *troubbl'st*, *troubbl'dst*.”—*Kirkham's Elocution*, p. 42. The word *trouble* may receive the additional sound of *st*, but this gentleman does not here *spell* so accurately as a great author should. Nor did they who penned the following lines, write here as poets should:—

“Of old thou *build'st* thy throne on righteousness.”—*Pollok's C. of T.*, B. vi, l. 638.

“For though thou *work'dst* my mother's ill.”—*Byron's Parasina*.

\* “We are always given to cut our words short; and, *with very few exceptions*, you find people writing *lov'd*, *mov'd*, *walk'd*; instead of *loved*, *moved*, *walked*. They wish to make the *pen* correspond with the *tongue*. From *lov'd*, *mov'd*, *walk'd*, it is very easy to slide into *lovt*, *movt*, *walkt*. And this has been the case with regard to *curst*, *dealt*, *dwelt*, *leapt*, *help*, and many others in the last inserted list. It is just as proper to say *jumpt*, as it is to say *leapt*; and just as proper to say *walkt* as either; and thus we might go on till the orthography of the whole language were changed. When the love of contraction came to operate on such verbs as *to burst* and *to light*, it found such a clump of consonants already at the end of the words, that, it could add none. It could not enable the organs even of English speech to pronounce *burstest*, *lightest*. It, therefore, made really short work of it, and dropping the last syllable altogether, wrote, *burst*, *light*, [rather, *lit*] in the past time and passive participle.”—*Cobbett's English Gram.*, ¶ 169. How could the man who saw all this, insist on adding *st* for the second person, where not even the *d* of the past tense could he articulated? Am I to be called an innovator, because I do not like in conversation such *new* and *unauthorized* words as *litest*, *leaptest*, *curstest*; or a corrupter of the language, because I do not admire in poetry such unutterable monstrosities as, *light'dst*, *leap'dst*, *curs'dst*? The novelism, with the corruption too, is wholly theirs who stickle for these awkward forms.

“Thou thyself *doat’dst* on womankind, admiring.”—*Milton’s P. R.*, B. ii, l. 175.  
 “But he, the sev’nth from thee, whom thou *beheldst*.”—*Id.*, *P. L.*, B. xi, l. 700.  
 “Shall build a wondrous ark, as thou *beheldst*.”—*Id.*, *ib.*, B. xi, l. 819.  
 “Thou, who *inform’d’st* this clay with active fire!”—*Savage’s Poems*, p. 247.  
 “Thy valiantness was mine, thou *suck’dst* it from me.”—*Shak.*, *Coriol.*, Act iii.  
 “This cloth thou *dipp’dst* in blood of my sweet boy.”—*Id.*, *Henry VI*, P. i.  
 “Great Queen of arms, whose favour Tydeus won;  
 As thou *defend’st* the sire, defend the son.”—*Pope*, *Iliad*, B. x, l. 337.

OBS. 16.—Dr. Lowth, whose popular little Grammar was written in or about 1758, made no scruple to hem up both the poets and the Friends at once, by a criticism which I must needs consider more dogmatical than true; and which, from the suppression of what is least objectionable in it, has become, her hands, the source of still greater errors: “*Thou* in the polite, and even *in the familiar style, is disused*, and the plural *you* is employed instead of it; we say, *you have*, not *thou hast*. Though in this case, we apply *you* to a single person, yet the verb too *must agree with it in the plural number*; it must necessarily be, *you have*, not *you hast*. *You was* is an enormous solecism,\* and yet authors of the first rank have inadvertently fallen into it. \* \* \* On the contrary, the solemn style admits not of *you* for a single person. This *hath led* Mr. Pope into *a great impropriety* in the beginning of his Messiah:—

‘O thou my voice inspire,  
 Who *touch’d* Isaiah’s hallow’d lips with fire!’

The solemnity of the style would not admit of *you* for *thou*, in the pronoun; nor the measure of the verse *touchedst*, or *didst touch*, in the verb, as it *indispensably ought to be*, in the one or the other of those two forms; *you*, who *touched*, or *thou*, who *touchedst*, or *didst touch*.

‘Just of *thy* word, in every thought sincere;  
 Who *knew* no wish, but what the world might hear.’—Pope.

It ought to be *your* in the first line, or *knewest* in the second. In order to avoid this *grammatical inconvenience*, the two distinct forms of *thou* and *you*, are often used promiscuously by our modern poets, in the same paragraph, and even in the same sentence, very inelegantly and improperly:—

‘Now, now, I seize, I clasp *thy* charms;  
 And now *you burst*, ah cruel! from my arms.’—Pope.”  
 —*Lowth’s English Gram.*, p. 34.

OBS. 17.—The points of Dr. Lowth’s doctrine which are not sufficiently true, are the following: First, it is not true, that *thou*, in the familiar style, is *totally disused*, and the plural *you* employed universally in its stead; though Churchill, and others, besides the good bishop, seem to represent it so. It is now nearly two hundred years since the rise of the Society of Friends: and, whatever may have been the practice of others before or since, it is certain, that from their rise to the present day, there have been, at every point of time, many thousands who made no use of *you* for *thou*; and, but for the clumsy forms which

\* “You *were*, not you *was*, for you *was* seems to be as ungrammatical, as you *hast* would be. For the pronoun you being confessedly plural, its correspondent verb ought to be plural.”—*John Burn’s Gram.*, 10th Ed., P. 72.

most grammarians hold to be indispensable to verbs of the second person singular, the beautiful, distinctive, and poetical words, *thou*, *thyself*, *thy*, *thine*, and *thee*, would certainly be in no danger yet of becoming obsolete. Nor can they, indeed, at any rate, become so, till the fairest branches of the Christian Church shall wither; or, what should seem no gracious omen, her bishops and clergy learn to *pray in the plural number*, for fashion's sake. Secondly, it is not true, that, "*thou*, who *touch'd*," ought *indispensably* to be, "*thou*, who *touchedst*, or *didst touch*." It is far better to dispense with the inflection, in such a case, than either to impose it, or to resort to the plural pronoun. The "grammatical inconvenience" of dropping the *st* or *est* of a preterit, even in the solemn style, cannot be great, and may be altogether imaginary; that of imposing it, except in solemn prose, is not only real, but is often insuperable. It is not very agreeable, however, to see it added to some verbs, and dropped from others, in the same sentence: as,

"Thou, who *didst call* the Furies from the abyss,  
And round Orestes *bade* them howl and hiss."

—*Byron's Childe Harold*, Canto iv, st. 132.

"Thou *satt'st* from age to age insatiate,  
And *drank* the blood of men, and *gorged* their flesh."

—*Pollok's Course of Time*, B. vii, l. 700.

OBS. 18.—We see then, that, according to Dr. Lowth and others, *the only good English* in which one can address an individual on any ordinary occasion, is *you* with a plural verb; and that, according to Lindley Murray and others, *the only good English* for the same purpose, is *thou* with a verb inflected with *st* or *est*. Both parties to this pointed contradiction, are more or less in the wrong. The respect of the Friends for those systems of grammar which deny them the familiar use of the pronoun *thou*, is certainly not more remarkable, than the respect of the world for those which condemn the substitution of the plural *you*. Let grammar be a true record of existing facts, and all such contradictions must vanish. And, certainly, these great masters here contradict each other, in what every one who reads English, ought to know. They agree, however, in requiring, as indispensable to grammar, what is not only inconvenient, but absolutely impossible. For what "the measure of verse *will not admit*," cannot be used in poetry; and what may possibly be crowded into it, will often be far from ornamental. Yet our youth have been taught to spoil the versification of Pope and others, after the following manner: "Who *touch'd* Isaiah's hallow'd lips with fire." Say, "Who *touchedst* or *didst touch*."—*Murray's Key*, 8vo, p. 180. "For thee that ever *felt* another's wo." Say, "*Didst feel*."—*Ib.* "Who *knew* no wish but what the world might hear." Say, "Who *knewest* or *didst know*."—*Ib.* "Who all my sense *confin'd*." Say, "*Confinedst* or *didst confine*."—*Ib.*, p. 186. "Yet *gave* me in this dark estate." Say, "*Gavedst* or *didst give*."—*Ib.* "*Left* free the human will."—*Pope*. Murray's criticism extends not to this line, but by the analogy we must say, "*Leavedst* or *leftest*." Now it would be easier to fill a volume with such quotations, and such corrections, than to find sufficient authority to prove one such word as *gavedst*, *leavedst*, or *leftest*, to be really good English. If Lord Byron is authority for "work'dst," he is authority also for dropping the *st*, even where it might be added:—

—"Thou, who with thy frown  
*Annihilated* senates."—*Childe Harold's Pilgrimage*, Canto iv, st. 83.

OBS. 19.—According to Dr. Lowth, as well as Coar and some others, those preterits in which *ed* is sounded like *t*, “admit the change of *ed* into *t*; as, *snacht, checkt, snapt, mixt*, dropping also one of the double letters, *dwelt, past*.”—*Lowth’s Gram.*, p. 46. If this principle were generally adopted, the number of our regular verbs would be greatly diminished, and irregularities would be indefinitely increased. What confusion the practice must make in the language, especially when we come to inflect this part of the verb with *st* or *est*, has already been suggested. Yet an ingenious and learned writer, an able contributor to the Philological Museum, published at Cambridge, England, in 1832; tracing the history of this class of derivatives, and finding that after the *ed* was contracted in pronunciation, several eminent writers, as Spenser, Milton, and others, adopted in most instances a contracted form of orthography; has seriously endeavoured to bring us back to their practice. From these authors, he cites an abundance of such contractions as the following: 1. “Stowd, hewd, subdewd, joyd, cald, expeld, compeld, spoild, kild, seemd, benumbd, armd, redeemd, staind, shund, paynd, stird, appeard, perceivd, resolvd, obeyd, equald, foyld, hurld, ruind, joynd, scatterd, witherd,” and others ending in *d*. 2. “Clapt, whipt, worshipt, lopt, stopt, stampd, pickt, knockt, linkt, puft, stuff, hist, kist, abasht, brusht, astonisht, vanquisht, confest, talkt, twicht,” and many others ending in *t*. This scheme divides our regular verbs into three classes; leaving but very few of them to be written as they now are. It proceeds upon the principle of accommodating our orthography to the familiar, rather than to the solemn pronunciation of the language. “This,” as Dr. Johnson observes, “is to measure by a shadow.” It is, whatever show of learning or authority may support it, a pernicious innovation. The critic says, “I have not ventured to follow the example of Spenser and Milton throughout, but have merely attempted to revive the old form of the preterit in *t*.”—*Phil. Museum*, Vol. i, p. 663. “We ought not however to stop here,” he thinks; and suggests that it would be no small improvement, “to write *leveld* for *levelled*, *enameld* for *enamelled*, *reformd* for *reformed*,” &c.

OBS. 20.—If the multiplication of irregular preterits, as above described, is a grammatical error of great magnitude; the forcing of our old and well-known irregular verbs into regular forms that are seldom if ever used, is an opposite error nearly as great. And, in either case, there is the same embarrassment respecting the formation of the second person. Thus *Cobbett*, in his English Grammar in a Series of Letters, has dogmatically given us a list of *seventy* verbs, which, he says, are, “by some persons, *erroneously deemed irregular*,” and has included in it the words, *blow, build, cast, cling, creep, freeze, draw, throw*, and the like, to the number of *sixty*; so that he is really right in no more than one seventh part of his catalogue. And, what is more strange, for several of the irregularities which he censures, his own authority may be quoted from the early editions of this very book: as, “For you could have *thrown* about seeds.”—Edition of 1818, p. 13. “For you could have *throwed* about seeds.”—Edition of 1832, p. 13. “A tree is *blown* down.”—Ed. of 1818, p. 27. “A tree is *blowed* down.”—Ed. of 1832, p. 25. “It *froze* hard last night. Now, what was it that *froze* so hard?”—Ed. of 1818, p. 38. “It *frozen* hard last night. Now, what was it that *frozen* so hard?”—Ed. of 1832, p. 35. A whole page of such contradictions may be quoted from this one grammarian, showing that *he did not know* what form of the preterit he ought to prefer. From such an instructor, who can find out what is good English, and what is not? Respecting the inflections of the verb, this author says, “There are three persons; *but, our verbs have no variation in their spelling, except for the third person singular*.”—*Cobbett’s E. Gram.*, ¶ 88. Again: “Observe, however, that, in our language, there is no very great use in this distinction of modes; because, for the most part, our little *signs* do the business, and *they never vary in the letters of which they are composed*.”—*Ib.*, ¶ 95. One would suppose, from these remarks, that Cobbett meant to

dismiss the pronoun *thou* entirely from his conjugations. Not so at all. In direct contradiction to himself, he proceeds to inflect the verb as follows: “I work, *Thou workest*, He works; &c. I worked, *Thou workedst*, He worked; &c. I shall or will work, *Thou shalt or wilt work*, He shall or will work;” &c.—*Ib.*, ¶ 98. All the *compound* tenses, except the future, he rejects, as things which “can only serve to fill up a book.”

OBS. 21.—It is a common but erroneous opinion of our grammarians, that the unsyllabic suffix *st*, wherever found, is a modern contraction of the syllable *est*. No writer, however, thinks it always necessary to remind his readers of this, by inserting the sign of contraction; though English books are not a little disfigured by questionable apostrophes inserted for no other reason. Dr. Lowth says, “The nature of our language, the accent and pronunciation of it, inclines [incline] us to contract even all our regular verbs: thus *loved*, *turned*, are commonly pronounced in one syllable *lov’d*, *turn’d*: and the second person, which was originally in three syllables, *lovedest*, *turnedest*, is [say *has*] now become a dissyllable, *lovedst*, *turnedst*.”—*Lowth’s Gram.*, p. 45; *Hiley’s*, 45; *Churchill’s*, 104. See also *Priestley’s Gram.*, p. 114; and *Coar’s*, p. 102. This latter doctrine, with all its vouchers, still needs confirmation. What is it but an idle conjecture? If it were *true*, a few quotations might easily prove it; but when, and by whom, have any such words as *lovedest*, *turnedest*, ever been used? For aught I see, the simple *st* is as complete and as old a termination for the second person singular of an English verb, as *est*; indeed, it appears to be *older*: and, for the preterit, it is, and (I believe) *always has been*, the *most* regular, if not the *only* regular, addition. If *sufferedest*, *woundedest*, and *killedest*, are words more regular than *sufferedst*, *woundedst*, *killedst*, then are *heardest*, *knewest*, *slewest*, *sawest*, *rannest*, *metest*, *swammest*, and the like, more regular than *heardst*, *knewst*, *slewest*, *sawst*, *ranst*, *metst*, *swamst*, *satst*, *saidst*, *ledst*, *fledst*, *toldst*, and so forth; but not otherwise.\* So, in the solemn style, we write *seemest*, *deemest*, *swimmest*, like *seemeth*,

\* Among grammarians, as well as among other writers, there is some diversity of usage concerning the personal inflections of verbs; while nearly all, nowadays, remove the chief occasion for any such diversity, by denying with a fashionable bigotry the possibility of any grammatical use of the pronoun *thou* in a familiar style. To illustrate this, I will cite Cooper and Wells—two modern authors who earnestly agree to account *you* and its verb literally singular, and *thou* altogether erroneous, in common discourse: except that *Wells* allows the phrase, “*If thou art*,” for “*Common style*.”—*School Gram.*, p. 100.

1. Cooper, improperly referring *all* inflection of the verb to the grave or solemn style, says: “In the colloquial or familiar style, we observe *no change*. The same is the case in the plural number.” He then proceeds thus: “In the second person of the present of the indicative, in the *solemn style*, the verb takes *st* or *est*; and in the third person *th* or *eth*, as: *thou hast*, *thou lovest*, *thou teachest*; *he hath*, *he loveth*, *he goeth*. In the colloquial or *familiar style*, the verb *does not vary* in the second person; and in the third person, it ends in *s* or *es*, as: *he loves*, *he teaches*, *he does*. The indefinite, [i. e. the preterit,] in the second person singular of the indicative, in the *grave style*, ends in *est*, as: *thou taughtest*, *thou wentest*. ☞ But, *in those verbs*, *where* the sound of *st* will unite with the last syllable of the verb, the vowel is omitted, as: *thou lovedst*, *thou heardst*, *thou didst*.”—*Cooper’s Murray*, p. 60; *Plain and Practical Gram.*, p. 59. This, the reader will see, is somewhat contradictory; for the colloquial style varies the verb by “*s* or *es*,” and *taught’st may* be uttered without the *e*. As for “*lovedst*,” I deny that any vowel “*is omitted*” from it; but possibly one *may* be, as *lov’dst*.

2. Wells’s account of the same thing is this: “In the simple form of the present and past indicative, the second person singular of the *solemn style* ends regularly in *st* or *est*, as, thou *seest*, thou *hearest*, thou *sawest*, *thou heardest*; and the third person singular of the present, in *s* or *es*, as, he *hears*, he *wishes*, and also in *th* or *eth*, as, he *saith*, he *loveth*. In the simple form of the present indicative, the third person singular of the *common* or *familiar style*, ends in *s* or *es*; as, he *sleeps*; he *rises*. The first person singular of the *solemn style*, and the first and second persons singular of the *common style*, have *the same form* as the three persons plural.”—*Wells’s School Grammar*, 1st Ed. p. 83; 3d Ed. p. 86. This, too, is both defective and inconsistent. It does not tell when to add *est*, and when, *st* only. It does not show what the *regular preterit*, as *freed* or *loved*, should make with *thou*: whether *fredest* and *lovest*, by assuming the syllable *est*; *fre-*

*deemeth*, *swimmeth*, and so forth; but, when we use the form which has no increase of syllables, why is an apostrophe more necessary in the second person, than in the third?—in *seemst*, *deemst*, *swimst*, than in *seems*, *deems*, *swims*? When final *e* is dropped from the verb, the case is different; as,

“Thou *cutst* my head off with a golden axe,  
And *smil'st* upon the stroke that murders me.”—*Shakspeare*.

OBS. 22.—Dr. Lowth supposes the verbal termination *s* or *es* to have come from a contraction of *eth*. He says, “Sometimes, by the rapidity of our pronunciation, the vowels are shortened or lost; and the consonants, which are thrown together, do not coalesce with one another, and are therefore changed into others of the same organ, or of a kindred species. This occasions a farther deviation from *the regular form*: thus, *loveth*, *turneth*, are contracted into *lov'th*, *turn'th*, and these, for easier pronunciation, *immediately* become *loves*, *turns*.”—*Lowth's Gram.*, p. 46; *Hiley's*, 45. This etymology may possibly be just, but certainly such contractions as are here spoken of, were not very common in Lowth's age, or even in that of Ben Jonson, who resisted the *s*. Nor is the sound of sharp *th* very obviously akin to flat *s*. The change would have been less violent, if *lov'st* and *turnst* had become *loves* and *turns*; as some people nowadays are apt to change them, though doubtless this is a grammatical error: as,

“And wheresoe'er thou *casts* thy view.”—*Cowley*.

“Nor thou that *flings* me floundering from thy back.”—*Bat. of Frogs and Mice*, 1, 123.

“Thou *sitt'st* on high, and *measures* destinies.”—*Pollok, Course of Time*, B. vi, 1, 668.

OBS. 23.—Possibly, those personal terminations of the verb which do not form syllables, are mere contractions or relics of *est* and *eth*, which are syllables; but it is perhaps not quite so easy to prove them so, as some authors imagine. In the oldest specimens given by Dr. Johnson in his History of the English Language,—specimens bearing a much earlier date than the English language can claim,—even in what he calls “Saxon in its highest state of purity,” both *st* and *th* are often added to verbs, without forming additional syllables, and without any sign of contraction. Nor were verbs of the second person singular always inflected of old, in those parts to which *est* was afterwards very commonly added. Examples: “Buton ic wat thæt thu *hoefst* thara wæpna.”—*King Alfred*. “But I know that thou *hast* those weapons.” “Thæt thu *oncnawe* thara worda sothfæstnesse. of tham the thu *geloered eart*.”—*Lucæ*, i, 4. “That thou *mightest know* the certainty of those things wherein thou *hast been instructed*.”—*Luke*, i, 4. “And thu *nemst* his naman Johannes.”—*Lucæ*, i, 13. “And his name *schal be clepid* Jon.”—*Wickliffe's Version*. “And thou *shalt call* his name John.”—*Luke*, i, 13. “And he ne *drincth* win ne beor.”—*Lucæ*, i, 15. “He *schal* not *drinke* wyn ne sydyr.”—*Wickliffe*. “And *shall drink* neither wine nor strong drink.”—*Luke*, i, 15. “And nu thu *bist* suwigende. and thu *sprecan* ne *miht* oth thone dæg the thas thing *gewurthath*. fortham thu minum wordum ne

---

*edst* and *lov-edst*, by increasing syllabically from assuming *st* only; or *freedst* and *lov'dst*, or *lovedst*, still to be uttered as monosyllables. It absurdly makes “*s* or *es*” a sign of two opposite styles. (See OBS. 9th, above.) And it does not except “*I am*, *I was*, *If I am*, *If I was*, *If thou art*, *I am loved*,” and so forth, from requiring “the same form, [*are* or *were*,] as the three persons plural.” This author prefers “*hearest*,” the other, “*heardst*,” which I think better warranted:

“And *heardst* thou why he drew his blade?

*Heardst* thou that shameful word and blow

Brought Roderick's vengeance on his foe?”—*Scott, L. L.*, C. v, st. 6.

*gelyfdest*. tha *beoth* on hyra timan *gefyllede*.”—*Lucæ*, i, 20. “And lo, thou *schalt* be doumbe, and thou *schalt* not mowe *speke*, til into the day in which these thingis *schulen be don*, for thou *hast* not *beleved* to my wordis, whiche *schulen be fulfilled* in her tyme.”—*Wickliffe*. “And, behold, thou *shalt* be dumb, and not able to speak, until the day *that* \* these things *shall be performed*, because thou *believest* not my words, which *shall be fulfilled* in their season.”—*Luke*, i, 20.

“In chaungyng of her course, the chaunge *shewth* this,  
Vp *startth* a knaue, and downe there *falth* a knight.”—*Sir Thomas More*.

OBS. 24.—The corollary towards which the foregoing observations are directed, is this. As most of the peculiar terminations by which the second person singular is properly distinguished in the solemn style, are not only difficult of utterance, but are quaint and formal in conversation; the preterits and auxiliaries of our verbs are seldom varied in familiar discourse, and the present is generally simplified by contraction, or by the adding of *st* without increase of syllables. A distinction between the solemn and the familiar style has long been admitted, in the pronunciation of the termination *ed*, and in the ending of the verb in the third person singular; and it is evidently according to good taste and the best usage, to admit such a distinction in the second person singular. In the familiar use of the second person singular, the verb is usually varied only in the present tense of the indicative mood, and in the auxiliary *hast* of the perfect. This method of varying the verb renders the second person singular analogous to the third, and accords with the practice of the most intelligent of those who retain the common use of this distinctive and consistent mode of address. It disencumbers their familiar dialect of a multitude of harsh and useless terminations, which serve only, when uttered, to give an uncouth prominence to words not often emphatic; and, without impairing the strength or perspicuity of the language, increases its harmony, and reduces the form of the verb in the second person singular nearly to the same simplicity as in the other persons and numbers. It may serve also, in some instances, to justify the poets, in those abbreviations for which they have been so unreasonably censured by Lowth, Murray, and some other grammarians: as,

“And thou their natures *knowst*, and *gave* them names,  
Needless to thee repeated.”—*Milton*, P. L., Book vii, line 494.

OBS. 25.—The writings of the Friends, being mostly of a grave cast, afford but few examples of their customary manner of forming the verb in connexion with the pronoun *thou*, in familiar discourse. The following may serve to illustrate it: “Suitable to the office thou *layst* claim to.”—R. BARCLAY’S *Works*, Vol. i, p. 27. “Notwithstanding thou *may have* sentiments opposite to mine.”—THOMAS STORY. “To devote all thou *had* to his service;”—“If thou *should come*;”—“What thou *said*;”—“Thou kindly *contributed*;”—“The epistle which thou *sent* me;”—“Thou *would* perhaps *allow*;”—“If thou *submitted*;”—“Since thou *left*;”—“*Should* thou *act*;”—“Thou *may be* ready;”—“That thou *had met*;”—“That thou *had intimated*;”—“Before thou *puts*” [putst];—“What thou *meets*” [meetst];—“If thou *had made*;”—“I observed thou *was*;”—“That thou *might put* thy trust;”—“Thou *had been* at my house.”—JOHN KENDALL. “Thou *may be plundered*;”—“That thou *may feel*;”—“Though thou *waited* long, and *sought* him;”—“I hope thou *will bear* my style;”—“Thou also *knows*” [knowst];—“Thou *grew* up;”—“I wish thou *would* yet *take* my counsel.”—STEPHEN CRISP.

\* Better, as Wickliffe has it, “the day *in which*,” though, after nouns of time, the relative *that* is often used, like the Latin ablative *quo* or *quā*, as being equivalent to *in which* or *on which*.

“Thou *manifested* thy tender regard, *stretched* forth thy delivering hand, and *fed* and *sustained* us.”—SAMUEL FOTHERGILL. The writer has met with thousands that used the second person singular in conversation, but never with any one that employed, on ordinary occasions, all the regular endings of the solemn style. The simplification of the second person singular, which, to a greater or less extent, is everywhere adopted by the Friends, and which is here defined and explained, removes from each verb eighteen of these peculiar terminations; and, (if the number of English verbs be, as stated by several grammarians, 8000,) disburdens their familiar dialect of 144,000 of these awkward and useless appendages.\* This simplification is supported by usage as extensive as the familiar use of the pronoun *thou*; and is also in accordance with the canons of criticism: “The *first* canon on this subject is, All words and phrases which are remarkably harsh and unharmonious, and not absolutely necessary, should be rejected.” See *Campbell’s Philosophy of Rhetoric*, B. ii, Ch. ii, Sec. 2, Canon Sixth, p. 181. See also, in the same work, (B. hi, Ch. iv, Sec. 2d,) an *express defence* of “those elisions whereby the sound is improved;” especially of the suppression of the “feeble vowel in the last syllable of the preterits of our regular verbs;” and of “such abbreviations” as “the eagerness of conveying one’s sentiments, the rapidity and ease of utterance, necessarily produce, in the dialect of conversation.”—Pages 426 and 427. Lord Kames says, “That the English tongue, originally harsh, is at present much softened by dropping many *redundant consonants*, is undoubtedly true; that it is not capable of being further mellowed without suffering in its force and energy, will scarce be thought by any one who possesses an ear.”—*Elements of Criticism*, Vol. ii, p. 12.

OBS. 26.—The following examples are from a letter of an African Prince, translated by Dr. Desaguillier of Cambridge, England, in 1743, and published in a London newspaper: “I lie there too upon the bed *thou presented* me;”—“After *thou* left me, in thy swimming house;”—“Those good things *thou presented* me;”—“When *thou spake* to the Great Spirit and his Son.” If it is desirable that our language should retain this power of a simple literal version of what in others may be familiarly expressed by the second person singular, it is clear that our grammarians must not continue to dogmatize according to the

---

\* It is not a little strange, that some men, who *never have seen or heard* such words as their own rules would produce for the second person singular of many hundreds of our most common verbs, will nevertheless pertinaciously insist, that it is wrong to countenance in this matter any departure from the style of King James’s Bible. One of the very rashest and wildest of modern innovators,—a critic who, but for the sake of those who still speak in this person and number, would gladly consign the pronoun *thou*, and all its attendant verbal forms, to utter oblivion,—thus treats this subject and me: “The Quakers, or Friends, however, use *thou*, and its attendant form of the *asserter*, in conversation. FOR THEIR BENEFIT, *thou* is given, in this work, in all the varieties of inflection; (in some of which it could not properly be used in an address to the Deity;) for THEY ERR MOST EGREGIOUSLY in the use of *thou*, with the form of the *asserter* which follows *he* or *they*, and are countenanced in their errors by G. Brown, who, instead of ‘disburdening *the language* of 144,000 useless *distinctions*, *increases* their number just 144,000.”—*Oliver B. Peirce’s Gram.*, p. 85 Among people of sense, converts are made by teaching, and reasoning, and proving; but this man’s disciples must yield to the balderdash of a *false speller*, *false quoter*, and *false assertor*! This author says, that “*dropt*” is the past tense of “*drop*,” (p. 118;) let him prove, for example, that *droptest* is not a clumsy *innovation*, and that *droppedst* is not a formal archaism, and then tell of the egregious error of adopting neither of these forms in common conversation. The following, with its many common contractions, is the language of POPE; and I ask this, or any other opponent of my doctrine, TO SHOW HOW SUCH VERBS ARE RIGHTLY FORMED, either for poetry or for conversation, *in the second person singular*.

“It *fled*, I *follow’d*; now in hope, now pain; It *stopt*,  
I *stopt*; it *mov’d*, I *mov’d* again.

At last it *fix’t*, ’twas on what plant it *pleas’d*,

And where it *fix’d*, the beauteous bird I *seiz’d*.”—*Dunciad*, B. IV, l. 427.

letter of some authors hitherto popular. But not every popular grammar condemns such phraseology as the foregoing. “I improved, Thou *improvedst*, &c. This termination of the second person preterit, on account of its harshness, *is seldom used*, and especially in the irregular verbs.”—*Harrison’s Gram.*, p. 26. “The termination *est*, annexed to the preter tenses of verbs, is, at best, a very harsh one, when it is contracted, according to our general custom of throwing out the *e*; as *learnedst*, for *learnedest*; and especially, if it be again contracted into one syllable, *as it is commonly pronounced*, and made *learndst*. \* \* \* I believe a writer or speaker would have recourse to any periphrasis rather than say *keptest*, or *keptst*. \* \* \* Indeed this harsh termination *est* is *generally quite dropped in common conversation*, and sometimes by the poets, in writing.”—*Priestley’s Gram.*, p. 115. The fact is, it never was added with much uniformity. Examples: “But like the hell hounde *thou waxed* fall furious, expressing thy malice when *thou* to honour *stied*.”—FABIAN’S CHRONICLE, V. ii, p. 522: in *Tooke’s Divers.*, T. ii, p. 232.

“Thou from the arctic regions came.

Perhaps Thou noticed on thy way a little orb,

Attended by one moon—her lamp by night.”—*Pollok*, B. ii, l. 5.

“So I believ’d.’—No, Abel! to thy grief,

So thou *relinquish’d* all that was belief.”—*Crabbe, Borough*, p. 279.

OBS. 27.—L. Murray, and his numerous copyists, Ingersoll, Greenleaf, Kirkham, Fisk, Flint, Comly, Alger, and the rest; though they insist on it, that the *st* of the second person can never be dispensed with, except in the imperative mood and some parts of the subjunctive; are not altogether insensible of that monstrous harshness which their doctrine imposes upon the language. Some of them tell us to avoid this by preferring the auxiliaries *dost* and *didst*: as *dost burst*, for *burstest*; *didst check*, for *checkedst*. This recommendation proceeds on the supposition that *dost* and *didst* are smoother syllables than *est* and *edst*; which is not true: *didst learn* is harsher than either *learnedst* or *learntest*; and all three of them are intolerable in common discourse. Nor is the “*energy*, or *positiveness*,” which grammarians ascribe to these auxiliaries, always appropriate. Except in a question, *dost* and *didst*, like *do*, *does*, and *did*, are usually signs of *emphasis*; and therefore unfit to be substituted for the *st*, *est*, or *edst*, of an unemphatic verb. Kirkham, who, as we have seen, graces his Elocution with such unutterable things, as “*prob’dst*, *hurl’dst*, *arm’dst*, *want’dst*, *burn’dst*, *bark’dst*, *bubbl’dst*, *troubbl’dst*,” attributes the use of the plural for the singular, to a design of avoiding the raggedness of the latter. “In order to avoid the disagreeable harshness of sound, occasioned by the frequent recurrence of the termination *est*, *edst*, in the adaptation of our verbs to the nominative *thou*, a *modern innovation* which substitutes *you* for *thou*, in familiar style, has generally been adopted. This innovation contributes greatly to the harmony of our colloquial style. *You* was formerly restricted to the plural number; but now it is employed to represent either a singular or a plural noun.”—*Kirkham’s Gram.*, p. 99. A modern innovation, forsooth! Does not every body know it was current four hundred years ago, or more? Certainly, both *ye* and *you* were applied in this manner, to the great, as early as the fourteenth century. Chaucer sometimes used them so, and he died in 1400. Sir T. More uses them so, in a piece dated 1503.

“O dere cosyn, Dan Johan, she sayde,

What eyleth *you* so rathe to aryse?”—*Chaucer*.

Shakspeare most commonly uses *thou*, but he sometimes has *you* in stead of it. Thus, he makes Portia say to Brutus:

“*You* suddenly arose, and walk’d about,  
Musing, and sighing, with *your* arms across;  
And when I ask’d *you* what the matter was,  
*You* star’d upon me with ungente looks.”—*J. Cæsar*, Act ii, Sc. 2.

OBS. 28.—“There is a natural tendency in all languages to throw out the rugged parts which improper consonants produce, and to preserve those which are melodious and agreeable to the ear.”—*Gardiner’s Music of Nature*, p. 29. “The English tongue, so remarkable for its grammatical simplicity, is loaded with a great variety of dull unmeaning terminations. Mr. Sheridan attributes this defect, to an utter inattention to what is easy to the organs of speech and agreeable to the ear; and further adds, that, ‘the French having been adopted as the language of the court, no notice was taken, of the spelling or pronunciation of our words, until the reign of queen Anne.’ So little was spelling attended to in the time of Elizabeth, that Dr. Johnson informs us, that on referring to Shakspeare’s will, to determine how his name was spelt, he was found to have written it himself [in] no *less* [fewer] than three different ways.”—*Ib.*, p. 477. In old books, our participial or verbal termination *ed*, is found written in about a dozen different ways; as, *ed, de, d, t, id, it, yd, yt, ede, od, ud*. For *est* and *eth*, we find sometimes the consonants only; sometimes, *ist* or *yst, ith* or *yth*; sometimes, for the latter, *oth* or *ath*; and sometimes the ending was omitted altogether. In early times also the *th* was an ending for verbs of the third person plural, as well as for those of the third person singular;\* and, in the imperative mood, it was applied to the second person, both singular and plural: as,

“*Demith* thyself, that demist other’s dede;  
And trouthe the shall deliver, it’s no drede.”—*Chaucer*.

OBS. 29.—It must be obvious to every one who has much acquaintance with the history of our language, that this part of its grammar has always been quite as unsettled as it is now; and, however we may wish to establish its principles, it is idle to teach for absolute certainty that which every man’s knowledge may confute. Let those who desire to see our forms of conjugation as sure as those of other tongues, study to exemplify in their own practice what tends to uniformity. The best that can be done by the author of a grammar, is, to exhibit usage, as it has been, and as it is; pointing out to the learner what

---

\* The Rev. W. Allen, in his *English Grammar*, p. 132, says: “*Yth* and *eth* (from the Saxon *lað*) were formerly, *plural terminations*; as, ‘Manners *makyth* man.’ William of Wykeham’s motto. ‘After long advisement, they *taketh* upon them to try the matter.’ Stapleton’s Translation of Bede. ‘Doctrine and discourse *maketh* nature less importune.’ Bacon.” The use of *eth* as a plural termination of verbs, was evidently earlier than the use of *en* for the same purpose. Even the latter is utterly obsolete, and the former can scarcely have been *English*. The Anglo-Saxon verb *lufian*, or *lufigean*, to love, appears to have been inflected with the several pronouns thus: Ic lufige, Thu lufast, He lufath, We lufiath, Ge lufiath, Hi lufiath. The form in Old English was this: I love, Thou lovest, He loveth, We loven, Ye loven, They loven. Dr. Priestley remarks, (though in my opinion unadvisedly,) that, “Nouns of a plural form, but of a singular signification, require a singular construction; as, mathematics *is* a useful study. This observation will likewise,” says he, “in some measure, vindicate the grammatical propriety of the famous saying of William of Wykeham, Manners *maketh* man.”—*Priestley’s Gram.*, p. 189. I know not what *half-way* vindication there can be, for any such construction. *Manners* and *mathematics* are not nouns of the singular number, and therefore both *is* and *maketh* are wrong. I judge it better English to say, “Mathematics *are* a useful study.”—“Manners *make* the man.” But perhaps both ideas may be still better expressed by a change of the nominative, thus: “The *study* of mathematics *is* useful.”—“*Behaviour makes* the man.”

is most fashionable, as well as what is most orderly and agreeable. If by these means the usage of writers and speakers cannot be fixed to what is fittest for their occasions, and therefore most grammatical, there is in grammar no remedy for their inaccuracies; as there is none for the blunders of dull opinionists, none for the absurdities of Ignorance stalled in the seats of Learning. Some grammarians say, that, whenever the preterit of an irregular verb is like the present, it should take *edst* for the second person singular. This rule, (which is adopted by Walker, in his *Principles*, No. 372,) gives us such words as *cast-edst*, *cost-edst*, *bid-dedst*, *burst-edst*, *cut-tedst*, *hit-tedst*, *let-tedst*, *put-tedst*, *hurt-edst*, *rid-dedst*, *shed-dedst*, &c. But the rule is groundless. The few examples which may be adduced from ancient writings, in support of this principle, are undoubtedly formed in the usual manner from regular preterits now obsolete; and if this were not the case, no person of taste could think of employing, on any occasion, derivatives so uncouth. Dr. Johnson has justly remarked, that “the chief defect of our language, is ruggedness and asperity.” And this defect, as some of the foregoing remarks have shown, is peculiarly obvious, when even the regular termination of the second person singular is added to our preterits. Accordingly, we find numerous instances among the poets, both ancient and modern, in which that termination is omitted. See Percy’s *Reliques of Ancient Poetry*, everywhere.

“Thou, who of old the prophet’s eye *unsealed*.”—*Pollok*.

“Thou *saw* the fields laid bare and waste.”—*Burns*.\*

OBS. 30.—With the familiar form of the second person singular, those who constantly put *you* for *thou* can have no concern; and many may think it unworthy of notice, because Murray has said nothing about it: others will hastily pronounce it bad English, because they have learned at school some scheme of the verb, which implies that this must needs be wrong. It is this partial learning which makes so much explanation here necessary. The formation of this part of speech, form it as you will, is *central to grammar*, and cannot but be very important. Our language can never entirely drop the pronoun *thou*, and its derivatives, *thy*, *thine*, *thee*, *thyselves*, without great injury, especially to its poetry. Nor can the distinct syllabic utterance of the termination *ed* be now generally practised, except in

---

\* What the state of our literature would have been, had no author attempted any thing on English grammar, must of course be a matter of mere conjecture, and not of any positive “conviction.” It is my opinion, that, with all their faults, most of the books and essays in which this subject has been handled, have been in some degree *beneficial*, and a few of them highly so; and that, without their influence, our language must have been much more chaotic and indeterminable than it now is. But a late writer says, and, with respect to *some* of our verbal terminations, says wisely: “It is my *sincere conviction* that fewer irregularities would have crept into the language had no grammars existed, than have been authorized by grammarians; for it should be understood that the first of our grammarians, finding that good writers differed upon many points, instead of endeavouring to reconcile these discrepancies, absolutely perpetuated them by *citing opposite usages, and giving high authorities for both*. To this we owe all the irregularity which exists in the personal terminations of verbs, some of the best early writers using them *promiscuously*, some using them *uniformly*, and others making *no use* of them; and really *they are of no use* but to puzzle children and foreigners, perplex poets, and furnish an awkward dialect to that exemplary sect of Christians, who in every thing else study simplicity.”—*Fowle’s True E. Gram.*, Part II, p. 26. Wells, a still later writer, gives this unsafe rule: “*When the past tense is a monosyllable not ending in a single vowel*, the second person singular of the solemn style is generally formed by the addition of *est*; as *hearest*, *fleddest*, *tookest*. *Hadst*, *wast*, *saidst*, and *didst*, are exceptions.”—*Wells’s School Gram.*, 1st Ed., p. 106; 3d Ed., p. 110; 113th Ed., p. 115. Now the termination *d* or *ed* commonly adds no syllable; so that the regular past tense of any monosyllabic verb is, with a few exceptions, a monosyllable still; as, *freed*, *feed*, *loved*, *feared*, *planned*, *turned*: and how would these sound with *est* added, which Lowth, Hiley, Churchill, and some others erroneously claim as having pertained to such preterits anciently? Again, if *heard* is a contraction of *heared*, and *fled*, of *fleed*, as seems probable; then are *heardst* and *fledtst*, which are sometimes used, more regular than *hearest*, *fleddest*: so of many other preterits.

solemn prose. It is therefore better, not to insist on those old verbal forms against which there are so many objections, than to exclude the pronoun of the second person singular from all such usage, whether familiar or poetical, as will not admit them. It is true that on most occasions *you* may be substituted for *thou*, without much inconvenience; and so may *we* be substituted for *I*, with just as much propriety; though Dr. Perley thinks the latter usage “is not to be encouraged.”—*Gram.*, p. 28. Our authors and editors, like kings and emperors, are making *we* for *I* their most common mode of expression. They renounce their individuality to avoid egotism. And when all men shall have adopted this enallage, the fault indeed will be banished, or metamorphosed, but with it will go an other sixth part of every English conjugation. The pronouns in the following couplet are put for the first person singular, the second person singular, and the second person plural; yet nobody will understand them so, but by their antecedents:

“Right trusty, and so forth—*we* let *you* to know  
*We* are very ill used by *you mortals* below.”—*Swift*.

OBS. 31.—It is remarkable that some, who forbear to use the plural for the singular in the second person, adopt it without scruple, in the first. The figure is the same in both; and in both, sufficiently common. Neither practice is worthy to be made more general than it now is. If *thou* should not be totally sacrificed to what was once a vain compliment, neither should *I*, to what is now an occasional, and perhaps a vain assumption. Lindley Murray, who does not appear to have used *you* for *thou*, and who was sometimes singularly careful to paraphrase and avoid the latter, nowhere in his grammar speaks of himself in the first person singular. He is often “the *Compiler*,” rarely, “the *Author*,” generally, “*We*,” as, “*We* have distributed these parts of grammar, in the mode which *we* think most correct and intelligible.”—*Octavo Gram.*, p. 58. “*We* shall not pursue this subject any further.”—*Ib.*, p. 62. “*We* shall close these remarks on the tenses.”—*Ib.*, p. 76. “*We* presume no solid objection can be made.”—*Ib.*, p. 78. “The observations which *we* have made.”—*Ib.*, p. 100. “*We* shall produce a remarkable example of this beauty from Milton.”—*Ib.*, p. 331. “*We* have now given sufficient openings into this subject.”—*Ib.*, p. 334. This usage has authority enough; for it was not uncommon even among the old Latin grammarians; but he must be a slender scholar, who thinks the pronoun *we* thereby becomes *singular*. What advantage or fitness there is in thus putting *we* for *I*, the reader may judge. Dr. Blair did not hesitate to use *I*, as often as he had occasion; neither did Lowth, or Johnson, or Walker, or Webster: as, “*I* shall produce a remarkable example of this beauty from Milton.”—*Blair’s Rhet.*, p. 129. “*I* have now given sufficient openings into this subject.”—*Ib.*, p. 131. So in *Lowth’s Preface*: “*I* believe,”—“*I* am persuaded,”—“*I* am sure,”—“*I* think,”—“*I* am afraid,”—“*I* will not take upon *me* to say.”

OBS. 32.—Intending to be critical without hostility, and explicit without partiality, I write not for or against any sect, or any man; but to teach all who desire to know *the grammar* of our tongue. The student must distinctly understand, that it is necessary to speak and write differently, according to the different circumstances or occasions of writing. Who is he that will pretend that the solemn style of the Bible may be used in familiar discourse, without a mouthing affectation? In preaching, or in praying, the ancient terminations of *est* for the second person singular and *eth* for the third, as well as *ed* pronounced as a separate syllable for the preterit, are admitted to be generally in better taste than the smoother forms of the familiar style: because the latter, though now frequently heard in religious assemblies, are not so well suited to the dignity and gravity of a sermon or a prayer. In grave poetry also, especially when it treats of scriptural subjects,

to which *you* put for *thou* is obviously unsuitable, the personal terminations of the verb, though from the earliest times to the present day they have usually been contracted and often omitted by the poets, ought still perhaps to be considered grammatically necessary, whenever they can be uttered, agreeably to the notion of our tuneless critics. The critical objection to their elision, however, can have no very firm foundation while it is admitted by some of the objectors themselves, that, "Writers *generally* have recourse to this mode of expression, that they may avoid harsh terminations."—*Irving's Elements of English Composition*, p. 12. But if writers of good authority, such as Pope, Byron, and Pollok, have sometimes had recourse to this method of simplifying the verb, even in compositions of a grave cast, the elision may, with tenfold stronger reason, be admitted in familiar writing or discourse, on the authority of general custom among those who choose to employ the pronoun *thou* in conversation.

"But thou, false Arcite, never *shall* obtain," &c.—*Dryden, Fables*.

"These goods *thyself can* on thyself bestow."—*Id., in Joh. Dict.*

"What I show, *thy self may* freely on thyself bestow."—*Id., Lowth's Gram.*, p. 26.

"That thou *might* Fortune to thy side engage."—*Prior*.

"Of all thou ever *conquered*, none was left."—*Pollok*, B. vii, l. 760.

"And touch me trembling, as thou *touched* the man," &c.—*Id.*, B. x, l. 60.

OBS. 33.—Some of the Friends (perhaps from an idea that it is less formal) misemploy *thee* for *thou*; and often join it to the third person of the verb in stead of the second. Such expressions as, *thee does*, *thee is*, *thee has*, *thee thinks*, &c., are double solecisms; they set all grammar at defiance. Again, many persons who are not ignorant of grammar, and who employ the pronoun aright, sometimes improperly sacrifice concord to a slight improvement in sound, and give to the verb the ending of the third person, for that of the second. Three or four instances of this, occur in the examples which have been already quoted. See also the following, and many more, in the works of the poet Burns; who says of himself, "Though it cost the schoolmaster some thrashings, I made an excellent English scholar; and, by the time I was ten or eleven years of age, I was a critic in substantives, VERBS, and particles:"—"But when thou *pours*;"—"There thou *shines* chief;"—"Thou *clears* the head;"—"Thou *strings* the nerves;"—"Thou *brightens* black despair;"—"Thou *comes*;"—"Thou *travels* far;"—"Now *thou's turned* out;"—"Unseen thou *lurks*;"—"O thou pale orb that silent *shines*." This mode of simplifying the verb, confounds the persons; and, as it has little advantage in sound, over the regular contracted form of the second person, it ought to be avoided. With this author it may be, perhaps, a Scotticism: as,

"Thou *paints* auld nature to the nines,

In thy sweet Caledonian lines."—*Burns to Ramsay*.

"Thou *paintst old* nature," would be about as smooth poetry, and certainly much better English. This confounding of the persons of the verb, however, is no modern peculiarity. It appears to be about as old as the use of *s* for *th* or *eth*. Spenser, the great English poet of the sixteenth century, may be cited in proof: as,

"Siker, *thou's* but a lazy loord,

And *rekes* much of thy swinke."—*Joh. Dict.*, *w. Loord*.

OBS. 34.—In the solemn style, (except in poetry, which usually contracts these forms,) the second person singular of the present indicative, and that of the irregular preterits, commonly end in *est*, pronounced as a separate syllable, and requiring the duplication of

the final consonant, according to Rule 3d for Spelling: as, I *run*, thou *runnest*; I *ran*, thou *rannest*. But as the termination *ed*, in solemn discourse, constitutes a syllable, the regular preterits form the second person singular by assuming *st*, without further increase of syllables: as, I *loved*, thou *lovedst*; not, “*lovedest*,” as Chandler made it in his *English Grammar*, p. 41, Edition of 1821; and as Wells’s rule, above cited, if literally taken, would make it. *Dost* and *hast*, and the three irregular preterits, *wast*, *didst*, and *hadst*, are permanently contracted; though *doest* and *diddest* are sometimes seen in old books. *Saidst* is more common, and perhaps more regular, than *saidest*. *Werest* has long been contracted into *wert*: “I would thou *werest* either cold or hot.”—*W. Perkins*, 1608.\* The auxiliaries *shall* and *will* change the final *l* to *t*, and become *shalt* and *wilt*. To the auxiliaries, *may*, *can*, *might*, *could*, *would*, and *should*, the termination *est* was formerly added; but they are now generally written with *st* only, and pronounced as monosyllables, even in solemn discourse. Murray, in quoting the Scriptures, very often charges *mayest* to *mayst*, *mightest* to *mightst*, &c. Some other permanent contractions are occasionally met with, in what many grammarians call the solemn style; as *bidst* for *biddest*, *fledst* for *fleddest*, *satst* for *sattest*:

“Riding sublime, thou *bidst* the world adore,  
And humblest nature with thy northern blast.”—*Thomson*.

“Fly thither whence thou *fledst*.”—*Milton*, *P. L.*, B. iv, l. 963.

“Unspeakable, who *sitst* above these heavens.”—*Id.*, *ib.*, B. v, l. 156.

“Why *satst* thou like an enemy in wait?”—*Id.*, *ib.*, B. iv, l. 825.

OBS. 35.—The formation of the third person singular of verbs, is *now* precisely the same as that of the plural number of nouns: as, *love*, *loves*; *show*, *shows*; *boast*, *boasts*; *fly*, *flies*; *reach*, *reaches*. This form began to be used about the beginning of the sixteenth century. The ending seems once to have been *es*, sounded as *s* or *z*: as,

“And thus I see among these pleasant thynges  
Eche care *decayes*, and yet my sorrow *sprynges*.”—*Earl of Surry*.

“With throte yrent, he *roares*, he *lyeth* along.”—*Sir T. Wyatt*.

“He *dyeth*, he is all dead, he *pantes*, he *restes*.”—*Id.*, 1540.

In all these instances, the *e* before the *s* has become improper. The *es* does not here form a syllable; neither does the *eth*, in “*lyeth*” and “*dyeth*.” In very ancient times, the third person singular appears to have been formed by adding *th* or *eth* nearly as we now add *s* or *es*.† Afterwards, as in our common Bible, it was formed by adding *th* to verbs

\* Chaucer appears not to have inflected this word in the second person: “Also ryght as *thou were* ensample of moche folde errour, righte so thou must be ensample of manifold correction.”—*Testament of Love*. “Rennin and crie as *thou were* wode.”—*House of Fame*. So others: “I wolde *thou were* cold or hoot.”—WICKLIFFE’S VERSION OF THE APOCALYPSE. “I wolde *thou were* cold or hote.”—VERSION OF EDWARD VI: *Tooke*, Vol. ii, p. 270. See Rev., iii, 15: “I would thou *wert* cold or hot.”—COMMON VERSION.

† See evidence of the *antiquity* of this practice, in the examples under the twenty-third observation above. According to Churchill, it has had some local continuance even to the present time. For, in a remark upon Lowth’s contractions, *lov’t*, *turn’t*, this author says, “These are *still in use in some country places*, the third person singular of verbs in general being formed by the addition of the sound *th* simply, not making an additional syllable.”—*Churchill’s Gram.*, p. 255 So the *eth* in the following example adds no syllable:—

“Death *goeth* about the field, rejoicing mickle  
To see a sword that so surpass’d his sickle.”

*Harrington’s Ariosto*, B. xiii: see *Singer’s Shak.*, Vol. ii, p. 296.

ending in *e*, and *eth* to all others; as, “For he that *eateth* and *drinketh* unworthily, *eateth* and *drinketh* damnation to himself.”—1 *Cor.*, xi, 29. “He *quickeneth* man, who is dead in trespasses and sins; he *keepeth* alive the quickened soul, and *leadeth* it in the paths of life; he *scattereth*, *subdueth*, and *conquereth* the enemies of the soul.”—I. *Penington*. This method of inflection, as now pronounced, always adds a syllable to the verb. It is entirely confined to the solemn style, and is little used. *Doth*, *hath*, and *saith*, appear to be permanent contractions of verbs thus formed. In the days of Shakspeare, both terminations were common, and he often mixed them, in a way which is not very proper now: as,

“The quality of mercy is not strained;  
It *droppeth*, as the gentle rain from heaven  
Upon the place beneath: it is twice bless’d;  
It *blesseth* him that *gives*, and him that *takes*.”—*Merchant of Venice*.

OBS. 36.—When the second person singular is employed in familiar discourse, with any regard to correctness, it is usually formed in a manner strictly analogous to that which is now adopted in the third person singular. When the verb ends with a sound which will unite with that of *st* or *s*, the second person singular is formed by adding *s* only, and the third, by adding *s* only; and the number of syllables is not increased: as, I *read*, thou *readst*, he *reads*; I *know*, thou *knowst*, he *knows*; I *take*, thou *takest*, he *takes*; I *free*, thou *freest*, he *frees*. For, when the verb ends in mute *a*, no termination renders this *a* vocal in the familiar style, if a synæresis can take place. To prevent their readers from ignorantly assuming the pronunciation of the solemn style, the poets have generally marked such words with an apostrophe: as,

“Look what thy soul holds dear, imagine it  
To lie the way thou *go’st*, not whence thou *com’st*.”—*Shak*.

OBS. 37.—But when the verb ends in a sound which will not unite with that of *st* or *s*, the second and third persons are formed by adding *est* and *es*; or, if the first person end in mute *e*, the *st* and *s* render that *e* vocal; so that the verb acquires an additional syllable: as, I *trace*, thou *tracest*, he *traces*; I *pass*, thou *passest*, he *passes*; I *fix*, thou *fixest*, he *fixes*; I *preach*, thou *preachest*, he *preaches*; I *blush*, thou *blushest*, he *blushes*; I *judge*, thou *judgest*, he *judges*. But verbs ending in *o* or *y* preceded by a consonant, do not exactly follow either of the foregoing rules. In these, *y* is changed into *i*; and, to both *o* and *i*, *est* and *es* are added without increase of syllables: as, I *go*, thou *goest*, he *goes*; I *undo*, thou *undoe’st*,\* he *undoes*; I *fly*, thou *fliest*, he *flies*; I *pity*, thou *pitiest*, he *pities*. Thus, in the following lines, *goest* must be pronounced like *ghost*; otherwise, we spoil the measure of the verse:

“Thou *goest* not now with battle, and the voice  
Of war, as once against the rebel hosts;  
Thou *goest* a Judge, and *findst* the guilty bound;  
Thou *goest* to prove, condemn, acquit, reward.”—*Pollok*, B. x.

---

\* The second person singular of the simple verb *do*, is now usually written *dost*, and read *dust*; being permanently contracted in orthography, as well as in pronunciation. And perhaps the compounds may follow; as, Thou *undost*, *outdost*, *misdost*, *overdost*, &c. But exceptions to exceptions are puzzling, even when they conform to the general rule. The Bible has *dost* and *doth* for auxiliaries, and *doest* and *doeth* for principal verbs.

In solemn prose, however, the termination is here made a separate syllable: as, I *go*, thou *goëst*, he *goëth*; I *undo*, thou *undoëst*, he *undoëth*; I *fly*, thou *fliëst*, he *fliëth*; I *pity*, thou *pitiëst*, he *pitiëth*.

OBS. 38.—The auxiliaries *do*, *dost*, *does*,—(pronounced *doo*, *dust*, *duz*; and not as the words *dough*, *dosed*, *doze*,—) *am*, *art*, *is*,—*have*, *hast*, *has*,—being also in frequent use as principal verbs of the present tense, retain their peculiar forms, with distinction of person and number, when they help to form the compound tenses of other verbs. The other auxiliaries are not varied, or ought not to be varied, except in the solemn style. Example of the familiar use: “That thou *may* be found truly owning it.”—*Barclay’s Works*, Vol. i, p. 234.

OBS. 39.—The only regular terminations that are added to English verbs, are *ing*, *d* or *e*, *st* or *est*, *s* or *es*, *th* or *eth* \* *Ing*, and *th* or *eth*, always add a syllable to the verb; except in *doth*, *hath*, *saith*.† The rest, whenever their sound will unite with that of the final syllable of the verb, are usually added without increasing the number of syllables; otherwise, they are separately pronounced. In solemn discourse, however, *ed* and *est* are by most speakers uttered distinctly in all cases; except sometimes when a vowel precedes: as in *sanctified*, *glorified*, which are pronounced as three syllables only. Yet, in spite of this analogy, many readers will have *sanctifiest* and *glorifiest* to be words of four syllables. If this pronunciation is proper, it is only so in solemn prose. The prosody of verse will show how many syllables the poets make: as,

“Thou *diedst*, a most rare boy, of melancholy!”—*Shak.*, *Cymb.*, Act iv, sc. 2.

“Had not a voice thus warn’d me: What thou *seest*,

---

\* N. Butler avers, “The only regular terminations added to verbs are *est*, *s*, *ed*, *edst*, and *ing*.”—*Butler’s Practical Gram.*, p. 81. But he adds, in a marginal note, this information: “The third person singular of the present formerly ended in *eth*. This termination is still sometimes used in the solemn style. Contractions sometimes take place; as, *sayst* for *sayest*.”—*Ibid*. This statement not only imposes a vast deal of *needless irregularity* upon the few inflections admitted by the English verb, but is, so far as it disagrees with mine, a causeless innovation. The terminations rejected, or here regarded as *irregular*, are *d*, *st*, *es*, *th*, and *eth*; while *edst*, which is plainly a combination of *ed* and *st*,—the past ending of the verb with the personal inflection,—is assumed to be one single and regular termination which I had overlooked! It has long been an almost universal doctrine of our grammarians, that regular verbs form their preterits and perfect participles by adding *d* to final *e*, and *ed* to any other radical ending. Such is the teaching of Blair, Brightland, Bullions, Churchill, Coar, Comly, Cooper, Fowle, Frazee, Ingersoll, Kirkham, Lennie, Murray, Weld, Wells, Sanborn, and others, a great multitude. But this author alleges, that, “*Loved* is not formed by adding *d* to *love*, but by adding *ed*, and dropping *e* from *love*.”—*Butler’s Answer to Brown*. Any one is at liberty to think this, if he will. But I see not the use of playing thus with *mute Ees*, adding one to drop an other, and often pretending to drop two under one apostrophe, as in *lov’d*, *lov’s!* To suppose that the second person of the regular preterit, as *lovedst*, is not formed by adding *st* to the first person, is contrary to the analogy of other verbs, and is something worse than an idle whim. And why should the formation of the third person be called *irregular* when it requires *es*, as in *flies*, *denies*, *goes*, *vetoës*, *wishes*, *preaches*, and so forth? In forming *flies* from *fly*, Butler changes “y into *ie*,” on page 20th, adding *s* only; and, on page 11th, “into *i*” only, adding *es*. Uniformity would be better.

† Cooper says, “The termination *eth* is *commonly* contracted into *th*, to prevent the addition of a syllable to the verb, as: *doeth*, *doth*.”—*Plain and Practical Gram.*, p. 59. This, with reference to modern usage, is plainly erroneous. For, when *s* or *es* was substituted for *th* or *eth*, and the familiar use of the latter ceased, this mode of inflecting the verb without increasing its syllables, ceased also, or at least became unusual. It appears that the inflecting of verbs with *th* without a vowel, as well as with *st* without a vowel, was more common in very ancient times than subsequently. Our grammarians of the last century seem to have been more willing to *encumber* the language with syllabic endings, than to *simplify* it by avoiding them. See Observations, 21st, 22d, and 23d, above.

What there thou *seest*, fair creature, is thyself.”—*Milton*, B. iv, l. 467.

“By those thou *woodedst* from death to endless life.”—*Pollok*, B. ix, l. 7.

“Attend: that thou art happy, owe to God;

That thou *continuest* such, owe to thyself”—*Milton*, B. v, l. 520.

OBS. 40.—If the grave and full form of the second person singular must needs be supposed to end rather with the syllable *est* than with *st* only, it is certain that this form may be *contracted*, whenever the verb ends in a sound which will unite with that of *st*. The poets generally employ the briefer or contracted forms; but they seem not to have adopted a uniform and consistent method of writing them. Some usually insert the apostrophe, and, after a single vowel, double the final consonant before *st*; as, *hold’st*, *bidd’st*, *said’st*, *ledd’st*, *wedd’st*, *trimm’st*, *may’st*, *might’st*, and so forth: others, in numerous instances, add *st* only, and form permanent contractions; as, *holdst*, *bidst*, *saidst*, *ledst*, *wedst*, *trimst*, *mayst*, *mightst*, and so forth. Some retain the vowel *e*, in the termination of certain words, and suppress a preceding one; as, *quick’nest*, *happ’nest*, *scatt’rest*, *rend’rest*, *rend’redest*, *slumb’rest*, *slumb’redest*: others contract the termination of such words, and insert the apostrophe; as, *quicken’st*, *happen’st*, *scatter’st*, *render’st*, *render’dst*, *slumber’st*, *slumber’dst*. The nature and idiom of our language, “the accent and pronunciation of it,” incline us to abbreviate or “contract even all our regular verbs;” so as to avoid, if possible, an increase of syllables in the inflection of them. Accordingly, several terminations which formerly constituted distinct syllables, have been either wholly dropped, or blended with the final syllables of the verbs to which they are added. Thus the plural termination *en* has become entirely obsolete; *th* or *eth* is no longer in common use; *ed* is contracted in pronunciation; the ancient *ys* or *is*, of the third person singular, is changed to *s* or *es*, and is usually added without increase of syllables; and *st* or *est* has, in part, adopted the analogy. So that the proper mode of forming these contractions of the second person singular, seems to be, to add *st* only; and to insert no apostrophe, unless a vowel is suppressed from the verb to which this termination is added: as, *thinkst*, *sayst*, *bidst*, *sitst*, *satst*, *lov’st*, *lov’dst*, *slumberst*, *slumber’dst*.

“And know, for that thou *slumberst* on the guard,  
Thou shalt be made to answer at the bar.”—*Cotton*.

OBS. 41.—No man deserves more praise for his attention to English pronunciation, than John Walker. His Pronouncing Dictionary was, for a long period, the best standard of orthoëpy, that our schools possessed. But he seems to me to have missed a figure, in preferring such words as *quick’nest*, *strength’nest*, to the smoother and more regular forms, *quickenst*, *strengthenst*. It is true that these are rough words, in any form you can give them; but let us remember, that needless apostrophes are as rough to the eye, as needless *st*’s to the ear. Our common grammarians are disposed to encumber the language with as many of both as they can find any excuse for, and vastly more than can be sustained by any good argument. In words that are well understood to be contracted in pronunciation, the apostrophe is now less frequently used than it was formerly. Walker says, “This contraction of the participial *ed*, and the verbal *en*, is so fixed an idiom of our pronunciation, that to alter it, would be to alter the sound of the whole language. It must, however, be regretted that it subjects our tongue to some of the most hissing, snapping, clashing, grinding sounds that ever grated the ears of a Vandal; thus, *rasped*, *scratched*, *wrenched*, *bridled*, *fangled*, *birchen*, *hardened*, *strengthened*, *quickenened*, &c. almost frighten us when written as they are actually pronounced, as *rapt*, *scratcht*, *wrencht*, *bridl’d*, *fangl’d*, *birch’n*, *strength’n’d*, *quick’n’d*, &c.; they become still more formidable when

used contractedly in the solemn style, which never ought to be the case; for here instead of *thou strength'n'st* or *strength'n'd'st*, *thou quick'n'st* or *quick'n'd'st*, we ought to pronounce *thou strength'nest* or *strength'nedst*, *thou quick'nest* or *quick'nedst*, which are sufficiently harsh of all conscience.”—*Principles*, No. 359. Here are too many apostrophes; for it does not appear that such words as *strengthenedest* and *quickenest* ever existed, except in the imagination of certain grammarians. In solemn prose one may write, *thou quickenest*, *thou strengthenest*, or *thou quickenedst*, *thou strengthenedst*; but, in the familiar style, or in poetry, it is better to write, *thou quickenst*, *thou strengthenst*, *thou quickened*, *thou strengthened*. This is language which it is possible to utter; and it is foolish to strangle ourselves with strings of rough consonants, merely because they are insisted on by some superficial grammarians. Is it not strange, is it not incredible, that the same hand should have written the two following lines, in the same sentence? Surely, the printer has been at fault.

“With noiseless foot, thou *walkedst* the vales of earth”—

“Most honourable thou *appeared*, and most

To be desired.”—*Pollok's Course of Time*, B. ix, l. 18, and l. 24.

OBS. 42.—It was once a very common practice, to retain the final *y*, in contractions of the preterit or of the second person of most verbs that end in *y*, and to add the consonant terminations *d*, *st*, and *dst*, with an apostrophe before each; as, *try'd* for *tried*, *reply'd* for *replied*, *try'st* for *triest*, *try'dst* for *triedst*. Thus Milton:—

“Thou following *cry'dst* aloud, Return, fair Eve;

Whom *fly'st* thou? whom thou *fly'st*, of him thou art.”—*P. L.*, B. iv, l. 481.

This usage, though it may have been of some advantage as an index to the pronunciation of the words, is a palpable departure from the common rule for spelling such derivatives. That rule is, “The final *y* of a primitive word, when preceded by a consonant, is changed into *i* before an additional termination.” The works of the British poets, except those of the present century, abound with contractions like the foregoing; but late authors, or their printers, have returned to the rule; and the former practice is wearing out and becoming obsolete. Of regular verbs that end in *ay*, *ey*, or *oy*, we have more than half a hundred; all of which usually retain the *y* in their derivatives, agreeably to an other of the rules for spelling. The preterits of these we form by adding *ed* without increase of syllables; as, *display*, *displayed*; *survey*, *surveyed*; *enjoy*, *enjoyed*. These also, in both tenses, may take *st* without increase of syllables; as, *display'st*, *display'dst*; *survey'st*, *survey'dst*; *enjoy'st*, *enjoy'dst*. All these forms, and such as these, are still commonly considered contractions, and therefore written with the apostrophe; but if the termination *st* is sufficient of itself to mark the second person singular, as it certainly is considered to be as regards one half of them, and as it certainly was in the Saxon tongue still more generally, then for the other half there is no need of the apostrophe, because nothing is omitted. *Est*, like *es*, is generally a syllabic termination; but *st*, like *s*, is not. As signs of the third person, the *s* and the *es* are always considered equivalent; and, as signs of the second person, the *st* and the *est* are sometimes, and ought to be always, considered so too. To all verbs that admit the sound, we add the *s* without marking it as a contraction for *es*; and there seems to be no reason at all against adding the *st* in like manner, whenever we choose to form the second person without adding a syllable to the verb. The foregoing observations I commend to the particular attention of all those who hope to write such English as shall do them honour—to every one who, from a spark of literary ambition, may say of himself,

———"I twine  
My hopes of being remembered in my line  
With my land's language."—*Byron's Childe Harold*, Canto iv, st. 9.

### THE CONJUGATION OF VERBS.

The conjugation of a verb is a regular arrangement of its moods, tenses, persons, numbers, and participles.

There are four PRINCIPAL PARTS in the conjugation of every simple and complete verb; namely, the *Present*, the *Preterit*, the *Imperfect Participle*, and the *Perfect Participle*.<sup>\*</sup> A verb which wants any of these parts, is called *defective*; such are most of the auxiliaries.

An *auxiliary* is a short verb prefixed to one of the principal parts of an other verb, to express some particular mode and time of the being, action, or passion. The auxiliaries are *do*, *be*, *have*, *shall*, *will*, *may*, *can*, and *must*, with their variations.

### OBSERVATIONS.

OBS. 1.—The *present*, or the verb in the present tense, is radically the same in all the moods, and is the part from which all the rest are formed. The present infinitive is commonly considered *the root*, or *simplest form*, of the English verb. We usually place the *preposition* *to* before it; but never when with an auxiliary it forms a compound tense that is not infinitive: there are also some other exceptions, which plainly show, that the word *to* is neither a part of the verb, as Cobbett, R. C. Smith, S. Kirkham, and Wells, say it is; nor a part of the infinitive mood, as Hart and many others will have it to be, but a distinct *preposition*. (See, in the *Syntax* of this work, Observations on Rule 18th.) The preterit and the perfect participle are regularly formed by adding *d* or *ed*, and the imperfect participle, by adding *ing*, to the present.

OBS. 2.—The moods and tenses, in English, are formed partly by inflections, or changes made in the verb itself, and partly by the combination of the verb or its participle, with a few short verbs, called *auxiliaries*, or *helping verbs*. This view of the subject, though disputed by some, is sustained by such a preponderance both of authority and of reason, that I shall not trouble the reader with any refutation of those who object to it. Murray the schoolmaster observes, "In the English language, the times and modes of verbs are expressed in a perfect, easy, and beautiful manner, by the aid of a few little words called *auxiliaries*, or *helping verbs*. The possibility of a thing is expressed by *can* or *could*; the liberty to do a thing, by *may* or *might*; the inclination of the will, by *will* or *would*; the

---

<sup>\*</sup> These are what William Ward, in his *Practical Grammar*, written about 1765, denominated "the CAPITAL FORMS, or ROOTS, of the English Verb." Their number too is the same. "And these Roots," says he, "are considered as *Four* in each verb; although in many verbs two of them are alike, and in some few three are alike."—P. 50. Few modern grammarians have been careful to display these Chief Terms, or Principal Parts, properly. Many say nothing about them. Some speak of *three*, and name them faultily. Thus Wells: "The three *principal parts* of a verb are the *present tense*, the *past tense*, and the *perfect participle*."—*School Gram.*, 113th Ed., p. 92. Now a whole "*tense*" is something more than one verbal form, and Wells's "perfect participle" includes the auxiliary "*having*." Hence, in stead of *write*, *wrote*, *writing*, *written*, (the true principal parts of a certain verb,) one might take, under Wells's description, either of these threes, both entirely false: *am writing*, *did write*, and *having written*; or, *do write*, *wrotest*, and *having written*. But *writing*, being the root of the "Progressive Form of the Verb," is far more worthy to be here counted a chief term, than *wrote*, the preterit, which occurs only in one tense, and never receives an auxiliary. So of other verbs. This sort of treatment of the Principal Parts, is a very grave defect in sundry schemes of grammar.

necessity of a thing, by *must* or *ought*, *shall* or *should*. The preposition *to* is never expressed after the helping verbs, except after *ought*.”—*Alex. Murray’s Gram.*, p. 112. See nearly the same words in *Buchanan’s English Syntax*, p. 36; and in *the British Gram.*, p. 125.

OBS. 3.—These authors are wrong in calling *ought* a helping verb, and so is Oliver B. Peirce, in calling “*ought to*,” and “*ought to have*” auxiliaries; for no auxiliary ever admits the preposition *to* after it or into it: and Murray of Holdgate is no less in fault, for calling *let* an auxiliary; because no mere auxiliary ever governs the objective case. The sentences, “He *ought to help* you,” and, “*Let him help* you,” severally involve two different moods: they are equivalent to, “It *is his duty to help* you;”—“*Permit him to help* you.” Hence *ought* and *let* are not auxiliaries, but principal verbs.

OBS. 4.—Though most of the auxiliaries are defective, when compared with other verbs; yet these three, *do*, *be*, and *have*, being also principal verbs, are complete: but the participles of *do* and *have* are not used as auxiliaries; unless *having*, which helps to form the third or “compound perfect” participle, (as *having loved*,) may be considered such. The other auxiliaries have no participles.

OBS. 5.—English verbs are principally conjugated by means of auxiliaries; the only tenses which can be formed by the simple verb, being the present and the imperfect; as, I *love*, I *loved*. And even here an auxiliary is usually preferred in questions and negations; as, “*Do* you love?”—“You *do* not *love*.” “*Did* he *love*?”—“He *did* not *love*.” “*Do* I not yet *grieve*?”—“*Did* she not *die*?” All the other tenses, even in their simplest form, are compounds.

OBS. 6.—Dr. Johnson says, “*Do* is sometimes used superfluously, as *I do love*, *I did love*; simply for *I love*, or *I loved*; but this is considered as a *vitious* mode of speech.”—*Gram.*, in *4to Dict.*, p. 8. He also somewhere tells us, that these auxiliaries “are not proper before *be* and *have*,” as, “*I do be*,” for *I am*; “*I did have*,” for *I had*. The latter remark is generally true, and it ought to be remembered;\* but, in the *imperative mood*, *be* and *have* will perhaps admit the emphatic word *do* before them, in a colloquial style: as, “Now *do be* careful;”—“*Do have* a little discretion.” Sanborn repeatedly puts *do* before *be*, in this mood: as, “*Do* you *be*. *Do* you *be* guarded. *Do* thou *be*. *Do* thou *be* guarded.”—*Analytical Gram.*, p. 150. “*Do* thou *be* watchful.”—*Ib.*, p. 155. In these instances, he must have forgotten that he had elsewhere said positively, that, “*Do*, as an auxiliary, *is never used* with the verb *be* or *am*.”—*Ib.*, p. 112. In the other moods, it is seldom, if ever, proper before *be*; but it is sometimes used before *have*, especially with a negative: as, “Those modes of charity which *do not have* in view the cultivation of moral excellence, are essentially defective.”—*Wayland’s Moral Science*, p. 428. “Surely, the law of God, whether natural or revealed, *does not have* respect merely to the external conduct of men.”—*Stuart’s Commentary on Romans*, p. 158. “And each day of our lives *do we have* occasion to see and lament it.”—*Dr. Bartlett’s Lecture on Health*, p. 5. “Verbs, in themselves considered, *do not have* person and number.”—*R. C. Smith’s New Gram.*, p. 21. [This notion of Smith’s is absurd. Kirkham

---

\* A grammarian should know better, than to exhibit, *as a paradigm* for school-boys, such English as the following: “I do have, Thou dost have, He does have: We do have, You do have, They do have.”—*Everest’s Gram.*, p. 106. “I did have, Thou didst have, He did have: We did have, You did have, They did have.”—*Ib.*, p. 107. I know not whether any one has yet thought of conjugating the verb *be* after this fashion; but the attempt to introduce, “*am being*, *is being*,” &c., is an innovation much worse.

taught the same as regards “person.”] In the following example, *does he* is used for *is*,—the auxiliary *is*,—and perhaps allowably: “It is certain from scripture, that the same person *does* in the course of life many times offend and *be* forgiven.”—*West’s Letters to a Young Lady*, p. 182.

OBS. 7.—In the compound tenses, there is never any variation of ending for the different persons and numbers, except in the *first auxiliary*: as, “Thou *wilt have finished* it,” not, “Thou *wilt hast finishedst* it,” for this is nonsense. And even for the former, it is better to say, in the familiar style, “Thou *will have finished* it,” for it is characteristic of many of the auxiliaries, that, unlike other verbs, they are not varied by *s* or *eth*, in the third person singular, and never by *st* or *est*, in the second person singular, except in the solemn style. Thus all the auxiliaries of the potential mood, as well as *shall* and *will* of the indicative, are without inflection in the third person singular, though *will*, as a principal verb, makes *wills* or *willeth*, as well as *willest*, in the indicative present. Hence there appears a tendency in the language, to confine the inflection of its verbs to *this tense only*; and to the auxiliary *have*, *hast*, *has*, which is essentially present, though used with a participle to form the perfect. *Do*, *dost*, *does*, and *am*, *art*, *is*, whether used as auxiliaries or as principal verbs, are always of the indicative present.

OBS. 8.—The word *need*,—(though, as a principal verb and transitive, it is unquestionably both regular and complete,—having all the requisite parts, *need*, *needed*, *needing*, *needed*,—and being necessarily inflected in the indicative present, as, I *need*, thou *needst* or *needest*, he *needs* or *needeth*,—) is so frequently used without inflection, when placed before an other verb to express a necessity of the being, action, or passion, that one may well question whether it has not become, under these circumstances, an *auxiliary* of the potential mood; and therefore proper to be used, like all the other auxiliaries of this mood, without change of termination. I have not yet knowingly used it so myself, nor does it appear to have been classed with the auxiliaries, by any of our grammarians, except Webster.\* I shall therefore not presume to say now, with positiveness, that it deserves this rank; (though I incline to think it does;) but rather quote such instances as have occurred to me in reading, and leave the student to take his choice, whether to condemn as bad English the uninflected examples, or to justify them in this manner. “He that can swim, *need* not despair to fly.”—*Johnson’s Rasselas*, p. 29. “One therefore *needs* not expect to do it.”—*Kirkham’s Elocution*, p. 155. “In so doing I should only record some vain opinions of this age, which a future one *need* not know.”—*Rush, on the Voice*, p. 345. “That a boy *needs* not be kept at school.”—LISDSEY: in *Kirkham’s Elocution*, p. 164. “No man *need* promise, unless he please.”—*Wayland’s Moral Science*, p. 312. “What better reason *needs* be given?”—*Campbell’s Rhet.*, p. 51. “He *need* assign no other reason for his conduct.”—*Wayland, ib.*, p. 214. “Sow there is nothing that a man *needs* be ashamed of in all this.”—*Collier’s Antoninus*, p. 45. “No notice *need* be taken of the advantages.”—*Walker’s Rhyming Dict.*, Vol. ii, p. 304. “Yet it *needs* not be repeated.”—*Bicknell’s Gram.*, Part ii, p. 51. “He *need* not be anxious.”—*Greenleaf’s Gram. Simplified*, p. 38. “He *needs* not be afraid.”—*Fisk’s Gram. Simplified*, p. 124. “He who will not learn to spell, *needs* not learn to write.”—*Red Book*, p. 22. “The heeder *need* be under

\* Hiley borrows from Webster the remark, that, “*Need*, when intransitive, is formed *like an auxiliary*, and is followed by a verb, without the prefix *to*; as, ‘He *need go* no farther.’”—*Hiley’s Gram.*, p. 90; *Webster’s Imp. Gram.*, p. 127; *Philos. Gram.*, p. 178. But he forbears to class it with the auxiliaries, and even contradicts himself, by a subsequent remark taken from Dr. Campbell, that, for the sake of “ANALOGY, ‘*he needs*,’ ‘*he dares*,’ are preferable to ‘*he need*,’ ‘*he dare*,’”—*Hiley’s Gram.*, p. 145; *Campbell’s Rhet.*, p. 175

no fear.”—*Greenleaf’s Gram.*, p. 38.\* “More *need* not be said about it.”—*Cobbett’s E. Gram.*, ¶ 272. “The object *needs* not be expressed.”—*Booth’s Introduct. to Dict.*, p. 37. “Indeed, there *need* be no such thing.”—*Fosdick’s De Sacy*, p. 71. “This *needs* to be illustrated.”—*Ib.*, p. 81. “And no part of the sentence *need* be omitted.”—*Parkhurst’s Grammar for Beginners*, p. 114. “The learner *needs* to know what sort of words are called verbs.”—*Ib.*, p. 6. “No one *need* be apprehensive of suffering by faults of this kind.”—*Sheridan’s Elocution*, p. 171. “The student who has bought any of the former copies *needs* not repent.”—*Dr. Johnson, Adv. to Dict.* “He *need* not enumerate their names.”—*Edward’s First Lessons in Grammar*, p. 38. “A quotation consisting of a word or two only *need* not begin with a capital.”—*Churchill’s Gram.*, p. 383. “Their sex is commonly known, and *needs* not to be marked.”—*Ib.*, p. 72; *Murray’s Octavo Gram.*, 51. “One *need* only open Lord Clarendon’s history, to find examples every where.”—*Blair’s Rhet.*, p. 108. “Their sex is commonly known, and *needs* not be marked.”—*Lowth’s Gram.*, p. 21; *Murray’s Duodecimo Gram.*, p. 51. “Nobody *need* be afraid he shall not have scope enough.”—LOCKE: in *Sanborn’s Gram.*, p. 168. “No part of the science of language, *needs to be ever* uninteresting to the pursuer.”—*Nutting’s Gram.*, p. vii. “The exact amount of knowledge is not, and *need* not be, great.”—*Todd’s Student’s Manual*, p. 44. “He *needs to* act under a motive which is all-pervading.”—*Ib.*, p. 375. “What *need* be said, will not occupy a long space.”—*Ib.*, p. 244. “The sign TO *needs* not always be used.”—*Bucke’s Gram.*, p. 96. “Such as he *need* not be ashamed of.”—*Snelling’s Gift for Scribblers*, p. 23.

“*Needst* thou—*need* any one on earth—despair?”—*Ib.*, p. 32.

“Take timely counsel; if your dire disease  
Admits no cure, it *needs* not to displease.”—*Ib.*, p. 14.

OBS. 9.—If *need* is to be recognized as an auxiliary of the potential mood, it must be understood to belong to two tenses; the present and the perfect; like *may*, *can*, and *must*: as, “He *need* not *go*, he *need* not *have gone*; Thou *need* not *go*, Thou *need* not *have gone*,” or, in the solemn style, “Thou *needst* not *go*, Thou *needst* not *have gone*.” If, on the contrary, we will have it to be always a principal verb, the distinction of time should belong to itself, and also the distinction of person and number, in the parts which require it: as, “He *needs* not *go*. He *needed* not *go*; Thou *needst* not *go*, Thou *needed* not *go*,” or, in the solemn style, “Thou *needest* not *go*, Thou *neededst* not *go*.” Whether it can be right to say, “He *needed* not *have gone*,” is at least questionable. From the observations of Murray, upon relative tenses, under his thirteenth rule of syntax, it seems fair to infer that he would have judged this phraseology erroneous. Again, “He *needs* not *have gone*,” appears to be yet more objectionable, though for the same reason. And if, “He *need* not *have gone*,” is a correct expression, *need* is clearly proved to be an *auxiliary*, and the three words taken together must form the potential perfect. And so of the plural; for the argument is from the connexion of the tenses, and not merely from the tendency of auxiliaries to reject inflection: as, “They *need* not *have been* under great concern about their public affairs.”—*Hutchinson’s History*, i, 194, From these examples, it may be seen that an auxiliary and a principal verb have some essential difference; though these who dislike the doctrine of compound tenses, pretend not to discern any. Take some further citations; a few of which are erroneous in respect to time. And observe also that the regular verb sometimes admits the preposition *to* after it: “There is great dignity in being

\* This grammarian here uses *need* for the third person singular, designedly, and makes a remark for the justification of the practice; but he neither calls the word an auxiliary, nor cites any other than anonymous examples, which are, perhaps, of his own invention.

waited for,' said one who had the habit of tardiness, and who *had* not much else of which he *need* be vain."—*Students Manual*, p. 64. "But he *needed* not *have gone* so far for more instances."—*Johnson's Gram. Com.*, p. 143. "He *need* not *have said*, 'perhaps the virtue.'"—*Sedgwick's Economy*, p. 196. "I *needed* not *to ask* how she felt."—*Abbott's Young Christian*, p. 84. "It *need* not *have been* so."—*Ib.*, p. 111. "The most unaccommodating politician *need* not absolutely *want* friends."—*Hunts Feast of the Poets*, p. iii. "Which therefore *needs* not be introduced with much precaution."—*Campbell's Rhet.*, p. 326. "When an obscurer term *needs* to be explained by one that is clearer."—*Ib.*, p. 367. "Though, if she had died younger, she *need* not *have known it*."—*West's Letters*, p. 120. "Nothing *need* be said, but that they were the *most perfect* barbarisms."—*Blair's Rhet.*, p. 470. "He *need* not go."—*Goodenow's Gram.*, p. 36. "He *needed* but use the word *body*."—LOCKE: *in Joh. Dict.* "He *need* not be required to use them."—*Parker's Eng. Composition*, p. 50. "The last consonant of *appear* need not be doubled."—*Dr. Webster*. "It *needs* the less *to be inforced*."—*Brown's Estimate*, ii, 158. "Of these pieces of his, we *shall not need to give* any particular account."—*Seneca's Morals*, p. vi "And therefore I *shall need say* the less of them."—*Scougal*, p. 1101. "This compounding of words *need* occasion no surprise."—*Cardell's Essay on Language*, p. 87.

"Therefore stay, thou *needst* not to be gone."—*Shakspeare*.

"Thou *need* na *start* awa sae hasty."—*Burns, Poems*, p. 15.

"Thou *need* na *jouk* behint the hallan."—*Id.*, *ib.*, p. 67.

OBS. 10.—The auxiliaries, except *must*, which is invariable, have severally two forms in respect to tense, or time; and when inflected in the second and third persons singular, are usually varied in the following manner:—

#### TO DO.

PRESENT TENSE; AND SIGN OF THE INDICATIVE PRESENT.

*Sing.* I do, thou dost, he does;                      *Plur.* We do, you do, they do.

IMPERFECT TENSE; AND SIGN OF THE INDICATIVE IMPERFECT.

*Sing.* I did, thou didst, he did;                      *Plur.* We did, you did, they did.

#### TO BE.

PRESENT TENSE; AND SIGN OF THE INDICATIVE PRESENT.

*Sing.* I am, thou art, he is;                      *Plur.* We are, you are, they are.

IMPERFECT TENSE; AND SIGN OF THE INDICATIVE IMPERFECT.

*Sing.* I was, thou wast, he was;                      *Plur.* We were, you were; they were.

#### TO HAVE.

PRESENT TENSE; BUT SIGN OF THE INDICATIVE PERFECT.

*Sing.* I have, thou hast, he has; *Plur.* We have, you have, they have.

IMPERFECT TENSE; BUT SIGN OF THE INDICATIVE PLUPERFECT.

*Sing.* I had, thou hadst, he had; *Plur.* We had, you had, they had.

SHALL AND WILL.

These auxiliaries have distinct meanings, and, as signs of the future, they are interchanged thus:

PRESENT TENSE; BUT SIGNS OF THE INDICATIVE FIRST-FUTURE.

1. Simply to express a future action or event:—

*Sing.* I shall, thou wilt, he will; *Plur.* We shall, you will, they will.

2. To express a promise, command, or threat:—

*Sing.:* I will, thou shalt, he shall; *Plur.* We will, you shall, they shall.

IMPERFECT TENSE; BUT, AS SIGNS, AORIST, OR INDEFINITE.

1. Used with reference to duty or expediency:—

*Sing.* I should, thou shouldst, he should;

*Plur.* We should, you should, they should.

2. Used with reference to volition or desire:—

*Sing.* I would, thou wouldst, he would;

*Plur.* We would, you would, they would.

MAY.

PRESENT TENSE; AND SIGN OF THE POTENTIAL PRESENT.

*Sing.* I may, thou mayst, he may; *Plur.* We may, you may, they may.

IMPERFECT TENSE; AND SIGN OF THE POTENTIAL IMPERFECT.

*Sing.* I might, thou mightst, he might;

*Plur.* We might, you might, they might.

CAN.

PRESENT TENSE; AND SIGN OF THE POTENTIAL PRESENT.

*Sing.* I can, thou canst, he can; *Plur.* We can, you can, they can.

## IMPERFECT TENSE; AND SIGN OF THE POTENTIAL IMPERFECT.

*Sing.* I could, thou couldst, he could; *Plur.* We could, you could, they could.

## MUST.

## PRESENT TENSE; AND SIGN OF THE POTENTIAL PRESENT.

*Sing.* I must, thou must, he must; *Plur.* We must, you must, they must.

If must is ever used in the sense of the Imperfect tense, or Preterit, the form is the same as that of the Present: this word is entirely invariable.

OBS. 11.—Several of the auxiliaries are occasionally used as mere expletives, being quite unnecessary to the sense: as, 1. DO and DID: “And it is night, wherein all the beasts of the forest *do* creep forth.”—*Psalms*, civ, 20. “And ye, that on the sands with printless foot *do* chase the ebbing Neptune, and *do* fly him when he comes back.”—*Shak.* “And if a man *did* need a poison now.”—*Id.* This needless use of do and did is now avoided by good writers. 2. SHALL, SHOULD, and COULD: “Men *shall* deal unadvisedly sometimes, which after-hours give leisure to repent of.’ I *should* advise you to proceed. I *should* think it would succeed. He, it *should* seem, thinks otherwise.”—*W. Allen’s Gram.*, p. 65. “I *could* wish you to go.”—*Ib.*, p. 71. 3. WILL, &c. The following are nearly of the same character, but not exactly: “The isle is full of noises; sometimes a thousand twanging instruments *will* hum about mine ears.”—*Shak.* “In their evening sports she *would* steal in amongst them.”—*Barbauld.*

“His listless length at noontide *would* he stretch.”—*Gray.*

OBS. 12.—As our old writers often formed the infinitive in *en*, so they sometimes dropped the termination of the perfect participle. Hence we find, in the infancy of the language, *done* used for *do*, and *do* for *done*; and that by the same hand, with like changes in other verbs: as, “Thou canst nothing *done*.”—*Chaucer.* “As he was wont to *done*.”—*Id.* “The treson that to women hath be *do*.”—*Id.* “For to *ben* honourable and free.”—*Id.* “I am sworn to *holden* it secrete.”—*Id.* “Our nature God hath to him *unyte*.”—*Douglas.* “None otherwise negligent than I you saie haue I not *bee*.”—*Id.* See *W. Allen’s E. Gram.*, p. 97.

“But nethless the thyng is *do*,  
That fals god was soone *go*.”—GOWER: *H. Tooke*, Vol. i, p. 376.

OBS. 13.—“*May* is from the Anglo-Saxon, *mægan*, to be able. In the parent language also, it is used as an auxiliary. It is exhibited by Fortescue, as a principal verb; ‘They shall *may* do it:’ i. e. they shall be able (to) do it.”—*W. Allen’s Gram.*, p. 70. “*May not*, was formerly used for *must not*; as, ‘Graces for which we *may not* cease to sue.’ *Hooker.*”—*Ib.*, p. 91. “*May* frequently expresses doubt of the fact; as, ‘I *may* have the book in my library, but I think I have not.’ It is used also, to express doubt, or a consequence, with a future signification; as, ‘I *may* recover the use of my limbs, but I see little probability of it.’—‘That they *may* receive me into their houses.’ *Luke*, xvi, 4.”—*Churchill’s Gram.*, p. 247. In these latter instances, the potential present is akin to the subjunctive. Hence Lowth and others improperly call “I *may love*,” &c. the subjunctive mood. Others, for the same reason, and

with as little propriety, deny that we have any subjunctive mood; alleging an ellipsis in every thing that bears that name: as, “If it (*may*) *be* possible, live peaceably with all men.’ Scriptures.”—*W. Allen’s Gram.*, p. 61. *May* is also a sign of wishing, and consequently occurs often in prayer: as, “*May* it be thy good pleasure;”—“O that it *may* please thee;”—“*Mayst* thou be pleased.” Hence the potential is akin also to the imperative: the phrases, “Thy will be done,”—“*May* thy will be done,”—“Be thy will done,”—“*Let* thy will be done,”—are alike in meaning, but not in mood or construction.

OBS. 14.—*Can*, to be able, is etymologically the same as the regular verbs *ken*, to see, and *con*, to learn; all of them being derived from the Saxon *connan* or *cunnan*, to know: whence also the adjective cunning, which was formerly a participle. In the following example *will* and *can* are principal verbs: “In evil, the best condition is, not to *will*; the second, not to *can*.”—*Ld. Bacon*. “That a verb which signifies knowledge, may also signify power, appears from these examples: *Je ne saurois, I should not know how*, (i. e. *could* not.) Ασφαλίσασθε ὡς οἴδατε, Strengthen it as you *know how*, (i. e. as you *can*.) *Nescio mentiri, I know not how to* (i.e. *I cannot*) *lie*.”—*W. Allen’s Gram.*, p. 71. *Shall*, Saxon *sceal*, originally signified to *owe*; for which reason *should* literally means *ought*. In the following example from Chaucer, *shall* is a principal verb, with its original meaning:

“For, by the faith I *shall* to God, I wene,  
Was neuer straungir none in hir degre.”—*W. Allen’s Gram.*, p. 64.

OBS. 15.—*Do* and *did* are auxiliary only to the present infinitive, or the radical verb; as, *do throw, did throw*: thus the mood of *do throw* or *to throw* is marked by *do* or *to*. *Be*, in all its parts, is auxiliary to either of the simple participles; as, *to be throwing, to be thrown; I am throwing, I am thrown*: and so, through the whole conjugation. *Have* and *had*, in their literal use, are auxiliary to the perfect participle only; as, *have thrown, had thrown*. *Have* is from the Saxon *habban*, to possess; and, from the nature of the perfect participle, the tenses thus formed, suggest in general a completion of the action. The French idiom is similar to this: as, *J’ai vu*, I have seen. *Shall* and *should, will* and *would, may* and *might, can* and *could, must*, and also *need*, (*if we call the last a helping verb*,) *are severally auxiliary to both forms of the infinitive, and to these only: as, shall throw, shall have thrown; should throw, should have thrown*; and so of all the rest.

OBS. 16.—The form of the indicative pluperfect is sometimes used in lieu of the potential pluperfect; as, “If all the world could have seen it, the wo *had been* universal.”—*Shakspeare*. That is,—“*would have been* universal.” “I *had been drowned*, but that the shore was shelvy and shallow.”—*Id*. That is,—“I *should have been drowned*.” This mode of expression may be referred to the figure *enallage*, in which one word or one modification is used for an other. Similar to this is the use of *were* for *would be*: “It *were* injustice to deny the execution of the law to any individual;” that is, “it *would* be injustice.”—*Murray’s Grammar*, p. 89. In some instances, *were* and *had been* seem to have the same import; as, “Good *were* it for that man if he had never been born.”—*Mark*, xiv, 21. “It *had been* good for that man if he had not been born.”—*Matt.*, xxvi, 24. In prose, all these licenses are needless, if not absolutely improper. In poetry, their brevity may commend them to preference; but to this style, I think, they ought to be confined: as,

“That *had been* just, replied the reverend bard;  
But done, fair youth, thou ne’er *hadst met* me here.”—*Pollok*.

“The keystones of the arch!—though all were o’er,  
For us repeople *were* the solitary shore.”—*Byron*.
